FINGERPRINT TECHNICIAN, SENIOR

Nature of Work
Under general supervision, performs advanced level work in the identification and classification of fingerprints in the Automated Fingerprint Identification System (AFIS). Receives, processes, maintains and properly disseminates various criminal history records for the State. Acts as a lead worker. Performs related work as required.

Distinguishing Characteristics
This level in the series has the assigned responsibilities to train new employees, distribute work assignments, and review and approve completed work.

Examples of Work
Receives, scans, merges data, acquires and conducts searches of fingerprint images through the West Virginia Automated Criminal History (WATCH) and the AFIS.
Compares and verifies fingerprints, through use of fingerprint ridge detail; determines match/non-match; retains fingerprint images in database.
Identifies and classifies fingerprints according to the Henry Classification System and through the use of the AFIS system.
Transmits fingerprint images from the AFIS database to the FBI database.
Provides technical assistance to lower-level fingerprint technicians; trains new employees in the procedures; reports progress and capabilities to the section supervisor.
Makes work assignments; reviews and verifies the identifications of other fingerprint technicians’ work.
Verifies all fingerprint cards to be returned to the contributor.
Locates and disseminates criminal records to authorized persons.
Determines the need for supplies and forwards information to the section supervisor for requisition.
