Attn: Mr. Shaun Charles, WV DHHR Chief Information Officer

RE: # CMA 0511 3084 HHR 1800000007: Change Order / Cost Extension of Central Delivery Order (CDO) MIS2400000002 1) for the WV PATH Child Welfare Socially Necessary Services Statement of Work to Year 7

Mr. Charles:

Optum submits the above referenced Change Order / Cost Extension of Central Delivery Order CDO 0511 3839 MIS2400000002 1 in accordance with the terms and conditions of the WV IES master contract (# CMA 0511 3084 HHR 1800000007) to continue the work outlined within the Statement of Work (SOW) associated with the CDO as listed below.

Contract year 6 hours for this delivery order were liquidated as part of the process to move prior year hours to contract year 7 of the master contract. Now that those hours have been moved to contract year 7, we are requesting to have hours allocated to this delivery order as outlined in the table below.

Optum understands and requests the effective end date of the SOW will be through November 16, 2024, which would become the new expiration date of the CDO. All work associated with this Change Order will be in accordance with the pricing, terms, and conditions of the WV IES master contract.

1 Cost Proposal Introduction

Optum is pleased to submit this Cost Proposal for West Virginia's Integrated Eligibility Solution (IES) RFP. Our solution is truly modular, modern, and outcomes driven using partners and products that are known and used by DHHR and the State of West Virginia. We have taken an approach to reuse and COTS that is very different from a traditional transfer approach. The traditional approach requires customization of previously delivered monolithic systems that are glued together for use in a new state. Our modular approach achieves a much lower total cost of ownership and reduced operations and maintenance (O&M) costs using a loosely coupled integration through a common integration framework.

Optum developed our cost estimate for the WV IES by following a bottoms-up approach that considered all of the requirements in the RFP. We matched the requirements against our existing IE product functionality and solutions from our partner organizations. We then sized the remaining requirements that require configuration or development. This sizing and estimation process was based on our experience developing large scale health and human services systems. Industry standards were applied to arrive at the full DDI cost that spans all phases of the software development lifecycle. Costs were reviewed and refined based on feedback from subject matter experts as well as our existing knowledge of the size and complexity of current systems supporting West Virginia.

Similarly, M&O costs were modeled and estimated based on our experience and expertise managing large scale systems. We have many years' of actual M&O activity data, and we used that data to model the WV IES work effort. This model is based on similar system profiles and implementations and takes into account cross-module efficiencies. These costs were also vetted extensively to confirm that Optum is keeping costs as low as possible while still ensuring we are providing a fully ITIL-compliant operation.

Infrastructure costs were based on models of the computing power needed to host the WV IES, and take advantage of the economies of scale Optum can provide through our own data centers that currently support thousands of customer applications.

Our Purchasing Affidavit is provided in Appendix 3 of our Technical Proposal response.

2 Costing Assumptions

In the following table, we document the assumptions we used while developing our cost proposal.

#	Cost Assumption
1	Tools and accelerators may be deployed and used during the transformation of the OSCAR application. Any customization to these tools and accelerators by Optum or its subcontractors will be at our own cost, and will be completed to support the automated transformation of programs written in the Natural programming language. The State of West Virginia shall not claim any ownership rights to these tools and accelerators.
2	All sizing, user counts, current system configuration detail, and software licensing counts are based on information from the RFP, the Procurement Library, and the subsequent answers to vendor questions provided by DHHR.
3	We will leverage West Virginia's Northwood's document management solution, which includes the State's current document repository (Hyland Onbase), and the State's current document imaging and workflow (Compass).
4	We assumed that the State's mailroom will capture and scan all paper documents in the same manner they do today in support of the legacy solution.
5	The project plan is contingent upon timely State decisions, availability of subject matter experts, and provision of requested data (e.g. for data conversion) throughout the life of the contract.
6	Optum assumes that a remote backup facility means a place where full and incremental backups of the system will be stored.
7	The DDI schedule assumed a start date of September 25, 2017. Any deviation from this start date may result in changes to the milestone and delivery dates shown in the proposal and in the draft Detailed Project Schedule.
8	The DDI schedule assumes a pilot for most of the releases, consisting of 1-2 counties per pilot, and assumes that the State resources for the selected pilot counties will be able to participate and provide feedback during the pilot period.
9	Sample Natural programs of the OSCAR system shall be supplied to Optum during customization to verify the effectiveness of transformation and further fine-tuning to derive maximum efficiency of automation.
10	After acceptance of the design of the new WV IES domain model, any changes to that domain model or data conversion scripts due to subsequent changes to the legacy applications (e.g. OSCAR, FACTS, RAPIDS) will be handled through a change management process.
11	Entrance and exit criteria for each DDI phase will be mutually agreed upon and will be the basis for determining the commencement/conclusion for each phase. For example, the entry point for the pilots will assume a certain level of acceptable defects (e.g., zero Severity 1 and 2 defects).
12	Our pricing assumes we are afforded an opportunity to discuss with the State payment terms that includes the approval process around deliverable acceptance of milestones, and to have the resulting contract reflect these terms and process.
13	In the event specifications only reference "based on West Virginia business rules" or "defined by the state", and are not further defined, our interpretation is that such specifications meet federal regulations and requirements.

#	Cost Assumption
14	Optum is proposing a complete solution for the State's acceptance in year three. Optum is assuming responsibility for those expenses required to obtain and maintain access to State systems, such as the hardware/software, network infrastructure, and any licensing costs. Consistent with the State's instruction to include maintenance and operations costs only after acceptance of the complete solution, Optum has included those expenses as part of the DDI cost in contract years one and two.
15	Optum will take over existing computing costs, as necessary, through modernization. We assumed the current West Virginia mainframe chargeback is: <ul style="list-style-type: none"> • \$70k/month for Mainframe Batch Cost • \$143k/month for Mainframe Online Cost These costs are reflected as part of the modernization effort.
16	We assume we will be allowed use the State's licenses until they expire. Upon expiration, we will assume the cost of the new licenses. The State will transfer the legacy licenses where permissible. Otherwise, Optum will manage and pay the maintenance cost of software licenses on behalf of the State.
17	Legacy system licensing fees paid by Optum will continue until respective systems go-live into production.
18	Based on materials provided in the procurement library, West Virginia has a benefit population of 750,000. We assumed that 300,000 documents will require e-signatures.
19	We assume the State will continue to provide M&O support for legacy FACTS and OSCAR until the modernization of these systems is implemented. At that time, Optum will provide M&O services for child welfare and child support functionality.
20	Based on the "DOC064_Alerts, Reports, Letters, Forms, Notices, and Interfaces Inventory" worksheet provided in the procurement library and on the requirement specified in Section 4.3.11 that we should assume a five percent reduction in the number of reports, forms/notices/letters, and alerts, we have estimated the number of reports that will need to be converted or developed for use with the existing data marts is 796, of which 319 are currently Cognos reports and 477 are either not currently Cognos reports or are new reports.
21	We are assuming we will use the state's existing Informatica MDM solution.
22	Optum and the State will work together to optimize data processing in legacy systems prior to conversion, with the objective of minimizing additional conversion activities later.
23	Once legacy data has been migrated to the WV IES, that same data will not be migrated back to any legacy systems.
24	Any delays or inability to meet the project plan due to current DHHR third-party vendors' existing contractual obligations, which are outside Optum's control, are the State's responsibility to resolve.
25	The State will supply telephone and access numbers for the State AVRS/IVR solution at their cost.
26	We assumed that the AVRS/IVR will route calls to the existing State AVRS/IVR via the existing toll-free number used by the State.
27	Call volume estimates are based on information provided in the RFP and in the Procurement Library. Optum has projected 3,000 Technical Support Call Center contacts monthly.

#	Cost Assumption
28	Our pricing assumes that software whose functionality must be accessed by the State, licensing shall be for external use. For software that is simply part of Optum's set of tools provided to deliver RFP-required services, Optum will obtain licenses for our internal use but in support of the State.
29	License assumptions are based on the quantities provided in the license inventory list in the Procurement Library. Additional users required to accommodate growth may be subject to RFP Sections 5.25 and 5.50.
30	Optum assumes that the license access rights provided by Optum to the State for software provided under a software-as-a-service model will be used by the State solely in conjunction with the WV IES project, and not used independent of such services or applications unless mutually agreed.
31	Optum assumes that existing external integrations present in the Oracle SOA ESB will be reused as part of the WV IES, in conjunction with Optum's integration layer.
32	Optum can make no claims nor retain responsibility for public Internet performance or failures of individual users' private ISP performance or failures. Optum will make every effort to design solutions with normal Internet functioning in mind.
33	We are assuming that we will leverage West Virginia's provider management solution for all Medicaid and non-Medicaid providers, with the exception of the Childcare providers.
34	Our proposed security approach will be used for the new WV IES platform and does not implement new security to legacy FACTS, OSCAR or RAPIDS application environments.
35	Optum assumed a maximum of 2,000 Child Care Provider log-ins/month when sizing this portion of the IES.

3. Attachment C: Cost Sheet

Our approach includes a separate pool capped at \$50,000 per year, as per Mandatory Requirement 5.50, reserved for modifications and enhancements that translate to direct costs rather than hours. The Agency would approve such costs through the change management process to be agreed upon after contract award.

**The items pre-checked are required before a Purchase Requisition may be submitted to the Purchasing Division. Failure to complete and verify this documentation may result in rejection of the requisition back to the agency. It is up to the agency procurement officer to determine if pre-approvals, insurance, or other documentation is needed for the purchase. The referenced information below may be used to make this determination.*

For Purchasing Division Use Only:

I have reviewed the requisition identified above and find that it is sufficient to advertise publicly to the vendor community. My review does not preclude the possibility that the vendor community, or some other entity, will identify an area of concern; however, should such issues or concerns arise, they will be reviewed and addressed as may be appropriate.
