Greenhouse Systems

NOR'EASTER SERIES GREENHOUSES

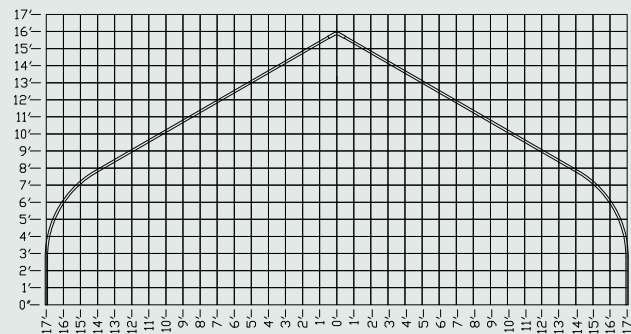

Features

- Available in 30' and 34' widths
- 4 ft. bow spacing standard
- Available in 5 ft. or 6 ft. bow spacing
- Bows are 1.90", 13 ga. galvanized steel tubing
- There is a truss assembly with every bow resulting in unmatched strength
- 5 purlins per 30' greenhouse and 7 purlins per 34' greenhouse
- Purlins connect to the bows using a cross connector system which prevents unnecessary drilling into the bow
- Truss support system allows for additional purlin pipe to be hung for hanging baskets
- Wind bracing kits included with all greenhouses
- The height of the greenhouse can be raised with the extended ground posts option
- Additional purlin pipe is available for hanging basket runs
- Engineering meets International Building Codes (IBC)

These are bow assemblies. These drawings can help you plan the ends of your greenhouse. If you need more height, we can make the ground posts longer – which will require larger poly.
