Ranadheer Gudupaty/ Senior Programmers/ Database Administrator

Summary

12+ years of experience in designing and building Complex Business components, developing Multi-Tier Web Applications using Spring, Struts, JPA, Web Services, EJB, PL/SQL, and AJAX. Extensive experience in all functions of the Project Life Cycle from Initiation & Feasibility Analysis, Business Function Study, Requirement Finalization, Project Scoping, Task Break, Effort & Time Estimation, Costing & Project Budgeting, Resource Allocation, Scheduling, Risk Management, Execution Control Planning/Monitoring to Delivery & Closure. Proficient in using PL/SQL to write Stored Procedures, Functions, and Triggers and experience in writing queries, using, DB2 (Midrange and z/os), Oracle 8i/9i/10g, and MySQL. Hands-on experience on Ant / Maven & Jenkins for project build/test / deployment, Log4j/SL4j for error logging and debugging, JUnit, for unit and integration testing. Ranadheer has the same client experience with **MACC (Mid Atlantic Career Consortium**), State of West Virginia.

Education/Certifications

- Bachelor of Technology, Kakatiya University

Technical Skills

Languages	Java1.6/1.7/1.8, ASP, Visual Basic, SQL, HQL, HTML, XSL, and COBOL.
Application Server	JBoss EAP 6.x/7.x, IBM WebSphere 8.0, BEA Web logic 8.1, COM/COM+
Web Server	Tomcat 4.1/3.3, Apache Server, MS IIS.
Technologies	Java, J2EE, JDBC, Java Beans, JSP, JSON, HTML, CSS, Servlets, EJB, JNDI, IBM MQ, JavaScript, AJAX, JQuery, node.js, Junit, Mockito, PowerMock, SOA based services, SOAP, rest services, FTP, SFTP, connect:direct, MoveIT, LDAP, Maven, Ant, Business objects, data services, SQL server Analysis services, TWS, AutoSys, Apigee
Frameworks	JSF, prime faces, Hibernate, Struts, Spring MVC, Spring JDBC, JPA, Siege 2.0,3.0 (Proprietary Framework like Struts)
XML Technologies	XML, XSL, XSLT, SAX, DOM, AXIS, JAXB
IDE	Eclipse, My Eclipse, Net Beans, intelliJ, RAD, Dreamweaver
Project Management	MS Projects, MS Excel, MS Word, Visio, Microsoft tools
Version Control Tools	GitHub, Bitbucket, Star team, CVS, VSS, SVN
Operating Systems	WINDOWS XP/NT/2000, UNIX, Linux, AIX, z/os
Databases	DB2, Sybase ASE, Sybase IQ, MS SQL Server, Oracle, MS Access
CI/CD Tools	Git, Jenkins, Maven, Junit, SonarQube, JFrog Artifactory, JFrog Xray, ARA/Automic, TeamSite
Tools	JIRA, Confluence, Aqua studio, DB Solo4, Soap UI, Postman, AppDynamics, Dynatrace, Grafana and Prometheus, BMC remedy, xMatters

Relevant Professional Experience

Jackson National Life Insurance, Michigan, USA **Dec 2019 – Present**

Senior Consultant

- Accountable for overall delivery and part of service delivery leadership team from offshore.
- Meeting the agreed performance targets (SLA's/KPIs/CPI's/Projects).
- Achieving Customer Satisfaction scores, taking ownership for remediation and drive Customer engagement initiatives.
- Reviewing the Day-to-day operations, performance metrics and tracking, issue resolutions for the respective tower.
- Closely monitoring of critical incidents, coordinating with resolution parties, and establishing effective communication with stakeholders. Serves as point of contact from offshore for escalations & participates in governance reviews.
- Ensuring that systems, procedures, and methodologies are in place to support outstanding service delivery.
- Good knowledge of escalation procedures, incident management, and other disciplines related to service delivery.
- Providing accurate and regular reports to the management on performance of the service delivery.
- Leading personnel management, including staff recruitment, performance assessment, training, and mentoring.

- Capacity planning and review those with Jackson leadership on monthly basis.
- Help with monitor improvements across Jackson IT applications by using the health check framework, setting up AppDynamics and Prometheus and Grafana.

Jackson National Life Insurance, Michigan, USA **Jan 2008 – Nov 2019**
Sr Software Solution Designer

- Involved in design, development, support of various systems in JNL IT and worked Sr programmer, Lead programmer and Sr Software solution designer across multiple teams during the course my time with Jackson.

STP:
Strategic Technology Platform (STP) is a SOAP based web service application that allows web-based clients to communicate with the Cyberlife host systems using an XML standard called ACORD. It takes predefined XML as a request, unmarshals it into predefined data objects, converts the data object attributes to corresponding DXE (Data eXchangE) keywords that the Cyberlife host understands, and sends the DXE keywords for information retrieval or processing. The Cyberlife host responds with DXE keywords containing the values and/or the processing result, then STP converts the DXEs back to corresponding data object attributes and marshals them into XML as a response.

Technologies: Axis 1.4; CICS Transaction Server; CXF; EJB 2.1; JAVA 8; JBoss EAP 7.2; Log4j 1.2; MQ; Prism 2.1; SLF4J 1.7; WSDL4J 1.6, MQ

Cyber Browser:
Cyber Browser is a front-end web application to Cyberlife backend system, providing user friendly web interface to Operations for day-to-day policy administration. Includes building cyber-Services (client library) which serves the needs of various client applications (jPod, Genius, Jackson.com, IVR).

Technologies: CDI; Chrome; DB2; HTML; JAVA 8; JBoss EAP 7.2; jQuery; JSF 2.1; Prime faces 5.0; Prism 2.1; SLF4J 1.6

GEMS:
Global Enterprise Management System (GEMS) is a budgeting application which is employed across multiple divisions (JNL, PGDS US, PGDS UK, etc.) and is used for planning and creating budgets before budget season each year. Actual expenses can also be entered to know the Variances.

Technologies: Java, J2EE, DB2, JBOSS EAP7.2, Struts

FNF (Fidelity National Finance), Malvern PA **Dec 2006 – Dec 2007**
Sr. Consultant

- Developed software for Web Client, Webcast, WebAdmin, Web Teller, and RSC Web Services.
- Developed JSP screens with JSTL/HTML/Java Script, Struts and Spring configuration.
- Deployed the applications on Apache Tomcat server and testing the application.
- Supported the applications deployed at the client locations like fixing the issues and implementing the Change Requests and Enhancements.

Technologies: Java, J2EE, Java Swing, JFC, Java Beans, JDBC, EJB, MDB, Resource Bundles, Internationalization, Java-based Eclipse Rich Client, Servlets, JSP, JSTL, HTML, JavaScript, XML/XSL, Design Patterns, Struts, Spring framework, Java Web Services, SOAP, WSDL, Borland Star Team, Eclipse IDE, Apache Tomcat Server, SQL, Windows XP Professional, Linux OS.

CTS Business Convergence for E-Commerce, GMAC Insurance **May 2004 – Dec 2006**
Consultant

- Responsible for Analysis and Design using UML include development of Class Diagrams, Sequence Diagrams, State diagrams and implemented these diagrams in MS Visio
- Developed the User Interface (UI) using Java Server Pages (JSP) utilizing Custom Tag Libraries and XSLs.
- Designed web pages using JSP, XSL, HTML, DHTML and client-side validation with JavaScript.
- Integrated view commands with business commands.
- Designed and implemented Unmarshallers/Marshallers with the help of Apache Xercers parser to store the entire XML data into java objects and vice versa.

- Designed and implemented a Servlet based product management interface and user profile screen to update the backend oracle tables used for quoting and authentication.
- Responsible for the design and development coordination of projects to develop a Siege/MVC based web application.
- Responsible for Business logic implementation using Java Servlets and Siege MVC framework.
- Designed and implemented Servlet module to capture the XML as request and parse XML.
- Developed and deployed EJB's (Session and Entity) to implement the business logic and to handle various interactions with the database.
- Deployed business components into JBoss Application Server and involved in JBoss.

MACC (Mid Atlantic Career Consortium), State of West Virginia **Apr 2001 – Apr 2004**
Developer

- Involved in the implementation of the MACC Workforce project for the State of West Virginia. The MACC system is going to be the official job web site of the four participating states Pennsylvania, Virginia, West Virginia, and Maryland Bureau of Employment Programs.
- Developed for Admin, Staff and Public with group-based security and developed totally on Microsoft and XML related technologies.
- Developed as a package which has multilingual support and support for disabled users through a software called JAWS. The MACC system is developed in such a way that it can be customized for any language and any state.
- Involved in all aspects of the implementation; Responsibilities include requirements gathering, analysis, design, development, and customization.
- Responsible for the maintenance and feature enhancements to the website, developer on a team of 20 people who designed and implemented the application from the presentation layer to the middle tier business object layer.
- Involved in all stages of development from analysis to quality testing. His main area of involvement was in developing the Visual Basic middle-tier components.

SharePoint 2007/2010	2 years (03/2013)

Relevant Professional Experience

ACS, Urbandale, IA (Remote Application Developer) **Jan 2024 – Mar 2024**
C#.NET Engineer

- Built out over 32 tables and associated views across multiple databases for Associated Benefits Corp (ABC) using Azure Data Services.
- Wrote a console ETL application to read incoming excel spreadsheets from AgStates Partners (AGP), and transformed the data using EP Plus, and C#.Net to create AGP's ORDIMP.DAT (Order Import) data feed.
- Built out the User and Product web pages for the Homemakers (HOM) Vendor Portal website using C#.Net, Entity Framework and AJAX.
- Created a console application for ABC to import their Benefits data into their various databases.
- Built Add and Delete modal forms for the Third-Party and Internal Transfer Branches for Co-Alliance Corp (CAC).

Priority Technology Holdings, Remote Senior SE Developer Consultant **Apr 2022 – Sep 2022**
C#.NET Engineer

- Fixed Helped refactor the MX Merchant Messaging REST API to support email and SMS texting, using NodeJS, Swagger and Postman
- Fixed an authentication issue that was allowing any authenticated user to delete another user's credit card from their Account Vault in MX Merchant
- Enhanced ACH (new NACHA regulations) - Debit transaction processing with WEB-SEC codes after authorizing the transaction via a bank account authorization web service call.
- Authorized email address was then captured under a variety of circumstances (eg none on file; multiple emails with a primary specified; and auto-acceptance of a single email address on file), and then the transaction was processed to completion.

FTNI, Omaha, NE **Sep 2018 – Apr 2022**
SQL/ETL/SSRS/BI Developer

- Normalized the history and ongoing storage of EPay Customer data pertaining to Autopay Activations/Deactivations.
- Converted the Portal Admin application from AngularJS to Ionic/Angular 6 with TypeScript.
- Enhanced the RprtParamStatus stored procedure process to allow overrides to otherwise "static" status queues.
- Built a Job Scheduler user interface from WPF/C#/SQL to interact with a Job Scheduler
- Windows Service which dually polls jobs from a SQL database and a Pub-Sub Real-Time, cloud Messaging Service (Ably.IO).
- Added Check21 Activation functionality to the Etran-Lite Admin application.
- Created a database export process to extract all a given client's data and .tif files and port them to an sFTP site.
- Added functionality to the Etran-Lite Admin application to clone given client's complete Auxiliary Field Specification by Group designation.
- Performance-tuned sql EtlAdminClientBranchSelect stored proc improve the Client Branch load in the EtranLite Admin Web Manager (AngularJS) app.
- Assumed ownership of Etran-Lite Admin application, written in AngularJS / C#.Net MVC. ➢Created and deployed SSRS reports for Folio Investments and Waddell and Reed to the Etran and ERemitPro (Etran-Lite) applications, respectively.
- Refactored NCR Posting console application process to allow selected clients to execute at their desired processing time instead of all at the same time.
- Created stored procedures and .NET processes to generate and SFTP Presidio Bank/Credo Mobile and Long-Distance files for their Lockbox, Citizen, Donation and Payment Reversal data.
