

9847
AIRCRAFT MECHANIC 1

Nature of Work

Under general supervision, at the beginning level, performs work inspecting, maintaining and repairing airframe, powerplant, propeller, rotor or other component parts of either fixed or rotor wing aircraft; makes daily pre-flight inspections as well as skilled, detailed 50, 100 hour and annual inspections in compliance with manufacturer's manuals, Federal Aviation Administration (FAA) regulations, state regulations and policies and Aviation Division policies. Maintains all ground support equipment and state hangar facility. Performs related work as required.

Distinguishing Characteristics

At this level the Aircraft Mechanic 1 performs beginning level mechanical work in the maintenance of state aircraft where the experience and skills are being acquired.

Examples of Work

Inspects, maintains and repairs the airframe, powerplant, propeller, rotor or other component parts of fixed-wing or rotary-wing aircraft.

Maintains hangar facility, tools, equipment, aircraft maintenance books and records; may inventory parts, supplies, tools and equipment.

Maintains knowledge, skills and abilities to perform assigned duties; assures current knowledge on types of aircraft used; successfully completes required schools and maintenance courses appropriate for assigned duties.

Knowledge, Skills and Abilities

Knowledge of FAA rules, regulations, requirements and limitations which relate to position.

Knowledge of state regulations and policies and Aviation Division policies.

Knowledge of tools and equipment required in an aircraft maintenance and repair shop and the proper use of such equipment.

Ability to diagnose the cause of operating defects in aircraft powerplants and airframes to make repairs.

Ability to establish and maintain the highest safety standard available for the protection of pilots and passengers.

Ability to climb, lift and carry heavy and awkward parts and to perform precise manual work in awkward positions.

Ability to receive and understand oral and written instructions.

Minimum Qualifications

Training: Graduation from a standard high school or the equivalent.

Experience: One year of full-time or equivalent part-time paid employment as an aircraft mechanic performing airframe and powerplant maintenance on fixed or rotary wing aircrafts. Preference may be given to candidates with experience in maintenance and repair of Beech King Air aircrafts and/or Bell helicopters.

Substitution: Graduation from an FAA approved aviation maintenance technician school will substitute for the required experience.
