Good morning,

I made a big mistake and forgot to add a 6.7 engine and a couple other Transmission part numbers to the catalog, and now I am running across a question when it comes to the catalog I sent over. I have a location that because the part number is not on the catalog, they say they cannot buy from our dealership when they do in fact need the parts. However, It would take me many months to complete an entire catalog for every ford vehicle for every known part. I was thinking we just had to do the basics and not every detailed part, I don't want to go against the contract in any way, and I want to supply all the parts the DOH locations need, but I need direction of how we can move forward.

Let me know if I need to add a couple parts to the catalog or what needs to be done, because he is under the impression they will get in a lot of trouble if they order it without it being on the catalog.

Thanks

Jason W. Lee

I have reviewed the requisition identified above and find that it is sufficient to advertise publicly to the vendor community. My review does not preclude the possibility that the vendor community, or some other entity, will identify an area of concern; however, should such issues or concerns arise, they will be reviewed and addressed as may be appropriate.
