Obligations related to political subdivisions may include, but are not limited to, business licensing, business and occupation taxes, inspection compliance, permitting, etc. Upon request, the Vendor must provide all necessary releases to obtain information to enable the Purchasing Division Director or the Agency to verify that the Vendor is licensed and in good standing with the above entities.

40. BACKGROUND CHECK: In accordance with W. Va. Code § 15-2D-3, the State reserves the right to prohibit a service provider's employees from accessing sensitive or critical information or to be present at the Capitol complex based upon results addressed from a criminal background check. Service providers should contact the West Virginia Division of Protective Services by phone at (304) 558-9911 for more information.

41. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS: Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open hearth, basic oxygen, electric furnace, Bessemer or other steel making process.
- c. The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:
 1. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or
 2. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

42. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL: In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a “substantial labor surplus area”, as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products. This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

43. INTERESTED PARTY SUPPLEMENTAL DISCLOSURE: W. Va. Code § 6D-1-2 requires that for contracts with an actual or estimated value of at least \$1 million, the Vendor must submit to the Agency a disclosure of interested parties prior to beginning work under this Contract. Additionally, the Vendor must submit a supplemental disclosure of interested parties reflecting any new or differing interested parties to the contract, which were not included in the original pre-work interested party disclosure, within 30 days following the completion or termination of the contract. A copy of that form is included with this solicitation or can be obtained from the WV Ethics Commission. This requirement does not apply to publicly traded companies listed on a national or international stock exchange. A more detailed definition of interested parties can be obtained from the form referenced above.

44. PROHIBITION AGAINST USED OR REFURBISHED: Unless expressly permitted in the solicitation published by the State, Vendor must provide new, unused commodities, and is prohibited from supplying used or refurbished commodities, in fulfilling its responsibilities under this Contract.

45. VOID CONTRACT CLAUSES: This Contract is subject to the provisions of West Virginia Code § 5A-3-62, which automatically voids certain contract clauses that violate State law.

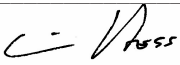

46. ISRAEL BOYCOTT: Bidder understands and agrees that, pursuant to W. Va. Code § 5A-3-63, it is prohibited from engaging in a boycott of Israel during the term of this contract.

DESIGNATED CONTACT: Vendor appoints the individual identified in this Section as the Contract Administrator and the initial point of contact for matters relating to this Contract.

West Virginia Department of Agriculture
Depopulation, Disposal, and Disinfection Plan Development Workshop and Tabletop
Exercise

Statement of Work

This project will assist the West Virginia Department of Agriculture (WVDA) in developing and validating its plan for emergency livestock and poultry depopulation, disposal, and disinfection (3D).

Step 1: 3D Workshop

SES, Inc. (SES) will design and conduct a 3D workshop that will 1) review depopulation and disposal methods for livestock and poultry, and 2) examine the WVDA's current plans and procedures for livestock and poultry 3D. The goal of reviewing WVDA's existing plans and procedures is to include those plans and procedures, as necessary, in the new 3D plan.

The project will begin with a kickoff meeting that should be held within two weeks of contract award and execution, SES and the WVDA exercise planning team will develop goals and objectives for the workshop, set a date and time for the workshop, and identify potential workshop venues. In addition, SES will coordinate with the exercise planning team to develop a workshop invitee list. Once the list is developed, SES will send out invitations by email. SES will create a formal invitation letter that will be reviewed and approved by the planning team. This letter can be placed on WVDA letterhead and signed by the appropriate WVDA official, if the planning team should feel that would boost attendance. SES recommends that this workshop be attended by WVDA, state supporting agencies, and federal personnel who would be responsible for planning and implementing 3D during a foreign animal disease (FAD) response.

Prior to the workshop, three webinars discussing depopulation, disposal options, and decontamination concepts will be conducted for participants. The webinars will cover swine depopulation methods, cattle depopulation methods, poultry depopulation methods, disposal of livestock and poultry, and best practices for virus elimination. These webinars will provide workshop invitees with a common baseline understanding of the topics so they can contribute to the workshop discussions.

The workshop will be conducted in one day and will address 3D methods, implementation, and pros and cons. The notes and feedback from this workshop will be used by SES to create a 3D appendix to the *Incident Support Annex 9 – Agriculture Incidents*. The workshop will involve a preliminary examination of the processes WVDA will use to develop herd and flock plans for infected premises, and relevant indemnity issues. To prepare for the workshop, SES will review all relevant WVDA plans and procedures.

The workshop will be delivered through a facilitated discussion, supported with a PowerPoint presentation. It will be conducted in a face-to-face environment, at a location provided by WVDA. SES will provide all supplies, equipment, and documents necessary to conduct this workshop. This proposal does not include SES providing any beverages, snacks, or meals for the workshop. These items can be added with a written modification to the contract.

SES will provide a workshop facilitator and a notetaker to support workshop conduct.

SES will capture participant feedback on the workshop via an online survey. The survey data will be made available to WVDA. In addition, SES will organize and formalize its notes from

the workshop conduct and develop the draft 3D appendix to WVDA within two weeks of workshop conduct.

Step 2: Review of Draft Plan and Plan Socialization

SES will address comments provided by WVDA on the draft plan. Following the review process, SES will conduct a plan socialization activity. This activity will be delivered as a webinar, and it will provide the support agencies that attended the plan development workshop an opportunity to review the draft plan and provide feedback. SES will document suggestions of recommended changes. These recommendations will be provided to WVDA. SES will make the changes requested by WVDA and will deliver a final plan.

Step 3: 3D Tabletop Exercise (TTX)

SES, in coordination with the WVDA exercise planning team, will develop an HSEEP-compliant one-day TTX to validate WVDA's livestock 3D plans, policies, and procedures. This discussion-based exercise will be designed around a scenario that engages both swine and beef production operations and, in addition to validation, will allow updating of the applicable plans, policies, and procedures.

Within two weeks of completing the workshop (Step 1), SES will begin the second step in the exercise series with a combined Initial Planning Meeting (IPM) and Concepts and Objectives Meeting (C&O) for the TTX. During this meeting, SES and the WVDA planning team will develop exercise goals and objectives, and a schedule for deliverables, exercise design, and conduct. SES proposes to conduct this meeting virtually with the WVDA planning team. After this meeting, SES and the planning team will have monthly coordination meetings, held over the Zoom video conferencing platform. These monthly meetings can be accelerated to occur bi-weekly, if necessary and agreeable to the project team. The monthly meeting prior to exercise conduct will be held as the exercise's Final Planning Meeting (FPM). SES recommends that the TTX be conducted five months after contract award and execution, approximately four months after the 3D workshop.

TTX development will require several steps. The exercise objectives will be converted into exercise evaluation guides (EEG) to be used by the exercise Evaluators during conduct. SES and the exercise planning team will develop an exercise scenario which will be converted into a PowerPoint presentation to guide exercise play and deliver exercise injects. SES proposes that the exercise scenario present two different challenges to the participants looking at different species. Operationally, these two species may present unique challenges to WVDA's implementation of its 3D plans, policies, and procedures. To collect additional participant feedback, SES will design and make available an online feedback form for the TTX. For exercise participants, SES will create a Situation Manual (SitMan) that will present essential exercise information and provide a broad overview of exercise modules, key issues, rules of play, and safety considerations.

SES will coordinate with the exercise planning team to develop a TTX invitee list. Once the list is developed, SES will send out invitations by email. SES will create a formal invitation letter that will be reviewed and approved by the planning team. This letter can be placed on WVDA letterhead and signed by the appropriate WVDA official, if the planning team feels that would boost attendance. SES recommends that this TTX be attended by WVDA, federal, and industry

personnel who would be responsible for planning, implementing, and receiving 3D during a FAD response.

SES will conduct the TTX in a single day. Participants will engage together, face-to-face. We anticipate the TTX will require six to eight hours for conduct. SES may divide participants into two functional groups (e.g., operations and policy) based on their roles and responsibilities for implementing a 3D response. The exercise will be presented to the participants as a single group, but participants may be divided into their functional groups to address exercise injects. If functional groups are used periodically, the functional groups will reconvene as one group to brief back on their findings and responses. After the final exercise inject, SES will conduct a hot wash with participants.

After exercise conduct, SES will collect evaluation notes, hot wash notes, completed EEGs, and other participant notes and feedback. This information will be delivered to SES for analysis, and an After-Action Report (AAR) and Improvement Plan (IP) will be developed, and an After-Action Meeting will be conducted virtually.

The TTX will be delivered through a facilitated discussion, supported with a PowerPoint presentation. It will be conducted in a face-to-face environment, at a location provided by WVDA. WVDA will provide an exercise location that is large enough for all the participants to engage together, and that provides two breakout rooms for the functional groups. SES will provide all supplies, equipment, and documents necessary to conduct this TTX. This proposal does not include SES providing any drinks, snacks, or meals for the TTX. These items can be added with a written contract change order. SES will provide the lead Facilitator and lead Notetaker.

SES will provide participants with a workshop agenda, SitMan, and a Facilitator Guide for the Facilitators for each functional group. SES will develop an online participant survey to capture feedback from participants. SES will capture daily attendance for the workshop.

TTX participants will be expected to engage in the entire TTX, and address injects by applying the existing plans and procedures.
