GENERAL TERMS AND CONDITIONS:

1. CONTRACTUAL AGREEMENT: Issuance of an Award Document signed by the Purchasing Division Director, or his designee, and approved as to form by the Attorney General's office constitutes acceptance by the State of this Contract made by and between the State of West Virginia and the Vendor. Vendor's signature on its bid, or on the Contract if the Contract is not the result of a bid solicitation, signifies Vendor's agreement to be bound by and accept the terms and conditions contained in this Contract.

2. DEFINITIONS: As used in this Solicitation/Contract, the following terms shall have the meanings attributed to them below. Additional definitions may be found in the specifications included with this Solicitation/Contract.

2.1. "Agency" or **"Agencies"** means the agency, board, commission, or other entity of the State of West Virginia that is identified on the first page of the Solicitation or any other public entity seeking to procure goods or services under this Contract.

2.2. "Bid" or **"Proposal"** means the vendors submitted response to this solicitation.

2.3. "Contract" means the binding agreement that is entered into between the State and the Vendor to provide the goods or services requested in the Solicitation.

2.4. "Director" means the Director of the West Virginia Department of Administration, Purchasing Division.

2.5. "Purchasing Division" means the West Virginia Department of Administration, Purchasing Division.

2.6. "Award Document" means the document signed by the Agency and the Purchasing Division, and approved as to form by the Attorney General, that identifies the Vendor as the contract holder.

2.7. "Solicitation" means the official notice of an opportunity to supply the State with goods or services that is published by the Purchasing Division.

2.8. "State" means the State of West Virginia and/or any of its agencies, commissions, boards, etc. as context requires.

2.9. "Vendor" or **"Vendors"** means any entity submitting a bid in response to the Solicitation, the entity that has been selected as the lowest responsible bidder, or the entity that has been awarded the Contract as context requires.

3. CONTRACT TERM; RENEWAL; EXTENSION: The term of this Contract shall be determined in accordance with the category that has been identified as applicable to this Contract below:

☐ **Term Contract**

Initial Contract Term: This Contract becomes effective on _____ and the initial contract term extends until _____.

Renewal Term: This Contract may be renewed upon the mutual written consent of the Agency, and the Vendor, with approval of the Purchasing Division and the Attorney General's office (Attorney General approval is as to form only). Any request for renewal should be delivered to the Agency and then submitted to the Purchasing Division thirty (30) days prior to the expiration date of the initial contract term or appropriate renewal term. A Contract renewal shall be in accordance with the terms and conditions of the original contract. Unless otherwise specified below, renewal of this Contract is limited to _____ successive one (1) year periods or multiple renewal periods of less than one year, provided that the multiple renewal periods do not exceed the total number of months available in all renewal years combined. Automatic renewal of this Contract is prohibited. Renewals must be approved by the Vendor, Agency, Purchasing Division and Attorney General's office (Attorney General approval is as to form only)

☐ **Alternate Renewal Term** – This contract may be renewed for _____ successive _____ year periods or shorter periods provided that they do not exceed the total number of months contained in all available renewals. Automatic renewal of this Contract is prohibited. Renewals must be approved by the Vendor, Agency, Purchasing Division and Attorney General's office (Attorney General approval is as to form only)

Delivery Order Limitations: In the event that this contract permits delivery orders, a delivery order may only be issued during the time this Contract is in effect. Any delivery order issued within one year of the expiration of this Contract shall be effective for one year from the date the delivery order is issued. No delivery order may be extended beyond one year after this Contract has expired.

☑ **Fixed Period Contract:** This Contract becomes effective upon Vendor's receipt of the notice to proceed and must be completed within Seven hundred and Eighty (780) days.

☐ **Fixed Period Contract with Renewals:** This Contract becomes effective upon Vendor's receipt of the notice to proceed and part of the Contract more fully described in the attached specifications must be completed within _____ days. Upon completion of the work covered by the preceding sentence, the vendor agrees that maintenance, monitoring, or warranty services will be provided for _____ year(s) thereafter.

☐ **One Time Purchase:** The term of this Contract shall run from the issuance of the Award Document until all of the goods contracted for have been delivered, but in no event will this Contract extend for more than one fiscal year.

☐ **Other:** See attached _____

4. AUTHORITY TO PROCEED: Vendor is authorized to begin performance of this contract on the date of encumbrance listed on the front page of the Award Document unless either the box for "Fixed Period Contract" or "Fixed Period Contract with Renewals" has been checked in Section 3 above. If either "Fixed Period Contract" or "Fixed Period Contract with Renewals" has been checked, Vendor must not begin work until it receives a separate notice to proceed from the State. The notice to proceed will then be incorporated into the Contract via change order to memorialize the official date that work commenced.

5. QUANTITIES: The quantities required under this Contract shall be determined in accordance with the category that has been identified as applicable to this Contract below.

☐ **Open End Contract:** Quantities listed in this Solicitation/Award Document are approximations only, based on estimates supplied by the Agency. It is understood and agreed that the Contract shall cover the quantities actually ordered for delivery during the term of the Contract, whether more or less than the quantities shown.

☐ **Service:** The scope of the service to be provided will be more clearly defined in the specifications included herewith.

☑ **Combined Service and Goods:** The scope of the service and deliverable goods to be provided will be more clearly defined in the specifications included herewith.

☐ **One Time Purchase:** This Contract is for the purchase of a set quantity of goods that are identified in the specifications included herewith. Once those items have been delivered, no additional goods may be procured under this Contract without an appropriate change order approved by the Vendor, Agency, Purchasing Division, and Attorney General's office.

6. EMERGENCY PURCHASES: The Purchasing Division Director may authorize the Agency to purchase goods or services in the open market that Vendor would otherwise provide under this Contract if those goods or services are for immediate or expedited delivery in an emergency. Emergencies shall include, but are not limited to, delays in transportation or an unanticipated increase in the volume of work. An emergency purchase in the open market, approved by the Purchasing Division Director, shall not constitute of breach of this Contract and shall not entitle the Vendor to any form of compensation or damages. This provision does not excuse the State from fulfilling its obligations under a One Time Purchase contract.

7. REQUIRED DOCUMENTS: All of the items checked below must be provided to the Purchasing Division by the Vendor as specified below.

☑ **BID BOND (Construction Only):** Pursuant to the requirements contained in W. Va. Code § 5-22-1(c), All Vendors submitting a bid on a construction project shall furnish a valid bid bond in the amount of five percent (5%) of the total amount of the bid protecting the State of West Virginia. The bid bond must be submitted with the bid.

☑ **PERFORMANCE BOND:** The apparent successful Vendor shall provide a performance bond in the amount of 100% of the contract. The performance bond must be received by the Purchasing Division prior to Contract award.

☑ **LABOR/MATERIAL PAYMENT BOND:** The apparent successful Vendor shall provide a labor/material payment bond in the amount of 100% of the Contract value. The labor/material payment bond must be delivered to the Purchasing Division prior to Contract award.

In lieu of the Bid Bond, Performance Bond, and Labor/Material Payment Bond, the Vendor may provide certified checks, cashier's checks, or irrevocable letters of credit. Any certified check, cashier's check, or irrevocable letter of credit provided in lieu of a bond must be of the same amount and delivered on the same schedule as the bond it replaces. A letter of credit submitted in lieu of a performance and labor/material payment bond will only be allowed for projects under $100,000. Personal or business checks are not acceptable. Notwithstanding the foregoing, West Virginia Code § 5-22-1 (d) mandates that a vendor provide a performance and labor/material payment bond for construction projects. Accordingly, substitutions for the performance and labor/material payment bonds for construction projects is not permitted.

☐ **MAINTENANCE BOND:** The apparent successful Vendor shall provide a two (2) year maintenance bond covering the roofing system. The maintenance bond must be issued and delivered to the Purchasing Division prior to Contract award.

☐ **LICENSE(S) / CERTIFICATIONS / PERMITS:** In addition to anything required under the Section of the General Terms and Conditions entitled Licensing, the apparent successful Vendor shall furnish proof of the following licenses, certifications, and/or permits upon request and in a form acceptable to the State. The request may be prior to or after contract award at the State's sole discretion.

☐

☐

☐

☐

The apparent successful Vendor shall also furnish proof of any additional licenses or certifications contained in the specifications regardless of whether or not that requirement is listed above.

8. INSURANCE: The apparent successful Vendor shall furnish proof of the insurance identified by a checkmark below and must include the State as an additional insured on each policy prior to Contract award. The insurance coverages identified below must be maintained throughout the life of this contract. Thirty (30) days prior to the expiration of the insurance policies, Vendor shall provide the Agency with proof that the insurance mandated herein has been continued. Vendor must also provide Agency with immediate notice of any changes in its insurance policies, including but not limited to, policy cancelation, policy reduction, or change in insurers. The apparent successful Vendor shall also furnish proof of any additional insurance requirements contained in the specifications prior to Contract award regardless of whether that insurance requirement is listed in this section.

Vendor must maintain:

☑ **Commercial General Liability Insurance** in at least an amount of: $1,000,000.00 per occurrence.

☑ **Automobile Liability Insurance** in at least an amount of: $1,000,000.00 per occurrence.

☐ **Professional/Malpractice/Errors and Omission Insurance** in at least an amount of: _____ per occurrence. Notwithstanding the forgoing, Vendor's are not required to list the State as an additional insured for this type of policy.

☑ **Commercial Crime and Third Party Fidelity Insurance** in an amount of: $100,000.00 per occurrence.

☐ **Cyber Liability Insurance** in an amount of: _____ per occurrence.

☑ **Builders Risk Insurance** in an amount equal to 100% of the amount of the Contract.

☐ **Pollution Insurance** in an amount of: _____ per occurrence.

☐ **Aircraft Liability** in an amount of: _____ per occurrence.

☐

☐

☐

☐

Notwithstanding anything contained in this section to the contrary, the Director of the Purchasing Division reserves the right to waive the requirement that the State be named as an additional insured on one or more of the Vendor's insurance policies if the Director finds that doing so is in the State's best interest.

9. WORKERS' COMPENSATION INSURANCE: Vendor shall comply with laws relating to workers compensation, shall maintain workers' compensation insurance when required, and shall furnish proof of workers' compensation insurance upon request.

10. [Reserved]

11. LIQUIDATED DAMAGES: This clause shall in no way be considered exclusive and shall not limit the State or Agency's right to pursue any other available remedy. Vendor shall pay liquidated damages in the amount specified below or as described in the specifications:

☐ _____ for _____.

☑ Liquidated Damages Contained in the Specifications.

☐ Liquidated Damages Are Not Included in this Contract.

12. ACCEPTANCE: Vendor's signature on its bid, or on the certification and signature page, constitutes an offer to the State that cannot be unilaterally withdrawn, signifies that the product or service proposed by vendor meets the mandatory requirements contained in the Solicitation for that product or service, unless otherwise indicated, and signifies acceptance of the terms and conditions contained in the Solicitation unless otherwise indicated.

13. PRICING: The pricing set forth herein is firm for the life of the Contract, unless specified elsewhere within this Solicitation/Contract by the State. A Vendor's inclusion of price adjustment provisions in its bid, without an express authorization from the State in the Solicitation to do so, may result in bid disqualification. Notwithstanding the foregoing, Vendor must extend any publicly advertised sale price to the State and invoice at the lower of the contract price or the publicly advertised sale price.

14. PAYMENT IN ARREARS: Payments for goods/services will be made in arrears only upon receipt of a proper invoice, detailing the goods/services provided or receipt of the goods/services, whichever is later. Notwithstanding the foregoing, payments for software maintenance, licenses, or subscriptions may be paid annually in advance.

15. PAYMENT METHODS: Vendor must accept payment by electronic funds transfer and P-Card. (The State of West Virginia's Purchasing Card program, administered under contract by a banking institution, processes payment for goods and services through state designated credit cards.)

16. TAXES: The Vendor shall pay any applicable sales, use, personal property or any other taxes arising out of this Contract and the transactions contemplated thereby. The State of West Virginia is exempt from federal and state taxes and will not pay or reimburse such taxes.

17. ADDITIONAL FEES: Vendor is not permitted to charge additional fees or assess additional charges that were not either expressly provided for in the solicitation published by the State of West Virginia, included in the Contract, or included in the unit price or lump sum bid amount that Vendor is required by the solicitation to provide. Including such fees or charges as notes to the solicitation may result in rejection of vendor's bid. Requesting such fees or charges be paid after the contract has been awarded may result in cancellation of the contract.

18. FUNDING: This Contract shall continue for the term stated herein, contingent upon funds being appropriated by the Legislature or otherwise being made available. In the event funds are not appropriated or otherwise made available, this Contract becomes void and of no effect beginning on July 1 of the fiscal year for which funding has not been appropriated or otherwise made available. If that occurs, the State may notify the Vendor that an alternative source of funding has been obtained and thereby avoid the automatic termination. Non-appropriation or non-funding shall not be considered an event of default.

19. CANCELLATION: The Purchasing Division Director reserves the right to cancel this Contract immediately upon written notice to the vendor if the materials or workmanship supplied do not conform to the specifications contained in the Contract. The Purchasing Division Director may also cancel any purchase or Contract upon 30 days written notice to the Vendor in accordance with West Virginia Code of State Rules § 148-1-5.2.b.

20. TIME: Time is of the essence regarding all matters of time and performance in this Contract.

21. APPLICABLE LAW: This Contract is governed by and interpreted under West Virginia law without giving effect to its choice of law principles. Any information provided in specification manuals, or any other source, verbal or written, which contradicts or violates the West Virginia Constitution, West Virginia Code, or West Virginia Code of State Rules is void and of no effect.

22. COMPLIANCE WITH LAWS: Vendor shall comply with all applicable federal, state, and local laws, regulations and ordinances. By submitting a bid, Vendor acknowledges that it has reviewed, understands, and will comply with all applicable laws, regulations, and ordinances.

> **SUBCONTRACTOR COMPLIANCE:** Vendor shall notify all subcontractors providing commodities or services related to this Contract that as subcontractors, they too are required to comply with all applicable laws, regulations, and ordinances. Notification under this provision must occur prior to the performance of any work under the contract by the subcontractor.

23. ARBITRATION: Any references made to arbitration contained in this Contract, Vendor's bid, or in any American Institute of Architects documents pertaining to this Contract are hereby deleted, void, and of no effect.

24. MODIFICATIONS: This writing is the parties' final expression of intent. Notwithstanding anything contained in this Contract to the contrary no modification of this Contract shall be binding without mutual written consent of the Agency, and the Vendor, with approval of the Purchasing Division and the Attorney General's office (Attorney General approval is as to form only). Any change to existing contracts that adds work or changes contract cost, and were not included in the original contract, must be approved by the Purchasing Division and the Attorney General's Office (as to form) prior to the implementation of the change or commencement of work affected by the change.

25. WAIVER: The failure of either party to insist upon a strict performance of any of the terms or provision of this Contract, or to exercise any option, right, or remedy herein contained, shall not be construed as a waiver or a relinquishment for the future of such term, provision, option, right, or remedy, but the same shall continue in full force and effect. Any waiver must be expressly stated in writing and signed by the waiving party.

26. SUBSEQUENT FORMS: The terms and conditions contained in this Contract shall supersede any and all subsequent terms and conditions which may appear on any form documents submitted by Vendor to the Agency or Purchasing Division such as price lists, order forms, invoices, sales agreements, or maintenance agreements, and includes internet websites or other electronic documents. Acceptance or use of Vendor's forms does not constitute acceptance of the terms and conditions contained thereon.

27. ASSIGNMENT: Neither this Contract nor any monies due, or to become due hereunder, may be assigned by the Vendor without the express written consent of the Agency, the Purchasing Division, the Attorney General's office (as to form only), and any other government agency or office that may be required to approve such assignments.

28. WARRANTY: The Vendor expressly warrants that the goods and/or services covered by this Contract will: (a) conform to the specifications, drawings, samples, or other description furnished or specified by the Agency; (b) be merchantable and fit for the purpose intended; and (c) be free from defect in material and workmanship.

29. STATE EMPLOYEES: State employees are not permitted to utilize this Contract for personal use and the Vendor is prohibited from permitting or facilitating the same.

30. PRIVACY, SECURITY, AND CONFIDENTIALITY: The Vendor agrees that it will not disclose to anyone, directly or indirectly, any such personally identifiable information or other confidential information gained from the Agency, unless the individual who is the subject of the information consents to the disclosure in writing or the disclosure is made pursuant to the Agency's policies, procedures, and rules. Vendor further agrees to comply with the Confidentiality Policies and Information Security Accountability Requirements, set forth in http://www.state.wv.us/admin/purchase/privacy/default.html.

31. YOUR SUBMISSION IS A PUBLIC DOCUMENT: Vendor's entire response to the Solicitation and the resulting Contract are public documents. As public documents, they will be disclosed to the public following the bid/proposal opening or award of the contract, as required by the competitive bidding laws of West Virginia Code §§ 5A-3-1 et seq., 5-22-1 et seq., and 5G-1-1 et seq. and the Freedom of Information Act West Virginia Code §§ 29B-1-1 et seq.

DO NOT SUBMIT MATERIAL YOU CONSIDER TO BE CONFIDENTIAL, A TRADE SECRET, OR OTHERWISE NOT SUBJECT TO PUBLIC DISCLOSURE.

Submission of any bid, proposal, or other document to the Purchasing Division constitutes your explicit consent to the subsequent public disclosure of the bid, proposal, or document. The Purchasing Division will disclose any document labeled "confidential," "proprietary," "trade secret," "private," or labeled with any other claim against public disclosure of the documents, to include any "trade secrets" as defined by West Virginia Code § 47-22-1 et seq. All submissions are subject to public disclosure without notice.

32. LICENSING: In accordance with West Virginia Code of State Rules § 148-1-6.1.e, Vendor must be licensed and in good standing in accordance with any and all state and local laws and requirements by any state or local agency of West Virginia, including, but not limited to, the West Virginia Secretary of State's Office, the West Virginia Tax Department, West Virginia Insurance Commission, or any other state agency or political subdivision. Obligations related to political subdivisions may include, but are not limited to, business licensing, business and occupation taxes, inspection compliance, permitting, etc. Upon request, the Vendor must provide all necessary releases to obtain information to enable the Purchasing Division Director or the Agency to verify that the Vendor is licensed and in good standing with the above entities.

SUBCONTRACTOR COMPLIANCE: Vendor shall notify all subcontractors providing commodities or services related to this Contract that as subcontractors, they too are required to be licensed, in good standing, and up-to-date on all state and local obligations as described in this section. Obligations related to political subdivisions may include, but are not limited to, business licensing, business and occupation taxes, inspection compliance, permitting, etc. Notification under this provision must occur prior to the performance of any work under the contract by the subcontractor.

33. ANTITRUST: In submitting a bid to, signing a contract with, or accepting a Award Document from any agency of the State of West Virginia, the Vendor agrees to convey, sell, assign, or transfer to the State of West Virginia all rights, title, and interest in and to all causes of action it may now or hereafter acquire under the antitrust laws of the United States and the State of West Virginia for price fixing and/or unreasonable restraints of trade relating to the particular commodities or services purchased or acquired by the State of West Virginia. Such assignment shall be made and become effective at the time the purchasing agency tenders the initial payment to Vendor.

34. VENDOR CERTIFICATIONS: By signing its bid or entering into this Contract, Vendor certifies (1) that its bid or offer was made without prior understanding, agreement, or connection with any corporation, firm, limited liability company, partnership, person or entity submitting a bid or offer for the same material, supplies, equipment or services; (2) that its bid or offer is in all respects fair and without collusion or fraud; (3) that this Contract is accepted or entered into without any prior understanding, agreement, or connection to any other entity that could be considered a violation of law; and (4) that it has reviewed this Solicitation in its entirety; understands the requirements, terms and conditions, and other information contained herein.

Vendor's signature on its bid or offer also affirms that neither it nor its representatives have any interest, nor shall acquire any interest, direct or indirect, which would compromise the performance of its services hereunder. Any such interests shall be promptly presented in detail to the Agency. The individual signing this bid or offer on behalf of Vendor certifies that he or she is authorized by the Vendor to execute this bid or offer or any documents related thereto on Vendor's behalf; that he or she is authorized to bind the Vendor in a contractual relationship; and that, to the best of his or her knowledge, the Vendor has properly registered with any State agency that may require registration.

35. VENDOR RELATIONSHIP: The relationship of the Vendor to the State shall be that of an independent contractor and no principal-agent relationship or employer-employee relationship is contemplated or created by this Contract. The Vendor as an independent contractor is solely liable for the acts and omissions of its employees and agents. Vendor shall be responsible for selecting, supervising, and compensating any and all individuals employed pursuant to the terms of this Solicitation and resulting contract. Neither the Vendor, nor any employees or subcontractors of the Vendor, shall be deemed to be employees of the State for any purpose whatsoever. Vendor shall be exclusively responsible for payment of employees and contractors for all wages and salaries, taxes, withholding payments, penalties, fees, fringe benefits, professional liability insurance premiums, contributions to insurance and pension, or other deferred compensation plans, including but not limited to, Workers' Compensation and Social Security obligations, licensing fees, etc. and the filing of all necessary documents, forms, and returns pertinent to all of the foregoing.

Vendor shall hold harmless the State, and shall provide the State and Agency with a defense against any and all claims including, but not limited to, the foregoing payments, withholdings, contributions, taxes, Social Security taxes, and employer income tax returns.

36. INDEMNIFICATION: The Vendor agrees to indemnify, defend, and hold harmless the State and the Agency, their officers, and employees from and against: (1) Any claims or losses for services rendered by any subcontractor, person, or firm performing or supplying services, materials, or supplies in connection with the performance of the Contract; (2) Any claims or losses resulting to any person or entity injured or damaged by the Vendor, its officers, employees, or subcontractors by the publication, translation, reproduction, delivery, performance, use, or disposition of any data used under the Contract in a manner not authorized by the Contract, or by Federal or State statutes or regulations; and (3) Any failure of the Vendor, its officers, employees, or subcontractors to observe State and Federal laws including, but not limited to, labor and wage and hour laws.

37. PURCHASING AFFIDAVIT: In accordance with West Virginia Code §§ 5A-3-10a and 5-22-1(i), the State is prohibited from awarding a contract to any bidder that owes a debt to the State or a political subdivision of the State, Vendors are required to sign, notarize, and submit the Purchasing Affidavit to the Purchasing Division affirming under oath that it is not in default on any monetary obligation owed to the state or a political subdivision of the state.

38. CONFLICT OF INTEREST: Vendor, its officers or members or employees, shall not presently have or acquire an interest, direct or indirect, which would conflict with or compromise the performance of its obligations hereunder. Vendor shall periodically inquire of its officers, members and employees to ensure that a conflict of interest does not arise. Any conflict of interest discovered shall be promptly presented in detail to the Agency.

39. REPORTS: Vendor shall provide the Agency and/or the Purchasing Division with the following reports identified by a checked box below:

☑ Such reports as the Agency and/or the Purchasing Division may request. Requested reports may include, but are not limited to, quantities purchased, agencies utilizing the contract, total contract expenditures by agency, etc.

☐ Quarterly reports detailing the total quantity of purchases in units and dollars, along with a listing of purchases by agency. Quarterly reports should be delivered to the Purchasing Division via email at purchasing.division@wv.gov.

40. BACKGROUND CHECK: In accordance with W. Va. Code § 15-2D-3, the State reserves the right to prohibit a service provider's employees from accessing sensitive or critical information or to be present at the Capitol complex based upon results addressed from a criminal background check. Service providers should contact the West Virginia Division of Protective Services by phone at (304) 558-9911 for more information.

41. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS: Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.

b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open heath, basic oxygen, electric furnace, Bessemer or other steel making process. The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:

c. The cost for each contract item used does not exceed one tenth of one percent (.1%)

of the total contract cost or two thousand five hundred dollars ($2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or

d. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

42. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL: In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars ($50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a "substantial labor surplus area", as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products. This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

43. INTERESTED PARTY SUPPLEMENTAL DISCLOSURE: W. Va. Code § 6D-1-2 requires that for contracts with an actual or estimated value of at least $1 million, the vendor must submit to the Agency a supplemental disclosure of interested parties reflecting any new or differing interested parties to the contract, which were not included in the original pre-award interested party disclosure, within 30 days following the completion or termination of the contract. A copy of that form is included with this solicitation or can be obtained from the

WV Ethics Commission. This requirement does not apply to publicly traded companies listed on a national or international stock exchange. A more detailed definition of interested parties can be obtained from the form referenced above.

44. PROHIBITION AGAINST USED OR REFURBISHED: Unless expressly permitted in the solicitation published by the State, Vendor must provide new, unused commodities, and is prohibited from supplying used or refurbished commodities, in fulfilling its responsibilities under this Contract.

45. VOID CONTRACT CLAUSES – This Contract is subject to the provisions of West Virginia Code § 5A-3-62, which automatically voids certain contract clauses that violate State law.

ADDITIONAL TERMS AND CONDITIONS (Construction Contracts Only)

1. CONTRACTOR'S LICENSE: Until June 15, 2021, West Virginia Code § 21-11-2, and after that date, § 30-42-2, requires that all persons desiring to perform contracting work in this state be licensed. The West Virginia Contractors Licensing Board is empowered to issue the contractor's license. Applications for a contractor's license may be made by contacting the West Virginia Contractor Licensing Board.

The apparent successful Vendor must furnish a copy of its contractor's license prior to the issuance of a contract award document.

2. DRUG-FREE WORKPLACE AFFIDAVIT: W. Va. Code § 21-1D-5 provides that any solicitation for a public improvement contract requires each Vendor that submits a bid for the work to submit an affidavit that the Vendor has a written plan for a drug-free workplace policy. If the affidavit is not submitted with the bid submission, the Purchasing Division shall promptly request by telephone and electronic mail that the low bidder and second low bidder provide the affidavit within one business day of the request. Failure to submit the affidavit within one business day of receiving the request shall result in disqualification of the bid. To comply with this law, Vendor should complete the enclosed drug-free workplace affidavit and submit the same with its bid. Failure to submit the signed and notarized drugfree workplace affidavit or a similar affidavit that fully complies with the requirements of the applicable code, within one business day of being requested to do so shall result in disqualification of Vendor's bid. Pursuant to W. Va. Code 21-1D-2(b) and (k), this provision does not apply to public improvement contracts the value of which is $100,000 or less or temporary or emergency repairs.

2.1. DRUG-FREE WORKPLACE POLICY: Pursuant to W. Va. Code § 21-1D-4, Vendor and its subcontractors must implement and maintain a written drug-free workplace policy that complies with said article. The awarding public authority shall cancel this contract if: (1) Vendor fails to implement and maintain a written drug-free workplace policy described in the preceding paragraph, (2) Vendor fails to provide information regarding implementation of its drug-free workplace policy at the request of the public authority; or (3) Vendor provides to the public authority false information regarding the contractor's drug-free workplace policy.

Pursuant to W. Va. Code 21-1D-2(b) and (k), this provision does not apply to public improvement contracts the value of which is $100,000 or less or temporary or emergency repairs.

3. DRUG FREE WORKPLACE REPORT: Pursuant to W. Va. Code § 21-1D-7b, no less than once per year, or upon completion of the project, every contractor shall provide a certified report to the public authority which let the contract. For contracts over $25,000, the public authority shall be the West Virginia Purchasing Division. For contracts of $25,000 or less, the public authority shall be the agency issuing the contract. The report shall include:

(1) Information to show that the education and training service to the requirements of West Virginia Code § 21-1D-5 was provided;

(2) The name of the laboratory certified by the United States Department of Health and Human Services or its successor that performs the drug tests;

(3) The average number of employees in connection with the construction on the public improvement;

(4) Drug test results for the following categories including the number of positive tests and the number of negative tests: (A) Pre-employment and new hires; (B) Reasonable suspicion; (C) Post-accident; and (D) Random.

Vendor should utilize the attached Certified Drug Free Workplace Report Coversheet when submitting the report required hereunder. Pursuant to W. Va. Code 21-1D-2(b) and (k), this provision does not apply to public improvement contracts the value of which is $100,000 or less or temporary or emergency repairs.

4. AIA DOCUMENTS: All construction contracts that will be completed in conjunction with architectural services procured under Chapter 5G of the West Virginia Code will be governed by the attached AIA documents, as amended by the Supplementary Conditions for the State of West Virginia, in addition to the terms and conditions contained herein.

4A. PROHIBITION AGAINST GENERAL CONDITIONS: Notwithstanding anything contained in the AIA Documents or the Supplementary Conditions, the State of West Virginia will not pay for general conditions, or winter conditions, or any other condition representing a delay in the contracts. The Vendor is expected to mitigate delay costs to the greatest extent possible and any costs associated with Delays must be specifically and concretely identified. The state will not consider an average daily rate multiplied by the number of days extended to be an acceptable charge.

5. GREEN BUILDINGS MINIMUM ENERGY STANDARDS: In accordance with § 22-29-4, all new building construction projects of public agencies that have not entered the schematic design phase prior to July 1, 2012, or any building construction project receiving state grant funds and appropriations, including public schools, that have not entered the schematic design phase prior to July 1, 2012, shall be designed and constructed complying with the ICC International Energy Conservation Code, adopted by the State Fire Commission, and the ANSI/ASHRAE/IESNA Standard 90.1-2007: Provided, That if any construction project has a commitment of federal funds to pay for a portion of such project, this provision shall only apply to the extent such standards are consistent with the federal standards.

6. LOCAL LABOR MARKET HIRING REQUIREMENT: Pursuant to West Virginia Code §21-1C-1 et seq., Employers shall hire at least seventy-five percent of employees for public improvement construction projects from the local labor market, to be rounded off, with at least two employees from outside the local labor market permissible for each employer per project.

Any employer unable to employ the minimum number of employees from the local labor market shall inform the nearest office of Workforce West Virginia of the number of qualified employees needed and provide a job description of the positions to be filled.

If, within three business days following the placing of a job order, Workforce West Virginia is unable to refer any qualified job applicants to the employer or refers less qualified job applicants than the number requested, then Workforce West Virginia shall issue a waiver to the employer stating the unavailability of applicant and shall permit the employer to fill any positions covered by the waiver from outside the local labor market. The waiver shall be in writing and shall be issued within the prescribed three days. A waiver certificate shall be sent to both the employer for its permanent project records and to the public authority.

Any employer who violates this requirement is subject to a civil penalty of $250 per each employee less than the required threshold of seventy-five percent per day of violation after receipt of a notice of violation.

Any employer that continues to violate any provision of this article more than fourteen calendar days after receipt of a notice of violation is subject to a civil penalty of $500 per each employee less than the required threshold of seventy-five percent per day of violation.

The following terms used in this section have the meaning shown below.

(1) The term "construction project" means any construction, reconstruction, improvement, enlargement, painting, decorating or repair of any public improvement let to contract in an amount equal to or greater than $500,000. The term "construction project" does not include temporary or emergency repairs;

(2) The term "employee" means any person hired or permitted to perform hourly work for wages by a person, firm or corporation in the construction industry; The term "employee" does not include:(i) Bona fide employees of a public authority or individuals engaged in making temporary or emergency repairs;(ii) Bona fide independent contractors; or(iii) Salaried supervisory personnel necessary to assure efficient execution of the employee's work;

(3) The term "employer" means any person, firm or corporation employing one or more employees on any public improvement and includes all contractors and subcontractors;

(4) The term "local labor market" means every county in West Virginia and any county outside of West Virginia if any portion of that county is within fifty miles of the border of West Virginia;

(5) The term "public improvement" includes the construction of all buildings, roads, highways, bridges, streets, alleys, sewers, ditches, sewage disposal plants, waterworks, airports and all other structures that may be let to contract by a public authority, excluding improvements funded, in whole or in part, by federal funds.

7. DAVIS-BACON AND RELATED ACT WAGE RATES:

☐ The work performed under this contract is federally funded in whole, or in part. Pursuant to _____, Vendors are required to pay applicable Davis-Bacon wage rates.

☑ The work performed under this contract is not subject to Davis-Bacon wage rates.

8. SUBCONTRACTOR LIST SUBMISSION: In accordance with W. Va. Code § 5-22-1, the apparent low bidder on a contract valued at more than $250,000.00 for the construction, alteration, decoration, painting or improvement of a new or existing building or structure shall submit a list of all subcontractors who will perform more than $25,000.00 of work on the project including labor and materials. (This section does not apply to any other construction projects, such as highway, mine reclamation, water or sewer projects.) The subcontractor list shall be provided to the Purchasing Division within one business day of the opening of bids for review. If the apparent low bidder fails to submit the subcontractor list, the Purchasing Division shall promptly request by telephone and electronic mail that the low bidder and second low bidder provide the subcontractor list within one business day of the request. Failure to submit the subcontractor list within one business day of receiving the request shall result in disqualification of the bid.

If no subcontractors who will perform more than $25,000.00 of work are to be used to complete the project, the apparent low bidder must make this clear on the subcontractor list, in the bid itself, or in response to the Purchasing Division's request for the subcontractor list.

a. Required Information. The subcontractor list must contain the following information:

i. Bidder's name

ii. Name of each subcontractor performing more than $25,000 of work on the project.

iii. The license number of each subcontractor, as required by W. Va. Code § 21-11-1 et. seq.

iv. If applicable, a notation that no subcontractor will be used to perform more than $25,000.00 of work. (This item iv. is not required if the vendor makes this clear in the bid itself or in documentation following the request for the subcontractor list.)

b. Subcontractor List Submission Form: The subcontractor list may be submitted in any form, including the attached form, as long as the required information noted above is included. If any information is missing from the bidder's subcontractor list submission, it may be obtained from other documents such as bids, emails, letters, etc. that accompany the subcontractor list submission.

c. Substitution of Subcontractor. Written approval must be obtained from the State Spending Unit before any subcontractor substitution is permitted. Substitutions are not permitted unless:

i. The subcontractor listed in the original bid has filed for bankruptcy;

ii. The subcontractor in the original bid has been debarred or suspended; or

iii. The contractor certifies in writing that the subcontractor listed in the original bid fails, is unable, or refuses to perform his subcontract.

GENERAL CONSTRUCTION SPECIFICATIONS

1. **PURPOSE AND SCOPE:** The West Virginia Purchasing Division is soliciting bids on behalf of the WV Department of Administration, General Services Division ("Agency" and "Owner") to establish a contract for phased sitework and metal building construction to provide for new facilities for the Agency's Grounds, Business and Operations and Maintenance Sections on the East portion of the WV State Capitol Complex, as described in the construction documents. The Work potentially includes demolition of several existing Agency-owned structures, possible construction of a new Central Mailroom, and possible sitework to grade and pave in order to provide for new parking lots, as determined by the award of a Base Bid and multiple potential Add-Alternates. Chapman Technical Group is serving as the Architect on this project.

2. **DEFINITIONS:** The terms listed below shall have the meanings assigned to them below. Additional definitions can be found in section 2 of the General Terms and Conditions and in the Specifications Manual as defined below.

   2.1 "Construction Services" means sitework and construction of new metal building facilities on the East Capitol Complex, as more fully described in these specifications and the Specifications/Project Manual.

   2.2 "Pricing Page" means the pages contained in wvOASIS, attached hereto as Exhibit A, upon which Vendor should list its proposed price for the Construction Services.

   2.3 "Solicitation" means the official notice of an opportunity to supply the State with Construction Services that is published by the Purchasing Division.

   2.4 "Specifications/Project Manual" means the American Institute of Architect forms, specifications, plans, drawings, and related documents developed by the architect, engineer, or Agency that provide detailed instructions on how the Construction Services are to be performed along with any American Institute of Architects documents ("AIA documents") attached thereto.

3. **ORDER OF PRECEDENCE:** This General Construction Specifications document will have priority over, and supersede, anything contained in the Specifications/Project Manual.

4. **QUALIFICATIONS:** Vendor, or Vendor's staff if requirements are inherently limited to individuals rather than corporate entities, shall have the following minimum qualifications:

   4.1. Experience: Vendor, or Vendor's supervisory staff assigned to this project, must have successfully completed at least Three (3) projects that involved work similar to that described in the Specifications/Project Manual. Compliance with this experience requirement will be determined prior to contract award by the State through references provided by the Vendor upon request, through knowledge or documentation of the

Vendor's past projects, through confirmation of experience requirements from the architect assisting the State in this project, or some other method that the State determines to be acceptable. Vendor must provide any documentation requested by the State to assist in confirmation of compliance with this provision. References, documentation, or other information to confirm compliance with this experience requirement may be requested after bid opening and prior to contract award.

5. **CONTRACT AWARD:** The Contract is intended to provide Agency with a purchase price for the Construction Services. The Contract will be awarded to the lowest qualified responsible bidder meeting the required specifications. If the Pricing Pages contain alternates/add-ons, the Contract will be awarded based on the grand total of the base bid and any alternates/add-ons selected.

6. **SELECTION OF ALTERNATES:** Pursuant to W. Va. Code § 5-22-1(f), any solicitation of bids shall include no more than five alternates. Alternates, if accepted, shall be accepted in the order in which they are listed on the bid form. Any unaccepted alternate contained within a bid shall expire 90 days after the date of the opening of bids for review. Determination of the lowest qualified responsible bidder shall be based on the sum of the base bid and any alternates accepted. Alternate selection will be identified in the Purchase Order.

7. **PROGRESS PAYMENTS:** The Vendor will be paid in the form of periodic progress payments for work completed. Payment requests along with documentation supporting the request will be submitted to and reviewed by the Architect. If approved, the Architect will communicate approval to the Owner and Owner will process payment. The Owner reserves the right to withhold liquidated damages from progress payments. Progress payments will be made no more than monthly.

   Approval and payment of progress payments will be based on Contractor's submission of a payment allocation schedule which allocates the entire contract sum to payment milestones. Architect and Owner will review the payment allocation and may mandate changes that they believe are necessary.

8. **RETAINAGE:** Agency is entitled to withhold Ten Percent (10%) from each progress payment made as retainage. Agency will partially release retainage upon certification of substantial completion by the Architect in accordance with this Contract but will continue to retain amounts sufficient to cover activities needed to reach final completion.

9. **PERFORMANCE:** Vendor shall perform the Construction Services in accordance with this document and the Specifications/Project Manual.

10. **SUBSTANTIAL AND FINAL COMPLETION:** Vendor shall achieve substantial completion, by Phase, as indicated below, with the stated number of calendar days after the Contract start date established by the issuance of the Notice to Proceed. See Drawing G-003, Alternates and Phasing Plan. Failure to meet the deadlines established herein, unless extended

by change order authorizing additional time free of liquidated damages, will result in liquidated damages being applied:

Phase A (1, 2 & 3): Substantially Complete within Three Hundred and Thirty (330) calendar days after the start date established by the issuance of the Notice to Proceed.

Phase B (1 & 2): Substantially Complete within Seven Hundred (700) calendar days after the start date established by the issuance of the Notice to Proceed.

Phase C1: If awarded as Alternate #1, Substantially Complete within Four Hundred and Eighty (480) calendar days after the start date established by the issuance of the Notice to Proceed.

Phase C2: Phase C2 may not begin until Phase C1 has been Substantially Completed and the personnel and equipment of the WV Office of Technology is moved into the new Mailroom, but otherwise must be Substantially Complete within Seven Hundred (700) calendar days after the start date established by the issuance of the Notice to Proceed.

Phase D: If awarded as Alternate #2, Phase D may not begin until Phase C2 has at least begun, but otherwise must be Substantially Complete within Seven Hundred (700) calendar days after the start date established by the issuance of the Notice to Proceed.

Phase E: If awarded as Alternate #3, Phase E must be Substantially Complete within Seven Hundred (700) calendar days after the start date established by the issuance of the Notice to Proceed.

Final Completion: For each of the aforementioned Phases, Final Completion is to be achieved no later than Thirty (30) calendar days after Substantial Completion.

11. **LIQUIDATED DAMAGES:** Vendor shall pay Liquidated Damages in the amount of $2,500.00 per calendar day for every calendar day beyond the date for Final Completion, as established by the issuance of the Notice to Proceed, for which Final Completion has not been achieved for any Phase. Damages may be imposed for more than one phase.

12. **PROJECT PLANS:** Copies of the project plans can be obtained by contacting the entity identified below.

    Chapman Technical Group
    200 Sixth Avenue
    St. Albans, West Virginia 25177
    (for a non-refundable fee of $150.00 per set).

    Vendors may also obtain Project Manuals and Drawings through Chapman Technical Group's Plan Room on its website at www.chaptech.com, or by contacting McKenzie Young at myoung@chaptech.com or 304-727-5501.

13. **SUBSTITUTIONS:** Any substitution requests must be submitted in accordance with the official question and answer period described in the INSTRUCTIONS TO VENDORS SUBMITTING BIDS, Paragraph 4. Vendor Question Deadline.

14. **FACILITIES ACCESS:** Performance of Contract Services may require access cards and/or keys to gain entrance to Agency's facilities. In the event that access cards and/or keys are required:

    14.1. Vendor must identify principal service personnel which will be issued access cards and/or keys to perform service.

    14.2. Vendor will be responsible for controlling cards and keys and will pay replacement fee, if the cards or keys become lost or stolen.

    14.3. Vendor shall notify Agency immediately of any lost, stolen, or missing card or key.

    14.4. Anyone performing under this Contract will be subject to Agency's security protocol and procedures.

    14.5. Vendor shall inform all staff of Agency's security protocol and procedures.

15. **MISCELLANEOUS:**

    15.1. Contract Manager: During its performance of this Contract, Vendor must designate and maintain a primary contract manager responsible for overseeing Vendor's responsibilities under this Contract. The Contract manager must be available during normal business hours to address any customer service or other issues related to this Contract. Vendor should list its Contract manager and his or her contact information below.

    Contract Manager: _____
    Telephone Number: _____
    Fax Number: _____
    Email Address: _____

    15.2. Owner's Representative: Owner's representative for notice purposes is:

    Name: Mark A. Crites
    Telephone Number: (304)352-5515
    Fax Number: (304)558-1475
    Email Address: Mark.A.Crites@wv.gov

16. **Initial Decision Maker:** Chapman Technical Group, the Architect, shall serve as the Initial Decision Maker in matters relating to this contract.

Exhibit A Pricing Page
(Addendum No. 5 Revised Pricing Page)

State of West Virginia – General Services Division – East Campus Project

Name of Bidder:

SQP Construction Group Inc.

The Bidder, being familiar with and understanding the Bidding Documents and also having examined the site and being familiar with all local conditions affecting the project hereby proposes to furnish all labor, material, equipment, supplies and transportation and to perform all Work in accordance with the Bidding Documents within the time set forth for the sum of:

Base Bid:

$ 11,578,618.00 **(Commodity Line 1)(A)**

Eleven Million Five Hundred Seventy Eight Thousand Six Hundred Eighteen

(Show amount in both words and numbers)

Alternate #1 Bid (All work associated with the construction of the new mailroom and demolition of the existing mailroom, Phase C, per Specifications Section 012300):

$ 2,797,510.00 **(Commodity Line 2)(B)**

Two Million Seven Hundred Ninety Seven Thousand Five Hundred Ten Dollars

(Show amount in both words and numbers)

Alternate #2 Bid (All work associated with the utilities, paving and light poles for the generator yard, road and parking area, Phase D , per Specifications Section 012300):

$ 688,428.00 **(Commodity Line 3)(C)**

Six Hundred Eighty Eight Thousand Four Hundred Twenty Eight Dollars

(Show amount in both words and numbers)

Alternate #3 Bid (All work associated with the utilities, paving, light poles and storm retention area for the parking area, Phase E , per Specifications Section 012300):

$ 989,297.00 **(Commodity Line 4)(D)**

Nine Hundred Eighty Nine Thousand Two Hundred Ninety Seven Dollars

(Show amount in both words and numbers)

Unit Price #1, 18 Inch Augered Cast Piles: Add/deduct all-inclusive price, per two linear feet, to cover variation in actual depths of 18" diameter Augered Cast Piles to what is indicated in the Project Plans (See Project Manual, Division 1, Section 012200):

$ 66.00 **(Commodity Line 5), per two linear feet. (E)**

Sixty Six Dollars

(Show amount in both words and numbers)

Unit Price #2, 16 Inch Augered Cast Piles: Add/deduct all-inclusive price, per two linear feet, to cover variation in actual depths of 16" diameter Augered Cast Piles to what is indicated in the Project Plans (See Project Manual, Division 1, Section 012200):

$ 55.00 **(Commodity Line 6), per two linear feet. (F)**

Fifty Five Dollars

(Show amount in both words and numbers)

TOTAL BID AMOUNT (A+B+C+D+E+F):

$ 16,053,974.00

Sixteen Million Fifty Three Thousand Nine Hundred Seventy Four Dollars

(Show amount in both words and numbers)

SOLICITATION NUMBER: CRFQ GSD2200000014
Addendum Number: 11

The purpose of this addendum is to modify the solicitation identified as ("Solicitation") to reflect the change(s) identified and described below.

Applicable Addendum Category:

[✓] Modify bid opening date and time

[ ] Modify specifications of product or service being sought

[ ] Attachment of vendor questions and responses

[ ] Attachment of pre-bid sign-in sheet

[ ] Correction of error

[✓] Other

Description of Modification to Solicitation:

Addendum No. 11 is issued to provide the following information to vendors:

1. To revise the Bid Opening Date to March 1, 2022. The time remains 1:30pm.
2. To provide bid clarification that security controls are to be bid "as specified" in regard to the original solicitation and information provided in subsequent issued Addenda.

No other changes.

Additional Documentation: Documentation related to this Addendum (if any) has been included herewith as Attachment A and is specifically incorporated herein by reference.

Terms and Conditions:

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.

2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

All offers subject to all terms and conditions contained in this solicitation

SOLICITATION NUMBER: CRFQ 0211 GSD2200000014
Addendum Number: 10

The purpose of this addendum is to modify the solicitation identified as ("Solicitation") to reflect the change(s) identified and described below.

Applicable Addendum Category:

[✓] Modify bid opening date and time

[ ] Modify specifications of product or service being sought

[✓] Attachment of vendor questions and responses

[ ] Attachment of pre-bid sign-in sheet

[ ] Correction of error

[✓] Other

Description of Modification to Solicitation:

Addendum No. 10 is issued to provide the following information to vendors:

1. To revise the Bid Opening Date to February 24, 2022. The time remains 1:30pm.

2. To provide (as an answer to Technical Question #109) the opportunity to bidders to attend a non-mandatory site visit on February 9, 2022, beginning at 10:00am at 112 California Avenue (1st Floor Lobby).

3. To provide answers to all Technical Questions submitted by the deadline of January 27, 2022 which had not previously been answered by Addendum.

No other changes.

Additional Documentation: Documentation related to this Addendum (if any) has been included herewith as Attachment A and is specifically incorporated herein by reference.

Terms and Conditions:

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.

2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

CRFQ Question GSD2200000014, Addendum #10
East Campus Metal Buildings Project
Technical Questions and Answers Submitted through January 27, 2022

Question 93. We've been asked to supply cost information for the above referenced CRFG – East Campus Metal Buildings Project. The specification lists access control system software and equipment that is no longer available. It also lists additional hardware to support a stand-alone system. It is our understanding that the equipment should be an extension of the WV Department of Protective Services existing Lenel OnGuard access control system. We would like to request clarification for the access control system specified.

There is Avigilon CCTV system equipment listed in the specification. It is our understanding that this equipment should be an extension of the WV Department of Protective Services existing Avigilon CCTV system. We would also like to request clarification for the CCTV system specified.

Answer 93. The general intent of the project is revised so that both access control and cameras shall be installed as an extension of the existing WV Division of Protective Services campus security system, which is Lenel OnGuard for access and Avigilon CCTV for cameras. Specifications and drawings are being revised to accommodate this systemic revision plus several details, but will not be published until a subsequent addendum.

Question 94. Is Factory Mutual for the roof panels required for this project?

Answer 94. No.

Question 95. On Addendum 7, Answer 83, is it supposed to be worded 24 gauge FP wall LINER panels, and 24 gauge FP-12 SOFFIT panels are acceptable? Or will the exterior wall panels be a 24 gauge FP panel and the wall liner panels be a 24 gauge FP-12 Panel?

Answer 95.Use 22 gauge panel rib roof liner panels, 24 gauge FP wall panels, and 24 gauge FP-12 soffit liner panels.

Question 96. On the Open Storage Building and Bulk Storage Building, it is calling for Soffit Liner Panels on the underside of the purlins, which panel is to be used, the 36" wide 22 gauge panel rib roof liner panel or the 24 gauge FP-12 soffit panels?

Answer 96.Use the 24 gauge FP-12 Soffit Panels for the Soffit Liner Panels.

Question 97. In Building B (120'x32'x14')(Stag/WHS Stag) of the Warehouse/Grounds Building, will there be roof liner panels attached below the roof purlins above the interior buildout portion (Room #s 104,105,106 & Tools) of this building?

Answer 97.Roof liner panels are not required on concealed portions of the roof.

CRFQ Question GSD2200000014, Addendum #10
East Campus Metal Buildings Project
Technical Questions and Answers Submitted through January 27, 2022

Question 98. Can you submit the following?

- General Note 15, Sheet E-1-106Notes that all Data Racks…& terminations are to be included in the project. What size rack? Are we to include patch panels as well?

Answer 98. Refer to Specification Sections 271100 – Communications Equipment Room Fittings and 271500 – Communications Horizontal Cabling for information on racks and patch panels.

Question 99. Sheets E-1-902 & E-1-903

- Is the POE Managed Switch to be furnished & installed as part of this contract?
- Is the 2-Strand fiber from the switch to Building EB80 to be furnished & installed as part of this contract?

Answer 99. See Answer #93 regarding security details, which will be provided by subsequent addendum. The switch is to be furnished and installed. However, the reference to EB80 on the Drawing is definitely incorrect. All cameras will be required to connect to the Division of Protective Services server located in Bldg 3 on the Capitol Complex.

Question 100. At Column Line 9, you indicate Wall Type tag 1 similar to Note 9. Does this mean that the PEMB is to provide the Tag 1 and others will provide Tag 1 below the roof elevation between Warehouse and Maintenance Office.

Answer 100."Wall Type 1, Sim" means it is similar to Wall Type 1. The adjacent Construction Note 9 explains how the wall type is to be modified. If your question is "who provides what", ask your general contractor.

Question 101. Is it correct to note Wall Type Tags typical on the side of the wall it flags? For example, Tag 1 typical Note 9 applies to the west side of Column Line 9. To the East side of Column Line 9, Tag 7 applies between Column lines D and N. Is this correct?

Answer 101. "Wall Type 1, Sim" as adjusted by Construction Note 9 is continuous along the East wall of Warehouse 109. "Wall Type 7" is a Furred Wall, which also modifies Wall Type 1 along the Office Area.

Question 102. Is Waterproofing to be included at Storage and Bulk Storage? Is Waterproofing included at the Temporary Shop? Is a foundation drain required at the Temporary Shop?

Answer 102. Self-Adhered Sheet Waterproofing is to be applied to all perimeter foundations of the Warehouse/Grounds Building from bottom of grade beam to 1" below grade and Mail Room from top of

footing to 1" below grade. Neither foundation drain nor foundation waterproofing is required at the temporary shop.

Question 103. Note 8 on sheet p-1-901 WG and 6/p-502 calls for the Air Compressor WD1 to be Owner Provided. WD1 on Sheet A-1-701 WG states this equipment is Provided and Installed CC. Which is correct?

Answer 103. Air Compressor WD1 is to be provided and installed by the Contractor.

Question 104. Addendum 7 Question 78 asks if underslab perimeter insulation is required. The answer #77 instructs us to coordinate a sub-consultant. What is the intent of this answer?

Answer 104. Provide under-slab perimeter insulation at the Warehouse Grounds Building and the Mail Room Building.

Question 105. Question 29 in Addendum 5 asks for 3 types of signs. Plaque is not in contract. Dimensional letters are by Gemeni. The answer to panel signs was not provided. We need a type and location.

Answer 105.Plastic Panel signage is required at the Men's Restroom, Women's Restroom, and for the Warning Sign (Detail 4/A-1-500, no braille is required at the Warning Sign).

Question 106. Question 38 answer was that we were to provide a building permit. We assume that the permit cost would be paid by the Contractor? Is this correct?

Answer 106. Any permits and/or fees which are necessary to undertake the project are the responsibility of the bidder/contractor.

Question 107. If we have a building permit, then the compliance to the IBC and City of Charleston is implied, including inspections. Is this correct?

Answer 107. Compliance with all local ordinances applicable to the project is the responsibility of the Vendor. Any required compliance with IBC is evidenced in the Project Plans.

CRFQ Question GSD2200000014, Addendum #10
East Campus Metal Buildings Project
Technical Questions and Answers Submitted through January 27, 2022

Question 108. Question 48 answer provides a location for the SHEET WATERPROOFING in a building. Are these locations for only the WG and MR? Is the sheet waterproofing required at the Temporary Shop?

Answer 108. No.

Question 109. I need to set up a site visit with an asbestos contractor. They need to get into the existing Mail Room. Can you point me in the right direction?

Answer 109. **A secondary site visit is scheduled for 10:00am on Wednesday, February 9, 2022, assembling in the 1st Floor Lobby of Building Four (112 California Avenue).** A walkthrough of the jobsite will follow, at which point an allowance of time will be made for bidders to examine the Mail Room. However, if a bidder wishes to access the roof (the area in which the specifications indicate quantities of asbestos-containing materials), they should be prepared to supply their own access. Any access to the roof to be granted shall be done only to the Agency's satisfaction regarding safety protocols (a bidder may be denied access if not meeting all safety requirements). A secondary site visit allows only an opportunity for bidders to review the jobsite (to photograph, take measurements, etc.). There will be no opportunity to ask or receive answers to technical questions. Any verbal representations made at the site visit will not be binding to the solicitation or any subsequently awarded contract. Attendees may be required to satisfy all Agency requirements for COVID-protocol safety (it is advised that social distancing be practiced and masks be worn with CDC-defined close contact is unavoidable).

All offers subject to all terms and conditions contained in this solicitation

SOLICITATION NUMBER: CRFQ 0211 GSD2200000014
Addendum Number: 7

The purpose of this addendum is to modify the solicitation identified as ("Solicitation") to reflect the change(s) identified and described below.

Applicable Addendum Category:

[✔] Modify bid opening date and time

[✔] Modify specifications of product or service being sought

[✔] Attachment of vendor questions and responses

[ ] Attachment of pre-bid sign-in sheet

[ ] Correction of error

[✔] Other

Description of Modification to Solicitation:

Addendum No. 7 is issued to provide the following information to vendors:

1. To provide answers to the portion of Technical Questions received through December 2, 2021, per Attachment A. Questions submitted since that date will be addressed by subsequent addendum.

2. To provide clarifications to and to add drawings (which are also included as a separate, downloadable attachment in wvOasis) per Attachment A.

3. To revised the deadline for submitting Technical Questions to December 29, 2021, by 3:00pm.

4. To revise the Bid Opening Date to January 13, 2022. The time remains 1:30pm.
No other changes.

Additional Documentation: Documentation related to this Addendum (if any) has been included herewith as Attachment A and is specifically incorporated herein by reference.

Terms and Conditions:

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.

2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

East Campus Metal Building Project

ADDENDUM NO. 7
12/15/2021

A. Clarifications

1. The awarded Contractor will be provided revised sets of Construction Drawings and Project Manual incorporating revisions made by addendum.

B. Questions and Answers

1. See partial bidder questions and answers, attached (questions 58A - 92).

C. Modifications

1. ADD Attached Drawing A-1-700, Revised Equipment Schedule.

2. ADD Attached Drawing A-1-701, Revised Equipment Schedule and deleted Phase 1 Equipment Plan.

3. Drawing E-1-101, Clarifications for lighting controls for the following spaces:

   a. Whs Stag 102, Warehouse 107

      1) Power pack shall provide control for the lighting within the spaces referenced. Each power pack shall provide 0-10VDC dimming (refer to Specification Section 260923). Power packs shall be used for manual control via the switches shown. Switches shown for these spaces shall be low-voltage type with capability of "on", "off", "raise" and "lower." Provide connections as required from switches to associated power pack. Provide 0-10VDC dimming conductors from power pack to each luminaire as defined by General Note #5

      2) Sequence of operations for these spaces are manual control only from low-voltage switches. Personnel shall be capable of providing "on", "off", "raise" and "lower" controls for luminaires in each of these spaces.

   b. Receiving 100, Refr Stor 101a, Storage 104

      1) Power pack shall provide control for the lighting within the spaces referenced. Each power pack shall provide 0-10VDC dimming (refer to Specification Section 260923). Power packs shall be used for manual and automatic control via the switches and occupancy sensors shown. Switches shown for these spaces shall be low-voltage type with capability of "on", "off", "raise" and "lower." Provide connections as required from switches to associated power pack. Provide 0-10VDC dimming conductors from power pack to each luminaire as defined by General Note #5

2) Sequence of operations for these spaces are manual "on" via associated switches and automatic "off" via time delay after space has been unoccupied as indicated by occupancy sensor. In addition, personnel can manually turn lighting "off" and provide manual dimming via the associated low-voltage switches.

c. Office 105

1) Power pack shall provide control for the lighting within the spaces referenced. Each power pack shall provide 0-10VDC dimming (refer to Specification Section 260923). Power packs shall be used for manual and automatic control via the switches and occupancy sensors shown. Switches shown for these spaces shall be low-voltage type with capability of "on", "off", "raise" and "lower." Provide connections as required from switches to associated power pack. Provide 0-10VDC dimming conductors from power pack to each luminaire as defined by General Note #5

2) Sequence of operations for these spaces are manual "on" via associated switches and automatic "off" via time delay after space has been unoccupied as indicated by occupancy sensor. In addition, personnel can manually turn lighting "off" and provide manual dimming via the associated low-voltage switches.

d. Exterior Lighting

1) Building mounted and pole mounted lighting shall be controlled by combination photocell and lighting contactor. In addition, a 3-position switch shall provide manual "on/off" and automatic "on/off" control via photocell for the associated lighting circuits (ckt H1-22, this sheet). Refer to Detail 3, Sheet E-501 for additional information. Lighting contactor and 3-position switch shall be in Mechanical Room 109. Photocell shall be building exterior mounted.

2) An unswitched lighting conductor is required for the luminaires containing an integral emergency battery inverter. During normal power failure, these luminaires shall be "on" regardless of photocell control.

4. Drawing E-1-102, Clarifications for lighting controls for the following spaces:

a. Surplus 111, Grounds Storage 123, Maintenance Shop 125, Grounds Mechanics Shop 126

1) Power pack shall provide control for the lighting within the spaces referenced. Each power pack shall provide 0-10VDC dimming (refer to Specification Section 260923). Power packs shall be used for manual

control via the switches shown. Switches shown for these spaces shall be low-voltage type with capability of "on", "off", "raise" and "lower." Provide connections as required from switches to associated power pack. Provide 0-10VDC dimming conductors from power pack to each luminaire as defined by General Note #5

2) Sequence of operations for these spaces are manual control only from low-voltage switches. Personnel shall be capable of providing "on", "off", "raise" and "lower" controls for luminaires in each of these spaces.

b. Breakroom 118

1) Power pack shall provide control for the lighting within the spaces referenced. Each power pack shall provide 0-10VDC dimming (refer to Specification Section 260923). Power packs shall be used for manual and automatic control via the switches and occupancy sensors shown. Switches shown for these spaces shall be low-voltage type with capability of "on", "off", "raise" and "lower." Provide connections as required from switches to associated power pack. Provide 0-10VDC dimming conductors from power pack to each luminaire as defined by General Note #5

2) Sequence of operations for these spaces are manual "on" via associated switches and automatic "off" via time delay after space has been unoccupied as indicated by occupancy sensor. In addition, personnel can manually turn lighting "off" and provide manual dimming via the associated low-voltage switches.

c. Corridor 112, Men 114

1) Sequence of operations for these spaces are manual "on" via associated switches and automatic "off" via time delay after space has been unoccupied as indicated by occupancy sensor. In addition, personnel can manually turn lighting "off" via the associated low-voltage switches.

d. Exterior Lighting

1) Building mounted and pole mounted lighting shall be controlled by combination photocell and lighting contactor. In addition, a 3-position switch shall provide manual "on/off" and automatic "on/off" control via photocell for the associated lighting circuits (ckt H1-24, this sheet). Refer to Detail 3, Sheet E-501 for additional information. Lighting contactor and 3-position switch shall be in Mechanical Room 109. Photocell shall be building exterior mounted. Please note: these are the same lighting contactor, switch, and photocell referenced in clarifications for Sheet E-1-101 above.

2) An unswitched lighting conductor is required for the luminaires containing an integral emergency battery inverter. During normal power failure, these luminaires shall be "on" regardless of photocell control.

5. Drawing E-1-103, Clarifications for receptacle/lighting interconnection.

   a. In Office 105, switched receptacles shall be controlled by a power pack that is connected to the lighting controls for this room. Receptacles shall be controlled "on" and "off" with the same control sequence as the lighting for this room.

6. Drawing E-1-106, Clarifications for Telecommunications System.

   a. In Security Room 119, provide 1" conduit with telecommunications bonding conductor (#1 AWG) from TMGB (Keynote #6) to the Main Ground Bar (Mechanical 109).

   b. Two (2) 2" conduit existing building (Plan South) referenced by Keynote #7 shall be spare. Cap conduit 5' beyond building footprint and provide utility marker for future use.

7. Drawing E-2-100, Clarifications for Open Storage and Bulk Storage Buildings:

   a. Open Storage and Bulk Storage Lighting

      1) Canopy and building mounted lighting shall be controlled by combination photocell and lighting contactor. In addition, a 3-position switch shall provide manual "on/off" and automatic "on/off" control via photocell for the associated lighting circuits (ckt L3-1, L3-3 and L3-5). Refer to Detail 4, Sheet E-501 for additional information. Lighting contactor shall be located adjacent to Panelboard L3 while the 3-position switch shall be located in Open Storage Building. Expand support rack for Panelboard L3 (Keynote #1) to accommodate lighting contactor. Field coordinate final switch location with Owner. Photocell shall be building exterior mounted.

   b. Panelboard L3 shall be NEMA 4X stainless steel in lieu of NEMA 3R.

8. Drawing E-3-101, Clarifications for lighting controls for the following spaces:

   a. Lobby 101, Mail Room 102, Break Room 108, Office 109, Shipping 110

      1) Power pack shall provide control for the lighting within the spaces referenced. Each power pack shall provide 0-10VDC dimming (refer to Specification Section 260923). Power packs shall be used for manual and automatic control via the switches and occupancy sensors shown. Switches shown for these spaces shall be low-voltage type with capability

of "on", "off", "raise" and "lower." Provide connections as required from switches to associated power pack. Provide 0-10VDC dimming conductors from power pack to each luminaire as defined by General Note #5

2) Sequence of operations for these spaces are manual "on" via associated switches and automatic "off" via time delay after space has been unoccupied as indicated by occupancy sensor. In addition, personnel can manually turn lighting "off" and provide manual dimming via the associated low-voltage switches.

b. Exterior Lighting

1) Building mounted lighting shall be controlled by combination photocell and lighting contactor. In addition, a 3-position switch shall provide manual "on/off" and automatic "on/off" control via photocell for the associated lighting circuit (ckt L4B-7, this sheet). Refer to Detail 5, Sheet E-5001 for additional information. Lighting contactor and 3-position switch shall be in Mechanical Room 103. Photocell shall be building exterior mounted.

2) An unswitched lighting conductor is required for the luminaires containing an integral emergency battery inverter. During normal power failure, these luminaires shall be "on" regardless of photocell control.

3) Please note: the OLF4AE plan east shall be shaded (meaning emergency battery backup is required).

9. Drawing E-3-103, Clarifications for Telecommunications System:

a. All data outlets in this building shall be D1 type.

b. In Electrical Room 104, provide 1" conduit with telecommunications bonding conductor (#1 AWG) from TMGB (Keynote #6) to the Main Ground Bar (Sheet E-3-102).

c. One (1) 4" conduit existing building (Plan South) referenced by Keynote #15 shall be spare. Cap conduit 5' beyond building footprint and provide utility marker for future indication.

10. Drawing E-500, Clarification for Exterior Lighting Control.

a. Detail 5, Mailroom Bldg – Exterior Lighting Control. Lighting contactor shall have 120V coil, minimum of two (2) 30A poles, and provided with NEMA 1 enclosure.

11. Drawing E-501, Clarification for Exterior Lighting Control.

a. Detail 3, Warehouse Bldg – Exterior Lighting Control. Lighting contactor shall have 277V coil, minimum of six (6) 30A poles, and provided with NEMA 1 enclosure.

b. Detail 4, Bulk/Open Storage Bldg – Exterior Lighting Control. Lighting contactor shall have 120V coil, minimum of three (3) 30A poles, and provided with NEMA 4X enclosure.

12. Drawing E-502, Clarification for Trench Details.

a. Detail 5, Primary Trench Detail and Detail 6, Secondary Trench Detail. Trench details are for reference only and Contractor shall refer to one-line diagrams for specifical conduit quantities and sizes.

13. Drawing E-703, Panelboard Schedules.

a. Panelboard L3 shall be provided NEMA 4X stainless steel enclosure in lieu of NEMA 3R enclosure.

End of Addendum 7

CRFQ 0211 GSD2200000014, Addendum 7
East Campus Metal Buildings Project
Technical Questions and Answers Submitted through December 2, 2021

Question 58A.What is control intent of power pack to line voltage switches without sensors?

(Building 1 – Warehouse: Whs Stag 102, Warehouse 107, Surplus 111, Grounds Storage 123, Maintenance Shop 125 & Grounds Mechanics Shop 126)

Answer 58A. **Power pack shall provide control for the lighting within the spaces referenced. Each power pack shall provide 0-10VDC dimming (refer to Specification Section 260923). Power packs shall be used for manual control via the switches shown. Switches shown for these spaces shall be low-voltage type with capability of "on", "off", "raise" and "lower." Provide connections as required from switches to associated power pack. Provide 0-10VDC dimming conductors from power pack to each luminaire as defined by General Note #5.**

Question 59. Is there a sequence of operations to validate the switching control intent in spaces with occupancy sensors because the switches show line connecting to power packs?

(Using line voltage switches is a possible function with primary auto on/off via occupancy sensor and secondary manual off via switch that does require switch to be in the on position for primary to function because lights will remain off if the switch is in the off position.)

Answer 59. **Sequence of operations is manual control only from low-voltage switches. The occupant shall be capable of providing "on", "off", "raise" and "lower" controls for luminaires in each of the spaces refenced in Question 58.**

Question 60. Can regular (rebar) splices be used in lieu of the dowel bar extenders shown on section 2/S-1-301?

Answer 60. **Rebar splices that satisfy the lap length requirements on the structural notes sheet may be substituted.**

Question 61. Sheet C-0-101; Pole shown in the middle of the lot as 'existing to remain'. Not shown in new work

Answer 61. **This light pole to remain is mis labeled. Remove the light pole and conduit back to the day care building as part of Add. Alternate No. 1.**

Question 62. Sheet C-0-101; is 'Remove Utility Pole' near the Block Building Main Shop to be removed by the utility?

Answer 62. **No. The Contractor shall remove the pole.**

Question 63. Sheet C-0-101; is 'Remove Pull Box & Duct Bank' and 'Remove Utility Pole & Underground Electric' by the utility or the contractor?

Answer 63. **No. The Contractor shall remove the pull box and duct bank.**

Question 64. Lighting Controls: What is control intent of power pack to line voltage switches without sensors?

Answer 64. **Sequence of operations is manual control only from low-voltage switches. The occupant shall be capable of providing "on", "off", "raise" and "lower" controls for luminaires in each of the spaces refenced in Question 58.**

CRFQ 0211 GSD2200000014, Addendum 7
East Campus Metal Buildings Project
Technical Questions and Answers Submitted through December 2, 2021

Question 65. (Building 1 – Warehouse: Whs Stag 102, Warehouse 107, Surplus 111, Grounds Storage 123, Maintenance Shop 125 & Grounds Mechanics Shop 126). Lighting Controls: Is there a sequence of operations to validate the switching control intent in spaces with occupancy sensors because the switches show line connecting to power packs?

Answer 65. **See Answers to Questions 58 and 59.**

Question 66. (Using line voltage switches is a possible function with primary auto on/off via occupancy sensor and secondary manual off via switch that does require switch to be in the on position for primary to function because lights will remain off if the switch is in the off position.) Lighting Controls: Sheets E-1-101 & E-1-102 do not show any switch designations.

Answer 66. **See Answers to Questions 58A and 59.**

Question 67. Sheet E-1-900 shows primary conduits as (2) 5" schedule 80 & Detail 5/E502 shows (2) 4" schedule 80.

Answer 67. **Provide two (2) 5" schedule 80 conduits as referenced on E-1-900.**

Question 68. Sheet E-1-900 shows secondary conduits as (3) 3" and Detail 6/E502 shows (5) 4"

Answer 68. **Provide three (3) 3" schedule 40 conduits as referenced on E-1-900.**

Question 69. Sheet E-1-900 lists ATS #1 & ATS #2 as 'freestanding. On Sheet E-1-400 they appear to be wall mounted

Answer 69. **Either freestanding or wall mounted ATS is acceptable, coordinate with ATS manufacturer. If freestanding, Contractor shall provide concrete housekeeping pad as referenced in Specification Section 263213.**

Question 70. Sheet E-1-900 General Note 6 refers to a Lightning Protection System. Does not appear to be specified

Answer 70. **Lightning Protection System for Building Structures is not part of the project.**

Question 71. They have a coupler detail out of caissons for the hooked bars. This is about a $70,000.00 add item. If they would go with regular splices it would be about $10,000 worth of rebar. Can we go with regular splices instead of using the coupler detail?

Answer 71. **Rebar splices that satisfy the lap length requirements on the structural notes sheet may be substituted.**

Question 72. Flood Coverage for the project will be approximately $100,000 per building with a $25,000 deductible each on this project. Can this please be reviewed by the Owner group and possibly carried by the Owner? This would be an extra $200,000 plus we would have to include in our estimate that the Owner may be able to get a better rate or already has coverage. Please advise.

Answer 72: **Builder's Risk insurance is required on this project. The Owner will not carry any part of that insurance, including flood coverage.**

Question73. For the Alternate work on the project, is all site utilities, site electric, demolition, etc. for those areas included in the Alternates? The only sheet the designates the Alternate areas is G-003, none

of the other sheets clarify where work should stop regarding the Base Bid and Alternates. This is making it difficult to clearly understand what to include in the breakout pricing.

Answer 73.. **See Answer 35 from Addendum 5.**

Question 74. Detail 3/S-1-301 shows a slab joint over a grade beam. This section is on Building Line 11. Per the Architectural Drawings in this area, the wall tag 1 is an Exterior metal building wall Similar. What are the similar details and not similar details. For example, the exterior walls are on an 4" x 8"curb. 3/S-1-301 does not show a curb. Is this correct?

Answer 74. **Yes.**

Question 75. Refer to Question 18. See attached highlighted images of Sheet A-1-700 and A-1-701 where missing information is required.

Answer 75. **See Revised Sheets in Addendum 6.**

Question 76. The Sheet A-1-100 shows both FE and FF fire extinguishers. The Sheets A-1-101 & 102 faintly show FE. The specifications indicate only FE are used. Which is correct?

Answer 76. **Only type FE fire extinguishers are used. Add fire extinguishers at Columns 9M and 10D, beside Door 107C in Surplus 111, and in Break Room 118 beside the north cabinetry.**

Question 77. On Sheet A-1-100 outside the Building at Column Line 2 is unidentified. On Sheet A-1-101 same location, is Note 10 for a canopy – no identification on site. Sheet P-1-103 same location no identification. On Sheet A-1-201 it shows a propane fence. There is nothing on the Site Utility drawing. What is the intend here?

Answer 77. **The propane cabinet sits on a concrete slab. See notes 10 and 11/A-1-101.**

Question 78. On Sheet A-3-001 shows a detail of under slab perimeter insulation. The WG sheets do not indicate under slab perimeter insulation, but it is shown in details without any information. What are we to price in this location on the WG drawings?

Answer 77. **Coordination of sub-consultant scope of work is the General Contractor's responsibility.**

Question 79.A continuation to the question of payment of construction testing Section 014000 paragraph 1.9 A.2 states "Payment for these services will be made from testing and inspecting allowances, as authorized by Change Orders." Will we be receiving a Change Order for this work?

Answer 79. **All testing and inspection are included in the bid. No change order will be provided for testing of work included in the bid.**

Question 80. If the Contractor is to provide and pay for Testing can you provide in writing via Addendum that Terracon will be an acceptable provider of this service.

Answer 80. **Terracon is an acceptable provider for testing services subject to meeting the specified requirements.**

CRFQ 0211 GSD2200000014, Addendum 7
East Campus Metal Buildings Project
Technical Questions and Answers Submitted through December 2, 2021

Question 81. In Section 133419 paragraph 3.9 A. is states "Special Inspections: Owner will engage a qualified special inspector to perform field quality control special inspections and to submit reports." Please advise with the clarification requested regarding the Special Inspector.

Answer 81. **Testing and special inspection will be paid for by the Contractor.**

Question 82. Please reconsider Cornell as an approved manufacturer for the overhead doors. Adden #5, Answer 7, Cornell was not approved as an overhead door supplier because of insufficient documentation. I must have forgotten to send it on my first try. See product data & warranty information attached. I can supply Wayne Dalton (listed as approved in specs) but they are having major production issues, we've been using Cornell as our primary supplier since the pandemic began effecting supply issues.

Answer 82. **Cornell is an acceptable alternative manufacturer for overhead doors subject to meeting the specified requirements.**

Question 83. Regarding liner panel gauges:

A. Addendum #5, question and answer #41 calls for a panel rib style **roof liner** panel. It calls for 0.036 thickness (20 gauge). We can't roll panel rib with that thickness. The Thickest gauge we can roll for panel rib is 22 gauge. **We request that they change the roof liner panel gauges to 22 gauge.**

B. Addendum # 5, question and answer to #41 also calls for a **wall liner** panel with flush profile with exposed fasteners, 12" width, and 1 ½" panel thickness. It also calls for .036 thickness (20 gauge). We don't have any panel that matches that profile (flush, exposed fastener, 12" X 1 ½"), and we also don't have any liner panel that we provide that is 0.036" thickness. We can provide PR, VR, or RPR in 22 gauge, or we can provide FP-12 in 24 gauge. **We request that the wall liner panels be changed to 22 gauge PR, VR, or RPR, or 24 gauge FP-12.**

C. Specification 133419/2.6 call for metal "soffit" panels that are VP FP-12, but calls for them to be 0.036 thickness. We provide this panel as 24 gauge. 0.036 is 20 gauge. **We request it be changed to 24 gauge, and/or we request that it be changed to whatever the roof liner panel (item "a" above) is.**

Answer 83. **After further review, 22 gauge panel rib roof liner panels, 24 gauge FP wall panels, and 24 gauge FP-12 panels are acceptable.**

Question 84. Drawing A-1-600 finish schedule list a lot of walls with MWP/Gyp but sections show metal liner panels in almost all locations. **We request clarification on which is required.**

Answer 84. **See plans for wall types.**

Question 85. Drawing A-1-101, A-1-104, Show the receiving/Surplus building over lapping the warehouse building at line 3.1. This will require a cricket and possible weather tightness issues. **Is there any leeway on how this can be framed?**

Answer 8: **No, not at this time.**

Question 86. Drawing A1-104. The canopies with 8' (2) and 10' (1) projection cannot be walk door type canopies. These will require structural canopies without support rods. **We request that these be changed to 4' or 5' projections if possible as those can be done as preassembled canopies.**

Answer 86. **Provide as designed.**

CRFQ 0211 GSD2200000014, Addendum 7
East Campus Metal Buildings Project
Technical Questions and Answers Submitted through December 2, 2021

Question 87. Confirm that open storage and bulk storage building will receive insulation and wall/ roof liner where applicable.

Answer 87. **Open storage and bulk storage do not require insulation.**

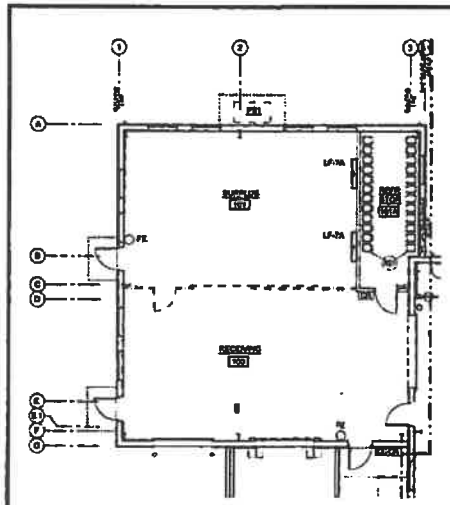
Question 88. Per the revised pricing sheet included in Addendum 5 we are to add the base bid, alternates and unit prices together for a Total Bid Amount. It is pretty uncommon to add unit prices to bid amounts. Please confirm that you want us to add the unit pricing for a Total Bid Amount.

Answer 88.Vendor shall add base bid, alternates, and unit prices together to calculate Total Bid Amount, per instructions on Pricing Page.

Question 89. Can Chief Industries be approved as a qualified manufacturer for the Pre-Engineered Metal Building? Chief has been manufacturing buildings since 1965 and is an MBMA member and also AISC certified, please use the following link for more information on Chief Industries.
https://chiefbuildings.com/

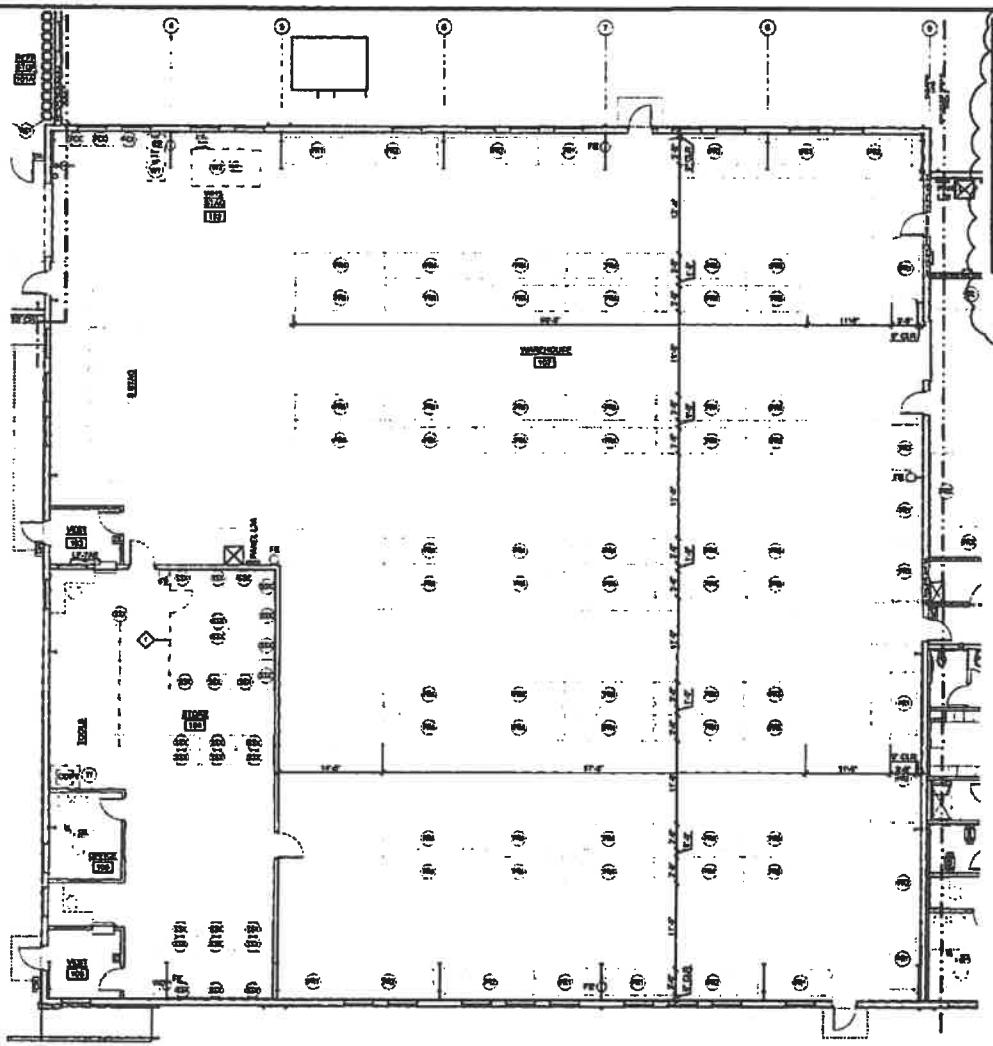
Answer 89. **Chief Industries is an acceptable manufacturer for Pre-Engineered Metal Buildings subject to meeting the specified requirements.**

Question 90. Can MBCI's FW120 flat profile wall panel be an acceptable substitution for the Impressaclad wall panel? The FW120 panel offers a flat embossed profile and is a 20 gauge panel. Attached is a brochure of the panel with more information.



Answer 90. **A complete system from one metal building manufacturer is required for this project.**

Question 91. If MBCI's FW120 panel is approved, is it acceptable to use for the wall liner panels also?



Answer 91. **A complete system from one metal building manufacturer is required for this project.**

Question 92. On the East Campus Metal buildings project A-1-101 & A-1-102 there are non-standard metal stud sizes indicated in wall types. Types 3 & 9 indicate 5-3/8" & type 6 indicates 5-5/8". As our metal stud manufacture doesn't offer these sizes, is 6" metal studs ok for these wall types?

Answer 92. **6" metal studs are acceptable substitutes for 5"+ studs, assuming all other specifications remain the same. All coordination issues arising from the change are the Contractor's responsibility.**

SOLICITATION NUMBER: CRFQ 0211 GSD2200000014
Addendum Number: 5

The purpose of this addendum is to modify the solicitation identified as ("Solicitation") to reflect the change(s) identified and described below.

Applicable Addendum Category:

[✔] Modify bid opening date and time

[✔] Modify specifications of product or service being sought

[✔] Attachment of vendor questions and responses

[ ] Attachment of pre-bid sign-in sheet

[ ] Correction of error

[ ] Other

Description of Modification to Solicitation:

Addendum No. 5 is issued to provide the following information to vendors:

1. To provide answers to the portion of Technical Questions received through November 5, 2021, per Attachment A. Questions submitted since that date will be addressed by subsequent addendum.

2. To provide clarifications, specification and drawing revisions, per Attachment A.

3. To revised the deadline for submitting Technical Questions to November 29, 2021, by 3:00pm.

4. To revise the Bid Opening Date to December 21, 2021. The time remains 1:30pm.

No other changes.

Additional Documentation: Documentation related to this Addendum (if any) has been included herewith as Attachment A and is specifically incorporated herein by reference.

Terms and Conditions:

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.

2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

CRFQ GSD2200000014, Addendum #5
East Campus Metal Buildings Project
Technical Questions and Answers Submitted through November 5, 2021

NOTE: All products for which substitution requests are made prior to the bid opening are still required to be approved through the Submittal Procedures, as indicated in Division 1 of the Project Manual.

Question 1: Lochinvar is listed as acceptable, we stock Lochinvar here in Charleston. We also stock the DWH1 version of the BTH120 –> the SWR125. Spec attached. My question is, would this Lochinvar unit be acceptable? It is not offered in ASME, but we can offer an extended warranty for total of 5yr on the tank (3yr is std for everyone), in lieu of ASME rated tank.

Answer 1: Lochinvar is acceptable. Must provide extended warranty (total of 5 yr), in lieu of ASME rating.

Question 2: On the L1- it shows a Delta Paradigm HW fct (which doesn't seem to be something Delta makes)--- would you all consider the T&S fct attached, the EC3103? We also stock this faucet here in Charleston. To get the correct gpm, we can change aerator to 0.5gpm. It's also capable of battery, plug-in, or HW straight out the box. Lastly, the sensor eye is replaceable- meaning maintenance staff down the road can replace the sensor for $50 instead of tossing a $450 fct and replacing the whole thing.

Answer 2: Delta Paradigm is manufactured by American Standard. T&S single lever faucet is acceptable with adjustment to match GPM listed in schedule.

Question 3: BS1- keeping same faucet manufacturer- T&S, B1172-07-133 kitchen sink faucet…. For consideration.

Answer 3: This is not acceptable. GPM does not match and distance from deck to bottom of faucet is not as specified.

Question 4: On Sh1- we work well with Clarion Bathware out of PA. Spec attached, MP6333bf34. They will install the handheld shower and trim at the factory and ship complete. They also ship pretty quick. Attached is a near identical to Freedom listed on plans. Of note, I think Freedom showers is more of an online retailer to elderly facilities.

Answer 4: This is not acceptable. The dimensions of the shower are larger than the opening that has been provided and what is shown on the schedule.

Question 5: Lastly, for UR1 & WC1/a- I'm sure Sloan is acceptable, but I attached the specs anyway (111sfsm-hw & 186sfsm-hw)---we also stock this in Charleston. They even come with a true mechanical override even if power failure.

Answer 5: Sloan is acceptable. Individual models must meet specifications and must be submitted for approval post-award.

Question 6: Could you request a Basis-of-Design from Architect/GSD for Section 105500 - Private-Delivery Postal Specialties for bidding purposes?

CRFQ GSD2200000014, Addendum #5
East Campus Metal Buildings Project
Technical Questions and Answers Submitted through November 5, 2021

Answer 6: The mail boxes were designed around Florence Corporation Series 1700 Horizontal, rear-loading, recessed mounted, anodized aluminum mail box system utilizing (7) 170096 units with (6) 1705 compartments and (6) 1707 compartments, each (42 of each compartment total), and standard cam locks.

Question 7: Please approve Comell as approved supplier for the overhead doors (product data attached.

Answer 7: Insufficient documentation was provided to determine equality of product and warranty. Cornell cannot be approved as an acceptable alternative manufacturer for overhead doors at this time.

Question 8: Will you approve Soprema, Colphene, Elastocol Stick Zero, per attached documentation?

Answer 8: Soprema USA is acceptable as an alternative manufacturer for Self-Adhering Sheet Waterproofing, subject to meeting the specified requirements.

Question 9: From Sections 111313, 111316, and 111319, will you please approve McGuire Edge-Of-Dock Leveler, Rigid Dock Shelter & Automatic Truck Restraint?

Answer 9: McGuire is an acceptable alternative manufacturer for dock equipment subject to meeting the specified requirements.

Question 10: A model specific bumper will be supplied with the Edge-Of-Dock lever: are the bumpers specified in 111313, 2.1 required at another location (these bumpers will not work with the Edge-Of-Dock Leveler)? If so, where and how many?

Answer 10: The intent of this section is to provide dock bumpers coordinated with edge-of-dock leveler to be supplied. This is the only location where dock bumpers will be required.

Question 11: From Section 083323; Doors #102A & 107D are interior doors, do they require insulation? windows?

Answer 11: Insulation is required on overhead doors 102A and 107D, vision panels are not required.

Question 12: Is the Mailroom Door #110C to be manually operated?

Answer 12: Yes.

Question 13: Please clarify if the State is wanting the GC to handle the asbestos abatement in the block building, or will the State take this part of the work and have their Abatement company that they have a contract with handle that abatement.

CRFQ GSD2200000014, Addendum #5
East Campus Metal Buildings Project
Technical Questions and Answers Submitted through November 5, 2021

Answer 13: Per Specifications Section 028200, the Vendor will be responsible for all asbestos abatement required for the project, through the use of an Abatement Contractor (subcontractor), if necessary. The State will not utilize their existing contract/contractor for any work included in this project.
The existing Mail Room has already been partially demolished and the total quantities of asbestos abatement shall be adjusted in accordance with the revised Table of Quantities on revised Specification Section 028200, Paragraph 1.1.2 (attached).

Question 14: Can a substitution of helical piers be used in place of the auger cast piles?

Answer 14: No. Helical piers are not equal to auger cast piles.

Question 15: In the Spec 133419 Metal Building Systems (2 a below)- The industry standard system for the specified metal roof and wall panels is a two-coat fluoropolymer. The exterior finish spec says three coats. Is the standard two coat fluoropolymer system the finish intended for the project?

Answer 15 : Alternative systems for coating roof and wall panels will be considered if they provide the required warranties and have a similar appearance as determined by the Architect.

Question 16: The dock equipment specs call out for an edge-o-dock leveler, but also mention a pit style dock leveler. Additionally, the drawings A-1-200 shows a pit dock leveler as well. Can we get clarification on this spec?

Answer 16: The dock leveler will be a manual edge of dock leveler.

Question 17: We were told at the pre-bid meeting that there is a cover sheet we need to use if we submit the bid through OASIS. We cannot find the cover sheet in the RFQ. Can you give us a copy or let us know how to find it?

Answer 17: By Addendum #3, a copy of the Pricing Page (i.e., not a "cover sheet") was made to be a requirement to be submitted with the Bid.

Question 18: Please find attached our submittal for the lighting fixtures we are proposing for the above named project.

Answer 18: Signify Brand fixtures are acceptable as an alternative manufacturer for Lighting Fixtures, subject to meeting the specified requirements. Insufficient information is available to determine equality of NLS Lighting products and warranty. NLS Lighting cannot be approved as an acceptable alternative manufacturer for light fixtures at this time.

Question 19: Addendum # 3 extended the Bid to November 30. This is one business day after the Thanksgiving holiday. We would request that the bid date be extended into the week of December 6 through December 10. This allows all resources to be back in their respective offices and over the holiday. Based on our history of bidding during the holiday season, this is a reasonable request.

CRFQ GSD2200000014, Addendum #5
East Campus Metal Buildings Project
Technical Questions and Answers Submitted through November 5, 2021

Answer 19: By Addendum #4, the Bid Opening was extended to December 14, 2021

Question 20: Can the Owner perform the Special Inspections and Testing? Per IBC Code "the approved agency shall be independent from the Contractor responsible for the work being inspected." Also it is not possible to know the cost of the special inspections to be included in the bid.

Answer 20: No. This remains the Contractor's responsibility.

Question 21: Can a Special Inspections Allowance be provided for the Contractors to include in their bids?

Answer 21: No.

Question 22: Per the drawings and specifications there are to be 5 pile load tests. How many 16" versus 18" pile tests are to be performed?

Answer 22: **Provide (3) – 16" diameter load tests and (2) – 18" diameter load tests.**

Question 23: Sheet C-0-107 plan notes references "See Detail B this sheet". This is not exist (sic). Please advise.

Answer 23: See Detail Sheet C-0-506

Question 24: Sheet C-0-107 plan notes references "See Detail A this sheet". This is not exist (sic). Please advise.

Answer 24: See Detail Sheet C-0-506

Question 25:Sheet C-0-107 plan notes references "Note 43 temp water" pointing to an electrical conduit for site lighting. Please advise.

Answer 25: The leader has been revised.

Question 26: Sheet C-0-107 please confirm that WVAMWCO will install the water line Note 36 into the vault including the valve or up to the valve. If up to the valve and the valve is part of our work, then is the gate valve 8" as shown on Sheet C-0-508?

Answer 26: Confirmed. Yes. The gate valve is 8".

Question 27: Sheet C-0-508 is the sump pump shown intended for the Fire Vault?

Answer 27: Correct.

Question 28: Sheet C-0-107 near the temporary electric service for the new maintenance building it looks like a sanitary line is extending into the building. This is not noted.

Answer 28: Correct. It's 4" PVC. See Note 42 on Sheet C-0-107 and Sheet C-0-106 for more information.

Question 29: Sign lettering are shown on Elevations. Where is the detail for type and size of Plaque, Lettering and panel signs? Detail 8/A-1-500 are the Owner provided and Owner installed signs.

Answer 29: For dimensional letter signage, provide Gemeni, cast aluminum, color anodized, Arial Bold font, 10" and 12" letters for mounting on metal building siding. No interior plaque is required.

Question 30: In room 110, Janitor, there is a line without any detail or tag. What is this?

Answer 30: Provide 14" deep, heavy duty coated wire shelving, wall mounted at 32" o.c. into studs, with shelves at 24", 42", 60", and 72" from wall to wall.

Question 31: Will the AWI certification for Plastic Laminate-Faced Casework and Plastic-Laminate Tops be enforced?

Answer 31: Provide AWI conformance as specified.

Question 32: This is taken from the Geotech report. "1. Floor slabs should be structurally independent of any building footings or walls to reduce the possibility of floor slab cracking caused by differential movement between the slab and foundation. Narrower, turned-down slab-on-grade foundations may be utilized at the approval of the structural engineer. The slabs should be appropriately reinforced to support the proposed loads." There are locations in most building details that tie the floor slabs to the foundation walls with dowels such as dowel bars and hairpins. Are these to be considered included as shown?

Answer 32: **Yes.**

Question 33: The Special Inspections Section 014533 indicate that the "**Contractor shall engage a third-party Special Inspector and qualified testing and inspecting agency to perform field tests and inspections**". To remain transparent to the IBC Chapter 1703.1.1 use the term independent from the contractor responsible for the work being inspected. Chapter 1704.1 indicate the owner or registered design professional shall employ this special inspector. We understand that the State is not obligated to follow the local building inspector, but should be obligated to follow the IBC as adopted. Please advise as we may choose to employ an independent inspector for our protection from liability.

Answer 33: The Vendor shall employ an independent Special Inspector approved by the Architect and Owner.

Question 34: After reviewing the Soils Report, we can see a conflict between the design of the Auger Cast and the As-Build record and the reduction or increase of total length will be a change order. The variant from depth of auger cast specified and the possible depth is in the range of 549' to 572'. This variance in elevations is not unusual. To make this more transparent, a unit price for total adds and deducts of 16" and 18" lengths would provide clarity. Please provide these units requested in the bid form.

Answer 34: Commodity Line 5 has been added to the wvOasis solicitation document (CRFQ), the Pricing Page has been revised to include it, and a "Unit Prices" section has been added to Division 1 of the Project Manual to provide information on reconciling the Unit Price. (Will need to add a Unit Prices Section to Division 1 - We will modify the Pricing Page to incorporate Commodity Line 5 to cover bidding a single Unit. We need to make sure our depths are clearly quantified in the bid documents).

Question 35: The Alternate Section 012300 Alternates list three Alternates. While simple alternates can be described in written word, these a complex alternates (sic). For example, we read that Phase 3 Alternate 3 on the drawings indicates Storm Retention Areas are included in this Alternate while the drawings indicate that Retention Areas 2, 3, and 4 are in 3 different areas on the drawings and should be included in the Base Bid, Alternate 2 and Alternate 3. There is no line defining Alternate 2 and Alternate 3 on respective Site paving and concrete, Site Grading and Drainage, or Site Utility. Light Poles are similarly in multiple Alternate packages. Utilities represent another large issue to analyze. While it is our job once we are selected to coordinate, it is the Engineers job to clearly delineate the drawings so that every bidder can price the work in a similar manner. We still have not found the Generator Yard in Alternate 2.

Answer 35: The Base Bid includes: Storm Lines 1 & 2, Detention System Nos. 1 & 2; Alternate 2 includes Storm Lines 3 & 4, Detention System No. 3; Alternate 3 includes Storm Lines 5 & 6, Detention System 4. Unless otherwise indicated, utilities serving the various structures will be constructed in the phase indicated for each structure. Keynotes on "Sheet C-0-107, SITE UTILITY PLAN" clearly indicate site lighting phasing. Unless otherwise indicated, site features and utilities will be constructed in the Base Bid. See "Sheet G-003, ALTERNATES AND PHASING PLAN" for delineation of site paving and concrete.

Question 36: The "Area Currently Under Construction that has the Green Metal Building relocated on something like a Type 1 concrete slab at 6" is not clear. From the drawings, we can see that we relocate the building. The foundation is undefined. There are paving areas and charging stations. Are these scope our or to be performed by others? The area is undefined related to paving, utilities, sidewalks except for the parking shown and electrical.

Answer 36: The requirements for the original location indicated for the Green Metal Building relocation (now for the construction of a new building) are indicated in the attached revised Project Plans. The destination for the relocation of the Green Metal Building is revised.

Question 37: Sheets A-1-700 and A-1-701 are incomplete. The Schedules for OFOI and CFCI are not complete. Lifts that indicate the contractor is to furnish do not have specifications. Other items are simply blank. For equipment T1, W1 and W2 we are assuming that this is for electrical information only and not to provide this equipment as part of our bid.

Answer 37: **Answer to be provided in Addendum 6, with revised and complete Equipment Schedules (including specification references for all equipment that will be Contractor Provided/Contractor Installed). However, the assumption that T1, W1, and W2 are Owner Provided/Owner Installed, and that they are referenced on the Schedule solely to indicate electrical information, is correct.**

CRFQ GSD2200000014, Addendum #5
East Campus Metal Buildings Project
Technical Questions and Answers Submitted through November 5, 2021

Question 38: One of the documents required is a building permit. Are we to submit drawing for a Building Permit from the City of Charleston?

Answer 38: Yes.

Question 39: Who is responsible for engineering PEMB anchor bolts. Chapman indicates a length of anchor bolt for column to foundation connection at 40" long. Chapman does not provide a diameter.

Answer 39: **Anchor bolt diameter is provided by the PEMB manufacturer and final embedment depth will be determined at the time of PEMB shop drawing review. The 40" embedment is for Contractor estimating purposes only. Final length and any necessary modifications to the anchor bolts/foundations will be provided after shop drawing review.**

Question 40: Does the PEMB provide anchor bolts? In the PEMB section it calls for anchor rods to connect to the foundation. Are these the Anchor Bolts?

Answer 40: **Contractor provides anchor bolts.**

Question 41: The liner panel is not specified in Section 133419 Metal Building Systems. Should this be added to the list of products?

Answer 41: Roof liner panels are tapered rib with exposed fasteners. Formed with raised trapezoidal major ribs and intermediate stiffening ribs symmetrically spaced between major ribs; designed to be installed by lapping side edges of adjacent panels and mechanically attaching panels to supports using exposed fasteners in side laps. Material is zinc-coated or aluminum-zinc alloy-coated steel sheet, 0.036-inch nominal uncoated steel thickness. Pre-painted by the coil-coating process to comply with ASTM A755/A755M. Exposed Finish is fluoropolymer, color as selected by Architect. Major rib spacing 12". Panel coverage 36". Panel height 1.25".

Wall liner panels are flush profile with exposed fasteners. Solid panels formed with vertical panel edges and intermediate stiffening ribs symmetrically spaced between panel edges; with flush joint between panels; designed to be installed for interior side of metal wall panel assemblies and installed by lapping interconnecting side edges of adjacent panels and mechanically attaching panels to supports using concealed fasteners in side laps. Material is zinc-coated (galvanized) or aluminum-zinc alloy-coated steel sheet, 0.036-inch nominal uncoated steel thickness. Pre-painted by the coil-coating process to comply with ASTM A755/A755M. Exposed Finish is fluoropolymer, color as selected by Architect. Panel coverage 12". Panel height is 1.5".

Question 42: Air barrier is not list in the PEMB specification section nor is air barrier list in Division 07. Where is this product specified? Is this required on just the walls or walls and deck?

Answer 42: The vapor barrier of the PEMB insulation is the air barrier for the building.

Question 43: The list of products provided by the PEMB supplier are the window units. Is this correct?

Answer 43: The windows must be coordinated with the metal building system. If a metal building manufacturer does not provide the specified windows, they may be provided by another source subject to meeting the requirements of the specification. Testing data of the window meeting U-value requirements will is required in any case.

Question 44: Would the Hollow Metal doors and frames be a part of the PEMB section?

Answer 44: No.

Question 45: How much time would we allocate the duration to move in the maintenance shop once the substantial completion statement is provided? Will the Fire Marshal allow the partial occupancy without the Fire Sprinkler or Fire Alarm work completed? Note that the sprinkler and possibly the FA can't be built at the time of partial occupancy.

Answer 45: The specification revisions included in this Addendum make this question moot.

Question 46: Cast-in-concrete steel corner guards are required on piers as shown on 1/A-2-200. They are not required on all 4 corners. Is this correct?

Answer 46: Correct.

Question 47: Detail 3/A-520 does not specify a window sill material.

Answer 47: Provide 1/2" solid surface window sills with 1/2" overhang, Corian or equal, color selected by Architect from full range.

Question 48: What is the extent of the SELF-ADHERING SHEET WATERPROOFING?

Answer 48: Provide self-adhering sheet waterproofing from the top of footing/bottom of grade beam to 4" below finished grade.

Question 49: A-520 Detail 3 – Is the interior windowsill solid surface? What Material for 8 1/4" width sill?

Answer 49: Provide 1/2" solid surface window sills with 1/2" overhang, Corian or equal, color selected by Architect from full range.

Question 50: Is Detention System No. 1 & No. 2 included in the Base Bid?

Answer 50: Yes.

CRFQ GSD2200000014, Addendum #5
East Campus Metal Buildings Project
Technical Questions and Answers Submitted through November 5, 2021

Question 51: Is Detention System No. 3 in Alternate No. 1 or Alternate No. 2?

Answer 51: Alternate No. 2.

Question 52: Is Detention System No. 4 part of Alternate No. 3?

Answer 52: Yes.

Question 53:I am bidding as a sub-contractor on the doors for the East Campus Metal Building Capitol Complex and am asking to have C.H.I. Overhead doors considered as an approved alternate. Attached is their product flyer and specs for their doors. If there is anything you need from me feel free to contact me at the below numbers or email.

Answer 53: C.H.I. Overhead Doors is acceptable as an alternative manufacturer for overhead doors subject to meeting the specified requirements

Question 54: I have a question concerning the Star 4 truck restraint and the Mechanical EOD. The Star 4 is calling for an interlock: leveler does not operate while truck restraint is not engaged. This cannot be done with the Mechanical EOD, we could quote the aFX EOD which is electrical air operated and can be interlocked with the Star 4.

Answer 54: No interlock will be required for the mechanical dock leveler. Provide one set of wheel chocks with chains, mounting plates, and signs installed at each of the Receiving overhead doors.

Question 55: Auger Cast Pile Detail on S-1-501 WG calls for 6 dowels extended into top mat of footing. Note 4 states provide (8). Which is correct?

Answer 55: **Provide 6.**

Question 56. Is the vertical bar a #8 for the 18" diameter pile as well. The note indicates 16" and 18" are similar except the schedule calls for #7 bar in lieu of #6 bar. Please advise?
Answer 56: **Yes.**

Question 57: Same Detail as above, Section A-A does not show the center bar. Also, the Auger Cast equipment do not handle a center bar with a hook. This will need to be spliced. Please advise if this is ok.
Answer 57: **Splice of the bar with the top section being hooked is acceptable.**

Question 58: We are simply pointing out that you have build (sic) in a redundancy in the perimeter foundations under the Footer F1 and F2. This causes the foundation work to be 2'0" deeper to accommodate the pile cap. Is it not possible to eliminate the 3'x3' Pile Cap where you have an F1 or F2 foundation? This would save the excavation cost and drilling through so much overburden while only costing 2' length to auger cast piles. Please advise?

Answer 58: **Provide pile cap construction as indicated on the drawings.**

WVGSD
East Campus Metal Building Project
GSD2200000014

ADDENDUM NO. 5 SUMMARY
11/16/2021

A. Clarifications

1. The awarded Contractor will be provided revised sets of Construction Drawings and Project Manual incorporating revisions made by addendum.

B. Technical Questions and Answers

1. All Technical Questions submitted through November 5, 2021 are answered herein. See partial bidder questions and answers, attached (questions 1-57). Questions submitted after that date, and through the revised Deadline of November 29, 2021, will be answered in a subsequent Addendum.

C. Modifications

1. CRFQ Modifications:

a. **General Construction Specifications:** In the General Construction Specifications section of the CRFQ, in Item 10. SUBSTANTIAL AND FINAL COMPLETION, revise to read:

"Vendor shall achieve substantial completion, by Phase, as indicated below, with the stated number of calendar days after the Contract start date established by the issuance of the Notice to Proceed. See Drawing G-003, Alternates and Phasing Plan. Failure to meet the deadlines established herein, unless extended by change order authorizing additional time free of liquidated damages, will result in liquidated damages being applied:

Phase A: Substantially Complete within **Seven Hundred and Fifty (750)** calendar days after the start date established by the issuance of the Notice to Proceed.

Phase B: Substantially Complete within **Seven Hundred and Fifty (750)** calendar days after the start date established by the issuance of the Notice to Proceed.

Phase C1: If awarded as Alternate #1, Substantially Complete within **Five Hundred and Forty (540)** calendar days after the start date established by the issuance of the Notice to Proceed.

Phase C2: Phase C2 may not begin until Phase C1 has been Substantially Completed and the personnel and equipment of the WV Office of Technology is moved into the new Mailroom, but otherwise must be Substantially Complete within **Seven Hundred and Fifty (750)** calendar

days after the start date established by the issuance of the Notice to Proceed.

Phase D: If awarded as Alternate #2, Phase D may not begin until Phase C2 has at least begun, but otherwise must be Substantially Complete within **Seven Hundred and Fifty (750)** calendar days after the start date established by the issuance of the Notice to Proceed.

Phase E: If awarded as Alternate #3, Phase E must be Substantially Complete within **Seven Hundred and Fifty (750)** calendar days after the start date established by the issuance of the Notice to Proceed.

Final Completion: For each of the aforementioned Phases, Final Completion is to be achieved no later than Thirty (30) calendar days after Substantial Completion."

b. Pricing Page: See attached, revised Pricing Page, revised to capture the Unit Price added as part of this Addendum.

2. **Project Manual Modifications**:

a. Spec Section 011000.1.5.A – Revise to read: "The Work shall be conducted in sequenced phases, as noted on the plans. The Owner will consider alternate Contractor phasing plans which minimize disruption of public parking and Owner operations and maximize efficient progress of the Work during the entire Fixed Period Contract Term. Note: No sitework can be performed west of Jefferson Street prior to the end of the 2022 Legislative Session. Phase A (construction of a metal building which will temporarily house the GSD Grounds Mechanics Shop and some adjacent space) must be Substantially Complete and Owner occupied prior to the existing block building housing the current Grounds Mechanics Shop being demolished (as part of Phase B); contractor should allow for approximately two weeks for the Grounds Mechanic to move from the existing block building into the temporary building. The construction of the Phase C1 New Mailroom must be Substantially Complete and Owner occupied prior to the demolition of the existing Mailroom in Phase C2; Owner will move into the New Mailroom no later than upon Final Completion of Phase C1 (i.e. 30 days after the Contractor having achieved Substantial Completion). Scheduling of the Phases shall allow time between sub-phases for Owner to move from existing facilities into newly constructed ones. All phases of construction shall be coordinated to not interfere with Owner's occupation and use of the existing and the new facilities, including the Mechanics Shop, the Mailroom, plus access (Owner, not public) to the lot being constructed (under separate contract) to the east of the Chiller Plant expansion and immediately west of the current Jefferson Street."

b. Spec Section 012200, Unit Prices: In Division 1 of the Project Manual, add Spec Section 012200, to cover the inclusion of an add/deduct Unit Prices for sizing of Auger Cast Pilings.

c. Spec Section 028200 Asbestos Abatement Specification – Use revised ACM Table and sample location map, attached.

d. Spec Section 087100 – Use revised Hardware Sets, attached.

1) The following doors are to be provided with card readers, appropriate electrical and communications connections, and hardware types as noted:

Warehouse		
	ii. Door 100D	HS 17
	iii. Door 107B	HS 04
Mail Room		
	iv. Door 101A-MR	HS 03
	v. Door 105A-MR	HS 04
	vi. Door 110A-MR	HS 03

3. Drawing Modifications:

a. Drawing G-003, replace with revised drawing, attached:

1) Revised phasing to move Grounds Mechanic out of work area prior to construction of Warehouse/Grounds Building.

b. Drawing C-0-101, replace with revised drawing, attached:

1) Revise Demo Note 5 to - "Remove two of the three remaining metal pole buildings. The third structure will be removed and relocated by the *Contractor to a location on campus as directed by the Owner.* Contractor shall take ownership of the remaining two structures upon contract award. Any salvage value is to be credited to the Owner as part of the Base Bid.

2) Add Demo Note 6 – "Relocate Green Metal Shelter to east end of lot."

c. Drawing C-0-102, replace with revised drawing, attached:

1) Provide Temporary Shop Building.
2) Relocate Green Metal Shelter to east end of lot.

d. Drawing C-0-103, replace with revised drawing, attached.

1) Provide Temporary Shop Building.

e. Drawing C-0-104, replace with revised drawing, attached.

1) Relocate Green Metal Shelter to east end of lot.

f. Drawing C-0-105, replace with revised drawing, attached.

1) Provide Temporary Shop Building.

g. Drawing C-0-106, replace with revised drawing, attached.

1) Relocate Green Metal Shelter to east end of lot.

h. Drawing C-0-107, replace with revised drawing, attached.

1) Provide Temporary Shop Building.
2) Relocate Green Metal Shelter to east end of lot.
3) Remove Phase 1 Temporary Electrical Service and Sheet Notes 7-10.
4) Adjust location of vehicle block heater receptacle pedestals.
5) Adjust location of Panel L5 and feeder from transformer.
6) Add connections for temporary fuel station location.
7) Add Sheet Notes 62-63.
8) Updated Sheet Note 58.
9) Alternates notation revised.

i. Drawing C-0-506, replace with revised drawing, attached; Add meter assembly detail

j. Drawing A-1-701, delete detail 2/A-1-701 Phase 1 Equipment Plan Area 'C'.

k. Add Drawing A-4-100, See new drawing for Temporary Shop Building plans and concrete work, attached.

l. All Plumbing Drawings – All references to Phase 1 installation shall be removed from this project. All work shall be installed in final building configuration.

m. Add Drawing P-4-100, Add Temporary Shop Building plumbing work, attached.

n. Add Drawing M-4-100, Add Temporary Shop Building mechanical work, attached.

o. All Mechanical Drawings – All references to Phase 1 installation shall be removed from this project. All work shall be installed in final building configuration.

p. Drawing M-701, Revise the following temperature setpoints.

a. For RTU-01, set SPACE TEMPERATURE SETPOINT-COOLING TO 80F (adj) AND SPACE TEMPERATURE SETPOINT-HEATING TO 60F (adj).
b. For RTU-02 and RTU-03, set SPACE TEMPERATURE SETPOINT-COOLING TO 70F (adj), HEATING TO REMAIN AT 68F (adj)

q. Drawing M-702, Revise the following temperature setpoints.

a. For AHU-01 and AHU-02, set SPACE TEMPERATURE SETPOINT-COOLING TO 70F (adj), HEATING TO REMAIN AT 68F (adj)

r. Drawing E-1-102 –

a. Change LF-2D to LF-2B in Room 126.
b. Change LF-2DE to LF-2BE in Room 126.
c. Change circuit feeding lights in Room 126.

s. Drawing E-1-103, Provide power to doorbell chimes as shown.

a. Provide power to doorbell chimes as shown.

t. Drawing E-1-104

a. Provide power to doorbell chimes as shown.
b. Remove reference to Phase 1 and Enlarged Plan 1/E-1-401.
c. Add reference to enlarged plan 6/E-1-400 and Sheet Notes 29 & 30.
d. Add enlarged plan 6 "Enlarged Plumbing Connection Plan"
e. Remove references to Phase 1.
f. Remove enlarged plan 1 "Enlarged Gnd Mech Shop Power Plan - Phase 1A".

u. Drawing E-1-105, Add card reader to door 100D (Exterior Side).

v. Drawing E-1-106, Add card reader to door 107B (Corridor 112 Side).

w. Drawing E-1-400, Add plan 6/E-1-400 "Enlarged Plumbing Connection Plan

x. Drawing E-1-401, Remove references to Phase 1 and remove plan 1/E-1-401 Enlarged GND Mech Shop Power Plan – Phase 1A.

y. Drawing E-3-103, Add card reader to doors, 101 (Exterior Side), 110A (Exterior Side), and 105A (Exterior Side).

z. Drawing E-4-100 – Add New Sheet for Maintenance Building – Electrical Plans.

aa. Drawing E-600, Revise part numbers for LF-2B, LF-2BE, & LF-2C as follows:

a. LF-2B – Model Number: IBE-L24-15000LM-ATC-MD-MVOLT-GZ10-40K-80CRI-LBH0SZU
b. LF-2BE – Model Number: IBE-L24-15000LM-ATC-MD-MVOLT-GZ10-40K-80CRI-LBH0SZU-E15WCP-BPK
c. LF-2C – Model Number: IBE-L24-22000LM-ATC-MD-MVOLT-GZ10-40K-80CRI-LCH0SZU

bb. Drawing E-601

a. Provide 20A Single pole breaker in Panel space L2B-31.

b. Provide 2#12, 1#12G, 3/4"C from breaker to plumbing fixtures as shown on E-1-400.

cc. Drawing E-603, replace with revised drawing, attached.

a. Revise Panel L5.

End of Addendum 5

Exhibit A Pricing Page
(Addendum No. 5 Revised Pricing Page)

State of West Virginia – General Services Division – East Campus Project

Name of Bidder:

_____

The Bidder, being familiar with and understanding the Bidding Documents and also having examined the site and being familiar with all local conditions affecting the project hereby proposes to furnish all labor, material, equipment, supplies and transportation and to perform all Work in accordance with the Bidding Documents within the time set forth for the sum of:

Base Bid:

$_____(Commodity Line 1)(A)

_____

(Show amount in both words and numbers)

Alternate #1 Bid (All work associated with the construction of the new mailroom and demolition of the existing mailroom, Phase C, per Specifications Section 012300):

$_____(Commodity Line 2)(B)

_____

(Show amount in both words and numbers)

Alternate #2 Bid (All work associated with the utilities, paving and light poles for the generator yard, road and parking area, Phase D , per Specifications Section 012300):

$_____(Commodity Line 3)(C)

_____

(Show amount in both words and numbers)

Alternate #3 Bid (All work associated with the utilities, paving, light poles and storm retention area for the parking area, Phase E , per Specifications Section 012300):

$_____(Commodity Line 4)(D)

_____

(Show amount in both words and numbers)

Unit Price #1, 18 Inch Augered Cast Piles: Add/deduct all-inclusive price, per two linear feet, to cover variation in actual depths of 18" diameter Augered Cast Piles to what is indicated in the Project Plans (See Project Manual, Division 1, Section 012200):

$_____(Commodity Line 5), per two linear feet. (E)

_____

(Show amount in both words and numbers)

Unit Price #2, 16 Inch Augered Cast Piles: Add/deduct all-inclusive price, per two linear feet, to cover variation in actual depths of 16" diameter Augered Cast Piles to what is indicated in the Project Plans (See Project Manual, Division 1, Section 012200):

$_____(Commodity Line 6), per two linear feet. (F)

_____

(Show amount in both words and numbers)

TOTAL BID AMOUNT (A+B+C+D+E+F):

$_____

_____

(Show amount in both words and numbers)

SECTION 012200 - UNIT PRICES

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

A. Drawings and general provisions of the Contract, including General and Supplementary Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

A. Section includes administrative and procedural requirements for unit prices.

1.3 DEFINITIONS

A. Unit price is a single amount incorporated in the Agreement, applicable during the duration of the Work as a price per unit of measurement for materials, equipment, or services, or a portion of the Work, added to or deducted from the Contract Sum by appropriate modification, if the scope of Work or estimated quantities of Work required by the Contract Documents are increased or decreased. One amount is to be provided for each unit price. Multiple prices or prices for deduct that differ from prices for adds will be considered non-responsive.

1.4 PROCEDURES

A. Unit prices include all necessary material, plus cost for delivery, installation, insurance, applicable taxes, overhead, and profit.

B. Measurement and Payment: See individual Specification Sections for work that requires establishment of unit prices. Methods of measurement and payment for unit prices are specified in those Sections.

C. Owner reserves the right to reject Contractor's measurement of work-in-place that involves use of established unit prices and to have this work measured, at Owner's expense, by an independent surveyor acceptable to Contractor.

D. List of Unit Prices: A schedule of unit prices is included in Part 3. Specification Sections referenced in the schedule contain requirements for materials described under each unit price.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION

3.1 SCHEDULE OF UNIT PRICES

A. Unit Price No. 1 – 18 Inch Augered Cast Piles:

1. Description: Eighteen (18) inch diameter augered piles. For Bidding purposes the assumed depth for each augered cast pile is 49.33 lineal feet, of augered piles as detailed in the drawings in place. Provide a single unit price for two (2) lineal feet to be added to or deleted from the base quantity and tolerance.
2. Unit of Measurement: Per two (2) lineal feet of eighteen (18) inch diameter reinforced augered pile.

B. Unit Price No. 2 – 16 Inch Augered Cast Piles:

1. Description: Sixteen (16) inch diameter augered piles. For Bidding purposes the assumed depth for each augered cast pile is 49.33 lineal feet, of augered piles as detailed in the drawings in place. Provide a single unit price for two (2) lineal feet to be added to or deleted from the base quantity and tolerance.
2. Unit of Measurement: Per two (2) lineal feet of sixteen (16) inch diameter reinforced augered pile.

END OF SECTION 012200

SECTION 028200

ASBESTOS ABATEMENT SPECIFICATION

PART 1 - GENERAL

1.1 SUMMARY OF THE WORK

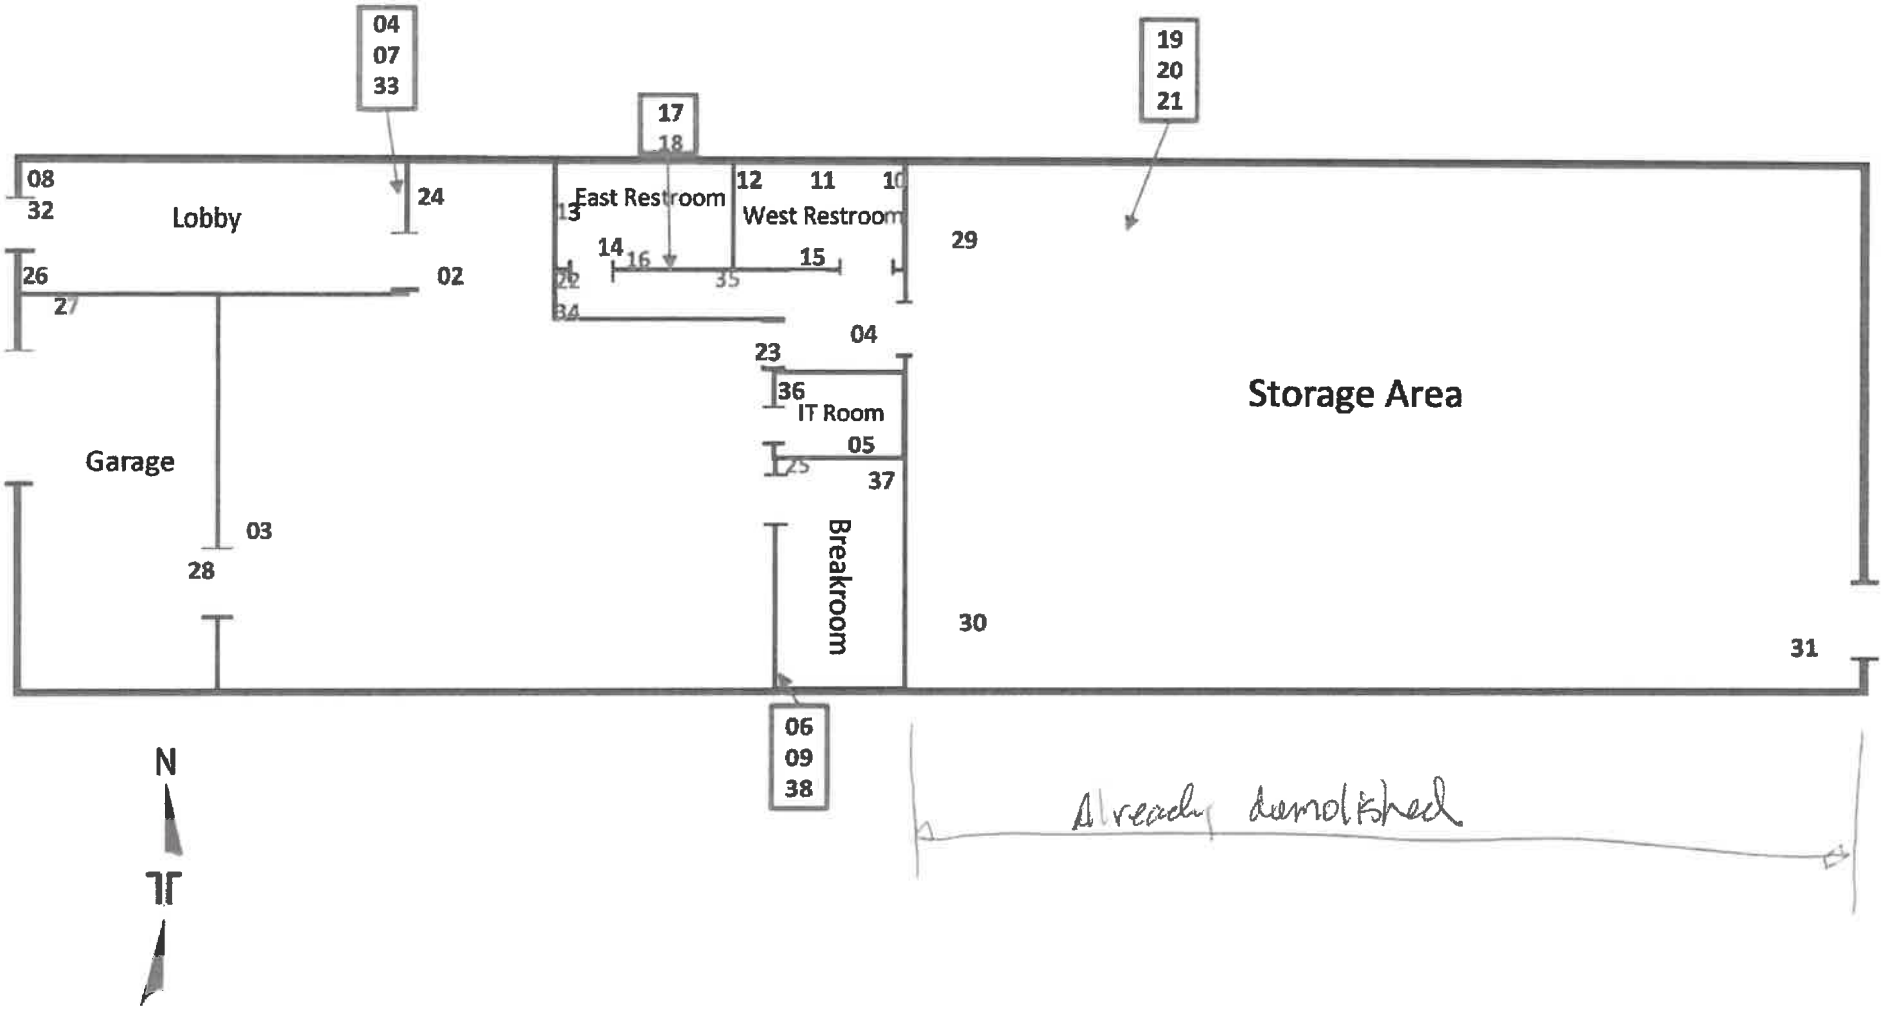
1.1.1 CONTRACT DOCUMENTS AND RELATED REQUIREMENTS

Drawings, general provisions of the contract, including general and supplementary conditions and other specifications, shall apply to the work of this section. The contract documents show the work to be done under the contract and related requirements and conditions impacting the project. Related requirements and conditions include applicable codes and regulations, notices and permits, existing site conditions and restrictions on use of the site, requirements for partial Owner occupancy during the work, coordination with other work and the phasing of the work. In the event the Asbestos Abatement Contractor discovers a conflict in the contract documents and/or requirements or codes, the conflict must be brought to the immediate attention of the Owner for resolution. Whenever there is a conflict or overlap in the requirements, the most stringent shall apply. Any actions taken by the Contractor without obtaining guidance from the Owner shall become the sole risk and responsibility of the Asbestos Abatement Contractor. All costs incurred due to such action are also the responsibility of the Asbestos Abatement Contractor.

1.1.2 EXTENT OF WORK

A. Below is a brief description of the estimated quantities of asbestos materials to be abated. These quantities are for informational purposes only and are based on the best information available at the time of the specification preparation. The Contractor shall satisfy himself as the actual quantities to be abated. Nothing in this section may be interpreted as limiting the extent of work otherwise required by this contract and related documents.

B. Removal, clean-up and disposal of the following asbestos-containing materials (ACM) in appropriately regulated areas:



ACM Table

ACM Description	Material Location	% and Type Asbestos	Estimated Quantity*
Black Tar	Seams on Top of Parapet Walls on Roof of Building 33	5% Chrysotile	50 Square Feet (SF)
Roof Flashing	Roof of Building 33	7-9% Chrysotile	190 SF
Roof	Roof of Building 33	7-9% Chrysotile	2,800 SF
Exterior Window Caulking	Maintenance Garage Windows	<1% Chrysotile	10 SF or 5 Windows

*The Abatement Contractor is solely responsible for determining their opinion of quantities to be removed.

1.1.4 TASKS

The work tasks are summarized briefly as follows:

Project No. N2207016	Date: May 28, 2020	**Building 33 Interior**	**Exhibit**
Project Manager: Joshua Vogel		WV State Capitol Complex 321 Michigan Avenue Charleston, WV 25305	1
Location: Charleston, WV		Sample Location Map	
APR: Joe Tussey			

Terracon
Consulting Engineers and Scientists
611 Lunken Park Drive Cincinnati, Ohio 45226
PH. (513) 321-05816 FAX (513) 321-0294

1. Spring Hinges: Adjust to achieve positive latching when door is allowed to close freely from an open position of 30 degrees.
2. Electric Strikes: Adjust horizontal and vertical alignment of keeper to properly engage lock bolt.
3. Door Closers: Adjust sweep period to comply with accessibility requirements and requirements of authorities having jurisdiction.

B. Occupancy Adjustment: Approximately three months after date of Substantial Completion, Installer's Architectural Hardware Consultant shall examine and readjust each item of door hardware, including adjusting operating forces, as necessary to ensure function of doors, door hardware, and electrified door hardware.

3.7 CLEANING AND PROTECTION

A. Clean adjacent surfaces soiled by door hardware installation.

B. Clean operating items as necessary to restore proper function and finish.

C. Provide final protection and maintain conditions that ensure door hardware is without damage or deterioration at time of Substantial Completion.

3.8 DEMONSTRATION

A. Provide training for Owner's maintenance personnel to adjust, operate, and maintain door hardware and door hardware finishes. Refer to Division 01 Section "Demonstration and Training."

3.9 DOOR HARDWARE SCHEDULE

A. Locksets, exit devices, and other hardware items are referenced in the following hardware sets for series, type and function. Refer to the above-specifications for special features, options, cylinders/keying, and other requirements.

Revised Hardware Sets

HARDWARE SETS:

VERIFY LOCKSET FUNCTION WITH ARCHITECT AND OWNER BEFORE PROVIDING SUBMITTALS.

End of Section

BASE BID AND ALTERNATES

- BASE BID: PROVIDE ALL WORK FOR WAREHOUSE, OPEN STORAGE, AND BULK STORAGE BUILDINGS.
- ALTERNATE 1: PROVIDE BASE BID WORK AND ALL WORK ASSOCIATED WITH MAIL ROOM.
- ALTERNATE 2: PROVIDE BASE BID, ALTERNATE 1, AND ALL WORK ASSOCIATED WITH ROAD, AND PARKING AREA NOTED
- ALTERNATE 3: PROVIDE BASE BID, ALTERNATE 1, ALTERNATE 2, AND ALL WORK ASSOCIATED WITH THE PARKING AREA NOTED.
- STAGING AREA

PHASING NOTES

GENERAL

G1 MAINTAIN EGRESS FOR OCCUPIED STRUCTURES AT ALL TIMES, INCLUDING ON-SITE STRUCTURES AND OFF-SITE STRUCTURES UTILIZING VIRGINIA TERRACE FOR ACCESS AND EMERGENCY USE.

PHASE A BASE BID

A THE TEMPORARY SHOP BUILDING AND AREAS AROUND IT THAT ARE NECESSARY FOR ITS OCCUPATION AND USE SHALL BE CONSTRUCTED FIRST INCLUDING PARKING AND TEMPORARY FUEL PUMP RELOCATION. MAINTAIN THE OWNER'S ACCESS AND USE OF THE EXISTING GROUNDS MECHANICS SHOP UNTIL THE TEMPORARY SHOP BUILDING IS OCCUPIED BY THE OWNER. (EXPECT TWO WEEKS FOR OWNER TO MOVE OPERATIONS TO TEMPORARY SHOP BUILDING). OCCUPATION AND OPERATION OF THE TEMPORARY SHOP BUILDING IS REQUIRED PRIOR TO DEMOLITION OF THE EXISTING GROUNDS MECHANICS SHOP.

PHASE B BASE BID

B RELOCATE GREEN METAL SHELTER. CONSTRUCT WAREHOUSE/GROUNDS BUILDING, OPEN STORAGE, BULK STORAGE, FUEL TANKS, AND RELATED CONSTRUCTION. RELOCATE BALANCE OF UTILITIES, STORM SYSTEM AND EQUIPMENT SERVING IT TO THEIR FINAL LOCATIONS.

IF NO ALTERNATES ARE ACCEPTED, PROVIDE FENCING FROM WAREHOUSE TO CHILLER AREA, AND RESTORE THE STAGING AREA TO A PARKING AREA WITH GRAVEL AND BUMPER BLOCKS

PHASE C ALTERNATE 1

C1 CONSTRUCT MAIL ROOM, INCLUDING RELATED CONSTRUCTION, PARKING AREA, ASSOCIATED PAVEMENTS, UTILITIES AND STORM SYSTEM.

C2 DEMOLISH EXISTING MAIL ROOM, INCLUDING FOUNDATIONS AND FOUNDATIONS OF PREVIOUSLY DEMOLISHED PORTION OF THE BUILDING

IF NO ADDITIONAL ALTERNATES ARE SELECTED, PROVIDE GRAVEL ROADWAY TO MATCH EXISTING FOR THE ENTIRE AREA OF THE MAIL ROOM AND PREVIOUSLY DEMOLISHED POTIONS OF THE BUILDING. REMOVE CURBS AND PROVIDE GRAVEL TRANSITIONS FOR TRUCK ROADWAY ACCESS TO THE WAREHOUSE BY THE EXISTING MAIL ROOM AT JEFFERSON STREET.

PHASE D ALTERNATE 2

D PROVIDE PARKING AREAS AND CONSTRUCTION NOTED IN ALTERNATE 2 WORK, INCLUDING UTILITIES PAVING AND LIGHT POLES

PHASE E ALTERNATE 3

E PROVIDE PARKING AREAS AND CONSTRUCTION NOTED IN ALTERNATE 3 WORK, INCLUDING UTILITIES, PAVING, LIGHT POLES, AND STORM SYSTEM

SITE GRADING AND DRAINAGE PLAN - EAST

ROGER J. KENNEDY No. 887 PROFESSIONAL LANDSCAPE ARCHITECT STATE OF WEST VIRGINIA
11-5-21

JOB NUMBER:	19027
SCALE:	1" = 20'
DATE:	AUGUST 6, 2021
DRAWN BY:	FLB
DESIGNED BY:	RJK
CHECKED BY:	JEB
SHEET NO.	REVISION
C-0-106	1

GENERAL NOTES:

1. LOCATE ALL EXISTING UNDERGROUND UTILITIES AND COORDINATE WITH GENERAL CONTRACTOR FOR ALL NEW UNDERGROUND WORK PRIOR TO ANY EXCAVATION OR TRENCHING. MAINTAIN MINIMUM 12" CLEARANCE, UNLESS OTHERWISE NOTED.
2. MINIMUM BURY FOR ALL SITE CONDUIT SHALL BE 30", UNLESS OTHERWISE NOTED.
3. REFER TO POLE BASE DETAIL ON SHEET C-0-501.
4. CONNECT TO #12 AWG CONDUCTORS INSIDE OF SITE LIGHTING POLES TO LUMINAIRES.
5. ALL WORK ASSOCIATED WITH THE MAILROOM SHALL BE INCLUDED IN ALTERNATE #1 UNLESS OTHERWISE INDICATED.
6. ALL CONDUIT AND PIPING FOR THE MAIL ROOM SHALL BE INSTALLED TO 5'-0" OUTSIDE OF THE BUILDING, CAPPED AND UNDERGROUND LOCATION STAKED IF ADDITIVE ALTERNATE NO. 1 IS NOT ACCEPTED.
7. ALL PULL BOXES SHALL BE QUAZITE PG3636BA36 WITH PG3636EA12 TOP EXTENSION (IF REQUIRED) OR APPROVED EQUAL.
8. PROVIDE CONCRETE PADS FOR UTILITY PROVIDED EQUIPMENT. COORDINATE PAD DETAILS WITH THE UTILITY COMPANY.

LEGEND

EXISTING		PROPOSED	
	EXISTING FENCE		PROPERTY LINES
	EXISTING POWER POLE		RIP-RAP
UE	EXISTING UNDERGROUND ELECTRIC		NEW WATER LINE
G	EXISTING GAS LINE		NEW GATE VALVE W/ VALVE BOX
	EXISTING GAS LINE MARKER		NEW FIRE HYDRANT ASSEMBLY
UT	EXISTING UNDERGROUND TELEPHONE		NEW BLOW-OFF ASSEMBLY
W	EXISTING WATER LINE		MANHOLE
	EXISTING WATER METER		DROP INLET
	EXISTING WATER VALVE		HEAD WALL
	EXISTING FIRE HYDRANT		SANITARY CLEANOUT
	EXISTING CLEAN OUT		
	EXISTING MANHOLE		

SHEET KEYNOTES:

1. ROUTE INDICATED EXTERIOR LIGHTING CIRCUIT VIA EXTERIOR LIGHTING CONTACTOR, REFER TO DETAIL ON E-501. SEE PANEL SCHEDULE FOR REQUIRED CONDUIT/CONDUCTORS.
2. ROUTE INDICATED EXTERIOR LIGHTING CIRCUIT VIA EXTERIOR LIGHTING CONTACTOR, REFER TO DETAIL ON E-500. SEE PANEL SCHEDULE FOR REQUIRED CONDUIT/CONDUCTORS. CIRCUIT SHALL BE INCLUDED IN ALTERNATE #1.
3. NEW UTILITY SERVICE POLE. COORDINATE WITH AMERICAN ELECTRIC POWER.
4. UNDERGROUND PRIMARY ELECTRIC SERVICE FROM NEW UTILITY POLE.
5. NEW UTILITY-OWNED, PAD-MOUNT, TRANSFORMER (SIZE BY AMERICAN ELECTRIC POWER)
6. NEW NATURAL GAS FIRED GENERATOR. REFER TO ELECTRICAL RISER ON E-1-900 FOR ADDITIONAL INFORMATION AND REQUIREMENTS.
7. NOT USED
8. NOT USED
9. NOT USED
10. NOT USED
11. WAREHOUSE/GROUNDS BUILDING SECONDARY ELECTRICAL SERVICE. REFER TO E-1-900 FOR ADDITIONAL INFORMATION AND REQUIREMENTS.
12. GENERATOR CONNECTIONS. REFER TO E-1-900 FOR ADDITIONAL INFORMATION AND REQUIREMENTS.
13. INGROUND PULL BOX FOR SECONDARY ELECTRICAL SERVICE.
14. INGROUND PULL BOX FOR GENERATOR CONNECTIONS.
15. LOCATION OF EXISTING GROUNDS MECHANIC SHOP (GMS). NO WORK SHALL BE PERFORMED IN THIS AREA UNTIL NEW PHASE 1A GMS IS COMPLETED AND OPERATIONAL.
16. PROVIDE TWO (2) 2" CONDUITS UNDERGROUND FOR FIBER SERVICE. REFER TO E-1-108 FOR CONTINUATION INTO THE BUILDING.
17. INGROUND PULL BOX FOR FIBER SERVICE.
18. PROVIDE TWO (2) 2" CONDUITS UNDERGROUND FOR FIBER SERVICE. REFER TO E-1-108 FOR CONTINUATION.
19. PROVIDE ONE (1) 2" CONDUIT UNDERGROUND FOR FIBER SERVICE AS PART OF ALTERNATE #1. REFER TO E-3-103 FOR CONTINUATION.
20. PROVIDE THREE (3) 2" CONDUIT UNDERGROUND FOR FIBER SERVICE. CONDUITS SHALL BE CONNECTED TO EXISTING SPARE CONDUITS FOR FIBER CONNECTIONS TO CAMPUS NETWORK.
21. EIGHT (8) 2" UNDERGROUND CONDUITS FOR FUTURE CONNECTIONS TO FIBER SERVICE. CONDUITS INSTALLED UNDER PREVIOUS CONSTRUCTION CONTRACT.
22. BULK STORAGE BUILDING SERVICE PANEL.
23. PROVIDE SECONDARY ELECTRICAL SERVICE UNDERGROUND FROM POLE MOUNTED TRANSFORMER TO BULK STORAGE BUILDING SERVICE PANEL. REFER TO RISER ON E-2-100 FOR ADDITIONAL INFORMATION AND REQUIREMENTS.
24. FIRE PROTECTION VAULT. CONNECT 1-1/2" SUMP DISCHARGE TO DI 2-2. SEE SHEET C-0-105. SUMP SHALL BE POWERED VIA GFI RECEPTACLE CONNECTED TO BREAKER L1-23.
25. PROVIDE UNDERGROUND 1" CONDUIT FROM FIRE VAULT TO WAREHOUSE/GROUNDS FIRE ALARM CONTROL PANEL. REFER TO E-1-108 FOR CONTINUATION.
26. PROVIDE UNDERGROUND 1" CONDUIT FROM FIRE VAULT TO MAILROOM FIRE ALARM CONTROL PANEL, IN ALTERNATE #1. REFER TO E-3-103 FOR CONTINUATION.
27. UNDERGROUND PRIMARY ELECTRIC SERVICE FROM EXISTING SECTIONALIZING CABINET.
28. MAILROOM SECONDARY ELECTRICAL SERVICE INCLUDED IN ALTERNATE #1. REFER TO E-3-900 FOR ADDITIONAL INFORMATION AND REQUIREMENTS.
29. PROVIDE POWER AND CONTROL CONDUITS FOR FUEL SYSTEMS. REFER TO E-1-104 & E-1-108 FOR CONTINUATION AND ADDITIONAL REQUIREMENTS.
30. PROVIDE PULL BOX FOR MAILROOM FIRE ALARM CONNECTIONS IN BASE BID. PULL BOX SHALL NOT BE INSTALLED IF ALTERNATE #1 IS ACCEPTED.
31. CONDUIT FROM FIRE VAULT TO PULL BOX SHALL BE INCLUDED IN BASE BID.
32. PROVIDE PULL BOX AND UNDERGROUND CONDUIT TO PANEL IN BASE BID, PULL BOX NOT REQUIRED IS ALTERNATE #2 IS ACCEPTED.
33. PROVIDE PULL BOX AND CONDUIT UNDERGROUND TO PANEL IN BASE BID, PULL BOX NOT REQUIRED IF ALTERNATE #3 IS ACCEPTED.
34. NATURAL GAS SERVICE CONNECTION BY MOUNTAINEER GAS CO. TO BE INCLUDED IN ALTERNATE # 1.
35. INSTALL GAS LINE AND RISERS - 3"IR FOR THE WAREHOUSE AND 1-1/4"IR FOR THE MAIL ROOM
36. NEW WATER MAIN INSTALLED BY WV AMERICAN WATER CO..
37. PROVIDE 2" PE DOMESTIC WATERLINE.
38. PROVIDE 6" PE FIRE PROTECTION WATERLINE.
39. INSTALL 4" PVC SANITARY SEWER. CONNECT TO EXISTING TAP.
40. PROVIDE 1" DOMESTIC WATER SERVICE @ LOCATIONS. SEE DETAIL SHEET C-0-505.
41. INSTALL 6" PVC SANITARY SEWER. CONNECT TO EXISTING TAP.
42. INSTALL 6" PVC SANITARY SEWER. CONNECT TO NEW TAP. TAP INSTALLED BY CHARLESTON SANITARY BOARD.
43. NEW TAP BY WV AMERICAN WATER CO. @ LOCATIONS.
44. EXISTING UTILITY POLE.
45. NOT USED.
46. PROVIDE LIGHT FIXTURE AS PART OF BASE BID.
47. PROVIDE LIGHT FIXTURE AS PART OF ALTERNATE #1.
48. PROVIDE LIGHT FIXTURE AS PART OF ALTERNATE #2.
49. PROVIDE LIGHT FIXTURE AS PART OF ALTERNATE #3.
50. WEATHERPROOF, EMERGENCY SHUT OFF FOR FUEL SYSTEM.
51. GSD AGENCY CAMERA. PROVIDE SECURITY CAMERA 16'-0" AFG MOUNT SITE LIGHT POLE. REFER TO CAMERA RISER ON E-1-903.
52. NEW UTILITY-OWNED, PAD-MOUNT, TRANSFORMER (SIZE BY AMERICAN ELECTRIC POWER) INCLUDED IN ALTERNATE #1.
53. UNDERGROUND PRIMARY ELECTRIC SERVICE FROM EXISTING SECTIONALIZING CABINET INCLUDED IN ALTERNATE #1.
54. PROVIDE PEDESTAL MOUNTED WEATHERPROOF RECEPTACLE FOR VEHICLE BLOCK HEATER. SEE EQUIPMENT SUPPORT BRACKET DETAIL ON SHEET E-502.
55. PROVIDE PANEL L5, IN NEMA 3R ENCLOSURE WITH METERBASE. EQUIPMENT SHALL BE MOUNTED ON GROUND MOUNTED FREE STANDING SUPPORT RACK AT VEHICLE SHELTER.
56. PROVIDE WIRING FROM FUEL PUMPS VIA EMERGENCY SHUT OFF BUTTON TO PANEL L5.
57. OIL WATER SEPARATOR ALARM PANEL.
58. PROVIDE 3#3/0 IN 2" CONDUIT FROM GROUND MOUNTED TRANSFORMER TO VEHICLE STORAGE PANEL. SERVICE ENTRANCE AND CONDUIT PER AEP REQUIREMENTS.
59. PROVIDE 1/2" GROUND ROD FOR FUEL SYSTEM LIGHTNING PROTECTION SYSTEM.
60. RELOCATED FUEL TANKS - THE AREA WITHIN THE DISPENSING AREA SHALL BE CLASSIFIED AS CLASS I, DIVISION 1 AND THE AREA WITHIN 20 FEET OF ANY EDGE OF THE TANKS AND 18 INCHES ABOVE GRADE SHALL BE CLASSIFIED AS CLASS I, DIVISION 2. ANY EQUIPMENT WITHIN THE CLASSIFIED AREA SHALL BE UL LISTED FOR THAT AREA. ALL WIRING METHODS SHALL CONFORM TO THE REQUIREMENTS OF NEC ARTICLES 500, 501, AND 514. ALL CONDUITS ENTERING/EXITING THE HAZARDOUS AREA SHALL HAVE SEALING FITTINGS BEFORE CROSSING THE AREA BOUNDARY.
61. NEW ELECTRICAL SERVICE FOR WVDOH OWNED LIGHT. INSTALL COMBINATION METER BASE, CONNECT TO EXISTING PANEL. SERVICE ENTRANCE AND CONDUIT PER AEP REQUIREMENTS.
62. PROVIDE WIRING FROM FUEL PUMPS VIA EMERGENCY SHUT OFF BUTTON TO PANEL L5.
63. TEMPORARY FUEL TANK LOCATION. TANKS, EQUIPMENT AND CONTROLS SHALL BE MOVED TO FINAL LOCATION AFTER WAREHOUSE BUILDING HAS BEEN COMPLETED.
64. INSTALL 4" SANITARY SEWER AS PART OF SANITARY LINE A.

NOTES:
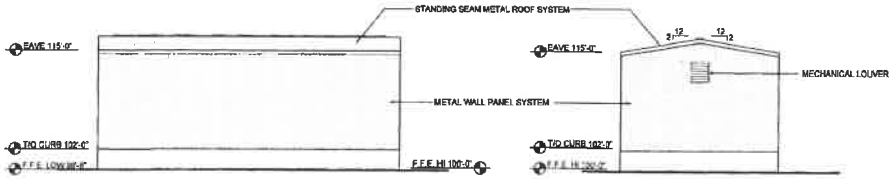
1. PROVIDE INSULATED DOOR SYSTEM.
2. PROVIDE TRIM AT ALL OVERHEAD DOORS ENCASING STEEL FRAMES
3. MANUAL OVERHEAD DOOR WITH CHAIN HOIST.
4. SEE DOOR DETAILS A-510 AND A-511, SIMILAR.
5. TUBE STEEL BUILDING'S STANDARD OVERHEAD COILING DOOR SYSTEM WITH CHAIN HOIST MAY BE USED IN LIEU OF ABOVE NOTED DOOR



TUBE STEEL STRUCTURE

1. PROVIDE TUBE STEEL STRUCTURE FOR USE AS TEMPORARY SHOP THROUGHOUT CONSTRUCTION. THE TEMPORARY SHOP MUST BE IN PLACE AND OCCUPIABLE PRIOR TO DEMOLITION OF EXISTING SHOP SPACE. ONCE CONSTRUCTION OF THE NEW SHOP IS SUBSTANTIALLY COMPLETE, SHOP OPERATIONS WILL BE RELOCATED TO THE NEW SHOP AND THE SPACE WILL BE USED AS A PARKING AREA. BASIS OF DESIGN - MILLENNIUM BUILDINGS, OR EQUAL.
2. BASIS OF DESIGN - MILLENNIUM BUILDINGS, OR EQUAL. WITH BENT RAIL CLIP ANCHORAGE SYSTEM. CENTER ANCHOR BOLTS ON CURB. EXTEND DOORS TO F.F.E.
3. PROVIDE SUBMITTALS FOR TEMPORARY SHOP BUILDING INCLUDING SHOP DRAWINGS AND MATERIAL PERFORMANCE REQUIREMENTS PER SPECIFICATIONS.
4. PROVIDE AN INSULATED TUBE STEEL BUILDING MEETING THE FOLLOWING PERFORMANCE REQUIREMENTS:
   A. FRAMING - MANUFACTURER'S GALVANIZED TUBE STEEL AS NECESSARY TO MEET STRUCTURAL REQUIREMENTS.
   B. SUB FRAMING - MANUFACTURER'S STANDARD STEEL SUB-FRAMING AS NECESSARY TO MEET STRUCTURAL REQUIREMENTS.
   C. SNOW LOAD - 30 PSF.
   D. WIND LOAD - 115 MPH, 3 SECOND GUST.
   E. SIDING - 29 GAUGE GALVANIZED, MINIMUM, 5 RIB SHEET STEEL, VERTICAL RIBBED ROOF AND WALLS, PRE-FINISHED. COLORS TO BE SELECTED FROM MANUFACTURER'S FULL RANGE OF COLORS.
   F. INSULATION - R-13 CLOSED CELL SPRAY FOAM AT ROOF AND WALLS. FORM AROUND OPENINGS AND ELECTRICAL WORK AS NECESSARY TO PROVIDE CLEARANCE FOR OPERATION.
   G. PROVIDE CONCRETE CURBS TO SET BUILDING. COORDINATE DOORS WITH SLOPED FLOOR.

AREA 'C' LIGHTING PLAN

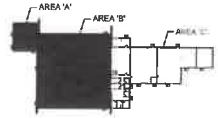
PATRICK JAYE BARDY — REGISTERED PROFESSIONAL ENGINEER — STATE OF WEST VIRGINIA — 11/05/21

JOB NUMBER	19027
SCALE	AS NOTED
DATE	AUGUST 6, 2021
DRAWN BY	KGM
DESIGNED BY	KGM
CHECKED BY	PJB
SHEET NO.	E-1-102
REVISION	1

AREA 'A' & 'B' POWER PLAN

1 / E-1-101 — SCALE: 1/8" = 1'-0"

GENERAL NOTES:



1. REFER TO ONE-LINE DIAGRAM ON SHEET E-1-900 FOR CONDUIT/CONDUCTOR SIZES FOR EQUIPMENT/PANELBOARD FEEDERS.
2. COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.
3. COORDINATE EXACT LOCATION OF RECEPTACLES, EQUIPMENT CONNECTIONS, DEVICES, ETC. WITH ARCHITECT APPROVED SHOP DRAWINGS PRIOR TO ROUGH-IN.
4. COORDINATE EXACT EQUIPMENT REQUIREMENTS OF HVAC AND PLUMBING EQUIPMENT WITH ALL ENGINEER APPROVED SHOP DRAWINGS AND MECHANICAL/PLUMBING CONTRACTORS PRIOR TO ROUGH-IN.
5. PROVIDE FIRE STOP FOR PENETRATIONS OF FIRE RATED WALLS AND FLOORS. REFER TO ARCHITECTURAL DRAWINGS.
6. INDIVIDUAL HOMERUNS HAVE BEEN SHOWN FOR EACH CIRCUIT FOR CLARITY. CONTRACTOR MAY CHOOSE TO COMBINE UP TO (3) 20A/120V BRANCH CIRCUITS INTO A COMMON CONDUIT WITHOUT UPSIZING CONDUCTORS. EACH CIRCUIT SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.

SHEET KEYNOTES:

1. PROVIDE 15A SINGLE POLE TOGGLE SWITCH DISCONNECT FOR RADIANT HEATING PUMP.
2. PROVIDE NEMA 5-15 RECEPTACLE FOR RADIANT HEATING BURNER. MOUNT WITHIN 12" OF BURNER UNIT.
3. PROVIDE ELECTRICAL CONNECTION TO DISCONNECT SWITCH FURNISHED WITH EXHAUST FAN.
4. PROVIDE NEMA 5-20 RECEPTACLE FOR PALLET JACK CHARGER. VERIFY RECEPTACLE TYPE WITH OWNER PROVIDED EQUIPMENT PRIOR TO INSTALLATION.
5. PROVIDE NEMA L16-20 RECEPTACLE FOR REACH TRUCK CHARGER. VERIFY RECEPTACLE TYPE WITH OWNER PROVIDED EQUIPMENT PRIOR TO INSTALLATION.
6. PROVIDE NEMA 3R 60 AMP NON FUSED SAFETY SWITCH FOR RTU.
7. PROVIDE NEMA 5-20 RECEPTACLE FOR COPIER.
8. OCCUPANCY CONTROLLED RECEPTACLE. PROVIDE LABEL ON FACEPLATE. "RECEPTACLE CONTROLLED BY OCCUPANCY SENSOR."
9. RECEPTACLE CONTROL POWER PACK. REFER TO LIGHTING PLANS AND DETAILS FOR INTERCONNECTION TO LIGHTING CONTROL IN THIS AREA.
10. PROVIDE NEMA 5-20 RECEPTACLE FOR WATER DISPENSER.
11. PROVIDE 15A SINGLE POLE TOGGLE SWITCH DISCONNECT FOR AHU.
12. PROVIDE NEMA 3R 30A THREE POLE NON-FUSED DISCONNECT FOR HP.
13. PROVIDE WALL MOUNTED 4' LONG PLUG STRIP (WIREMOLD AL20GBA406 OR EQUIVALENT) AT 48" AFF.
14. PROVIDE MOUNTING BRACKET FOR TRANSFORMER. MOUNT TOP OF TRANSFORMER AS CLOSE TO BOTTOM OF STRUCTURE AS POSSIBLE.
15. PROVIDE ELECTRICAL CONNECTION FOR TRAP PRIMER. COORDINATE EXACT MEANS OF DISCONNECT REQUIRED FOR EQUIPMENT WITH SHOP DRAWINGS.

EQUIPMENT SCHEDULE

ITEM	DESCRIPTION
T1	COPIER
WT	PALLET JACK CHARGER
WC	REACH TRUCK CHARGER

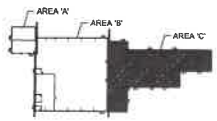
EQUIPMENT SCHEDULE



ITEM	DESCRIPTION
WO1	AIR COMPRESSOR
C1	COPIER
BR1	ICE MACHINE
MA2	PANEL SAW
MA5	DRILL PRESS
MA6	TABLE SAW
MA7	JOINTER
MA8	PLANER/MOLDER
MA9	SHAPER
MA10	MITER SAW
MA11	RADIAL ARM SAW
MA12	FINISHER
MA13	WORK BENCH
MA14	BAND SAW
MA15	DUST COLLECTOR
ME5	MIG WELDER
ME6	PLASMA CUTTER
ME8	DRILL PRESS
ME9	20C PARTS WASH
ME10	BLAST CABINET

GENERAL NOTES:

1. REFER TO ONE-LINE DIAGRAM ON SHEET E-1-900 FOR CONDUIT/CONDUCTOR SIZES FOR EQUIPMENT/PANELBOARD FEEDERS.
2. COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.
3. COORDINATE EXACT LOCATION OF RECEPTACLES, EQUIPMENT CONNECTIONS, DEVICES, ETC. WITH ARCHITECT APPROVED SHOP DRAWINGS PRIOR TO ROUGH-IN.
4. COORDINATE EXACT EQUIPMENT REQUIREMENTS OF HVAC AND PLUMBING EQUIPMENT WITH ALL ENGINEER APPROVED SHOP DRAWINGS AND MECHANICAL/PLUMBING CONTRACTORS PRIOR TO ROUGH-IN.
5. PROVIDE FIRE STOP FOR PENETRATIONS OF FIRE RATED WALLS AND FLOORS. REFER TO ARCHITECTURAL DRAWINGS.
6. INDIVIDUAL HOMERUNS HAVE BEEN SHOWN FOR EACH CIRCUIT FOR CLARITY. CONTRACTOR MAY CHOOSE TO COMBINE UP TO (3) 20A/120V BRANCH CIRCUITS INTO A COMMON CONDUIT WITHOUT UPSIZING CONDUCTORS. EACH CIRCUIT SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR-CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.

SHEET KEYNOTES:

1. PROVIDE NEMA 3R 30A THREE POLE NON-FUSED DISCONNECT FOR HP.
2. SEE SHEET E-1-400, ENLARGED MECHANICAL ROOM, FOR CONTINUATION.
3. PROVIDE NEMA 5-15 RECEPTACLE FOR RADIANT HEATING BURNER. MOUNT WITHIN 12" OF BURNER UNIT.
4. PROVIDE 15A SINGLE POLE TOGGLE SWITCH DISCONNECT FOR RADIANT HEATING PUMP.
5. PROVIDE ELECTRICAL CONNECTION TO DISCONNECT SWITCH FURNISHED WITH EXHAUST FAN.
6. PROVIDE NEMA 3R 30 AMP NON-FUSED SAFETY SWITCH FOR RTU.
7. OCCUPANCY CONTROLLED RECEPTACLE. PROVIDE LABEL ON FACEPLATE, "RECEPTACLE CONTROLLED BY OCCUPANCY SENSOR."
8. RECEPTACLE CONTROL POWER PACK. REFER TO LIGHTING PLANS AND DETAILS FOR INTERCONNECTION TO LIGHTING CONTROL IN THIS AREA.
9. PROVIDE NEMA 5-20 RECEPTACLE FOR COPIER.
10. PROVIDE ELECTRICAL CONNECTION TO INTEGRAL DISCONNECT IN ELECTRIC UNIT HEATER.
11. PROVIDE ELECTRICAL CONNECTION TO DISCONNECT SWITCH FURNISHED WITH INDOOR MINI SPLIT UNIT.
12. PROVIDE ELECTRICAL CONNECTION TO DISCONNECT SWITCH FURNISHED WITH OUTDOOR MINI SPLIT UNIT.
13. PROVIDE MOUNTING BRACKET FOR TRANSFORMER. MOUNT TOP OF TRANSFORMER AS CLOSE TO BOTTOM OF STRUCTURE AS POSSIBLE.
14. PROVIDE NEMA 5-20 RECEPTACLE FOR PANEL SAW.
15. PROVIDE NEMA 5-20 RECEPTACLE FOR BAND SAW.
16. PROVIDE FLOOR MOUNTED PEDESTAL NEMA 5-20 RECEPTACLES AT END OF WORKBENCHES.
17. PROVIDE NEMA 12, 20 AMP NON-FUSED DISCONNECT FOR TABLE SAW.
18. PROVIDE NEMA 5-20 RECEPTACLE FOR JOINTER.
19. PROVIDE NEMA 5-20 RECEPTACLE FOR PLANER/MOLDER.
20. PROVIDE NEMA 5-20 RECEPTACLE FOR DRILL PRESS.
21. PROVIDE NEMA 12, 30 AMP DISCONNECT FOR AIR COMPRESSOR.
22. PROVIDE NEMA 3R, 30 AMP DISCONNECT FOR SLIDE GATE.
23. PROVIDE NEMA 5-20 RECEPTACLE FOR FINISHER.
24. PROVIDE NEMA 5-20 RECEPTACLE FOR RADIAL ARM SAW.
25. PROVIDE NEMA 5-20 RECEPTACLE FOR MITER SAW.
26. PROVIDE NEMA 12, 30 AMP DISCONNECT FOR SHAPER.
27. PROVIDE NEMA 3R, 30 AMP DISCONNECT FOR EXHAUST FAN.
28. PROVIDE NEMA 5-20 RECEPTACLE FOR BLAST CABINET.
29. PROVIDE NEMA 5-20 RECEPTACLE FOR TIME CLOCK.
30. PROVIDE WIRING FOR WELDING HOOD CONTROL SWITCH. REFER TO MECHANICAL FOR ADDITIONAL INFORMATION AND REQUIREMENTS.
31. PROVIDE NEMA 1, 30 AMP DISCONNECT WITH NEMA 10-30 RECEPTACLE FOR WELDER.
32. PROVIDE NEMA 1, 30 AMP DISCONNECT WITH NEMA L14-30 RECEPTACLE FOR PLASMA CUTTER.
33. PROVIDE NEMA 5-20 RECEPTACLE FOR DRILL PRESS.
34. REFER TO C-0-107 FOR CONTINUATION AND E-1-900 FOR REQUIREMENTS AND ADDITIONAL INFORMATION.
35. PROVIDE ELECTRICAL CONNECTION FOR TRAP PRIMER. COORDINATE EXACT MEANS OF DISCONNECT REQUIRED FOR EQUIPMENT WITH SHOP DRAWINGS.
36. FUEL TANK SYSTEM CONTROL PANEL.

SCALE: 1/4" = 1'-0"

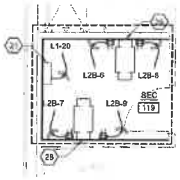
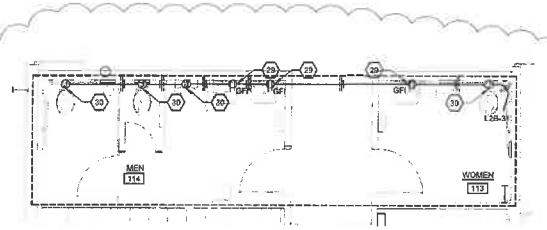
4 E-1-400 TYPICAL OVERHEAD DOOR POWER PLAN



SCALE: 1/2" = 1'-0"

GENERAL NOTES:

1. REFER TO ONE-LINE DIAGRAM ON SHEET E-1-900 FOR CONDUIT/CONDUCTOR SIZES FOR EQUIPMENT/PANELBOARD FEEDERS.
2. COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.
3. COORDINATE EXACT LOCATION OF RECEPTACLES, EQUIPMENT CONNECTIONS, DEVICES, ETC. WITH ARCHITECT APPROVED SHOP DRAWINGS PRIOR TO ROUGH-IN.
4. COORDINATE EXACT EQUIPMENT REQUIREMENTS OF HVAC AND PLUMBING EQUIPMENT WITH ALL ENGINEER APPROVED SHOP DRAWINGS AND MECHANICAL/PLUMBING CONTRACTORS PRIOR TO ROUGH-IN.
5. PROVIDE FIRE STOP FOR PENETRATIONS OF FIRE RATED WALLS AND FLOORS. REFER TO ARCHITECTURAL DRAWINGS.
6. INDIVIDUAL HOMERUNS HAVE BEEN SHOWN FOR EACH CIRCUIT FOR CLARITY. CONTRACTOR MAY CHOOSE TO COMBINE UP TO (3) 20A/120V BRANCH CIRCUITS INTO A COMMON CONDUIT WITHOUT UPSIZING CONDUCTORS. EACH CIRCUIT SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR-CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.



SHEET KEYNOTES:

1. PROVIDE 15A SINGLE POLE TOGGLE SWITCH DISCONNECT FOR AHU.
2. PROVIDE ELECTRICAL CONNECTION TO DISCONNECT SWITCH FURNISHED WITH EXHAUST FAN.
3. PROVIDE ELECTRICAL CONNECTION TO INTEGRAL DISCONNECT IN ELECTRIC UNIT HEATER.
4. PROVIDE ELECTRICAL CONNECTION FOR GAS FIRED WATER HEATER. COORDINATE EXACT MEANS OF DISCONNECT REQUIRED FOR EQUIPMENT WITH SHOP DRAWINGS.
5. PROVIDE ELECTRICAL CONNECTION FOR RECIRULATING PUMP. COORDINATE EXACT MEANS OF DISCONNECT REQUIRED FOR EQUIPMENT WITH SHOP DRAWINGS.
6. REFER TO SHEET E-1-104 FOR CONTINUATION.
7. PROVIDE NEMA 5-20 RECEPTACLE FOR WATER DISPENSER.
8. PROVIDE RECEPTACLE 60" AFF FOR MICROWAVE. COORDINATE EXACT LOCATION WITH CASEWORK.
9. PROVIDE RECEPTACLE 48" AFF. COORDINATE EXACT LOCATION WITH CASEWORK.
10. PROVIDE RECEPTACLE FOR REFRIGERATOR.
11. PROVIDE ELECTRICAL CONNECTION FOR TRAP PRIMER. COORDINATE EXACT MEANS OF DISCONNECT REQUIRED FOR EQUIPMENT WITH SHOP DRAWINGS.
12. PROVIDE NEMA 5-20 RECEPTACLE FOR ICE MAKER.
13. MOTOR RATED SWITCH FOR OVERHEAD DOOR. COORDINATE MOUNTING LOCATION WITH ARCHITECTURAL.
14. UP/DOWN/STOP PUSHBUTTON FOR OVERHEAD DOOR. PROVIDE CONDUIT/WIRING AS REQUIRED TO OVERHEAD DOOR CONTROLLER.
15. CONNECTION TO OVERHEAD DOOR SAFETY BEAM PHOTO SENSOR. PROVIDE CONDUIT/WIRING AS REQUIRED TO OVERHEAD DOOR CONTROLLER.
16. CONNECTION TO OVERHEAD DOOR SENSING EDGE. PROVIDE CONDUIT/WIRING AS REQUIRED TO OVERHEAD DOOR CONTROLLER.
17. OVERHEAD DOOR CIRCUITS:
    - ROOM 123: L2C-1,3,5
    - ROOM 125: L2C-16,18,20
    - ROOM 126: L2D-1,3,5
18. UNDER SINK DISPOSER. PROVIDE WALL SWITCH AND ASSOCIATED WIRING FOR CONTROL OF DISPOSER. COORDINATE LOCATION WITH ARCHITECTURAL CASEWORK.
19. MAIN GROUNDING BAR.
20. PROVIDE 120V CONNECTION TO ACCESS CONTROL PANEL.
21. PROVIDE 120V CONNECTION TO HVAC DDC CONTROL PANEL.
22. PROVIDE SUPPORTS TO STACK TRANSFORMERS.
23. PROVIDE RECEPTACLE FOR DOCK LEVELER. CONNECT TO CIRCUIT L2A-8. PROVIDE 3/4" CONDUIT FROM RECEPTACLE TO WALL MOUNTED PUSH BUTTON.
24. INSTALL PUSH BUTTON FOR DOCK LEVELER 48" AFF.
25. INSTALL CONTROL PANEL FOR VEHICLE RESTRAINT SYSTEM. CONNECT TO CIRCUIT L2A-29. PROVIDE 3/4" CONDUITS TO LIP LIMIT SWITCH AND TRUCK SIGNAL LIGHT.
26. LIP LIMIT SWITCH.
27. TRUCK SIGNAL LIGHT.
28. REFER TO SYSTEMS PANEL ELEVATION FOR DETAILS REQUIREMENTS.
29. PROVIDE RECEPTACLE UNDER SINK FOR AUTOMATIC FAUCET. COORDINATE LOCATION WITH LAVATORY AND FAUCET MANUFACTURERS REQUIREMENTS.
30. PROVIDE CONNECTION TO AUTOMATIC FLUSH VALVES. COORDINATE LOCATION AND CONNECTION TYPE WITH FLUSH VALVE MANUFACTURERS REQUIREMENTS.

5 E-1-400 ENLARGED SECURITY ROOM POWER PLAN

REVISION	1

1 E-1-40 **ENLARGED GND MECH SHOP POWER PLAN - PHASE 1A**

2 E-1-401 **ENLARGED GND MECH SHOP POWER PLAN - FINAL**

GENERAL NOTES:

1. REFER TO ONE-LINE DIAGRAM ON SHEET E-1-800 FOR CONDUIT/CONDUCTOR SIZES FOR EQUIPMENT/PANELBOARD FEEDERS.
2. COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.
3. COORDINATE EXACT LOCATION OF RECEPTACLES, EQUIPMENT CONNECTIONS DEVICES, ETC, WITH ARCHITECT APPROVED SHOP DRAWINGS PRIOR TO ROUGH-IN.
4. COORDINATE EXACT EQUIPMENT REQUIREMENTS OF HVAC AND PLUMBING EQUIPMENT WITH ALL ENGINEER APPROVED SHOP DRAWINGS AND MECHANICAL/PLUMBING CONTRACTORS PRIOR TO ROUGH-IN.
5. PROVIDE FIRE STOP FOR PENETRATIONS OF FIRE RATED WALLS AND FLOORS. REFER TO ARCHITECTURAL DRAWINGS.
6. INDIVIDUAL HOMERUNS HAVE BEEN SHOWN FOR EACH CIRCUIT FOR CLARITY. CONTRACTOR MAY CHOOSE TO COMBINE UP TO (3) 20A/120V BRANCH CIRCUITS INTO A COMMON CONDUIT WITHOUT UPSIZING CONDUCTORS. EACH CIRCUIT SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR-CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.
7. COORDINATE EXACT CONNECTION REQUIREMENTS FOR ALL OWNER PROVIDED EQUIPMENT.

SHEET KEYNOTES:

1. PROVIDE 15A SINGLE POLE TOGGLE SWITCH DISCONNECT FOR RADIANT HEATING PUMP.
2. PROVIDE NEMA 5-15 RECEPTACLE FOR RADIANT HEATING BURNER. MOUNT WITHIN 12" OF BURNER UNIT.
3. PROVIDE ELECTRICAL CONNECTION TO DISCONNECT SWITCH FURNISHED WITH EXHAUST FAN.
4. PROVIDE MOUNTING BRACKET FOR TRANSFORMER. MOUNT TOP OF TRANSFORMER AS CLOSE TO BOTTOM OF STRUCTURE AS POSSIBLE.
5. PROVIDE ELECTRICAL CONNECTION FOR TRAP PRIMER. COORDINATE EXACT MEANS OF DISCONNECT REQUIRED FOR EQUIPMENT WITH SHOP DRAWINGS.
6. PROVIDE ELECTRICAL CONNECTION TO DISCONNECT FURNISHED WITH VEHICLE LIFT.
7. PROVIDE RECEPTACLE FOR AIR COMPRESSOR. PROVIDE AND INSTALL CORD & PLUG FOR OWNER PROVIDED AIR COMPRESSOR.
8. PROVIDE NEMA 5-20 RECEPTACLE FOR DRILL PRESS.
9. LOCATION OF VES FAN START/STOP SWITCH AND HOSE REEL UP/DOWN SWITCH. VES FAN START/STOP SWITCH REQUIRES CONTROL WIRING TO FAN CONTROLLER. HOSE REEL UP/DOWN SWITCH REQUIRES 120V CONNECTION VIA 120V DISCONNECT SWITCH AND POWER/CONTROL TO HOSE REEL.
10. PROVIDE A NEMA 1, 30A NON FUSED DISCONNECT. PROVIDE CONNECTION TO VEHICULAR EXHAUST FAN MOTOR. MOUNT DISCONNECT AND CONTROLLER AT 7'-6" AFF.
11. PROVIDE CONDUIT/WIRING FROM VEHICULAR EXHAUST FAN CONTROLLER TO FAN START/STOP SWITCH.
12. PROVIDE CONDUIT/WIRING FROM HOSE REEL TO UP/DOWN SWITCH.
13. PROVIDE NEMA 5-20 RECEPTACLE 12'-0" AFF FOR OWNER PROVIDED RECEPTACLE CORD REEL.
14. PROVIDE NEMA 5-20 RECEPTACLE 12'-0" AFF FOR OWNER PROVIDED LIGHT CORD REEL.
15. PROVIDE NEMA 5-20 RECEPTACLE FOR WELDER.
16. PROVIDE NEMA 5-20 RECEPTACLE FOR PARTS WASH.
17. PROVIDE NEMA 5-20 RECEPTACLES FOR POWER TOOLS.
18. CIRCUIT SHALL TEMPORARILY BE CONNECTED TO PANEL L2D DURING PHASE 1.
19. PANEL L2D SHALL BE SERVICE ENTRANCE RATED AND TEMPORARILY FED FROM SERVICE DROP POLE DURING PHASE 1. PANEL SHALL BE CONNECTED TO BUILDING SERVICE AFTER THE PHASE 2 BUILDING SERVICE IS OPERATIONAL.
20. OIL WATER SEPARATOR ALARM PANEL.

EQUIPMENT SCHEDULE

ITEM	DESCRIPTION
ME5	MIG WELDER
ME6	DRILL PRESS
ME9	200 PARTS WASH
ME12	GOLF CART LIFT
ME16	POWER REEL
ME17	WORK LIGHT REEL
ME20	TALL WORKBENCH
ME21	TIRE CHANGER
ME24	AIR COMPRESSOR
ME26	PEDISTAL TOOLS
ME28	WATER HEATER
ME29	VEHICLE EXHAUST FAN

SPECIAL NOTE: ADDENDUM #4

ALL REFERENCES TO PHASE 1 INSTALLATION SHALL BE REMOVED FROM THIS PROJECT. ALL WORK SHALL BE INSTALLED IN FINAL BUILDING CONFIGURATION.

All offers subject to all terms and conditions contained in this solicitation

SOLICITATION NUMBER: CRFQ 0211 GSD2200000014
Addendum Number: 3

The purpose of this addendum is to modify the solicitation identified as ("Solicitation") to reflect the change(s) identified and described below.

Applicable Addendum Category:

[✔] Modify bid opening date and time

[ ] Modify specifications of product or service being sought

[ ] Attachment of vendor questions and responses

[✔] Attachment of pre-bid sign-in sheet

[ ] Correction of error

[✔] Other

Description of Modification to Solicitation:

Addendum No. 3 is issued to provide the following information to vendors:

1. To revise the Technical Questions submission deadline to Monday, November 8, 2021, by 3:00pm.

2. To revise the Bid Opening Date and Time to Tuesday, November 30, 2021, at 1:30pm.

3. To provide a copy of the Mandatory Pre-Bid Meeting Sign In Sheet, per Attachment A
4. To make miscellaneous revisions to several Division 0 & 1 Specifications sections in the Project Manual, per Attachment A.
5. To make miscellaneous revisions to the General Construction Specifications section of the Centralized Request for Quotations, per Attachment A. No other changes.

Additional Documentation: Documentation related to this Addendum (if any) has been included herewith as Attachment A and is specifically incorporated herein by reference.

Terms and Conditions:

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.

2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

red to select one vendor to which the individual's attendance will be attributed. The vendors not
d meeting unless another individual attended on their behalf.

CRFQ GSD2200000014
Addendum #3 ATTACHMENT A

Note: The deadline for submitting Technical Questions and the Bid Opening Date are both postponed by this Addendum in order for the Agency to revise specifications and contract conditions to revise the requirement that the existing Mechanics Shop be preserved during construction. By subsequent Addendum, specifications and drawings will be added and/or revised to reflect this change. All technical questions submitted by the revised deadline will also be answered by subsequent Addendum.

Revisions to Divisions 0 and 1 in the Project Manual:

1. **AIA A101 Agreement:** Delete any reference to the AIA A101 Agreement in the Project Manual, Division 0 ("Part 1") TABLE OF CONTENTS. Also, please remove the sample A101 Agreement, including its Additions and Deletions Report and the AIA D401 Certificate of Authenticity, from the Project Manual. The document will not be used to execute a Contract award for this solicitation.

2. **Division 1, Section 012500, Substitutions Procedures (Post Award):** Revise the title of Section 012500 in the TABLE OF CONTENTS to read "Substitution Procedures (Post Award." Also, revise the Section's contents in the Project Manual as follows:

   a. Revise all headers and footers to read "Substitution Procedures (Post Award)
   b. Revise Item 1.2.A.3.a by removing "Addendum" as a form of acceptance.
   c. Revise Item 1.6.B. to read: "Substitutions for Convenience of Contractor: Not allowed **unless otherwise indicated."**
   d. Revise Item 1.6.C. to read: "Substitutions for Convenience **of Owner**: Architect will consider requests for substitution if received within **Sixty (60) days after award of the contract**. Requests received after that time may be considered or rejected at discretion of Architect."

   This revision does not modify the Centralized Request for Quotation General Conditions, Item 13, Substitutions, which concerns only substitution requests submitted prior to the technical questions deadline.

3. **Division 1, Section 013300, Submittal Procedures:** Revise Item 1.4.A.2. by adding this sentence to the end of the paragraph: **"Note: the submittal for metal buildings must be submitted within Twenty-One (21) calendar days after the award of the Contract, regardless of other requirements of this section."**

CRFQ GSD2200000014
Addendum #3 ATTACHMENT A

Revisions to the General Construction Specifications:

1. **Pricing Page Requirement:** Under Section 5, CONTRACT AWARD, of the General Construction Specifications, add:

   5.1 Pricing Page: Vendor SHALL submit a copy of the Exhibit A, Pricing Page, with their Bid. Vendor should complete the Pricing Page in full as failure to complete the Pricing Page in its entirety may result in Vendor's bid being disqualified. Vendor should provide a Bid for all Alternate Bid Items; failure to do so may result in Vendor's bid being disqualified.

2. **Project Plans:** Under Section 12, PROJECT PLANS, of the General Construction Specifications, add:

   12.1 Architect will provide the awarded Vendor with a complete, construction set of Project Plans which will incorporate all modifications made to the Project Plans by Addendum during the Bid Phase.

All offers subject to all terms and conditions contained in this solicitation

SOLICITATION NUMBER: CRFQ 0211 GSD2200000014
Addendum Number: 2

The purpose of this addendum is to modify the solicitation identified as ("Solicitation") to reflect the change(s) identified and described below.

Applicable Addendum Category:

[ ] Modify bid opening date and time

[✔] Modify specifications of product or service being sought

[ ] Attachment of vendor questions and responses

[ ] Attachment of pre-bid sign-in sheet

[ ] Correction of error

[ ] Other

Description of Modification to Solicitation:

Addendum No. 2 is issued to revise the allowable Fixed Period for Final Completion of the entire project, and to modify the allowable time for achieving Substantial Completion of the construction phases, per Attachment A.

No other changes.

Additional Documentation: Documentation related to this Addendum (if any) has been included herewith as Attachment A and is specifically incorporated herein by reference.

Terms and Conditions:

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.

2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

ATTACHMENT A
(See Attached)

CRFQ 0211 GSD2200000014
Addendum #2 ATTACHMENT A

General Conditions Modification:

In the General Conditions section of the Centralized Request for Quotation (CRFQ), in the section labeled "CONTRACT TERM; RENEWAL; EXTENSION," revise the Fixed Period Contract item to read:

"Fixed Period Contract: This Contract becomes effective upon Vendor's receipt of the notice to proceed and must be completed within Seven Hundred and Eighty (780) days."

General Construction Specifications Modifications:

In the General Construction Specifications section of the CRFQ, in Item 10. SUBSTANTIAL AND FINAL COMPLETION, revise to read:

"Vendor shall achieve substantial completion, by Phase, as indicated below, with the stated number of calendar days after the Contract start date established by the issuance of the Notice to Proceed. See Drawing G-003, Alternates and Phasing Plan. Failure to meet the deadlines established herein, unless extended by change order authorizing additional time free of liquidated damages, will result in liquidated damages being applied:

Phase A (1, 2 & 3): Substantially Complete within **Four Hundred and Eighty (480)** calendar days after the start date established by the issuance of the Notice to Proceed.

Phase B (1 & 2): Substantially Complete within **Seven Hundred and Fifty (750)** calendar days after the start date established by the issuance of the Notice to Proceed.

Phase C1: If awarded as Alternate #1, Substantially Complete within **Five Hundred and Forty (540)** calendar days after the start date established by the issuance of the Notice to Proceed.

Phase C2: Phase C2 may not begin until Phase C1 has been Substantially Completed and the personnel and equipment of the WV Office of Technology is moved into the new Mailroom, but otherwise must be Substantially Complete within **Seven Hundred and Fifty (750)** calendar days after the start date established by the issuance of the Notice to Proceed.

Phase D: If awarded as Alternate #2, Phase D may not begin until Phase C2 has at least begun, but otherwise must be Substantially Complete within **Seven Hundred and Fifty (750)** calendar days after the start date established by the issuance of the Notice to Proceed.

Phase E: If awarded as Alternate #3, Phase E must be Substantially Complete within **Seven Hundred and Fifty (750)** calendar days after the start date established by the issuance of the Notice to Proceed.

Final Completion: For each of the aforementioned Phases, Final Completion is to be achieved no later than Thirty (30) calendar days after Substantial Completion."

ADDENDUM ACKNOWLEDGEMENT FORM

ARTICLE 1 GENERAL PROVISIONS

§ 1.1 Basic Definitions

§ 1.1.1 The Contract Documents

The Contract Documents are enumerated in the Agreement between the Owner and Contractor (hereinafter the Agreement) and consist of the Agreement, Conditions of the Contract (General, Supplementary and other Conditions), Drawings, Specifications, Addenda issued prior to execution of the Contract, other documents listed in the Agreement, and Modifications issued after execution of the Contract. A Modification is (1) a written amendment to the Contract signed by both parties, (2) a Change Order, (3) a Construction Change Directive, or (4) a written order for a minor change in the Work issued by the Architect. Unless specifically enumerated in the Agreement, the Contract Documents do not include the advertisement or invitation to bid, Instructions to Bidders, sample forms, other information furnished by the Owner in anticipation of receiving bids or proposals, the Contractor's bid or proposal, or portions of Addenda relating to bidding or proposal requirements.

§ 1.1.2 The Contract

The Contract Documents form the Contract for Construction. The Contract represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representations, or agreements, either written or oral. The Contract may be amended or modified only by a Modification. The Contract Documents shall not be construed to create a contractual relationship of any kind (1) between the Contractor and the Architect or the Architect's consultants, (2) between the Owner and a Subcontractor or a Sub-subcontractor, (3) between the Owner and the Architect or the Architect's consultants, or (4) between any persons or entities other than the Owner and the Contractor. The Architect shall, however, be entitled to performance and enforcement of obligations under the Contract intended to facilitate performance of the Architect's duties.

§ 1.1.3 The Work

The term "Work" means the construction and services required by the Contract Documents, whether completed or partially completed, and includes all other labor, materials, equipment, and services provided or to be provided by the Contractor to fulfill the Contractor's obligations. The Work may constitute the whole or a part of the Project.

§ 1.1.4 The Project

The Project is the total construction of which the Work performed under the Contract Documents may be the whole or a part and which may include construction by the Owner and by Separate Contractors.

§ 1.1.5 The Drawings

The Drawings are the graphic and pictorial portions of the Contract Documents showing the design, location and dimensions of the Work, generally including plans, elevations, sections, details, schedules, and diagrams.

§ 1.1.6 The Specifications

The Specifications are that portion of the Contract Documents consisting of the written requirements for materials, equipment, systems, standards and workmanship for the Work, and performance of related services.

§ 1.1.7 Instruments of Service

Instruments of Service are representations, in any medium of expression now known or later developed, of the tangible and intangible creative work performed by the Architect and the Architect's consultants under their respective professional services agreements. Instruments of Service may include, without limitation, studies, surveys, models, sketches, drawings, specifications, and other similar materials.

§ 1.1.8 Initial Decision Maker

The Initial Decision Maker is the person identified in the Agreement to render initial decisions on Claims in accordance with Section 15.2. The Initial Decision Maker shall not show partiality to the Owner or Contractor and shall not be liable for results of interpretations or decisions rendered in good faith.

§ 1.2 Correlation and Intent of the Contract Documents

§ 1.2.1 The intent of the Contract Documents is to include all items necessary for the proper execution and completion of the Work by the Contractor. The Contract Documents are complementary, and what is required by one shall be as binding as if required by all; performance by the Contractor shall be required only to the extent consistent with the Contract Documents and reasonably inferable from them as being necessary to produce the indicated results.

AIA Document A201™ – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017 by The American Institute of Architects. All rights reserved. User Notes:

(1314219830)

§ 1.2.1.1 The invalidity of any provision of the Contract Documents shall not invalidate the Contract or its remaining provisions. If it is determined that any provision of the Contract Documents violates any law, or is otherwise invalid or unenforceable, then that provision shall be revised to the extent necessary to make that provision legal and enforceable. In such case the Contract Documents shall be construed, to the fullest extent permitted by law, to give effect to the parties' intentions and purposes in executing the Contract.

§ 1.2.2 Organization of the Specifications into divisions, sections and articles, and arrangement of Drawings shall not control the Contractor in dividing the Work among Subcontractors or in establishing the extent of Work to be performed by any trade.

§ 1.2.3 Unless otherwise stated in the Contract Documents, words that have well-known technical or construction industry meanings are used in the Contract Documents in accordance with such recognized meanings.

§ 1.3 Capitalization

Terms capitalized in these General Conditions include those that are (1) specifically defined, (2) the titles of numbered articles, or (3) the titles of other documents published by the American Institute of Architects.

§ 1.4 Interpretation

In the interest of brevity the Contract Documents frequently omit modifying words such as "all" and "any" and articles such as "the" and "an," but the fact that a modifier or an article is absent from one statement and appears in another is not intended to affect the interpretation of either statement.

§ 1.5 Ownership and Use of Drawings, Specifications, and Other Instruments of Service

§ 1.5.1 The Architect and the Architect's consultants shall be deemed the authors and owners of their respective Instruments of Service, including the Drawings and Specifications, and retain all common law, statutory, and other reserved rights in their Instruments of Service, including copyrights. The Contractor, Subcontractors, Sub-subcontractors, and suppliers shall not own or claim a copyright in the Instruments of Service. Submittal or distribution to meet official regulatory requirements or for other purposes in connection with the Project is not to be construed as publication in derogation of the Architect's or Architect's consultants' reserved rights.

§ 1.5.2 The Contractor, Subcontractors, Sub-subcontractors, and suppliers are authorized to use and reproduce the Instruments of Service provided to them, subject to any protocols established pursuant to Sections 1.7 and 1.8, solely and exclusively for execution of the Work. All copies made under this authorization shall bear the copyright notice, if any, shown on the Instruments of Service. The Contractor, Subcontractors, Sub-subcontractors, and suppliers may not use the Instruments of Service on other projects or for additions to the Project outside the scope of the Work without the specific written consent of the Owner, Architect, and the Architect's consultants.

§ 1.6 Notice

§ 1.6.1 Except as otherwise provided in Section 1.6.2, where the Contract Documents require one party to notify or give notice to the other party, such notice shall be provided in writing to the designated representative of the party to whom the notice is addressed and shall be deemed to have been duly served if delivered in person, by mail, by courier, or by electronic transmission if a method for electronic transmission is set forth in the Agreement.

§ 1.6.2 Notice of Claims as provided in Section 15.1.3 shall be provided in writing and shall be deemed to have been duly served only if delivered to the designated representative of the party to whom the notice is addressed by certified or registered mail, or by courier providing proof of delivery.

§ 1.7 Digital Data Use and Transmission

The parties shall agree upon protocols governing the transmission and use of Instruments of Service or any other information or documentation in digital form. The parties will use AIA Document E203™–2013, Building Information Modeling and Digital Data Exhibit, to establish the protocols for the development, use, transmission, and exchange of digital data.

§ 1.8 Building Information Models Use and Reliance

Any use of, or reliance on, all or a portion of a building information model without agreement to protocols governing the use of, and reliance on, the information contained in the model and without having those protocols set forth in AIA Document E203™–2013, Building Information Modeling and Digital Data Exhibit, and the requisite AIA Document

G202™–2013, Project Building Information Modeling Protocol Form, shall be at the using or relying party's sole risk and without liability to the other party and its contractors or consultants, the authors of, or contributors to, the building information model, and each of their agents and employees.

ARTICLE 2 OWNER

§ 2.1 General

§ 2.1.1 The Owner is the person or entity identified as such in the Agreement and is referred to throughout the Contract Documents as if singular in number. The Owner shall designate in writing a representative who shall have express authority to bind the Owner with respect to all matters requiring the Owner's approval or authorization. Except as otherwise provided in Section 4.2.1, the Architect does not have such authority. The term "Owner" means the Owner or the Owner's authorized representative.

§ 2.1.2 The Owner shall furnish to the Contractor, within fifteen days after receipt of a written request, information necessary and relevant for the Contractor to evaluate, give notice of, or enforce mechanic's lien rights. Such information shall include a correct statement of the record legal title to the property on which the Project is located, usually referred to as the site, and the Owner's interest therein.

§ 2.2 Evidence of the Owner's Financial Arrangements

§ 2.2.1 Prior to commencement of the Work and upon written request by the Contractor, the Owner shall furnish to the Contractor reasonable evidence that the Owner has made financial arrangements to fulfill the Owner's obligations under the Contract. The Contractor shall have no obligation to commence the Work until the Owner provides such evidence. If commencement of the Work is delayed under this Section 2.2.1, the Contract Time shall be extended appropriately.

§ 2.2.2 Following commencement of the Work and upon written request by the Contractor, the Owner shall furnish to the Contractor reasonable evidence that the Owner has made financial arrangements to fulfill the Owner's obligations under the Contract only if (1) the Owner fails to make payments to the Contractor as the Contract Documents require; (2) the Contractor identifies in writing a reasonable concern regarding the Owner's ability to make payment when due; or (3) a change in the Work materially changes the Contract Sum. If the Owner fails to provide such evidence, as required, within fourteen days of the Contractor's request, the Contractor may immediately stop the Work and, in that event, shall notify the Owner that the Work has stopped. However, if the request is made because a change in the Work materially changes the Contract Sum under (3) above, the Contractor may immediately stop only that portion of the Work affected by the change until reasonable evidence is provided. If the Work is stopped under this Section 2.2.2, the Contract Time shall be extended appropriately and the Contract Sum shall be increased by the amount of the Contractor's reasonable costs of shutdown, delay and start-up, plus interest as provided in the Contract Documents.

§ 2.2.3 After the Owner furnishes evidence of financial arrangements under this Section 2.2, the Owner shall not materially vary such financial arrangements without prior notice to the Contractor.

§ 2.2.4 Where the Owner has designated information furnished under this Section 2.2 as "confidential," the Contractor shall keep the information confidential and shall not disclose it to any other person. However, the Contractor may disclose "confidential" information, after seven (7) days' notice to the Owner, where disclosure is required by law, including a subpoena or other form of compulsory legal process issued by a court or governmental entity, or by court or arbitrator(s) order. The Contractor may also disclose "confidential" information to its employees, consultants, sureties, Subcontractors and their employees, Sub-subcontractors, and others who need to know the content of such information solely and exclusively for the Project and who agree to maintain the confidentiality of such information.

§ 2.3 Information and Services Required of the Owner

§ 2.3.1 Except for permits and fees that are the responsibility of the Contractor under the Contract Documents, including those required under Section 3.7.1, the Owner shall secure and pay for necessary approvals, easements, assessments and charges required for construction, use or occupancy of permanent structures or for permanent changes in existing facilities.

§ 2.3.2 The Owner shall retain an architect lawfully licensed to practice architecture, or an entity lawfully practicing architecture, in the jurisdiction where the Project is located. That person or entity is identified as the Architect in the Agreement and is referred to throughout the Contract Documents as if singular in number.

AIA Document A201™ – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017 by The American Institute of Architects. All rights reserved. WARNING: This AIA® Document is protected by U.S. Copyright Law and International Treaties. Unauthorized reproduction or distribution of this AIA® Document, or any portion of it, may result in severe civil and criminal penalties, and will be prosecuted to the maximum extent possible under the law. This document was produced by AIA software at 10:34:06 ET on 12/20/2019 under Order No.4568032601 which expires on 04/04/2020, and is not for resale.
User Notes:
(1314219830)

§ 2.3.3 If the employment of the Architect terminates, the Owner shall employ a successor to whom the Contractor has no reasonable objection and whose status under the Contract Documents shall be that of the Architect.

§ 2.3.4 The Owner shall furnish surveys describing physical characteristics, legal limitations and utility locations for the site of the Project, and a legal description of the site. The Contractor shall be entitled to rely on the accuracy of information furnished by the Owner but shall exercise proper precautions relating to the safe performance of the Work.

§ 2.3.5 The Owner shall furnish information or services required of the Owner by the Contract Documents with reasonable promptness. The Owner shall also furnish any other information or services under the Owner's control and relevant to the Contractor's performance of the Work with reasonable promptness after receiving the Contractor's written request for such information or services.

§ 2.3.6 Unless otherwise provided in the Contract Documents, the Owner shall furnish to the Contractor one copy of the Contract Documents for purposes of making reproductions pursuant to Section 1.5.2.

§ 2.4 Owner's Right to Stop the Work

If the Contractor fails to correct Work that is not in accordance with the requirements of the Contract Documents as required by Section 12.2 or repeatedly fails to carry out Work in accordance with the Contract Documents, the Owner may issue a written order to the Contractor to stop the Work, or any portion thereof, until the cause for such order has been eliminated; however, the right of the Owner to stop the Work shall not give rise to a duty on the part of the Owner to exercise this right for the benefit of the Contractor or any other person or entity, except to the extent required by Section 6.1.3.

§ 2.5 Owner's Right to Carry Out the Work

If the Contractor defaults or neglects to carry out the Work in accordance with the Contract Documents and fails within a ten-day period after receipt of notice from the Owner to commence and continue correction of such default or neglect with diligence and promptness, the Owner may, without prejudice to other remedies the Owner may have, correct such default or neglect. Such action by the Owner and amounts charged to the Contractor are both subject to prior approval of the Architect and the Architect may, pursuant to Section 9.5.1, withhold or nullify a Certificate for Payment in whole or in part, to the extent reasonably necessary to reimburse the Owner for the reasonable cost of correcting such deficiencies, including Owner's expenses and compensation for the Architect's additional services made necessary by such default, neglect, or failure. If current and future payments are not sufficient to cover such amounts, the Contractor shall pay the difference to the Owner. If the Contractor disagrees with the actions of the Owner or the Architect, or the amounts claimed as costs to the Owner, the Contractor may file a Claim pursuant to Article 15.

ARTICLE 3 CONTRACTOR

§ 3.1 General

§ 3.1.1 The Contractor is the person or entity identified as such in the Agreement and is referred to throughout the Contract Documents as if singular in number. The Contractor shall be lawfully licensed, if required in the jurisdiction where the Project is located. The Contractor shall designate in writing a representative who shall have express authority to bind the Contractor with respect to all matters under this Contract. The term "Contractor" means the Contractor or the Contractor's authorized representative.

§ 3.1.2 The Contractor shall perform the Work in accordance with the Contract Documents.

§ 3.1.3 The Contractor shall not be relieved of its obligations to perform the Work in accordance with the Contract Documents either by activities or duties of the Architect in the Architect's administration of the Contract, or by tests, inspections or approvals required or performed by persons or entities other than the Contractor.

§ 3.2 Review of Contract Documents and Field Conditions by Contractor

§ 3.2.1 Execution of the Contract by the Contractor is a representation that the Contractor has visited the site, become generally familiar with local conditions under which the Work is to be performed, and correlated personal observations with requirements of the Contract Documents.

AIA Document A201™ – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017 by The American Institute of Architects. All rights reserved. User Notes:
(1314219830)

§ 3.2.2 Because the Contract Documents are complementary, the Contractor shall, before starting each portion of the Work, carefully study and compare the various Contract Documents relative to that portion of the Work, as well as the information furnished by the Owner pursuant to Section 2.3.4, shall take field measurements of any existing conditions related to that portion of the Work, and shall observe any conditions at the site affecting it. These obligations are for the purpose of facilitating coordination and construction by the Contractor and are not for the purpose of discovering errors, omissions, or inconsistencies in the Contract Documents; however, the Contractor shall promptly report to the Architect any errors, inconsistencies or omissions discovered by or made known to the Contractor as a request for information in such form as the Architect may require. It is recognized that the Contractor's review is made in the Contractor's capacity as a contractor and not as a licensed design professional, unless otherwise specifically provided in the Contract Documents.

§ 3.2.3 The Contractor is not required to ascertain that the Contract Documents are in accordance with applicable laws, statutes, ordinances, codes, rules and regulations, or lawful orders of public authorities, but the Contractor shall promptly report to the Architect any nonconformity discovered by or made known to the Contractor as a request for information in such form as the Architect may require.

§ 3.2.4 If the Contractor believes that additional cost or time is involved because of clarifications or instructions the Architect issues in response to the Contractor's notices or requests for information pursuant to Sections 3.2.2 or 3.2.3, the Contractor shall submit Claims as provided in Article 15. If the Contractor fails to perform the obligations of Sections 3.2.2 or 3.2.3, the Contractor shall pay such costs and damages to the Owner, subject to Section 15.1.7, as would have been avoided if the Contractor had performed such obligations. If the Contractor performs those obligations, the Contractor shall not be liable to the Owner or Architect for damages resulting from errors, inconsistencies or omissions in the Contract Documents, for differences between field measurements or conditions and the Contract Documents, or for nonconformities of the Contract Documents to applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities.

§ 3.3 Supervision and Construction Procedures

§ 3.3.1 The Contractor shall supervise and direct the Work, using the Contractor's best skill and attention. The Contractor shall be solely responsible for, and have control over, construction means, methods, techniques, sequences, and procedures, and for coordinating all portions of the Work under the Contract. If the Contract Documents give specific instructions concerning construction means, methods, techniques, sequences, or procedures, the Contractor shall evaluate the jobsite safety thereof and shall be solely responsible for the jobsite safety of such means, methods, techniques, sequences, or procedures. If the Contractor determines that such means, methods, techniques, sequences or procedures may not be safe, the Contractor shall give timely notice to the Owner and Architect, and shall propose alternative means, methods, techniques, sequences, or procedures. The Architect shall evaluate the proposed alternative solely for conformance with the design intent for the completed construction. Unless the Architect objects to the Contractor's proposed alternative, the Contractor shall perform the Work using its alternative means, methods, techniques, sequences, or procedures.

§ 3.3.2 The Contractor shall be responsible to the Owner for acts and omissions of the Contractor's employees, Subcontractors and their agents and employees, and other persons or entities performing portions of the Work for, or on behalf of, the Contractor or any of its Subcontractors.

§ 3.3.3 The Contractor shall be responsible for inspection of portions of Work already performed to determine that such portions are in proper condition to receive subsequent Work.

§ 3.4 Labor and Materials

§ 3.4.1 Unless otherwise provided in the Contract Documents, the Contractor shall provide and pay for labor, materials, equipment, tools, construction equipment and machinery, water, heat, utilities, transportation, and other facilities and services necessary for proper execution and completion of the Work, whether temporary or permanent and whether or not incorporated or to be incorporated in the Work.

§ 3.4.2 Except in the case of minor changes in the Work approved by the Architect in accordance with Section 3.12.8 or ordered by the Architect in accordance with Section 7.4, the Contractor may make substitutions only with the consent of the Owner, after evaluation by the Architect and in accordance with a Change Order or Construction Change Directive.

User Notes:

(1314219830)

§ 3.4.3 The Contractor shall enforce strict discipline and good order among the Contractor's employees and other persons carrying out the Work. The Contractor shall not permit employment of unfit persons or persons not properly skilled in tasks assigned to them.

§ 3.5 Warranty

§ 3.5.1 The Contractor warrants to the Owner and Architect that materials and equipment furnished under the Contract will be of good quality and new unless the Contract Documents require or permit otherwise. The Contractor further warrants that the Work will conform to the requirements of the Contract Documents and will be free from defects, except for those inherent in the quality of the Work the Contract Documents require or permit. Work, materials, or equipment not conforming to these requirements may be considered defective. The Contractor's warranty excludes remedy for damage or defect caused by abuse, alterations to the Work not executed by the Contractor, improper or insufficient maintenance, improper operation, or normal wear and tear and normal usage. If required by the Architect, the Contractor shall furnish satisfactory evidence as to the kind and quality of materials and equipment.

§ 3.5.2 All material, equipment, or other special warranties required by the Contract Documents shall be issued in the name of the Owner, or shall be transferable to the Owner, and shall commence in accordance with Section 9.8.4.

§ 3.6 Taxes

The Contractor shall pay sales, consumer, use and similar taxes for the Work provided by the Contractor that are legally enacted when bids are received or negotiations concluded, whether or not yet effective or merely scheduled to go into effect.

§ 3.7 Permits, Fees, Notices and Compliance with Laws

§ 3.7.1 Unless otherwise provided in the Contract Documents, the Contractor shall secure and pay for the building permit as well as for other permits, fees, licenses, and inspections by government agencies necessary for proper execution and completion of the Work that are customarily secured after execution of the Contract and legally required at the time bids are received or negotiations concluded.

§ 3.7.2 The Contractor shall comply with and give notices required by applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities applicable to performance of the Work.

§ 3.7.3 If the Contractor performs Work knowing it to be contrary to applicable laws, statutes, ordinances, codes, rules and regulations, or lawful orders of public authorities, the Contractor shall assume appropriate responsibility for such Work and shall bear the costs attributable to correction.

§ 3.7.4 Concealed or Unknown Conditions

If the Contractor encounters conditions at the site that are (1) subsurface or otherwise concealed physical conditions that differ materially from those indicated in the Contract Documents or (2) unknown physical conditions of an unusual nature that differ materially from those ordinarily found to exist and generally recognized as inherent in construction activities of the character provided for in the Contract Documents, the Contractor shall promptly provide notice to the Owner and the Architect before conditions are disturbed and in no event later than 14 days after first observance of the conditions. The Architect will promptly investigate such conditions and, if the Architect determines that they differ materially and cause an increase or decrease in the Contractor's cost of, or time required for, performance of any part of the Work, will recommend that an equitable adjustment be made in the Contract Sum or Contract Time, or both. If the Architect determines that the conditions at the site are not materially different from those indicated in the Contract Documents and that no change in the terms of the Contract is justified, the Architect shall promptly notify the Owner and Contractor, stating the reasons. If either party disputes the Architect's determination or recommendation, that party may submit a Claim as provided in Article 15.

§ 3.7.5 If, in the course of the Work, the Contractor encounters human remains or recognizes the existence of burial markers, archaeological sites or wetlands not indicated in the Contract Documents, the Contractor shall immediately suspend any operations that would affect them and shall notify the Owner and Architect. Upon receipt of such notice, the Owner shall promptly take any action necessary to obtain governmental authorization required to resume the operations. The Contractor shall continue to suspend such operations until otherwise instructed by the Owner but shall continue with all other operations that do not affect those remains or features. Requests for adjustments in the Contract Sum and Contract Time arising from the existence of such remains or features may be made as provided in Article 15.

§ 3.8 Allowances

§ 3.8.1 The Contractor shall include in the Contract Sum all allowances stated in the Contract Documents. Items covered by allowances shall be supplied for such amounts and by such persons or entities as the Owner may direct, but the Contractor shall not be required to employ persons or entities to whom the Contractor has reasonable objection.

§ 3.8.2 Unless otherwise provided in the Contract Documents,

.1 allowances shall cover the cost to the Contractor of materials and equipment delivered at the site and all required taxes, less applicable trade discounts;

.2 Contractor's costs for unloading and handling at the site, labor, installation costs, overhead, profit, and other expenses contemplated for stated allowance amounts shall be included in the Contract Sum but not in the allowances; and

.3 whenever costs are more than or less than allowances, the Contract Sum shall be adjusted accordingly by Change Order. The amount of the Change Order shall reflect (1) the difference between actual costs and the allowances under Section 3.8.2.1 and (2) changes in Contractor's costs under Section 3.8.2.2.

§ 3.8.3 Materials and equipment under an allowance shall be selected by the Owner with reasonable promptness.

§ 3.9 Superintendent

§ 3.9.1 The Contractor shall employ a competent superintendent and necessary assistants who shall be in attendance at the Project site during performance of the Work. The superintendent shall represent the Contractor, and communications given to the superintendent shall be as binding as if given to the Contractor.

§ 3.9.2 The Contractor, as soon as practicable after award of the Contract, shall notify the Owner and Architect of the name and qualifications of a proposed superintendent. Within 14 days of receipt of the information, the Architect may notify the Contractor, stating whether the Owner or the Architect (1) has reasonable objection to the proposed superintendent or (2) requires additional time for review. Failure of the Architect to provide notice within the 14-day period shall constitute notice of no reasonable objection.

§ 3.9.3 The Contractor shall not employ a proposed superintendent to whom the Owner or Architect has made reasonable and timely objection. The Contractor shall not change the superintendent without the Owner's consent, which shall not unreasonably be withheld or delayed.

§ 3.10 Contractor's Construction and Submittal Schedules

§ 3.10.1 The Contractor, promptly after being awarded the Contract, shall submit for the Owner's and Architect's information a Contractor's construction schedule for the Work. The schedule shall contain detail appropriate for the Project, including (1) the date of commencement of the Work, interim schedule milestone dates, and the date of Substantial Completion; (2) an apportionment of the Work by construction activity; and (3) the time required for completion of each portion of the Work. The schedule shall provide for the orderly progression of the Work to completion and shall not exceed time limits current under the Contract Documents. The schedule shall be revised at appropriate intervals as required by the conditions of the Work and Project.

§ 3.10.2 The Contractor, promptly after being awarded the Contract and thereafter as necessary to maintain a current submittal schedule, shall submit a submittal schedule for the Architect's approval. The Architect's approval shall not be unreasonably delayed or withheld. The submittal schedule shall (1) be coordinated with the Contractor's construction schedule, and (2) allow the Architect reasonable time to review submittals. If the Contractor fails to submit a submittal schedule, or fails to provide submittals in accordance with the approved submittal schedule, the Contractor shall not be entitled to any increase in Contract Sum or extension of Contract Time based on the time required for review of submittals.

§ 3.10.3 The Contractor shall perform the Work in general accordance with the most recent schedules submitted to the Owner and Architect.

§ 3.11 Documents and Samples at the Site

The Contractor shall make available, at the Project site, the Contract Documents, including Change Orders, Construction Change Directives, and other Modifications, in good order and marked currently to indicate field changes and selections made during construction, and the approved Shop Drawings, Product Data, Samples, and similar required submittals. These shall be in electronic form or paper copy, available to the Architect and Owner, and

User Notes:

delivered to the Architect for submittal to the Owner upon completion of the Work as a record of the Work as constructed.

§ 3.12 Shop Drawings, Product Data and Samples

§ 3.12.1 Shop Drawings are drawings, diagrams, schedules, and other data specially prepared for the Work by the Contractor or a Subcontractor, Sub-subcontractor, manufacturer, supplier, or distributor to illustrate some portion of the Work.

§ 3.12.2 Product Data are illustrations, standard schedules, performance charts, instructions, brochures, diagrams, and other information furnished by the Contractor to illustrate materials or equipment for some portion of the Work.

§ 3.12.3 Samples are physical examples that illustrate materials, equipment, or workmanship, and establish standards by which the Work will be judged.

§ 3.12.4 Shop Drawings, Product Data, Samples, and similar submittals are not Contract Documents. Their purpose is to demonstrate how the Contractor proposes to conform to the information given and the design concept expressed in the Contract Documents for those portions of the Work for which the Contract Documents require submittals. Review by the Architect is subject to the limitations of Section 4.2.7. Informational submittals upon which the Architect is not expected to take responsive action may be so identified in the Contract Documents. Submittals that are not required by the Contract Documents may be returned by the Architect without action.

§ 3.12.5 The Contractor shall review for compliance with the Contract Documents, approve, and submit to the Architect, Shop Drawings, Product Data, Samples, and similar submittals required by the Contract Documents, in accordance with the submittal schedule approved by the Architect or, in the absence of an approved submittal schedule, with reasonable promptness and in such sequence as to cause no delay in the Work or in the activities of the Owner or of Separate Contractors.

§ 3.12.6 By submitting Shop Drawings, Product Data, Samples, and similar submittals, the Contractor represents to the Owner and Architect that the Contractor has (1) reviewed and approved them, (2) determined and verified materials, field measurements and field construction criteria related thereto, or will do so, and (3) checked and coordinated the information contained within such submittals with the requirements of the Work and of the Contract Documents.

§ 3.12.7 The Contractor shall perform no portion of the Work for which the Contract Documents require submittal and review of Shop Drawings, Product Data, Samples, or similar submittals, until the respective submittal has been approved by the Architect.

§ 3.12.8 The Work shall be in accordance with approved submittals except that the Contractor shall not be relieved of responsibility for deviations from the requirements of the Contract Documents by the Architect's approval of Shop Drawings, Product Data, Samples, or similar submittals, unless the Contractor has specifically notified the Architect of such deviation at the time of submittal and (1) the Architect has given written approval to the specific deviation as a minor change in the Work, or (2) a Change Order or Construction Change Directive has been issued authorizing the deviation. The Contractor shall not be relieved of responsibility for errors or omissions in Shop Drawings, Product Data, Samples, or similar submittals, by the Architect's approval thereof.

§ 3.12.9 The Contractor shall direct specific attention, in writing or on resubmitted Shop Drawings, Product Data, Samples, or similar submittals, to revisions other than those requested by the Architect on previous submittals. In the absence of such notice, the Architect's approval of a resubmission shall not apply to such revisions.

§ 3.12.10 The Contractor shall not be required to provide professional services that constitute the practice of architecture or engineering unless such services are specifically required by the Contract Documents for a portion of the Work or unless the Contractor needs to provide such services in order to carry out the Contractor's responsibilities for construction means, methods, techniques, sequences, and procedures. The Contractor shall not be required to provide professional services in violation of applicable law.

§ 3.12.10.1 If professional design services or certifications by a design professional related to systems, materials, or equipment are specifically required of the Contractor by the Contract Documents, the Owner and the Architect will specify all performance and design criteria that such services must satisfy. The Contractor shall be entitled to rely

(1314219830)

upon the adequacy and accuracy of the performance and design criteria provided in the Contract Documents. The Contractor shall cause such services or certifications to be provided by an appropriately licensed design professional, whose signature and seal shall appear on all drawings, calculations, specifications, certifications, Shop Drawings, and other submittals prepared by such professional. Shop Drawings, and other submittals related to the Work, designed or certified by such professional, if prepared by others, shall bear such professional's written approval when submitted to the Architect. The Owner and the Architect shall be entitled to rely upon the adequacy and accuracy of the services, certifications, and approvals performed or provided by such design professionals, provided the Owner and Architect have specified to the Contractor the performance and design criteria that such services must satisfy. Pursuant to this Section 3.12.10, the Architect will review and approve or take other appropriate action on submittals only for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents.

§ 3.12.10.2 If the Contract Documents require the Contractor's design professional to certify that the Work has been performed in accordance with the design criteria, the Contractor shall furnish such certifications to the Architect at the time and in the form specified by the Architect.

§ 3.13 Use of Site

The Contractor shall confine operations at the site to areas permitted by applicable laws, statutes, ordinances, codes, rules and regulations, lawful orders of public authorities, and the Contract Documents and shall not unreasonably encumber the site with materials or equipment.

§ 3.14 Cutting and Patching

§ 3.14.1 The Contractor shall be responsible for cutting, fitting, or patching required to complete the Work or to make its parts fit together properly. All areas requiring cutting, fitting, or patching shall be restored to the condition existing prior to the cutting, fitting, or patching, unless otherwise required by the Contract Documents.

§ 3.14.2 The Contractor shall not damage or endanger a portion of the Work or fully or partially completed construction of the Owner or Separate Contractors by cutting, patching, or otherwise altering such construction, or by excavation. The Contractor shall not cut or otherwise alter construction by the Owner or a Separate Contractor except with written consent of the Owner and of the Separate Contractor. Consent shall not be unreasonably withheld. The Contractor shall not unreasonably withhold, from the Owner or a Separate Contractor, its consent to cutting or otherwise altering the Work.

§ 3.15 Cleaning Up

§ 3.15.1 The Contractor shall keep the premises and surrounding area free from accumulation of waste materials and rubbish caused by operations under the Contract. At completion of the Work, the Contractor shall remove waste materials, rubbish, the Contractor's tools, construction equipment, machinery, and surplus materials from and about the Project.

§ 3.15.2 If the Contractor fails to clean up as provided in the Contract Documents, the Owner may do so and the Owner shall be entitled to reimbursement from the Contractor.

§ 3.16 Access to Work

The Contractor shall provide the Owner and Architect with access to the Work in preparation and progress wherever located.

§ 3.17 Royalties, Patents and Copyrights

The Contractor shall pay all royalties and license fees. The Contractor shall defend suits or claims for infringement of copyrights and patent rights and shall hold the Owner and Architect harmless from loss on account thereof, but shall not be responsible for defense or loss when a particular design, process, or product of a particular manufacturer or manufacturers is required by the Contract Documents, or where the copyright violations are contained in Drawings, Specifications, or other documents prepared by the Owner or Architect. However, if an infringement of a copyright or patent is discovered by, or made known to, the Contractor, the Contractor shall be responsible for the loss unless the information is promptly furnished to the Architect.

§ 3.18 Indemnification

§ 3.18.1 To the fullest extent permitted by law, the Contractor shall indemnify and hold harmless the Owner, Architect, Architect's consultants, and agents and employees of any of them from and against claims, damages, losses, and expenses, including but not limited to attorneys' fees, arising out of or resulting from performance of the Work, provided that such claim, damage, loss, or expense is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself), but only to the extent caused by the negligent acts or omissions of the Contractor, a Subcontractor, anyone directly or indirectly employed by them, or anyone for whose acts they may be liable, regardless of whether or not such claim, damage, loss, or expense is caused in part by a party indemnified hereunder. Such obligation shall not be construed to negate, abridge, or reduce other rights or obligations of indemnity that would otherwise exist as to a party or person described in this Section 3.18.

§ 3.18.2 In claims against any person or entity indemnified under this Section 3.18 by an employee of the Contractor, a Subcontractor, anyone directly or indirectly employed by them, or anyone for whose acts they may be liable, the indemnification obligation under Section 3.18.1 shall not be limited by a limitation on amount or type of damages, compensation, or benefits payable by or for the Contractor or a Subcontractor under workers' compensation acts, disability benefit acts, or other employee benefit acts.

ARTICLE 4 ARCHITECT

§ 4.1 General

§ 4.1.1 The Architect is the person or entity retained by the Owner pursuant to Section 2.3.2 and identified as such in the Agreement.

§ 4.1.2 Duties, responsibilities, and limitations of authority of the Architect as set forth in the Contract Documents shall not be restricted, modified, or extended without written consent of the Owner, Contractor, and Architect. Consent shall not be unreasonably withheld.

§ 4.2 Administration of the Contract

§ 4.2.1 The Architect will provide administration of the Contract as described in the Contract Documents and will be an Owner's representative during construction until the date the Architect issues the final Certificate for Payment. The Architect will have authority to act on behalf of the Owner only to the extent provided in the Contract Documents.

§ 4.2.2 The Architect will visit the site at intervals appropriate to the stage of construction, or as otherwise agreed with the Owner, to become generally familiar with the progress and quality of the portion of the Work completed, and to determine in general if the Work observed is being performed in a manner indicating that the Work, when fully completed, will be in accordance with the Contract Documents. However, the Architect will not be required to make exhaustive or continuous on-site inspections to check the quality or quantity of the Work. The Architect will not have control over, charge of, or responsibility for the construction means, methods, techniques, sequences or procedures, or for the safety precautions and programs in connection with the Work, since these are solely the Contractor's rights and responsibilities under the Contract Documents.

§ 4.2.3 On the basis of the site visits, the Architect will keep the Owner reasonably informed about the progress and quality of the portion of the Work completed, and promptly report to the Owner (1) known deviations from the Contract Documents, (2) known deviations from the most recent construction schedule submitted by the Contractor, and (3) defects and deficiencies observed in the Work. The Architect will not be responsible for the Contractor's failure to perform the Work in accordance with the requirements of the Contract Documents. The Architect will not have control over or charge of, and will not be responsible for acts or omissions of, the Contractor, Subcontractors, or their agents or employees, or any other persons or entities performing portions of the Work.

§ 4.2.4 Communications

The Owner and Contractor shall include the Architect in all communications that relate to or affect the Architect's services or professional responsibilities. The Owner shall promptly notify the Architect of the substance of any direct communications between the Owner and the Contractor otherwise relating to the Project. Communications by and with the Architect's consultants shall be through the Architect. Communications by and with Subcontractors and suppliers shall be through the Contractor. Communications by and with Separate Contractors shall be through the Owner. The Contract Documents may specify other communication protocols.

User Notes:
(1314219830)

§ 4.2.5 Based on the Architect's evaluations of the Contractor's Applications for Payment, the Architect will review and certify the amounts due the Contractor and will issue Certificates for Payment in such amounts.

§ 4.2.6 The Architect has authority to reject Work that does not conform to the Contract Documents. Whenever the Architect considers it necessary or advisable, the Architect will have authority to require inspection or testing of the Work in accordance with Sections 13.4.2 and 13.4.3, whether or not the Work is fabricated, installed or completed. However, neither this authority of the Architect nor a decision made in good faith either to exercise or not to exercise such authority shall give rise to a duty or responsibility of the Architect to the Contractor, Subcontractors, suppliers, their agents or employees, or other persons or entities performing portions of the Work.

§ 4.2.7 The Architect will review and approve, or take other appropriate action upon, the Contractor's submittals such as Shop Drawings, Product Data, and Samples, but only for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents. The Architect's action will be taken in accordance with the submittal schedule approved by the Architect or, in the absence of an approved submittal schedule, with reasonable promptness while allowing sufficient time in the Architect's professional judgment to permit adequate review. Review of such submittals is not conducted for the purpose of determining the accuracy and completeness of other details such as dimensions and quantities, or for substantiating instructions for installation or performance of equipment or systems, all of which remain the responsibility of the Contractor as required by the Contract Documents. The Architect's review of the Contractor's submittals shall not relieve the Contractor of the obligations under Sections 3.3, 3.5, and 3.12. The Architect's review shall not constitute approval of safety precautions or of any construction means, methods, techniques, sequences, or procedures. The Architect's approval of a specific item shall not indicate approval of an assembly of which the item is a component.

§ 4.2.8 The Architect will prepare Change Orders and Construction Change Directives, and may order minor changes in the Work as provided in Section 7.4. The Architect will investigate and make determinations and recommendations regarding concealed and unknown conditions as provided in Section 3.7.4.

§ 4.2.9 The Architect will conduct inspections to determine the date or dates of Substantial Completion and the date of final completion; issue Certificates of Substantial Completion pursuant to Section 9.8; receive and forward to the Owner, for the Owner's review and records, written warranties and related documents required by the Contract and assembled by the Contractor pursuant to Section 9.10; and issue a final Certificate for Payment pursuant to Section 9.10.

§ 4.2.10 If the Owner and Architect agree, the Architect will provide one or more Project representatives to assist in carrying out the Architect's responsibilities at the site. The Owner shall notify the Contractor of any change in the duties, responsibilities and limitations of authority of the Project representatives.

§ 4.2.11 The Architect will interpret and decide matters concerning performance under, and requirements of, the Contract Documents on written request of either the Owner or Contractor. The Architect's response to such requests will be made in writing within any time limits agreed upon or otherwise with reasonable promptness.

§ 4.2.12 Interpretations and decisions of the Architect will be consistent with the intent of, and reasonably inferable from, the Contract Documents and will be in writing or in the form of drawings. When making such interpretations and decisions, the Architect will endeavor to secure faithful performance by both Owner and Contractor, will not show partiality to either, and will not be liable for results of interpretations or decisions rendered in good faith.

§ 4.2.13 The Architect's decisions on matters relating to aesthetic effect will be final if consistent with the intent expressed in the Contract Documents.

§ 4.2.14 The Architect will review and respond to requests for information about the Contract Documents. The Architect's response to such requests will be made in writing within any time limits agreed upon or otherwise with reasonable promptness. If appropriate, the Architect will prepare and issue supplemental Drawings and Specifications in response to the requests for information.

ARTICLE 5 SUBCONTRACTORS

§ 5.1 Definitions

§ 5.1.1 A Subcontractor is a person or entity who has a direct contract with the Contractor to perform a portion of the Work at the site. The term "Subcontractor" is referred to throughout the Contract Documents as if singular in number and means a Subcontractor or an authorized representative of the Subcontractor. The term "Subcontractor" does not include a Separate Contractor or the subcontractors of a Separate Contractor.

§ 5.1.2 A Sub-subcontractor is a person or entity who has a direct or indirect contract with a Subcontractor to perform a portion of the Work at the site. The term "Sub-subcontractor" is referred to throughout the Contract Documents as if singular in number and means a Sub-subcontractor or an authorized representative of the Sub-subcontractor.

§ 5.2 Award of Subcontracts and Other Contracts for Portions of the Work

§ 5.2.1 Unless otherwise stated in the Contract Documents, the Contractor, as soon as practicable after award of the Contract, shall notify the Owner and Architect of the persons or entities proposed for each principal portion of the Work, including those who are to furnish materials or equipment fabricated to a special design. Within 14 days of receipt of the information, the Architect may notify the Contractor whether the Owner or the Architect (1) has reasonable objection to any such proposed person or entity or (2) requires additional time for review. Failure of the Architect to provide notice within the 14-day period shall constitute notice of no reasonable objection.

§ 5.2.2 The Contractor shall not contract with a proposed person or entity to whom the Owner or Architect has made reasonable and timely objection. The Contractor shall not be required to contract with anyone to whom the Contractor has made reasonable objection.

§ 5.2.3 If the Owner or Architect has reasonable objection to a person or entity proposed by the Contractor, the Contractor shall propose another to whom the Owner or Architect has no reasonable objection. If the proposed but rejected Subcontractor was reasonably capable of performing the Work, the Contract Sum and Contract Time shall be increased or decreased by the difference, if any, occasioned by such change, and an appropriate Change Order shall be issued before commencement of the substitute Subcontractor's Work. However, no increase in the Contract Sum or Contract Time shall be allowed for such change unless the Contractor has acted promptly and responsively in submitting names as required.

§ 5.2.4 The Contractor shall not substitute a Subcontractor, person, or entity for one previously selected if the Owner or Architect makes reasonable objection to such substitution.

§ 5.3 Subcontractual Relations

By appropriate written agreement, the Contractor shall require each Subcontractor, to the extent of the Work to be performed by the Subcontractor, to be bound to the Contractor by terms of the Contract Documents, and to assume toward the Contractor all the obligations and responsibilities, including the responsibility for safety of the Subcontractor's Work that the Contractor, by these Contract Documents, assumes toward the Owner and Architect. Each subcontract agreement shall preserve and protect the rights of the Owner and Architect under the Contract Documents with respect to the Work to be performed by the Subcontractor so that subcontracting thereof will not prejudice such rights, and shall allow to the Subcontractor, unless specifically provided otherwise in the subcontract agreement, the benefit of all rights, remedies, and redress against the Contractor that the Contractor, by the Contract Documents, has against the Owner. Where appropriate, the Contractor shall require each Subcontractor to enter into similar agreements with Sub-subcontractors. The Contractor shall make available to each proposed Subcontractor, prior to the execution of the subcontract agreement, copies of the Contract Documents to which the Subcontractor will be bound, and, upon written request of the Subcontractor, identify to the Subcontractor terms and conditions of the proposed subcontract agreement that may be at variance with the Contract Documents. Subcontractors will similarly make copies of applicable portions of such documents available to their respective proposed Sub-subcontractors.

§ 5.4 Contingent Assignment of Subcontracts

§ 5.4.1 Each subcontract agreement for a portion of the Work is assigned by the Contractor to the Owner, provided that

.1 assignment is effective only after termination of the Contract by the Owner for cause pursuant to Section 14.2 and only for those subcontract agreements that the Owner accepts by notifying the Subcontractor and Contractor; and

.2 assignment is subject to the prior rights of the surety, if any, obligated under bond relating to the Contract.

When the Owner accepts the assignment of a subcontract agreement, the Owner assumes the Contractor's rights and obligations under the subcontract.

§ 5.4.2 Upon such assignment, if the Work has been suspended for more than 30 days, the Subcontractor's compensation shall be equitably adjusted for increases in cost resulting from the suspension.

§ 5.4.3 Upon assignment to the Owner under this Section 5.4, the Owner may further assign the subcontract to a successor contractor or other entity. If the Owner assigns the subcontract to a successor contractor or other entity, the Owner shall nevertheless remain legally responsible for all of the successor contractor's obligations under the subcontract.

ARTICLE 6 CONSTRUCTION BY OWNER OR BY SEPARATE CONTRACTORS

§ 6.1 Owner's Right to Perform Construction and to Award Separate Contracts

§ 6.1.1 The term "Separate Contractor(s)" shall mean other contractors retained by the Owner under separate agreements. The Owner reserves the right to perform construction or operations related to the Project with the Owner's own forces, and with Separate Contractors retained under Conditions of the Contract substantially similar to those of this Contract, including those provisions of the Conditions of the Contract related to insurance and waiver of subrogation.

§ 6.1.2 When separate contracts are awarded for different portions of the Project or other construction or operations on the site, the term "Contractor" in the Contract Documents in each case shall mean the Contractor who executes each separate Owner-Contractor Agreement.

§ 6.1.3 The Owner shall provide for coordination of the activities of the Owner's own forces and of each Separate Contractor with the Work of the Contractor, who shall cooperate with them. The Contractor shall participate with any Separate Contractors and the Owner in reviewing their construction schedules. The Contractor shall make any revisions to its construction schedule deemed necessary after a joint review and mutual agreement. The construction schedules shall then constitute the schedules to be used by the Contractor, Separate Contractors, and the Owner until subsequently revised.

§ 6.1.4 Unless otherwise provided in the Contract Documents, when the Owner performs construction or operations related to the Project with the Owner's own forces or with Separate Contractors, the Owner or its Separate Contractors shall have the same obligations and rights that the Contractor has under the Conditions of the Contract, including, without excluding others, those stated in Article 3, this Article 6, and Articles 10, 11, and 12.

§ 6.2 Mutual Responsibility

§ 6.2.1 The Contractor shall afford the Owner and Separate Contractors reasonable opportunity for introduction and storage of their materials and equipment and performance of their activities, and shall connect and coordinate the Contractor's construction and operations with theirs as required by the Contract Documents.

§ 6.2.2 If part of the Contractor's Work depends for proper execution or results upon construction or operations by the Owner or a Separate Contractor, the Contractor shall, prior to proceeding with that portion of the Work, promptly notify the Architect of apparent discrepancies or defects in the construction or operations by the Owner or Separate Contractor that would render it unsuitable for proper execution and results of the Contractor's Work. Failure of the Contractor to notify the Architect of apparent discrepancies or defects prior to proceeding with the Work shall constitute an acknowledgment that the Owner's or Separate Contractor's completed or partially completed construction is fit and proper to receive the Contractor's Work. The Contractor shall not be responsible for discrepancies or defects in the construction or operations by the Owner or Separate Contractor that are not apparent.

§ 6.2.3 The Contractor shall reimburse the Owner for costs the Owner incurs that are payable to a Separate Contractor because of the Contractor's delays, improperly timed activities or defective construction. The Owner shall be responsible to the Contractor for costs the Contractor incurs because of a Separate Contractor's delays, improperly timed activities, damage to the Work or defective construction.

§ 6.2.4 The Contractor shall promptly remedy damage that the Contractor wrongfully causes to completed or partially completed construction or to property of the Owner or Separate Contractor as provided in Section 10.2.5.

User Notes:
(1314219830)

§ 6.2.5 The Owner and each Separate Contractor shall have the same responsibilities for cutting and patching as are described for the Contractor in Section 3.14.

§ 6.3 Owner's Right to Clean Up

If a dispute arises among the Contractor, Separate Contractors, and the Owner as to the responsibility under their respective contracts for maintaining the premises and surrounding area free from waste materials and rubbish, the Owner may clean up and the Architect will allocate the cost among those responsible.

ARTICLE 7 CHANGES IN THE WORK

§ 7.1 General

§ 7.1.1 Changes in the Work may be accomplished after execution of the Contract, and without invalidating the Contract, by Change Order, Construction Change Directive or order for a minor change in the Work, subject to the limitations stated in this Article 7 and elsewhere in the Contract Documents.

§ 7.1.2 A Change Order shall be based upon agreement among the Owner, Contractor, and Architect. A Construction Change Directive requires agreement by the Owner and Architect and may or may not be agreed to by the Contractor. An order for a minor change in the Work may be issued by the Architect alone.

§ 7.1.3 Changes in the Work shall be performed under applicable provisions of the Contract Documents. The Contractor shall proceed promptly with changes in the Work, unless otherwise provided in the Change Order, Construction Change Directive, or order for a minor change in the Work.

§ 7.2 Change Orders

§ 7.2.1 A Change Order is a written instrument prepared by the Architect and signed by the Owner, Contractor, and Architect stating their agreement upon all of the following:

.1 The change in the Work;
.2 The amount of the adjustment, if any, in the Contract Sum; and
.3 The extent of the adjustment, if any, in the Contract Time.

§ 7.3 Construction Change Directives

§ 7.3.1 A Construction Change Directive is a written order prepared by the Architect and signed by the Owner and Architect, directing a change in the Work prior to agreement on adjustment, if any, in the Contract Sum or Contract Time, or both. The Owner may by Construction Change Directive, without invalidating the Contract, order changes in the Work within the general scope of the Contract consisting of additions, deletions, or other revisions, the Contract Sum and Contract Time being adjusted accordingly.

§ 7.3.2 A Construction Change Directive shall be used in the absence of total agreement on the terms of a Change Order.

§ 7.3.3 If the Construction Change Directive provides for an adjustment to the Contract Sum, the adjustment shall be based on one of the following methods:

.1 Mutual acceptance of a lump sum properly itemized and supported by sufficient substantiating data to permit evaluation;
.2 Unit prices stated in the Contract Documents or subsequently agreed upon;
.3 Cost to be determined in a manner agreed upon by the parties and a mutually acceptable fixed or percentage fee; or
.4 As provided in Section 7.3.4.

§ 7.3.4 If the Contractor does not respond promptly or disagrees with the method for adjustment in the Contract Sum, the Architect shall determine the adjustment on the basis of reasonable expenditures and savings of those performing the Work attributable to the change, including, in case of an increase in the Contract Sum, an amount for overhead and profit as set forth in the Agreement, or if no such amount is set forth in the Agreement, a reasonable amount. In such case, and also under Section 7.3.3.3, the Contractor shall keep and present, in such form as the Architect may prescribe, an itemized accounting together with appropriate supporting data. Unless otherwise provided in the Contract Documents, costs for the purposes of this Section 7.3.4 shall be limited to the following:

User Notes:
(1314219830)

.1 Costs of labor, including applicable payroll taxes, fringe benefits required by agreement or custom, workers' compensation insurance, and other employee costs approved by the Architect;
.2 Costs of materials, supplies, and equipment, including cost of transportation, whether incorporated or consumed;
.3 Rental costs of machinery and equipment, exclusive of hand tools, whether rented from the Contractor or others;
.4 Costs of premiums for all bonds and insurance, permit fees, and sales, use, or similar taxes, directly related to the change; and
.5 Costs of supervision and field office personnel directly attributable to the change.

§ 7.3.5 If the Contractor disagrees with the adjustment in the Contract Time, the Contractor may make a Claim in accordance with applicable provisions of Article 15.

§ 7.3.6 Upon receipt of a Construction Change Directive, the Contractor shall promptly proceed with the change in the Work involved and advise the Architect of the Contractor's agreement or disagreement with the method, if any, provided in the Construction Change Directive for determining the proposed adjustment in the Contract Sum or Contract Time.

§ 7.3.7 A Construction Change Directive signed by the Contractor indicates the Contractor's agreement therewith, including adjustment in Contract Sum and Contract Time or the method for determining them. Such agreement shall be effective immediately and shall be recorded as a Change Order.

§ 7.3.8 The amount of credit to be allowed by the Contractor to the Owner for a deletion or change that results in a net decrease in the Contract Sum shall be actual net cost as confirmed by the Architect. When both additions and credits covering related Work or substitutions are involved in a change, the allowance for overhead and profit shall be figured on the basis of net increase, if any, with respect to that change.

§ 7.3.9 Pending final determination of the total cost of a Construction Change Directive to the Owner, the Contractor may request payment for Work completed under the Construction Change Directive in Applications for Payment. The Architect will make an interim determination for purposes of monthly certification for payment for those costs and certify for payment the amount that the Architect determines, in the Architect's professional judgment, to be reasonably justified. The Architect's interim determination of cost shall adjust the Contract Sum on the same basis as a Change Order, subject to the right of either party to disagree and assert a Claim in accordance with Article 15.

§ 7.3.10 When the Owner and Contractor agree with a determination made by the Architect concerning the adjustments in the Contract Sum and Contract Time, or otherwise reach agreement upon the adjustments, such agreement shall be effective immediately and the Architect will prepare a Change Order. Change Orders may be issued for all or any part of a Construction Change Directive.

§ 7.4 Minor Changes in the Work

The Architect may order minor changes in the Work that are consistent with the intent of the Contract Documents and do not involve an adjustment in the Contract Sum or an extension of the Contract Time. The Architect's order for minor changes shall be in writing. If the Contractor believes that the proposed minor change in the Work will affect the Contract Sum or Contract Time, the Contractor shall notify the Architect and shall not proceed to implement the change in the Work. If the Contractor performs the Work set forth in the Architect's order for a minor change without prior notice to the Architect that such change will affect the Contract Sum or Contract Time, the Contractor waives any adjustment to the Contract Sum or extension of the Contract Time.

ARTICLE 8 TIME

§ 8.1 Definitions

§ 8.1.1 Unless otherwise provided, Contract Time is the period of time, including authorized adjustments, allotted in the Contract Documents for Substantial Completion of the Work.

§ 8.1.2 The date of commencement of the Work is the date established in the Agreement.

§ 8.1.3 The date of Substantial Completion is the date certified by the Architect in accordance with Section 9.8.

User Notes:
(1314219830)

§ 8.1.4 The term "day" as used in the Contract Documents shall mean calendar day unless otherwise specifically defined.

§ 8.2 Progress and Completion

§ 8.2.1 Time limits stated in the Contract Documents are of the essence of the Contract. By executing the Agreement, the Contractor confirms that the Contract Time is a reasonable period for performing the Work.

§ 8.2.2 The Contractor shall not knowingly, except by agreement or instruction of the Owner in writing, commence the Work prior to the effective date of insurance required to be furnished by the Contractor and Owner.

§ 8.2.3 The Contractor shall proceed expeditiously with adequate forces and shall achieve Substantial Completion within the Contract Time.

§ 8.3 Delays and Extensions of Time

§ 8.3.1 If the Contractor is delayed at any time in the commencement or progress of the Work by (1) an act or neglect of the Owner or Architect, of an employee of either, or of a Separate Contractor; (2) by changes ordered in the Work; (3) by labor disputes, fire, unusual delay in deliveries, unavoidable casualties, adverse weather conditions documented in accordance with Section 15.1.6.2, or other causes beyond the Contractor's control; (4) by delay authorized by the Owner pending mediation and binding dispute resolution; or (5) by other causes that the Contractor asserts, and the Architect determines, justify delay, then the Contract Time shall be extended for such reasonable time as the Architect may determine.

§ 8.3.2 Claims relating to time shall be made in accordance with applicable provisions of Article 15.

§ 8.3.3 This Section 8.3 does not preclude recovery of damages for delay by either party under other provisions of the Contract Documents.

ARTICLE 9 PAYMENTS AND COMPLETION

§ 9.1 Contract Sum

§ 9.1.1 The Contract Sum is stated in the Agreement and, including authorized adjustments, is the total amount payable by the Owner to the Contractor for performance of the Work under the Contract Documents.

§ 9.1.2 If unit prices are stated in the Contract Documents or subsequently agreed upon, and if quantities originally contemplated are materially changed so that application of such unit prices to the actual quantities causes substantial inequity to the Owner or Contractor, the applicable unit prices shall be equitably adjusted.

§ 9.2 Schedule of Values

Where the Contract is based on a stipulated sum or Guaranteed Maximum Price, the Contractor shall submit a schedule of values to the Architect before the first Application for Payment, allocating the entire Contract Sum to the various portions of the Work. The schedule of values shall be prepared in the form, and supported by the data to substantiate its accuracy, required by the Architect. This schedule, unless objected to by the Architect, shall be used as a basis for reviewing the Contractor's Applications for Payment. Any changes to the schedule of values shall be submitted to the Architect and supported by such data to substantiate its accuracy as the Architect may require, and unless objected to by the Architect, shall be used as a basis for reviewing the Contractor's subsequent Applications for Payment.

§ 9.3 Applications for Payment

§ 9.3.1 At least ten days before the date established for each progress payment, the Contractor shall submit to the Architect an itemized Application for Payment prepared in accordance with the schedule of values, if required under Section 9.2, for completed portions of the Work. The application shall be notarized, if required, and supported by all data substantiating the Contractor's right to payment that the Owner or Architect require, such as copies of requisitions, and releases and waivers of liens from Subcontractors and suppliers, and shall reflect retainage if provided for in the Contract Documents.

§ 9.3.1.1 As provided in Section 7.3.9, such applications may include requests for payment on account of changes in the Work that have been properly authorized by Construction Change Directives, or by interim determinations of the Architect, but not yet included in Change Orders.

User Notes:

§ 9.3.1.2 Applications for Payment shall not include requests for payment for portions of the Work for which the Contractor does not intend to pay a Subcontractor or supplier, unless such Work has been performed by others whom the Contractor intends to pay.

§ 9.3.2 Unless otherwise provided in the Contract Documents, payments shall be made on account of materials and equipment delivered and suitably stored at the site for subsequent incorporation in the Work. If approved in advance by the Owner, payment may similarly be made for materials and equipment suitably stored off the site at a location agreed upon in writing. Payment for materials and equipment stored on or off the site shall be conditioned upon compliance by the Contractor with procedures satisfactory to the Owner to establish the Owner's title to such materials and equipment or otherwise protect the Owner's interest, and shall include the costs of applicable insurance, storage, and transportation to the site, for such materials and equipment stored off the site.

§ 9.3.3 The Contractor warrants that title to all Work covered by an Application for Payment will pass to the Owner no later than the time of payment. The Contractor further warrants that upon submittal of an Application for Payment all Work for which Certificates for Payment have been previously issued and payments received from the Owner shall, to the best of the Contractor's knowledge, information, and belief, be free and clear of liens, claims, security interests, or encumbrances, in favor of the Contractor, Subcontractors, suppliers, or other persons or entities that provided labor, materials, and equipment relating to the Work.

§ 9.4 Certificates for Payment

§ 9.4.1 The Architect will, within seven days after receipt of the Contractor's Application for Payment, either (1) issue to the Owner a Certificate for Payment in the full amount of the Application for Payment, with a copy to the Contractor; or (2) issue to the Owner a Certificate for Payment for such amount as the Architect determines is properly due, and notify the Contractor and Owner of the Architect's reasons for withholding certification in part as provided in Section 9.5.1; or (3) withhold certification of the entire Application for Payment, and notify the Contractor and Owner of the Architect's reason for withholding certification in whole as provided in Section 9.5.1.

§ 9.4.2 The issuance of a Certificate for Payment will constitute a representation by the Architect to the Owner, based on the Architect's evaluation of the Work and the data in the Application for Payment, that, to the best of the Architect's knowledge, information, and belief, the Work has progressed to the point indicated, the quality of the Work is in accordance with the Contract Documents, and that the Contractor is entitled to payment in the amount certified. The foregoing representations are subject to an evaluation of the Work for conformance with the Contract Documents upon Substantial Completion, to results of subsequent tests and inspections, to correction of minor deviations from the Contract Documents prior to completion, and to specific qualifications expressed by the Architect. However, the issuance of a Certificate for Payment will not be a representation that the Architect has (1) made exhaustive or continuous on-site inspections to check the quality or quantity of the Work; (2) reviewed construction means, methods, techniques, sequences, or procedures; (3) reviewed copies of requisitions received from Subcontractors and suppliers and other data requested by the Owner to substantiate the Contractor's right to payment; or (4) made examination to ascertain how or for what purpose the Contractor has used money previously paid on account of the Contract Sum.

§ 9.5 Decisions to Withhold Certification

§ 9.5.1 The Architect may withhold a Certificate for Payment in whole or in part, to the extent reasonably necessary to protect the Owner, if in the Architect's opinion the representations to the Owner required by Section 9.4.2 cannot be made. If the Architect is unable to certify payment in the amount of the Application, the Architect will notify the Contractor and Owner as provided in Section 9.4.1. If the Contractor and Architect cannot agree on a revised amount, the Architect will promptly issue a Certificate for Payment for the amount for which the Architect is able to make such representations to the Owner. The Architect may also withhold a Certificate for Payment or, because of subsequently discovered evidence, may nullify the whole or a part of a Certificate for Payment previously issued, to such extent as may be necessary in the Architect's opinion to protect the Owner from loss for which the Contractor is responsible, including loss resulting from acts and omissions described in Section 3.3.2, because of

.1 defective Work not remedied;

.2 third party claims filed or reasonable evidence indicating probable filing of such claims, unless security acceptable to the Owner is provided by the Contractor;

.3 failure of the Contractor to make payments properly to Subcontractors or suppliers for labor, materials or equipment;

AIA Document A201™ – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017 by The American Institute of Architects. All rights reserved. WARNING: This AIA® Document is protected by U.S. Copyright Law and International Treaties. User Notes:
(1314219830)

.4 reasonable evidence that the Work cannot be completed for the unpaid balance of the Contract Sum;
.5 damage to the Owner or a Separate Contractor;
.6 reasonable evidence that the Work will not be completed within the Contract Time, and that the unpaid balance would not be adequate to cover actual or liquidated damages for the anticipated delay; or
.7 repeated failure to carry out the Work in accordance with the Contract Documents.

§ 9.5.2 When either party disputes the Architect's decision regarding a Certificate for Payment under Section 9.5.1, in whole or in part, that party may submit a Claim in accordance with Article 15.

§ 9.5.3 When the reasons for withholding certification are removed, certification will be made for amounts previously withheld.

§ 9.5.4 If the Architect withholds certification for payment under Section 9.5.1.3, the Owner may, at its sole option, issue joint checks to the Contractor and to any Subcontractor or supplier to whom the Contractor failed to make payment for Work properly performed or material or equipment suitably delivered. If the Owner makes payments by joint check, the Owner shall notify the Architect and the Contractor shall reflect such payment on its next Application for Payment.

§ 9.6 Progress Payments

§ 9.6.1 After the Architect has issued a Certificate for Payment, the Owner shall make payment in the manner and within the time provided in the Contract Documents, and shall so notify the Architect.

§ 9.6.2 The Contractor shall pay each Subcontractor, no later than seven days after receipt of payment from the Owner, the amount to which the Subcontractor is entitled, reflecting percentages actually retained from payments to the Contractor on account of the Subcontractor's portion of the Work. The Contractor shall, by appropriate agreement with each Subcontractor, require each Subcontractor to make payments to Sub-subcontractors in a similar manner.

§ 9.6.3 The Architect will, on request, furnish to a Subcontractor, if practicable, information regarding percentages of completion or amounts applied for by the Contractor and action taken thereon by the Architect and Owner on account of portions of the Work done by such Subcontractor.

§ 9.6.4 The Owner has the right to request written evidence from the Contractor that the Contractor has properly paid Subcontractors and suppliers amounts paid by the Owner to the Contractor for subcontracted Work. If the Contractor fails to furnish such evidence within seven days, the Owner shall have the right to contact Subcontractors and suppliers to ascertain whether they have been properly paid. Neither the Owner nor Architect shall have an obligation to pay, or to see to the payment of money to, a Subcontractor or supplier, except as may otherwise be required by law.

§ 9.6.5 The Contractor's payments to suppliers shall be treated in a manner similar to that provided in Sections 9.6.2, 9.6.3 and 9.6.4.

§ 9.6.6 A Certificate for Payment, a progress payment, or partial or entire use or occupancy of the Project by the Owner shall not constitute acceptance of Work not in accordance with the Contract Documents.

§ 9.6.7 Unless the Contractor provides the Owner with a payment bond in the full penal sum of the Contract Sum, payments received by the Contractor for Work properly performed by Subcontractors or provided by suppliers shall be held by the Contractor for those Subcontractors or suppliers who performed Work or furnished materials, or both, under contract with the Contractor for which payment was made by the Owner. Nothing contained herein shall require money to be placed in a separate account and not commingled with money of the Contractor, create any fiduciary liability or tort liability on the part of the Contractor for breach of trust, or entitle any person or entity to an award of punitive damages against the Contractor for breach of the requirements of this provision.

§ 9.6.8 Provided the Owner has fulfilled its payment obligations under the Contract Documents, the Contractor shall defend and indemnify the Owner from all loss, liability, damage or expense, including reasonable attorney's fees and litigation expenses, arising out of any lien claim or other claim for payment by any Subcontractor or supplier of any tier. Upon receipt of notice of a lien claim or other claim for payment, the Owner shall notify the Contractor. If approved by the applicable court, when required, the Contractor may substitute a surety bond for the property against which the lien or other claim for payment has been asserted.

User Notes:
(1314219830)

§ 9.7 Failure of Payment

If the Architect does not issue a Certificate for Payment, through no fault of the Contractor, within seven days after receipt of the Contractor's Application for Payment, or if the Owner does not pay the Contractor within seven days after the date established in the Contract Documents, the amount certified by the Architect or awarded by binding dispute resolution, then the Contractor may, upon seven additional days' notice to the Owner and Architect, stop the Work until payment of the amount owing has been received. The Contract Time shall be extended appropriately and the Contract Sum shall be increased by the amount of the Contractor's reasonable costs of shutdown, delay and start-up, plus interest as provided for in the Contract Documents.

§ 9.8 Substantial Completion

§ 9.8.1 Substantial Completion is the stage in the progress of the Work when the Work or designated portion thereof is sufficiently complete in accordance with the Contract Documents so that the Owner can occupy or utilize the Work for its intended use.

§ 9.8.2 When the Contractor considers that the Work, or a portion thereof which the Owner agrees to accept separately, is substantially complete, the Contractor shall prepare and submit to the Architect a comprehensive list of items to be completed or corrected prior to final payment. Failure to include an item on such list does not alter the responsibility of the Contractor to complete all Work in accordance with the Contract Documents.

§ 9.8.3 Upon receipt of the Contractor's list, the Architect will make an inspection to determine whether the Work or designated portion thereof is substantially complete. If the Architect's inspection discloses any item, whether or not included on the Contractor's list, which is not sufficiently complete in accordance with the Contract Documents so that the Owner can occupy or utilize the Work or designated portion thereof for its intended use, the Contractor shall, before issuance of the Certificate of Substantial Completion, complete or correct such item upon notification by the Architect. In such case, the Contractor shall then submit a request for another inspection by the Architect to determine Substantial Completion.

§ 9.8.4 When the Work or designated portion thereof is substantially complete, the Architect will prepare a Certificate of Substantial Completion that shall establish the date of Substantial Completion; establish responsibilities of the Owner and Contractor for security, maintenance, heat, utilities, damage to the Work and insurance; and fix the time within which the Contractor shall finish all items on the list accompanying the Certificate. Warranties required by the Contract Documents shall commence on the date of Substantial Completion of the Work or designated portion thereof unless otherwise provided in the Certificate of Substantial Completion.

§ 9.8.5 The Certificate of Substantial Completion shall be submitted to the Owner and Contractor for their written acceptance of responsibilities assigned to them in the Certificate. Upon such acceptance, and consent of surety if any, the Owner shall make payment of retainage applying to the Work or designated portion thereof. Such payment shall be adjusted for Work that is incomplete or not in accordance with the requirements of the Contract Documents.

§ 9.9 Partial Occupancy or Use

§ 9.9.1 The Owner may occupy or use any completed or partially completed portion of the Work at any stage when such portion is designated by separate agreement with the Contractor, provided such occupancy or use is consented to by the insurer and authorized by public authorities having jurisdiction over the Project. Such partial occupancy or use may commence whether or not the portion is substantially complete, provided the Owner and Contractor have accepted in writing the responsibilities assigned to each of them for payments, retainage, if any, security, maintenance, heat, utilities, damage to the Work and insurance, and have agreed in writing concerning the period for correction of the Work and commencement of warranties required by the Contract Documents. When the Contractor considers a portion substantially complete, the Contractor shall prepare and submit a list to the Architect as provided under Section 9.8.2. Consent of the Contractor to partial occupancy or use shall not be unreasonably withheld. The stage of the progress of the Work shall be determined by written agreement between the Owner and Contractor or, if no agreement is reached, by decision of the Architect.

§ 9.9.2 Immediately prior to such partial occupancy or use, the Owner, Contractor, and Architect shall jointly inspect the area to be occupied or portion of the Work to be used in order to determine and record the condition of the Work.

§ 9.9.3 Unless otherwise agreed upon, partial occupancy or use of a portion or portions of the Work shall not constitute acceptance of Work not complying with the requirements of the Contract Documents.

§ 9.10 Final Completion and Final Payment

§ 9.10.1 Upon receipt of the Contractor's notice that the Work is ready for final inspection and acceptance and upon receipt of a final Application for Payment, the Architect will promptly make such inspection. When the Architect finds the Work acceptable under the Contract Documents and the Contract fully performed, the Architect will promptly issue a final Certificate for Payment stating that to the best of the Architect's knowledge, information and belief, and on the basis of the Architect's on-site visits and inspections, the Work has been completed in accordance with the Contract Documents and that the entire balance found to be due the Contractor and noted in the final Certificate is due and payable. The Architect's final Certificate for Payment will constitute a further representation that conditions listed in Section 9.10.2 as precedent to the Contractor's being entitled to final payment have been fulfilled.

§ 9.10.2 Neither final payment nor any remaining retained percentage shall become due until the Contractor submits to the Architect (1) an affidavit that payrolls, bills for materials and equipment, and other indebtedness connected with the Work for which the Owner or the Owner's property might be responsible or encumbered (less amounts withheld by Owner) have been paid or otherwise satisfied, (2) a certificate evidencing that insurance required by the Contract Documents to remain in force after final payment is currently in effect, (3) a written statement that the Contractor knows of no reason that the insurance will not be renewable to cover the period required by the Contract Documents, (4) consent of surety, if any, to final payment, (5) documentation of any special warranties, such as manufacturers' warranties or specific Subcontractor warranties, and (6) if required by the Owner, other data establishing payment or satisfaction of obligations, such as receipts and releases and waivers of liens, claims, security interests, or encumbrances arising out of the Contract, to the extent and in such form as may be designated by the Owner. If a Subcontractor refuses to furnish a release or waiver required by the Owner, the Contractor may furnish a bond satisfactory to the Owner to indemnify the Owner against such lien, claim, security interest, or encumbrance. If a lien, claim, security interest, or encumbrance remains unsatisfied after payments are made, the Contractor shall refund to the Owner all money that the Owner may be compelled to pay in discharging the lien, claim, security interest, or encumbrance, including all costs and reasonable attorneys' fees.

§ 9.10.3 If, after Substantial Completion of the Work, final completion thereof is materially delayed through no fault of the Contractor or by issuance of Change Orders affecting final completion, and the Architect so confirms, the Owner shall, upon application by the Contractor and certification by the Architect, and without terminating the Contract, make payment of the balance due for that portion of the Work fully completed, corrected, and accepted. If the remaining balance for Work not fully completed or corrected is less than retainage stipulated in the Contract Documents, and if bonds have been furnished, the written consent of the surety to payment of the balance due for that portion of the Work fully completed and accepted shall be submitted by the Contractor to the Architect prior to certification of such payment. Such payment shall be made under terms and conditions governing final payment, except that it shall not constitute a waiver of Claims.

§ 9.10.4 The making of final payment shall constitute a waiver of Claims by the Owner except those arising from

.1 liens, Claims, security interests, or encumbrances arising out of the Contract and unsettled;
.2 failure of the Work to comply with the requirements of the Contract Documents;
.3 terms of special warranties required by the Contract Documents; or
.4 audits performed by the Owner, if permitted by the Contract Documents, after final payment.

§ 9.10.5 Acceptance of final payment by the Contractor, a Subcontractor, or a supplier, shall constitute a waiver of claims by that payee except those previously made in writing and identified by that payee as unsettled at the time of final Application for Payment.

ARTICLE 10 PROTECTION OF PERSONS AND PROPERTY

§ 10.1 Safety Precautions and Programs

The Contractor shall be responsible for initiating, maintaining, and supervising all safety precautions and programs in connection with the performance of the Contract.

§ 10.2 Safety of Persons and Property

§ 10.2.1 The Contractor shall take reasonable precautions for safety of, and shall provide reasonable protection to prevent damage, injury, or loss to

User Notes:
(1314219830)

.1 employees on the Work and other persons who may be affected thereby;
.2 the Work and materials and equipment to be incorporated therein, whether in storage on or off the site, under care, custody, or control of the Contractor, a Subcontractor, or a Sub-subcontractor; and
.3 other property at the site or adjacent thereto, such as trees, shrubs, lawns, walks, pavements, roadways, structures, and utilities not designated for removal, relocation, or replacement in the course of construction.

§ 10.2.2 The Contractor shall comply with, and give notices required by applicable laws, statutes, ordinances, codes, rules and regulations, and lawful orders of public authorities, bearing on safety of persons or property or their protection from damage, injury, or loss.

§ 10.2.3 The Contractor shall implement, erect, and maintain, as required by existing conditions and performance of the Contract, reasonable safeguards for safety and protection, including posting danger signs and other warnings against hazards; promulgating safety regulations; and notifying the owners and users of adjacent sites and utilities of the safeguards.

§ 10.2.4 When use or storage of explosives or other hazardous materials or equipment, or unusual methods are necessary for execution of the Work, the Contractor shall exercise utmost care and carry on such activities under supervision of properly qualified personnel.

§ 10.2.5 The Contractor shall promptly remedy damage and loss (other than damage or loss insured under property insurance required by the Contract Documents) to property referred to in Sections 10.2.1.2 and 10.2.1.3 caused in whole or in part by the Contractor, a Subcontractor, a Sub-subcontractor, or anyone directly or indirectly employed by any of them, or by anyone for whose acts they may be liable and for which the Contractor is responsible under Sections 10.2.1.2 and 10.2.1.3. The Contractor may make a Claim for the cost to remedy the damage or loss to the extent such damage or loss is attributable to acts or omissions of the Owner or Architect or anyone directly or indirectly employed by either of them, or by anyone for whose acts either of them may be liable, and not attributable to the fault or negligence of the Contractor. The foregoing obligations of the Contractor are in addition to the Contractor's obligations under Section 3.18.

§ 10.2.6 The Contractor shall designate a responsible member of the Contractor's organization at the site whose duty shall be the prevention of accidents. This person shall be the Contractor's superintendent unless otherwise designated by the Contractor in writing to the Owner and Architect.

§ 10.2.7 The Contractor shall not permit any part of the construction or site to be loaded so as to cause damage or create an unsafe condition.

§ 10.2.8 Injury or Damage to Person or Property
If either party suffers injury or damage to person or property because of an act or omission of the other party, or of others for whose acts such party is legally responsible, notice of the injury or damage, whether or not insured, shall be given to the other party within a reasonable time not exceeding 21 days after discovery. The notice shall provide sufficient detail to enable the other party to investigate the matter.

§ 10.3 Hazardous Materials and Substances
§ 10.3.1 The Contractor is responsible for compliance with any requirements included in the Contract Documents regarding hazardous materials or substances. If the Contractor encounters a hazardous material or substance not addressed in the Contract Documents and if reasonable precautions will be inadequate to prevent foreseeable bodily injury or death to persons resulting from a material or substance, including but not limited to asbestos or polychlorinated biphenyl (PCB), encountered on the site by the Contractor, the Contractor shall, upon recognizing the condition, immediately stop Work in the affected area and notify the Owner and Architect of the condition.

§ 10.3.2 Upon receipt of the Contractor's notice, the Owner shall obtain the services of a licensed laboratory to verify the presence or absence of the material or substance reported by the Contractor and, in the event such material or substance is found to be present, to cause it to be rendered harmless. Unless otherwise required by the Contract Documents, the Owner shall furnish in writing to the Contractor and Architect the names and qualifications of persons or entities who are to perform tests verifying the presence or absence of the material or substance or who are to perform the task of removal or safe containment of the material or substance. The Contractor and the Architect will

User Notes:

promptly reply to the Owner in writing stating whether or not either has reasonable objection to the persons or entities proposed by the Owner. If either the Contractor or Architect has an objection to a person or entity proposed by the Owner, the Owner shall propose another to whom the Contractor and the Architect have no reasonable objection. When the material or substance has been rendered harmless, Work in the affected area shall resume upon written agreement of the Owner and Contractor. By Change Order, the Contract Time shall be extended appropriately and the Contract Sum shall be increased by the amount of the Contractor's reasonable additional costs of shutdown, delay, and start-up.

§ 10.3.3 To the fullest extent permitted by law, the Owner shall indemnify and hold harmless the Contractor, Subcontractors, Architect, Architect's consultants, and agents and employees of any of them from and against claims, damages, losses, and expenses, including but not limited to attorneys' fees, arising out of or resulting from performance of the Work in the affected area if in fact the material or substance presents the risk of bodily injury or death as described in Section 10.3.1 and has not been rendered harmless, provided that such claim, damage, loss, or expense is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself), except to the extent that such damage, loss, or expense is due to the fault or negligence of the party seeking indemnity.

§ 10.3.4 The Owner shall not be responsible under this Section 10.3 for hazardous materials or substances the Contractor brings to the site unless such materials or substances are required by the Contract Documents. The Owner shall be responsible for hazardous materials or substances required by the Contract Documents, except to the extent of the Contractor's fault or negligence in the use and handling of such materials or substances.

§ 10.3.5 The Contractor shall reimburse the Owner for the cost and expense the Owner incurs (1) for remediation of hazardous materials or substances the Contractor brings to the site and negligently handles, or (2) where the Contractor fails to perform its obligations under Section 10.3.1, except to the extent that the cost and expense are due to the Owner's fault or negligence.

§ 10.3.6 If, without negligence on the part of the Contractor, the Contractor is held liable by a government agency for the cost of remediation of a hazardous material or substance solely by reason of performing Work as required by the Contract Documents, the Owner shall reimburse the Contractor for all cost and expense thereby incurred.

§ 10.4 Emergencies

In an emergency affecting safety of persons or property, the Contractor shall act, at the Contractor's discretion, to prevent threatened damage, injury, or loss. Additional compensation or extension of time claimed by the Contractor on account of an emergency shall be determined as provided in Article 15 and Article 7.

ARTICLE 11 INSURANCE AND BONDS

§ 11.1 Contractor's Insurance and Bonds

§ 11.1.1 The Contractor shall purchase and maintain insurance of the types and limits of liability, containing the endorsements, and subject to the terms and conditions, as described in the Agreement or elsewhere in the Contract Documents. The Contractor shall purchase and maintain the required insurance from an insurance company or insurance companies lawfully authorized to issue insurance in the jurisdiction where the Project is located. The Owner, Architect, and Architect's consultants shall be named as additional insureds under the Contractor's commercial general liability policy or as otherwise described in the Contract Documents.

§ 11.1.2 The Contractor shall provide surety bonds of the types, for such penal sums, and subject to such terms and conditions as required by the Contract Documents. The Contractor shall purchase and maintain the required bonds from a company or companies lawfully authorized to issue surety bonds in the jurisdiction where the Project is located.

§ 11.1.3 Upon the request of any person or entity appearing to be a potential beneficiary of bonds covering payment of obligations arising under the Contract, the Contractor shall promptly furnish a copy of the bonds or shall authorize a copy to be furnished.

§ 11.1.4 Notice of Cancellation or Expiration of Contractor's Required Insurance. Within three (3) business days of the date the Contractor becomes aware of an impending or actual cancellation or expiration of any insurance required by the Contract Documents, the Contractor shall provide notice to the Owner of such impending or actual cancellation or

AIA Document A201™ – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017 by The American Institute of Architects. All rights reserved. WARNING: This AIA® Document is protected by U.S. Copyright Law and International Treaties. This document was produced by AIA software at 10:34:06 ET on 12/20/2019 under Order No.4566032601 which expires on 04/04/2020, and is not for resale.
User Notes:
(1314219830)

expiration. Upon receipt of notice from the Contractor, the Owner shall, unless the lapse in coverage arises from an act or omission of the Owner, have the right to stop the Work until the lapse in coverage has been cured by the procurement of replacement coverage by the Contractor. The furnishing of notice by the Contractor shall not relieve the Contractor of any contractual obligation to provide any required coverage.

§ 11.2 Owner's Insurance

§ 11.2.1 The Owner shall purchase and maintain insurance of the types and limits of liability, containing the endorsements, and subject to the terms and conditions, as described in the Agreement or elsewhere in the Contract Documents. The Owner shall purchase and maintain the required insurance from an insurance company or insurance companies lawfully authorized to issue insurance in the jurisdiction where the Project is located.

§ 11.2.2 Failure to Purchase Required Property Insurance. If the Owner fails to purchase and maintain the required property insurance, with all of the coverages and in the amounts described in the Agreement or elsewhere in the Contract Documents, the Owner shall inform the Contractor in writing prior to commencement of the Work. Upon receipt of notice from the Owner, the Contractor may delay commencement of the Work and may obtain insurance that will protect the interests of the Contractor, Subcontractors, and Sub-Subcontractors in the Work. When the failure to provide coverage has been cured or resolved, the Contract Sum and Contract Time shall be equitably adjusted. In the event the Owner fails to procure coverage, the Owner waives all rights against the Contractor, Subcontractors, and Sub-subcontractors to the extent the loss to the Owner would have been covered by the insurance to have been procured by the Owner. The cost of the insurance shall be charged to the Owner by a Change Order. If the Owner does not provide written notice, and the Contractor is damaged by the failure or neglect of the Owner to purchase or maintain the required insurance, the Owner shall reimburse the Contractor for all reasonable costs and damages attributable thereto.

§ 11.2.3 Notice of Cancellation or Expiration of Owner's Required Property Insurance. Within three (3) business days of the date the Owner becomes aware of an impending or actual cancellation or expiration of any property insurance required by the Contract Documents, the Owner shall provide notice to the Contractor of such impending or actual cancellation or expiration. Unless the lapse in coverage arises from an act or omission of the Contractor: (1) the Contractor, upon receipt of notice from the Owner, shall have the right to stop the Work until the lapse in coverage has been cured by the procurement of replacement coverage by either the Owner or the Contractor; (2) the Contract Time and Contract Sum shall be equitably adjusted; and (3) the Owner waives all rights against the Contractor, Subcontractors, and Sub-subcontractors to the extent any loss to the Owner would have been covered by the insurance had it not expired or been cancelled. If the Contractor purchases replacement coverage, the cost of the insurance shall be charged to the Owner by an appropriate Change Order. The furnishing of notice by the Owner shall not relieve the Owner of any contractual obligation to provide required insurance.

§ 11.3 Waivers of Subrogation

§ 11.3.1 The Owner and Contractor waive all rights against (1) each other and any of their subcontractors, sub-subcontractors, agents, and employees, each of the other; (2) the Architect and Architect's consultants; and (3) Separate Contractors, if any, and any of their subcontractors, sub-subcontractors, agents, and employees, for damages caused by fire, or other causes of loss, to the extent those losses are covered by property insurance required by the Agreement or other property insurance applicable to the Project, except such rights as they have to proceeds of such insurance. The Owner or Contractor, as appropriate, shall require similar written waivers in favor of the individuals and entities identified above from the Architect, Architect's consultants, Separate Contractors, subcontractors, and sub-subcontractors. The policies of insurance purchased and maintained by each person or entity agreeing to waive claims pursuant to this section 11.3.1 shall not prohibit this waiver of subrogation. This waiver of subrogation shall be effective as to a person or entity (1) even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, (2) even though that person or entity did not pay the insurance premium directly or indirectly, or (3) whether or not the person or entity had an insurable interest in the damaged property.

§ 11.3.2 If during the Project construction period the Owner insures properties, real or personal or both, at or adjacent to the site by property insurance under policies separate from those insuring the Project, or if after final payment property insurance is to be provided on the completed Project through a policy or policies other than those insuring the Project during the construction period, to the extent permissible by such policies, the Owner waives all rights in accordance with the terms of Section 11.3.1 for damages caused by fire or other causes of loss covered by this separate property insurance.

User Notes:
(1314219830)

§ 11.4 Loss of Use, Business Interruption, and Delay in Completion Insurance
The Owner, at the Owner's option, may purchase and maintain insurance that will protect the Owner against loss of use of the Owner's property, or the inability to conduct normal operations, due to fire or other causes of loss. The Owner waives all rights of action against the Contractor and Architect for loss of use of the Owner's property, due to fire or other hazards however caused.

§11.5 Adjustment and Settlement of Insured Loss
§ 11.5.1 A loss insured under the property insurance required by the Agreement shall be adjusted by the Owner as fiduciary and made payable to the Owner as fiduciary for the insureds, as their interests may appear, subject to requirements of any applicable mortgagee clause and of Section 11.5.2. The Owner shall pay the Architect and Contractor their just shares of insurance proceeds received by the Owner, and by appropriate agreements the Architect and Contractor shall make payments to their consultants and Subcontractors in similar manner.

§ 11.5.2 Prior to settlement of an insured loss, the Owner shall notify the Contractor of the terms of the proposed settlement as well as the proposed allocation of the insurance proceeds. The Contractor shall have 14 days from receipt of notice to object to the proposed settlement or allocation of the proceeds. If the Contractor does not object, the Owner shall settle the loss and the Contractor shall be bound by the settlement and allocation. Upon receipt, the Owner shall deposit the insurance proceeds in a separate account and make the appropriate distributions. Thereafter, if no other agreement is made or the Owner does not terminate the Contract for convenience, the Owner and Contractor shall execute a Change Order for reconstruction of the damaged or destroyed Work in the amount allocated for that purpose. If the Contractor timely objects to either the terms of the proposed settlement or the allocation of the proceeds, the Owner may proceed to settle the insured loss, and any dispute between the Owner and Contractor arising out of the settlement or allocation of the proceeds shall be resolved pursuant to Article 15. Pending resolution of any dispute, the Owner may issue a Construction Change Directive for the reconstruction of the damaged or destroyed Work.

ARTICLE 12 UNCOVERING AND CORRECTION OF WORK

§ 12.1 Uncovering of Work
§ 12.1.1 If a portion of the Work is covered contrary to the Architect's request or to requirements specifically expressed in the Contract Documents, it must, if requested in writing by the Architect, be uncovered for the Architect's examination and be replaced at the Contractor's expense without change in the Contract Time.

§ 12.1.2 If a portion of the Work has been covered that the Architect has not specifically requested to examine prior to its being covered, the Architect may request to see such Work and it shall be uncovered by the Contractor. If such Work is in accordance with the Contract Documents, the Contractor shall be entitled to an equitable adjustment to the Contract Sum and Contract Time as may be appropriate. If such Work is not in accordance with the Contract Documents, the costs of uncovering the Work, and the cost of correction, shall be at the Contractor's expense.

§ 12.2 Correction of Work
§ 12.2.1 Before Substantial Completion
The Contractor shall promptly correct Work rejected by the Architect or failing to conform to the requirements of the Contract Documents, discovered before Substantial Completion and whether or not fabricated, installed or completed. Costs of correcting such rejected Work, including additional testing and inspections, the cost of uncovering and replacement, and compensation for the Architect's services and expenses made necessary thereby, shall be at the Contractor's expense.

§ 12.2.2 After Substantial Completion
§ 12.2.2.1 In addition to the Contractor's obligations under Section 3.5, if, within one year after the date of Substantial Completion of the Work or designated portion thereof or after the date for commencement of warranties established under Section 9.9.1, or by terms of any applicable special warranty required by the Contract Documents, any of the Work is found to be not in accordance with the requirements of the Contract Documents, the Contractor shall correct it promptly after receipt of notice from the Owner to do so, unless the Owner has previously given the Contractor a written acceptance of such condition. The Owner shall give such notice promptly after discovery of the condition. During the one-year period for correction of Work, if the Owner fails to notify the Contractor and give the Contractor an opportunity to make the correction, the Owner waives the rights to require correction by the Contractor and to make a claim for breach of warranty. If the Contractor fails to correct nonconforming Work within a reasonable time during

AIA Document A201™ – 2017. Copyright © 1911, 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1966, 1970, 1976, 1987, 1997, 2007 and 2017 by The American Institute of Architects. All rights reserved. WARNING: This AIA® Document is protected by U.S. Copyright Law and International Treaties. Unauthorized reproduction or distribution of this AIA® Document, or any portion of it, may result in severe civil and criminal penalties, and will be prosecuted to the maximum extent possible under the law. This document was produced by AIA software at 10:34:06 ET on 12/20/2019 under Order No.4568032601 which expires on 04/04/2020, and is not for resale.
User Notes:
(1314219830)

that period after receipt of notice from the Owner or Architect, the Owner may correct it in accordance with Section 2.5.

§ 12.2.2.2 The one-year period for correction of Work shall be extended with respect to portions of Work first performed after Substantial Completion by the period of time between Substantial Completion and the actual completion of that portion of the Work.

§ 12.2.2.3 The one-year period for correction of Work shall not be extended by corrective Work performed by the Contractor pursuant to this Section 12.2.

§ 12.2.3 The Contractor shall remove from the site portions of the Work that are not in accordance with the requirements of the Contract Documents and are neither corrected by the Contractor nor accepted by the Owner.

§ 12.2.4 The Contractor shall bear the cost of correcting destroyed or damaged construction of the Owner or Separate Contractors, whether completed or partially completed, caused by the Contractor's correction or removal of Work that is not in accordance with the requirements of the Contract Documents.

§ 12.2.5 Nothing contained in this Section 12.2 shall be construed to establish a period of limitation with respect to other obligations the Contractor has under the Contract Documents. Establishment of the one-year period for correction of Work as described in Section 12.2.2 relates only to the specific obligation of the Contractor to correct the Work, and has no relationship to the time within which the obligation to comply with the Contract Documents may be sought to be enforced, nor to the time within which proceedings may be commenced to establish the Contractor's liability with respect to the Contractor's obligations other than specifically to correct the Work.

§ 12.3 Acceptance of Nonconforming Work

If the Owner prefers to accept Work that is not in accordance with the requirements of the Contract Documents, the Owner may do so instead of requiring its removal and correction, in which case the Contract Sum will be reduced as appropriate and equitable. Such adjustment shall be effected whether or not final payment has been made.

ARTICLE 13 MISCELLANEOUS PROVISIONS

§ 13.1 Governing Law

The Contract shall be governed by the law of the place where the Project is located, excluding that jurisdiction's choice of law rules. If the parties have selected arbitration as the method of binding dispute resolution, the Federal Arbitration Act shall govern Section 15.4.

§ 13.2 Successors and Assigns

§ 13.2.1 The Owner and Contractor respectively bind themselves, their partners, successors, assigns, and legal representatives to covenants, agreements, and obligations contained in the Contract Documents. Except as provided in Section 13.2.2, neither party to the Contract shall assign the Contract as a whole without written consent of the other. If either party attempts to make an assignment without such consent, that party shall nevertheless remain legally responsible for all obligations under the Contract.

§ 13.2.2 The Owner may, without consent of the Contractor, assign the Contract to a lender providing construction financing for the Project, if the lender assumes the Owner's rights and obligations under the Contract Documents. The Contractor shall execute all consents reasonably required to facilitate the assignment.

§ 13.3 Rights and Remedies

§ 13.3.1 Duties and obligations imposed by the Contract Documents and rights and remedies available thereunder shall be in addition to and not a limitation of duties, obligations, rights, and remedies otherwise imposed or available by law.

§ 13.3.2 No action or failure to act by the Owner, Architect, or Contractor shall constitute a waiver of a right or duty afforded them under the Contract, nor shall such action or failure to act constitute approval of or acquiescence in a breach thereunder, except as may be specifically agreed upon in writing.

User Notes:

(1314219830)

§ 13.4 Tests and Inspections

§ 13.4.1 Tests, inspections, and approvals of portions of the Work shall be made as required by the Contract Documents and by applicable laws, statutes, ordinances, codes, rules, and regulations or lawful orders of public authorities. Unless otherwise provided, the Contractor shall make arrangements for such tests, inspections, and approvals with an independent testing laboratory or entity acceptable to the Owner, or with the appropriate public authority, and shall bear all related costs of tests, inspections, and approvals. The Contractor shall give the Architect timely notice of when and where tests and inspections are to be made so that the Architect may be present for such procedures. The Owner shall bear costs of tests, inspections, or approvals that do not become requirements until after bids are received or negotiations concluded. The Owner shall directly arrange and pay for tests, inspections, or approvals where building codes or applicable laws or regulations so require.

§ 13.4.2 If the Architect, Owner, or public authorities having jurisdiction determine that portions of the Work require additional testing, inspection, or approval not included under Section 13.4.1, the Architect will, upon written authorization from the Owner, instruct the Contractor to make arrangements for such additional testing, inspection, or approval, by an entity acceptable to the Owner, and the Contractor shall give timely notice to the Architect of when and where tests and inspections are to be made so that the Architect may be present for such procedures. Such costs, except as provided in Section 13.4.3, shall be at the Owner's expense.

§ 13.4.3 If procedures for testing, inspection, or approval under Sections 13.4.1 and 13.4.2 reveal failure of the portions of the Work to comply with requirements established by the Contract Documents, all costs made necessary by such failure, including those of repeated procedures and compensation for the Architect's services and expenses, shall be at the Contractor's expense.

§ 13.4.4 Required certificates of testing, inspection, or approval shall, unless otherwise required by the Contract Documents, be secured by the Contractor and promptly delivered to the Architect.

§ 13.4.5 If the Architect is to observe tests, inspections, or approvals required by the Contract Documents, the Architect will do so promptly and, where practicable, at the normal place of testing.

§ 13.4.6 Tests or inspections conducted pursuant to the Contract Documents shall be made promptly to avoid unreasonable delay in the Work.

§ 13.5 Interest

Payments due and unpaid under the Contract Documents shall bear interest from the date payment is due at the rate the parties agree upon in writing or, in the absence thereof, at the legal rate prevailing from time to time at the place where the Project is located.

ARTICLE 14 TERMINATION OR SUSPENSION OF THE CONTRACT

§ 14.1 Termination by the Contractor

§ 14.1.1 The Contractor may terminate the Contract if the Work is stopped for a period of 30 consecutive days through no act or fault of the Contractor, a Subcontractor, a Sub-subcontractor, their agents or employees, or any other persons or entities performing portions of the Work, for any of the following reasons:

.1 Issuance of an order of a court or other public authority having jurisdiction that requires all Work to be stopped;

.2 An act of government, such as a declaration of national emergency, that requires all Work to be stopped;

.3 Because the Architect has not issued a Certificate for Payment and has not notified the Contractor of the reason for withholding certification as provided in Section 9.4.1, or because the Owner has not made payment on a Certificate for Payment within the time stated in the Contract Documents; or

.4 The Owner has failed to furnish to the Contractor reasonable evidence as required by Section 2.2.

§ 14.1.2 The Contractor may terminate the Contract if, through no act or fault of the Contractor, a Subcontractor, a Sub-subcontractor, their agents or employees, or any other persons or entities performing portions of the Work, repeated suspensions, delays, or interruptions of the entire Work by the Owner as described in Section 14.3, constitute in the aggregate more than 100 percent of the total number of days scheduled for completion, or 120 days in any 365-day period, whichever is less.

User Notes:
(1314219830)

§ 14.1.3 If one of the reasons described in Section 14.1.1 or 14.1.2 exists, the Contractor may, upon seven days' notice to the Owner and Architect, terminate the Contract and recover from the Owner payment for Work executed, as well as reasonable overhead and profit on Work not executed, and costs incurred by reason of such termination.

§ 14.1.4 If the Work is stopped for a period of 60 consecutive days through no act or fault of the Contractor, a Subcontractor, a Sub-subcontractor, or their agents or employees or any other persons or entities performing portions of the Work because the Owner has repeatedly failed to fulfill the Owner's obligations under the Contract Documents with respect to matters important to the progress of the Work, the Contractor may, upon seven additional days' notice to the Owner and the Architect, terminate the Contract and recover from the Owner as provided in Section 14.1.3.

§ 14.2 Termination by the Owner for Cause

§ 14.2.1 The Owner may terminate the Contract if the Contractor

.1 repeatedly refuses or fails to supply enough properly skilled workers or proper materials;

.2 fails to make payment to Subcontractors or suppliers in accordance with the respective agreements between the Contractor and the Subcontractors or suppliers;

.3 repeatedly disregards applicable laws, statutes, ordinances, codes, rules and regulations, or lawful orders of a public authority; or

.4 otherwise is guilty of substantial breach of a provision of the Contract Documents.

§ 14.2.2 When any of the reasons described in Section 14.2.1 exist, and upon certification by the Architect that sufficient cause exists to justify such action, the Owner may, without prejudice to any other rights or remedies of the Owner and after giving the Contractor and the Contractor's surety, if any, seven days' notice, terminate employment of the Contractor and may, subject to any prior rights of the surety:

.1 Exclude the Contractor from the site and take possession of all materials, equipment, tools, and construction equipment and machinery thereon owned by the Contractor;

.2 Accept assignment of subcontracts pursuant to Section 5.4; and

.3 Finish the Work by whatever reasonable method the Owner may deem expedient. Upon written request of the Contractor, the Owner shall furnish to the Contractor a detailed accounting of the costs incurred by the Owner in finishing the Work.

§ 14.2.3 When the Owner terminates the Contract for one of the reasons stated in Section 14.2.1, the Contractor shall not be entitled to receive further payment until the Work is finished.

§ 14.2.4 If the unpaid balance of the Contract Sum exceeds costs of finishing the Work, including compensation for the Architect's services and expenses made necessary thereby, and other damages incurred by the Owner and not expressly waived, such excess shall be paid to the Contractor. If such costs and damages exceed the unpaid balance, the Contractor shall pay the difference to the Owner. The amount to be paid to the Contractor or Owner, as the case may be, shall be certified by the Initial Decision Maker, upon application, and this obligation for payment shall survive termination of the Contract.

§ 14.3 Suspension by the Owner for Convenience

§ 14.3.1 The Owner may, without cause, order the Contractor in writing to suspend, delay or interrupt the Work, in whole or in part for such period of time as the Owner may determine.

§ 14.3.2 The Contract Sum and Contract Time shall be adjusted for increases in the cost and time caused by suspension, delay, or interruption under Section 14.3.1. Adjustment of the Contract Sum shall include profit. No adjustment shall be made to the extent

.1 that performance is, was, or would have been, so suspended, delayed, or interrupted, by another cause for which the Contractor is responsible; or

.2 that an equitable adjustment is made or denied under another provision of the Contract.

§ 14.4 Termination by the Owner for Convenience

§ 14.4.1 The Owner may, at any time, terminate the Contract for the Owner's convenience and without cause.

§ 14.4.2 Upon receipt of notice from the Owner of such termination for the Owner's convenience, the Contractor shall

.1 cease operations as directed by the Owner in the notice;

.2 take actions necessary, or that the Owner may direct, for the protection and preservation of the Work; and

.3 except for Work directed to be performed prior to the effective date of termination stated in the notice, terminate all existing subcontracts and purchase orders and enter into no further subcontracts and purchase orders.

§ 14.4.3 In case of such termination for the Owner's convenience, the Owner shall pay the Contractor for Work properly executed; costs incurred by reason of the termination, including costs attributable to termination of Subcontracts; and the termination fee, if any, set forth in the Agreement.

ARTICLE 15 CLAIMS AND DISPUTES

§ 15.1 Claims

§ 15.1.1 Definition

A Claim is a demand or assertion by one of the parties seeking, as a matter of right, payment of money, a change in the Contract Time, or other relief with respect to the terms of the Contract. The term "Claim" also includes other disputes and matters in question between the Owner and Contractor arising out of or relating to the Contract. The responsibility to substantiate Claims shall rest with the party making the Claim. This Section 15.1.1 does not require the Owner to file a Claim in order to impose liquidated damages in accordance with the Contract Documents.

§ 15.1.2 Time Limits on Claims

The Owner and Contractor shall commence all Claims and causes of action against the other and arising out of or related to the Contract, whether in contract, tort, breach of warranty or otherwise, in accordance with the requirements of the binding dispute resolution method selected in the Agreement and within the period specified by applicable law, but in any case not more than 10 years after the date of Substantial Completion of the Work. The Owner and Contractor waive all Claims and causes of action not commenced in accordance with this Section 15.1.2.

§ 15.1.3 Notice of Claims

§ 15.1.3.1 Claims by either the Owner or Contractor, where the condition giving rise to the Claim is first discovered prior to expiration of the period for correction of the Work set forth in Section 12.2.2, shall be initiated by notice to the other party and to the Initial Decision Maker with a copy sent to the Architect, if the Architect is not serving as the Initial Decision Maker. Claims by either party under this Section 15.1.3.1 shall be initiated within 21 days after occurrence of the event giving rise to such Claim or within 21 days after the claimant first recognizes the condition giving rise to the Claim, whichever is later.

§ 15.1.3.2 Claims by either the Owner or Contractor, where the condition giving rise to the Claim is first discovered after expiration of the period for correction of the Work set forth in Section 12.2.2, shall be initiated by notice to the other party. In such event, no decision by the Initial Decision Maker is required.

§ 15.1.4 Continuing Contract Performance

§ 15.1.4.1 Pending final resolution of a Claim, except as otherwise agreed in writing or as provided in Section 9.7 and Article 14, the Contractor shall proceed diligently with performance of the Contract and the Owner shall continue to make payments in accordance with the Contract Documents.

§ 15.1.4.2 The Contract Sum and Contract Time shall be adjusted in accordance with the Initial Decision Maker's decision, subject to the right of either party to proceed in accordance with this Article 15. The Architect will issue Certificates for Payment in accordance with the decision of the Initial Decision Maker.

§ 15.1.5 Claims for Additional Cost

If the Contractor wishes to make a Claim for an increase in the Contract Sum, notice as provided in Section 15.1.3 shall be given before proceeding to execute the portion of the Work that is the subject of the Claim. Prior notice is not required for Claims relating to an emergency endangering life or property arising under Section 10.4.

§ 15.1.6 Claims for Additional Time

§ 15.1.6.1 If the Contractor wishes to make a Claim for an increase in the Contract Time, notice as provided in Section 15.1.3 shall be given. The Contractor's Claim shall include an estimate of cost and of probable effect of delay on progress of the Work. In the case of a continuing delay, only one Claim is necessary.

User Notes:
(1314219830)

§ 15.1.6.2 If adverse weather conditions are the basis for a Claim for additional time, such Claim shall be documented by data substantiating that weather conditions were abnormal for the period of time, could not have been reasonably anticipated, and had an adverse effect on the scheduled construction.

§ 15.1.7 Waiver of Claims for Consequential Damages

The Contractor and Owner waive Claims against each other for consequential damages arising out of or relating to this Contract. This mutual waiver includes

.1 damages incurred by the Owner for rental expenses, for losses of use, income, profit, financing, business and reputation, and for loss of management or employee productivity or of the services of such persons; and

.2 damages incurred by the Contractor for principal office expenses including the compensation of personnel stationed there, for losses of financing, business and reputation, and for loss of profit, except anticipated profit arising directly from the Work.

This mutual waiver is applicable, without limitation, to all consequential damages due to either party's termination in accordance with Article 14. Nothing contained in this Section 15.1.7 shall be deemed to preclude assessment of liquidated damages, when applicable, in accordance with the requirements of the Contract Documents.

§ 15.2 Initial Decision

§ 15.2.1 Claims, excluding those where the condition giving rise to the Claim is first discovered after expiration of the period for correction of the Work set forth in Section 12.2.2 or arising under Sections 10.3, 10.4, and 11.5, shall be referred to the Initial Decision Maker for initial decision. The Architect will serve as the Initial Decision Maker, unless otherwise indicated in the Agreement. Except for those Claims excluded by this Section 15.2.1, an initial decision shall be required as a condition precedent to mediation of any Claim. If an initial decision has not been rendered within 30 days after the Claim has been referred to the Initial Decision Maker, the party asserting the Claim may demand mediation and binding dispute resolution without a decision having been rendered. Unless the Initial Decision Maker and all affected parties agree, the Initial Decision Maker will not decide disputes between the Contractor and persons or entities other than the Owner.

§ 15.2.2 The Initial Decision Maker will review Claims and within ten days of the receipt of a Claim take one or more of the following actions: (1) request additional supporting data from the claimant or a response with supporting data from the other party, (2) reject the Claim in whole or in part, (3) approve the Claim, (4) suggest a compromise, or (5) advise the parties that the Initial Decision Maker is unable to resolve the Claim if the Initial Decision Maker lacks sufficient information to evaluate the merits of the Claim or if the Initial Decision Maker concludes that, in the Initial Decision Maker's sole discretion, it would be inappropriate for the Initial Decision Maker to resolve the Claim.

§ 15.2.3 In evaluating Claims, the Initial Decision Maker may, but shall not be obligated to, consult with or seek information from either party or from persons with special knowledge or expertise who may assist the Initial Decision Maker in rendering a decision. The Initial Decision Maker may request the Owner to authorize retention of such persons at the Owner's expense.

§ 15.2.4 If the Initial Decision Maker requests a party to provide a response to a Claim or to furnish additional supporting data, such party shall respond, within ten days after receipt of the request, and shall either (1) provide a response on the requested supporting data, (2) advise the Initial Decision Maker when the response or supporting data will be furnished, or (3) advise the Initial Decision Maker that no supporting data will be furnished. Upon receipt of the response or supporting data, if any, the Initial Decision Maker will either reject or approve the Claim in whole or in part.

§ 15.2.5 The Initial Decision Maker will render an initial decision approving or rejecting the Claim, or indicating that the Initial Decision Maker is unable to resolve the Claim. This initial decision shall (1) be in writing; (2) state the reasons therefor; and (3) notify the parties and the Architect, if the Architect is not serving as the Initial Decision Maker, of any change in the Contract Sum or Contract Time or both. The initial decision shall be final and binding on the parties but subject to mediation and, if the parties fail to resolve their dispute through mediation, to binding dispute resolution.

§ 15.2.6 Either party may file for mediation of an initial decision at any time, subject to the terms of Section 15.2.6.1.

WARNING: This AIA® Document is protected by U.S. Copyright Law and International Treaties. Unauthorized reproduction or distribution of this AIA® Document, or any portion of it, may result in severe civil and criminal penalties, and will be prosecuted to the maximum extent possible under the law. This document was produced by AIA software at 10:34:06 ET on 12/20/2019 under Order No.4568032601 which expires on 04/04/2020, and is not for resale.
User Notes:
(1314219830)

§ 15.2.6.1 Either party may, within 30 days from the date of receipt of an initial decision, demand in writing that the other party file for mediation. If such a demand is made and the party receiving the demand fails to file for mediation within 30 days after receipt thereof, then both parties waive their rights to mediate or pursue binding dispute resolution proceedings with respect to the initial decision.

§ 15.2.7 In the event of a Claim against the Contractor, the Owner may, but is not obligated to, notify the surety, if any, of the nature and amount of the Claim. If the Claim relates to a possibility of a Contractor's default, the Owner may, but is not obligated to, notify the surety and request the surety's assistance in resolving the controversy.

§ 15.2.8 If a Claim relates to or is the subject of a mechanic's lien, the party asserting such Claim may proceed in accordance with applicable law to comply with the lien notice or filing deadlines.

§ 15.3 Mediation

§ 15.3.1 Claims, disputes, or other matters in controversy arising out of or related to the Contract, except those waived as provided for in Sections 9.10.4, 9.10.5, and 15.1.7, shall be subject to mediation as a condition precedent to binding dispute resolution.

§ 15.3.2 The parties shall endeavor to resolve their Claims by mediation which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Mediation Procedures in effect on the date of the Agreement. A request for mediation shall be made in writing, delivered to the other party to the Contract, and filed with the person or entity administering the mediation. The request may be made concurrently with the filing of binding dispute resolution proceedings but, in such event, mediation shall proceed in advance of binding dispute resolution proceedings, which shall be stayed pending mediation for a period of 60 days from the date of filing, unless stayed for a longer period by agreement of the parties or court order. If an arbitration is stayed pursuant to this Section 15.3.2, the parties may nonetheless proceed to the selection of the arbitrator(s) and agree upon a schedule for later proceedings.

§ 15.3.3 Either party may, within 30 days from the date that mediation has been concluded without resolution of the dispute or 60 days after mediation has been demanded without resolution of the dispute, demand in writing that the other party file for binding dispute resolution. If such a demand is made and the party receiving the demand fails to file for binding dispute resolution within 60 days after receipt thereof, then both parties waive their rights to binding dispute resolution proceedings with respect to the initial decision.

§ 15.3.4 The parties shall share the mediator's fee and any filing fees equally. The mediation shall be held in the place where the Project is located, unless another location is mutually agreed upon. Agreements reached in mediation shall be enforceable as settlement agreements in any court having jurisdiction thereof.

§ 15.4 Arbitration

§ 15.4.1 If the parties have selected arbitration as the method for binding dispute resolution in the Agreement, any Claim subject to, but not resolved by, mediation shall be subject to arbitration which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Arbitration Rules in effect on the date of the Agreement. The Arbitration shall be conducted in the place where the Project is located, unless another location is mutually agreed upon. A demand for arbitration shall be made in writing, delivered to the other party to the Contract, and filed with the person or entity administering the arbitration. The party filing a notice of demand for arbitration must assert in the demand all Claims then known to that party on which arbitration is permitted to be demanded.

§ 15.4.1.1 A demand for arbitration shall be made no earlier than concurrently with the filing of a request for mediation, but in no event shall it be made after the date when the institution of legal or equitable proceedings based on the Claim would be barred by the applicable statute of limitations. For statute of limitations purposes, receipt of a written demand for arbitration by the person or entity administering the arbitration shall constitute the institution of legal or equitable proceedings based on the Claim.

§ 15.4.2 The award rendered by the arbitrator or arbitrators shall be final, and judgment may be entered upon it in accordance with applicable law in any court having jurisdiction thereof.

User Notes:
(1314219830)

§ 15.4.3 The foregoing agreement to arbitrate and other agreements to arbitrate with an additional person or entity duly consented to by parties to the Agreement, shall be specifically enforceable under applicable law in any court having jurisdiction thereof.

§ 15.4.4 Consolidation or Joinder

§ 15.4.4.1 Subject to the rules of the American Arbitration Association or other applicable arbitration rules, either party may consolidate an arbitration conducted under this Agreement with any other arbitration to which it is a party provided that (1) the arbitration agreement governing the other arbitration permits consolidation, (2) the arbitrations to be consolidated substantially involve common questions of law or fact, and (3) the arbitrations employ materially similar procedural rules and methods for selecting arbitrator(s).

§ 15.4.4.2 Subject to the rules of the American Arbitration Association or other applicable arbitration rules, either party may include by joinder persons or entities substantially involved in a common question of law or fact whose presence is required if complete relief is to be accorded in arbitration, provided that the party sought to be joined consents in writing to such joinder. Consent to arbitration involving an additional person or entity shall not constitute consent to arbitration of any claim, dispute or other matter in question not described in the written consent.

§ 15.4.4.3 The Owner and Contractor grant to any person or entity made a party to an arbitration conducted under this Section 15.4, whether by joinder or consolidation, the same rights of joinder and consolidation as those of the Owner and Contractor under this Agreement.

State of West Virginia

Supplementary Conditions to AIA Document A201-2017
General Conditions of the Contract for Construction

The following Supplementary Conditions modify the General Conditions of the Contract for Construction, AIA Document A201, 2017 Edition. Where a portion of the General Conditions is modified or deleted by these Supplementary Conditions, the unaltered portions of the General Conditions shall remain in effect.

Order of Precedence: The documents contained in the contract to which this document has been attached shall be interpreted in the following order of precedence:

First Priority – Documents developed by the State or agency and utilized to provide public notice of the solicitation, along with other general terms and conditions shall be first in priority.

Second Priority – This document "Supplementary Conditions to the AIA Document A201-2017 General Conditions of the Contract for Construction" shall be second in priority.

Third Priority – all other AIA documents including, but not limited to, the AIA Document A201-2017 General Conditions of the Contract for Construction and the A101-2017 Standard Form of Agreement Between Owner and Contractor (when utilized) shall be third or lower in priority.

ARTICLE 1
GENERAL PROVISIONS

Add the following Section to Article 1:

§1.05 PARTY RELATIONS

§1.05 The Owner and their consultants, the Architect and their Consultants, and the Contractor and their Subcontractors agree to proceed with the Work on the basis of mutual trust, good faith and fair dealing.

§1.1 BASIC DEFINITIONS

§1.1.1 THE CONTRACT DOCUMENTS

§1.1.1 Delete the last sentence of this Section and substitute the following:

The Contract Documents also include the Bidding Documents (Advertisement or Invitation to Bid, Request for Quotations/Bids, Instructions to Bidders, Form of Proposal, Bid Bond and Sample Forms), Performance Bond, Payment Bond, Maintenance Bond (if applicable), Certificates of Insurance, Special Provisions For Disadvantaged and Women Business Enterprise Utilization (if bound herein).

§1.1.2 THE CONTRACT

§1.1.2 Make the following changes to Section 1.1.2:

In the last sentence, insert "and the Contractor" after "The Architect" and delete "the Architect's" and insert "their respective".

§1.2 Correlation and Intent of Contract Documents

§1.2.1.1 In the second sentence, remove "any law" and insert "West Virginia law or any applicable federal law". In the last sentence, remove "by law" and insert "West Virginia law or any applicable federal law".

§1.7 Digital Data Use and Transmission

§1.7 Delete the last sentence of this section in its entirety.

§1.8 Building Information Models Use and Reliance

§ 1.8 Remove this section in its entirety and replace it with the following:

"Any use of, or reliance on, all or a portion of a building information model must be approved in advance by Owner and will only be permitted if the Parties have agreed upon and executed written documents to memorialize protocols governing the use of, and reliance on, the information contained in the model."

ARTICLE 2
OWNER

§2.1 GENERAL

§ 2.1.1 Add the following after the last sentence:

Notwithstanding the foregoing, the parties understand that since Owner is a government entity, change orders will often require approval by entities in addition to owner. When owner is a state agency, those entities may include, but are not limited to, the West Virginia Attorney General's Office and the West Virginia Purchasing Division. Additionally, approval may be required by agencies providing project funding, including but not limited to, West Virginia School Building Authority and agencies of the United States federal government.

§2.1.2 Delete Section 2.1.2 in its entirety.

§2.1 Add the following Section to 2.1:

§2.1.3 The Owner and the agency funding the project reserve the right to maintain a full time or part time project representative (sometimes referred to as the "Clerk of the Works") at the project site who shall keep the Owner informed of the progress and quality of the Work and responsibilities. The Contractor shall cooperate and assist the Clerk of the Works in the performance of his/her duties. The Clerk of the Works will not interfere with or be responsible for the Contractor's supervision and direction of the Work, and the Contractor's means, methods, techniques, sequences, and procedures, and for coordinating all portions of the Work. The Clerk of the Works may facilitate communications between the Owner, Architect, and Contractor but has no authority to make decisions for the Owner, approve modifications to the Contract Documents, the Contract Time, or Contract Sum. Additionally, Contractor is not permitted to rely on or consider decisions made by the Clerk of the Works on behalf of Owner

§2.2 Evidence of the Owner's Financial Arrangements: Delete § 2.2 and all of its subsections in its entirety.

§2.3 Information and Services Required of Owner

§2.3.2 Make the following changes to Section 2.3.2:

In first sentence, delete the period and add ", when required pursuant to West Virginia Code §30-12-1 et seq." Add the following sentence at the end of Section 2.3.2: "If the Owner does not retain an architect lawfully licensed to practice architecture or an entity lawfully practicing architecture in the jurisdiction where the Project is located, the Owner will appoint an individual to assume the role and obligations of the Architect pursuant to this Agreement."

§2.3.3 Delete this section in its entirety.

§2.3.4 Delete the last sentence of Section 2.3.4 and substitute the following:

The Contractor shall confirm the locations of each utility. If the Owner has provided geotechnical and other tests to determine subsurface conditions, the Owner will provide such documents to the Contractor; the Contractor acknowledges that it will make no claims for any subsurface or any other conditions revealed by these tests.

ARTICLE 3
CONTRACTOR

§3.2 REVIEW OF CONTRACT DOCUMENTS AND FIELD CONDITIONS BY CONTRACTOR

§3.2.2 Add the following sentence to the end of Section 3.2.2:

Claims by Contractor resulting from its failure to familiarize itself with the site shall be deemed waived. Additionally, by submitting a bid or otherwise entering into this contract, Contractor acknowledges that it has reviewed and understands the contract documents and the work required by those documents. Any claims arising from Contractor's failure to review and understand the contract documents shall be deemed waived.

§3.2.3 Delete Section 3.2.3 in its entirety and substitute the following:

§3.2.3 The Contractor acknowledges its continuing duty to review and evaluate the Construction Documents during performance of its services and shall immediately notify the Owner and the Architect about any problems, conflicts, defects, deficiencies, inconsistencies or omissions it discovers in or between the Construction Documents; and variances it discovers between the Construction Documents and applicable laws, statutes, building codes, rules and regulations.

§ 3.2.4 Add the following clauses to Section 3.2.4:

§3.2.4.1 If the Contractor performs any Work which it knows or should have known involves a recognized problem, conflict, defect, deficiency, inconsistency or omission in the Construction Documents; or a variance between the Construction Documents and requirements of applicable laws, statutes, building codes, rules and regulations, without notifying the Owner and the Architect prior to receiving written authorization from the Architect to proceed, the Contractor shall be responsible for the consequences of such performance.

§3.2.4.2 Before ordering any materials or doing any Work, the Contractor and Subcontractors shall verify all measurements at the site and shall be responsible for the correctness of same. Discrepancies shall be reported in writing to the Architect prior to proceeding with the Work. No extra charge or compensation will be

entertained due to differences between actual measurements and dimensions indicated on the drawings, if such differences do not result in a change in the scope of Work or if the Architect failed to receive written notice before the Work was performed.

§3.4 LABOR AND MATERIALS

§3.4.1 Vendor must review and comply with the following statutory requirements affecting public construction projects, as well as any other applicable laws that are not referenced herein:

- W. Va. Code § 5-19-1 et seq., relating to domestic steel preference.
- W. Va. Code § 5A-3-56 relating to domestic steel preference, provided that the Owner is a state agency subject to Chapter 5A, Article 3 of the W. Va. Code.
- W. Va. Code § §21-1C-1 *et seq.*, relating to local hiring preference
- W. Va. Code §21-1D-1 *et seq.*, relating to drug free workplace requirements.

§3.4 Add the following Sections to 3.4:

§3.4.4 Where materials and equipment are to be provided by the Owner under the Contract Documents, the Contractor shall notify the Owner in writing as to when materials and equipment are required on the project site in sufficient time to avoid delay in the Work.

§3.4.5 The Contractor shall employ labor on the Project or in connection with the Work, capable of working harmoniously with all trade crafts and any other individuals associated with the Project. The Contractor shall also use its best efforts and implement policies and practices to minimize the likelihood of any strike, work stoppage or other labor disturbance. Except as specifically provided in this Agreement, Contractor shall not be entitled to any adjustment in the Contract sum or Contract time and shall be liable to the Owner for all damages suffered by the Owner occurring as a result of work stoppages, slowdowns, disputes, or strikes by the work force of or provided by Contractor or its Subcontractors.

§3.5 WARRANTY

§3.5 Add the following sentence at the end of Section 3.5:

The Contractor agrees to assign to the Owner at time of Final Completion of the Work, any and all manufacturer's warranties relating to materials and labor used in the Work and further agrees to perform the Work in such a manner so as to preserve any and all such warranties.

§3.8 ALLOWANCES

§3.8.3 Make the following change to Section 3.8.3:

§3.8.3 Delete "with reasonable promptness" and insert "in sufficient time to avoid delay in the Work."

Add the following Section to 3.8:

§3.8.4 The Contractor shall promptly submit to the Owner an itemized account of any expenditure by the Contractor of the Contract allowance in sufficient detail to allow the Owner to properly account for such expenditure.

§3.9 SUPERINTENDENT/PROJECT MANAGER

§3.9.1 Add the following sentence to the end of Section 3.9.1:

The Contractor may also employ a competent project manager.

§3.9.2 Make the following changes to Section 3.9.2:

In the first sentence, add "and project manager, if applicable" after "superintendent." In the second sentence, add "or project manager, if applicable," after "superintendent."

§3.9.3 Make the following changes to Section 3.9.3:

In the first sentence, add "or project manager, if applicable," after "superintendent." In the second sentence, add "or project manager, if applicable," after "superintendent."

§3.9 Add the following Section to 3.9:

§3.9.4 The Owner shall have the right, at any time, to direct a change in the Contractor's representatives if their performance is deemed unsatisfactory.

§3.10 CONTRACTOR'S CONSTRUCTION SCHEDULES

§3.10.1 Make the following changes to Section 3.10.1:

In the first sentence, delete the word "promptly" and substitute "by the earliest reasonable date".

Add the following sentence to the end of Section 3.10.1: "The Contractor shall submit an updated construction schedule with each payment application, unless waived by the Owner."

Add the following Sections to 3.10:

§3.10.4 At any time after the first thirty (30) days of the Contract Time, if it is found that the project is two (2) weeks or more behind schedule, beyond approved time extensions, or if at any time during

the last thirty (30) days of the scheduled Contract Time the Contractor is one (1) week or more behind schedule, the Contractor shall immediately submit a plan to the Owner describing how the Work will be placed back on schedule within the remaining Contract Time.

§3.10.5 If the Owner and the Architect determine that the performance of the Work during any stage of the construction schedule last approved by the Owner has not progressed or reached the level of completion required by the Contract Documents, the Owner will have the right to order the Contractor to take corrective measures (hereinafter referred to collectively as Extraordinary Measures) necessary to expedite the progress of the Work, including, without limitation: (1) working additional shifts or overtime; (2) supplying additional manpower, equipment and facilities; and (3) other similar measures. Such Extraordinary Measures shall continue until the progress of the Work complies with the last approved construction schedule. The Owner's right to require Extraordinary Measures is solely for the purpose of ensuring the Contractor's compliance with the construction schedule after allowing for approved extensions of Contract Time as provided elsewhere in this Agreement. The Contractor is not entitled to an adjustment in the Contract Sum in connection with any Extraordinary Measures required by the Owner. The Owner may exercise its rights under this Section as frequently as the Owner deems necessary to ensure that the Contractor's performance of the Work will comply with the construction schedule.

§3.11 DOCUMENTS AND SAMPLES AT THE SITE

§3.11 Insert the following sentence at the end of Section 3.11:

The Contractor's compliance with this Section 3.11 shall be a condition precedent to any obligation of the Owner to make Final Payment pursuant to this Agreement.

§3.15 CLEANING UP

§3.15.2 Delete Section 3.15.2 in its entirety and substitute the following:

§3.15.2 If the Contractor fails to clean up as provided in the Contract Documents, the Owner may do so and may withhold such reasonable costs as necessary for the fulfillment of the Contractor's obligation under this Section 3.15. If the reasonable costs of such cleaning exceed the Contract Sum then due the Contractor, the Contractor shall reimburse the Owner the difference within thirty (30) consecutive calendar days of the Owner's written request.

Any materials, tools, supplies, or other personal property left by the Contractor shall be deemed abandoned property and the Owner shall have no obligation to hold or store the property on behalf of Contractor and may dispose of the abandoned property as if it were property of the State of West Virginia. Provided however, that prior to treating property as abandoned and disposing of it, Owner must first provide Contractor with 10 days notice of its intent to do so. If any materials, tools, supplies or other personal property belong to a subcontractor, then Contractor is obligated to communicate this notice to its subcontractor immediately.

§3.15 Add the following Section to 3.15:

§3.15.3 In order to achieve Substantial Completion, as defined by Section 9.8, for any portion of the Work, the Contractor must have the area where the Work is located fully cleaned and all materials and/or debris removed from site. The Certificate of Substantial Completion will not be issued until the Contractor has met this obligation.

ARTICLE 4
ARCHITECT

§4.1 GENERAL

§4.2 ADMINISTRATION OF THE CONTRACT

§4.2 Make the following changes to Section 4.2:

§4.2.1 In the first sentence of Section 4.2.1 after the word Architect add ", unless otherwise indicated by the Owner,".

§4.2.2 In the first sentence of Section 4.2.2 strike the word "generally."

§4.2.3 In the first sentence of Section 4.2.3 strike the word "reasonably."

§4.2.5 Add the following sentence at the end of Section 4.2.5:

The Architect upon receipt of an Application for Payment from the Contractor shall either review and certify such amounts due for payment or return such Application for Payment to the Contractor for correction(s) within five (5) consecutive business days of receipt.

§4.2.7 Delete the first sentence of Section 4.2.7 and substitute the following:

The Architect will review and approve, or take other appropriate action upon, the Contractor's submittals such as Shop Drawings, Product Data and Samples for the purpose of checking for conformance with the Contract Documents.

Modify the second to last sentence by removing it in its entirety and replacing it with the following: The Architect's review shall not constitute approval of safety precautions or of any construction means, methods, techniques, sequences, or procedures, unless the Architect has established the required construction means, methods, techniques, sequences, or procedures, or the Contract Documents require such approval.

§4.2.8 Make the following change to Section 4.2.8:

In the first sentence, after the word Architect add ", in consultation with the Owner,".

ARTICLE 5
SUBCONTRACTORS

§5.2 Award of Subcontracts and Other Contracts for Portions of Work

§5.2.1 Add the following sentence to Section 5.2.1.

This provision in no way limits the Contractor's legal obligations to report subcontractors and labor/material suppliers under W. Va. Code § 5-22-1(f) and obtain approval under W. Va. Code § 5-22-1(g) prior to any subcontractor substitution.

§5.4 Contingent Assignment of Subcontracts: This section is removed in its entirety and replaced with the following:

§5.4 Emergency Contracts with Subcontractors:

In the event that the general contractor fails to fulfill its contractual obligations and the performance bond has failed to provide an adequate remedy, Owner has the right to execute emergency contracts with subcontractors to ensure continuation of the work, provided that doing so is in compliance with the laws, rules, and procedures governing emergency contracting authority for Owner, and the emergency contract terms comply with all other applicable laws, rules, and procedures.

ARTICLE 7
CHANGES IN THE WORK

§7.1 General

§7.1.2. In Section 7.1.2. remove the word "alone" and insert "with approval by the Owner."

§7.2 CHANGE ORDERS

§7.2 Add the following Section to 7.2:

§7.2.2 A written Change Order as defined under 7.2.1 above constitutes a final settlement of all matters relating to the change in the Work which is the subject of the Change Order, including, but not limited to general conditions, all direct or indirect costs associated with such change and any and all adjustment to the Contract Sum and Contract Time. The parties also understand and agree that if Owner is a state agency, change orders may require approval by entities in addition to Owner. Those entities may include, but are not limited to, the West Virginia Purchasing Division, and the West Virginia Attorney General's Office. Owner and Contractor must discuss the change order approval requirements prior to executing this agreement.

Add the following section to § 7.2

§7.2.3. Allowance for Overhead and Profit: Contractor's overhead and profit for a change order issued under this Article included in the total cost to the Owner shall not exceed based on the following schedule:

.1 For the Contractor, for any Work performed by the Contractor's own forces, fifteen percent (15%) of the cost.

.2 For the Contractor, for Work performed by the Contractor's Subcontractor, ten percent (10%) of the amount due the Subcontractor.

.3 For each Subcontractor or Sub-Subcontractor involved, for any Work performed by that Subcontractor's own forces, fifteen percent (15%) of the cost.

.4. For each Subcontractor, for Work performed by the Subcontractor's Sub-subcontractors, ten percent (10%) of the amount due the Sub-subcontractor.

.5 Cost to which overhead and profit is to be applied shall be determined in accordance with Section 7.3.7. Estimated labor hours shall include hours only for those workmen and working foremen directly involved in performing the Change Order work. Supervision above the level of working foremen (such as general foremen, superintendent, project manager, etc.) is considered to be included in the allowance for Overhead and Profit. Hand tools are defined as equipment with a value of $1,000 or less. For Contractor owned equipment, the "bare" equipment rental rates allowed to be used for pricing Change Order proposals shall be not more than the monthly rate listed in the most current publication of The AED Green Book divided by 176 to arrive at a maximum hourly rate to be applied to the hours the equipment is used performing the Change Order work.

.6 In order to facilitate checking of quotations for extras or credits, all proposals, except those so minor that their propriety can be seen by inspection, shall be accompanied by a complete itemization of costs including labor, material, equipment and Subcontractors. Details to be submitted will include detailed line item estimates showing detailed materials quantity take-offs, material prices by item and related labor hour pricing information and extensions (by line item or by drawing as applicable.) Where major cost items are Subcontracts, they shall also be itemized as prescribed above. In no case will a change involving over $10,000 be approved without such an itemization.

.7 Local Business and Occupation Taxes, if applicable, shall be calculated on the cost of the Work, overhead and profit..

.8 Overhead and profit shall not be calculated on changes in the Work involving unit prices. Unit prices are to have overhead and profit included in the price quoted.

.9 Under no circumstances is Contractor permitted to charge for the passage of time (often referred to as general conditions or winter conditions) without an identified, itemized, and concretely provable cost borne by Contractor. Contractor has a duty to mitigate costs during a delay period to the fullest extent possible and Contractor will not be paid for costs that could have been mitigated. Calculating a daily delay rate without properly identifying, itemizing, and proving actual, unmitigateable costs, is prohibited. Contractor understands and accepts that it has the responsibility to prove that costs could not be mitigated prior to submitting a request for payment.

§7.3 CONSTRUCTION CHANGE DIRECTIVES

§7.3.4 Make the following change in Section 7.3.4:

In the fourth line of the first sentence, delete the words "an amount for overhead and profit as set forth in the Agreement, or if no such amount is set forth in the Agreement, a reasonable amount" and substitute "an allowance for overhead and profit in accordance with clauses 7.3.11.1 through 7.3.11.9 below."

§7.3.7 Delete the word "recorded" and replace it with "processed".

§7.3.9 Delete Section 7.3.9 in its entirety and substitute the following:

§7.3.9 Pending final determination of the total cost of a Construction Change Directive to the Owner, amounts not in dispute for such changes in the Work shall be included in Applications for Payment provided these amounts have been added to the Contract by Change Order and a purchase order has been issued for the Change Order.

§7.3.10 Add the following sentence to the end of Section 7.3.10:

The Parties will utilize their best efforts to issue a change order within 60 days of agreement being reached, but failure to do so will not give rise to grounds for contract cancellation, penalties, or any other cause of action.

Add the following Section to 7.3:

§7.3.11 In Section 7.3.7, the allowance for overhead and profit for a change directive issued under this Article included in the total cost to the Owner shall not exceed the following schedule:

.1 For the Contractor, for any Work performed by the Contractor's own forces, fifteen percent (15%) of the cost.

.2 For the Contractor, for Work performed by the Contractor's Subcontractor, ten percent (10%) of the amount due the Subcontractor.

.3 For each Subcontractor or Sub-Subcontractor involved, for any Work performed by that Subcontractor's own forces, fifteen percent (15%) of the cost.

.4. For each Subcontractor, for Work performed by the Subcontractor's Sub-subcontractors, ten percent (10%) of the amount due the Sub-subcontractor.

.5 Cost to which overhead and profit is to be applied shall be determined in accordance with Section 7.3.7. Estimated labor hours shall include hours only for those workmen and working foremen directly involved in performing the Change Order work. Supervision above the level of working foremen (such as general foremen, superintendent, project manager, etc.) is considered to be included in the allowance for Overhead and Profit. Hand tools are defined as equipment with a value of $1,000 or less. For Contractor owned equipment, the "bare" equipment rental rates allowed to be used for pricing Change Order proposals shall be not more than the monthly rate listed in the most current publication of The AED Green Book divided by 176 to arrive at a maximum hourly rate to be applied to the hours the equipment is used performing the Change Order work.

.6 In order to facilitate checking of quotations for extras or credits, all proposals, except those so minor that their propriety can be seen by inspection, shall be accompanied by a complete itemization of costs including labor, material, equipment and Subcontractors. Details to be submitted will include detailed line item estimates showing detailed materials quantity take-offs, material prices by item and related labor hour pricing information and extensions (by line item or by drawing as applicable.) Where major cost items are Subcontracts, they shall also be itemized as prescribed above. In no case will a change involving over $10,000 be approved without such an itemization.

.7 Local Business and Occupation Taxes, if applicable, shall be calculated on the cost of the Work, overhead and profit.

.8 Overhead and profit shall not be calculated on changes in the Work involving unit prices. Unit prices are to have overhead and profit included in the price quoted.

.9 Under no circumstances is Contractor permitted to charge for the passage of time (often referred to as general conditions or winter conditions) without an identified, itemized, and concretely provable cost borne by Contractor. Contractor has a duty to mitigate costs during a delay period to the fullest extent possible and Contractor will not be paid for costs that could have been mitigated. Calculating a daily delay rate

without properly identifying, itemizing, and proving actual, unmitigateable costs, is prohibited. Contractor understands and accepts that it has the responsibility to prove that costs could not be mitigated prior to submitting a request for payment.

§7.4 Minor Changes in Work. Insert the following sentence at the end of section 7.4:

"Contractor may request that Architect provide written confirmation that Owner has agreed to the minor change, and if requested, Architect will provide it."

ARTICLE 8
TIME

§8.3 DELAYS AND EXTENSIONS OF TIME

§8.3.1 In the first sentence, delete "unusual delay in deliveries," and add "unmitigatable costs attributable to" before the words "adverse weather conditions."

ARTICLE 9
PAYMENTS AND COMPLETION

§9.1 Contract Sum

§9.1.2 Add the following sentence to the end of section 9.1.2:

"Any equitable adjustment of unit prices must be processed as a change order to the contract"

§9.2 SCHEDULE OF VALUES

§9.2 Make the following changes to Section 9.2:

In the first sentence add "and the Owner" after the first reference to the Architect. In the second sentence add "or the Owner" after Architect. Remove the last sentence in its entirety and replace it with the following:

"Any changes to the schedule of values shall be submitted to the Architect and the Owner and supported by such data to substantiate its accuracy as the Architect or owner may require. This schedule, unless objected to by the Architect or the Owner, shall be used as a basis for reviewing the Contractor's subsequent Applications for Payment."

§9.3 APPLICATIONS FOR PAYMENT

§9.3 Make the following changes to Section 9.3:

§9.3.1 In the first sentence add "and the Owner" after the first reference to the Architect and add "and other required documents" after the words "schedule of values."

§9.3.1.1 Delete clause 9.3.1.1 in its entirety and substitute the following:

§9.3.1.1 Such applications may include requests for payment on account of changes in the Work authorized by Construction Change Directives and Change Orders only after a purchase order has been issued for the Work affected.

§9.3.1 Add the following clauses to Section 9.3.1:

§9.3.1.3 Until the Work is fifty percent (50%) complete, the Owner will withhold as retainage 10% of the amount due the Contractor on account of progress payments. At the time the Work is fifty percent (50%) complete and thereafter, if the manner of completion of the Work and its progress are and remain satisfactory to the Owner and Architect, and in the absence of other good and sufficient reasons, the Architect will, on presentation by the Contractor of Consent of Surety, authorize any remaining partial payments to be paid in full.

§9.3.1.4 The full Contract retainage may be reinstated if the manner of completion of the Work and its progress do not remain satisfactory to the Owner and Architect, if the Surety withholds its consent, or for other good and sufficient reasons.

§9.4 CERTIFICATES FOR PAYMENT

§9.4.1 After the phrase "in the full amount of the Application for Payment," insert the phrase "less any retainage withheld pursuant to section 9.3.1.3,".

§9.6 PROGRESS PAYMENTS

§9.6.7 Delete Section 9.6.7 in its entirety.

§9.6.8 Delete Section 9.6.8 in its entirety.

§9.7 FAILURE OF PAYMENT

§9.7 Make the following changes in Section 9.7:

In line two, change "seven days" to "sixty days." In line four, delete "binding dispute resolution" and substitute "the West Virginia Claims Commission"

§9.8 SUBSTANTIAL COMPLETION

§9.8.3 Add the following clause to Section 9.8.3:

If Architect is required to perform more than one inspection under this subsection, Contractor shall be responsible for paying the Owner for the cost of the additional inspection, which will be paid by Owner to Architect, at the hourly rate established in the contract between Owner and Architect.

§9.8.5 Add the following clause to Section 9.8.5:

§9.8.5.1 The payment of retainage shall be sufficient to increase the total payments to ninety-five percent (95%) for the Work or designated portion thereof being accepted as Substantially Complete, less any amounts as the Architect shall determine for any Work that is not complete, not in accordance with the Contract Documents, or for unsettled claims.

§9.10 FINAL COMPLETION AND FINAL PAYMENT

§9.10.1 Add the following to the end of Section 9.10.1:

If Architect is required to perform more than one inspection under this subsection, Contractor shall be responsible for paying the Owner for the cost of the additional inspection, which will be paid by Owner to Architect, at the hourly rate established in the contract between Owner and Architect.

§9.10.2 Make the following changes in Section 9.10.2:

In the first sentence, delete "for which the Owner or the Owner's property might be responsible or encumbered (less amounts withheld by Owner)."

Add the following clause to Section 9.10.2:

§9.10.2.1 Before final payment is due the Contractor, all applicable State and local taxes must be paid. If requested by the Owner, the Contractor shall present evidence that payment or satisfaction of all such tax obligations has been made.

§9.10.3 Add the following clause to Section 9.10.3:

9.10.3.1 Unless and to the extent final completion is delayed through no fault of the Contractor as provided in Section 9.10.3, the Owner shall be under no obligation to increase payments above ninety-five percent (95%) until final completion of the Work is Certified by the Architect.

§9.10.4 Make the following changes in Section 9.10.4:

In the first sentence, delete the word "the" and replace it with "Unless and until the Contractor makes a subsequent Claim against the Owner, the".

Add the following as the last sentence. "Neither the Owner's offer of a final payment nor its acceptance by the Contractor shall legally prevent or limit the Owner's right to assert any and all counterclaims in litigation filed by the Contractor as allowed in section 15.1.8."

Add the following Sections to Article 9:

§9.11 LIQUIDATED DAMAGES

§9.11.1 The Owner will suffer financial loss if the Work is not Substantially Complete within the Contract Time as defined in Article 8, and if final completion is not achieved within the specified time frame following Substantial Completion. As liquidated damages, and not as a penalty, the Contractor and the Contractor's surety shall be liable for and shall pay the Owner the sum(s) stated in this Agreement and/or purchase order.

§9.11.2 Allowances may be made for delays due to shortages of materials and/or energy resources, subject to proof by documentation, and also for delays due to strikes or other delays beyond the control of the Contractor. All delays and any claim for extension of Contract Time must be properly documented in accordance with Section 15.1.5 by the Contractor and must be made within the time limits stated in Section 15.1.2.

ARTICLE 10
PROTECTION OF PERSONS AND PROPERTY

§10.2.8 INJURY OR DAMAGE TO PERSON OR PROPERTY

§10.2.8 Make the following changes to Section 10.2.8:

In the first sentence, delete "within a reasonable time not exceeding 21 days" and substitute "immediately".

§10.3 HAZARDOUS MATERIALS

§10.3.3 Delete Section 10.3.3 in its entirety.

ARTICLE 11
INSURANCE AND BONDS

§11.1 CONTRACTOR'S LIABILITY INSURANCE

§11.1.2 Add the following to the end of §11.1.2.

At a minimum the Contract shall provide, at the Contractor's Expense:

§11.1.2.1. a Performance Bond and a Labor and Material Payment Bond for 100% of the Contract Sum and, if applicable, a two-year roofing Maintenance Bond for the full value of the roofing system.

§11.1.2.2 An attorney-in-fact who executes the bonds on behalf of the surety shall affix thereto a certified and current copy of power of attorney.

§11.1.2.3 The bonds shall be issued on State of West Virginia forms. The Contractor shall deliver the required bonds and all other contract documents to the Owner not later than 15 days following receipt of the Owner's notice of intent to award a Contract.

§11.2 Owner's Insurance Delete section 11.2 in its entirety.

§11.4 Loss of Use, Business Interruption, and Delay in Completion Insurance

§11.4 Section 11.4 is deleted in its entirety.

§11.5.1 Make the following changes in Section 11.5.1:

In the first sentence, substitute "Contractor" for "Owner" each time the latter word appears.

§11.5.2 Delete Section 11.5.2 in its entirety and substitute the following:

§11.5.2 Prior to settlement of insured loss, the Contractor shall notify the parties of the terms of the proposed settlement as well as the proposed allocation of the insurance proceeds. The parties shall have 14 days from the receipt of notice to object. If no objection is made, the Contractor shall proceed as proposed and allocate the settlement accordingly. If such objection is made, the dispute shall be resolved as provided in Section 15.4. The Contractor, in that case, shall make settlement with insurers in accordance with directions of the Court. If distribution of the insurance proceeds as directed by the Court is required, the Court will direct such distribution. Any work to repair the damage will be incorporated into the contract as a change order.

ARTICLE 13
MISCELLANEOUS PROVISIONS

§13.4 TESTS AND INSPECTIONS

§13.4.1 Remove the phrase "so require" and insert in its place "prohibit delegation of the test to Contractor"

§13.6 INTEREST

§13.6 Delete Section 13.5 in its entirety and substitute the following:

Notwithstanding any other provision in the Contract Documents, West Virginia Code does not authorize the payment of interest on late payments. Accordingly, interest charges for late payment are prohibited.

Add the following Sections to Article 13:

§13.6 WORKERS COMPENSATION

The Contractor shall provide proof of compliance with West Virginia Worker's Compensation laws and regulations.

§13.7 CONTRACTOR'S LICENSE

§13.7.1 West Virginia Code §21-11-2 requires that all persons desiring to perform contractual work in West Virginia shall be duly licensed. The West Virginia Contractor's Licensing Board is empowered to issue a contractor's license.

§13.7.2 West Virginia Code §21-11-11 requires any prospective Bidder to include the Bidder's contractor's license number on its Bid. The successful Bidder will be required to furnish a copy of its contractor's license in a classification appropriate to the Work prior to issuance of a purchase order/contract.

ARTICLE 14
TERMINATION OR SUSPENSION OF THE CONTRACT

§14.1 TERMINATION BY THE CONTRACTOR

§14.1.1 Make the following changes in Section 14.1.1:

At the end of clause 14.1.1.3 delete "; or" and insert a period.

Delete clause 14.1.1.4 in its entirety.

§14.1.3 Delete Section 14.1.3 in its entirety and substitute the following:

§14.1.3 If one of the reasons described in Section 14.1.1 or 14.1.2 exist, the Contractor may, upon seven days written notice to the Owner and Architect, terminate the Contract. In such event, the Contractor shall be paid for all Work performed in accordance with the Contract Documents, for reasonable and proven termination expenses and a reasonable allowance for overhead and profit. However, such payment, exclusive of termination expenses, shall not exceed the Contract Sum as reduced by other payments made to the Contractor and further reduced by the value of Work as yet not completed. The Contractor shall be entitled to reasonable overhead, but not profit, on Work not performed.

§14.2 TERMINATION BY THE OWNER FOR CAUSE

§14.2.4 Delete Section 14.2.4 in its entirety and substitute the following:

§14.2.4 If the unpaid balance of the Contract Sum exceeds the cost of finishing the Work, including compensation for the Architect's services and expenses made necessary thereby, and other

damages incurred by the Owner and not expressly waived, such excess shall not be paid to the Contractor. If such costs and damages exceed the unpaid balance, the Contractor shall pay the difference to the Owner. The amount to be paid to the Owner shall be certified by the Initial Decision Maker, upon application, and this obligation for payment shall survive termination of the Contract.

§14.4 TERMINATION BY THE OWNER FOR CONVENIENCE

§14.4.1 Delete Section 14.4.1 in its entirety and substitute the following:

§14.4.1 The Owner may, at any time, terminate the Contract for the Owner's convenience and without cause upon thirty days written notice.

§14.4.3 Delete Section 14.4.3 in its entirety and substitute the following:

§14.4.3 In case of such termination for the Owner's convenience, the Contractor shall be entitled to receive payment from the Owner on the same basis provided in Section 14.1.3 above.

Add the following Section to Article 14:

§14.5 FISCAL YEAR FUNDING

§14.5 Work performed under this Contract is to continue in the succeeding fiscal year contingent upon funds being appropriated by the Legislature for this Work. In the event funds are not appropriated for this Work, this Contract becomes of no effect and is null and void after June 30.

ARTICLE 15
CLAIMS AND DISPUTES

§15.1 Claims

§15.1.2 TIME LIMITS ON CLAIMS

§15.1.2 Delete Section 15.1.2 in its entirety and substitute the following:

Any applicable statute of limitations shall be in accordance with West Virginia Code.

§15.1.3 **NOTICE OF CLAIMS** Add the following to § 15.1.3:

§15.1.3.3 All claims, and notice of claims that require an increase in contract time, contract scope, or contract sum must be made in writing.

§ 15.1.8 is added to the Contract as follows:

§ 15.1.8 Counterclaims – In the event that Contractor makes a claim, Owner reserves the right to make a counterclaim and will not be barred from doing so even if final payment has been made.

§15.2 INITIAL DECISION

§15.2.1 In the third sentence of Section 15.2.1 , insert "or litigation" following the word "mediation" and remove the phrase "binding dispute resolution" and replace it with "or litigation".

§15.2.5 Delete the last sentence in Section 15.2.5 and substitute the following:

Approval or rejection of a claim by the Initial Decision Maker shall be final and binding on the parties unless it is pursued further by either party in accordance with Section 15.2.6.

§15.2.6 Make the following change to clause 15.2.6.1:

In the last sentence, delete "or pursue binding dispute resolution proceedings."

§15.2.8 Delete Section 15.2.8 in its entirety.

§15.3 MEDIATION

§15.3.1 Delete "binding dispute resolution" and substitute "litigation in a court of competent jurisdiction."

§15.3.2 Delete Section 15.3.2 in its entirety and substitute the following:

§15.3.2 The parties shall endeavor to resolve their Claims by non-binding mediation which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with its Construction Industry Mediation Procedures in effect on the date of the Agreement.

§ 15.3.3 Remove section 15.3.3 in its entirety

§15.4 ARBITRATION

§15.4 Delete Section 15.4 in its entirety and substitute the following:

§15.4 SETTLEMENT OF CLAIMS

§15.4.1 The Constitution of West Virginia grants the State sovereign immunity from any and all Claims against the public treasury. This immunity applies and is extended to all agencies of the State, including the Owner. It shall be in full force and effect as it relates to this Contract. The West Virginia Legislature, recognizing that certain Claims against the State may constitute a moral obligation of the State and should be heard, has established the West Virginia Claims Commission for this purpose. The Parties understand that this sovereign immunity and the Constitution of the

State of West Virginia prohibit the State and Owner, from entering into binding arbitration. Notwithstanding any provision to the contrary in the Contract Documents, all references to arbitration, regardless of whether they are included in the AIA Document A201-2017 or another related document are hereby deleted and all Claims of the Contractor for monetary relief, and only of the Contractor, arising out of or related to this Contract shall be decided by the West Virginia Claims Commission. The following Sections have been rewritten to bring them into conformance with the foregoing.

§15.4.2 Claims by the Owner may be brought against the Contractor in the Circuit Court of Kanawha County, West Virginia, or in any other court that has jurisdiction, as the Owner may elect.

§15.4.3 Any Claim arising out of or related to the Contract, except Claims relating to aesthetic effect and except those waived as provided for in Sections 15.1.6, 9.10.4 and 9.10.5, shall, within 30 days after submission of the decision by the Initial Decision Maker, be settled for the Contractor by the West Virginia Claims Commission or, for the Owner, by the Circuit Court of Kanawha County or any other court of jurisdiction as the Owner may elect.

§15.4.4 Notice of such action shall be filed in writing with the other party to the Contract, and a copy of such notice shall be filed with the Initial Decision Maker and the Architect, if applicable.

§15.4.5 During court proceedings, the Owner and the Contractor shall comply with Section 15.1.3.

§15.4.6 Claims shall be made within the time limits specified in Section 15.2.6.1.

§15.4.7 The party filing a Claim must assert in the demand all Claims then known to that party on which action is permitted.

Add the following Article:

ARTICLE 16
EQUAL OPPORTUNITY

§16.1 COMPLIANCE WITH REGULATIONS UNDER TITLE VI OF THE FEDERAL CIVIL RIGHTS ACT OF 1964 AND EXECUTIVE ORDER 65-2 BY THE GOVERNOR OF WEST VIRGINIA DATED DECEMBER 15, 1965

§16.1.1 The Contractor agrees that it will comply with Title VI of the Federal Civil Rights Act of 1964 (P.L. 88352) and the regulations of the State of West Virginia, to the end that no person in the State, or in the United States, shall on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or otherwise subjected to discrimination under any program or activity for which the Contractor receives any recompense or other consideration of value, either directly or indirectly from the State; and HEREBY GIVES ASSURANCE THAT it will immediately take any measures necessary to effectuate this Agreement.

§16.1.2 If any real property or structure thereon is provided or improved, this assurance shall obligate the Contractor, or in the case of any transfer of such property, any transferee, for the period during which the real property or structure is used for a purpose for which any State payment is extended or for another purpose involving the provision of similar services or benefits. If any other goods or services are so provided, this assurance shall obligate the Contractor for the period during which it supplies such goods or services.

§16.1.3 The Contractor recognizes and agrees that such right to provide property, goods or services to the State will be extended in reliance on the representations and agreements made in assurance, and that the State shall have the right to seek judicial enforcement of this assurance. This is binding on the Contractor, its successors, transferee, and assignee, or any authorized person on behalf of the Contractor.

END OF SUPPLEMENTARY CONDITIONS TO AIA DOCUMENT A201-2017

Any provisions of the Contract Documents that conflict with these Supplementary Conditions shall be null and void unless they have been approved in writing by the applicable State purchasing officer and the Attorney General, and are clearly identified as such in the bid documents.

The Owner and Contractor hereby agree to the full performance of the covenants contained herein.

IN WITNESS WHEREOF, the Owner and Contractor have entered into this Agreement as of the effective date as stated in the A101-2017 (when utilized) or other Contract Documents.

Owner:		Contractor:

GENERAL NOTES

1. PERFORM ALL WORK IN ACCORDANCE WITH APPLICABLE LOCAL, STATE AND FEDERAL CODES AND REGULATIONS.
2. COORDINATE WORK WITH OTHER CONTRACTORS AND UTILITY COMPANIES, INCLUDING CONTRACTORS FOR OTHER PROJECTS, SANITARY BOARD, WATER COMPANY, POWER COMPANY, CABLE COMPANY, PHONE COMPANY, AND INTERNET DATA COMPANY.
3. AT ALL BUILDINGS FINISH FLOOR ELEVATION, 100'-0 FIRST FLOOR, IS RELATIVE. F.F.E. 100'-0" = NAVD 88 ELEVATION 600.33'
4. OBTAIN REQUIRED PERMITS PERTAINING TO THE BUILDING PRIOR TO THE START OF CONSTRUCTION.
5. DIMENSIONS ARE TO FACE OF WALL AND CENTERLINE OF BEAMS AND COLUMNS UNLESS NOTED OTHERWISE. EXTERIOR WALLS ARE TO INSIDE FACE OF PRECAST WALL.
6. ALL ANGLES AT INCREMENTS OF 45 DEGREES UNLESS NOTED OTHERWISE.
7. VERIFY COMPATIBILITY OF PRODUCTS WITH EACH OTHER AND WITH THEIR INTENDED PURPOSES.
8. PROVIDE THROUGH PENETRATION FIRE STOP SYSTEM AT PENETRATIONS AND AROUND OPENINGS THROUGH FIRE RATED WALLS, CEILINGS AND FLOORS. PROVIDE RATED DOOR FRAMES, RATED DOORS AND RATED HARDWARE INCLUDING FIRE SEALS AND CLOSERS AT DOORS IN RATED WALLS.
9. PROVIDE SMOKE-TIGHT SEALANT AT ALL DOORS AND OTHER PENETRATIONS THROUGH SMOKE PARTITIONS AND SMOKE DAMPERS IN DUCTWORK PER APPLICABLE CODES, SEE MEP DRAWINGS AND SPECIFICATIONS FOR MECHANICAL, ELECTRICAL AND PLUMBING REQUIREMENTS.
10. LOCATE HINGE SIDE OF DOOR FRAMES AT 4" OFF FACE OF ADJACENT WALL UNLESS DIMENSIONED OTHERWISE. PROVIDE 8" AT OFFICES.
11. FINISH COLORS FOR ALL MATERIALS, INTERIOR AND EXTERIOR, SHALL BE SELECTED BY ARCHITECT.
12. SLOPE SIDEWALKS AND SHAPE EARTH TO DRAIN AWAY FROM ALL BUILDINGS WITHOUT PONDING.
13. LOCATE UTILITIES ON SITE PRIOR TO EXCAVATING. THE CONTRACTOR SHALL EXERCISE CARE SO AS NOT TO DAMAGE UTILITIES DURING CONSTRUCTION. THE CONTRACTOR SHALL NOTIFY THE APPROPRIATE UTILITY COMPANIES IN THE EVENT UTILITY LINES REQUIRE RELOCATION. THE CONTRACTOR SHALL REPAIR ANY UTILITY LINES DAMAGED BY THE CONTRACTOR IMMEDIATELY AND TO THE SATISFACTION OF THE UTILITY COMPANY.
14. VERIFY ALL CONDITIONS AND DIMENSIONS ON THE JOB SITE. IF EXISTING FIELD CONDITIONS DO NOT PERMIT INSTALLATION OF THE WORK IN ACCORDANCE WITH THE DRAWINGS AND SPECIFICATIONS, NOTIFY THE ARCHITECT IMMEDIATELY AND PROVIDE A SKETCH OF THE CONDITION.
15. DETAILS SHOWN ARE INTENDED FOR SPECIFIC LOCATIONS AND CONDITIONS. MINOR MODIFICATIONS MAY BE REQUIRED TO SUIT SIMILAR CONDITIONS AND SHALL BE CONSIDERED PART OF THE WORK.
16. DO NOT SCALE DRAWINGS.
17. COORDINATE LOCATION AND SIZE OF ALL OPENINGS INTERIOR AND/OR EXTERIOR WITH ALL TRADES PRIOR TO INSTALLATION. MASONRY OPENING DIMENSIONS ARE NOMINAL. PROVIDE ADDITIONAL CLEARANCE REQUIRED BY MANUFACTURER PER INSTALLATION OF BUILDING ELEMENTS.
18. VERIFY THAT INSERTS AND EMBEDDED ITEMS REQUIRED BY ALL TRADES ARE INSTALLED PRIOR TO POURING OF CONCRETE OR FABRICATION OF PRECAST PANELS.
19. COORDINATE ALL SLEEVING WORK, INCLUDING WORK "FUTURE" UTILITIES AND FIXTURES.
20. UNLESS OTHERWISE INDICATED ON THE DRAWINGS OR IN THE SPECIFICATIONS AS BEING "N.I.C.", "FUTURE" OR BY OWNER, ALL ITEMS, MATERIALS, ETC. AND INSTALLATION OF SAME ARE A PART OF THE CONTRACT WORK.
21. IN ALL CIRCUMSTANCES, ISOLATE ALUMINUM FROM CONTACT WITH STEEL, CMU, AND/OR CONCRETE.
22. PROVIDE ALL NECESSARY BACKING AND FRAMING FOR ALL MOUNTED ITEMS INCLUDING, BUT NOT LIMITED TO LIGHT FIXTURES, MIRRORS AND ALL OTHER ITEMS REQUIRING SAME. BACKING MUST BE CAPABLE OF CARRYING LOADS OF HUNG ITEMS AND MAY BE A COMBINATION OF STEEL PLATES, STEEL ANGLES, COLD ROLLED CHANNELS AND BLOCKING. PROVIDE FASTENERS AND/OR WELDING FOR BACKING.
23. PROVIDE ELECTRICAL GROUND FOR ALL STEEL TO STEEL CONNECTIONS.
24. PROVIDE CONCEALED CONDUIT WHEREVER POSSIBLE, EXPOSED CONDUIT IS ACCEPTABLE ONLY WITH THE APPROVAL OF THE ARCHITECT. EXPOSED CONDUIT WILL BE REQUIRED AT EXPOSED PRECAST PANELS. USE ELECTRICAL BILLETS PROVIDED IN PRECAST PANEL WALLS FOR VERTICAL ELECTRICAL DROPS TO AVOID EXPOSED CONDUIT AS MUCH AS POSSIBLE. IN ALL CASES, PROVIDE NEAT, ORDERLY CONDUIT, MOUNTED HIGH ON WALLS.
25. PREPARE SUBSTRATES AND INSTALL ALL PRODUCTS IN ACCORDANCE WITH MANUFACTURER'S WRITTEN RECOMMENDATIONS FOR THE CONDITIONS AND APPLICATIONS INTENDED.
26. PROTECT WALLS OF BUILDING FROM BEING MARRED BY PAVING OPERATIONS.
27. PROVIDE, COORDINATE, AND INTEGRATE CARDKEY ACCESS WITH CAPITOL PROTECTIVE SERVICES SYSTEM.
28. PROVIDE A WEATHER TIGHT AND SECURE, TEMPORARY BARRIER AT ALL LOCATIONS THAT MAY ALLOW ACCESS FOR INCLIMATE WEATHER OR UNWANTED VISITORS DURING DEMOLITION AND CONSTRUCTION.
29. PROTECT BATT INSULATION FROM MOISTURE. REPLACE BATT INSULATION THAT GETS WET.

G1 MAINTAIN EGRESS FOR OCCUPIED STRUCTURES AT ALL TIMES, INCLUDING ON-SITE STRUCTURES AND OFF-SITE STRUCTURES UTILIZING VIRGINIA TERRACE FOR ACCESS AND EMERGENCY USE.

PHASE A: BASE BID

A1 THE GROUNDS MECHANICS SHOP AND AREAS AROUND IT THAT ARE NECESSARY FOR ITS OCCUPATION AND USE SHALL BE CONSTRUCTED FIRST. MAINTAIN THE OWNER'S ACCESS AND USE OF THE EXISTING GROUNDS MECHANICS SHOP UNTIL THE NEW GROUNDS MECHANICS SHOP IS OCCUPIED BY THE OWNER.

A2 CONSTRUCTION OF THE GROUNDS MECHANICS SHOP PORTION OF THE WAREHOUSE/GROUNDS BUILDING IS ESSENTIAL TO THE FUNCTIONS OF THE OWNER AND IS REQUIRED PRIOR TO DEMOLITION OF THE EXISTING GROUNDS MECHANICS SHOP, WHICH IS INCLUDED IN THIS PHASE.

A3 CONSTRUCT OPEN STORAGE, BULK STORAGE, FUEL TANKS AND RELATED CONSTRUCTION, ASSOCIATED PAVEMENTS, AND UTILITIES.

PHASE B: BASE BID

B1 PROVIDE CONCRETE PAD AND RELOCATE GREEN BUILDING.

B2 CONSTRUCT BALANCE OF THE WAREHOUSE/GROUNDS BUILDING. RELOCATE BALANCE OF UTILITIES AND EQUIPMENT SERVING IT TO THEIR FINAL LOCATIONS.

IF NO ALTERNATES ARE ACCEPTED, PROVIDE FENCING FROM WAREHOUSE TO CHILLER AREA, AND RESTORE THE STAGING AREA TO A PARKING AREA WITH GRAVEL AND BUMPER BLOCKS.

PHASE C: ALTERNATE 1

C1 CONSTRUCT MAIL ROOM, INCLUDING RELATED CONSTRUCTION, ASSOCIATED PAVEMENTS, UTILITIES, AND FENCING TO CHILLER AREA.

C2 DEMOLISH EXISTING MAIL ROOM, INCLUDING FOUNDATIONS AND FOUNDATIONS OF PREVIOUSLY DEMOLISHED PORTION OF THE BUILDING.

IF NO ADDITIONAL ALTERNATES ARE SELECTED, PROVIDE GRAVEL ROADWAY TO MATCH EXISTING FOR THE ENTIRE AREA OF THE MAIL ROOM AND PREVIOUSLY DEMOLISHED POTIONS OF THE BUILDING. REMOVE CURBS AND PROVIDE GRAVEL TRANSITIONS FOR TRUCK ROADWAY ACCESS TO THE WAREHOUSE BY THE EXISTING MAIL ROOM AT JEFFERSON STREET.

PHASE D: ALTERNATE 2

D PROVIDE PARKING AREAS AND CONSTRUCTION NOTED IN ALTERNATE 2 WORK, INCLUDING UTILITIES, PAVING, AND LIGHT POLES.

PHASE E: ALTERNATE 3

E PROVIDE PARKING AREAS AND CONSTRUCTION NOTED IN ALTERNATE 3 WORK, INCLUDING UTILITIES, PAVING, LIGHT POLES, AND STORM RETENTION AREAS.

GENERAL NOTES

1. THE CONTRACTOR IS SOLELY RESPONSIBLE FOR SITE SAFETY ASSOCIATED WITH THE WORK UNDER THIS PROJECT AND FOR COMPLIANCE WITH ALL FEDERAL, STATE, AND LOCAL HEALTH AND SAFETY LAWS, CODES, REGULATIONS, AND ORDINANCES INCLUDING BUT NOT LIMITED TO THOSE CURRENTLY MANDATED BY THE OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION (OSHA).
2. CONTRACTOR SHALL NOTIFY MISS UTILITY (811) 48 HOURS IN ADVANCE OF START OF CONSTRUCTION ACTIVITIES. CONTRACTOR IS SOLELY RESPONSIBLE FOR ANY DAMAGE TO EXISTING UNDERGROUND OR ABOVE GROUND UTILITIES.
3. THE INFORMATION SHOWN ON THE DRAWINGS CONCERNING TYPE, SIZE, AND LOCATION OF UNDERGROUND UTILITIES IS NOT GUARANTEED TO BE ACCURATE OR ALL INCLUSIVE. THE CONTRACTOR SHALL BE RESPONSIBLE FOR MAKING HIS OWN DETERMINATIONS AS TO THE TYPE, SIZE, AND LOCATION OF UNDERGROUND UTILITIES AS MAY BE NECESSARY TO AVOID DAMAGE THERETO.
4. THE CONTRACTOR IS SOLELY RESPONSIBLE FOR ALL DAMAGE TO ABOVE GROUND OR UNDERGROUND UTILITIES AS A RESULT OF WORK PERFORMED UNDER THIS CONTRACT.
5. PRIOR TO CONSTRUCTION, THE CONTRACTOR SHALL VERIFY EXISTING CONDITIONS, ALL DIMENSIONS, AND ELEVATIONS AT THE SITE. WHERE CONDITIONS VARY FROM THOSE SHOWN ON THE PLANS, THE CONTRACTOR SHALL IMMEDIATELY NOTIFY THE ENGINEER OF SUCH CONDITIONS AND OBTAIN AUTHORIZATION BEFORE PROCEEDING WITH ADJUSTMENTS NECESSARY FOR INSTALLATION AND COMPLETION OF THE WORK.
6. THE CONTRACTOR SHALL EXCAVATE TEST PITS TO DETERMINE ACTUAL DEPTH OF EXISTING UTILITIES IN THE VICINITY OF WORK. VERIFICATION OF EXISTING UTILITIES SHALL TAKE PLACE WITH AMPLE TIME TO ADJUST PROPOSED ELEVATIONS AND ALIGNMENTS OF NEW WORK PRIOR TO INSTALLATION.
7. DEVIATIONS FROM THESE PLANS WITHOUT PRIOR AUTHORIZATION FROM THE ENGINEER MAY BE CAUSE FOR WORK TO BE UNACCEPTABLE.
8. THE CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING WITH LOCAL OVERHEAD UTILITY COMPANIES FOR ANY ADDITIONAL SUPPORT OF EXISTING UTILITY POLES AS REQUIRED FOR TRENCH EXCAVATION. ALL COSTS OF SUCH WORK SHALL BE PAID BY THE CONTRACTOR AT NO ADDITIONAL COST TO THE OWNER.
9. COORDINATE CONNECTIONS TO EXISTING UTILITIES WITH THE OWNER AND ENGINEER.
10. WHERE NEW WORK JOINS EXISTING WORK AND WHERE ALTERATIONS TO EXISTING WORK CAUSE DAMAGE TO THE REMAINING EXISTING WORK, THE CONTRACTOR SHALL RESTORE SAID PLACE AND AREAS TO FINISHED CONDITION, CONSISTENT WITH NEW WORK USING IDENTICAL MATERIALS FOR PATCHING, PAINTING, REPAIRING, ETC.
11. MAINTAIN 10' HORIZONTAL OR 18" VERTICAL CLEARANCE BETWEEN WATER AND SEWER MAINS, NEW AND EXISTING.
12. UPON COMPLETION OF CONSTRUCTION, THE CONTRACTOR SHALL FURNISH THE ENGINEER A RED-LINE SET OF RECORD DRAWINGS. RECORD DRAWINGS SHOULD INDICATE LENGTHS OF INSTALLED PIPE, LOCATIONS OF FITTINGS AND SPECIALS, AND FINAL INSTALLED MANHOLE INVERT ELEVATIONS.
13. ALL NECESSARY LICENSES AND PERMITS SHALL BE OBTAINED BY THE CONTRACTOR AT ITS EXPENSE, UNLESS PREVIOUSLY OBTAINED BY THE OWNER.
14. ALL PIPE LENGTHS AND DISTANCES BETWEEN STRUCTURES ARE MEASURED FROM CENTER OF STRUCTURE TO CENTER OF STRUCTURE ALONG A HORIZONTAL PLANE.
15. ELEVATIONS SHOWN ARE BASED ON NAVD 88.
16. THE CONTRACTOR SHALL PROVIDE ALL STAKEOUT SURVEY. ANY EXISTING STAKE OUT SHALL NOT BE USED BY THE CONTRACTOR.
17. ALL DISTURBED PROPERTY PINS SHALL BE RESET BY A LICENSED PROFESSIONAL SURVEYOR, AT THE CONTRACTOR'S EXPENSE.
18. THE CONTRACTOR SHALL REINSTALL ALL SIGNS REMOVED OR DAMAGED DURING CONSTRUCTION AS REQUIRED AS REQUIRED BY LOCAL DOT ALONG ROADWAYS.
19. ALL PAVEMENT CUTS SHALL BE SAW CUT ALONG A STRAIGHT CONTINUOUS EDGE.
20. THE CONTRACTOR SHALL REMOVE AND REINSTALL ALL EXISTING FENCE AS REQUIRED FOR PIPE INSTALLATION. ANY ADDITIONAL FENCE MATERIALS REQUIRED SHALL BE PROVIDED BY THE CONTRACTOR AT NO ADDITIONAL COST TO THE OWNER. NO FENCE POSTS SHALL BE PLACED WITHIN 5' OF THE PIPE.
21. THE CONTRACTOR SHALL FURNISH AND INSTALL ALL SHEETING AND SHORING REQUIRED FOR THE INSTALLATION OF THE UTILITY, ALL EXCAVATIONS SHALL BE KEPT WITHIN THE DESIGNATED EASEMENT WIDTHS, EXCAVATION WITHIN PAVED AREAS SHALL BE KEPT TO A MINIMUM. SHEETING SHALL BE INSTALLED AS REQUIRED TO PROTECT EXISTING UTILITIES, ROADS, ETC.
22. CONTRACTOR SHALL PLAN AND CONSTRUCT WORK SO AS TO CAUSE MINIMUM INCONVENIENCE TO THE OWNER AND PUBLIC. THE CONTRACTOR SHALL PROVIDE TRAFFIC CONTROL AND ERECT AND MAINTAIN AT ALL TIMES DURING THE PROGRESS OR TEMPORARY SUSPENSION OF WORK, SUITABLE BARRIERS, FENCES, SIGNS OR OTHER ADEQUATE PROTECTION, INCLUDING FLAG MEN AND WATCHMEN AS NECESSARY TO INSURE THE SAFETY OF THE PUBLIC AS WELL AS THOSE ENGAGED IN THE CONSTRUCTION WORK. CONSTRUCTION SIGNAGE SHALL BE IN ACCORDANCE WITH THE LATEST EDITION OF "CONSTRUCTION AND MAINTENANCE OPERATIONS SUPPLEMENT TO THE MANUAL ON UNIFORM TRAFFIC CONTROL DEVICES" OR AS OTHERWISE REQUIRED BY THE LOCAL DOT.
23. WHERE THE CONTRACTOR DETERMINES THAT ENCROACHMENT ONTO PRIVATE PROPERTY IS NECESSARY, AND AN EASEMENT HAS NOT BEEN PROVIDED, THE CONTRACTOR SHALL CONTACT INDIVIDUAL PROPERTY OWNERS AND OBTAIN WRITTEN APPROVAL FOR THAT ENCROACHMENT.
24. CONTRACTOR SHALL NOTIFY HOME OWNERS AT LEAST 7 DAYS PRIOR TO CONSTRUCTION THAT CONSTRUCTION ACTIVITY WILL TAKE PLACE IN THEIR AREA.
25. ENVIRONMENTAL PROTECTION: IN ORDER TO PREVENT AND TO PROVIDE FOR ABATEMENT AND CONTROL OF ANY ENVIRONMENTAL POLLUTION ARISING FROM THEIR CONSTRUCTION ACTIVITIES, THE CONTRACTOR SHALL COMPLY WITH ALL APPLICABLE FEDERAL, STATE, AND LOCAL LAWS AND REGULATIONS CONCERNING ENVIRONMENTAL POLLUTION CONTROL AND ABATEMENT, AS WELL AS SPECIFIC REQUIREMENTS AND CONDITIONS OF ANY NECESSARY PERMITS FOR CONSTRUCTION OBTAINED BY THE OWNER.
26. EXISTING VEGETATION OUTSIDE OF THE CLEARING LIMITS TO REMAIN SHALL BE PROTECTED FROM DAMAGE.
27. SURFACE AND GROUND WATER CONTROL IS THE CONTRACTORS RESPONSIBILITY. AS SUCH, TEMPORARY GRADING, DIVERSION DITCHES, AND DEWATERING EQUIPMENT MAY BE REQUIRED. ANY SATURATED OR OTHERWISE DAMAGED SUBGRADE WILL BE REMOVED AND REPLACED WITH SUITABLE FILL MATERIALS AT NO ADDITIONAL COST TO THE OWNER.
28. THE CONTRACTOR SHALL NOT USE EXISTING SANITARY SEWERS AS A MEANS OF DEWATERING DURING CONSTRUCTION WORK. CONTRACTOR SHALL BE RESPONSIBLE FOR ALL SURFACE WATER RUNOFF AND GROUND WATER FROM THE TRENCHES AND SHALL PROVIDE NECESSARY DEWATERING AND PUMPING EQUIPMENT FOR HANDLING THESE FLOWS DURING CONSTRUCTION. DEWATERING ACTIVITIES TO COMPLY WITH ALL FEDERAL, STATE, AND LOCAL LAWS. ANY ADDITIONAL PERMITS REQUIRED AS A RESULT OF DEWATERING ACTIVITIES ARE THE CONTRACTOR'S RESPONSIBILITY. ALL DEWATERING COSTS ARE CONSIDERED ANCILLARY TO THE COST OF WORK AND NO ADDITIONAL COMPENSATION WILL BE CONSIDERED FOR DEWATERING.
29. ALL WATER AND SEWER MAIN CONSTRUCTION SHALL CONFORM TO WEST VIRGINIA DEPARTMENT OF HEALTH AND HUMAN RESOURCES REGULATIONS.
30. ALL PIPELINE FITTINGS SHALL BE RESTRAINED AS SHOWN IN THE DETAILS.
31. PIPE JOINT DEFLECTION SHALL NOT EXCEED PIPE MANUFACTURER'S MAX. ALLOWABLE LIMITS.
32. A REPRESENTATIVE OF THE ENGINEER MUST BE PRESENT FOR ALL TESTING OF WATER AND SEWER MAINS.
33. ANY AND ALL VISIBLE LEAKAGE WILL BE REPAIRED BY METHODS DEEMED SUITABLE BY THE ENGINEER.
34. ALL DISTURBED AREAS SHALL BE SEEDED AND MULCHED IN ACCORDANCE WITH WEST VIRGINIA DIVISION OF HIGHWAYS STANDARD SPECIFICATIONS, SECTION 652, SEEDING AND MULCHING, SEED MIX AS DIRECTED AS OWNER.
35. NO METALLIC UTILITY COMPONENTS/HARDWARE SHALL BE INSTALLED IN THE VICINITY OF COAL. IF COAL IS DISCOVERED IN UTILITY EXCAVATIONS, CONTACT THE ENGINEER.

MAINTENANCE AND SEEDING NOTES

1. AT A MINIMUM, INSPECTIONS OF ALL EROSION AND SEDIMENT CONTROLS WILL BE CONDUCTED EVERY 7 DAYS AND WITHIN 24 HOURS OF A RAIN EVENT OF 0.5 INCHES OR GREATER OF RAINFALL IN 24 HOURS.
2. EXCEPT AS NOTED BELOW, STABILIZATION MEASURES SHALL BE INITIATED AS SOON AS PRACTICABLE IN PORTIONS OF THE SITE WHERE CONSTRUCTION ACTIVITIES HAVE TEMPORARILY OR PERMANENTLY CEASED, BUT IN NO CASE MORE THAN SEVEN DAYS AFTER THE CONSTRUCTION ACTIVITY IN THAT PORTION OF THE SITE HAS PERMANENTLY CEASED.
3. WHERE THE INITIATION OF STABILIZATION MEASURES BY THE SEVENTH DAY AFTER CONSTRUCTION ACTIVITY TEMPORARILY OR PERMANENTLY CEASES IS PRECLUDED BY SNOW COVER, STABILIZATION MEASURES SHALL BE INITIATED AS SOON AS CONDITIONS ALLOW.
4. WHERE CONSTRUCTION ACTIVITY WILL RESUME ON A PORTION OF THE SITE WITHIN 14 DAYS FROM WHEN ACTIVITIES CEASED (e.g., THE TOTAL TIME PERIOD THAT CONSTRUCTION ACTIVITY IS TEMPORARILY HALTED IS LESS THAN 14 DAYS), THEN STABILIZATION MEASURES DO NOT HAVE TO BE INITIATED ON THAT PORTION OF THE SITE BY THE SEVENTH DAY AFTER CONSTRUCTION ACTIVITIES HAVE TEMPORARILY CEASED.
5. AREAS WHERE THE SEED HAS FAILED TO GERMINATE ADEQUATELY (UNIFORM PERENNIAL VEGETATIVE COVER WITH A DENSITY OF 70%) WITHIN 30 DAYS AFTER SEEDING AND MULCHING MUST BE RESEEDED IMMEDIATELY, OR AS SOON AS WEATHER CONDITIONS ALLOW.

SEDIMENT AND EROSION CONTROL NOTES

1. ALL SEDIMENT AND EROSION CONTROL MEASURES ARE SUBJECT TO INSPECTION AND CHANGES BY THE WVDEP OR ENGINEER.
2. LIMIT THE AMOUNT OF TOTAL DISTURBANCE ON SITE TO A MINIMUM. FINAL CONDITIONS ON SITE SHALL BE PREPARED AS A VEGETATED LAWN GRASS COVER MAINTAINED IN GOOD CONDITION UNTIL COMPLETION OF WORK.
3. ALL PAVED SURFACES (CONCRETE, ASPHALT, RIP-RAP, ETC.) SHALL BE INSTALLED AS SOON AS POSSIBLE UPON COMPLETION OF THE FINAL GRADING.
4. IN ORDER TO PREVENT AND TO PROVIDE FOR ABATEMENT AND CONTROL OF ANY ENVIRONMENTAL POLLUTION ARISING FROM THEIR CONSTRUCTION ACTIVITIES, THE CONTRACTOR SHALL COMPLY WITH ALL APPLICABLE FEDERAL, STATE, AND LOCAL LAWS AND REGULATIONS CONCERNING ENVIRONMENTAL POLLUTION CONTROL AND ABATEMENT, AS WELL AS SPECIFIC REQUIREMENTS AND CONDITIONS OF ANY NECESSARY PERMITS FOR CONSTRUCTION OBTAINED BY THE OWNER.
5. THE CONTRACTOR IS RESPONSIBLE TO KEEP A RECORD OF WHEN CONSTRUCTION ACTIVITIES HAVE BEGUN AND HAVE EITHER TEMPORARILY OR PERMANENTLY CEASED AND WHEN SEDIMENT AND EROSION CONTROL MEASURES HAVE BEEN INITIATED, INSPECTED, MAINTAINED, AND REMOVED.
6. WASTE AREAS - THE CONTRACTOR WILL BE RESPONSIBLE FOR THE EROSION AND SEDIMENT CONTROLS AT EACH WASTE SITE INCLUDING, BUT NOT LIMITED TO, SILT FENCE, DIVERSION DITCHES, ROCK CHECK STRUCTURES, ETC. AS APPROPRIATE, AND THE RECLAMATION THEREOF ONCE CONSTRUCTION IS COMPLETE.
7. OTHER CONSTRUCTION PRACTICES - ANY WATER PUMPED FROM EXCAVATED AREAS SHALL NOT BE DISCHARGED DIRECTLY INTO ANY WATERCOURSE. ADEQUATE PROVISIONS MUST BE TAKEN TO PREVENT SEDIMENT AND EROSION FROM ENTERING THE WATERCOURSE.
8. NO MORE THAN 500 LF OF TRENCH MAY BE OPEN AT ANY GIVEN TIME.
9. OTHER CONSTRUCTION PRACTICES - ANY WATER PUMPED FROM EXCAVATED AREAS SHALL NOT BE DISCHARGED DIRECTLY INTO ANY WATERCOURSE. ADEQUATE PROVISIONS MUST BE TAKEN TO PREVENT SEDIMENT AND EROSION FROM ENTERING THE WATERCOURSE.
10. AREAS WHERE THE SEED HAS FAILED TO GERMINATE ADEQUATELY (UNIFORM PERENNIAL VEGETATIVE COVER WITH A DENSITY OF 70%) WITHIN 30 DAYS AFTER SEEDING AND MULCHING MUST BE RESEEDED IMMEDIATELY, OR AS SOON AS WEATHER CONDITIONS ALLOW.

GENERAL ENVIRONMENTAL NOTES

1. THE CONTRACTOR SHALL PROVIDE MEANS TO HANDLE SPILLS AND WASTE MATERIAL DISPOSAL. THIS SHALL INCLUDE, BUT NOT BE LIMITED TO, THE FOLLOWING:
   a. A CONTAINMENT DIKE SHALL BE PROVIDED AROUND ANY ON-SITE FUEL STORAGE TANKS. IT SHALL HAVE A CAPACITY OF 110% OF THE SIZE OF THE STORAGE TANK.
   b. ABSORBENT PADS SHALL BE AVAILABLE ON SITE FOR PETROLEUM SPILLS OR LEAKS ON GROUND. ABSORBENT BOOMS SHALL BE PROVIDED FOR SPILLS IN STREAMS.
   c. EXCESS CONCRETE SHALL NOT BE DISPOSED OF NEAR STREAMS.
2. THE CONTRACTOR SHALL REPORT ANY NONCOMPLIANCE WHICH MAY ENDANGER HEALTH OR THE ENVIRONMENT IMMEDIATELY AFTER BECOMING AWARE OF THE CIRCUMSTANCES BY CALLING THE DEPARTMENT OF ENVIRONMENTAL PROTECTION SPILL ALERT TELEPHONE NUMBER, 1-800-642-3074, AND ADVISING THE ENGINEER OF SUCH OCCURRENCE. CONTRACTOR SHALL PROVIDE THE ENGINEER WITH A RECORD OF SUCH CALLS.
3. THE CONTRACTOR SHALL DEVELOP A SOIL MANAGEMENT PLAN (SMP) IN ACCORDANCE WITH SPECIFICATION SECTION 017500 - ENVIRONMENTAL CONTROL.

SEQUENCE OF EVENTS

1. CONTRACTOR IS RESPONSIBLE TO ESTABLISH A TIME SCHEDULE FOR EVENTS LISTED HERE FORWARD FOR CONTRACT START DATE.
2. INSTALL TEMPORARY SEDIMENT CONTROL STRUCTURES AS SHOWN ON PLAN BEFORE COMPLETION OF FIRST DAY.
3. BEGIN CLEARING AND GRUBBING.
4. ALL TEMPORARY EARTHWORK STOCKPILES EXPECTED TO BE LEFT OPEN FOR MORE THAN (7) DAYS SHALL BE TRACKED-IN AND TEMPORARILY SEEDED.
5. INSTALL PERMANENT STORM WATER CONTROL MEASURES.
6. INSPECT ALL SEDIMENT AND EROSION CONTROL DEVICES ON A REGULAR BASIS AND IMMEDIATELY FOLLOWING ANY RAINFALL.
7. PERFORM ALL NECESSARY MAINTENANCE SEDIMENT AND EROSION CONTROL DEVICES. REPAIR OR REPLACE ALL MATERIALS WHEN NECESSARY OR AS DIRECTED BY THE ENGINEER.
8. REFER TO PLANS FOR ANY PERMANENT SEEDING AND THE SPECIFICATIONS FOR SEEDING AND MULCHING SCHEDULES. ALL DISTURBED AREAS SHALL BE PERMANENTLY SEEDED WITHIN (7) DAYS OF COMPLETION OF FINAL GRADING.
9. REMOVE ALL TEMPORARY SEDIMENT AND EROSION CONTROL DEVICES UPON THE COMPLETION OF THE PROJECT UNLESS OTHERWISE DIRECTED BY THE ENGINEER OR WVDEP.

GENERAL NOTES:

1. LOCATE ALL EXISTING UNDERGROUND UTILITIES AND COORDINATE WITH GENERAL CONTRACTOR FOR ALL NEW UNDERGROUND WORK PRIOR TO ANY EXCAVATION OR TRENCHING. MAINTAIN MINIMUM 12" CLEARANCE, UNLESS OTHERWISE NOTED.
2. MINIMUM BURY FOR ALL SITE CONDUIT SHALL BE 30", UNLESS OTHERWISE NOTED.
3. REFER TO POLE BASE DETAIL ON SHEET C-0-501.
4. CONNECT TO #12 AWG CONDUCTORS INSIDE OF SITE LIGHTING POLES TO LUMINAIRES.
5. ALL WORK ASSOCIATED WITH THE MAILROOM SHALL BE INCLUDED IN ALTERNATE #1 UNLESS OTHERWISE INDICATED.
6. ALL CONDUIT AND PIPING FOR THE MAIL ROOM SHALL BE INSTALLED TO 5'-0" OUTSIDE OF THE BUILDING, CAPPED AND UNDERGROUND LOCATION STAKED IF ADDITIVE ALTERNATE NO. 1 IS NOT ACCEPTED.
7. ALL PULL BOXES SHALL BE QUAZITE PG3636BA36 WITH PG3636EA12 TOP EXTENSION (IF REQUIRED) OR APPROVED EQUAL.
8. PROVIDE CONCRETE PADS FOR UTILITY PROVIDED EQUIPMENT. COORDINATE PAD DETAILS WITH THE UTILITY COMPANY.

LEGEND

SHEET KEYNOTES:

1. ROUTE INDICATED EXTERIOR LIGHTING CIRCUIT VIA EXTERIOR LIGHTING CONTACTOR, REFER TO DETAIL ON E-501. SEE PANEL SCHEDULE FOR REQUIRED CONDUIT/CONDUCTORS.
2. ROUTE INDICATED EXTERIOR LIGHTING CIRCUIT VIA EXTERIOR LIGHTING CONTACTOR, REFER TO DETAIL ON E-500. SEE PANEL SCHEDULE FOR REQUIRED CONDUIT/CONDUCTORS. CIRCUIT SHALL BE INCLUDED IN ALTERNATE #1.
3. NEW UTILITY SERVICE POLE. COORDINATE WITH AMERICAN ELECTRIC POWER.
4. UNDERGROUND PRIMARY ELECTRIC SERVICE FROM NEW UTILITY POLE.
5. NEW UTILITY-OWNED, PAD-MOUNT, TRANSFORMER (SIZE BY AMERICAN ELECTRIC POWER)
6. NEW NATURAL GAS FIRED GENERATOR. REFER TO ELECTRICAL RISER ON E-1-900 FOR ADDITIONAL INFORMATION AND REQUIREMENTS.
7. TEMPORARY SERVICE DROP POLE AND POLE MOUNTED TRANSFORMER FOR GROUND MECHANICS SHOP (GMS). POLE AND TRANSFORMER SHALL BE REMOVED AFTER GMS SERVICE IS MOVED TO MAIN BUILDING SERVICE.
8. TEMPORARY OVERHEAD PRIMARY SERVICE FOR GROUND MECHANICS SHOP (GMS). SERVICE SHALL BE REMOVED AFTER GMS. SERVICE SHALL BE REMOVED AFTER GMS SERVICE IS MOVED TO MAIN BUILDING SERVICE.
9. TEMPORARY CT CABINET FOR GROUND MECHANICS SHOP (GMS). CABINET SHALL BE REMOVED AFTER GMS SERVICE IS MOVED TO MAIN BUILDING SERVICE.
10. TEMPORARY SECONDARY ELECTRICAL SERVICE FOR GROUNDS MECHANICS SHOP (GMS). CONDUCTORS SHALL BE REMOVED AND CONDUIT SHALL BE CAPPED AFTER GMS SERVICE IS MOVED TO MAIN BUILDING SERVICE.
11. WAREHOUSE/GROUNDS BUILDING SECONDARY ELECTRICAL SERVICE. REFER TO E-1-900 FOR ADDITIONAL INFORMATION AND REQUIREMENTS.
12. GENERATOR CONNECTIONS. REFER TO E-1-900 FOR ADDITIONAL INFORMATION AND REQUIREMENTS.
13. INGROUND PULL BOX FOR SECONDARY ELECTRICAL SERVICE.
14. INGROUND PULL BOX FOR GENERATOR CONNECTIONS.
15. LOCATION OF EXISTING GROUNDS MECHANIC SHOP (GMS). NO WORK SHALL BE PERFORMED IN THIS AREA UNTIL NEW PHASE 1A GMS IS COMPLETED AND OPERATIONAL.
16. PROVIDE TWO (2) 2" CONDUITS UNDERGROUND FOR FIBER SERVICE. REFER TO E-1-106 FOR CONTINUATION INTO THE BUILDING.
17. INGROUND PULL BOX FOR FIBER SERVICE.
18. PROVIDE TWO (2) 2" CONDUITS UNDERGROUND FOR FIBER SERVICE. REFER TO E-1-106 FOR CONTINUATION.
19. PROVIDE ONE (1) 2" CONDUIT UNDERGROUND FOR FIBER SERVICE AS PART OF ALTERNATE #1. REFER TO E-3-103 FOR CONTINUATION.
20. PROVIDE THREE (3) 2" CONDUIT UNDERGROUND FOR FIBER SERVICE. CONDUITS SHALL BE CONNECTED TO EXISTING SPARE CONDUITS FOR FIBER CONNECTIONS TO CAMPUS NETWORK.
21. EIGHT (8) 2" UNDERGROUND CONDUITS FOR FUTURE CONNECTIONS TO FIBER SERVICE. CONDUITS INSTALLED UNDER PREVIOUS CONSTRUCTION CONTRACT.
22. BULK STORAGE BUILDING SERVICE PANEL.
23. PROVIDE SECONDARY ELECTRICAL SERVICE UNDERGROUND FROM POLE MOUNTED TRANSFORMER TO BULK STORAGE BUILDING SERVICE PANEL. REFER TO RISER ON E-2-100 FOR ADDITIONAL INFORMATION AND REQUIREMENTS.
24. FIRE PROTECTION VAULT. CONNECT 1-1/2" SUMP DISCHARGE TO DI 2-2. SEE SHEET C-0-105.
25. PROVIDE UNDERGROUND 1" CONDUIT FROM FIRE VAULT TO WAREHOUSE/GROUNDS FIRE ALARM CONTROL PANEL. REFER TO E-1-106 FOR CONTINUATION.
26. PROVIDE UNDERGROUND 1" CONDUIT FROM FIRE VAULT TO MAILROOM FIRE ALARM CONTROL PANEL, IN ALTERNATE #1. REFER TO E-3-103 FOR CONTINUATION.
27. UNDERGROUND PRIMARY ELECTRIC SERVICE FROM EXISTING SECTIONALIZING CABINET.
28. MAILROOM SECONDARY ELECTRICAL SERVICE INCLUDED IN ALTERNATE #1. REFER TO E-3-900 FOR ADDITIONAL INFORMATION AND REQUIREMENTS.
29. PROVIDE POWER AND CONTROL CONDUITS FOR FUEL SYSTEMS. REFER TO E-1-104 & E-1-106 FOR CONTINUATION AND ADDITIONAL REQUIREMENTS.
30. PROVIDE PULL BOX FOR MAILROOM FIRE ALARM CONNECTIONS IN BASE BID. PULL BOX SHALL NOT BE INSTALLED IF ALTERNATE #1 IS ACCEPTED.
31. CONDUIT FROM FIRE VAULT TO PULL BOX SHALL BE INCLUDED IN BASE BID.
32. PROVIDE PULL BOX AND UNDERGROUND CONDUIT TO PANEL IN BASE BID, PULL BOX NOT REQUIRED IS ALTERNATE #2 IS ACCEPTED.
33. PROVIDE PULL BOX AND CONDUIT UNDERGROUND TO PANEL IN BASE BID, PULL BOX NOT REQUIRED IF ALTERNATE #3 IS ACCEPTED.
34. NATURAL GAS SERVICE CONNECTION BY MOUNTAINEER GAS CO.
35. INSTALL GAS LINE AND RISERS - 3"Ø FOR THE WAREHOUSE AND 1-1/4"Ø FOR THE MAIL ROOM
36. NEW WATER MAIN INSTALLED BY WV AMERICAN WATER CO..
37. PROVIDE 2" PE DOMESTIC WATERLINE.
38. PROVIDE 6" PE FIRE PROTECTION WATERLINE.
39. INSTALL 4" PVC SANITARY SEWER. CONNECT TO EXISTING TAP.
40. INSTALL 2" PE TEMPORARY WATER SERVICE.
41. INSTALL 6" PVC SANITARY SEWER. CONNECT TO EXISTING TAP.
42. INSTALL 6" PVC SANITARY SEWER. CONNECT TO NEW TAP. TAP INSTALLED BY CHARLESTON SANITARY BOARD.
43. NEW TAP BY WV AMERICAN WATER CO.
44. EXISTING UTILITY POLE.
45. INSTALL MURDOCK M-3909 GROUND HYDRANT OR APPROVED EQUAL.
46. PROVIDE LIGHT FIXTURE AS PART OF BASE BID.
47. PROVIDE LIGHT FIXTURE AS PART OF ALTERNATE #1.
48. PROVIDE LIGHT FIXTURE AS PART OF ALTERNATE #2.
49. PROVIDE LIGHT FIXTURE AS PART OF ALTERNATE #3.
50. WEATHERPROOF, EMERGENCY SHUT OFF FOR FUEL SYSTEM.
51. GSD AGENCY CAMERA. PROVIDE SECURITY CAMERA 16'-0" AFG MOUNT SITE LIGHT POLE. REFER TO CAMERA RISER ON E-1-903.
52. NEW UTILITY-OWNED, PAD-MOUNT, TRANSFORMER (SIZE BY AMERICAN ELECTRIC POWER) INCLUDED IN ALTERNATE #1.
53. UNDERGROUND PRIMARY ELECTRIC SERVICE FROM EXISTING SECTIONALIZING CABINET INCLUDED IN ALTERNATE #1.
54. PROVIDE PEDESTAL MOUNTED WEATHERPROOF RECEPTACLE FOR VEHICLE BLOCK HEATER. SEE EQUIPMENT SUPPORT BRACKET DETAIL SHEET E-502.
55. PROVIDE PANEL L5. IN NEMA 3R ENCLOSURE WITH METERBASE, EQUIPMENT SHALL BE MOUNTED ON GROUND MOUNTED FREE STANDING SUPPORT RACK AT VEHICLE SHELTER.
56. PROVIDE WIRING FROM FUEL PUMPS VIA EMERGENCY SHUT OFF BUTTON TO PANEL L3.
57. OIL WATER SEPARATOR ALARM PANEL.
58. PROVIDE 3#8 IN 1" CONDUIT FROM GROUND MOUNTED TRANSFORMER TO VEHICLE STORAGE PANEL. SERVICE ENTRANCE AND CONDUIT PER AEP REQUIREMENTS.
59. PROVIDE 1/2" GROUND ROD FOR FUEL SYSTEM LIGHTNING PROTECTION SYSTEM.
60. RELOCATED FUEL TANKS - THE AREA WITHIN THE DISPENSING AREA SHALL BE CLASSIFIED AS CLASS I, DIVISION 1 AND THE AREA WITHIN 20 FEET OF ANY EDGE OF THE TANKS AND 18 INCHES ABOVE GRADE SHALL BE CLASSIFIED AS CLASS I, DIVISION 2. ANY EQUIPMENT WITHIN THE CLASSIFIED AREA SHALL BE UL LISTED FOR THAT AREA. ALL WIRING METHODS SHALL CONFORM TO THE REQUIREMENTS OF NEC ARTICLES 500, 501, AND 514. ALL CONDUITS ENTERING/EXITING THE HAZARDOUS AREA SHALL HAVE SEALING FITTINGS BEFORE CROSSING THE AREA BOUNDARY.
61. NEW ELECTRICAL SERVICE FOR WVDOH OWNED LIGHT. INSTALL COMBINATION METER BASE, CONNECT TO EXISTING PANEL. SERVICE ENTRANCE AND CONDUIT PER AEP REQUIREMENTS.

NORTH RETAINING WALL - 1+00 TO 3+30

HORIZ. SCALE: 1" = 10'
VERT. SCALE: 1" = 2'

LEGEND

- 4" TALL CAP BLOCK
- 8" TALL SEGMENTAL BLOCK
- 6" MINIMUM COMPACTED GRANULAR-BASE LEVELING PAD
- B — DENOTES A BOTTOM WALL BLOCK

GENERAL NOTES

1. ENGAGE A QUALIFIED PROFESSIONAL ENGINEER, REGISTERED IN WEST VIRGINIA, TO DESIGN THE RETAINING WALL. SEALED PLANS SHALL BE SUBMITTED AS PART OF SHOP DRAWING SUBMISSIONS AS DEFINED IN THE SPECIFICATIONS.
2. PLACE LEVELING PAD MATERIAL AS SPECIFIED AND COMPACT USING A PLATE COMPACTOR. INSTALL PERFORATED DRAIN PIPE AS SHOWN IN TYPICAL SECTIONS.
3. PLACE ASTM NO. 57 STONE BEHIND THE BLOCKS AND IN THE AREAS BETWEEN THE BLOCKS.
4. DRAINSTONE AND BACKFILL SHALL BE PLACED IN MAXIMUM 6 INCH LIFTS COMPACTED TO A MINIMUM OF 95% STANDARD PROCTOR. HAND COMPACTION WITH A VIBRATORY PLATE COMPACTOR SHALL BE USED WITHIN 3 FEET OF THE RETAINING BLOCKS.
5. PLACE SUCCESSIVE UNITS, DRAINSTONE, AND COMPACT BACKFILL TO THE DESIGN GRADE OF THE WALL.
6. CAP PIECES SHALL BE ADHERED WITH A CONCRETE ADHESIVE.
7. CONTRACTOR SHALL BE RESPONSIBLE FOR THE LOCATION AND PROTECTION OF ALL UNDERGROUND UTILITIES IN THE VICINITY OF THE WALL.
8. THE CONTRACTOR SHALL TAKE CARE NOT TO DISTURB ANY EXISTING STRUCTURES OR UTILITIES ABOVE OR BELOW THE WALL.
9. THE CONTRACTOR SHALL NOTIFY THE ENGINEER IMMEDIATELY IF CONDITIONS ARE ENCOUNTERED WHICH DIFFER FROM THOSE ON THE DESIGN DRAWINGS.
10. CONTRACTOR SHALL MAINTAIN POSITIVE GRADES AWAY FROM WALL AT THE END OF EACH DAY TO AVOID DAMAGE WHILE UNDER CONSTRUCTION.

GENERAL SPECIFICATIONS

1.1 SCOPE
WORK INCLUDES FURNISHING AND INSTALLING CONCRETE RETAINING WALL UNITS TO THE LINES AND GRADES DESIGNATED ON THE CONSTRUCTION DRAWINGS AND AS SPECIFIED HEREIN.

1.2 REFERENCE STANDARDS
ASTM C94 READY-MIXED CONCRETE
ASTM C1372 SEGMENTAL RETAINING WALL UNITS

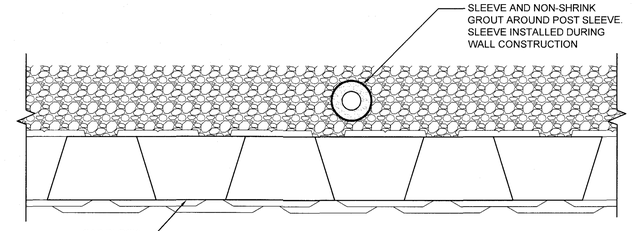
1.3 DELIVERY, STORAGE, AND HANDLING
- A. CONTRACTOR SHALL CHECK THE MATERIALS UPON DELIVERY TO ASSURE PROPER MATERIAL HAS BEEN RECEIVED.
- B. CONTRACTOR SHALL PREVENT EXCESSIVE MUD, WET CEMENT AND LIKE MATERIALS FROM COMING IN CONTACT WITH THE SRW UNITS.
- C. CONTRACTOR SHALL PROTECT THE MATERIALS FROM DAMAGE. DAMAGED MATERIAL SHALL NOT BE INCORPORATED IN THE PROJECT.

MATERIALS

2.1 WALL UNITS
- A. WALL UNITS SHALL BE ANCHOR DIAMOND PRO STRAIGHT FACE SEGMENTAL BLOCK OR APPROVED EQUAL.

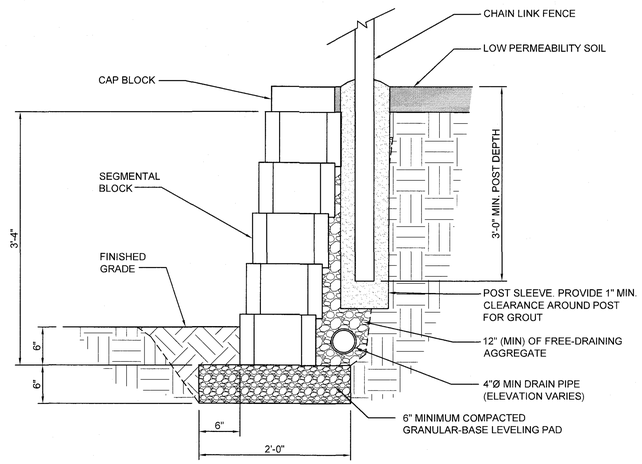
2.2 LEVELING PAD AND FREE DRAINING BACKFILL
- A. LEVELING PAD MATERIAL SHALL BE ASTM NO. CRUSHED STONE MATERIAL.
- B. NO. 57 STONE SHALL BE PLACED TO A MINIMUM OF 1 FOOT WIDTH BEHIND THE BACK OF THE WALL AND SHALL EXTEND VERTICALLY FROM THE LEVELING PAD TO AN ELEVATION 4 INCHES BELOW THE TOP OF WALL.
- C. BACKFILL MATERIAL SHALL BE #57 STONE COMPACTED TO 95% STD. PROCTOR AS NOTED HEREIN.
- D. NON-WOVEN GEOTEXTILE CLOTH SHALL BE PLACED BETWEEN THE FREE DRAINING BACKFILL AND RETAINED SOIL.

2.3 DRAINAGE
- A. USE A PERFORATED PIPE AS SHOWN IN THE PLANS PLACED AT THE LOWEST LEVEL OF THE NO. 57 DRAINSTONE. PIPE SHALL EXTEND WITH POSITIVE DRAINAGE AND OUTLET INTO AN EXISTING DRAINAGE STRUCTURE OR FEATURE.



CONSTRUCTION OF WALL SYSTEM

3.1 EXCAVATION
- A. CONTRACTOR SHALL EXCAVATE TO THE LINES AND GRADES SHOWN ON THE CONSTRUCTION DRAWINGS AS NECESSARY IN ORDER TO ACHIEVE UNIFORM BEARING CAPACITY FOR THE ENTIRE LENGTH OF THE WALL.
- B. CONTRACTOR SHALL ENGAGE GEOTECHNICAL ENGINEER TO VERIFY ADEQUATE BEARING MATERIALS ARE PRESENT PRIOR TO THE PLACEMENT OF LEVELING PAD, AND FOR COMPACTION TESTING OF LEVELING PAD AND UTILITY TRENCH BACKFILL PLACEMENT.



3.2 FOUNDATION SOIL PREPARATION
- A. NATIVE FOUNDATION SOIL SHALL BE COMPACTED TO 95% OF STANDARD PROCTOR PRIOR TO PLACEMENT OF THE LEVELING PAD MATERIAL.
- B. IN-SITU FOUNDATION SOIL SHALL BE EXAMINED BY A GEOTECHNICAL ENGINEER TO ENSURE THAT THE ACTUAL FOUNDATION SOIL STRENGTH MEETS OR EXCEEDS PROVIDED DESIGN STRENGTH. SOIL NOT MEETING THE REQUIRED STRENGTH SHALL BE REMOVED AND REPLACED WITH ACCEPTABLE, COMPACTED MATERIAL.

3.3 LEVELING PAD PLACEMENT
- A. LEVELING PAD SHALL BE PLACED AS SHOWN ON THE CONSTRUCTION DRAWINGS.
- B. LEVELING PAD SHALL BE COMPACTED TO 95% OF STANDARD PROCTOR TO ENSURE A LEVEL, HARD SURFACE ON WHICH TO PLACE THE FIRST COURSE OF BLOCKS. PAD SHALL BE CONSTRUCTED TO THE PROPER ELEVATION TO ENSURE THE FINAL ELEVATION SHOWN ON THE PLANS.
- C. LEVELING PAD SHALL HAVE A 6 INCH MINIMUM DEPTH. PAD DIMENSIONS SHALL EXTEND BEYOND THE BLOCKS IN ALL DIRECTIONS AS DESIGNED.

3.4 UNIT INSTALLATION
- A. THE FIRST COURSE OF WALL UNITS SHALL BE PLACED ON THE PREPARED LEVELING PAD WITH THE AESTHETIC SURFACE FACING OUT AND THE FRONT EDGES TIGHT TOGETHER. ALL UNITS SHALL BE CHECKED FOR LEVEL AND ALIGNMENT AS THEY ARE PLACED.
- B. ENSURE THAT UNITS ARE IN FULL CONTACT WITH LEVELING PAD. PROPER CARE SHALL BE TAKEN TO DEVELOP STRAIGHT LINES AND SMOOTH CURVES ON THE BASE COURSE AS PER WALL LAYOUT.
- C. THE BACKFILL IN FRONT AND BACK OF THE ENTIRE BASE ROW SHALL BE PLACED AND COMPACTED TO FIRMLY LOCK THEM IN PLACE. CHECK ALL UNITS AGAIN FOR LEVEL AND ALIGNMENT. ALL EXCESS MATERIAL SHALL BE SWEPT FROM TOP OF UNITS.
- D. INSTALL NEXT COURSE OF WALL UNITS ON TOP OF BASE ROW. POSITION BLOCKS TO BE OFFSET FROM SEAMS OF BLOCKS BELOW. BLOCKS SHALL BE PLACED FULLY FORWARD SO UNITS ARE ENGAGED. CHECK EACH BLOCK FOR PROPER ALIGNMENT AND LEVEL. BACKFILL TO EXCAVATED WIDTH BEHIND BLOCK WITH FREE DRAINING BACKFILL. SPREAD BACKFILL IN UNIFORM LIFTS NOT TO EXCEED 6 INCHES. EMPLOY METHODS USING LIGHT-WEIGHT COMPACTION EQUIPMENT THAT WILL NOT DISRUPT THE STABILITY OR BATTER OF THE WALL. HAND-OPERATED PLATE COMPACTION EQUIPMENT SHALL BE USED AROUND THE BLOCK AND WITHIN 3 FEET OF THE WALL TO ACHIEVE CONSOLIDATION. COMPACT BACKFILL TO 95% OF STANDARD PROCTOR (ASTM D 698, AASHTO T-99) DENSITY WITHIN 2% OF ITS OPTIMUM MOISTURE CONTENT.
- E. INSTALL EACH SUBSEQUENT COURSE IN LIKE MANNER. REPEAT PROCEDURE TO THE EXTENT OF WALL HEIGHT.

DETENTION SYSTEM 1

NOTES:

1. ALL REFERENCES TO CLASS I OR II MATERIAL ARE PER ASTM D2321 "STANDARD PRACTICE FOR UNDERGROUND INSTALLATION OF THERMOPLASTIC PIPE FOR SEWERS AND OTHER GRAVITY FLOW APPLICATIONS", LATEST EDITION.
2. ALL RETENTION AND DETENTION SYSTEMS SHALL BE INSTALLED IN ACCORDANCE WITH ASTM D2321, LATEST EDITION AND THE MANUFACTURER'S PUBLISHED INSTALLATION GUIDELINES.
3. INITIAL BACKFILL: SUITABLE MATERIAL SHALL BE CLASS I OR II IN THE PIPE ZONE EXTENDING NOT LESS THAN 6" ABOVE CROWN OF PIPE. THE CONTRACTOR SHALL PROVIDE DOCUMENTATION FOR MATERIAL SPECIFICATION TO ENGINEER. MATERIAL SHALL BE INSTALLED AS REQUIRED IN ASTM D2321, LATEST EDITION.
4. MINIMUM COVER: FOR TRAFFIC APPLICATIONS, MINIMUM COVER IS 12" UP TO 36" DIAMETER PIPE, MEASURED FROM TOP OF PIPE TO BOTTOM OF FLEXIBLE PAVEMENT OR TO TOP OF RIGID PAVEMENT.

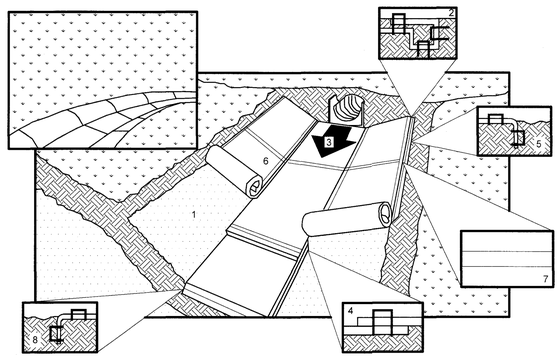
ELEVATION

PLAN



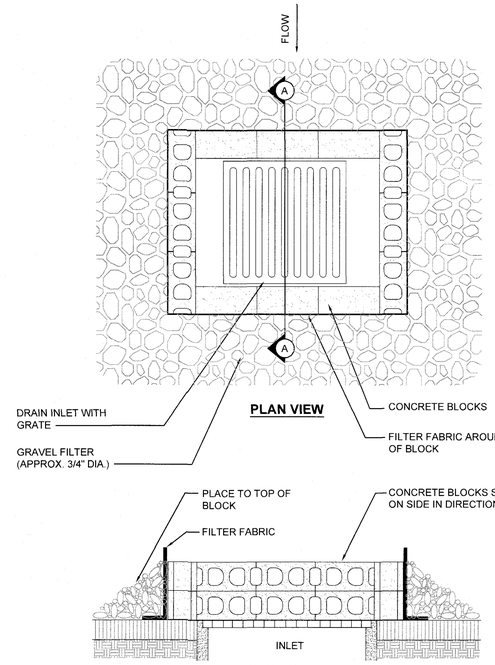
SECTION A-A

NOTES:

1. PLACE STABILIZED CONSTRUCTION ENTRANCE (SCE) IN ACCORDANCE WITH THE APPROVED PLAN. VEHICLES MUST TRAVEL OVER THE ENTIRE LENGTH OF THE SCE. USE MINIMUM LENGTH OF 70 FEET AND A MINIMUM WIDTH OF 12 FEET. FLARE SCE 10 FEET MINIMUM AT THE EXISTING ROAD TO PROVIDE A TURNING RADIUS.
2. PIPE ALL SURFACE WATER FLOWING TO OR DIVERTED TOWARD THE SCE UNDER THE ENTRANCE, MAINTAINING POSITIVE DRAINAGE. PROTECT PIPE INSTALLED THROUGH THE SCE WITH A MOUNTABLE BERM WITH 5:1 SLOPES AND A MINIMUM OF 12 INCHES OF STONE OVER THE PIPE. PREPARE SUBGRADE AND PLACE GEOTEXTILE FABRIC, AS SPECIFIED.
3. PLACE CRUSHED AGGREGATE (AASHTO M43 NO. 1) AT LEAST 6 INCHES DEEP OVER THE LENGTH AND WIDTH OF THE SCE.
4. MAINTAIN ENTRANCE IN A CONDITION THAT MINIMIZES TRACKING OF SEDIMENT. ADD STONE OR MAKE OTHER REPAIRS AS CONDITIONS DEMAND TO MAINTAIN CLEAN SURFACE, MOUNTABLE BERM, AND SPECIFIED DIMENSIONS. IMMEDIATELY REMOVE STONE AND/OR SEDIMENT SPILLED, DROPPED, OR TRACKED ONTO ADJACENT ROADWAY BY VACUUMING, SCRAPING, AND/OR SWEEPING. WASHING ROADWAY TO REMOVE MUD TRACKED ONTO PAVEMENT IS NOT ACCEPTABLE UNLESS WASH WATER IS DIRECTED TO AN APPROVED SEDIMENT CONTROL DEVICE.

STABILIZED CONSTRUCTION ENTRANCE

SCALE: NONE (0227202)

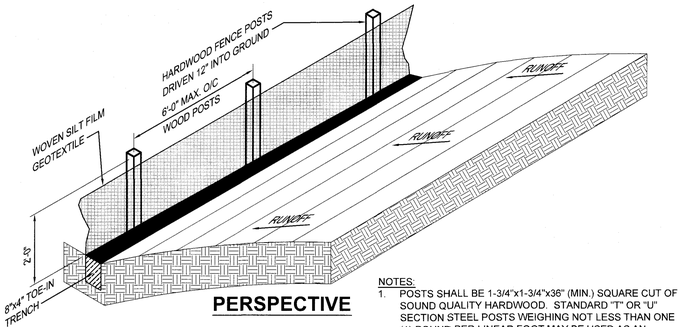


TYPICAL EROSION MATTING INSTALLATION IN SWALE

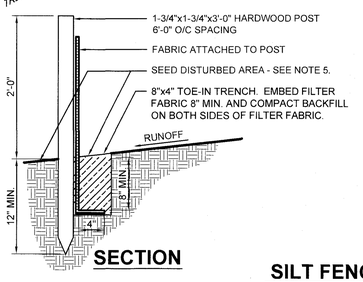
SCALE: NTS (0227014)

NOTES:

1. PREPARE SOIL BEFORE INSTALLING BLANKETS, INCLUDING APPLICATION OF LIME, FERTILIZER, AND SEED.
2. BEGIN AT THE TOP OF THE CHANNEL BY ANCHORING THE BLANKET IN 6" (15 cm) DEEP x 6" (15 cm) WIDE TRENCH. BACKFILL AND COMPACT THE TRENCH AFTER STAPLING.
3. ROLL THE BLANKET IN DIRECTION OF WATER FLOW ON BOTTOM OF CHANNEL.
4. PLACE BLANKETS END OVER END (SHINGLE STYLE) WITH A 6" (15 cm) OVERLAP. USE A DOUBLE ROW OF STAGGERED STAPLES 4"(10 cm) APART TO SECURE BLANKETS.
5. FULL LENGTH EDGE OF BLANKETS AT TOP OF SIDE SLOPES MUST BE ANCHORED IN 6" (15 cm) DEEP x 6" (15 cm) WIDE TRENCH. BACKFILL AND COMPACT THE TRENCH AFTER STAPLING.
6. BLANKETS ON SIDE SLOPES MUST BE OVERLAPPED 4" (10 cm) OVER THE CENTER BLANKET AND STAPLED [2" (5 cm) FOR C350 MATTING].
7. IN HIGH FLOW CHANNEL APPLICATIONS, A STAPLE CHECK SLOT IS RECOMMENDED AT 30 TO 40 FOOT INTERVALS. USE A ROW OF STAPLES 4" APART OVER ENTIRE WIDTH OF THE CHANNEL. PLACE A SECOND ROW 4" BELOW THE FIRST ROW IN A STAGGERED PATTERN.
8. THE TERMINAL END OF THE BLANKETS MUST BE ANCHORED IN A 6" DEEP x 6" WIDE TRENCH. BACKFILL AND COMPACT THE TRENCH AFTER STAPLING.



PLAN VIEW

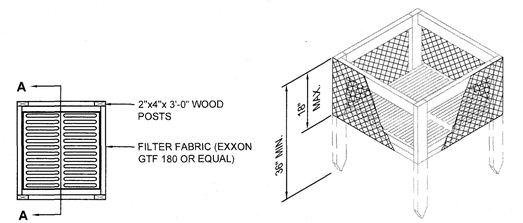


SECTION A-A

INLET INFILTRATION PROTECTION

SCALE: NONE (0227012)

PERSPECTIVE



SECTION

NOTES:

1. POSTS SHALL BE 1-3/4"x1-3/4"x36" (MIN.) SQUARE CUT OF SOUND QUALITY HARDWOOD. STANDARD "T" OR "U" SECTION STEEL POSTS WEIGHING NOT LESS THAN ONE (1) POUND PER LINEAR FOOT MAY BE USED AS AN ALTERNATE.
2. WOVEN SILT FILM GEOTEXTILE FABRIC TO BE FASTENED SECURELY TO POSTS WITH WIRE TIES OR STAPLES.
3. WHEN TWO SECTIONS OF SILT FENCE ADJOIN EACH OTHER, OVERLAP THE LAST POST OF THE FIRST ROLL WITH THE FIRST POST OF THE OTHER, THEN FOLD FABRIC AT LEAST ONE (1) FULL TURN AROUND EACH POST.
4. EXTEND ENDS OF SILT FENCE A MINIMUM OF FIVE (5) FEET UPSLOPE AT 45 DEGREES TO THE MAIN FENCE ALIGNMENT TO PREVENT RUNOFF FROM BYPASSING.
5. FILTER FABRIC SHALL BE NON-WOVEN "ADS GEOSYNTHETICS 3302W", "THRACE-LINQ GTF 200", OR EQUAL.
6. SEED A 6'-0" STRIP ON EACH SIDE OF SILT FENCE WITH TEMPORARY SEED MIX AS PER SPECIFICATIONS.
7. MAINTENANCE SHALL BE PERFORMED AS NEEDED AND INSPECTED FOR DAMAGE AFTER EACH RAIN EVENT. REMOVE ACCUMULATED SEDIMENT AND DEBRIS WHEN BULGES DEVELOP OR WHEN SEDIMENT REACHES 25% OF FENCE HEIGHT.

NPDES PUBLIC NOTICE SIGN

SCALE: NONE

SEDIMENT AND EROSION CONTROL NOTES

1. ALL SEDIMENT AND EROSION CONTROL MEASURES ARE SUBJECT TO INSPECTION AND CHANGES BY THE WVDEP OR ENGINEER.
2. LIMIT THE AMOUNT OF TOTAL DISTURBANCE ON SITE TO A MINIMUM. FINAL CONDITIONS ON SITE SHALL BE PREPARED AS A VEGETATED LAWN GRASS COVER MAINTAINED IN GOOD CONDITION UNTIL COMPLETION OF WORK.
3. ALL PAVED SURFACES (CONCRETE, ASPHALT, RIP-RAP, ETC.) SHALL BE INSTALLED AS SOON AS POSSIBLE UPON COMPLETION OF THE FINAL GRADING.
4. IN ORDER TO PREVENT AND TO PROVIDE FOR ABATEMENT AND CONTROL OF ANY ENVIRONMENTAL POLLUTION ARISING FROM THEIR CONSTRUCTION ACTIVITIES, THE CONTRACTOR SHALL COMPLY WITH ALL APPLICABLE FEDERAL, STATE, AND LOCAL LAWS AND REGULATIONS CONCERNING ENVIRONMENTAL POLLUTION CONTROL AND ABATEMENT, AS WELL AS SPECIFIC REQUIREMENTS AND CONDITIONS OF ANY NECESSARY PERMITS FOR CONSTRUCTION OBTAINED BY THE OWNER.
5. THE CONTRACTOR IS RESPONSIBLE TO KEEP A RECORD OF WHEN CONSTRUCTION ACTIVITIES HAVE BEGUN AND HAVE EITHER TEMPORARILY OR PERMANENTLY CEASED AND WHEN SEDIMENT AND EROSION CONTROL MEASURES HAVE BEEN INITIATED, INSPECTED, MAINTAINED, AND REMOVED.
6. WASTE AREAS - THROUGH OBTAINING A NPDES STORMWATER SITE REGISTRATION PERMIT FROM WVDEP, THE ENGINEER HAS INCLUDED APPROXIMATELY 0.5 ACRE TO BE USED BY THE CONTRACTORS FOR WASTE SITES. THE CONTRACTORS WILL DETERMINE THE EXACT LOCATIONS OF EACH SITE WHICH WILL THEN BE ADDED TO THE PERMIT. THE CONTRACTOR WILL BE RESPONSIBLE FOR THE EROSION AND SEDIMENT CONTROLS AT EACH SITE INCLUDING, BUT NOT LIMITED TO, SILT FENCE, DIVERSION DITCHES, ROCK CHECK STRUCTURES, ETC. AS APPROPRIATE, AND THE RECLAMATION THEREOF ONCE CONSTRUCTION IS COMPLETE.
7. OTHER CONSTRUCTION PRACTICES - ANY WATER PUMPED FROM EXCAVATED AREAS SHALL NOT BE DISCHARGED DIRECTLY INTO ANY WATERCOURSE. ADEQUATE PROVISIONS MUST BE TAKEN TO PREVENT SEDIMENT AND EROSION FROM ENTERING THE WATERCOURSE.
8. NO MORE THAN 500 LF OF TRENCH MAY BE OPEN AT ANY GIVEN TIME.
9. OTHER CONSTRUCTION PRACTICES - ANY WATER PUMPED FROM EXCAVATED AREAS SHALL NOT BE DISCHARGED DIRECTLY INTO ANY WATERCOURSE. ADEQUATE PROVISIONS MUST BE TAKEN TO PREVENT SEDIMENT AND EROSION FROM ENTERING THE WATERCOURSE.
10. AREAS WHERE THE SEED HAS FAILED TO GERMINATE ADEQUATELY (UNIFORM PERENNIAL VEGETATIVE COVER WITH A DENSITY OF 70%) WITHIN 30 DAYS AFTER SEEDING AND MULCHING MUST BE RESEEDED IMMEDIATELY, OR AS SOON AS WEATHER CONDITIONS ALLOW.

GENERAL ENVIRONMENTAL NOTES

1. THE CONTRACTOR SHALL PROVIDE MEANS TO HANDLE SPILLS AND WASTE MATERIAL DISPOSAL. THIS SHALL INCLUDE, BUT NOT BE LIMITED TO, THE FOLLOWING:

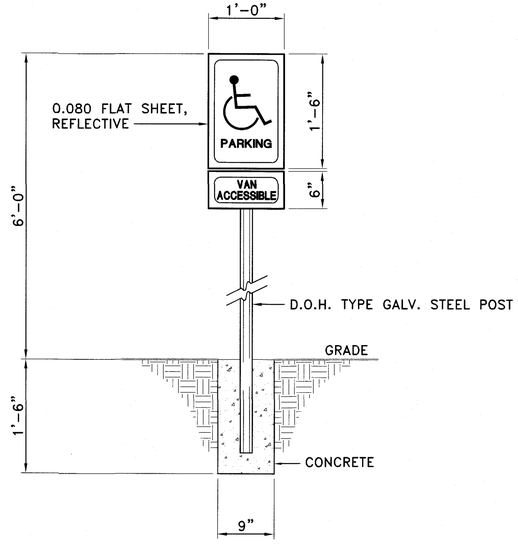
   a. A CONTAINMENT DIKE SHALL BE PROVIDED AROUND ANY ON-SITE FUEL STORAGE TANKS. IT SHALL HAVE A CAPACITY OF 110% OF THE SIZE OF THE STORAGE TANK.

   b. ABSORBENT PADS SHALL BE AVAILABLE ON SITE FOR PETROLEUM SPILLS OR LEAKS ON GROUND. ABSORBENT BOOMS SHALL BE PROVIDED FOR SPILLS IN STREAMS.

   c. EXCESS CONCRETE SHALL NOT BE DISPOSED OF NEAR STREAMS.

2. THE CONTRACTOR SHALL REPORT ANY NONCOMPLIANCE WHICH MAY ENDANGER HEALTH OR THE ENVIRONMENT IMMEDIATELY AFTER BECOMING AWARE OF THE CIRCUMSTANCES BY CALLING THE DEPARTMENT OF ENVIRONMENTAL PROTECTION SPILL ALERT TELEPHONE NUMBER, 1-800-642-3074, AND ADVISING THE ENGINEER OF SUCH OCCURRENCE. CONTRACTOR SHALL PROVIDE THE ENGINEER WITH A RECORD OF SUCH CALLS.

SEQUENCE OF EVENTS



1. CONTRACTOR IS RESPONSIBLE TO ESTABLISH A TIME SCHEDULE FOR EVENTS LISTED HERE FORWARD FOR CONTRACT START DATE.
2. INSTALL TEMPORARY SEDIMENT CONTROL STRUCTURES AS SHOWN ON PLAN BEFORE COMPLETION OF FIRST DAY.
3. BEGIN CLEARING AND GRUBBING.
4. ALL TEMPORARY EARTHWORK STOCKPILES EXPECTED TO BE LEFT OPEN FOR MORE THAN (7) DAYS SHALL BE TRACKED-IN AND TEMPORARILY SEEDED.
5. INSTALL PERMANENT STORM WATER CONTROL MEASURES.
6. INSPECT ALL SEDIMENT AND EROSION CONTROL DEVICES ON A REGULAR BASIS AND IMMEDIATELY FOLLOWING ANY RAINFALL.
7. PERFORM ALL NECESSARY MAINTENANCE SEDIMENT AND EROSION CONTROL DEVICES. REPAIR OR REPLACE ALL MATERIALS WHEN NECESSARY OR AS DIRECTED BY THE ENGINEER.
8. REFER TO PLANS FOR ANY PERMANENT SEEDING AND THE SPECIFICATIONS FOR SEEDING AND MULCHING SCHEDULES. ALL DISTURBED AREAS SHALL BE PERMANENTLY SEEDED WITHIN (7) DAYS OF COMPLETION OF FINAL GRADING.
9. REMOVE ALL TEMPORARY SEDIMENT AND EROSION CONTROL DEVICES UPON THE COMPLETION OF THE PROJECT UNLESS OTHERWISE DIRECTED BY THE ENGINEER OR WVDEP.

POLE BASE DETAIL

NO SCALE

NOTE:
ANCHOR BOLTS SHALL BE ENCLOSED BY LATERAL REINFORCEMENT (TIES) THAT ALSO SURROUNDS AT LEAST (4) VERT. BARS IN THE PIER. THIS REINFORCEMENT SHALL BE LOCATED IN THE TOP 6" OF THE PIER AND SHALL CONSIST OF (2)-#3 BARS.

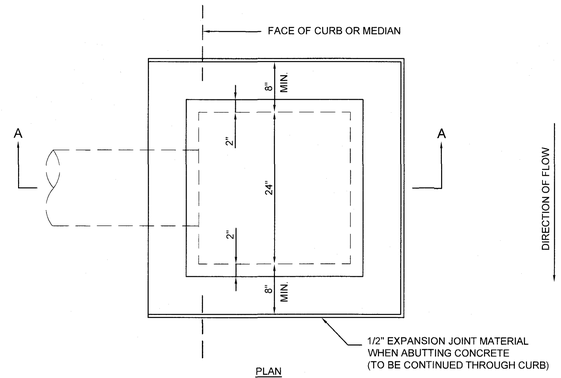
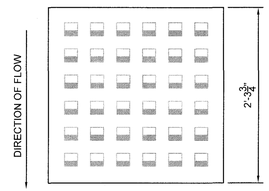
STANDARD "DOGHOUSE" MANHOLE

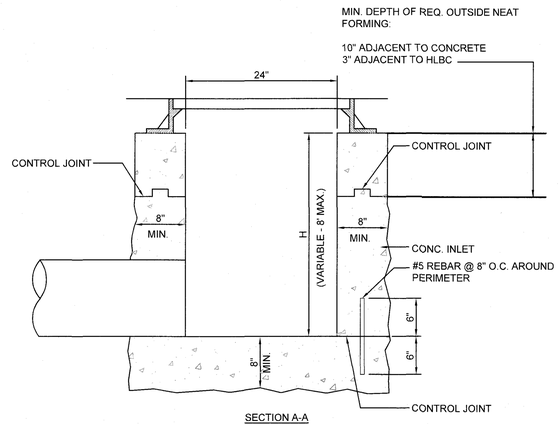


SCALE: NONE

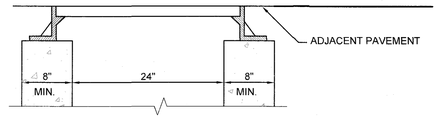


NOTES:
1. ALL PRE-CAST CONCRETE TO CONFORM TO ASTM C478.
2. MANHOLE RING AND COVER SHALL BE AS SPECIFIED.

TYPICAL STORM MANHOLE



SCALE: NONE (0260502)



PLAN

TILT BAR GRATE

SECTION A-A
(W/ DEEP FRAME)

PARTIAL SECTION A-A
(W/ DEEP FRAME)

WV DOH TYPE B INLET

SCALE: 1"=1'-0" (0272022)

NOTES:

1. MANHOLE STEPS SHALL BE CAST IN PLACE REINFORCED PALYPROPLENE PLASTIC AS MANUFACTURED BY "AMERICAN STEP COMPANY" ML-10 "M.A. INDUSTRIES" PS1-PF FOR ALL MANHOLES.
2. MANHOLE FRAME AND LIDS SHALL BE HEAVY DUTY, BLACK ASPHALTIC COATED (DIPPED) "NEENAH" R-1642 OR EQUAL UNLESS OTHERWISE NOTED. LIDS SHALL BE STAMPED "SANTIARTY SEWER" WITH SELF SEALING GASKETS. MANHOLES DESIGNATED WITH A (WT) ON THE DRAWINGS IN THE PROFILE VIEWS, SHALL HAVE BE A BOLTED, GASKETED, WATERTIGHT CASTING "NEENAH" R-1915-S1 OR EQUAL PROVIDE (4) 1" DIA. BOLT HOLES IN ALL MANHOLE FRAME FOR MOUNTING TO CONCRETE MANHOLE. SET FRAME IN BED OF MORTAR AND BUTYL RUBBER SEALANT AND ANCHOR WITH (4) 5/8" DIA. STAINLESS STEEL EXPANSION ANCHORS. FOR LOCATIONS WHERE AN ASPHALT OVERLAY IS TO BE PROVIDED WITHOUT COLD-MILLING THE PAVEMENT, THE CONTRACTOR MAY INSTALL 1 ½" CAST IRON ADJUSTING RINGS AS MANUFACTURED BY "NEENAH" OR APPROVED EQUAL. FOLLOWING THE PALCEMENT OF THE OVERLAY, BOLTS FOR BOLTED LIDS SHALL BE OF SUFFICIENT LENGTH TO ACCOMMODATE HEIGHT OF ADJUSTING RINGS.
3. SHALLOW MANHOLES (LESS THAN 4'-0" IN DEPTH) SHALL USE FLAT SLAB TOP SECTIONS, UNLESS OTHERWISE NOTED.
4. ALL ECCENTRIC CONE SECTIONS LOCATED IN THE LIMITS OF CITY STREETS AND WVDOT ROADWAYS SHALL BE ROTATED SUCH THAT THE MANHOLE CASTINGS ARE AS NEAR THE CENTER OF THE DRIVING LANE AS POSSIBLE. FLAT SLAB MANHOLE SECTIONS IN CITY STREETS AND WVDOT ROADWAYS ARE NOT PERMITTED.
5. THE TOTAL MAXIMUM HEIGHT OF ADJUSTING RINGS SHALL BE 10". WHEN ADJUSTING THE ELEVATIONS OF THE FRAME TO CONFORM TO THE EXISTING GROUND OR PAVEMENT SLOPE, THE CONTRACTOR MAY UTILIZE MORTAR IN CONJUNCTION WITH BUTYL RUBBER SEALANT (MAX.2" THICKNESS).
6. THE INVERT ELEVATIONS SHOWN FOR PROPOSED MANHOLES ARE AT THE CENTER (OUT AND IN) OF THE MANHOLE BASE. THE RIM (TOP OF CASTING) ELEVATIONS SHOWN ON THE DRAWINGS HAVE NOT BEEN FIELD VERIFIED. THE CONTRATOR SHALL VERIFY ALL ANGLE, DISTANCE, AND DEPTH MEASUREMENTS (TOP OF CASTING AND NEVER) PRIOR TO ORDERING ANY MANHOLES OR INSTALLING ANY MATERIALS. SHOULD DISCREPANCIES EXIST, THE ENGINEER SHALL BE NOTIFIED IMMEDIATELY.
7. ALL MANHOLES SHALL BE TYPE A UNLESS NOTED OTHEWISE ON THE DRAWINGS.
8. THE TOP OF CASTING (RIM) SHALL BE FLUSH WITH THE GROUND OR PAVEMENT, UNLESS NOTED OTHERWISE ON THE DRAWINGS. WHEN IN NON-PAYMENT AND WOODED/NON-MOWED AREAS THE FINISHED GROUND SHALL BE SLOPED AWAY FROM THE CASTING IN ALL DIRECTIONS.
9. PROVIDE THREE (3) S. STL. STRAPS (3"X1/2"X1'-2") PLATE W/ (2) ½" S. STL. WEDGE ANCHOR BOLTS (2 ½" EMBEDMENT) 120° SEPARATION. PLACE TOP BOLT 5" ABOVE JOINT AND BOTTOM BOLT 7" BELOW JOINT. STRAPS SHALL BE USED WHEN A PORTION OF THE MANHOLE COME SECTION IS EXPOSED ABOVE GRADE, OR WHEN MANHOLE IS LOCATED IN A WATERWAY. THIS REQUIREMENT IS TYPICAL FOR ALL MANHOLE TYPES.
10. WHEN NEW MANHOLE IS BEING CONNECTED TO A SEWER PIPE THAT HAS BEEN LINED, THE CURED-IN PLACE LINER SHALL MAKE A TIGHT SEAL AT THE MANHOLE OPENING WITH NO ANNULAR GAPS. ANY ANNULAR GAPS AT THE END OF THE PIPE SHALL BE SEALED BY USING ACTIVATED OAKUM SOAKED IN URETHANE RESIN AND LATER COVERED WITH A HYDRAULIC CEMENTITIOUS MORTAR.
11. THE MAXIMUM EFLECTION OF THE FLEXIBLE WATERTIGHT CONNECTIONS AS GIVEN BY THE MANUFACTURER SHALL NOT BE EXCEEDED.
12. PRECAST CONCRETE ADJUSTING RINGS SHALL BE PRE-DRILLED OR CAST TO ACCOMMODATE ANCHOR BOLTS.
13. PROVIDE NOTCH IN ANTI-FLOATATION COLLAR BELOW THE MANHOLE OUTLET PIPE (DOWNSTREAM) OPENING TO ALLOW FOR PIPES INSTALLED AT STEEP GRADES TO CLEAR THE CONCRETE ANTI-FLOATATION COLLAR WITHOUT OBSTRUCTION.
14. WHERE PIPE STUBS ARE INDICATED ON THE DRAWINGS, THE STUB SHALL BE SDR35 PVC TERMINATED WITH A WATERTIGHT PLUG.
15. MANHOLE FOUNDATION TO BE A MINIMUM OF 6" COMPACTED LIMESTONE (#57 OR CLI AGGREGATE BASE)
16. CONCRETE INVERTS FROM PIPES FLOWING INTO A MANHOLE SHALL HAVE SWEEPING TURNS INTO THE FLOW CHANNEL.
17. ALL PRE-CAST CONCRETE TO CONFORM TO ASTM C478.
18. MANHOLE RING AND COVER SHALL BE AS SPECIFIED.
19. CONTRACTOR SHALL BE RESPONSIBLE FOR FOLLOWING ALL APPLICABLE LAWS AND CODES WITH REGARD TO SAFETY OF THE CONSTRUCTED MANHOLE.
20. PROVIDE MOUSEHOLE TYPE KNOCKOUTS IN BASE SECTION AT EXISTING PIPE PENETRATIONS WITH 3" CLEARANCE ALL AROUND OUTSIDE OF PIPE.
21. PROVIDE "Z-LOK" BOOTS AT ALL NEW PIPE PENETRATIONS.

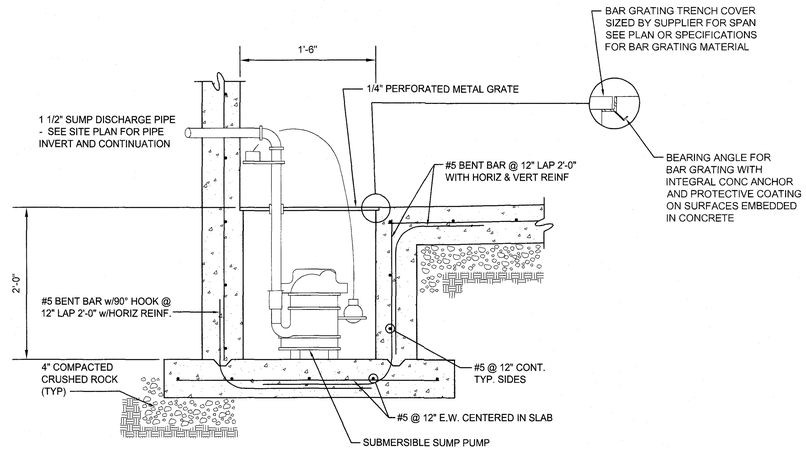
FIRE SERVICE VAULT PLAN

SCALE: NONE



NOTES:

1. PRE-CAST CONCRETE SHALL CONFORM TO ASTM C-913, LATEST EDITION.
2. ALL PIPING AND FITTINGS SHALL BE FLANGED DUCTILE IRON PIPE (DIP) INSIDE VALVE VAULT, AND PUSH-ON JOINT DIP W/ MECHANICAL RESTRAINED JOINT FITTINGS OUTSIDE VAULT.
3. STAINLESS STEEL DOUBLE DETECTOR CHECK VALVE ASSEMBLY TO BE MANUFACTURED BY AMES OR WATTS AND INCLUDE BYPASS PORTS AS DIRECTED BY WVAW.
4. ALL DIP TO BE CL 52.
5. ALL VALVES TO BE RATED FOR 250 PSI.
6. VAULT WALL THICKNESS MAY VARY DEPENDING ON SITE/ENGINEERING CONDITIONS.
7. FOR OPERATING PRESSURES EXCEEDING DDCV ASSEMBLY MANUFACTURERS RECOMMENDED OPERATION, A UL RATED PRESSURE REDUCING VALVE IS RECOMMENDED PRIOR TO THE DDCV ASSEMBLY VAULT.
8. THIS DETAIL IS PROVIDED AS A GENERAL REPRESENTATION OF WV AMERICAN WATER CO. REQUIREMENTS AND IS NOT INTENDED TO BE USED FOR DESIGN OR CONSTRUCTION. IT IS REQUIRED THAT PROJECT DRAWINGS BE SUBMITTED DETAILING THE DESIGN OF THE FIRE SERVICE VAULT COMPLETE WITH DIMENSIONS AND SPECIFIED EQUIPMENT THAT MEET SPECIFIC PROJECT CONDITIONS FOR ACCEPTANCE OF CONFORMANCE WITH WV AMERICAN WATER REQUIREMENTS.
9. THIS DETAIL ONLY HIGHLIGHTS WVAW'S GENERAL GUIDELINES. THE OWNER AND THEIR REPRESENTATIVES ARE RESPONSIBLE FOR THE OVERALL INSTALLATION MEETING ALL FEDERAL, STATE, AND LOCAL LAWS/REGULATIONS.

GENERAL STRUCTURAL NOTES

1. THESE STRUCTURAL DRAWINGS ARE TO BE USED IN CONJUNCTION WITH ALL OTHER DRAWINGS, SPECIFICATIONS & CONTRACT DOCUMENTS.
2. THE DESIGN, CONSTRUCTION, QUALITY CONTROL AND SAFETY OF ALL WORK PERFORMED ON THE PROJECT SHALL CONFORM TO THE REFERENCED CODES AND STANDARDS, INCLUDING ALL SPECIFICATIONS REFERENCED WITH THE LATEST EDITIONS SHALL APPLY UNLESS NOTED.
3. BUILDING CODE - INTERNATIONAL BUILDING CODE - 2015
4. COUNTY/STATE — KANAWHA / WEST VIRGINIA
5. RISK CATEGORY — II
6. DEAD LOADS
   - ROOFS — PER MTL. BLDG MANUFACTURER
   - COLLATERAL (MTL. BLDG) — 10 PSF (MINIMUM)
7. DESIGN LIVE LOADS

ROOF LIVE LOAD	25 PSF MIN
ROOF SNOW LOAD	30 PSF
WAREHOUSE	500 PSF
SURPLUS/RECEIVING	250 PSF
TOOLS/STORE/OFFICE	100 PSF
SURPLUS/GROUNDS STORAGE	250 PSF
MECHANICAL ROOM	100 PSF
BREAK ROOM/OFFICE/TOILET ROOMS	60 PSF
MAINTENANCE SHOP	100 PSF
GROUNDS MECHANICS SHOP	100 PSF
MAIN FLOOR CORRIDORS	100 PSF

8. LATERAL LOADS - WIND

MAIN WIND FORCE RESISTING SYSTEM	STEEL SYSTEM NOT SPECIFICALLY DETAILED FOR SEISMIC/WIND RESISTANCE
BASIC WIND SPEED	115 MPH
EXPOSURE CATEGORY	C

9. LATERAL LOADS - SEISMIC

MAPPED SHORT PERIOD SPECTRAL RESPONSE ACCELERATION S_S	0.145g
MAPPED 1 SECOND SPECTRAL RESPONSE ACCELERATION S_1	0.07g
DESIGN SHORT PERIOD SPECTRAL RESPONSE ACCELERATION S_{DS}	0.155g
DESIGN 1 SECOND SPECTRAL RESPONSE ACCELERATION S_{D1}	0.111g
SEISMIC IMPORTANCE FACTOR I_e	1.0
SOIL SITE CLASS	D
SEISMIC DESIGN CATEGORY	B
BASIC SEISMIC FORCE RESISTING SYSTEM	STEEL SYSTEM NOT SPECIFICALLY DETAILED FOR SEISMIC/WIND RESISTANCE

10. ALL CONTRACTOR PROPOSED STRUCTURAL SUBSTITUTIONS, INCLUDING CONCRETE ADDITIVES, SHALL BE SUBMITTED TO THE ENGINEER FOR REVIEW AND APPROVAL PRIOR TO ANY PERTINENT WORK AND PRIOR TO THE AWARD OF A SUBCONTRACTOR.
11. SHOP DRAWINGS, TEST REPORTS, AND CERTIFICATIONS ARE REQUIRED FOR THE FOLLOWING STRUCTURAL ITEMS:
    - A. CONCRETE CYLINDER TESTS
    - B. CONCRETE MIX DESIGNS
    - C. GROUT MIX DESIGNS
    - D. REINFORCING STEEL SHOP DRAWINGS
    - E. MISCELLANEOUS AND STRUCTURAL STEEL SHOP DRAWINGS
    - F. METAL BUILDING LOADS AND DETAILS (SEALED BY A WV PE)
    - G. PALLET STORAGE RACK DESIGN AND ANCHORAGE TO FLOOR SLAB (SEALED BY A WV PE) *

* THE CONTRACTOR SHALL SUBMIT SHOP DRAWINGS FOR HIGH-PILED PALLET RACK SYSTEMS. HIGH PILE PALLET RACK SYSTEMS AND THEIR ANCHORAGE MUST BE STAMPED BY A WV LICENSED ENGINEER, PROVIDED IN ACCORDANCE WITH ANSI MH16.1 2012 AND SHALL BE BASED ON THE OWNERS STORAGE NEEDS. THE CONTRACTOR SHALL PROVIDE EVERYTHING REQUIRED FOR INSTALLATION OF FREE STANDING PALLET RACK SYSTEMS INCLUDING BUT NOT LIMITED TO: PALLET RACK FRAMES, BEAMS, FOOT PLATES, SHIMS, POST PROTECTORS, CORNER PROTECTORS, END AISLE PROTECTORS, WIRE SHELF PANELS, PALLET SUPPORTS, PALLET SAFETY STOPS, ROW SPACERS, BRACING, AND ANCHORAGE. THE PALLET RACKS MAY BE BRACED TO EACH OTHER, BUT MAY NOT BE BRACED TO METAL BUILDING WALLS OR STRUCTURE.

THE SHOP DRAWINGS SPECIFIED BY THE ENGINEER ARE AN INTEGRAL PART OF THE COMPLETE DESIGN. THEY SERVE AS BOTH A CHECK ON THE CONTRACTOR'S INTERPRETATION OF THE ENGINEER'S DRAWINGS AND SPECIFICATIONS AND AS A FINAL CHECK ON THE COORDINATED, DETAILED DESIGN PRIOR TO CONSTRUCTION. THEREFORE, ANY MATERIAL ORDERED OR WORK PERFORMED PRIOR TO THE ENGINEER'S REVIEW AND APPROVAL OF THE SHOP DRAWINGS ARE DONE AT THE CONTRACTOR'S SOLE FINANCIAL RISK. THIS MEANS THAT WHERE DIFFERENCES OF INTERPRETATION EXIST, WORK DONE PRIOR TO THE APPROVAL OF THE SHOP DRAWINGS THAT IS ADJUDGED BY THE ENGINEER TO BE NOT IN CONFORMANCE WITH THE SPECIFICATIONS MAY BE SUBJECT TO REMOVAL AND REPLACEMENT AT THE CONTRACTORS SOLE EXPENSE. AT A MINIMUM, WHERE REASONABLE ADDITIONS TO THE WORK ARE INDICATED ON THE SHOP DRAWINGS, THE ADDITIONAL COST OF THE REMOVAL AND REWORK THAT WOULD NOT HAVE BEEN REQUIRED HAD THE CONTRACTOR NOT PROCEEDED PRIOR TO SHOP DRAWING APPROVAL SHALL BE AT THE CONTRACTOR'S SOLE EXPENSE.

12. CONSTRUCTION METHODS, PROCEDURES, AND SEQUENCES ARE THE RESPONSIBILITY OF THE CONTRACTOR. THE CONTRACTOR SHALL TAKE ALL NECESSARY MEANS TO MAINTAIN AND PROTECT THE STRUCTURAL INTEGRITY OF ALL CONSTRUCTION AT ALL STAGES.
13. COORDINATION WITH THE ARCHITECTURAL, MECHANICAL, PLUMBING AND ELECTRICAL DRAWINGS TO VERIFY THE LOCATIONS AND SIZES OF ALL CHASES, INSERTS, OPENINGS, SLEEVES, FINISHES, DEPRESSIONS, AND OTHER PROJECT REQUIREMENTS ARE THE CONTRACTOR'S RESPONSIBILITY. ALL REQUIRED OPENINGS, SLEEVES, OR OTHER COMPONENTS MAY NOT BE SHOWN ON THE STRUCTURAL DRAWINGS.
14. IMPOSED CONSTRUCTION LOADS, INCLUDING CRANE LOADS, IN EXCESS OF THE STATED DESIGN LOADS MUST BE SUBMITTED TO THE ENGINEER FOR REVIEW PRIOR TO THE IMPOSITION OF SUCH LOADS.
15. IMPLEMENTING JOB SITE SAFETY AND CONSTRUCTION PROCEDURES ARE THE SOLE RESPONSIBILITY OF THE CONTRACTOR.
16. IN CASE OF CONFLICT BETWEEN THE GENERAL NOTES, DETAILS AND SPECIFICATIONS, THE MOST RIGID REQUIREMENTS SHALL GOVERN.

AUGER CAST PILE

1. ALL MATERIALS AND WORKMANSHIP SHALL COMPLY WITH THE REQUIREMENTS OF THE FOLLOWING CODES AND STANDARDS:
   "BUILDING CODE REQUIREMENTS FOR REINFORCED CONCRETE, ACI 318", AMERICAN CONCRETE INSTITUTE
   "ACI MANUAL OF CONCRETE PRACTICE - PARTS 1 THROUGH 5", LATEST EDITION
   "MANUAL OF STANDARD PRACTICE", CONCRETE REINFORCING INSTITUTE
   CEMENT ASTM C150: TYPE I / II
   AGGREGATES ASTM C33 NORMAL WEIGHT
   DEFORMED REINFORCING BARS ASTM A615, GRADE 60
   GROUT FLUIDIFIER ASTM C937
   PILES UNDER STATIC AXIAL COMPRESSIVE LOAD ASTM D1143
2. AUGER CAST PILES SHALL BE INSTALLED PER LOCATIONS SHOWN ON THE DRAWINGS.
3. REFER TO GEOTECHNICAL REPORT FOR ADDITIONAL REQUIREMENTS RELATED TO AUGER CAST PILES CONSTRUCTION.
4. GROUT STRENGTH: 4,000 PSI 28-DAY COMPRESSIVE STRENGTH
5. TOTAL GROUT VOLUME IN EACH PILE SHALL BE AT LEAST 120 PERCENT OF THE THEORETICAL "NEAT" PILE VOLUME
6. A BOTTOM DISCHARGE BIT SHALL BE USED IN LIEU OF A SIDE DISCHARGE BIT, THE HOLE IN THE BOTTOM OF THE BIT SHALL BE CLOSED WHILE THE AUGER IS ADVANCED. THE PLUG SHALL BE REMOVED BY THE REBAR PLACEMENT PRIOR TO GROUTING.
7. CLOSE INSPECTION BY GEOTECHNICAL PERSONNEL IS REQUIRED DURING PILE INSTALLATION TO MONITOR PLUMBNESS, GROUTING PROCEDURES AND TO SAMPLE GROUT, MONITOR AUGER WITHDRAWAL RATE DURING GROUTING AND PLACEMENT OF REINFORCING.
8. LOAD TEST PILES AS INDICATED IN THE SPECIFICATIONS.

GENERAL FOUNDATION/GEOTECHNICAL NOTES

1. THE SOILS REPORT, PREPARED BY TERRACON CONSULTANTS, INC., DATED 07/23/20, IS ON FILE WITH THE OWNER AND A COPY IS AVAILABLE FOR EXAMINATION AT THE OFFICE OF THE STRUCTURAL ENGINEER.
2. THE SOIL BEARING VALUE OF CONVENTIONAL SPREAD FOOTINGS (AFTER OVER-EXCAVATION AND BACKFILL REQUIREMENTS ARE MET) IS 2,000 PSF, AS RECOMMENDED BY TERRACON CONSULTANTS, INC.
3. AFTER PERFORMING THE INITIAL SITE PREPARATION ACTIVITIES, THE EXPOSED SOILS WITHIN THE LIMITS OF THE PROPOSED STRUCTURE(S) AND PAVEMENT AREAS SHALL BE PROOFROLLED IN THE PRESENCE OF A REPRESENTATIVE OF THE GEOTECHNICAL ENGINEER. THE EXPOSED SUBGRADE SHALL BE PROOFROLLED WITH A LOADED TANDEM-AXLE DUMP TRUCK OR OTHER HEAVY, RUBBER-TIRED CONSTRUCTION EQUIPMENT WEIGHING AT LEAST 20-TONS TO LOCATE ANY ZONES THAT ARE SOFT OR UNSTABLE. WHERE SOFT OR UNSTABLE AREAS ARE ENCOUNTERED, UNDERCUT SHALL EXTEND UNTIL FIRM MATERIAL IS ENCOUNTERED OR TO A LEVEL DETERMINED TO BE ACCEPTABLE BY THE GEOTECHNICAL ENGINEER. SEE GEOTECHNICAL REPORT FOR ADDITIONAL REQUIREMENTS REGARDING SITE PREPARATION.
4. VERIFY LOCATIONS OF COLUMNS, UNDERGROUND UTILITIES, ETC., WITH ARCHITECTURAL, MECHANICAL, ELECTRICAL, AND CIVIL DRAWINGS PRIOR TO PLACEMENT OF FOUNDATIONS.
5. THE BOTTOM OF ALL EXTERIOR FOOTINGS SHALL EXTEND A MINIMUM OF 3'-0" BELOW FINISHED GRADE.
6. ALL FOUNDATION AND SLAB-ON-GRADE SUB GRADES ARE TO BE FIELD INSPECTED BY AN EXPERIENCED QUALIFIED GEOTECHNICAL ENGINEER TO VERIFY THAT THE ALLOWABLE BEARING PRESSURE IS ACHIEVED AND THAT THE SUB GRADES ARE SUITABLE FOR SUPPORT OF THE FOUNDATIONS AND SLAB-ON-GRADE. THE GEOTECHNICAL ENGINEER SHALL ALSO VERIFY FOUNDATION ELEVATIONS PRIOR TO PLACEMENT OF FOUNDATION ELEMENTS, AND VERIFY ALL SUBGRADES PRIOR TO BACKFILL.
7. UNLESS DETERMINED OTHERWISE BY GEOTECHNICAL EVALUATION, FILL MATERIAL FOR SLAB AND FOOTING AREAS SHALL BE PLACED IN LAYERS NOT EXCEEDING 8 INCHES (UNCOMPACTED THICKNESS) AND COMPACTED TO 98% OF MAXIMUM DRY DENSITY AS DETERMINED BY ASTM D698. CRUSHED STONE BACKFILL SHALL BE COMPACTED WITH HAND EQUIPMENT TO THE SATISFACTION OF THE GEOTECHNICAL ENGINEER.
8. THE CONTRACTOR SHALL TAKE ALL NECESSARY PRECAUTIONS TO BRACE FOUNDATION WALLS WHEN BACK FILLING AND WHEN THERE IS A POSSIBILITY OF DAMAGE BY EXCESS WATER.
9. COMPACTION OF BACKFILL WITHIN 2 FEET OF FOUNDATION WALLS SHALL BE ACCOMPLISHED WITH HAND EQUIPMENT. WHERE FILL IS REQUIRED ON BOTH SIDES OF FOUNDATION WALL, BRING THE FILL UP EACH SIDE SIMULTANEOUSLY AND UNIFORMLY.
10. THE SURFACE AREA ADJACENT TO THE FOUNDATION WALL SHALL BE PROVIDED WITH ADEQUATE DRAINAGE AND SHALL BE GRADED SO AS TO DRAIN SURFACE WATER AWAY FROM FOUNDATION WALLS.
11. IF FOOTING EXCAVATIONS ENCOUNTER ISOLATED AREAS OF RELATIVELY HARD ROCK AT OR ABOVE THE PLANNED FOOTING ELEVATIONS, THE ROCK SHALL BE OVER EXCAVATED TO A DEPTH OF APPROXIMATELY ONE FOOT BELOW THE FOUNDATION BEARING ELEVATION AND BACKFILLED WITH STRUCTURAL FILL.
12. FOUNDATIONS SHALL NOT BE PLACED ON MUD OR MUCK, SOFT OR LOOSE SOIL, IN STANDING WATER OR ON FROZEN GROUND.
13. ALL NON-CANTILEVER WALLS SHALL BE BE ADEQUATELY BRACED PRIOR TO BACKFILL.
14. CANTILEVER RETAINING WALLS SHALL NOT BE BACKFILLED UNTIL THE CONCRETE HAS DEVELOPED 100% OF THE REQUIRED 28-DAY COMPRESSIVE STRENGTH FOR THE CLASS OF CONCRETE SPECIFIED.

PRE-ENGINEERED METAL BUILDINGS

1. DESIGN OF PRE-ENGINEERED METAL BUILDING SHALL BE IN ACCORDANCE WITH PROCEDURES SET FORTH IN MBMA'S "METAL BUILDING SYSTEMS MANUAL."
2. DESIGN LOADS SHALL BE AS INDICATED ON THESE DRAWINGS AND IN ACCORDANCE WITH ASCE 7, "MINIMUM DESIGN LOADS FOR BUILDINGS AND OTHER STRUCTURES" AND THE INTERNATIONAL BUILDING CODE, 2015, COORDINATE COLLATERAL LOAD DESIGN REQUIREMENTS WITH G.C., SUBCONTRACTORS AND EQUIPMENT SHOWN ON DRAWINGS U.N.O.
3. ALL COLUMN BASES SHALL BE DESIGNED AS PINNED BASE. NO FIXED BASE DESIGNS ARE PERMITTED.
4. FOUNDATION SIZES INDICATED ON THE DRAWINGS ARE FOR PRICING ONLY AND ARE BASED ON PRELIMINARY REACTIONS. CONTRACTOR SHALL PROVIDE COLUMN REACTIONS TO THE ARCHITECT AND STRUCTURAL ENGINEER FOR REVIEW PRIOR TO BEGINNING FABRICATION OF THE BUILDING AND FINAL FOUNDATION DESIGN.
5. COORDINATE ALL PENETRATIONS THROUGH ROOF WITH ARCHITECTURAL, MECHANICAL, ELECTRICAL AND PLUMBING DRAWINGS AND ALL TRADES.
6. PROVIDE TEMPORARY SHORES, GUYS, BRACES AND OTHER SUPPORTS DURING ERECTION TO KEEP STRUCTURAL FRAMING SECURE, PLUMB, AND IN ALIGNMENT AGAINST TEMPORARY CONSTRUCTION LOADS AND LOADS EQUAL IN INTENSITY TO DESIGN LOADS. REMOVE TEMPORARY SUPPORTS WHEN PERMANENT STRUCTURAL FRAMING, CONNECTIONS, AND BRACING ARE IN PLACE, UNLESS OTHERWISE INDICATED. COMPLY WITH ALL LOCAL, STATE, FEDERAL AND OSHA REGULATIONS PERTAINING TO ERECTION OF METAL BUILDING.
7. COORDINATE ROOF TOP MECHANICAL UNIT LOCATIONS AND WEIGHTS WITH ARCHITECTURAL/MECHANICAL DRAWINGS.

SPECIAL INSPECTION

1. IT IS THE RESPONSIBILITY OF THE CONTRACTOR TO COORDINATE AND SCHEDULE THE SPECIAL INSPECTOR'S INSPECTIONS AND TESTING FOR THE WORK NOTED BELOW AND IN THE SPECIAL INSPECTIONS SPECIFICATION. THE FOLLOWING INFORMATION IS PROVIDED FOR THE CONTRACTOR'S INFORMATION AND COORDINATION PURPOSES.
2. SPECIAL INSPECTIONS SHALL BE PERFORMED FOR THE FOLLOWING WORK AS REQUIRED IN THE 2015 INTERNATIONAL BUILDING CODE:
   - 2.1. STEEL CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.02.
   - 2.2. CONCRETE CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.3
   - 2.3. SOILS CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.6
   - 2.4. CAST-IN-PLACE DEEP FOUNDATION CONSTRUCTION IN ACCORDANCE WITH SECTION 1705.8
3. THE TYPE AND EXTENT OF EACH TEST AND INSPECTION REQUIRED FOR EACH TYPE OF WORK SHALL BE AS INDICATED IN THE BUILDING CODE AND THE REFERENCES INCORPORATED THEREIN.
4. SPECIAL INSPECTION SERVICES SHALL BE CONTRACTED AND PAID FOR BY THE CONTRACTOR.
5. WORK REQUIRING SPECIAL INSPECTION SHALL BE INSPECTED BY THE SPECIAL INSPECTOR FOR CONFORMANCE WITH THE APPROVED DRAWINGS AND SPECIFICATIONS. INSPECTION REPORTS INDICATING THE RESULTS OF SPECIAL INSPECTIONS SHALL BE PROMPTLY SUBMITTED TO THE CONTRACTOR, THE ARCHITECT, AND THE STRUCTURAL ENGINEER.
6. ALL SPECIAL INSPECTIONS INDICATING NON-CONFORMING WORK SHALL BE REPORTED IMMEDIATELY TO THE CONTRACTOR, THE ARCHITECT AND THE STRUCTURAL ENGINEER. IMPENDING CONSTRUCTION WORK THAT WOULD IMPEDE ECONOMICAL CORRECTION OF NON-CONFORMING WORK SHALL NOT PROCEED WITHOUT WRITTEN APPROVAL.
7. A FINAL REPORT DOCUMENTING COMPLETION OF ALL REQUIRED SPECIAL INSPECTIONS AND CORRECTION OF ANY NON-CONFORMING WORK NOTED IN THE INSPECTIONS SHALL BE SUBMITTED BY THE SPECIAL INSPECTOR AT THE COMPLETION OF THE PROJECT. FINAL REPORT SHALL IDENTIFY ALL NON-CONFORMING WORK AND DISCUSS REMEDIATION THAT OCCURRED.
8. SPECIAL INSPECTION SHALL BE PERFORMED BY A QUALIFIED INSPECTION AND TESTING AGENCY APPROVED BY THE BUILDING OFFICIAL, THE ARCHITECT, AND THE STRUCTURAL ENGINEER.
9. SEE SPECIFICATIONS FOR ADDITIONAL INFORMATION WITH REGARDS TO SPECIAL INSPECTOR AND CONTRACTOR RESPONSIBILITIES.

CAST-IN-PLACE CONCRETE

1. ALL MATERIALS AND WORKMANSHIP SHALL COMPLY WITH THE REQUIREMENTS OF THE FOLLOWING CODES AND STANDARDS:
   "BUILDING CODE REQUIREMENTS FOR REINFORCED CONCRETE, ACI 318-11", AMERICAN CONCRETE INSTITUTE
   "ACI MANUAL OF CONCRETE PRACTICE - PARTS 1 THROUGH 5", LATEST EDITION
   "MANUAL OF STANDARD PRACTICE", CONCRETE REINFORCING STEEL INSTITUTE
   ACI 305 AND ACI 306 FOR HOT AND COLD WEATHER CONCRETE CONSTRUCTION
2. CONTRACTOR SHALL PROVIDE MATERIALS WHICH COMPLY WITH THE FOLLOWING ASTM REQUIREMENTS, AS REQD.:

CEMENT	ASTM C150: TYPE I/II
AGGREGATES	ASTM C33
FLY ASH	ASTM C618
PLAIN REINFORCING BARS	ASTM A615, GRADE 60
WELDABLE REINFORCING BARS	ASTM A706, GRADE 60
WELDED WIRE FABRIC	ASTM A1064
AIR-ENTRAINING ADMIXTURE:	ASTM C260

3. CONCRETE PROTECTION FOR REINFORCEMENT SHALL BE IN ACCORDANCE WITH THE FOLLOWING TABLE, U.N.O. ON THE CONSTRUCTION DRAWINGS:

APPLICATION	COVER
- CONCRETE CAST AGAINST AND PERMANENTLY EXPOSED TO EARTH:	3"
- CONCRETE EXPOSED TO WEATHER (U.N.O.):	
#6 THROUGH #18 BARS:	2"
#5 BAR, W31 OR D31 WIRE AND SMALLER:	1-1/2"
- CONCRETE NOT EXPOSED TO WEATHER OR IN CONTACT WITH GROUND SLABS, WALLS, AND JOISTS:	
#14 AND #18 BARS:	1-1/2"
#11 BAR AND SMALLER:	3/4"

4. CONCRETE MIXES SHALL BE AS FOLLOWS:

APPLICATION	COMP. STRENGTH, AIR, W/C
- CONCRETE USED FOR FOUNDATION CONSTRUCTION (STRIP/SPREAD FOOTINGS, GRADE BEAMS, FOUNDATION WALLS ETC.), OR CONCRETE EXPOSED TO CYCLES OF FREEZE THAW (SIDEWALKS, EXTERIOR SLAB ON GRADE ETC.):	4,500 PSI, 6%, 0.45
- INTERIOR SLAB ON GRADE:	4,000 PSI, NONE, 0.50

5. SHOP DRAWINGS SHOWING THE SIZE, LENGTH, QUANTITY, LOCATION AND MARK OF ALL REINFORCING BARS, SUPPORTS AND ACCESSORIES SHALL BE SUBMITTED FOR APPROVAL PRIOR TO FABRICATION.
6. MIX DESIGNS AND ADMIXTURE PRODUCT DATA SHALL BE SUBMITTED FOR APPROVAL PRIOR TO ORDERING CONCRETE.
7. THE TYPICAL DETAILS, PLANS, AND SECTIONS ON THESE DRAWINGS CONTAIN ADDITIONAL GENERAL CONCRETE CONSTRUCTION NOTES AND INFORMATION.
8. ALL CONCRETE SHALL BE REINFORCED UNLESS NOTED OTHERWISE.
9. REINFORCING STEEL SHALL BE CLEAN OF ALL DIRT AND OILS PRIOR TO CONCRETE POUR UNLESS SPECIFIED OTHERWISE.
10. SUPPORTS TO ADEQUATELY POSITION REINFORCING BARS DURING CONSTRUCTION SHALL BE INSTALLED.
11. FOUNDATION DOWELS OF THE SAME SIZE AND SPACING AS VERTICAL STEEL SHALL BE INSTALLED FOR ALL WALLS, PIERS, AND COLUMNS.
12. ALL REINFORCING AT WALL AND FOOTING CORNERS AND INTERSECTIONS SHALL BE CONTINUOUS BY THE USE OF BENT BARS OR CORNER BARS UNLESS INDICATED OTHERWISE.
13. CONSTRUCTION JOINTS SHALL BE POSITIONED SO AS NOT TO ADVERSELY AFFECT THE STRUCTURAL PERFORMANCE. CONSTRUCTION JOINT LOCATIONS NOT INDICATED ON THE STRUCTURAL DRAWINGS SHALL BE APPROVED BY THE STRUCTURAL ENGINEER.
14. PIPE SLEEVES AND INSERTS SHALL BE INSTALLED IN CONCRETE WORK AT ALL PENETRATIONS. PENETRATIONS OF BEAMS, JOISTS, COLUMNS OR STRUCTURAL SLABS NOT INDICATED ON THE STRUCTURAL DRAWINGS SHALL BE APPROVED BY THE STRUCTURAL ENGINEER.
15. ONLY WELDABLE REINFORCING BARS MAY BE WELDED.
16. ADMIXTURES CONTAINING CHLORIDE OR OTHER CORROSIVE CHEMICALS SHALL NOT BE USED IN CONCRETE.
17. AGGREGATES SHALL BE FREE OF DELETERIOUS OR NON-DURABLE MATERIALS SUCH AS CHERTS.
18. REINFORCING SHALL BE ADEQUATELY TIED AND SUPPORTED TO HOLD IT IN THE CORRECT POSITION DURING CONSTRUCTION AND THE PLACEMENT OF CONCRETE.
19. CONCRETE SHALL BE CONSOLIDATED ADEQUATELY DURING PLACEMENT BY MECHANICAL VIBRATION IN ACCORDANCE WITH PUBLISHED PRACTICES.
20. PLASTIC CHAIRS SHALL BE USED IN ALL CONCRETE THAT WILL BE EXPOSED TO VIEW IN THE COMPLETED STRUCTURE.
21. EXPOSED CONCRETE CORNERS SHALL BE CHAMFERED MINIMUM ¾", OR AS INDICATED ON THE STRUCTURAL/ARCHITECTURAL DRAWINGS.
22. FILL POCKETS AROUND CONNECTIONS WITH CONCRETE FLUSH AND SMOOTH UNLESS INDICATED OTHERWISE.
23. FORMED SURFACES SHALL HAVE A SMOOTH-FORM FINISH WHERE EXPOSED TO VIEW AND A ROUGH-FORM FINISH WHERE NOT EXPOSED TO VIEW UNLESS INDICATED OTHERWISE.
24. UNFORMED SURFACES SHALL HAVE A TROWEL FINISH WHERE EXPOSED TO VIEW AND A FLOAT FINISH WHERE NOT EXPOSED TO VIEW U.N.O. EXCEPT THAT STAIRS AND EXTERIOR WALKING SURFACES SHALL HAVE A BROOM FINISH U.N.O.
25. SLABS-ON-GRADE SHALL BE PLACED ON A VAPOR BARRIER.
26. ALL COLD JOINTS SHALL BE ROUGHENED TO A FULL AMPLITUDE OF ¼" AND A CONCRETE BONDING AGENT SHALL BE APPLIED PRIOR TO THE PLACEMENT OF FRESH CONCRETE.
27. IN SLABS-ON-GRADE, LAP WELDED WIRE FABRIC TWO FULL MESH PANELS AND WIRE TOGETHER.
28. SPLICE LAP LENGTHS FOR REINFORCING SHALL BE IN ACCORDANCE WITH THE FOLLOWING TABLE, U.N.O. ON THE PLANS:

BAR SIZE	LAP LENGTH
#3	24"
#4	36"
#5	48"
#6-#8	60"

29. PROVIDE ISOLATION JOINTS IN SLABS AS FOLLOWS:
    - A. BETWEEN SLABS-ON-GRADE AND FOUNDATION WALLS
    - B. BETWEEN SLABS AND INSERTS SUCH AS PIPES
    - C. AROUND STEEL COLUMNS AT SPREAD FOOTINGS

AUGER CAST PILE PLAN

SCALE: 1/16" = 1'-0"

NOTES:

1. PILES SHALL BE DRILLED TO PILE TIP ELEVATIONS INDICATED ON THE AUGER CAST PILE DETAIL - SEE SHEET S-1-501.
2. PILES SHALL BE SPACED AS INDICATED. PILES SHALL NOT BE INSTALLED WITHIN 6 PILE DIAMETERS CENTER-TO-CENTER OF A PILE FILLED WITH GROUT LESS THAN 24-HOURS OLD.
3. THE TOTAL GROUT VOLUME IN EACH PILE SHALL BE AT LEAST 120% OF THE THEORETICAL "NEAT PILE VOLUME".
4. SEE PROJECT SPECIFICATIONS, GEOTECHNICAL REPORT AND SHEET S-0-001 FOR ADDITIONAL INFORMATION AND REQUIREMENTS FOR AUGER CAST PILE CONSTRUCTION.
5. SEE SHEET S-1-101 FOR FOOTING SCHEDULE AND FOUNDATION PLAN.
6. LOAD TEST PILES AS INDICATED IN THE SPECIFICATIONS AND AT THE LOCATIONS SHOWN. COORDINATE W/ THE ENGINEER.
7. AUGER CAST PILE LAYOUT AND QUANTITY IS FOR CONTRACTOR ESTIMATING PURPOSES ONLY. FINAL LAYOUT WILL BE PROVIDED W/ APPROVED METAL BUILDING SHOP DRAWINGS.

FOUNDATION PLAN

SCALE: 1/16" = 1'-0"

NOTES:

1. TYPICAL COLUMN PIERS, FOUNDATION SIZES, AND DETAILS THAT PERTAIN TO THE METAL BUILDING ARE FOR CONTRACTOR ESTIMATING PURPOSES ONLY AND HAVE BEEN DESIGNED BASED ON PRELIMINARY LOADING INFORMATION. CONTRACTOR SHALL SUBMIT FINAL METAL BUILDING REACTIONS TO STRUCTURAL ENGINEER FOR FINAL FOUNDATION DESIGN AND ANCHOR BOLT EMBEDMENT. CONTRACTOR SHALL ASSUME A MINIMUM ANCHOR BOLT EMBEDMENT OF 40-INCHES.
2. TOP OF FOOTING ELEVATION INDICATED THUS (') ON PLAN. TOP OF PIER ELEVATION INDICATED THUS ((')) ON PLAN. F.F.E. 100.00'. COORDINATE TOP OF FOUNDATION WALL ELEVATIONS WITH DOOR OPENINGS.
3. FLOOR SLAB CONSTRUCTION JOINTS MUST BE PARALLEL TO BUILDING FRAMES. SAWCUTTING THE FLOOR SLAB COULD COMPROMISE THE STRUCTURAL INTEGRITY OF THE SLAB AND FOUNDATIONS. SAWCUTTING SHALL BE COORDINATED WITH THE STRUCTURAL ENGINEER.
4. COORDINATE EXACT LOCATION OF ALL WALLS/COLUMNS WITH ARCHITECTURAL DWGS.
5. COORDINATE EXACT SIZE AND LOCATION OF PENETRATIONS THROUGH WALLS AND SLABS WITH ARCH/MECH/ELEC/PLUMB DWGS., GENERAL CONTRACTOR AND ALL TRADES.
6. FOOTINGS SHALL BE CENTERED W/ BASE OF COLUMN.
7. RUN GRADE BEAM REINFORCING CONTINUOUS THROUGH PIER REINFORCING. PROVIDE CORNER BARS SAME SIZE AND SPACING AS LONGITUDINAL REINFORCEMENT.
8. SEE THIS SHEET FOR FOOTING AND PIER SCHEDULE.
9. COORDINATE EXACT LOCATIONS AND ELEVATIONS OF ALL WALLS W/ ARCHITECTURAL DRAWINGS.
10. GRADE BEAM CONSTRUCTION JOINTS SHALL OCCUR AT PILE CAP LOCATIONS (CENTERED OVER PILE CAPS) ONLY AND NOT BETWEEN PILES. FIELD COORDINATE LOCATIONS WITH THE ENGINEER.
11. ALL CONSTRUCTION JOINTS IN THE SLAB SHALL BE PARALLEL TO THE RIGID FRAMES.
12. SEE SHEET S-1-502 FOR SLABS LESS THAN 16-INCHES BEARING ON GRADE BEAM DETAILS.

PIER SCHEDULE

MARK	SIZE	REINF.
P1 *	2'-0" X 3'-0"	(16) - #6 VERT. & #3 TIES @ 6" O.C.

*SEE PIER DETAILS ON SHEET S-1-501. TIES SHALL BE LOCATED VERTICALLY NOT MORE THAN ONE-HALF A TIE SPACING ABOVE THE TOP OF FOOTING.

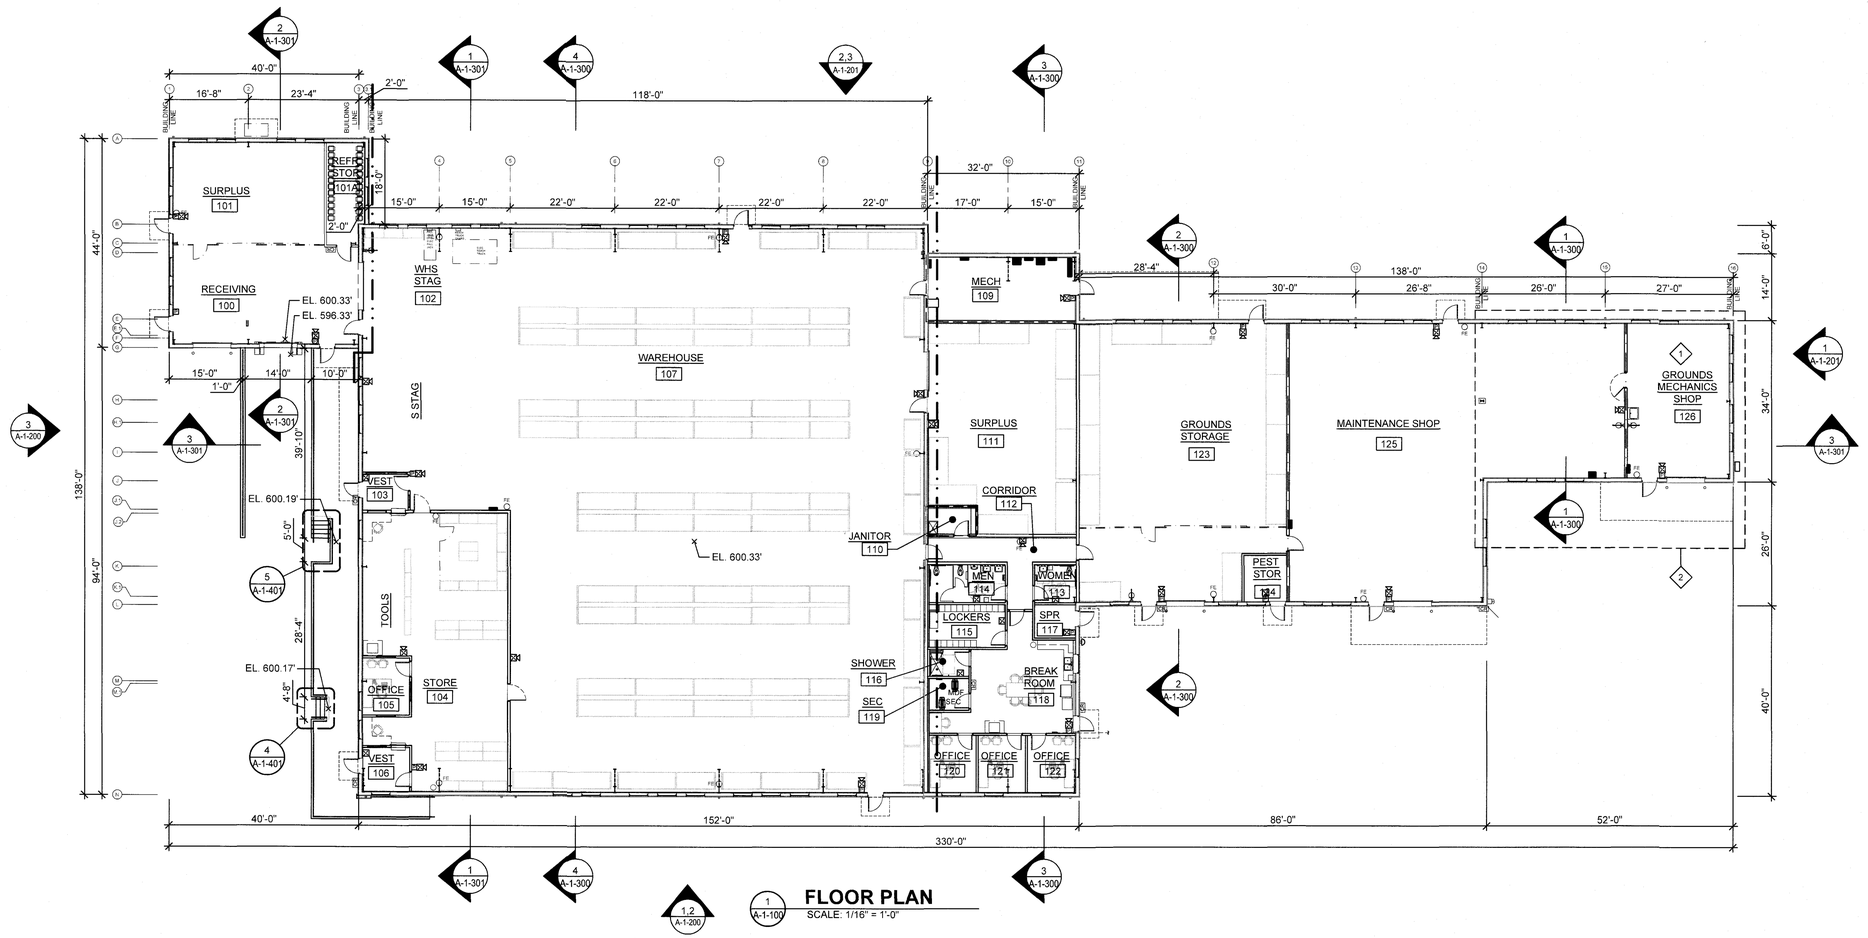
BUILDING SYSTEM EFFICIENCY REQUIREMENTS

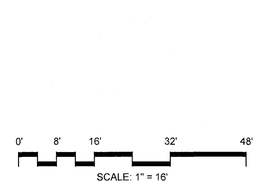
BUILDING 1 - WAREHOUSE/GROUNDS BUILDING

PROVIDE THERMAL EFFICIENCY OF BUILDING SYSTEM PER ANSI/ASHRAE 90.1-2010, CLIMATE ZONE 4A INCLUDING THE FOLLOWING:



WALL INSULATION-	ASSEMBLY MAX U-0.084 OR R-19 INSULATION
ROOF INSULATION-	ASSEMBLY MAX U-0.055 OR R-13 + R-13 INSULATION W/THERMAL SPACER BLOCKING
WINDOWS-	ASSEMBLY MAX U-0.35, MAX. SHGC 0.40
DOORS-	ASSEMBLY MAX U-0.80, MAX. SHGC 0.40
OVERHEAD DOORS-	ASSEMBLY MAX U-0.50, MAX. SHGC 0.40

ASSEMBLY MAX METHOD OF WALL CONSTRUCTION MUST FOLLOW ANSI/ASHRAE 90.1-2010, TABLE A3.2 ASSEMBLY U-FACTORS FOR METAL BUILDING WALLS.



ASSEMBLY MAX METHOD OF ROOF CONSTRUCTION MUST FOLLOW ANSI/ASHRAE 90.1-2010, TABLE A2.3 ASSEMBLY U-FACTORS FOR METAL BUILDING ROOFS.

CONSTRUCTION NOTES

1. OCCUPANCY OF THE NEW GROUNDS MECHANICS SHOP IS THE FIRST PRIORITY. THE EXISTING "MAIN SHOP" MUST BE OCCUPIED AND USABLE BY THE OWNER UNTIL THE GROUNDS MECHANICS SHOP IS ABLE TO BE OCCUPIED AND USED BY THE OWNER. SEE PHASING PLAN FOR ADDITIONAL PHASING REQUIREMENTS.
2. PHASE 1 - CONTRACTOR MUST GET GROUNDS MECHANICS SHOP OPERATIONAL AND OCCUPIED PRIOR TO DEMOLITION OF EXISTING MECHANIC'S SHOP. THE CONTRACTOR MUST BUILD AS MUCH OF THE MAINTENANCE SHOP AS REQUIRED TO PROVIDE THAT CONSTRUCTION, AND MUST PROVIDE THE ONE HOUR WALL AND DOOR AS PROTECTION OF THE OCCUPIED SPACE DURING THE CONSTRUCTION OF THE REST OF THE FACILITY. SEE ADDITIONAL NOTES ON PHASING PLAN G-003.

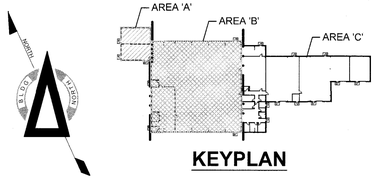
1 A-1-100 **FLOOR PLAN AREA 'A'**
SCALE: 1/8" = 1'-0"



2 A-1-100 **FLOOR PLAN AREA 'B'**
SCALE: 1/8" = 1'-0"

CONSTRUCTION NOTES

1. SEE ELEVATIONS FOR LOCATIONS OF WINDOWS ABOVE.
2. PROVIDE CARD READER SYSTEM LINKED TO WV PROTECTIVE SERVICES CARD ACCESS SYSTEM.
3. CUT CONCRETE CURB AT PERSONNEL AND OVERHEAD DOORS TO PROVIDE DRAINING SILL TYPICAL, SEE 2/A-1-500.
4. OVERLAP METAL BUILDING SYSTEM OVER CURB 1" MIN., TYPICAL, SEE 1/A-1-500.
5. INSULATE ENTIRE WALL AND PROVIDE LINER PANELS ABOVE AND BELOW ROOF ON OPPOSITE SIDE OF WALL.
6. SINGLE FIXED SCISSOR GATE 10'-0"W X 6'-0"H EXTENDED HEIGHT WITH LOCKING BAR, BEARING WASHER, 9" OFFSET INSTALLATION BRACKETS, SCHOOL STRAP, AND GATE HANDLE.
7. PAINT PEDESTRIAN ACCESS AISLES ON FLOOR, 3" WIDE SOLID STRIPES, COLOR SAFETY YELLOW.
8. AT EYEWASH STATIONS SLOPE FLOOR TO FLOOR DRAIN WITH DRAIN 1/2" BELOW F.F.E. SEE 9/A-1-500 FOR TYPICAL DETAIL.
9. PROVIDE INSULATION AND PROVIDE LINER PANELS ON BOTH SIDES OF GIRTS BELOW LOWER ROOF AREA.
10. WALL MOUNTED HANGING CANOPY SYSTEM W/INTEGRAL DRAINS AT 8'-6" TO B/O CANOPY. CENTER OVER DOOR, TYPICAL. 4'-0"x 6'-0" U.N.O., TYPICAL.
11. PROVIDE CONCRETE PAD MATCHING CANOPY DIMENSIONS. 1/4" BELOW F.F.E., SLOPE TO DRAIN.
12. WORK STATION, BY OWNER.
13. FENCING AND GATE BY OWNER.
14. PROVIDE WALL OFFSET MOUNTED TRANSPARENT STRIP CURTAIN DOOR.

WALL TYPES

1. EXTERIOR WALL - METAL WALL PANEL ON METAL BUILDING MANUFACTURER'S GIRTS AND STRUCTURAL SYSTEM. R-19 BATT INSULATION AND LINER PANELS ON INTERIOR FACES FULL HEIGHT OF WALL.
2. INTERIOR WALL - (5" NOM.) 3 5/8" METAL STUDS AT 16" O.C. WITH 5/8" TYPE 'X' IMPACT RESISTANT GYPSUM BOARD ON EACH SIDE TO 10'-0" A.F.F.
3. INTERIOR WALL - (7" NOM.) 5 3/8" METAL STUD WITH 5/8" TYPE 'X' IMPACT RESISTANT GYPSUM BOARD ON EACH SIDE AND UNFACED R-19 BATT INSULATION. PROVIDE TO HEIGHT NOTED FULL HEIGHT WALLS TO STRUCTURE WITHIN 6" OF STRUCTURE AND BRACE WITH SLIP CONNECTION.
4. INTERIOR WALL - METAL WALL LINER PANELS ON METAL BUILDING MANUFACTURER'S GIRTS AND STRUCTURAL SYSTEM - R19 BATT INSULATION.
5. FENCE WALL - 8' HIGH CHAINLINK FENCE WALL, SEE DETAILS ON SHEET A-1-500.
6. 1-HOUR WALL - (7" NOM.) 5 5/8" METAL STUDS AT 16" O.C. WITH 5/8" TYPE 'X' IMPACT RESISTANT GYPSUM BOARD ON BOTH SIDES AND UNFACED R-19 BATT INSULATION. FULL HEIGHT WITH 2" DEFLECTION TRACK AT BOTTOM OF STRUCTURE.
7. FURRED WALL - 3 5/8" STEEL STUDS AT 16" O.C. WITH 5/8" TYPE 'X' IMPACT RESISTANT GYPSUM BOARD ON OCCUPIED SIDE. AT TYPE 1 WALLS, DELETE INTERIOR LINER PANELS IN THIS AREA.
8. FURRED WALL - 6" STEEL STUDS AT 16" O.C. WITH 5/8" TYPE 'X' IMPACT RESISTANT GYPSUM BOARD ON OCCUPIED SIDE. AT TYPE 1 WALLS, DELETE INTERIOR LINER PANELS IN THIS AREA.
9. INTERIOR WALL - (7" NOM.) 5 3/8" METAL STUD WITH 5/8" TYPE 'X' IMPACT RESISTANT GYPSUM BOARD ON EACH SIDE AND UNFACED R-19 BATT INSULATION. PROVIDE FULL HEIGHT WALLS TO STRUCTURE WITHIN 6" OF STRUCTURE AND BRACE WITH 2" DEFLECTION TRACK TO CEILING.

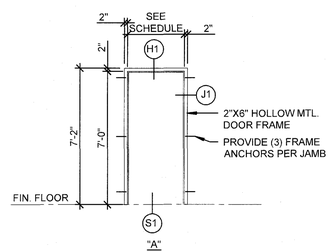
FAC- FACTORY
GV- GALVANIZED
HM- HOLLOW METAL
INS- INSULATED
PTD- PAINTED
STL- STEEL

NOTES:

1. PROVIDE INSULATED DOOR SYSTEM.
2. PROVIDE TRIM AT ALL OVERHEAD DOORS ENCASING STEEL FRAMES.
3. PROVIDE LOCKING HASP WITH PROGRAMMABLE PADLOCK AND KEY OVERRIDE.
4. PROVIDE CARD READER SYSTEM.
5. PROVIDE WALL MOUNTED MAGNETIC HOLD OPEN AND DOOR CLOSER WITH 180° SWING. (MAGNETIC HOLD OPEN IS NOT REQUIRED UNTIL FULL OCCUPANCY IS PROVIDED.)
6. PROVIDE TRANSPARENT STRIP CURTAIN ON OPPOSITE FACE OF WALL.
7. MANUAL OVERHEAD DOOR.
8. POWERED OVERHEAD DOOR, SEE ELECTRICAL.
9. PROVIDE DOORBELL PUSHBUTTON TRANSMITTER FOR WAREHOUSE DOORBELL SYSTEM AT THIS DOOR. WAREHOUSE DOORBELL SYSTEM SHALL BE LH-4000 WIRELESS DOOR CHIMES FROM 1800DOORBELL, OR EQUAL, WITH 5,000 FT RANGE, 3 DOORBELL TRANSMITTERS, 5 RECEIVERS CAPABLE OF PLAYING 12 DISTINCT SOUND PATTERNS AND WITH 4 ADJUSTABLE VOLUME CONTROLS FROM MUTE TO 85 dB.



2 / A-1-600 WINDOW ELEVATIONS

SCALE: 1/4" = 1'-0"

NOTE: OVERALL DIMENSIONS SHOWN ARE FOR ROUGH OPENINGS. FIELD VERIFY ALL OPENINGS.

3 / A-1-600 DOOR ELEVATIONS

SCALE: 1/4" = 1'-0"

4 / A-1-600 DOOR FRAME TYPES

SCALE: 1/4" = 1'-0"

NOTE: OVERALL DIMENSIONS SHOWN ARE FOR ROUGH OPENINGS. FIELD VERIFY ALL OPENINGS.

SCALE: 1/8" = 1'-0"

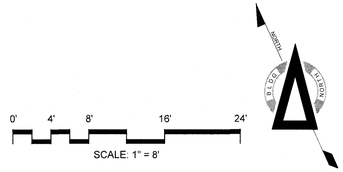
2 A-2-100 **OPEN BULK STORAGE PLAN**
SCALE: 1/8" = 1'-0"

CONSTRUCTION NOTES



1. PROVIDE SEALED CONCRETE FOR ALL EXPOSED CONCRETE SURFACES OF BUILDING, INCLUDING FLOORS, PIERS, WALLS/CURBS AND TOPS OF WALLS/CURBS AND PIERS.
2. WALL LINER PANELS.
3. PAINT ALL "NON-PREFINISHED" STEEL, INCLUDING BUT NOT LIMITED TO COLUMNS, BEARING PLATES, BOLTS, WELDS, JOISTS, BEAMS, ETC. ALSO PAINT BOTTOMS OF BEARING PLATES AND HOLES PRIOR TO INSTALLATION.
4. STEEL CORNER GUARDS CAST IN CONCRETE.
5. PAINTED STEEL COLUMNS AND BEARING PLATES.
6. OVERHANG, SEE ROOF PLAN.
7. CONCRETE SLAB, SEE STRUCTURAL.
8. JOINT SEALANT IN CONCRETE JOINTS, SEE STRUCTURAL.
9. SALT CONTAINMENT LIP

OPEN STORAGE AND OPEN BULK STORAGE BUILDING SYSTEM EFFICIENCY REQUIREMENTS

BUILDING 2 - OPEN STORAGE AND OPEN BULK STORAGE BUILDINGS

PROVIDE THERMAL EFFICIENCY OF BUILDING SYSTEM PER ANSI/ASHRAE 90.1-2010, CLIMATE ZONE 4A INCLUDING THE FOLLOWING:

WALL INSULATION-	NONE
ROOF INSULATION-	NONE
WINDOWS-	NONE
DOORS-	NONE
OVERHEAD DOORS-	NONE

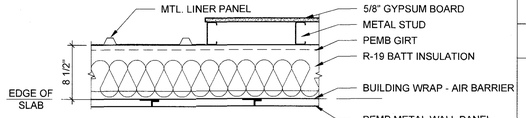
GENERAL ARCHITECTURAL NOTES:



1. DIMENSIONS THAT ARE NOT STATED AS "MAXIMUM" OR "MINIMUM" ARE ABSOLUTE.
2. CONTRACTOR SHALL NOT SCALE DRAWINGS FOR DIMENSIONAL USE. USE ONLY WRITTEN DIMENSIONS.
3. CONTRACTOR SHALL INSTALL ALL BUILDING COMPONENTS WITHIN CURRENT DIMENSIONAL REQUIREMENTS OF THE ADA ACCESSIBILITY GUIDELINES FOR BUILDINGS AND FACILITIES.
4. ALL EQUIPMENT SHOWN IN THE DRAWINGS IS TO BE CONTRACTOR FURNISHED AND INSTALLED UNLESS NOTED "NIC".
5. ALL WALL TYPES TO REFERENCE THE ARCHITECTURAL WALL TYPES SCHEDULE UNLESS OTHERWISE NOTED.
6. CONTRACTOR AND SUB-CONTRACTORS TO VERIFY ALL DIMENSIONS IN THE FIELD PRIOR TO BEGINNING CONSTRUCTION OR ORDERING MATERIALS. INQUIRIES AND DISCREPANCIES SHOULD BE DIRECTED TO THE DESIGNER OF RECORD.
7. ALL ROOM NUMBERS ARE FOR CONSTRUCTION PURPOSES ONLY.
8. CONTRACTOR SHALL PROVIDE STIFFENERS, BRACING, BACKING PLATES, SUPPORTING BRACKETS, ETC. REQ'D FOR ANY WALL-MOUNTED CABINETS OR EQUIPMENT.
9. PROPERLY SEAL ALL CONDUITS, PIPES, DUCTS & OTHER ITEMS OR SYSTEMS THAT PENETRATE FIRE-RATED PARTITIONS, WALLS, AND FLOORS. PROVIDE CLASSIFIED SEALANT SYSTEMS PER SPECIFICATIONS.
10. PROVIDE CONTROL JOINTS IN GYPSUM BOARD IN GYPSUM BOARD AT MAXIMUM DISTANCE OF 30 LINEAR FEET FOR VERTICAL SURFACES AND 50 LINEAR FEET OR 2,500 SQ. FT. FOR CEILINGS. REFER TO REFLECTED CEILING PLANS AND WALL ELEVATIONS FOR SPECIFIC LOCATIONS.
11. THERE SHALL BE NO EXPOSED PIPE, CONDUITS, DUCTS, VENTS, ETC. IN DESIGNATED FINISH SPACES, UNLESS NOTED AS EXPOSED CONSTRUCTION ON FINISH SCHEDULE.
12. THE CONTRACTOR SHALL COORDINATE SIZE AND LOCATION OF HVAC,PLUMBING, ELECTRICAL, AND TECHNOLOGY ITEMS AND OPENINGS PRIOR TO PROCEEDING WITH RELATED WORK.
13. PROVIDE ACCESS PANELS AS REQUIRED BY APPLICABLE CODES AND AS REQUIRED FOR MECHANICAL EQUIPMENT. ACCESS PANELS LOCATED IN FINISH AREAS SHALL BE PAINTED OR PRE-FINISHED TO MATCH ADJACENT SURFACES.
14. UNLESS SHOWN OTHERWISE, DOOR LOCATIONS NOT LOCATED BY DIMENSIONS SHALL BE CENTERED IN WALL OR BE LOCATED FOUR INCHES (4") FROM FINISHED PERPENDICULAR WALL TO OUTSIDE EDGE OF DOOR FRAME.
15. DETAILS NOT SHOWN ARE SIMILAR IN CHARACTER TO THOSE SHOWN. WHERE SPECIFIC DIMENSIONS, DETAILS, OR DESIGN INTENT CANNOT BE DETERMINED, CONSULT THE DESIGNER OF RECORD PRIOR TO PROCEEDING WITH WORK.
16. SEPARATE ALL DISSIMILAR METALS TO PREVENT CORROSION CAUSE BY ELECTROLYSIS ACTION OR OTHER CAUSES AS RECOMMENDED BY THE RESPECTIVE PRODUCT MANUFACTURER OR SUPPLIER.
17. PAINT ALL EXPOSED ELECTRICAL CONDUIT, ELECTRICAL RACEWAYS AND BOXES, MECHANICAL PIPING, DUCTS, EQUIPMENT, AND PLUMBING PIPING WITH THE EXCEPTION OF PREFINISHED AND INSULATED ITEMS.
18. CONTRACTOR SHALL COMPLY WITH ALL LAWS, ORDINANCES, RULES, AND REGULATIONS OF FEDERAL, STATE, REGIONAL, AND LOCAL AUTHORITIES REGARDING HANDLING, STORING, TRANSPORTING, AND DISPOSING OF HAZARDOUS MATERIALS. IF THE CONTRACTOR ENCOUNTERS MATERIALS WHICH HAVE NOT BEEN REMOVED OR RENDERED HARMLESS, THEY SHALL STOP WORK IN THE AREA AFFECTED AND REPORT THE CONDITION TO THE CONTRACTING OFFICERS REPRESENTATIVE AND PROPER AUTHORITIES IN WRITING.

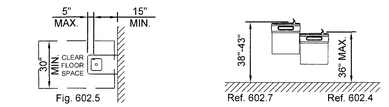
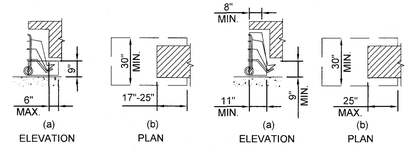
MANEUVERING CLEARANCES





TOILET ROOM NOTES:
1. A TURNING SPACE PER SECTION 304 IS REQUIRED WITHIN A TOILET ROOM (603.2.1)
2. ONLY THE FOLLOWING OBJECTS ARE PERMITTED TO OVERLAP THE REQUIRED CLEARANCE: GRAB BARS, DISPENSERS, SANITARY NAPKIN DISPOSAL UNIT, COAT HOOKS AND SHELVES (604.3.2)
3. FLUSH CONTROLS SHALL BE LOCATED ON THE OPEN SIDE OF THE WATER CLOSET (604.6)
4. URINALS SHALL HAVE A CLEAR FLOOR SPACE COMPLYING WITH 305 POSITIONED FOR FORWARD APPROACH AND CENTERED ON UNIT (605.3)
5. LAVATORIES SHALL HAVE A CLEAR FLOOR SPACE COMPLYING WITH 305 POSITIONED FOR FORWARD APPROACH AND CENTERED ON UNIT (606.2)
6. KNEE & TOE CLEARANCE COMPLYING WITH 306 SHALL BE PROVIDED (602.2)
7. EXPOSED WATER SUPPLY AND DRAIN PIPES SHALL BE INSULATED. THERE SHALL BE NO SHARP OR ABRASIVE SURFACES UNDER LAVATORIES (606.5)
8. INSTALL GRAB BARS TO WITHSTAND NOT LESS THAN A 250 POUND FORCE APPLIED AT ANY POINT ON THE BAR (609.8)

TOILET ROOM CLEARANCES & MOUNTING HEIGHTS

BUILDING SYSTEM EFFICIENCY REQUIREMENTS

PROVIDE THERMAL EFFICIENCY OF BUILDING SYSTEM PER ANSI/ASHRAE 90.1-2010, CLIMATE ZONE 4A INCLUDING THE FOLLOWING:

SLAB INSULATION -	2 FOOT OF R-15 PERIMETER INSULATION AT SLAB
WALL INSULATION -	ASSEMBLY MAX U-0.084 OR R-19 INSULATION
ROOF INSULATION -	ASSEMBLY MAX U-0.055 OR R-13 + R-13 INSULATION W/ THERMAL SPACER BLOCKING
WINDOWS -	ASSEMBLY MAX U-0.35, MAX. SHGC 0.40
DOORS -	ASSEMBLY MAX U-0.80, MAX. SHGC 0.40
OVERHEAD DOORS -	ASSEMBLY MAX U-0.50, MAX. SHGC 0.40

ASSEMBLY MAX METHOD OF WALL CONSTRUCTION MUST FOLLOW ANSI/ASHRAE 90.1-2010, TABLE A3.2 ASSEMBLY U-FACTORS FOR METAL BUILDING WALLS.

ASSEMBLY MAX METHOD OF ROOF CONSTRUCTION MUST FOLLOW ANSI/ASHRAE 90.1-2010, TABLE A2.3 ASSEMBLY U-FACTORS FOR METAL BUILDING ROOFS.

1 A-3-101 **FLOOR PLAN**
SCALE: 1/4" = 1'-0"

CONSTRUCTION NOTES

#	
1	VINYL STRIP CURTAIN DOOR
2	REAR LOADING PRE-MANUFACTURED ALUMINUM MAILBOXES, SEE DETAIL 2/A-3-402
3	FIXED TOTE SHELVING, SEE DETAIL 3/A-3-402
4	FRAME AND GYPSUM WRAP AT COLUMNS, TYPICAL
5	R-16 BATT INSULATION
6	PROVIDE SOUND ATTENUATION BATT AT WALLS
7	CONCRETE WALK - SEE CIVIL
8	HANGING CANOPY (ABOVE)
9	DOWNSPOUT. TIE INTO STORM SYSTEM. SEE CIVIL DRAWINGS FOR STORM SYSTEM
10	FIRE EXTINGUISHER IN SEMI RECESSED CABINET, SEE LIFE SAFETY DRAWING G-3-101
11	PIPE BOLLARD - SEE CIVIL DRAWINGS
12	POWER / DATA POLE - RECTANGULAR ALUMINUM
13	DIMENSIONS AT INTERIOR WALLS ARE TO FACE OF STUD FOR THIS SHEET, TYPICAL
14	PROVIDE SMOKE PARTITIONS FOR INTERIOR WALLS AND CEILINGS IN THIS ROOM. SEAL PENETRATIONS AND OPENINGS.

GENERAL NOTES

1. PERFORM WORK IN ACCORDANCE WITH ALL FEDERAL, STATE AND LOCAL REGULATIONS AND IN ACCORDANCE WITH THE REQUIREMENTS OF AUTHORITIES HAVING JURISDICTION, AS WELL AS SPECIFIC REQUIREMENTS AND CONDITIONS OF ANY NECESSARY PERMITS REQUIRED FOR CONSTRUCTION, DEMOLITION AND DISPOSAL.
2. THE CONTRACTOR SHALL BE RESPONSIBLE FOR COORDINATING HIS CONSTRUCTION ACTIVITIES WITH THOSE OF SUB-CONTRACTORS AND OTHER ENTITIES INVOLVED, IN ORDER TO ASSURE EFFICIENT AND ORDERLY DEMOLITION AND OR INSTALLATION OF EACH PART OF THE WORK.
3. CONTRACTOR SHALL FIELD VERIFY ALL CONDITIONS, DIMENSIONS AND LOCATIONS OF ITEMS TO BE AFFECTED BY DEMOLITION AND/OR CONSTRUCTION ACTIVITIES BEFORE PERFORMING SUCH WORK.
4. ALL AREAS OF LANDSCAPE OR HARDSCAPE DISTURBED BY CONSTRUCTION SHALL BE RESHAPED, GRADED TO DRAIN, SEEDED AND MULCHED OR REPAIRED / REPLACED AT THE CONTRACTORS EXPENSE, TO MATCH ORIGINAL CONDITIONS.
5. CONTRACTOR SHALL LEGALLY DISPOSE OF ALL DEMOLITION MATERIALS OFF-SITE.
6. PROTECT PERSONS, MOTOR VEHICLES, SURROUNDING SURFACES OF BUILDING, BUILDING SITE, PLANTS, AND SURROUNDING BUILDING FROM HARM RESULTING FROM WORK.
7. PREVENT SOLIDS AND DEBRIS FROM ENTERING THE DRAINAGE SYSTEM. CLEAN OUT DRAINS AND DRAIN

SCALE: 1/4" = 1'-0"

FIRE PROTECTION GENERAL NOTES:

1. PROVIDE ALL WORK NECESSARY FOR THE COMPLETE FIRE PROTECTION SYSTEM AS INDICATED AND NOTED, INCLUDING ALL CONNECTIONS TO EXISTING WORK, NEW PIPING AND ACCESSORIES AND FINAL FINISH MOUNTING OF SPRINKLERS IN LOCATIONS INDICATED AND TESTING, ALL AS REQUIRED TO MEET ALL PROVISIONS OF NFPA-13 AND THE KY BUILDING CODE. WORK SHALL BE PERFORMED BY A LICENSED SPRINKLER CONTRACTOR AND SHALL BE ACCOMPANIED BY CERTIFICATIONS OF INSPECTION AND APPROVAL BY THE DEPT. OF HOUSING, BUILDINGS AND CONSTRUCTION. ALL SCREWED PIPING SHALL BE MINIMUM SCH 40 STEEL. ALL VICTAULIC TYPE PIPING SHALL BE MINIMUM SCH 10 STEEL.
2. FIRE PROTECTION COMPONENTS, INCLUDING BUT NOT LIMITED TO PUMPS, VALVES, PIPE & FITTINGS, CONTROL SYSTEMS AND TRIM SHALL BE UL AND/OR FM LISTED FOR FIRE SERVICE, WHERE SUCH LISTING EXISTS.
3. PROVIDE LISTED AIR RELEASE FOR ALL TRAPPED RUNS OF FIRE PROTECTION PIPING.
4. ALL FERROUS FIRE PROTECTION PIPING SHALL BE PAINTED RED WHERE EXPOSED TO VIEW; SHADE TO BE APPROVED BY ENGINEER.
5. ALL FIRE PROTECTION SHUTOFF VALVES SHALL BE SUPERVISED BY THE ALARM SYSTEM EXCEPT ON JOCKEY PUMP AND BYPASS.
6. FIRE PROTECTION PIPING CONNECTIONS MAY BE WELDED, FLANGED, SCREWED OR GROOVE-JOINT TYPE PER NFPA-13, 14, 20 AND THE SPECIFICATIONS FOR THIS PROJECT. NO SCREWED PIPING LARGER THAN 2 INCHES. PITCH ALL PIPING TO DRAIN.
7. SPRINKLERS SHALL BE CENTERED IN 2' x 2' SPACE IN EITHER 2' x 2' OR 2' x 4' GRID LAYOUT.
8. COORDINATE ALL WORK. COORDINATE ALL PIPING AND ACCESSORIES WITH BOTH NEW AND EXISTING MECHANICAL AND ELECTRICAL WORK INCLUDING HVAC, PLUMBING, ELECTRICAL, FIRE ALARM AND COMMUNICATIONS. DO NOT MOUNT SPRINKLERS OR HANG PIPING SUCH AS TO BLOCK ACCESS TO HVAC OR ELECTRICAL EQUIPMENT OR THE CHANGEOUT OF EQUIPMENT WHEN NECESSARY.
9. PROVIDE SPECIAL SPRINKLERS AS REQUIRED FOR COMPLETE DESIGN. PROVIDE HIGH TEMPERATURE HEADS FOR AREAS NEAR SPACE HEATING OUTLETS AND EQUIPMENT.
10. HAZARD CLASSIFICATION IS BASED ON INFORMATION KNOWN AT THE TIME OF DESIGN. HAZARD CLASSIFICATION MAY CHANGE AS BUILDING PROGRESSES.
11. FIRE SYSTEM EXTERIOR APPURTENANCES SHALL BE FINISHED IN EITHER BRASS OR FACTORY FINISH RED (SIAMESE, WATER GONG, TRIM RING, ETC.) PER THE BASE STANDARD FINISH STYLE.
12. A TEST VALVE (INSPECTORS TEST STATION) SHALL BE INSTALLED FOR EACH WET PIPE SYSTEM AND DRY PIPE SYSTEM. PROVIDE SMOOTH BORE STEEL ORIFICE GIVING A FLOW RATE EQUIVALENT TO ONE SPRINKLER.
13. PROVIDE HEAVY GAUGE GALVANIZED STEEL HOODS AND SHIELDS (OR STAINLESS STEEL) THAT ARE SHOP FABRICATED FOR ELECTRICAL ROOMS AND COMMUNICATION ROOMS TO PROTECT ELECTRICAL EQUIPMENT FROM WATER SPRAY WHERE A SPRINKLER SYSTEM IS INSTALLED. DRAINAGE FROM THESE HOODS SHALL BE DIRECTED TO FLOOR DRAINS.
14. ANY AND ALL DAMAGE DUE TO DEMOLITION OR CONSTRUCTION IS TO BE REPAIRED OR REPLACED AS APPROPRIATE, SUBJECT TO ENGINEER'S APPROVAL, AND AT NO ADDITIONAL COST TO THE OWNER.
15. SEE ALSO DIAGRAMS, DETAILS OR SECTIONS FOR SIZES NOT SHOWN ON PLANS.
16. ALL EXISTING EQUIPMENT SHUTDOWNS OR INTERRUPTIONS OF UTILITY SERVICE REQUIRED FOR COMPLETION OF THE WORK SHALL BE SCHEDULED IN ADVANCE, AS REQUIRED BY THE OWNER.
17. CONTRACTOR IS RESPONSIBLE FOR MAKING ALL REQUIRED CONNECTIONS FOR A COMPLETE SYSTEM. SYMBOLS MISSING FROM THE DRAWINGS DO NOT EXCUSE THE CONTRACTOR FROM PROVIDING THE WORK.
18. ALL FIRE PROTECTION PIPING, FITTINGS, RESTRAINTS, HANGERS AND FASTENERS SHALL BE INSTALLED FOR SEISMIC PROTECTION IN ACCORDANCE WITH NFPA-13 AS REQUIRED.
19. EXAMINE THE CONTRACT DOCUMENTS AND IMMEDIATELY REPORT ANY ERROR, DISCREPANCY OR OMISSION. THE ENGINEER WILL DETERMINE WHICH INTERPRETATION TAKES PRECEDENCE WHERE TWO OR MORE CONFLICTING STATEMENTS OCCUR. OTHERWISE, THE CONTRACTOR IS RESPONSIBLE FOR THE MORE STRINGENT (OR EXPENSIVE) INTERPRETATION. IN GENERAL, SCHEDULES, WHEREVER THEY APPEAR, SUPERSEDE SPECIFICATIONS AND SPECIFICATIONS SUPERSEDE PLANS.
20. GENERAL NOTES, WHEREVER THEY ARE FOUND, APPLY TO ALL WORK IN THE PROJECT, UNLESS OTHERWISE INDICATED. SHEET NOTES, UTILIZING NOTE SYMBOLS, APPLY ONLY TO THE SHEET ON WHICH THEY ARE FOUND, UNLESS OTHERWISE STATED. THE MEANING OF NOTE SYMBOLS AND NUMBERS VARIES FROM SHEET TO SHEET.
21. CONTRACTOR SHALL UTILIZE ALL INFORMATION IN THE CONTRACT DOCUMENTS FOR PROVIDING THE WORK. CONTRACTOR SHALL UTILIZE DETAILS AND FLOW DIAGRAMS FOR THE WORK WHERE APPROPRIATE, WHETHER OR NOT THEY ARE SPECIFICALLY REFERENCED ON THE PLANS OR SUPPORTING DRAWINGS.
22. CONTRACTOR SHALL FIELD VERIFY ALL EXISTING CONDITIONS. ANY DISCREPANCIES BETWEEN EXISTING CONDITIONS AND CONTRACT DOCUMENTS ARE TO BE BROUGHT TO THE ATTENTION OF THE ENGINEER BEFORE ANY WORK RELATING TO THOSE CONDITIONS IS PERFORMED.
23. LEGENDS OR LISTS OF SYMBOLS AND ABBREVIATIONS ARE GENERAL IN NATURE AND MAY CONTAIN ITEMS NOT USED IN THE CONTRACT DOCUMENTS. IF ANY SUCH ITEMS ARE FOUND WHICH ARE NOT DEFINED ON THE PLANS OR IN THE SPECIFICATIONS, THE ENGINEER SHALL BE CONTACTED FOR CLARIFICATION BEFORE THE BID.
24. CONTRACTOR SHALL MAINTAIN A SET OF PROJECT RECORD DRAWINGS AT THE JOB SITE AND SHALL BE RESPONSIBLE FOR MAKING CLEAR, NEAT CHANGES TO THE DRAWINGS, REFLECTING CHANGES TO THE WORK AND VARIANCE IN EXISTING CONDITIONS.
25. PROVIDE ALL MISCELLANEOUS STEEL, AS REQUIRED, TO SUPPORT ALL PIPING SYSTEMS AND EQUIPMENT. DO NOT HANG ANYTHING FROM STEEL, COMPOSITION OR WOODEN DECKS. NON-ROOF CONCRETE DECKS MAY BE USED ONLY WITH PERMISSION OF THE ENGINEER. DO NOT HANG ANYTHING FROM MECHANICAL OR ELECTRICAL ITEMS.
26. NO STEEL STRUCTURAL MEMBERS SHALL BE CUT, BURNED, WELDED OR DRILLED WITHOUT SPECIFIC PERMISSION OF THE ENGINEER.
27. ALL EQUIPMENT, ACCESSORIES, PIPING, WIRING, AND OTHER WORK, WHICH IS INSTALLED IN FINISHED SPACES SHALL BE CONCEALED IN WALLS, FLOORS, FURRED CHASES OR SUSPENDED CEILINGS, EXCEPT WHERE OTHERWISE INDICATED.
28. PROVIDE ALL ACCESS DOORS AS SHOWN, EXCEPT THOSE SPECIFIED UNDER OTHER DIVISIONS. IN ADDITION, PROVIDE ANY OTHER ACCESS DOORS WHETHER OR NOT SHOWN ON PLANS, NECESSARY FOR ACCESS TO CONCEALED EQUIPMENT, VALVES, ALARM ACTUATORS, JUNCTION BOXES, CONTROLS OR OTHER OPERATIONAL OR SERVICEABLE ITEMS, UNLESS ITEM IS REASONABLY ACCESSIBLE THROUGH LAY-IN CEILING PANELS.

FIRE PROTECTION PLAN

SCALE: 1/8" = 1'-0"

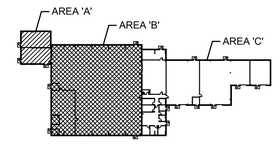
GENERAL NOTES:

1. DO NOT INSTALL ANY PIPES ABOVE ANY ELECTRICAL EQUIPMENT.

⬡ SHEET KEYNOTES:

1. SPRINKLER INSPECTOR'S TEST STATION. SEE DETAIL, SHEET F-500.
2. WAREHOUSE STAGING & WAREHOUSE WILL HAVE RACK STORAGE UP TO 20'-0" HIGH. PROVIDE WITH ESFR HEADS IN LIEU OF IN RACK SPRINKLERS. THE INITIAL OWNER STORAGE INFORMATION IS AS FOLLOWS (FIELD VERIFY WITH OWNER REGARDING FURTHER STORAGE INFORMATION BEFORE DESIGNING SYSTEM):
   - 2.1.1. COMMODITY CLASSIFICATIONS
   - 2.1.2. CLASS I: 53%
   - 2.1.3. CLASS II: 1%
   - 2.1.4. CLASS III: 40%
   - 2.1.5. CLASS IV: 1%
   - 2.1.6. PLASTIC GROUPS
   - 2.1.1. GROUP A: 98%
   - 2.1.2. GROUP B: 1%
   - 2.1.3. GROUP C: 1%
3. REFRIGERANT STORAGE ROOM - THE FOLLOWING REFRIGERANTS WILL BE STORED:

   R-22 IN #30 TANKS
   R-410A IN #25 TANKS
   R-407C IN #25 TANKS
   R-134A IN #30 TANKS
   NITROGEN IN 40-60 LB CAPACITY



HAZARD CLASSIFICATION ▽

USE CLASSIFICATION REQUIRED BY CODE, BUT NO LESS THAN:

1. LIGHT HAZARD - VESTIBULES, OFFICES, & RESTROOMS.
2. ORDINARY HAZARD (GROUP 1) - STORAGE/TOOLS ROOMS, RECEIVING & SURPLUS.
3. ORDINARY HAZARD (GROUP 2) - WAREHOUSE STAGING & WAREHOUSE.

PLUMBING GENERAL NOTES:

1. GENERAL NOTES, WHEREVER THEY ARE FOUND, APPLY TO ALL WORK IN THE PROJECT, UNLESS OTHERWISE INDICATED. SHEET NOTES, UTILIZING NOTE SYMBOLS, APPLY ONLY TO THE SHEET ON WHICH THEY ARE FOUND, UNLESS OTHERWISE STATED. THE MEANING OF NOTE SYMBOLS AND NUMBERS VARIES FROM SHEET TO SHEET.
2. CONTRACTOR SHALL UTILIZE ALL INFORMATION IN THE CONTRACT DOCUMENTS FOR PROVIDING THE WORK. CONTRACTOR SHALL UTILIZE DETAILS AND FLOW DIAGRAMS FOR THE WORK WHERE APPROPRIATE, WHETHER OR NOT THEY ARE SPECIFICALLY REFERENCED ON THE PLANS OR SUPPORTING DRAWINGS.
3. CONTRACTOR SHALL FIELD VERIFY ALL EXISTING CONDITIONS. ANY DISCREPANCIES BETWEEN EXISTING CONDITIONS AND CONTRACT DOCUMENTS ARE TO BE BROUGHT TO THE ATTENTION OF THE ENGINEER BEFORE ANY WORK RELATING TO THOSE CONDITIONS IS PERFORMED.
4. LEGENDS OR LISTS OF SYMBOLS AND ABBREVIATIONS ARE GENERAL IN NATURE AND MAY CONTAIN ITEMS NOT USED IN THE CONTRACT DOCUMENTS. IF ANY SUCH ITEMS ARE FOUND WHICH ARE NOT DEFINED ON THE PLANS OR IN THE SPECIFICATIONS, THE ENGINEER SHALL BE CONTACTED FOR CLARIFICATION.
5. CONTRACTOR SHALL MAINTAIN A SET OF PROJECT RECORD DRAWINGS AT THE JOB SITE AND SHALL BE RESPONSIBLE FOR MAKING CLEAR, NEAT CHANGES TO THE DRAWINGS, REFLECTING CHANGES TO THE WORK AND VARIANCE IN EXISTING CONDITIONS.
6. PROVIDE ALL MISCELLANEOUS STEEL, AS REQUIRED, TO SUPPORT ALL PIPING SYSTEMS AND EQUIPMENT. HANG ALL EQUIPMENT FROM STRUCTURE WITH MINIMUM OF TWO TRAPEZE ASSEMBLIES OR FOUR INTEGRAL MOUNTING POINTS WITH VIBRATION ISOLATORS ON ALL FOUR SUPPORTS. DO NOT HANG ANYTHING FROM STEEL, COMPOSITION OR WOODEN DECKS. NON-ROOF CONCRETE DECKS MAY BE USED ONLY WITH PERMISSION OF THE ENGINEER. DO NOT HANG ANYTHING FROM MECHANICAL OR ELECTRICAL ITEMS.
7. NO CONCRETE RIBS OR JOISTS SHALL BE CUT WITHOUT SPECIFIC PERMISSION FROM THE ENGINEER. ALL ROOF OR FLOOR DECK PENETRATIONS IN WAFFLE STRUCTURE SHALL BE IN THE THIN-SLAB DEPRESSIONS IN THE STRUCTURE UNLESS OTHERWISE SHOWN.
8. CONSULT ROOF PLAN AND STRUCTURAL DRAWINGS FOR PLACEMENT OF ROOF MOUNTED EQUIPMENT. PROVIDE ALL NECESSARY ROOF CURBS, EQUIPMENT RAILS AND BASES AND ANY ADDITIONAL REQUIRED FRAMING IN COORDINATION WITH STRUCTURAL AND ROOFING WORK.
9. ALL EQUIPMENT, ACCESSORIES, PIPING, WIRING, DUCT AND OTHER WORK, WHICH IS INSTALLED IN FINISHED SPACES SHALL BE CONCEALED IN WALLS, FLOORS, FURRED CHASES OR SUSPENDED CEILINGS, EXCEPT FOR INDICATED TERMINAL UNITS, CONTROLS, AIR INLETS AND OUTLETS, AS SHOWN.
10. DO NOT CHANGE PATH OF PIPING OR CHANGE PIPE SIZE WITHOUT FIRST CONSULTING THE ENGINEER. PIPE SIZES SHOWN ON DRAWINGS ARE NOMINAL UNLESS OTHERWISE INDICATED.
11. SEE ALSO RISER DIAGRAMS FOR SIZES NOT SHOWN ON PLANS.
12. FOR TYPICAL WATER, REFRIGERANT AND AIR CONNECTIONS TO EQUIPMENT, SEE STANDARD DETAILS.
13. ALL COPPER PIPING SHALL BE ASSEMBLED WITH WROUGHT COPPER OR CAST COPPER ALLOY FITTINGS AND 95/5 TIN ANTIMONY SOLDER OR SILVER BRAZING. NO SOLDER CONTAINING LEAD SHALL BE USED.
14. ALL PIPING, FITTINGS, FIXTURES AND EQUIPMENT IN CONTACT WITH POTABLE WATER SHALL BE CERTIFIED BY THE SOURCE OF THE PRODUCT TO CONTAIN LESS THAN 0.25% LEAD IN COMPLIANCE WITH THE EPA AND SDWA (SAFE DRINKING WATER ACT). NO SOLDER CONTAINING MORE THAN 0.2% LEAD SHALL BE USED IN MANUFACTURING OR IN FIELD ASSEMBLY OF POTABLE WATER SYSTEM COMPONENTS.
15. REDUCED SIZE TAKE-OFFS FROM WELDED PIPING MORE THAN ONE SIZE LOWER THAN MAIN MAY BE MADE WITH WELD-O-LETS. FULL-SIZE TAKE-OFFS AND ONE SIZE LOWER SHALL BE MADE WITH TEES.
16. ALL CHECK VALVES IN PUMP DISCHARGES SHALL BE SPRING-LOADED OR SILENT TYPE OR FOR LARGE WASTE: LEVER-WEIGHTED TYPE.
17. ALL EXTERIOR MECHANICAL UTILITIES SHALL BE IN GENERAL COMPLIANCE WITH APPROPRIATE MECHANICAL DIVISION SPECIFICATION SECTION (FOR CORRESPONDING INTERIOR UTILITIES).
18. CONTRACTOR SHALL CERTIFY AT THE TIME OF OWNER OCCUPANCY THAT ALL BELT-DRIVEN EQUIPMENT HAS BEEN CHECKED FOR BELT TIGHTNESS AFTER WEAR-IN PERIOD.
19. ALL EXISTING EQUIPMENT SHUTDOWNS OR INTERRUPTIONS OF UTILITY SERVICE REQUIRED FOR COMPLETION OF THE WORK SHALL BE SCHEDULED IN ADVANCE, AS REQUIRED BY THE OWNER.
20. COORDINATE ALL PIPING AND DUCTWORK WITH BOTH NEW AND EXISTING MECHANICAL AND ELECTRICAL WORK, INCLUDING HVAC, PLUMBING, ELECTRICAL, FIRE ALARM, SPRINKLER AND COMMUNICATIONS.
21. CONTRACTOR IS RESPONSIBLE FOR MAKING ALL REQUIRED CONNECTIONS FOR A COMPLETE SYSTEM.
22. DO NOT USE BULL-HEADED TEE FITTINGS, EITHER ON PIPE OR ON DUCT, UNLESS SPECIFICALLY SHOWN.
23. CONTRACTOR SHALL MAKE MINOR OFFSETS AND LOCATION CHANGES IN PIPE AND DUCT AND IN DUCT ASPECT RATIO AS REQUIRED IN CONGESTED CEILING OR MECHANICAL SPACES. GENERALLY, THESE WILL BE AT NO COST TO THE OWNER AND APPROVED BY THE ENGINEER WITHOUT FORMAL DOCUMENTS. MAJOR REROUTING OF LINES OR MAJOR ADDITION OF FITTINGS WILL BE REVIEWED AND APPROVED AS A CHANGE ORDER OR A FORMAL DIRECTIVE. ENGINEER ALONE SHALL CLASSIFY CHANGES AS MAJOR OR MINOR.
24. PROVIDE DISCONNECTS AND MAGNETIC STARTERS (OR RELAYS WITH OVERLOAD PROTECTION FOR SINGLE PHASE) FOR ALL EQUIPMENT SUPPLIED UNDER MECHANICAL DIVISION WHICH IS SPECIFIED TO HAVE FACTORY CONTROL PANEL. POWER WIRING AND CONDUIT TO THESE DEVICES AND BETWEEN THESE DEVICES AND MECHANICAL EQUIPMENT, IF REQUIRED, SHALL BE SUPPLIED UNDER ELECTRICAL DIVISION. SEE MECHANICAL SECTION OF THE SPECIFICATIONS.
25. PROVIDE ALL ACCESS DOORS AS SHOWN, EXCEPT THOSE SPECIFIED UNDER OTHER DIVISIONS. IN ADDITION, PROVIDE ANY OTHER ACCESS DOORS - WHETHER OR NOT SHOWN ON PLANS - NECESSARY FOR ACCESS TO CONCEALED EQUIPMENT, VALVES, DAMPERS, ACTUATORS, JUNCTION BOXES, CONTROLS OR OTHER OPERATIONAL OR SERVICABLE ITEMS. UNLESS ITEM IS REASONABLY ACCESSIBLE THROUGH LAY-IN CEILING PANELS.
26. FINAL PRODUCT SHALL BE A COMPLETE AND FUNCTIONING SYSTEM CONFORMING TO ALL REQUIREMENTS OF THE CURRENT BUILDING CODES OF WEST VIRGINIA:

    2015 INTERNATIONAL BUILDING CODE
    2015 WEST VIRGINIA STATE BUILDING CODE
    2015 INTERNATIONAL FUEL GAS CODE
    2015 INTERNATIONAL MECHANICAL CODE
    2015 INTERNATIONAL PLUMBING CODE
    2015 EDITION OF THE NATIONAL FIRE CODES
    2010 EDITION OF ASHRAE STANDARD 90.1

CONTRACTOR IS RESPONSIBLE FOR MAKING ALL REQUIRED CONNECTIONS FOR A COMPLETE SYSTEM.

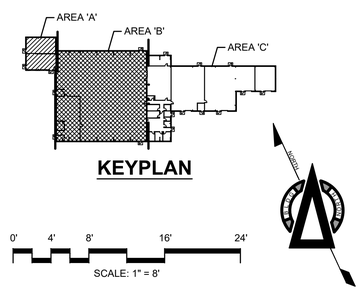
PLUMBING
LEGENDS AND GENERAL NOTES

CORY V. SHARRARD
REGISTERED
26772
STATE OF
WEST VIRGINIA
PROFESSIONAL ENGINEER

JOB NUMBER:	19027
SCALE:	NO SCALE
DATE:	AUGUST 6, 2021
DRAWN BY:	MAS
DESIGNED BY:	CVS
CHECKED BY:	CVS
SHEET NO.	REVISION
P-001	

PLUMBING - WASTE & VENT PLAN

1 / P-1-101



SCALE: 1/8" = 1'-0"

GENERAL NOTES:

1. SEE SHEET P-001 FOR PLUMBING LEGEND AND ADDITIONAL NOTES.
2. SEE P-500 SHEETS FOR EQUIPMENT AND SPECIALTIES DETAILS.
3. SEE P-600 SHEETS FOR EQUIPMENT, FIXTURES AND SPECIALTIES SCHEDULES.
4. SEE SCHEDULES AND DETAILS FOR EQUIPMENT, FIXTURES AND SPECIALTIES MOUNTING HEIGHTS NOT PROVIDED ON ARCHITECTURAL DOCUMENTS.
5. DO NOT INSTALL ANY PLUMBING PIPES ABOVE ANY ELECTRICAL PANELS, CONTROL PANELS OR IT/SEC EQUIPMENT.

SHEET KEYNOTES:

1. GRADE BEAM (TYPICAL).
2. PIER(S) AND FOOTING. SEE STRUCTURAL PLANS AND DETAILS.
3. SEE SITE UTILITIES PLAN FOR CONTINUATION.
4. TRAPPED CONDENSATE DRAIN PIPE AT RTU CONDENSATE DISCHARGE OUTLET. CONDENSATE PIPE SIZE TO MATCH UNIT DISCHARGE SIZE.
5. PRIMARY AND SECONDARY TRAPPED CONDENSATE DRAIN PIPES AT AHU CONDENSATE DISCHARGE OUTLETS. CONDENSATE PIPE SIZES TO MATCH UNIT DISCHARGE SIZES.
6. PRIMARY AND SECONDARY CONDENSATE PIPES DOWN IN WALL TO 12" AFG. EXTEND THROUGH WALL AND ELL DOWN. SEAL WALL PENETRATION WATER AND AIR TIGHT.

6. SEE SHEET G-003 FOR CONSTRUCTION PHASING.
7. SEE SHEET A-1-701 FOR EQUIPMENT SCHEDULE ITEMS.

⬡ SHEET KEYNOTES:

1. EXTEND TO OIL/WATER SEPARATOR. SEE SITE UTILITIES PLAN FOR CONTINUATION.
2. SEE SITE UTILITIES PLAN FOR CONTINUATION.
3. GRADE BEAM (TYPICAL). DO NOT INSTALL ANY WASTE PIPE THROUGH OR UNDER ANY INTERIOR GRADE BEAMS EXCEPT AS NOTED.
4. PIER(S) AND FOOTING. SEE STRUCTURAL PLANS AND DETAILS.
5. WASTE PIPE UNDER INTERIOR GRADE BEAM.
6. OWNER PROVIDED AIR COMPRESSOR (EQUIPMENT SCHEDULE NUMBER ME24). INSTALL PER MANUFACTURER'S CLEARANCE REQUIREMENTS. PROVIDE DRAIN PIPE TO OPEN RECEPTACLE. REMOVE AND RETURN TO OWNER UNDER PHASE 2.
7. 4" INTAKE AND 4" VENT PIPE TO CONCENTRIC VENT. REMOVE UNDER PHASE 2.
8. 4" CONCENTRIC VENT KIT. REMOVE UNDER PHASE 2 AND PATCH WALL TO MATCH CONSTRUCTION AND FINISH.
9. WATER HEATER (EQUIPMENT SCHEDULE NUMBER ME28) PROVIDED WITH T&P RELIEF VALVE. EXTEND RELIEF PIPE TO OPEN RECEPTACLE. PROVIDE NEUTRALIZER KIT ON CONDENSATE DRAIN LINE AND EXTEND TO OPEN RECEPTACLE. PROVIDE TRAPPED PRIMARY AND SECONDARY CONDENSATE PIPES AND EXTEND TO OPEN RECEPTACLE. INSTALL WATER HEATER ON EIGHT 8"x16"x4" SOLID CONCRETE BLOCKS. REMOVE WATER HEATER AND INSTALL IN MECHANICAL ROOM ON POURED CONCRETE PAD UNDER PHASE 2.
10. REMOVE OPEN RECEPTACLE FUNNEL TO FLUSH WITH FINISHED FLOOR.
11. PROVIDE FLOOR DRAIN UNDER PHASE 1 IF SLAB IS POURED IN THIS AREA. PROVIDE CAPPED STUB-UP IF SLAB IS NOT POURED IN PHASE 1. COMPLETE FLOOR DRAIN INSTALLATION UNDER PHASE 2. PROVIDE 1/2" TRAP PRIMER PIPE FROM INLET SIDE OF P-TRAP, EXTEND TO WALL AS REQUIRED AND CAP UNDER PHASE 1. REMOVE CAP AND COMPLETE INSTALLATION UNDER PHASE 2.
12. PROVIDE 3" VENT PIPE THROUGH WALL AND CAP UNDER PHASE 1. REMOVE CAP AND INSTALL 3" VENT PIPE CONTINUATION UNDER PHASE 2.
13. PROVIDE 3" VENT UP TO ABOVE FINISHED FLOOR AND CAP UNDER PHASE 1. REMOVE CAP AND INSTALL 3" VENT PIPE CONTINUATION UNDER PHASE 2.
14. NEW OWNER PROVIDED AIR COMPRESSOR (EQUIPMENT SCHEDULE NUMBER WD-1) MOUNTED ON CONCRETE PAD. INSTALL PER MANUFACTURER'S CLEARANCE REQUIREMENTS. PROVIDE DRAIN PIPE TO FLOOR DRAIN.
15. 3/4" CONDENSATE PIPE DOWN TO JANITOR SINK.
16. TRAPPED CONDENSATE DRAIN PIPE AT RTU CONDENSATE DISCHARGE OUTLET. CONDENSATE PIPE SIZE TO MATCH UNIT DISCHARGE SIZE.

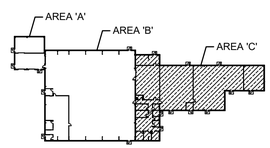
6. SEE SHEET G-003 FOR CONSTRUCTION PHASING.
7. SEE SHEET A-1-700 FOR EQUIPMENT SCHEDULE ITEMS.



SHEET KEYNOTES:

1. SEE SITE UTILITIES PLAN FOR CONTINUATION.
2. PROVIDE VALVE BOX WITH 2" SHUT-OFF VALVE UNDER PHASE 1 FOR TEMPORARY SERVICE TO GROUNDS MECHANICS SHOP 126. CAP OUTGOING PIPE FROM VALVE UNDER PHASE 2 AND ABANDON VALVE BOX.
3. PROVIDE 2" DOMESTIC WATER PIPE TO 12" ABOVE GRADE AND INTO GROUND MECHANICS SHOP 126 UNDER PHASE 1. CAP PIPE BELOW GRADE AND REMOVE PIPE ABOVE GRADE UNDER PHASE 2. PATCH WALL TO MATCH CONSTRUCTION AND FINISH UNDER PHASE 2.
4. PROVIDE 2" DOMESTIC WATER PIPE UP TO 7'-6' AFF UNDER PHASE 1. REMOVE PIPE UNDER PHASE 2.
5. INSTALL BACKFLOW PREVENTER WITH STRAINER AT 7'-6" AFF UNDER PHASE 1. PROVIDE AIR GAP FITTING AND DRAIN PIPE DOWN AT WALL AND SPILL TO FLOOR UNDER PHASE 1. REMOVE BACKFLOW PREVENTER AND INSTALL IN SPRINKLER ROOM 117 UNDER PHASE 2. INSTALL PER MANUFACTURER'S RECOMMENDATIONS UNDER PHASE 2.
6. POINT OF CONNECTION TO DOMESTIC WATER PIPE UNDER PHASE 2. REMOVE ALL UPSTREAM DOMESTIC WATER PIPE SERVING THE BACKFLOW PREVENTER AND WATER HEATER UNDER PHASE 2. PROVIDE CONNECTION TO 1" DOMESTIC WATER PIPE AT THIS POINT AS NOT TO REVERSE THE DIRECTION OF WATER FLOW FROM PHASE 1 TO PHASE 2.
7. PROVIDE CAPPED SLEEVE IN WALL UNDER PHASE 1 TO ACCOMMODATE PHASE 2 PIPE INSTALLATION. SEE PHASE 2 PLAN AND RISER FOR PIPE SIZE.
8. PROVIDE CAPPED 1 1/2" TEPID WATER PIPE AT WALL UNDER PHASE 1. REMOVE CAP AND INSTALL PIPE TO EWES-1 IN MAINTENANCE SHOP 125 UNDER PHASE 2.
9. PROVIDE TMV-3-1 UNDER PHASE 1. REMOVE TEMPERING VALVE UNDER PHASE 2 AND RETAIN FOR INSTALLATION IN MAIL ROOM. INSTALL IN MAIL ROOM MECHANICAL ROOM 103 UNDER ALTERNATE 1. REMOVE ASSOCIATED PIPE AS REQUIRED FOR FINAL CONSTRUCTION UNDER PHASE 2.
10. PROVIDE TMV-1-2 UNDER PHASE 1. REMOVE TEMPERING VALVE AND RETAIN FOR INSTALLATION IN WAREHOUSE MECHANICAL ROOM 109 UNDER PHASE 2. REMOVE ALL ASSOCIATED PIPE AS REQUIRED FOR FINAL CONSTRUCTION UNDER PHASE 2.
11. PROVIDE WATER HEATER (EQUIPMENT SCHEDULE ITEM NUMBER ME28) UNDER PHASE 1. PROVIDE ON EIGHT 8"x16"x4" SOLID CONCRETE BLOCKS. REMOVE WATER HEATER AND ALL RELATED PIPING AS INDICATED UNDER PHASE 2. INSTALL WATER HEATER IN WAREHOUSE MECHANICAL ROOM 109 ON POURED CONCRETE PAD UNDER PHASE 2.
12. PROVIDE EXPANSION TANK UNDER PHASE 1. REMOVE EXPANSION TANK AND INSTALL IN WAREHOUSE MECHANICAL ROOM 109 UNDER PHASE 2.
13. OWNER PROVIDED AIR COMPRESSOR (EQUIPMENT SCHEDULE ITEM NUMBER ME24) PROVIDED UNDER PHASE 1. INSTALL PER MANUFACTURER'S RECOMMENDATIONS. REMOVE AND RETURN TO OWNER UNDER PHASE 2.
14. OWNER PROVIDED COMPRESSED AIR HOSE REEL (EQUIPMENT SCHEDULE ITEM NUMBER ME17) PROVIDED UNDER PHASE 1.
15. REMOVE COMPRESSED AIR PIPE BETWEEN THIS POINT AND AIR COMPRESSOR UNDER PHASE 2 AND CONNECT TO PIPE PROVIDED UNDER PHASE 2.
16. GAS METER AND REGULATOR FOR WAREHOUSE AT THIS LOCATION UNDER PHASE 1. PROVIDE REGULATOR FOR EMERGENCY GENERATOR AT GENERATOR.
17. PROVIDE GAS PIPE BELOW GRADE UNDER PHASE 1.
18. PROVIDE GAS PIPE UP TO 12" AFG AND EXTEND THROUGH WALL INTO MAINTENANCE SHOP 125 UNDER PHASE 1. EXTEND GAS PIPE UP TO BOTTOM OF STRUCTURE AT WALL UNDER PHASE 1.
19. POINT OF CONNECTION TO GAS PIPE PROVIDED UNDER PHASE 1.
20. PROVIDE TRAP PRIMER AND 1/2" DCW PIPES TO ASSOCIATED FLOOR DRAINS UNDER PHASE 1.
21. MOUNT TRAP PRIMER AS CLOSE TO DCW MAIN PIPE ELEVATION AS POSSIBLE. EXTEND 1/2" DCW DOWN AT WALL TO BELOW SLAB AND INTO INLET SIDE OF FLOOR DRAIN TRAP.
22. MOUNT TRAP PRIMER CABINET IN CHASE WALL AT 6'-0" AFF.
23. NEW OWNER PROVIDED AIR COMPRESSOR (EQUPMENT SCHEDULE ITEM NUMBER WD1) MOUNTED ON CONCRETE PAD. INSTALL PER MANUFACTURER'S CLEARANCE REQUIREMENTS.
24. MAIN DOMESTIC WATER SHUT-OFF VALVE.
25. BACKFLOW PREVENTER WITH STRAINER AND AIR GAP FITTING. EXTEND AIR GAP FITTING DRAIN TO FLOOR DRAIN.
26. GAS PIPE THROUGH WALL. ELEVATION TO MATCH DUCT ELEVATION.
27. GAS PIPE DOWN BESIDE DUCT TO ABOVE RTU.
28. GAS PIPE ABOVE RTU AND DOWN TO GAS INLET ON UNIT.
29. 3/4" COMPRESSED AIR DROP TO OWNER PROVIDED BLAST CABINET.
30. OWNER PROVIDED BLAST CABINET (EQUIPMENT SCHEDULE ITEM NUMBER ME10).
31. SEE SITE UTILITIES PLAN FOR CONTINUATION AND SIZE.
32. PROVIDE GAS PIPE TO EMERGENCY GENERATOR UNDER PHASE 1. PROVIDE GAS REGULATOR AT GENERATOR. SEE SITE UTILITIES PLAN FOR CONTINUATION.
33. PROVIDE DOUBLE CHECK VALVE ASSEMBLY UNDER PHASE 1.
34. PROVIDE 3/4" DCW FROM DOUBLE CHECK VALVE ASSEMBLY BELOW SLAB UNDER PHASE 1.
35. 3/4" DCW TO GROUND HYDRANT AT WASH PAD UNDER PHASE 1. SEE SITE UTILITIES PLAN FOR CONTINUATION.

GENERAL NOTES:

1. SEE SHEET P-001 FOR PLUMBING LEGEND AND ADDITIONAL NOTES.
2. SEE P-500 SHEETS FOR EQUIPMENT AND SPECIALTIES DETAILS.
3. SEE P-600 SHEETS FOR EQUIPMENT, FIXTURES AND SPECIALTIES SCHEDULES.
4. SEE SCHEDULES AND DETAILS FOR EQUIPMENT, FIXTURES AND SPECIALTIES MOUNTING HEIGHTS NOT PROVIDED ON ARCHITECTURAL DOCUMENTS.
5. DO NOT INSTALL ANY PLUMBING PIPES ABOVE ANY ELECTRICAL PANELS, CONTROL PANELS OR IT/SEC EQUIPMENT.

⬡ SHEET KEYNOTES:

1. SEE SITE UTILITIES PLAN FOR CONTINUATION.
2. WATER HEATER PROVIDED WITH T&P RELIEF VALVE. EXTEND RELIEF PIPE TO FLOOR DRAIN. PROVIDE NEUTRALIZER KIT ON CONDENSATE DRAIN LINE AND EXTEND TO FLOOR DRAIN.
3. DUAL-CHANNEL VENT / INTAKE SYSTEM.
4. RTU ON ROOF.
5. TRAPPED CONDENSATE DRAIN PIPE AT RTU CONDENSATE DISCHARGE OUTLET. CONDENSATE PIPE SIZE TO MATCH UNIT DISCHARGE SIZE.
6. UNIT SIZED CONDENSATE DRAIN PIPE ON ROOF. INSTALL PIPE ON UNISTRUT FASTENED TO THE STANDING SEAM ROOF WITH UNISTRUT S-5 CLAMPS. PIPE TO BE ATTACHED TO UNISTRUT WITH UNISTRUT CUSH-A-CLAMP ASSEMBLY. PROVIDE SUPPORT ASSEMBLY SPACING PER MANUFACTURER'S GUIDELINES. MAINTAIN RTU-3 INSTALLATION CLEARANCES. NOTE: CONDENSATE DRAIN PIPE AND GAS PIPE ARE TO BE INSTALLED ON THE SAME UNISTRUT SUPPORT ASSEMBLIES.
7. SPILL CONDENSATE TO GUTTER.

TMV-3-3	MAIL RM - RR 107	3.6	0.25	40	110	105	1,4,7,10

REMARKS:
1. SEE SPECIFICATIONS FOR EQUIPMENT STANDARDS AND MANUFACTURERS.
2. LEONARD MODEL LV-981-LF-3/4" ECO-MX THERMOSTATIC MIXING VALVE WITH WALL SUPPORT USED AS BASIS OF DESIGN.
3. LEONARD MODEL TM-850-LF STSTL-EXP SAFETY STATION MIXING VALVE USED AS BASIS OF DESIGN.
4. LEONARD MODEL 170-LF STSTL-REC USED AS BASIS OF DESIGN.
5. LEONARD MODEL 270-LFSTSTL-REC USED AS BASIS OF DESIGN.
6. PROVIDE MOUNTED TO WALL @ 4'-6" A.F.F.
7. INSTALL BELOW LAVATORY.
8. INSTALL IN WALL AT 7'-0" AFF.
9. INSTALL IN SINK BASE CABINET.
10. PROVIDE WITH THERMOMETER ON WATER OUTLET.

WATER HAMMER ARRESTOR SCHEDULE (WHA)

PDI SYMBOL	WHA-A	WHA-B	WHA-C	WHA-D	WHA-E	WHA-F
FIXTURE UNIT RATING	1 to 11	12 to 32	33 to 60	61 to 113	114 to 154	155 to 330
PIPE CONNECTION	1/2"	3/4"	1"	1-1/4"	1-1/2"	2"

REMARKS: PROVIDE PER PDI WH-201 - TABLE BASED ON 50' PIPE LENGTH.

BACKFLOW PREVENTER SCHEDULE

MARK	SERVICE	LOCATION	TYPE	SIZE	REMARKS	ACCESSORIES
BFP-1-1	POTABLE WATER	WHSE - SPRINKLER	1	2"	1,2	1,2
BFP-1-2	POTABLE WATER	WHSE - SHOP 126	2	3/4"	1,3	1
BFP-3-1	POTABLE WATER	MAIL ROOM BLDG	1	2"	1,2	1,2

TYPE:
1. REDUCED PRESSURE ZONE
2. DOUBLE CHECK VALVE ASSEMBLY

ACCESSORIES:
1. PROVIDE WITH STRAINER.
2. PROVIDE WITH AIR GAP FITTING.

REMARKS:
1. SEE SPECIFICATIONS FOR VALVE STANDARDS AND MANUFACTURERS.
2. ZURN MODEL 975XL2 USED AS BASIS OF DESIGN.
3. ZURN MODEL 350XL USED AS BASIS OF DESIGN.

HOSE REEL SCHEDULE

MARK	SERVICE	LOCATION	TYPE	SIZE	REMARKS	ACCESSORIES
HR-1-1	DOMESTIC WATER	WAREHOUSE-SEE PLANS	1	SEE SPECS	1,2	1,2,3
HR-1-2	COMPRESSED AIR	WAREHOUSE-SEE PLANS	1	SEE SPECS	1,2	1,3,4

TYPE:
1. RETRACTABLE

ACCESSORIES:
1. SHUT-OFF VALVE
2. AIR GAP FITTING
3. 50' HOSE
4. QUICK DISCONNECT

REMARKS:
1. MUST BE FROM SINGLE MANUFACTURER
2. REELCRAFT MODEL 7850 OLP USED AS BASIS DESIGN.

GENERAL NOTES

1. GENERAL NOTES, WHEREVER THEY ARE FOUND, APPLY TO ALL WORK IN THE PROJECT, UNLESS OTHERWISE INDICATED. SHEET NOTES, UTILIZING NOTE SYMBOLS, APPLY ONLY TO THE SHEET ON WHICH THEY ARE FOUND, UNLESS OTHERWISE STATED. THE MEANING OF NOTE SYMBOLS AND NUMBERS VARIES FROM SHEET TO SHEET.
2. CONTRACTOR WILL UTILIZE ALL INFORMATION IN THE CONTRACT DOCUMENTS FOR PROVIDING THE WORK. CONTRACTOR WILL UTILIZE DETAILS AND FLOW DIAGRAMS FOR THE WORK WHERE APPROPRIATE.
3. CONTRACTOR WILL FIELD-VERIFY ALL EXISTING CONDITIONS. ANY DISCREPANCIES BETWEEN EXISTING CONDITIONS AND CONTRACT DOCUMENTS WILL BE BROUGHT TO THE ATTENTION OF THE CONTRACTING OFFICER BEFORE ANY WORK RELATING TO THOSE CONDITIONS IS PERFORMED.
4. PROVIDE AND INSTALL ALL EQUIPMENT AND ACCESSORIES AS INDICATED, IN ACCORDANCE WITH THE RESPECTIVE MANUFACTURER'S WRITTEN INSTALLATION INSTRUCTIONS.
5. FINAL PRODUCT SHALL BE A COMPLETE AND FUNCTIONING SYSTEM CONFORMING TO ALL REQUIREMENTS OF THE CURRENT BUILDING CODES OF WEST VIRGINIA:

   2015 INTERNATIONAL BUILDING CODE
   2016 WEST VIRGINIA STATE BUILDING CODE
   2015 INTERNATIONAL FUEL GAS CODE
   2015 INTERNATIONAL MECHANICAL CODE
   2015 INTERNATIONAL PLUMBING CODE
   2015 EDITION OF THE NATIONAL FIRE CODES
   2016 WEST VIRGINIA STATE FIRE CODE
   2010 EDITION OF ASHRAE STANDARD 90.1

   CONTRACTOR IS RESPONSIBLE FOR MAKING ALL REQUIRED CONNECTIONS FOR A COMPLETE SYSTEM.
6. CONTRACTOR SHALL MAINTAIN A SET OF PROJECT RECORD DRAWINGS AT THE JOB SITE AND SHALL BE RESPONSIBLE FOR MAKING CLEAR CHANGES TO THE DRAWINGS, REFLECTING CHANGES TO THE WORK AND VARIANCE IN EXISTING CONDITIONS.
7. CONTRACTOR WILL PROVIDE ALL MISCELLANEOUS STEEL TO SUPPORT ALL MECHANICAL DUCT AND PIPING SYSTEMS AND EQUIPMENT. HANG ALL EQUIPMENT FROM STRUCTURE WITH MINIMUM OF TWO TRAPEZE ASSEMBLIES OR FOUR INTEGRAL MOUNTING POINTS WITH HOUSED SPRING VIBRATION ISOLATORS ON ALL FOUR SUPPORTS. DO NOT HANG ANYTHING FROM OTHER MECHANICAL OR ELECTRICAL ITEMS.
8. NO STEEL STRUCTURAL MEMBERS WILL BE CUT, BURNED, WELDED OR DRILLED WITHOUT SPECIFIC PERMISSION OF THE STRUCTURAL ENGINEER.
9. ALL EQUIPMENT, DUCT, PIPING AND ACCESSORIES INSTALLED OUTSIDE OR OTHERWISE EXPOSED TO THE ELEMENTS WILL BE ADEQUATELY WEATHERPROOFED, IN KEEPING WITH THE SPECIFICATIONS. ALL FERROUS METAL FRAMING COMPONENTS WILL BE STAINLESS STEEL OR HOT-DIP GALVANIZED.
10. ALL EQUIPMENT, ACCESSORIES, PIPING, WIRING, DUCT AND OTHER WORK, WHICH IS INSTALLED IN FINISHED SPACES WILL BE CONCEALED IN WALLS, FLOORS, FURRED CHASES OR SUSPENDED CEILINGS, EXCEPT FOR INDICATED TERMINAL UNITS, CONTROLS, AIR INLETS AND OUTLETS, AS SHOWN.
11. PROVIDE ALL ACCESS DOORS AS SHOWN, EXCEPT THOSE SPECIFIED UNDER OTHER DIVISIONS. IN ADDITION, PROVIDE ANY OTHER ACCESS DOORS - WHETHER OR NOT SHOWN ON PLANS - NECESSARY FOR ACCESS TO CONCEALED EQUIPMENT, VALVES, DAMPERS, ACTUATORS, JUNCTION BOXES, CONTROLS OR OTHER OPERATIONAL OR SERVICEABLE ITEMS, UNLESS ITEM IS REASONABLY ACCESSIBLE THROUGH LAY-IN CEILING PANELS.
12. DUCT DAMPERS IN INACCESSIBLE CEILINGS MAY BE PROVIDED WITH APPROVED REMOTE OPERATORS INSTEAD OF ACCESS DOORS.
13. DO NOT CHANGE PATH OF PIPING OR DUCT RUNS, ADD TURNS OR OFFSETS OR CHANGE DUCT DIMENSIONS OR PIPE SIZE WITHOUT FIRST CONSULTING THE ENGINEER. PIPE SIZES SHOWN ON DRAWINGS ARE NOMINAL UNLESS OTHERWISE INDICATED. ALL DUCT SIZES SHOWN ON PLANS ARE CLEAR INSIDE DIMENSIONS FOR SHOP OR FIELD-FABRICATED DUCT AND NOMINAL SIZES FOR FACTORY FABRICATED DUCT.
14. SEE ALSO RISER DIAGRAMS OR FLOW/CONTROL DIAGRAMS FOR SIZES NOT SHOWN ON PLANS.
15. FOR TYPICAL WATER, REFRIGERANT, GAS AND AIR CONNECTIONS TO EQUIPMENT, SEE STANDARD DETAILS.
16. ALL EXTERIOR MECHANICAL UTILITIES WILL BE IN GENERAL COMPLIANCE WITH APPROPRIATE DIVISION 23 SPECIFICATION SECTION (FOR CORRESPONDING INTERIOR UTILITIES).
17. COORDINATE ALL PIPING AND DUCTWORK WITH MECHANICAL AND ELECTRICAL WORK, INCLUDING HVAC, PLUMBING, ELECTRICAL, FIRE ALARM, SPRINKLER, COMMUNICATIONS AND EXTERIOR UTILITIES.
18. PROVIDE DISCONNECTS AND MAGNETIC STARTERS (OR RELAYS WITH OVERLOAD PROTECTION FOR SINGLE PHASE) FOR ALL EQUIPMENT SUPPLIED UNDER DIVISION 23 WHICH IS SPECIFIED TO HAVE FACTORY CONTROL PANEL. POWER WIRING AND CONDUIT TO THESE DEVICES AND BETWEEN THESE DEVICES AND MECHANICAL EQUIPMENT, IF REQUIRED, WILL BE SUPPLIED UNDER DIVISION 26.
19. LOCATIONS OF DUCTWORK AND EQUIPMENT, AS INDICATED ON THE DRAWING, ARE APPROXIMATE AND SUBJECT TO MINOR ADJUSTMENTS IN THE FIELD. WORK SHALL BE COORDINATED WITH OTHER TRADES TO AVOID INTERFERENCE.
20. CONDENSATE DRAINS SHALL BE SUPPLIED FOR ALL COOLING EQUIPMENT. CONTRACTOR SHALL INSURE PROPER INSTALLATION AND DRAINAGE AS REQUIRED BY FEDERAL, STATE AND LOCAL CODES. CONDENSATE PIPING SHALL BE TYPE "L" COPPER.
21. AIRFLOWS (CFM) INDICATED ON DIFFUSER TAGS CORRESPOND TO COOLING MODE OPERATIONS.
22. ALL MITERED ELBOWS 45° OR GREATER SHALL BE PROVIDED WITH TURNING VANES. WHERE SPACE PERMITS USE RADIUS TYPE WITH CENTERLINE R=1.5 W.
23. VOLUME DAMPERS SHALL BE PROVIDED IN BRANCH DUCTS OR AT EACH INDIVIDUAL DUCT GRILLE, REGISTER, OR DIFFUSER.

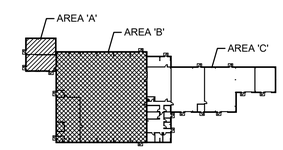
LEGENDS AND GENERAL NOTES



CORY SHARRARD REGISTERED 28726 STATE OF WEST VIRGINIA PROFESSIONAL ENGINEER
8/31/21

JOB NUMBER:	19027
SCALE:	NO SCALE
DATE:	AUGUST 6, 2021
DRAWN BY:	XXX
DESIGNED BY:	CVS
CHECKED BY:	CVS
SHEET NO.	REVISION
M-001	

SHEET KEYNOTES:

1. FURNISH AND INSTALL WALL MOUNTED LOUVER. BASE OF WALL MOUNTED LOUVER WITH BACK-DRAFT DAMPER TO BE MOUNTED 11'-0" FROM FINISHED FLOOR LEVEL AND IN LINE WITH WINDOWS. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. REFER TO ARCHITECTURAL ELEVATIONS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS.
2. FURNISH AND INSTALL WALL MOUNTED LOUVER. BASE OF WALL MOUNTED LOUVER WITH BACK-DRAFT DAMPER TO BE MOUNTED 12'-1" FROM FINISHED FLOOR LEVEL AND IN LINE WITH WINDOWS. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. REFER TO ARCHITECTURAL ELEVATIONS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS.
3. FURNISH AND INSTALL INFRARED HEATER. INFRARED HEATER BURNER, WITH 4" RADIANT TUBING WITH STAINLESS STEEL COUPLING AND PORCELAIN COATED TAIL PIPE FOR VENTING WITH STAINLESS STEEL COUPLING. PITCH (TO VACUUM PUMP) AS FOLLOWS:- RADIANT TUBING 1/4" PER 20'-0", TAILPIPE 1/2" PER 20'-0". GAS SERVICE REQUIRED TO EACH BURNER AT 1/2 PSI MAX. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL AS HIGH AS POSSIBLE UNDER STRUCTURE. INSTALL PER MANUFACTURERS RECOMMENDATIONS. REFER TO SHEET P-1-101 AND P-1-103 FOR MORE DETAILS ON GAS AND CONDENSATE PIPING
4. FURNISH AND INSTALL INLINE EXHAUST FAN. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS. MOUNT AS HIGH AS POSSIBLE FROM STRUCTURE
5. FURNISH AND INSTALL GAS FIRED GROUND MOUNTED ROOF TOP UNIT. MOUNTED ON TOP OF 6" HOUSEKEEPING PAD. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS. REFER TO SHEET P-1-103 FOR MORE DETAILS ON GAS PIPING
6. FURNISH AND INSTALL DX CONDENSING UNIT GROUND MOUNTED. MOUNTED ON TOP OF 6" HOUSEKEEPING PAD. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS. REFER TO PIPING SHEETS FOR MORE DETAIL. REFRIGERANT PIPING TO CONNECT CONDENSING UNIT TO INDOOR GAS FIRED AIR HANDLING UNIT.
7. FURNISH AND INSTALL INDOOR CEILING MOUNTED GAS FIRED AIR HANDLING UNIT. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS. REFER TO SHEET P-1-103 FOR MORE DETAILS ON GAS PIPING. REFRIGERANT PIPING TO CONNECT CONDENSING UNIT TO INDOOR GAS FIRED AIR HANDLING UNIT.
8. TURN DUCT WORK DOWN TO 12 FEET DUE TO CHANGE IN BUILDING ELEVATIONS
9. A TRANSFER GRILLE IN CEILING TO SUPPORT COMBUSTION AIR IN CEILING MOUNTED GAS FIRED INDOOR UNIT.
10. FURNISH AND INSTALL VACUUM PUMP TO VENT IR BURNER FLU GAS. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS.
11. DUCT WORK FROM RTU, TRANSITIONS, TURNS UP AND PENETRATES THROUGH THE EXTERNAL WALL. SEE SECTION ON SHEET M-1-300 FOR MORE INFORMATION.
12. INSTALL DUCT AS CLOSE TO THE STRUCTURE AS POSSIBLE TO GIVE ENOUGH CLEARANCE FOR STORAGE RACKS. PROVIDE WITH DOUBLE WALL INSULATION
13. MOUNT INFRARED HEATER THERMOSTATS AT 5'-0" AFF
14. DUCT WORK TO DROP DOWN 1 FEET BEFORE CONNECTING TO GRD. CONNECTION OF DUCT/GRILLE, TYPICAL
15. PROVIDE AND INSTALL CO AND NOx SENSOR WITH AUDIBLE AND VISUAL ALARM (ARMSTRONG MONITORING AMC-1AVCS OR EQUAL). MOUNT SENSOR AT MANUFACTURER'S RECOMMENDED HEIGHT.
16. FURNISH AND INSTALL TWO SIDEWALL RETURN GRILLE AT 21' AFF TO BOTTOM OF LOWEST GRILLE. THE TWO SIDEWALL RETURN GRILLE WILL BE STACKED VERTICALLY ON TOP OF EACH OTHER.SEE SECTION ON SHEET M-1-300 FOR MORE INFORMATION.
17. DUCT WORK FROM TRANSITIONS, TURNS DOWN AND GRILLE IS DUCT MOUNTED ON THE VERTICAL RUN OF THE DUCT.
18. FURNISH AND INSTALL WALL MOUNTED LOUVER. BASE OF WALL MOUNTED LOUVER WITH BACK-DRAFT DAMPER TO BE MOUNTED 14'-0" FROM FINISHED FLOOR LEVEL AND IN LINE WITH WINDOWS. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. REFER TO ARCHITECTURAL ELEVATIONS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS.
19. FURNISH AND INSTALL CENTRIFUGAL WALL MOUNTED EXHAUST FAN. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS. MOUNT AS HIGH AS POSSIBLE FROM STRUCTURE SO THAT THE EXHAUST DUCT IS AS CLOSE TO THE CEILING AS POSSIBLE. THIS IS TO COMPLETELY EXHAUST LEAKING FUMES THAT ARE LESS DENSE THAN AIR.
20. VERIFY MANUFACTURER ALLOWED PRESSURE DROP FOR IR HEATER AIR SUPPLY DUCT. BASIS OF DESIGN ALLOWS FOR 90'-0" EQUIVALENT DUCT LENGTH OF PRESSURE DROP WITH ELBOWS EQUIVALENT TO 10'-0" OF DUCT LENGTH FOR A 6" DIAMETER DUCT.

1. FURNISH AND INSTALL WALL MOUNTED LOUVER. BASE OF WALL MOUNTED LOUVER WITH BACK-DRAFT DAMPER TO BE MOUNTED 11'- 2" FROM FINISHED FLOOR LEVEL AND IN LINE WITH WINDOWS. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. REFER TO ARCHITECTURAL ELEVATIONS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS.
2. FURNISH AND INSTALL WALL MOUNTED LOUVER. BASE OF WALL MOUNTED LOUVER WITH BACK-DRAFT DAMPER TO BE MOUNTED 11'- 0" FROM FINISHED FLOOR LEVEL AND IN LINE WITH WINDOWS. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. REFER TO ARCHITECTURAL ELEVATIONS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS.
3. FURNISH AND INSTALL WALL MOUNTED LOUVER. BASE OF WALL MOUNTED LOUVER WITH BACK-DRAFT DAMPER TO BE MOUNTED 10'- 4" FROM FINISHED FLOOR LEVEL AND IN LINE WITH WINDOWS. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. REFER TO ARCHITECTURAL ELEVATIONS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS
4. FURNISH AND INSTALL WALL MOUNTED LOUVER. BASE OF WALL MOUNTED LOUVER WITH BACK-DRAFT DAMPER TO BE MOUNTED 10'- 8" FROM FINISHED FLOOR LEVEL AND IN LINE WITH WINDOWS. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. REFER TO ARCHITECTURAL ELEVATIONS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS
5. FURNISH AND INSTALL WALL MOUNTED LOUVER. BASE OF WALL MOUNTED LOUVER WITH BACK-DRAFT DAMPER TO BE MOUNTED 7'- 4" FROM FINISHED FLOOR LEVEL AND IN LINE WITH WINDOWS. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. REFER TO ARCHITECTURAL ELEVATIONS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS
6. FURNISH AND INSTALL WALL MOUNTED LOUVER. TOP OF WALL MOUNTED LOUVER WITH BACK-DRAFT DAMPER TO BE MOUNTED 10'- 0" FROM FINISHED FLOOR LEVEL. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. REFER TO ARCHITECTURAL ELEVATIONS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATION
7. FURNISH AND INSTALL WALL MOUNTED LOUVER. TOP OF WALL MOUNTED LOUVER WITH BACK-DRAFT DAMPER TO BE EVEN WITH TOP OF DOOR. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. REFER TO ARCHITECTURAL ELEVATIONS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATION. TOP OF LOUVER EVEN WITH TOP OF DOOR
8. FURNISH AND INSTALL WALL MOUNTED LOUVER. BASE OF WALL MOUNTED LOUVER WITH BACK-DRAFT DAMPER TO BE MOUNTED 13'- 0" FROM FINISHED FLOOR LEVEL AND IN LINE WITH WINDOWS. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. REFER TO ARCHITECTURAL ELEVATIONS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS
9. FURNISH AND INSTALL INFRARED HEATER. INFRARED HEATER BURNER, WITH 4" RADIANT TUBING WITH STAINLESS STEEL COUPLING AND PORCELAIN COATED TAIL PIPE FOR VENTING WITH STAINLESS STEEL COUPLING. PITCH (TO VACUUM PUMP) AS FOLLOWS:- RADIANT TUBING 1/4"PER 20'- 0", TAILPIPE 1/2" PER 20'- 0". GAS SERVICE REQUIRED TO EACH BURNER AT 1/2 PSI MAX. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL AS HIGH AS POSSIBLE UNDER STRUCTURE. INSTALL PER MANUFACTURERS RECOMMENDATIONS. REFER TO SHEET P-1-104 FOR MORE DETAILS ON GAS PIPING
10. FURNISH AND INSTALL INLINE EXHAUST FAN. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS. MOUNT AS HIGH AS POSSIBLE FROM STRUCTURE
11. FURNISH AND INSTALL GROUND MOUNTED GAS-FIRED ROOF TOP UNIT. MOUNTED ON TOP OF 6" HOUSEKEEPING PAD. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS. REFER TO SHEET P-1-104 FOR MORE DETAILS ON GAS PIPING.
12. FURNISH AND INSTALL DX CONDENSING UNIT GROUND MOUNTED. MOUNTED ON TOP OF 6" HOUSEKEEPING PADS. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS.REFRIGERANT PIPING TO CONNECT CONDENSING UNIT TO INDOOR GAS FIRED AIR HANDLING UNIT.
13. FURNISH AND INSTALL INDOOR GROUND MOUNTED GAS-FIRED AIR HANDLING UNIT. MOUNTED ON TOP OF 6" HOUSEKEEPING PAD. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS.REFER TO SHEET P-1-104, P-1-400 FOR MORE DETAILS ON GAS AND CONDENSATE PIPING.REFRIGERANT PIPING TO CONNECT CONDENSING UNIT TO INDOOR GAS FIRED AIR HANDLING UNIT
14. FURNISH AND INSTALL WELDING EXHAUST FAN. MOUNTED ON TOP OF 6" HOUSEKEEPING PAD. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS
15. FURNISH AND INSTALL WELDING HOOD. MOUNTED BY CHAINS FROM CEILING. LOWEST POINT OF THE HOOD TO BE MOUNTED 10'- 0" FROM THE FLOOR. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS
16. FURNISH AND INSTALL TRANSFER DUCT ABOVE CEILING FOR TRANSFER AIR.
17. FURNISH AND INSTALL EXPOSED DUCT IN CEILING.
18. FURNISH AND INSTALL ELECTRIC HEATER AT 8'-0" OR AS HIGH AS POSSIBLE. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS.
19. FURNISH AND INSTALL HVAC CONTROL PANEL. INSTALL PER MANUFACTURERS RECOMMENDATIONS
20. FURNISH AND INSTALL INDOOR MINI SPLIT UNIT MOUNTED ON THE WALL ABOVE THE DOOR. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS. REFRIGERANT PIPING TO CONNECT CONDENSING UNIT TO INDOOR UNIT.
21. FURNISH AND INSTALL OUTDOOR MINISPLIT UNIT. MOUNTED ON TOP OF 6" HOUSEKEEPING PAD. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS.REFRIGERANT PIPING TO CONNECT CONDENSING UNIT TO INDOOR UNIT
22. MOUNT INFRARED HEATER THERMOSTATS AT 5'-0" AFF
23. INSTALL DUCT AS CLOSE TO THE STRUCTURE AS POSSIBLE. PROVIDE WITH DOUBLE WALL INSULATION.
24. DUCT WORK FROM RTU, TRANSITIONS, TURNS UP AND PENETRATES THROUGH THE EXTERNAL WALL. SEE SECTION ON SHEET M-1-300 FOR MORE INFORMATION
25. DUCT WORK TO DROP DOWN 1 FEET BEFORE CONNECTING TO GRD. CONNECTION OF DUCT/GRILLE, TYPICAL.
26. FURNISH AND INSTALL VEHICLE EXHAUST SYSTEM. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS. VES TO BE CONTROLLED BY FACTORY CONTROLLER.
27. FURNISH AND INSTALL CONTROL SWITCH FOR VEHICLE EXHAUST SYSTEM. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS
28. DUCT WORK FROM EXHAUST FAN TURNS UP AND PENETRATES INTO THE BUILDING AS HIGH AS POSSIBLE AND CLOSE TO STRUCTURE.
29. FURNISH AND INSTALL VACUUM PUMP TO VENT IR BURNER FLU GAS. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATION.
30. FURNISH AND INSTALL FACTORY WELDING CONTROL PANEL TO CONTROL WELDING HOOD, EF-06 AND L-04 OPERATION
31. PROVIDE AND INSTALL CO AND NOx SENSOR WITH AUDIBLE AND VISUAL ALARM (ARMSTRONG MONITORING AMC-1AVCS OR EQUAL). MOUNT SENSOR AT MANUFACTURER'S RECOMMENDED HEIGHT
32. FURNISH AND INSTALL TWO SIDEWALL RETURN GRILLE AT 10' 6" AFF TO BOTTOM OF LOWEST GRILLE. THE TWO SIDEWALL RETURN GRILLE WILL BE STACKED VERTICALLY ON TOP OF EACH OTHER.SEE SECTION ON SHEET M-1-300 FOR MORE INFORMATION.

CORY SHARRARD REGISTERED 28725 STATE OF WEST VIRGINIA PROFESSIONAL ENGINEER
6/30/21

JOB NUMBER:	19027
SCALE:	AS NOTED
DATE:	AUGUST 6, 2021
DRAWN BY:	BM
DESIGNED BY:	CVS/BM
CHECKED BY:	CVS
SHEET NO.	M-1-300
REVISION	

SHEET KEYNOTES:

1. FURNISH AND INSTALL WALL MOUNTED LOUVER. BASE OF WALL MOUNTED LOUVER WITH BACK-DRAFT DAMPER TO BE MOUNTED 10'-0" FROM FINISHED FLOOR LEVEL. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. REFER TO ARCHITECTURAL ELEVATIONS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS
2. FURNISH AND INSTALL INLINE EXHAUST FAN ABOVE CEILING, HANG FROM STRUCTURE. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS
3. FURNISH AND INSTALL ELECTRIC UNIT HEATER .BASE OF UNIT HEATER TO BE MOUNTED 8'- 0" FROM FLOOR. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS
4. FURNISH AND INSTALL GAS-FIRED ROOF TOP UNIT. PROVIDE WITH ROOF CURB TO FIT ROOF SLOPE. SEE SCHEDULES AND DETAILS FOR MORE INFORMATION. INSTALL PER MANUFACTURERS RECOMMENDATIONS.FOR GAS AND CONDENSATE PIPING INFROMATION REFER TO SHEET P-3-101 AND P-3-102 RESPECTIVELY
5. DUCT PENETRATES THROUGH THE ROOF FROM THE RTU MOUNTED ON ROOF CURB. DUCT TRANSITION DOWN AND ACROSS AS SHOWN.
6. FURNISH AND INSTALL HVAC CONTROL PANEL. INSTALL PER MANUFACTURERS RECOMMENDATION.
7. INSTALL AND COORDINATE DUCTWORK TO AVOID CLASHES WHEN DUCTWORK PASSES UNDER OR OVER EACH OTHER. TYPICAL FOR ALL DUCT.

1 M-3-101 **MECHANICAL PLAN**

DRAWN BY:	CVS
DESIGNED BY:	CVS
CHECKED BY:	CVS
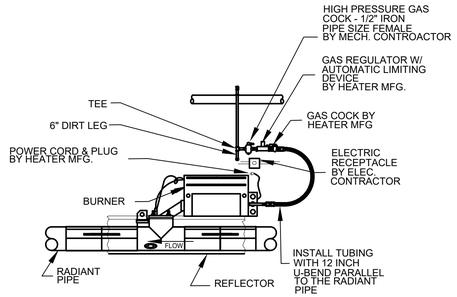
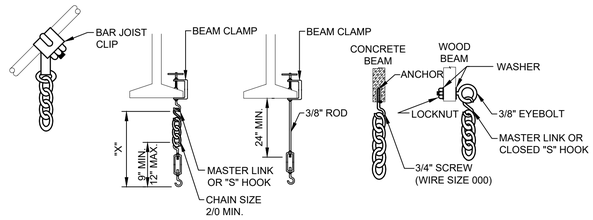
SHEET NO.	REVISION
M-501	△



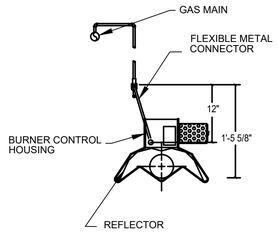
NOTES:
1. PROVIDE AND INSTALL CHAIN HANGERS PER MANUFACTURER'S DIRECTIONS.
2. MAINTAIN CLEARANCES TO COMBUSTIBLES PER MANUFACTURER'S DIRECTIONS.
3. SEE SCHEDULE FOR MOUNTING HEIGHTS.



BOTTOM VIEW

INTAKE AND EXHAUST CONNECTIONS

SIDE VIEW



(NOTE: USE ONLY THE TURNBUCKLES FURNISHED BY MANUFACTURER.)

HANGER DETAILS

NOTES:
1. TYPE "B" VENT REQUIRED OUTDOORS.
2. EXHAUST END OF HEATER WILL ACCEPT A 4" VENT PIPE USING THE VENT ADAPTER. INSTALL THE VENT ADAPTER WITH THE SEAM DOWN. THIS WILL PREVENT CONDENSATION FROM LEAKING OUT OF THE ADAPTER.
3. SECURE ALL JOINTS WITH MINIMUM (3) X 3/8 SHEET METAL SCREWS.
4. ALL VENT JOINTS SHOULD BE SEALED USING SUITABLE PRODUCT SUCH AS GENERAL ELECTRIC RTV 106 OR PERMATEX FORM-A-GASKET RD HIGH TEMPERATURE SILICONE ADHESIVE SEALANT.

INTAKE AND EXHAUST CONNECTIONS

END VIEW

NOTES:
1. GAS PIPE WORK MUST BE INSTALLED AND TESTED IN ACCORDANCE WITH THE 2015 EDITION OF NFPA 54. INSTALL THE FLEX GAS CONNECTOR AS SHOWN. THE FLEX GAS CONNECTOR ACCOMMODATES EXPANSION OF THE HEATING SYSTEM AND ALLOWS FOR EASY INSTALLATION AND SERVICE OF THE BURNER.
3. GAS SUPPLY NIPPLE MUST BE PARALLEL TO BURNER INLET. THE 3" DISPLACEMENT SHOWN IS FOR THE COLD CONDITION. THIS DISPLACEMENT MAY REDUCE WHEN THE SYSTEM IS FIRED.

GAS CONNECTION

REMARKS:
1. COOLING DESIGN CONDITIONS: EAT 80F DB / 67F WB AND 95F DB / 73F WB AMBIENT. HEATING AMBIENT DESIGN CONDITIONS BASED ON 6F DB / 4F WB.
2. AIR SOURCE DX UNIT WITH GAS HEAT
3. PROVIDE UNIT WITH 2", MERV 8 FILTERS
4. PROVIDE ROOF CURB TO MOUNT UNIT TO ROOFTOP
5. SINGLE POINT POWER CONNECTION WITH FACTORY INSTALLED DISCONNECT SWITCH AND 115V GFI CONVENIENCE OUTLET.
6. PROVIDE WITH SMOKE DETECTOR SHUT DOWN.
7. FAN CYCLING CONTROL OPTION
8. HIGH AND LOW PRESSURE SWITCH.
9. COMPRESSOR SHORT CYCLE TIMER.
10. PROVIDE WITH HAIL GUARD.
11. FACTORY MOUNTED DDC CONTROLLERS WITH BACNET INTERFACE.
12. SEE SPECIFICATIONS FOR MORE INFORMATION
13. PROVIDE WITH PHASE PROTECTION.
14. PROVIDE PREFILTER
15. UNIT TO BE SCHEDULED FOR OCCUPANCY (ADJUSTABLE). THE UNIT WILL BE MONITORED AND CONTROLLED BY THE BMS
16. TO BE MOUNTED ON 6" HOUSEKEEPING PAD

OTHER ACCEPTABLE MANUFACTURERS INCLUDE: DAIKIN, YORK. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

REMARKS:
1. INTEGRAL THERMOSTAT AND DISCONNECT
2. PROVIDE REQUIRED MOUNTING BRACKET FOR MOUNTING AS INDICATED
3. MOUNT HEATER AS HIGH AS POSSIBLE UNLESS NOTED OTHERWISE IN SHEET

OTHER ACCEPTABLE MANUFACTURERS INCLUDE: Q-MARK, REDDI. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

VEHICLE EXHAUST SYSTEM SCHEDULE

MARK	MANUFACTURER	MODEL	MOUNTING	CFM	ESP (IN WC)	HP	RPM	ELEC.	REMARKS
VES-01	PLYMOVENT	MSHR-850-115/FUA-2100	CEILING	700	3.5	1	3450	460V/3P/60Hz	ALL

REMARKS:

1. PROVIDE WITH MOTORIZED SPRING ASSISTED HOSE REEL.
2. PROVIDE WITH "SOFT CONNECTION" ON FAN INLET AND OUTLET.
3. PROVIDE WITH QUICK CONNECT HOSE CONNECTION ADAPTORS.
4. PROVIDE WITH FAN CONTROL PANEL WITH REMOTE FAN START/STOP SWITCH AND INTEGRAL UP/DOWN CONTROLS.
5. PROVIDE WITH 6" DIA., 25' LONG, HIGH TEMPERATURE RESISTANT, EXHAUST HOSE.
6. THE POWER FOR THIS SYSTEM WILL NOT BE AVAILABLE UNTIL THE FINAL PHASE FOR FINAL INSTALLATION. IT CAN BE INSTALLED DURING PHASE 1, BUT NOT ELECTRICALLY CONNECTED UNTIL THE FINAL PHASE.

OTHER ACCEPTABLE MANUFACTURERS INCLUDE: INDUSTRIAL MAID, LINCOLN ELECTRIC. REFER TO SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.

UNITARY PACKAGE AIR CONDITIONING SYSTEM SINGLE ZONE CONSTANT VOLUME SEQUENCE OF OPERATION

1. SUPPLY FAN - SHALL BE ENABLED TO RUN CONTINUOUSLY DURING OCCUPIED MODE. DURING UNOCCUPIED MODE SUPPLY FAN SHALL CYCLE ON/OFF TO MAINTAIN SPACE TEMPERATURE. RELIEF FAN SHALL OPERATE DURING ECONOMIZER MODE.

2. REMOTE EXHAUST FAN(S) - SHALL BE ENABLED TO RUN CONTINUOUSLY DURING OCCUPIED AND ECONOMIZER MODES.

3. DAMPER CONTROL - OUTSIDE AIR DAMPER SHALL OPEN TO MINIMUM OUTSIDE AIR VOLUME PER UNIT SCHEDULE DURING OCCUPIED MODE. OUTSIDE AIR DAMPER SHALL CLOSE IF SUPPLY FAN IS OFF OR IF NIGHT SETBACK OR SET UP IS IN OPERATION.

4. COOLING COIL CONTROL - IN COOLING MODE DX COIL SHALL MAINTAIN COOLING COIL DISCHARGE TEMPERATURE SETPOINT. DURING COOLING MODE IF SPACE TEMPERATURE DROPS 3 F BELOW SETPOINT FOR MORE THAN 10 MINUTES (ADJUSTABLE) DX COOLING COIL SHALL CYCLE OFF UNTIL SPACE TEMPERATURE RISES TO SETPOINT. IN HEATING MODE DX COIL SHALL BE LOCKED OUT.

5. HEATING CONTROL - DURING HEATING MODE IF SPACE TEMPERATURE DROPS 5 F BELOW SETPOINT FOR MORE THAN 15 MINUTES (ADJUSTABLE) NATURAL GAS FURNACE SHALL OPERATE UNTIL SPACE TEMPERATURE MEETS SETPOINT. NATURAL GAS FURNACE SHALL MODULATE TO MAINTAIN THE HEATING SPACE TEMPERATURE SETPOINT. DURING COOLING HEATING SHALL BE OFF.

6. ECONOMIZER - ENABLE ECONOMIZER COOLING WHEN OUTSIDE AIR TEMPERATURE IS EQUAL TO OR LESS THAN THE ECONOMIZER COOLING SWITCHOVER SETPOINT (55 F ADJ). DX COOLING COIL SHALL SEQUENCE OFF. RETURN AIR DAMPER SHALL CLOSE AND OUTSIDE AIR AND EXHAUST (RELIEF) AIR DAMPERS SHALL OPEN TO MAINTAIN MIXED AIR TEMPERATURE SETPOINT. IF RETURN AIR RELATIVE HUMIDTY SETPOINT IS EXCEEDED THE DX COOLING COIL SHALL BE SEQUENCED ON UNTIL RETURN AIR RELATIVE HUMIDITY SETPOINT IS MET. WHEN THE OUTSIDE AIR TEMPERATURE IS GREATER THAN THE SWITCHOVER SETPOINT ECONOMIZER COOLING IS DISABLED.

7. SMOKE / FIRE ALARMS - ACTIVATION OF ROOFTOP UNIT DUCT SMOKE DETECTOR SHALL DE-ENERGIZE ASSOCIATED UPAC UNIT AND SEND AN ALARM SIGNAL TO THE FIRE ALARM SYSTEM. FIRE ALARM SYSTEM SHALL SEND A SUPERVISORY SIGNAL TO THE UPAC CONTROL SYSTEM.

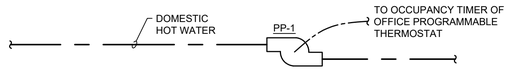
1 WELDING HOOD EXHAUST FAN DIAGRAM (EF-06)

NOT TO SCALE



SEQUENCE OF OPERATION - WELDING EXHAUST FAN

WELDING EXAUST FAN CONTROL:

ON/OFF SWITCH TO CONTROL WELDING EXHAUST FAN

CONTROLS TO BE FACTORY PROVIDED

CONTROLS SHOULD BE CAPABLE OF INTERLOCKING EXHAUST FAN OPERATION WITH LOUVER

SEQUENCE OF OPERATION - DOMESTIC HOT WATER RECIRCULATION PUMP

DOMESTIC HOT WATER RECIRCULATION PUMP CONTROL:

DURING UNOCCUPIED TIMES (WEEKENDS AND OFF HOURS) THE PUMP SHALL BE DISABLED.

BMS TO RECIEVE PUMP STATUS (ON/OFF)

SEQUENCE OF OPERATION - EXHAUST FAN

EXAUST FAN CONTROL:

EXHAUST FAN SHALL BE ENABLED CONTINUOUSLY UNDER HAND-OFF-AUTOMATIC (H-O-A) CONTROL. DURING AUTOMATIC (A) FANS CONTROLLED BY BMS SCHEDULE.

CURRENT SENSOR DRY CONTACTS FOR EXHAUST FAN STATUS TO BUILDING MANAGEMENT SYSTEM.

SEQUENCE OF OPERATION - INFRARED HEATER

INFRARED HEATER CONTROL:

THERMOSTAT WILL CYCLE THE INFRARED HEATER SYSTEM TO MAINTAIN THE DESIRED SETPOINT (ADJUSTABLE)..

CURRENT SENSOR DRY CONTACTS FOR INFRARED HEATER STATUS (ON/OFF) AND TEMPERATURE OF SPACE TO BUILDING MANAGEMENT SYSTEM.

SEQUENCE OF OPERATION - CO/NOx DETECTOR

CO/NOx CONTROL:

CO AND NOx SENSOR SHALL CONTINUOUSLY MONITOR PPM OF GAS IN ROOM.

ONCE SETPOINT IS REACHED SENSOR SHOULD TRIGGER AUDIBLE AND VISUAL ALARM.

SENSOR SHALL ALSO REPORT WARNING TO BMS.

	RJ-45 OUTLET - FLOOR MOUNTED
	FIBER OUTLET, DUPLEX LC CONNECTORS - FLOOR MOUNTED
	ONE POSITION VOICE OUTLET (RJ-45) - WHITE JACK - WALL-MOUNTED AT 48" AFF, UNLESS OTHERWISE NOTED
XX	CABLE TV OUTLET, MOUNT AT HEIGHT INDICATED ON FLOOR PLANS - REQUIRES A TYPE F COMPRESSION CONNECTOR
W1	RJ-45 OUTLET FOR WIRELESS ACCESS POINT - WALL-MOUNTED, MOUNT 8'-0" AFF, UNLESS OTHERWISE NOTED

GENERAL NOTES:

1. THE MINIMUM STANDARD FOR ALL WORK SHALL BE THE LATEST EDITION OF THE INTERNATIONAL BUILDING CODE WITH IN STATE AMENDMENTS AND THE NATIONAL ELECTRICAL CODE (NEC).
2. ALL ELECTRICAL WORK SHALL BE PERFORMED BY AN IN-STATE LICENSED ELECTRICIAN.
3. ALL PERMITS NEEDED TO LEGALLY PERFORM THE ELECTRICAL WORK SHALL BE OBTAINED BY THE CONTRACTOR PRIOR TO START OF WORK. COST OF PERMITTING IS BY THE CONTRACTOR.
4. AT COMPLETION OF THE WORK, A CERTIFICATE OF COMPLIANCE FROM THE LOCAL AHJ OVER THE ELECTRICAL WORK SHALL BE PROVIDED TO THE ENGINEER AND OWNER. COST OF ELECTRICAL INSPECTION IS BY THE CONTRACTOR.
5. ALL MATERIALS USED IN THE PROJECT GENERALLY SHALL BE NEW AND UNUSED, UNLESS OTHERWISE NOTED ON THE DRAWINGS. ALL NEW MATERIALS SHALL BE LISTED BY UL OR OTHER ACCEPTABLE LISTING AGENCY, WHERE A LISTING EXISTS.
6. THE CONTRACTOR SHALL VISIT THE SITE(S) PRIOR TO BIDDING TO FAMILIARIZE THEMSELVES WITH PROJECT REQUIREMENTS AND EXISTING CONDITIONS.
7. FIRESTOP ALL NEW CONDUIT INSTALLED THROUGH EXISTING OR NEW FIRE RATED ASSEMBLIES.
8. SHOP DRAWINGS SHALL BE SUBMITTED ON ALL ELECTRICAL MATERIALS AND EQUIPMENT FOR ACCEPTANCE PRIOR TO PURCHASE BY THE CONTRACTOR.
9. WHEN AN ITEM DEMOLISHED IS REMOVED, REMOVE ALL CONCRETE PADS, FASTENERS, CONDUIT AND WIRING. SCARIFY SURFACE AND RESTORE TO MATCH EXISTING SURROUNDING SURFACE, INCLUDING PAINTING TO MATCH.
10. ALL NEW WIRING SHALL BE ENCLOSED IN AN APPROVED RACEWAY SYSTEM. OPEN WIRING IS PROHIBITED.
11. CIRCUIT BREAKERS USED FOR HVAC EQUIPMENT LOADS SHALL BE HACR TYPE.
12. ENSURE DEDICATED ELECTRICAL SPACE IS PROVIDED ABOVE AND BELOW ELECTRICAL PANELS IN ACCORDANCE WITH NEC ARTICLE 110.26.
13. UP TO 3 CIRCUITS MAY BE COMBINED IN ONE CONDUIT, AS LONG AS NEC DERATING RULES ARE FOLLOWED.
14. ALL CIRCUITS TO HAVE A DEDICATED NEUTRAL. COMBINED NEUTRALS AND MULTI-WIRE CIRCUITS ARE NOT TO BE USED EXCEPT POSSIBLY TO COORDINATE WITH SYSTEMS FURNITURE. SEE POWER PLAN.
15. 120 VOLT CIRCUITS THAT EXCEED 75 LINEAR CIRCUIT FEET SHALL BE INCREASED TO #10 AWG AS A GENERAL RULE. OTHER CIRCUITS WILL BE DESIGNED SPECIFICALLY WITH VOLTAGE DROP CONSIDERED IN THE LAYOUT.
16. COORDINATE ALL MOTOR STARTERS, FEEDERS AND DISCONNECT SWITCHES FOR HVACE AND OTHER UTILIZATION EQUIPMENT ACTUALLY PROVIDED IN ACCEPTED SHOP DRAWINGS.
17. IN ORDER TO COMPLY WITH OSHA REQUIREMENTS, NO OPERATOR DEVICE OF ANY PANEL OR DISCONNECT OR MOTOR CONTROL SHALL BE HIGHER THAN 6'-6" AFF.
18. PROVIDE AN EXTERIOR RATED SERVICE RECEPTACLE WITHIN 25 FEET HORIZONTALLY OF ANY EXTERIOR OR ROOFTOP HVAC OUTDOOR UNITS (HEATING OR AIR CONDITIONING ONLY).
19. SUPPORT ALL LUMINAIRES FROM THE STRUCTURE, NOT FROM THE SUSPENDED CEILING GRID. ALSO INTERLOCK THE LUMINAIRES TO THE GRID SYSTEM USING AFTERMARKET EARTHQUAKE CLIPS (SIMILAR TO ERICO/CADDY FASTENERS OR T&B/STEEL CITY).
20. DEVICE PLATES SHALL BE INSTALLED PLUMB AND JUMBO OVERSIZED PLATES SHALL NOT BE USED.
21. NEW RECEPTACLES SHALL BE INSTALLED WITH GROUND PIN ORIENTATION TO MATCH EXISTING. IN NEW CONSTRUCTION, GROUND PIN DOWN ABOVE COUNTERS OR WORK BENCHES, AND UP FOR LOW WALL MOUNTED DEVICES.
22. AT COMPLETION OF PROJECT, ALL ELECTRICAL, TELECOMMUNICATIONS, AND ELECTRONIC SAFETY SYSTEMS SHALL BE FULLY OPERATIONAL.
23. INSTALL A NYLON PULLSTRING IN ALL SPARE CONDUITS, ACCESSIBLE AT BOTH ENDS. CAP OFF SPARE CONDUITS ON BOTH ENDS.
24. EGRESS LUMINAIRES AND EXIT SIGNS REQUIRE AN UNSWITCHED HOT.
25. WHERE DUPLEX RECEPTACLES ARE INDICATED GENERALLY BACK TO BACK ON OPPOSITE SIDES OF A PARTY WALL, THE RECEPTACLES SHALL NOT BE INSTALLED IN THE SAME STUD SPACE, BUT SHALL BE SEPARATED BY AT LEAST ONE STUD SPACE.
26. PROVIDE SIGN WITH ESTIMATED FAULT CURRENT AND DATE CALCULATED ON THE MAIN SERVICE DISCONNECT ENCLOSURE. PROVIDE COORDINATION STUDY AND ARC FLASH STUDY, AND APPLY JOB SPECIFIC ARC FLASH HAZARD WARNING LABELS ON ALL SWITCHBOARDS, SWITCHGEAR, MCC'S AND PANELBOARDS.
27. FOR ANY CIRCUIT BREAKER 1200 AMPERE OR LARGER, PROVIDE A MAINTENANCE SWITCH OR ZONE INTERLOCKING OR OTHER MEANS TO COMPLY WITH NEC ARTICLE 240.87.

1. REFER TO POWER PLANS FOR PANELBOARD LOCATIONS.
2. REFER TO SPECIFICATION SECTION 260548 FOR MOUNTING/SUPPORT REQUIREMENTS FOR LUMINAIRES.
3. OCCUPANCY SENSORS SHALL BE MOUNTED ON A VIBRATION FREE SURFACE AND SHALL BE LOCATED AT LEAST 6'-0" FROM DIFFUSERS. DO NOT MOUNT SENSORS CLOSER THAN 10'-0" FROM EACH OTHER.
4. PROVIDE AN UNSWITCHED LIGHTING CIRCUIT (NORMAL POWER) TO EACH LUMINAIRE CONTAINING AN EMERGENCY BATTERY DRIVER.
5. 0-10VDC DIMMING CONDUCTORS (CLASS 2) SHALL BE ROUTED IN SEPARATE CONDUIT FROM THE POWER CONDUCTORS.
6. LIGHTING CONTROL CABLE SHALL BE "DAISY CHAINED" BETWEEN LIGHTING CONTROL DEVICES (OCCUPANCY SENSOR, POWER/RELAY PACKS, WALL PODS, ETC.) WITHIN EACH ROOM AS SHOWN. CABLING SHALL BE ROUTED ABOVE CEILING AND SECURED WITH BRIDLE RINGS OR OTHER SIMILAR WIRE METHODS.
7. REFER TO ARCHITECTURAL ELEVATIONS FOR EXTERIOR LIGHT FIXTURE MOUNTING HEIGHTS.

SHEET KEYNOTES:

1. REFER TO POWER PLANS AND DETAILS FOR INTERCONNECTION TO RECEPTACLE CONTROL IN THIS AREA.
2. LUMINAIRES IN THIS AREA TO BE MOUNTED AT 28'-0".
3. LUMINAIRES IN THIS AREA TO BE MOUNTED AT 16'-0".
4. LUMINAIRES IN THIS AREA TO BE MOUNTED AT 14'-0".

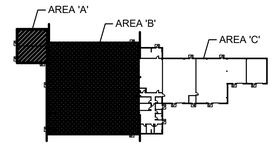
1 E-1-101 **AREA 'A' & 'B' POWER PLAN**

SCALE: 1/8" = 1'-0"

GENERAL NOTES:



1. REFER TO ONE-LINE DIAGRAM ON SHEET E-1-900 FOR CONDUIT/CONDUCTOR SIZES FOR EQUIPMENT/PANELBOARD FEEDERS.
2. COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.
3. COORDINATE EXACT LOCATION OF RECEPTACLES, EQUIPMENT CONNECTIONS, DEVICES, ETC. WITH ARCHITECT APPROVED SHOP DRAWINGS PRIOR TO ROUGH-IN.
4. COORDINATE EXACT EQUIPMENT REQUIREMENTS OF HVAC AND PLUMBING EQUIPMENT WITH ALL ENGINEER APPROVED SHOP DRAWINGS AND MECHANICAL/PLUMBING CONTRACTORS PRIOR TO ROUGH-IN.
5. PROVIDE FIRE STOP FOR PENETRATIONS OF FIRE RATED WALLS AND FLOORS. REFER TO ARCHITECTURAL DRAWINGS.
6. INDIVIDUAL HOMERUNS HAVE BEEN SHOWN FOR EACH CIRCUIT FOR CLARITY. CONTRACTOR MAY CHOOSE TO COMBINE UP TO (3) 20A/120V BRANCH CIRCUITS INTO A COMMON CONDUIT WITHOUT UPSIZING CONDUCTORS. EACH CIRCUIT SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR-CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.

SHEET KEYNOTES:

1. PROVIDE 15A SINGLE POLE TOGGLE SWITCH DISCONNECT FOR RADIANT HEATING PUMP.
2. PROVIDE NEMA 5-15 RECEPTACLE FOR RADIANT HEATING BURNER. MOUNT WITHIN 12" OF BURNER UNIT.
3. PROVIDE ELECTRICAL CONNECTION TO DISCONNECT SWTICH FURNISHED WITH EXHAUST FAN.
4. PROVIDE NEMA 5-20 RECEPTACLE FOR PALLET JACK CHARGER. VERIFY RECEPTACLE TYPE WITH OWNER PROVIDED EQUIPMENT PRIOR TO INSTALLATION.
5. PROVIDE NEMA L16-20 RECEPTACLE FOR REACH TRUCK CHARGER. VERIFY RECEPTACLE TYPE WITH OWNER PROVIDED EQUIPMENT PRIOR TO INSTALLATION.
6. PROVIDE NEMA 3R 60 AMP NON FUSED SAFETY SWITCH FOR RTU.
7. PROVIDE NEMA 5-20 RECEPTACLE FOR COPIER.
8. OCCUPANCY CONTROLLED RECEPTACLE. PROVIDE LABEL ON FACEPLATE. "RECEPTACLE CONTROLLED BY OCCUPANCY SENSOR."
9. RECEPTACLE CONTROL POWER PACK. REFER TO LIGHTING PLANS AND DETAILS FOR INTERCONNECTION TO LIGHTING CONTROL IN THIS AREA.
10. PROVIDE NEMA 5-20 RECEPTACLE FOR WATER DISPENSER.
11. PROVIDE 15A SINGLE POLE TOGGLE SWITCH DISCONNECT FOR AHU.
12. PROVIDE NEMA 3R 30A THREE POLE NON-FUSED DISCONNECT FOR HP.
13. PROVIDE WALL MOUNTED 4' LONG PLUG STRIP (WIREMOLD AL20GBA406 OR EQUIVALENT) AT 48" AFF.
14. PROVIDE MOUNTING BRACKET FOR TRANSFORMER. MOUNT TOP OF TRANSFORMER AS CLOSE TO BOTTOM OF STRUCTURE AS POSSIBLE.
15. PROVIDE ELECTRICAL CONNECTION FOR TRAP PRIMER. COORDINATE EXACT MEANS OF DISCONNECT REQUIRED FOR EQUIPMENT WITH SHOP DRAWINGS.

⬡ SHEET KEYNOTES:

1. PROVIDE NEMA 3R 30A THREE POLE NON-FUSED DISCONNECT FOR HP.
2. SEE SHEET E-1-400, ENLARGED MECHANICAL ROOM, FOR CONTINUATION.
3. PROVIDE NEMA 5-15 RECEPTACLE FOR RADIANT HEATING BURNER. MOUNT WITHIN 12" OF BURNER UNIT.
4. PROVIDE 15A SINGLE POLE TOGGLE SWTICH DISCONNECT FOR RADIANT HEATING PUMP.
5. PROVIDE ELECTRICAL CONNECTION TO DISCONNECT SWTICH FURNISHED WITH EXHAUST FAN.
6. PROVIDE NEMA 3R 30 AMP NON-FUSED SAFETY SWITCH FOR RTU.
7. OCCUPANCY CONTROLLED RECEPTACLE. PROVIDE LABEL ON FACEPLATE. "RECEPTACLE CONTROLLED BY OCCUPANCY SENSOR."
8. RECEPTACLE CONTROL POWER PACK. REFER TO LIGHTING PLANS AND DETAILS FOR INTERCONNECTION TO LIGHTING CONTROL IN THIS AREA.
9. PROVIDE NEMA 5-20 RECEPTACLE FOR COPIER.
10. PROVIDE ELECTRICAL CONNECTION TO INTEGRAL DISCONNECT IN ELECTRIC UNIT HEATER.
11. PROVIDE ELECTRICAL CONNECTION TO DISCONNECT SWTICH FURNISHED WITH INDOOR MINI SPLIT UNIT.
12. PROVIDE ELECTRICAL CONNECTION TO DISCONNECT SWTICH FURNISHED WITH OUTDOOR MINI SPLIT UNIT.
13. PROVIDE MOUNTING BRACKET FOR TRANSFORMER. MOUNT TOP OF TRANSFORMER AS CLOSE TO BOTTOM OF STRUCTURE AS POSSIBLE.
14. PROVIDE NEMA 5-20 RECEPTACLE FOR PANEL SAW.
15. PROVIDE NEMA 5-20 RECEPTACLE FOR BAND SAW.
16. PROVIDE FLOOR MOUNTED PEDESTAL NEMA 5-20 RECEPTACLES AT END OF WORKBENCHES.
17. PROVIDE NEMA 12, 30 AMP NON-FUSED DISCONNECT FOR TABLE SAW.
18. PROVIDE NEMA 5-20 RECEPTACLE FOR JOINTER.
19. PROVIDE NEMA 5-20 RECEPTACLE FOR PLANER/MOLDER.
20. PROVIDE NEMA 5-20 RECEPTACLE FOR DRILL PRESS.
21. PROVIDE NEMA 12, 30 AMP DISCONNECT FOR AIR COMPRESSOR.
22. PROVIDE NEMA 3R, 30 AMP DISCONNECT FOR SLIDE GATE.
23. PROVIDE NEMA 5-20 RECEPTACLE FOR FINISHER.
24. PROVIDE NEMA 5-20 RECEPTACLE FOR RADIAL ARM SAW.
25. PROVIDE NEMA 5-20 RECEPTACLE FOR MITER SAW.
26. PROVIDE NEMA 12, 30 AMP DISCONNECT FOR SHAPER.
27. PROVIDE NEMA 3R, 30 AMP DISCONNECT FOR EXHAUST FAN.
28. PROVIDE NEMA 5-20 RECEPTACLE FOR BLAST CABINET.
29. PROVIDE NEMA 5-20 RECEPTACLE FOR TIME CLOCK.
30. PROVIDE WIRING FOR WELDING HOOD CONTROL SWITCH. REFER TO MECHANICAL FOR ADDITIONAL INFORMATION AND REQUIREMENTS.
31. PROVIDE NEMA 1, 30 AMP DISCONNECT WITH NEMA 10-30 RECEPTACLE FOR WELDER.
32. PROVIDE NEMA 1, 30 AMP DISCONNECT WITH NEMA L14-30 RECEPTACLE FOR PLASMA CUTTER.
33. PROVIDE NEMA 5-20 RECEPTACLE FOR DRILL PRESS.
34. REFER TO C-0-107 FOR CONTIUATION AND E-1-900 FOR REQUIREMENTS AND ADDITIONAL INFORMATION.
35. PROVIDE ELECTRICAL CONNECTION FOR TRAP PRIMER. COORDINATE EXACT MEANS OF DISCONNECT REQUIRED FOR EQUIPMENT WITH SHOP DRAWINGS.
36. FUEL TANK SYSTEM CONTROL PANEL.

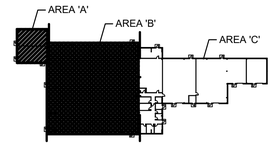
1 E-1-105

AREA 'A' & 'B' SYSTEMS PLAN



SCALE: 1/8" = 1'-0"

GENERAL NOTES:

1. INSTALL 1" CONDUIT FROM EACH TELECOMMUNICATIONS OUTLET TO ABOVE CEILING. PROVIDE NYLON BUSHINGS CONDUIT CONNECTORS FOR CABLE PROTECTION.
2. REFER TO DIVISION 27 SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.
3. WHERE NOTED FOR DEVICES AND/OR WIRING TO BE FURNISHED AND INSTALLED BY DOOR HARDWARE INSTALLER, THE ELECTRICAL CONTRACTOR SHALL BE RESPONSIBLE FOR ALL DEVICE BACKBOXES AND CONDUIT ROUGH-IN INSTALLATION.
4. REFER TO SHEET E-500 FOR ACCESS CONTROL SYSTEM / DOOR HARDWARE DETAIL.
5. REFER TO ARCHITECTURAL ELEVATIONS, SHEETS A-1-200 AND A-1-201, FOR EXTERIOR CAMERA MOUNTING HEIGHTS.
6. COORDINATE WITH DOOR HARDWARE INSTALLER FOR ALL REQUIRED ACCESS CONTROL CONNECTIONS AND ROUGH-IN REQUIREMENTS.
7. FIRE ALARM SYSTEM SHALL BE CONNECTED AS SHOWN ON THE MANUFACTURER'S SUBMITTAL DRAWINGS, WITH NUMBER OF WIRES AND CONDUIT SIZED AS REQUIRED.
8. THE FIRE ALARM SYSTEM SHALL BE MONITORED BY A U.L. APPROVED CENTRAL MONITORING STATION. THE MONITORING STATION INFORMATION AND THE CORRESPONDING U.L. FILE NUMBER SHALL BE PROVIDED TO THE PROPER APPROVAL AGENCIES BY THE SUCCESSFUL FIRE ALARM MANUFACTURER / SUPPLIER.
9. CONTRACTOR SHALL REFER TO MECHANICAL / FIRE PROTECTION DRAWINGS FOR EXACT LOCATIONS OF ALL TAMPER AND FLOW SWITCHES REQUIRED FOR THE SPRINKLER SYSTEM, INCLUDING EXTERIOR. SWITCHES SHALL BE MONITORED BY THE FIRE ALARM SYSTEM. ALL EXTERIOR FIRE ALARM LINES AHLL BE PROVIDED WITH SURGE PROTECTION.
10. ANY DUCT SMOKE DETECTORS FOR HVAC UNITS THAT ARE NOT DIRECTLY ACCESSIBLE SHALL BE PROVIDED WITH REMOTE-MOUNTED TEST SWITCHES THAT ARE MOUNTED IN AN ACCESSIBLE LOCATION AND LABELED AS TO WHICH UNIT IS MONITORED.
11. ALL FIRE ALARM INDICATING DEVICES ARE TO BE INSTALLED AT 80" OR 6" BELOW CEILING, WHICHEVER IS LOWER.
12. MANUAL PULL STATIONS ARE TO BE INSTALLED NOT LESS THAN 42" AFF OR MORE THAN 48" AFF (TO OPERATING HANDLE).
13. ALL CABLING SHALL BE INSTALLED IN CONDUIT.
14. REFER TO SHEET E-1-901 FOR FIRE ALARM SYSTEM RISER DIAGRAM.
15. ALL DATA RACKS, DATA CABLING, DATA OUTLETS, DATA JACKS, CABLE SUPPORTS, INSTALLATION AND TERMINATION SHALL BE INCLUDED IN THE PROJECT.

SHEET KEYNOTES:

1. PROVIDE DUCT SMOKE DETECTOR WITH WEATHERPROOF ENCLOSURE. INSTALL IN AIR DUCT FOR RTU. COORDINATE QUANTITIES AND PLACEMENT WITH LOCAL CODE REQUIREMENTS.
2. ADDRESSABLE FIRE ALARM CONTROL MODULE FOR DUCT SMOKE DETECTOR. PROVIDE FIRE ALARM SIGNALING LINE CIRCUIT (SLC WIRING) TO FIRE ALARM CONTROL PANEL. PROVIDE CONDUIT/WIRING TO HVAC UNIT CONTROLS FOR UNIT SHUTDOWN UPON ACTIVATION OF ASSOCIATED DUCT SMOKE DETECTOR. COORDINATE LOCATION WITH MECHANICAL CONTRACTOR.
3. PROTECTIVE SERVICES CAMERA. PROVIDE EXTERIOR CAMERA, REFER TO CAMERA RISER ON E-1-902 FOR MOUNTING REQUIREMENTS AND ADDITIONAL INFORMATION.
4. GSD AGENCY CAMERA. PROVIDE EXTERIOR CAMERA, REFER TO CAMERA RISER ON E-1-903 FOR MOUNTING REQUIREMENTS AND ADDITIONAL INFORMATION.
5. GSD AGENCY CAMERA. PROVIDE INTERIOR CAMERA, REFER TO CAMERA RISER ON E-1-903 FOR MOUNTING REQUIREMENTS AND ADDITIONAL INFORMATION.
6. CARD READER. MOUNT AT 42" AFF (TO TOP OF DEVICE.)
7. SINGLE ACCESS DOOR HARDWARE. RFER TO SPECIFICATION SECTION 087100 FOR ADDITIONAL INFORMATION.
8. FIRE ALARM REMOTE ANNUNCIATOR PANEL TO BE SEMI-FLUSH MOUNTED.
9. CAMERA SHALL BE INSTALLED ON MAILROOM BUILDING IF ALTERNATE #1 IS ACCEPTED. PLEASE REFER TO E-3-103 FOR ALTERNATE #1 LOCATION.
10. INSTALL DOORBELL PUSH BUTTON 48" AFF. REFER TO A-1-600 FOR ADDITIONAL INFORMATION AND REQUIREMENTS.
11. INSTALL DOORBELL CHIME 8'-0" AFF. REFER T A-1-600 FOR ADDITIONAL INFORMATION AND REQUIREMENTS.

14. REFER TO SHEET E-1-901 FOR FIRE ALARM SYSTEM RISER DIAGRAM.
15. ALL DATA RACKS, DATA CABLING, DATA OUTLETS, DATA JACKS, CABLE SUPPORTS, INSTALLATION AND TERMINATION SHALL BE INCLUDED IN THE PROJECT.

SHEET KEYNOTES:

1. FIRE ALARM CONTROL PANEL. PROVIDE DIGITAL DIALER WITH FIRE ALARM CONTROL PANEL. PROVIDE CAT 6A CABLE IN CONDUIT BETWEEN FIRE ALARM PANEL AND DIGITAL DIALER.
2. ADDRESSABLE FIRE ALARM MONITORING MODULES FOR FIRE PROTECTION RISER (TAMPER/FLOW SWITCHES). MODULES SHALL BE LOCATED WITHIN 3' OF DEVICE MONITORED. COORDINATE WITH FIRE PROTECTION CONTRACTOR FOR NUMBER AND LOCATIONS OF TAMPER AND FLOW SWITCHES.
3. PROVIDE CONNECTION TO FIRE PROTECTION SYSTEM WATER GONG. COORDINATE LOCATION WITH FIRE PROTECTION CONTRACTOR. PROVIDE CONDUIT/WIRING AS REQUIRED FOR CONNECTION TO FIRE ALARM CONTROL PANEL. PROVIDE 120V CONNECTION, IF REQUIRED.
4. PROVIDE 1-1/2" CONDUIT WITH FIRE CABLING TO FIRE PROTECTION VAULT, REFER TO LOCATION SHOWN ON C-0-107.
5. CONTRACTOR SHALL WRAP COMMUNICATIONS ROOM WITH 3/4" X 4' X 8' PLYWOOD, RIGIDLY ATTACHED TO WALL MOUNT VERTICALLY WITH TOP OF PLYWOOD AT 8'-0"AFF. PLYWOOD SHALL BE FIRE RATED AND TIA/EIA APPROVED.
6. TELECOMMUNICATIONS MAIN GROUNDING BUSBAR. (TMGB) - 1/4" X 4" X 16" (MIN) GROUND BAR. MOUNT TO WALL WITH NON-CONDUCTIVE MATERIAL.
7. COMMUNICATION SERVICE CONDUITS. PROVIDE TWO (2) 2" CONDUITS WITH PULL STRING. STUB UP INTO SECURITY ROOM 119 WITH LONG SWEEP RIGID STEEL ELBOWS. REFER TO SHEET C-0-107 FOR CONTINUATION.
8. FUEL TANK SIGNAL/CONTROL CONDUITS. PROVIDE TWO (2) 2" CONDUITS FROM BREAKROOM TO FUEL TANKS. REFER TO C-0-107 FOR CONTINUATION.
9. PROVIDE DUCT SMOKE DETECTOR WITH WEATHERPROOF ENCLOSURE. INSTALL IN AIR DUCT FOR RTU. COORDINATE QUANTITIES AND PLACEMENT WITH LOCAL CODE REQUIREMENTS.
10. ADDRESSABLE FIRE ALARM CONTROL MODULE FOR DUCT SMOKE DETECTOR. PROVIDE FIRE ALARM SIGNALING LINE CIRCUIT (SLC WIRING) TO FIRE ALARM CONTROL PANEL. PROVIDE CONDUIT/WIRING TO HVAC UNIT CONTROLS FOR UNIT SHUTDOWN UPON ACTIVATION OF ASSOCIATED DUCT SMOKE DETECTOR. COORDINATE LOCATION WITH MECHANICAL CONTRACTOR.
11. ACCESS CONTROL SYSTEM PANEL
12. PROTECTIVE SERVICES CAMERA. PROVIDE EXTERIOR CAMERA, REFER TO CAMERA RISER ON E-1-902 FOR MOUNTING REQUIREMENTS AND ADDITIONAL INFORMATION.
13. GSD AGENCY CAMERA. PROVIDE EXTERIOR CAMERA, REFER TO CAMERA RISER ON E-1-903 FOR MOUNTING REQUIREMENTS AND ADDITIONAL INFORMATION.
14. GSD AGENCY CAMERA. PROVIDE INTERIOR CAMERA, REFER TO CAMERA RISER ON E-1-903 FOR MOUNTING REQUIREMENTS AND ADDITIONAL INFORMATION.
15. CARD READER. MOUNT AT 42" AFF (TO TOP OF DEVICE.)
16. SINGLE ACCESS DOOR HARDWARE. RFER TO SPECIFICATION SECTION 087100 FOR ADDITIONAL INFORMATION.
17. EQUIPMENT RACK FOR INTEGRATED SECURITY MANAGEMENT SYSTEM.
18. EQUIPMENT RACK LOCATION FOR BUILDING DATA SYSTEM.
19. DATA LOCATION FOR TIME CLOCK.
20. MAGNETIC DOOR HOLD OPEN.
21. SMOKE DETECTOR FOR DOOR RELEASE. SMOKE DETECTOR SHALL BE LOCATED WITHIN 5'-0" OF DOORWAY.
22. COMMUNICATION SERVICE CONDUITS. PROVIDE TWO (2) 4" CONDUITS. STUB UP INTO SECURITY ROOM 119 WITH LONG SWEEP RIGID STEEL ELBOWS. REFER TO SHEET C-0-107 FOR CONTINUATION.
23. PUSH TO EXIT FOR EXTERIOR GATE.
24. INSTALL DOORBELL CHIME 8'-0" AFF. REFER T A-1-600 FOR ADDITIONAL INFORMATION AND REQUIREMENTS.

GENERAL NOTES:

1. REFER TO ONE-LINE DIAGRAM ON SHEET E-1-900 FOR CONDUIT/CONDUCTOR SIZES FOR EQUIPMENT/PANELBOARD FEEDERS.
2. COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.
3. COORDINATE EXACT LOCATION OF RECEPTACLES, EQUIPMENT CONNECTIONS, DEVICES, ETC. WITH ARCHITECT APPROVED SHOP DRAWINGS PRIOR TO ROUGH-IN.
4. COORDINATE EXACT EQUIPMENT REQUIREMENTS OF HVAC AND PLUMBING EQUIPMENT WITH ALL ENGINEER APPROVED SHOP DRAWINGS AND MECHANICAL/PLUMBING CONTRACTORS PRIOR TO ROUGH-IN.
5. PROVIDE FIRE STOP FOR PENETRATIONS OF FIRE RATED WALLS AND FLOORS. REFER TO ARCHITECTURAL DRAWINGS.
6. INDIVIDUAL HOMERUNS HAVE BEEN SHOWN FOR EACH CIRCUIT FOR CLARITY. CONTRACTOR MAY CHOOSE TO COMBINE UP TO (3) 20A/120V BRANCH CIRCUITS INTO A COMMON CONDUIT WITHOUT UPSIZING CONDUCTORS. EACH CIRCUIT SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR-CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.

⬡ SHEET KEYNOTES:

1. PROVIDE 15A SINGLE POLE TOGGLE SWITCH DISCONNECT FOR AHU.
2. PROVIDE ELECTRICAL CONNECTION TO DISCONNECT SWITCH FURNISHED WITH EXHAUST FAN.
3. PROVIDE ELECTRICAL CONNECTION TO INTEGRAL DISCONNECT IN ELECTRIC UNIT HEATER.
4. PROVIDE ELECTRICAL CONNECTION FOR GAS FIRED WATER HEATER. COORDINATE EXACT MEANS OF DISCONNECT REQUIRED FOR EQUIPMENT WITH SHOP DRAWINGS.
5. PROVIDE ELECTRICAL CONNECTION FOR RECIRULATING PUMP. COORDINATE EXACT MEANS OF DISCONNECT REQUIRED FOR EQUIPMENT WITH SHOP DRAWINGS.
6. REFER TO SHEET E-1-104 FOR CONTINUATION.
7. PROVIDE NEMA 5-20 RECEPTACLE FOR WATER DISPENSER.
8. PROVIDE RECEPTACLE 60" AFF FOR MICROWAVE. COORDINATE EXACT LOCATION WITH CASEWORK.
9. PROVIDE RECEPTACLE 48" AFF. COORDINATE EXACT LOCATION WITH CASEWORK.
10. PROVIDE RECEPTACLE FOR REFRIGERATOR.
11. PROVIDE ELECTRICAL CONNECTION FOR TRAP PRIMER. COORDINATE EXACT MEANS OF DISCONNECT REQUIRED FOR EQUIPMENT WITH SHOP DRAWINGS
12. PROVIDE NEMA 5-20 RECEPTACLE FOR ICE MAKER.
13. MOTOR RATED SWITCH FOR OVERHEAD DOOR. COORDINATE MOUNTING LOCATION WITH ARCHITECTURAL.
14. UP/DOWN/STOP PUSHBUTTON FOR OVERHEAD DOOR. PROVIDE CONDUIT/WIRING AS REQUIRED TO OVERHEAD DOOR CONTROLLER.
15. CONNECTION TO OVERHEAD DOOR SAFETY BEAM PHOTO SENSOR. PROVIDE CONDUIT/WIRING AS REQUIRED TO OVERHEAD DOOR CONTROLLER.
16. CONNECTION TO OVERHEAD DOOR SENSING EDGE. PROVIDE CONDUIT/WIRING AS REQUIRED TO OVERHEAD DOOR CONTROLLER.
17. OVERHEAD DOOR CIRCUITS:
    ROOM 123: L2C-1,3,5
    ROOM 125: L2C-16,18,20
    ROOM 126: L2D-1,3,5
18. UNDER SINK DISPOSER. PROVIDE WALL SWITCH AND ASSOCIATED WIRING FOR CONTROL OF DISPOSER. COORDINATE LOCATION WITH ARCHITECTURAL CASEWORK.
19. MAIN GROUNDING BAR.
20. PROVIDE 120V CONNECTION TO ACCESS CONTROL PANEL.
21. PROVIDE 120V CONNECTION TO HVAC DDC CONTROL PANEL.
22. PROVIDE SUPPORTS TO STACK TRANSFORMERS.
23. PROVIDE RECEPTACLE FOR DOCK LEVELER. CONNECT TO CIRCUIT L2A-8. PROVIDE 3/4" CONDUIT FROM RECEPTACLE TO WALL MOUNTED PUSH BUTTON.
24. INSTALL PUSH BUTTON FOR DOCK LEVELER 48" AFF.
25. INSTALL CONTROL PANEL FOR VEHICLE RESTRAINT SYSTEM. CONNECT TO CIRCUIT L2A-29. PROVIDE 3/4" CONDUITS TO LIP LIMIT SWITCH AND TRUCK SIGNAL LIGHT.
26. LIP LIMIT SWITCH.
27. TRUCK SIGNAL LIGHT.
28. REFER TO SYSTEMS PLANS E-1-106 FOR DATA RACK REQUIREMENTS.

SCALE: 1/4" = 1'-0"

EQUIPMENT SCHEDULE	
ITEM	DESCRIPTION
ME5	MIG WELDER
ME8	DRILL PRESS
ME9	20G PARTS WASH
ME12	GOLF CART LIFT
ME18	POWER REEL
ME19	WORK LIGHT REEL
ME20	TALL WORKBENCH
ME21	TIRE CHANGER
ME24	AIR COMPRESSOR
ME26	PEDISTAL TOOLS
ME28	WATER HEATER
ME29	VEHICLE EXHAUST FAN

GENERAL NOTES:

1. REFER TO ONE-LINE DIAGRAM ON SHEET E-1-900 FOR CONDUIT/CONDUCTOR SIZES FOR EQUIPMENT/PANELBOARD FEEDERS.
2. COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.
3. COORDINATE EXACT LOCATION OF RECEPTACLES, EQUIPMENT CONNECTIONS, DEVICES, ETC. WITH ARCHITECT APPROVED SHOP DRAWINGS PRIOR TO ROUGH-IN.
4. COORDINATE EXACT EQUIPMENT REQUIREMENTS OF HVAC AND PLUMBING EQUIPMENT WITH ALL ENGINEER APPROVED SHOP DRAWINGS AND MECHANICAL/PLUMBING CONTRACTORS PRIOR TO ROUGH-IN.
5. PROVIDE FIRE STOP FOR PENETRATIONS OF FIRE RATED WALLS AND FLOORS. REFER TO ARCHITECTURAL DRAWINGS.
6. INDIVIDUAL HOMERUNS HAVE BEEN SHOWN FOR EACH CIRCUIT FOR CLARITY. CONTRACTOR MAY CHOOSE TO COMBINE UP TO (3) 20A/120V BRANCH CIRCUITS INTO A COMMON CONDUIT WITHOUT UPSIZING CONDUCTORS. EACH CIRCUIT SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR-CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.
7. COORDINATE EXACT CONNECTION REQUIREMENTS FOR ALL OWNER PROVIDED EQUIPMENT.

⬡ SHEET KEYNOTES:

1. PROVIDE 15A SINGLE POLE TOGGLE SWTICH DISCONNECT FOR RADIANT HEATING PUMP.
2. PROVIDE NEMA 5-15 RECEPTACLE FOR RADIANT HEATING BURNER. MOUNT WITHIN 12" OF BURNER UNIT.
3. PROVIDE ELECTRICAL CONNECTION TO DISCONNECT SWTICH FURNISHED WITH EXHAUST FAN.
4. PROVIDE MOUNTING BRACKET FOR TRANSFORMER. MOUNT TOP OF TRANSFORMER AS CLOSE TO BOTTOM OF STRUCTURE AS POSSIBLE.
5. PROVIDE ELECTRICAL CONNECTION FOR TRAP PRIMER. COORDINATE EXACT MEANS OF DISCONNECT REQUIRED FOR EQUIPMENT WITH SHOP DRAWINGS.
6. PROVIDE ELECTRICAL CONNECTION TO DISCONNECT FURNISHED WITH VEHICLE LIFT.
7. PROVIDE RECEPTACLE FOR AIR COMPRESSOR. PROVIDE AND INSTALL CORD & PLUG FOR OWNER PROVIDED AIR COMPRESSOR.
8. PROVIDE NEMA 5-20 RECEPTACLE FOR DRILL PRESS.
9. LOCATION OF VES FAN START/STOP SWITCH AND HOSE REEL UP/DOWN SWITCH. VES FAN START/STOP SWITCH REQUIRES CONTROL WIRING TO FAN CONTROLLER. HOSE REEL UP/DOWN SWITCH REQUIRES 120V CONNECTION VIA 120V DISCONNECT SWITCH AND POWER/CONTROL TO HOSE REEL.
10. PROVIDE A NEMA 1, 30A NON FUSED DISCONNECT. PROVIDE CONNECTION TO VEHICULAR EXHAUST FAN MOTOR. MOUNT DISCONNECT AND CONTROLLER AT 7'-6" AFF.
11. PROVIDE CONDUIT/WIRING FROM VEHICULAR EXHAUST FAN CONTROLLER TO FAN START/STOP SWITCH.
12. PROVIDE CONDUIT/WIRING FROM HOSE REEL TO UP/DOWN SWITCH.
13. PROVIDE NEMA 5-20 RECEPTACLE 12'-0" AFF FOR OWNER PROVIDED RECEPTACLE CORD REEL.
14. PROVIDE NEMA 5-20 RECEPTACLE 12'-0" AFF FOR OWNER PROVIDED LIGHT CORD REEL.
15. PROVIDE NEMA 5-20 RECEPTACLE FOR WELDER.
16. PROVIDE NEMA 5-20 RECEPTACLE FOR PARTS WASH.
17. PROVIDE NEMA 5-20 RECEPTACLES FOR POWER TOOLS.
18. CIRCUIT SHALL TEMPORARILY BE CONNECTED TO PANEL L2D DURING PHASE 1.
19. PANEL L2D SHALL BE SERVICE ENTRANCE RATED AND TEMPORARILY FED FROM SERVICE DROP POLE DURING PHASE 1. PANEL SHALL BE CONNECTED TO BUILDING SERVICE AFTER THE PHASE 2 BUILDING SERVICE IS OPERATIONAL.
20. OIL WATER SEPARATOR ALARM PANEL.

2. COORDINATE EXACT LOCATION OF PANELBOARDS AND OTHER ELECTRICAL EQUIPMENT WITH HVAC AND PLUMBING CONTRACTOR PRIOR TO ROUGH-IN.
3. COORDINATE EXACT LOCATION OF RECEPTACLES, EQUIPMENT CONNECTIONS, DEVICES, ETC. WITH ARCHITECT APPROVED SHOP DRAWINGS PRIOR TO ROUGH-IN.
4. COORDINATE EXACT EQUIPMENT REQUIREMENTS OF HVAC AND PLUMBING EQUIPMENT WITH ALL ENGINEER APPROVED SHOP DRAWINGS AND MECHANICAL/PLUMBING CONTRACTORS PRIOR TO ROUGH-IN.
5. PROVIDE FIRE STOP FOR PENETRATIONS OF FIRE RATED WALLS AND FLOORS. REFER TO ARCHITECTURAL DRAWINGS.
6. INDIVIDUAL HOMERUNS HAVE BEEN SHOWN FOR EACH CIRCUIT FOR CLARITY. CONTRACTOR MAY CHOOSE TO COMBINE UP TO (3) 20A/120V BRANCH CIRCUITS INTO A COMMON CONDUIT WITHOUT UPSIZING CONDUCTORS. EACH CIRCUIT SHALL HAVE A DEDICATED NEUTRAL CONDUCTOR WITH UNIQUE COLOR-CODED IDENTIFIER MATCHING THE RESPECTIVE PHASE CONDUCTOR IN EACH CONDUIT.

⬡ SHEET KEYNOTES:

1. PROVIDE ELECTRICAL CONNECTION TO DISCONNECT SWTICH FURNISHED WITH EXHAUST FAN.
2. PROVIDE NEMA 3R 60 AMP NON FUSED SAFETY SWITCH FOR RTU.
3. PROVIDE NEMA 5-20 RECEPTACLE FOR COPIER.
4. OCCUPANCY CONTROLLED RECEPTACLE. PROVIDE LABEL ON FACEPLATE. "RECEPTACLE CONTROLLED BY OCCUPANCY SENSOR."
5. RECEPTACLE CONTROL POWER PACK. REFER TO LIGHTING PLANS AND DETAILS FOR INTERCONNECTION TO LIGHTING CONTROL IN THIS AREA.
6. PROVIDE ELECTRICAL CONNECTION FOR TRAP PRIMER. COORDINATE EXACT MEANS OF DISCONNECT REQUIRED FOR EQUIPMENT WITH SHOP DRAWINGS.
7. PROVIDE ELECTRICAL CONNECTION TO INTEGRAL DISCONNECT IN ELECTRIC UNIT HEATER.
8. PROVIDE ELECTRICAL CONNECTION FOR GAS FIRED WATER HEATER. COORDINATE EXACT MEANS OF DISCONNECT REQUIRED FOR EQUIPMENT WITH SHOP DRAWINGS.
9. PROVIDE ELECTRICAL CONNECTION FOR RECIRULATING PUMP. COORDINATE EXACT MEANS OF DISCONNECT REQUIRED FOR EQUIPMENT WITH SHOP DRAWINGS.PROVIDE DISCONNECT FOR GAS FIRED WATER HEATER.
10. PROVIDE RECEPTACLE 60" AFF FOR MICROWAVE. COORDINATE EXACT LOCATION WITH CASEWORK.
11. PROVIDE RECEPTACLE 48" AFF. COORDINATE EXACT LOCATION WITH CASEWORK.
12. PROVIDE RECEPTACLE FOR REFRIGERATOR.
13. UNDER SINK DISPOSER. PROVIDE WALL SWITCH AND ASSOCIATED WIRING FOR CONTROL OF DISPOSER. COORDINATE LOCATION WITH ARCHITECTURAL CASEWORK.
14. REFER TO C-0-107 FOR CONTIUATION AND E-3-900 FOR REQUIREMENTS AND ADDITIONAL INFORMATION.
15. MAIN GROUNDING BAR.
16. PROVIDE 120V CONNECTION TO ACCESS CONTROL PANEL.
17. PROVIDE 120V CONNECTION TO HVAC DDC CONTROL PANEL.
18. PROVIDE QUAD RECEPTACLE FOR STAMPING AND SORTING MACHINES.
19. PROVIDE TELE-POWER POLE (WIREMOLD AMDTP-4 OR EQUIVALENT) FOR STAMPING AND SORTING MACHINES. POLE SHALL HAVE PROVISIONS FOR TWO (2) DUPLEX RECEPTACLES AND ONE (1) DATA OUTLET. REFER TO E-3-103 FOR ADDITIONAL REQUIREMENTS.
20. PROVIDE NEMA 5-20 RECEPTACLE FOR PARCEL METERING MACHINE.
21. PROVIDE NEMA 5-20 RECEPTACLE FOR PARCEL STRAPPING MACHINE.
22. PROVIDE NEMA 5-20 RECEPTACLE FOR BIO SAFETY CABINET.

1 E-3-102 **ELECTRICAL SYSTEMS PLAN**

SCALE: 1/4" = 1'-0"

GENERAL NOTES:

1. INSTALL 1" CONDUIT FROM EACH TELECOMMUNICATIONS OUTLET TO ABOVE CEILING. PROVIDE NYLON BUSHINGS CONDUIT CONNECTORS FOR CABLE PROTECTION.
2. REFER TO DIVISION 27 SPECIFICATIONS FOR ADDITIONAL REQUIREMENTS.
3. FIRE ALARM SYSTEM SHALL BE CONNECTED AS SHOWN ON THE MANUFACTURER'S SUBMITTAL DRAWINGS, WITH NUMBER OF WIRES AND CONDUIT SIZED AS REQUIRED.
4. THE FIRE ALARM SYSTEM SHALL BE MONITORED BY A U.L. APPROVED CENTRAL MONITORING STATION. THE MONITORING STATION INFORMATION AND THE CORRESPONDING U.L. FILE NUMBER SHALL BE PROVIDED TO THE PROPER APPROVAL AGENCIES BY THE SUCCESSFUL FIRE ALARM MANUFACTURER / SUPPLIER.
5. CONTRACTOR SHALL REFER TO MECHANICAL / FIRE PROTECTION DRAWINGS FOR EXACT LOCATIONS OF ALL TAMPER AND FLOW SWITCHES REQUIRED FOR THE SPRINKLER SYSTEM, INCLUDING EXTERIOR. SWITCHES SHALL BE MONITORED BY THE FIRE ALARM SYSTEM. ALL EXTERIOR FIRE ALARM LINES AHLL BE PROVIDED WITH SURGE PROTECTION.
6. ANY DUCT SMOKE DETECTORS FOR HVAC UNITS THAT ARE NOT DIRECTLY ACCESSIBLE SHALL BE PROVIDED WITH REMOTE-MOUNTED TEST SWITCHES THAT ARE MOUNTED IN AN ACCESSIBLE LOCATION AND LABELED AS TO WHICH UNIT IS MONITORED.
7. ALL FIRE ALARM INDICATING DEVICES ARE TO BE INSTALLED AT 80" OR 6" BELOW CEILING, WHICHEVER IS LOWER.
8. MANUAL PULL STATIONS ARE TO BE INSTALLED NOT LESS THAN 42" AFF OR MORE THAN 48" AFF (TO OPERATING HANDLE).
9. ALL CABLING SHALL BE INSTALLED IN CONDUIT.
10. REFER TO SHEET E-3-900 FOR FIRE ALARM SYSTEM RISER DIAGRAM.
11. ALL DATA RACKS, DATA CABLING, DATA OUTLETS, DATA JACKS, CABLE SUPPORTS, INSTALLATION AND TERMINATION SHALL BE INCLUDED IN THE PROJECT.

⬡ SHEET KEYNOTES:

1. FIRE ALARM CONTROL PANEL. PROVIDE DIGITAL DIALER WITH FIRE ALARM CONTROL PANEL. PROVIDE CAT 6A CABLE IN CONDUIT BETWEEN FIRE ALARM PANEL AND DIGITAL DIALER.
2. ADDRESSABLE FIRE ALARM MONITORING MODULES FOR FIRE PROTECTION RISER (TAMPER/FLOW SWITCHES). MODULES SHALL BE LOCATED WITHIN 3" OF DEVICE MONITORED. COORDINATE WITH FIRE PROTECTION CONTRACTOR FOR NUMBER AND LOCATIONS OF TAMPER AND FLOW SWITCHES.
3. PROVIDE CONNECTION TO FIRE PROTECTION SYSTEM WATER GONG. COORDINATE LOCATION WITH FIRE PROTECTION CONTRACTOR. PROVIDE CONDUIT/WIRING AS REQUIRED FOR CONNECTION TO FIRE ALARM CONTROL PANEL. PROVIDE 120V CONNECTION, IF REQUIRED.
4. PROVIDE 1-1/2" CONDUIT WITH FIRE CABLING TO FIRE PROTECTION VAULT, REFER TO LOCATION SHOWN ON C-0-107.
5. CONTRACTOR SHALL PROVIDE COMMUNICATIONS ROOM WITH 3/4" X 4' X 8' PLYWOOD, RIGIDLY ATTACHED TO WALL MOUNT VERTICALLY WITH TOP OF PLYWOOD AT 8'-0"AFF. PLYWOOD SHALL BE FIRE RATED AND TIA/EIA APPROVED.
6. TELECOMMUNICATIONS MAIN GROUNDING BUSBAR. (TMGB) - 1/4" X 4" X 16" (MIN) GROUND BAR. MOUNT TO WALL WITH NON-CONDUCTIVE MATERIAL.
7. COMMUNICATION SERVICE CONDUITS. PROVIDE ONE (1) 4" CONDUIT AND ONE (1) 2" CONDUIT. STUB UP INTO SECURITY ROOM 119 WITH LONG SWEEP RIGID STEEL ELBOWS.
8. PROVIDE DUCT SMOKE DETECTOR INSTALLED IN AIR DUCT FOR RTU. COORDINATE QUANTITIES AND PLACEMENT WITH LOCAL CODE REQUIREMENTS.
9. ADDRESSABLE FIRE ALARM CONTROL MODULE FOR DUCT SMOKE DETECTOR. PROVIDE FIRE ALARM SIGNALING LINE CIRCUIT (SLC WIRING) TO FIRE ALARM CONTROL PANEL. PROVIDE CONDUIT/WIRING TO HVAC UNIT CONTROLS FOR UNIT SHUTDOWN UPON ACTIVATION OF ASSOCIATED DUCT SMOKE DETECTOR. COORDINATE LOCATION WITH MECHANICAL CONTRACTOR.
10. ACCESS CONTROL SYSTEM PANEL
11. CARD READER. MOUNT AT 42" AFF (TO TOP OF DEVICE.)
12. SINGLE ACCESS DOOR HARDWARE. RFER TO SPECIFICATION SECTION 087100 FOR ADDITIONAL INFORMATION.
13. EQUIPMENT RACK LOCATION FOR BUILDING DATA SYSTEM.
14. FIRE ALARM REMOTE ANNUNCIATOR PANEL TO BE SEMI-FLUSH MOUNTED.
15. COMMUNICATION SERVICE CONDUITS. PROVIDE ONE (1) 4" CONDUIT WITH LONG SWEEP RIGID STEEL ELBOWS. REFER TO SHEET C-0-107 FOR CONTINUATION.
16. COMMUNICATION SERVICE CONDUITS. PROVIDE ONE (1) 2" CONDUIT WITH LONG SWEEP RIGID STEEL ELBOWS. REFER TO SHEET C-0-107 FOR CONTINUATION.
17. PROVIDE DATA PROVISIONS IN TELE-POWER POLE. REFER TO E-3-102 FOR ADDITIONAL REQUIREMENTS.
18. PROTECTIVE SERVICES CAMERA WITH ACCEPTANCE OF ALTERNATE #1, REFER TO E-1-105 FOR BASE BID LOCATION. PROVIDE EXTERIOR CAMERA, REFER TO CAMERA RISER ON E-1-902 FOR MOUNTING REQUIREMENTS AND ADDITIONAL INFORMATION.

JOB NUMBER:	19027
SCALE:	AS NOTED
DATE:	AUGUST 6, 2021
DRAWN BY:	KGM
DESIGNED BY:	KGM
CHECKED BY:	PJB
SHEET NO.	REVISION
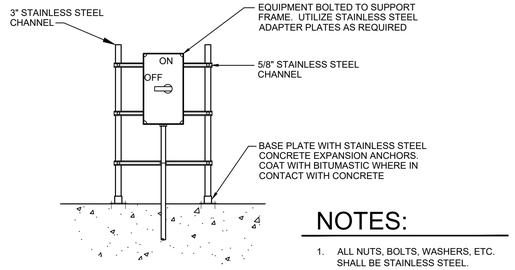
E-3-900	△

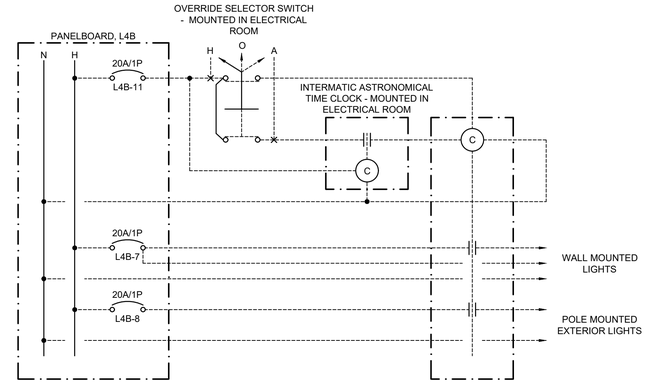


NOTES:

1. ROUGH-IN BOXES MAY BE MOUNTED IN ADJACENT STUD SPACE ONLY IF THE BOXES FACE THE SAME DIRECTION. BACK-TO-BACK BOXES MUST BE SEPARATED PER THIS DETAIL.
2. DO NOT PLACE BOXES BACK-TO-BACK EVEN IF SHOWN GRAPHICALLY ON DRAWINGS AS BACK-TO-BACK. BOXES SHALL BE INSTALLED SEPARATED PER THIS DETAIL. PROVIDE ADDITIONAL METAL FRAMING AS NECESSARY TO INSTALL BOXES SEPARATED AS INDICATED.
3. ELEC/SIGNAL BOXES WITH OPENING AREAS NOT EXCEEDING 16 SQUARE INCHES PLACED IN RATED WALLS FACING IN OPPOSITE DIRECTIONS SHALL BE SEPARATED A MINIMUM OF 24 INCHES. INSTALLATION SHALL BE IN ACCORDANCE WITH KENTUCKY BUILDING CODE SECTION 711.3.2 "MEMBRANE PENETRATIONS".

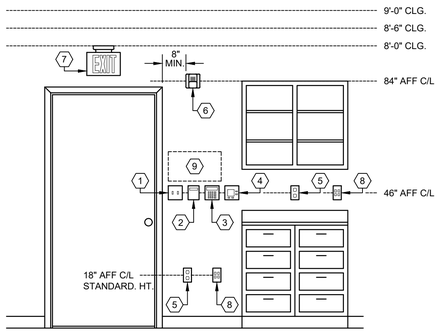
1 BACK-TO-BACK BOX MOUNTING DETAIL

NOT TO SCALE



NOTES:

1. ALL NUTS, BOLTS, WASHERS, ETC. SHALL BE STAINLESS STEEL.



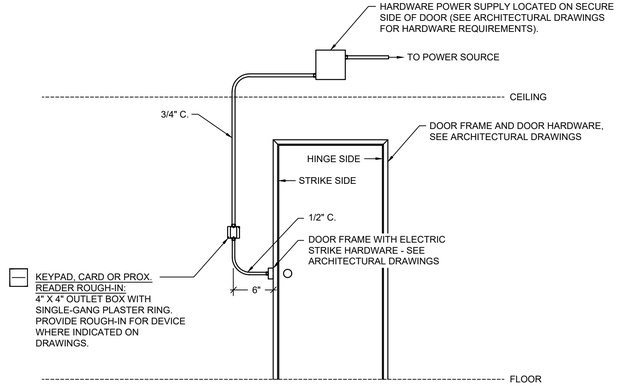
3 TYPICAL RACK MOUNTED ELECTRICAL EQUIPMENT

NOT TO SCALE

5 MAILROOM BLDG EXTERIOR LIGHTING CONTROL

NOT TO SCALE

SHEET KEYNOTES:



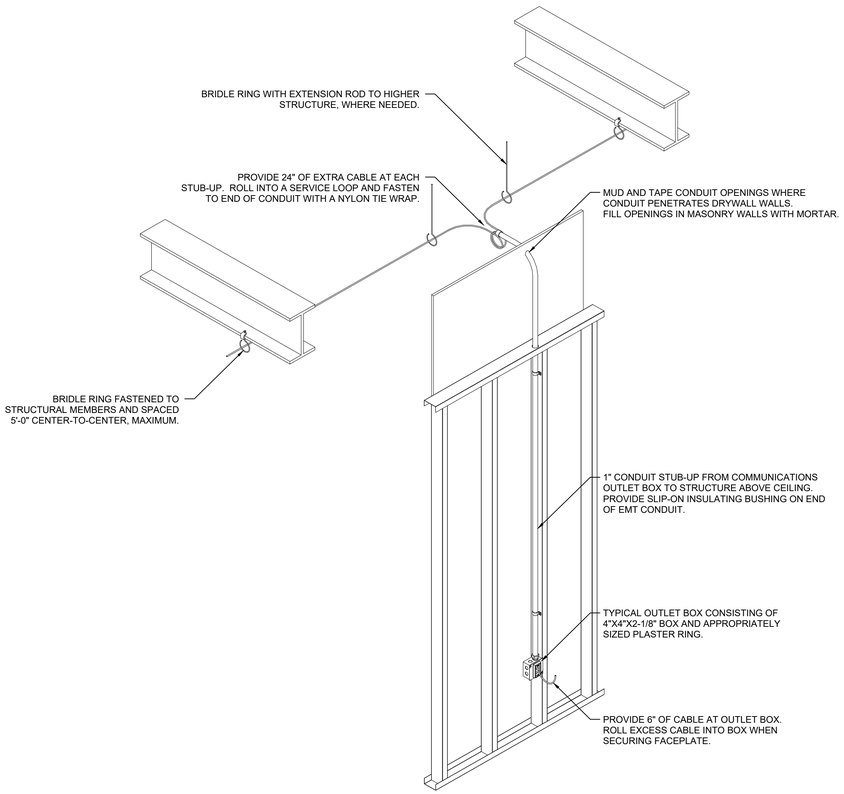
1. MOUNT EDGE OF LIGHTING CONTROL DEVICES CLOSEST TO DOOR AT A DISTANCE OF TWO INCHES FROM THE EDGE OF THE FACE PLATE TO THE DOOR FRAME INCLUDING ALL APPLIED TRIM UNLESS OTHERWISE NOTED. MOUNT REMAINING DEVICES IN THE FOLLOWING ORDER:

   A. FIRE ALARM INITIATION DEVICES.
   B. SECURITY/ACCESS CONTROL DEVICES.
   C. HVAC THERMOSTAT/HUMIDISTAT DEVICES.
   D. OTHER DEVICES.

   MOUNT THE EDGE OF DEVICE OR DEVICE FACE PLATES TWO INCHES APART. PROVIDE BLOCKING AS NECESSARY IN THE WALL OR PROVIDE MANUFACTURED SUPPORTS SIMILAR TO CADDY 'RB' SERIES OR EQUAL. ALL DEVICES TO BE MOUNTED WITH CENTER LINE AT HEIGHT INDICATED.
2. FIRE ALARM INITIATING DEVICE.
3. SECURITY/ACCESS CONTROL KEYPAD.
4. HVAC THERMOSTAT/HUMIDISTAT CONTROL DEVICE.
5. ABOVE COUNTER ELECTRICAL/COMMUNICATIONS DEVICE, COORDINATE MOUNTING HEIGHT WITH ARCHITECTURAL INTERIOR ELEVATIONS. SHOWN AT TYPICAL HEIGHT.
6. FIRE ALARM NOTIFICATION APPLIANCE.
7. INSTALL WALL MOUNTED EXIT SIGNS WITH BOTTOM EDGE OF SIGN APPROXIMATELY FOUR INCHES FROM TOP OF DOOR FRAME.
8. COMMUNICATIONS OUTLET.
9. WHEN SIGNAGE WITH TACTILE CHARACTERS ARE TO BE INSTALLED, THE BOTTOM OF TACTILE SIGNAGE SHALL BE MOUNTED AT 50" AFF MINIMUM WITH THE TOP MOUNTED AT A MAXIMUM OF 60" AFF. PROVIDE A CLEAR SPACE OF 18" IN FRONT OF SIGNAGE. ALL OTHER PROVISIONS AND SPACINGS REQUIRED BY A.D.A. SHALL BE FOLLOWED.

2 DEVICE MOUNTING COORDINATION DETAIL

NOT TO SCALE



GENERAL NOTES:

1. ALL CONDUIT SHALL BE CONCEALED IN WALLS AND ABOVE CEILING.
2. REFER TO THE DRAWINGS FOR LOCATION AND QUANTITY OF INTERCOM DEVICES, KEYPADS, PROXIMITY AND CARD READERS. ALL DEVICES AND CABLING SHALL BE PROVIDED AND INSTALLED BY OWNER.
3. THE CONTRACTOR SHALL COORDINATE RESPONSIBLITY AND LIMITS OF WORK WITH THE OWNER FOR ALL DEVICES, CONDUIT, WIRE AND OTHER ROUGH-IN WORK REQUIRED.
4. ALL ROUGH-IN FOR DEVICES SHALL BE LOCATED SUCH THAT OPERATING MECHANISM OF DEVICE MEETS THE AMERICAN DISABILITIES ACT. THE CONTRACTOR SHALL CONTACT THE OWNER FOR DEVICE SPECIFICATIONS.
5. IF WALL SPACE IS NOT AVAILABLE FOR INTERCOM, CARD OR PROXIMITY READER, BOXES MAY BE STACKED VERTICALLY WITH MOUNTING HEIGHTS REMAINING WITHIN ADA GUIDELINES.
6. PROVIDE NYLON PULL STRING IN EMPTY CONDUIT.

4 TYPICAL SECURE DOOR WITH ELECTRIC STRIKE DOOR HARDWARE

NOT TO SCALE

6 COMMUNICATIONS ROUGH-IN FOR LIGHT GAUGE FRAMING SYSTEMS

NOT TO SCALE

NOTES:

1. SELECT BOLT LENGTH TO PROVIDE A MINIMUM OF TWO EXPOSED THREADS.
2. BURNISH MOUNTING SURFACE TO REMOVE PAINTING IN THE AREA OF LUG CONTACT.
3. APPLY ANTI-OXIDANT COMPOUND TO MATING SURFACE OF LUG AND WIPE CLEAN EXCESS COMPOUND.
4. USE SOLID COPPER WIRE AND MECHANICAL 2-HOLE LUG FOR ALL EXTERIOR GROUNDING.

2000	9'-0"	9'-0"	5'-0"	16"
2500	9'-0"	9'-0"	5'-0"	16"

NOTES - TRANSFORMER PAD:

1. TRANSFORMER PAD WILL BE A SOLID BLOCK OF CONCRETE WITH DIMENSIONS AS SHOWN, REINFORCED WITH STEEL RODS OR EQUIVALENT, ALL OF WHICH SHALL BE TIED TOGETHER FOR A FIRM AND STRUCTURAL FOUNDATION. PAD SHALL BE POURED ENTIRELY ON SITE, USING CONCRETE OF 3000 P.S.I. STRENGTH (6 BAG MIX). TOP OUTSIDE EDGES OF PAD WILL HAVE 1/2" BEVEL, AND ALL SURFACES WILL BE TROWLED TO A SEMI-SMOOTH FINISH. POURING OR PLACING OF THE PAD WILL BE DONE AFTER THE NECESSARY CONDUITS ARE IN PLACE AND GROUND HAS BEEN MECHANICALLY TAMPED.
2. COORDINATE PAD DIMENSIONS WITH UTILITY COMPANY PRIOR TO FORMING AND MAKE NECESSARY MODIFICATIONS TO SUIT THE UTILITY.
3. CAP BOTH ENDS OF SPARE PRIMARY DUCT.
4. ANCHOR TRANSFORMER PAD WITH 3/8" DIAMETER STAINLESS STEEL ANCHOR BOLTS.
5. ALL GROUNDING CONNECTIONS EXTERNAL TO TRANSFORMER ENCLOSURE SHALL BE EXOTHERMICALLY WELDED.
6. DIMENSIONS ARE INTENDED TO BE 12" LARGER THAN TRANSFORMER IN BOTH DIRECTIONS.
7. DISCONNECT FACTORY Xo JUMPER TO TRANSFORMER ENCLOSURE.
8. MOUNT METER BASE AND CT CABINET ADJACENT TO THE TRANSFORMER - SEE DETAIL 4 THIS SHEET.
9. COORDINATE WITH AEP TO HAVE SERVICE INSTALLED IN COMPLIANCE WITH AEP REQUIREMENTS.

Terracon Project No. N2195065

Dear Mr. Bird:

We have completed the Geotechnical Engineering Services for the above referenced project. This study was performed in general accordance with Terracon Proposal No. PN2195065 dated August 27, 2019. This report presents the findings of the subsurface exploration and provides geotechnical recommendations concerning earthwork and the design and construction of foundations and floor slabs for the proposed project.

We appreciate the opportunity to be of service to you on this project. If you have any questions concerning this report, or if we may be of further service, please contact us.

Sincerely,
Terracon Consultants, Inc.

Geotechnical Engineering Report
East End Building
Washington Street E
Charleston, West Virginia
Terracon Project No. N2195065
July 23, 2020

INTRODUCTION

This report presents the results of our subsurface exploration and geotechnical engineering services performed for the proposed East End Building and pavement areas located at Washington Street E and Virginia Terrace in Charleston, West Virginia. The purpose of these services is to provide information and geotechnical engineering recommendations relative to:

- Subsurface soil conditions
- Groundwater conditions
- Site preparation and earthwork
- Excavation considerations
- Foundation design and construction
- Floor slab design and construction
- Seismic site classification per IBC
- Pavement construction

The geotechnical engineering scope of services for this project included the advancement of six (6) test borings. Three (3) borings, designated as B-1 through B-3, were located in the proposed building footprint and advanced to depths of approximately 58 to 65.1 feet below existing site grades. The three (3) remaining borings, designated as B-4 through B-6, were located in the various parking areas and advanced to a depth of approximately 11.5 feet below existing site grades.

Maps showing the site and boring locations are shown in the **Site Location** and **Exploration Plan** sections, respectively. The results of the laboratory testing performed on soil samples obtained from the site during the field exploration are included on the boring logs in the **Exploration Results** section of this report.

SITE CONDITIONS

The following description of site conditions is derived from our site visit in association with the field exploration and our review of publicly available geologic and topographic maps.

Item	Description
Parcel Information	The project is located at the east end of Charleston, Kanawha County, West Virginia. The approximate coordinates of the site location are Latitude 38.3376001, Longitude -81.6086985. See **Site Location Plan**
Existing Improvements	The proposed building is located north of Virginia Terrace in an existing DOH storage lot. The proposed pavement areas are located in existing empty lots east of Michigan Avenue and east of Jefferson Street.
Current Ground Cover	Gravel lots, storage buildings and parking areas
Existing Topography	The existing site is relatively level.
Geology	A review of geologic literature indicates that the project site is located within the Quarternary Alluvium group which consists of sand, gravel, silt and clay deposits.

PROJECT DESCRIPTION

Our initial understanding of the project was provided in our proposal and was discussed in the project planning stage. A period of collaboration has transpired since the project was initiated, and our final understanding of the project conditions is as follows:

Item	Description
Information Provided	Information was provided by Joseph Bird of Chapman Technical Group on August 14, 2019 and subsequent communication.
Project Description	The project consists of a proposed building and adjacent parking areas.
Finished Floor Elevation	Not provided at report writing.
Maximum Loads	Not Provided. Anticipated light loads due to the type of structure.
Grading/Slopes	Minor grading anticipated
Estimated Start of Construction	Not provided.

GEOTECHNICAL CHARACTERIZATION

Subsurface Profile

Six (6) geotechnical test borings were extended to depths of approximately 11.5 to 65.1 feet below the existing ground surface. Based on the results of the borings, subsurface conditions on the project site can be generalized as follows:

Stratum	Approximate Depth to Bottom of Stratum (feet)	Material Description	Consistency/Density
Surface	0.2 to 0.5	Gravel, aggregate base	Not applicable
Fill	5 to 15	Poorly graded sand with gravel, silty gravel with sand, silty sand with gravel, lean clay, lean clay with sand	Not applicable
Native Cohesive Soils [1, 2]	11.5 to 55	Lean clay, lean clay with sand, sandy lean clay, sandy lean clay with gravel, silty clay, sandy silty clay	Very soft to very stiff
Native Granular Soils[2]	35 to 48	Clayey sand, silty sand, silty sand with gravel	Loose to very dense
Bedrock	Undetermined	Sandstone, shale, silty shale, claystone	Weak to medium strong

1. Borings B-4, B-5, and B-6 were terminated in this stratum
2. Borings B-1, B-2, and B-3 encountered alternating layers of native cohesive and native granular soils above bedrock

Conditions encountered at each boring location are indicated on the individual boring logs shown in the **Exploration Results** section and are attached to this report. Stratification boundaries on the boring logs represent the approximate location of changes in native soil types; in situ, the transition between materials may be gradual.

Groundwater Conditions

The boreholes were observed while drilling and after completion for the presence and level of groundwater. Groundwater was encountered at various depths across the site ranging from approximately 2.5 to 26 feet below the existing ground surface. Groundwater was not encountered in boring B-4.

Groundwater level fluctuations occur due to seasonal variations in the amount of rainfall, runoff, river level and other factors not evident at the time the borings were performed. Therefore, groundwater levels during construction or at other times in the life of the structure may be higher or lower than the levels indicated on the boring logs. The possibility of groundwater level fluctuations should be considered when developing the design and construction plans for the project.

GEOTECHNICAL OVERVIEW

The test borings performed for this project site encountered fill material generally comprised of poorly graded sand with gravel, lean clay with sand, lean clay, silty gravel with sand, and silty sand with gravel to approximate depths ranging from 5 to 15 feet below the existing ground surface. This fill material was underlain by alternating layers of native cohesive soils which generally consisted of very soft to very stiff lean clay with varying amounts of sand, silt and gravel and loose to very dense sand with varying amounts of clay, silt and gravel. These native soils were underlain by alternating layers of slightly to moderately weathered, weak to medium strong sandstone and shale. Bedrock was encountered at depths ranging from approximately 40 to 55 feet below the existing ground surface in Borings B-1, B-2, and B-3. Borings B-4, B-5, and B-6 were terminated in native cohesive soil and did not encounter any native granular soils.

Information concerning the construction of the fill, such as method of placement and compaction was not available, thus the fill is considered to be an undocumented fill. Foundations and floor slabs supported on man-placed, undocumented or uncontrolled fill have inherent risk of differential settlement due to the variability in composition and quality of the fill. This settlement response can create distress (e.g., cracking) in foundations, floor slabs and other elements of the building structure.

Due to the potential for adverse settlement response of the deep undocumented fill, we do not recommend that the building be supported on shallow foundations. The building can be supported on a deep foundation system consisting of either drilled shafts or auger-cast piles bearing within competent soils consisting of at least medium dense sand or very stiff clay; or bedrock. Based on the borings B-1, B-2 and B-3 the competent soil stratum was first encountered at depths varying from about 30 to 35 feet below the existing ground surface. Shafts or auger-cast piles extended into bedrock can be designed to achieve high capacities.

Provided the owner is willing to accept the risk associated with construction on undocumented fill, the floor slab can be designed as a slab-on-grade floor provided the earthwork recommendations presented in this report are followed. In this case, the earthwork for the floor slab preparation includes undercutting a minimum of 3 feet of the undocumented fill within the building footprint and 10 feet beyond the footprint. We then recommend that the undercut excavation be backfilled with engineered fill to establish floor slab subgrade elevation. In lieu of an undercut and replacement scheme for a slab-on-grade, a structural slab can be used. The structural slab provides the least risk for potential distress to slab due to the uncontrolled fill. Foundation design recommendations for drilled shafts or auger-cast piles to support the proposed building are presented in the **Deep Foundations** section.

Groundwater was encountered at various depths across the site ranging from approximately 2.5 to 26 feet below the existing ground surface. Groundwater levels fluctuate over time and should be

evaluated at the time of construction. In our experience, seepage from perched zones in shallow excavations above the groundwater table can generally be controlled by sump and pump methods; however, seepage and groundwater infiltration into excavation below the groundwater table will need more robust dewatering measures. Groundwater should be lowered to a depth of at least 2 feet below the proposed bottom of excavations. The contractor is responsible for employing appropriate dewatering methods to control seepage and facilitate construction.

The 2012 International Building Code (IBC) seismic site classification for this site is D.

The **General Comments** section provides an understanding of the report limitations.

EARTHWORK

Earthwork will include clearing and grubbing, excavations and fill placement. The following sections provide recommendations for use in the preparation of specifications for the work. Recommendations include critical quality criteria as necessary to render the site in the state considered in our geotechnical engineering evaluation for foundations and floor slabs.

Site Preparation

As an initial measure of site preparation, any vegetation and root mats or any deleterious material (e.g. existing pavement, debris, desiccated soil, frozen soil, etc.) should be completely stripped to expose the underlying soil subgrade within and at least 5 feet beyond areas that will receive fill or support the proposed addition. Stripped materials consisting of vegetation and organic materials, if encountered, should be wasted off site, or used to vegetate landscaped areas after completion of grading operations. Stripping depths between our boring locations and across the site could vary considerably. We recommend actual stripping depths be evaluated by a representative of Terracon during construction to aid in preventing removal of excess material.

Removal and/or relocation of any “to be abandoned” utilities, should be performed prior to rough site grading activities. We would anticipate removal and relocation, or re-routing, of any existing utilities which currently exist within the footprint of the proposed development area that would interfere with new construction. Any abandoned underground pipes left in place should be fully grouted. Excavations created due to utility relocations or removal should be backfilled with engineered fill material, placed and compacted in accordance with the recommendations provided in the following paragraphs, or with lean concrete or flowable fill. If lean concrete is used as backfill, the contractor should refer to all of the new build Mechanical-Electrical-Plumbing (MEP) and foundation drawings to confirm that the concrete backfill materials will not conflict with any new item installations or construction.

Any remnant foundations or structures from prior site development encountered should be completely removed and the associated excavations backfilled with engineered structural fill.

After completing these operations, and performing undercutting of the existing fill, cohesive soils exposed at the bottom of the excavation subgrade should be thoroughly proofrolled (under the observation of Terracon personnel) with a loaded tandem-axle dump truck or other heavy, rubber-tired construction equipment weighing at least 20 tons to locate any zones that are soft or unstable. Exposed granular soils should be proofrolled with a heavy vibratory roller having at least 8 tons load on the drum. Proofrolling aids in providing a firm base for compaction of fill and helps delineate soft or disturbed areas. Areas where soft, low density, wet, dry or otherwise unsuitable materials are located should be repaired by scarification/moisture conditioning/compaction or by removing and replacing the materials with controlled structural fill.

The exposed subgrade where excessive rutting or pumping occurs during proofrolling should be removed and replaced or aerated/reworked and recompacted in place to our recommendations for engineered fill. Other structural areas should be backfilled with engineered fill conforming to the material and compaction recommendations in this report.

Fill Material Types

Engineered fill should meet the following material property requirements:

Fill Type [1]	USCS Classification	Acceptable Location for Placement
Lean clay [2]	CL (LL<40)	All locations and elevations.
Well graded granular	SW, GW [3]	All locations and elevations.
Low Volume Change Material [4]	CL (LL<40 & 5<PI<20) or SW, GW	All locations and elevations.
On-Site Soils	CL, CL-ML, SM, SC	The native and fill on-site soils generally appear suitable for use as engineered fill; however, any fill placed should meet the low volume change requirements and be free of deleterious materials such as organics, rubble and construction debris. The maximum particle size should be limited to 4 inches to allow for placement of compacted soil lifts. Oversized particles should be culled from the fill. Moisture conditioning of the existing on-site soils may also be required prior to its use as engineered fill. Silt (ML) should not be used as engineered fill within 2.5 feet of final grades due to frost heave and workability concerns.

Fill Type [1]	USCS Classification	Acceptable Location for Placement

1. Controlled, compacted fill should consist of approved materials that are free of organic matter and debris. Frozen material should not be used, and fill should not be placed on a frozen subgrade. A sample of each material type should be submitted to the geotechnical engineer for evaluation.
2. Delineation of lean clays and fat clays should be performed in the field by a qualified geotechnical engineer or their representative and could require additional laboratory testing. Fat clays should not be used as engineered fill.
3. Crushed limestone aggregate, limestone screenings, or granular material such as sand, gravel or crushed stone.
4. Low volume change cohesive soil or granular soil.

Fill Compaction Requirements

Engineered fill should meet the following compaction requirements:

Item	Description
Fill Lift Thickness	8 inches or less in loose thickness when heavy, self-propelled compaction equipment is used or 4 inches in loose thickness when hand-guided equipment (i.e. jumping jack or plate compactor) is used
Compaction Requirements [1,3]	Minimum 98% of the material's maximum standard Proctor dry density (ASTM D698).
Moisture Content of Cohesive Soils (Low Plasticity)	Within -2% to +3% of the optimum moisture content value as determined by the standard Proctor test at the time of placement and compaction
Moisture Content of Granular Material [2]	Workable moisture levels

1. The moisture content and compaction should be measured for each lift of engineered fill during placement. Should the results of the in-place density tests indicate the specified moisture or compaction limits have not been met, the area represented by the test should be reworked and retested as required until the specified moisture and compaction requirements are achieved. The zone of fill compacted to meet this criteria should extend at least 5 feet horizontally beyond the structure footprint.
2. Specifically, moisture levels should be maintained low enough to allow for satisfactory compaction to be achieved without the cohesionless fill material pumping when proofrolled.
3. All materials to be used as engineered fill should be tested in the laboratory to determine their suitability and compaction characteristics.

Utility Trench Backfill

Utility trenches are a common source of water infiltration and migration. All utility trenches that penetrate beneath the structures should be effectively sealed to restrict water intrusion and flow through the trenches that could migrate below the structure. We recommend constructing an effective "trench plug" that extends at least 5 feet out from the face of the structure exterior. The plug material should consist of cementitious "flowable fill" or impervious clay. The trench plug material should be placed to surround the utility line. If used, the clay trench plug material should be placed and compacted to comply with the moisture content and compaction recommendations for areal fill stated previously in this report.

Compaction requirements for bedding and backfilling around utilities may need to be adjusted to the pipe material type and the pipe manufacturer's bedding and backfill material recommendations. If utility trenches in unpaved areas are backfilled with relatively clean granular material, they should be capped with at least 18 inches of cohesive fill to reduce the infiltration and conveyance of surface water through the trench backfill.

Grading and Drainage

All grades must provide effective drainage away from the structure during and after construction. Water permitted to pond next to the building addition can result in greater soil movements than those discussed in this report. These greater movements can result in unacceptable differential movements, cracked slabs, and roof leaks. Estimated movements described in this report are based on effective drainage for the life of the structure and cannot be relied upon if effective drainage is not maintained. The roof should have gutters/drains with downspouts that discharge onto splash blocks at a distance of at least 10 feet from the structure.

Exposed ground should be sloped and maintained at a minimum 10 percent away from the structures for at least 10 feet beyond the perimeter. After structure construction and landscaping, we recommend verifying final grades to document that effective drainage has been achieved. Grades around the structure should also be periodically inspected and adjusted as necessary, as part of the structure's maintenance program. Where paving or flatwork abuts the structure, we recommend a maintenance program to effectively seal and maintain joints to prevent surface water infiltration.

Earthwork Construction Considerations

It is anticipated that shallow excavations for the proposed construction can be accomplished with conventional earthmoving equipment. Upon completion of filling and grading, care should be taken to maintain the subgrade moisture content prior to construction of foundations. Construction traffic over the completed subgrade should be avoided to the extent practical. The site should also be graded to prevent ponding of surface water on the prepared subgrades or in excavations.

If the subgrade should become frozen, desiccated, saturated, or disturbed, the affected material should be removed or these materials should be scarified, moisture conditioned, and recompacted prior to foundation construction and observed by Terracon.

Surface water should not be allowed to pond on the site and soak into the soil during construction. Construction staging should provide drainage of surface water and precipitation away from the structure areas. Any water that collects over or adjacent to construction areas should be promptly removed, along with any softened or disturbed soils. Surface water control in the form of sloping surfaces, drainage ditches and trenches, and sump pits and pumps will be important to avoid ponding and associated delays due to precipitation and seepage.

As a minimum, excavations should be performed in accordance with OSHA 29 CFR, Part 1926, Subpart P, “Excavations” and its appendices, and in accordance with any applicable local, state, and federal safety regulations. The contractor should be aware that slope height, slope inclination, and excavation depth should in no instance exceed those specified by these safety regulations. Flatter slopes than those dictated by these regulations may be required depending upon the soil conditions encountered and other external factors. These regulations are strictly enforced and if they are not followed, the owner, contractor, and/or earthwork and utility subcontractor could be liable and subject to substantial penalties.

Construction site safety is the sole responsibility of the contractor who controls the means, methods and sequencing of construction operations. Under no circumstances shall the information provided herein be interpreted to mean that Terracon is assuming any responsibility for construction site safety or the contractor's activities; such responsibility shall neither be implied nor inferred.

Terracon should be retained during the construction phase of the project to observe earthwork and to perform necessary tests and observations during subgrade preparation; proofrolling; placement and compaction of controlled compacted fills; backfilling of excavations into the completed subgrade, and just prior to construction of structure foundations.

FLOOR SLABS

Design parameters for floor slabs of the proposed building structure assume that the requirements for **Site Preparation** have been followed. Specific attention should be given to positive drainage away from the structure. This also includes the positive drainage of the aggregate base beneath the floor slab.

Floor Slab Design Parameters

Item	Description
Floor slab support [1]	Minimum 18-inch low volume change zone and special subgrade preparation is required
Estimated modulus of subgrade reaction	110 pounds per square inch per inch (psi/in) for point loading conditions
Aggregate base course/capillary break [2]	Minimum 4 inches of free draining granular material

1. Floor slabs should be structurally independent of any building footings or walls to reduce the possibility of floor slab cracking caused by differential movement between the slab and foundation. Narrower, turned-down slab-on-grade foundations may be utilized at the approval of the structural engineer. The slabs should be appropriately reinforced to support the proposed loads. We recommend subgrades be maintained in a relatively moist condition until floor slabs are constructed. If the subgrade should become desiccated prior to construction of floor slabs, the affected material should be removed or the materials scarified, moistened, and recompacted. Upon completion of grading operations in the building areas, care should be taken to maintain the recommended subgrade moisture content and density until construction of the building floor slabs.
2. The floor slab design should include a capillary break, comprised of free-draining, compacted, granular material at least 4 inches thick and can be considered as part of the low volume change zone. Free-draining granular material should have less than 5 percent fines (material passing the #200 sieve). Other design considerations such as cold temperatures and condensation development could warrant more extensive design provisions.

Where appropriate, saw-cut control joints should be placed in the slab to help control the location and extent of cracking. For additional recommendations refer to the ACI Design Manual. Joints or any cracks that develop should be sealed with a water-proof, non-extruding compressible compound specifically recommended for heavy duty concrete pavement and wet environments.

The use of a vapor retarder should be considered beneath concrete slabs on grade that will be covered with wood, tile, carpet or other moisture sensitive or impervious coverings, or when the slab will support equipment sensitive to moisture. When conditions warrant the use of a vapor retarder, the slab designer should refer to ACI 302 and/or ACI 360 for procedures and cautions regarding the use and placement of a vapor retarder.

Floor Slab Construction Considerations

Finished subgrade within and for at least 10 feet beyond the floor slab should be protected from traffic, rutting, or other disturbance and maintained in a relatively moist condition until floor slabs are constructed. If the subgrade should become damaged or desiccated prior to construction of floor slabs, the affected material should be removed and engineered fill should be added to replace the

resulting excavation. Final conditioning of the finished subgrade should be performed immediately prior to placement of the floor slab support course.

The Geotechnical Engineer should approve the condition of the floor slab subgrades immediately prior to placement of the floor slab support course, reinforcing steel and concrete. Attention should be paid to high traffic areas that were rutted and disturbed earlier, and to areas where backfilled trenches are located.

DEEP FOUNDATIONS

Drilled Shaft Foundations

We understand that the proposed building may be supported on drilled shaft foundation elements. We recommend a minimum shaft diameter of 24 inches. Based on our subsurface findings at this project site, it is recommended that the drilled shafts should bear within the competent soil stratum was first encountered at depths varying from about 30 to 35 feet below the existing ground surface, or bedrock. The following table provides the approximate top of the competent soil statum and the top of bedrock based on borings B-1, B-2 and B-3 drilled for project.

Boring No.	Approximate Top of Competent Soil Statum (feet - below existing ground surface)	Approximate Top of Bedrock (feet - below existing ground surface)
B-1	30	40
B-2	35	55
B-3	31	40

To achieve reliable end bearing capacity, drill shafts should be extended at least 2 shaft diameters into the competent soil stratum. Shafts designed to bear within bedrock should be extended at least 1 shaft diameter into the bedrock stratum.

It is recommended that the drilled shaft design should incorporate a factor of safety of 3.0 for end bearing and 2.5 for side resistance, respectively, when subjected to axial compression. A factor of safety of 3.0 is recommended for side resistance against uplift.

Soil and rock parameters for lateral design are presented below.

Drilled Shaft Construction Considerations

The following construction considerations during drilled shaft installation should be followed:

- It is anticipated that drilled shafts will need to be constructed by using the slurry-displacement method (due to the presence of groundwater and granular soils). Temporary casing should be made available during the drilled shaft construction process. If casing is permanently left in place due to soil and groundwater conditions, the annulus between the casing and the surrounding soil should be pressure grouted.

- The actual bearing elevation at each drilled shaft location should be determined in the field during construction through inspection by an authorized representative of the geotechnical engineer.

- If effective dewatering is not practical, concrete should be placed at the bottom of the excavation by pumping or by using a tremie pipe.

- To facilitate the drilled shaft construction, concrete should be on-site and ready for placement as pier excavations are completed.

- It is recommended that no completed drilled shaft holes be left open overnight without being filled with concrete.

The drilled shaft installation process should be performed under the direction of the Geotechnical Engineer. The Geotechnical Engineer should document the shaft installation process including soil/rock and groundwater conditions encountered, consistency with expected conditions, and details of the installed shaft.

Soil and Rock Parameters for Axial Design of Drilled Shafts

Soil and rock parameters for analysis and design of drilled shafts to support axial loading using the computer program SHAFT (version 2012) for all borings have been developed. Parameters provided below do not include factors for safety. Factor of safety values recommended in the previous section should be incorporated in the drilled shaft design. Detail are presented below.
As indicated before, if the new fill is placed after construction of the drilled shafts, negative skin friction will cause downdrag forces on the shafts. The downdrag forces generally act to a depth of about 70 percent of the overburden depth. Therefore, we recommend that downdrag forces to this depth be considered in the design of the drilled shafts.

Test Boring Number: B-1

Soil Layer Number	Soil Type	Depth to Bottom of Layer[1] (feet)	Total Unit Weight (pcf)	Un-drained Shear Strength (psf)	Adhesion Factor	Friction Angle (degrees)	Horizontal Stress Coefficient	Bearing Capacity Factor N_c	Bearing Capacity Factor N_q

Groundwater encountered at 26 feet while drilling.

Rock Type	Depth to Bottom of Layer[1,3] (feet)	Rock Compressive Strength (psi)	Elastic Modulus (psi)	Discontinuity Spacing (feet)	Discontinuity Thickness (feet)	RQD (%)
Weak rock (Shale)	53.3	1,000	1,700	2	0.1	57
Strong rock (Sandstone)	58	4,475	100,000	2	0.1	67

Notes:

1. Depth referenced to existing ground surface.
2. The side resistance of the uppermost 2 feet of the soil should be ignored due to the potential for disturbance caused during the drilled shaft construction operation.
3. Rock coring may be required to achieve the minimum length of drill shafts during shaft installation.

Soil and Rock Parameters and Models for Lateral Load Analyses of Drilled Shafts

Soil and rock parameters for detailed lateral load analyses of drilled shaft foundation using the computer program LPILE (version 2012.6.37) have also been developed. Details are presented below.

Test Boring Number: B-1

Soil Layer Number	Soil Model	Depth to Top of Soil Layer[1] (feet)	Depth to Bottom of Soil Layer (feet)	Effective Unit Weight (pcf)	Friction Angle (degrees)	k value (pci)	Un-drained cohesion (psf)	Strain Factor (ε50)
1[2]	Sand (Fill modeled as sand)	0	5	48	28	20	--	--
2	Clay (Fill modeled as clay)	5	10	60	--	20	250	0.025

Notes:

1. Depth referenced to existing ground surface.
2. The side resistance of the uppermost 3 feet of the soil should be ignored due to the potential for disturbance caused during the drilled shaft construction operation

Auger Cast Pile Foundations

Recommendations for the design and construction of Auger Cast Pile (ACIP) piles are provided in the following paragraphs.

We recommend that the ACIP be extended to bear in native granular soil of at least dense relative density, native cohesive soil of at least stiff consistency, or on bedrock at or below about elevation 572 feet. We recommend that the following criteria be used in the design of the ACIP foundation system.

- We have evaluated 16 and 18-inch diameter auger cast piles for capacity. The table below depicts the ACIP diameters, maximum pile tip elevations, allowable compressive capacities and uplift capacities.

Pile Diameter (in)	Maximum Pile Tip Elevation (ft)[1]	Compressive Capacity (kips)	Uplift Capacity (kips)
16	568	35	15
	560	45	22
	556	55	29
	551	65	35
	549	75	40
18	572	35	10
	568	45	18
	561	55	24
	558	65	31
	554	75	40
	551	85	44

1. Elevations are estimated and referenced surface elevations obtained from Google Earth

- The International Building Code (IBC) limits compression capacity to 30 percent of the 28-day specified grout compressive strength. We recommend using at least 4,000-psi grout. Using this value and pile diameters listed in the table above, the maximum allowable pile capacity computed using this IBC criterion exceeds the allowable design capacities presented in the table. If additional axial compressive capacity is required, the piles could be extended to Shale bedrock with allowable capacities of 200 kips for a 16-inch diameter pile, or 300 kips for an 18-inch diameter pile. Alternating layers of shale and sandstone bedrock were encountered at estimated elevations of about 545 to 549 feet in Borings B-1, B-2 and B-3.

- The project drawings should indicate the estimated pile tip elevations. The drawings should indicate that these tip elevations are approximate, and variations may occur. However, if variations occur by more than 5 feet, the engineer should be notified immediately for evaluation.

- The specifications should require that the total grout volume in each pile be at least 120 percent of the theoretical “neat” pile volume.

Pile load tests should be performed to confirm pile capacities in accordance with IBC requirements. We are available to assist in determination of the number of pile load tests, loading sequences and locations as the project scope develops.

Auger Cast Pile Construction Considerations

We recommend that the following criteria be used in the construction of the auger cast pile foundation system.

- We recommend that a steel reinforcing bar should be included per structural design requirements, even if lateral load resistance is not required. We recommend that this bar be full-length of the pile and be at least No. 8 bar or larger, centered within the pile. Other reinforcing within the upper section of the pile may also be required for structural considerations.

- Proper installation of ACIPs is highly operator dependent and requires a greater than average dependence on quality workmanship and quality control monitoring. In addition, the successful completion of ACIPs largely depend on the equipment and installation procedures. The auger should be withdrawn in a controlled manner and a sufficient head of grout should always be maintained in the augers, to prevent necking of fluid grout due to hydrostatic pressures.

- If practical drilling refusal is experienced above the anticipated bedrock depth, then a boulder or other obstruction may be present, and a replacement pile should be installed. If this occurs, the situation should be evaluated by the Geotechnical Engineer and the Structural Engineer during the pile driving operations. Continued “hard” drilling to attempt to extend through an obstruction should not be performed, due to the possibility of excessive soil removal.

- The ACIP installation process should be performed under the direction of the Geotechnical Engineer. The Geotechnical Engineer should document the pile installation process including soil/rock and groundwater conditions encountered, consistency with expected conditions, and details of the installed pile.

- Installation of adjacent piles with a clear distance spacing of less than 6 pile diameters should be delayed until grout in the initial pile has set. This is required to avoid possible grout intrusion between the piles, which could jeopardize pile integrity. Piles should be spaced no closer than 3 diameters, center to center.

- A bottom discharge bit should be used (specified) in lieu of a side discharge bit. With this type of bit, centralizers should not be needed for placement of the center bar. The hole in the bottom of the bit should be closed while the auger is advanced. The plug should be removed by the rebar placement prior to grouting.

PAVEMENTS

General Pavement Comments

Pavement designs are provided for the traffic conditions and pavement life conditions as noted in **Project Description** and in the following sections of this report. A critical aspect of pavement performance is site preparation. Pavement designs noted in this section must be applied to the site which has been prepared as recommended in the **Earthwork** section.

Support characteristics of subgrade for pavement design do not account for shrink/swell movements of an expansive clay subgrade, such as soils encountered on this project. Thus, the pavement may be adequate from a structural standpoint, yet still experience cracking and deformation due to shrink/swell related movement of the subgrade.

Pavement Design Parameters

Provided the existing soils and/or new structural fill are tested, evaluated and prepared in accordance with the recommendations provided in this report, these materials should provide suitable pavement support. The subgrade materials within the proposed pavement areas should consist of soils of at least medium stiff consistency or medium dense relative density.

Pavement design criteria were not provided to us; therefore, we have provided typical pavement sections based on our experience with similar projects. The thickness of each course is a function of subgrade strength, traffic, design life, serviceability factors, and frost susceptibility. The recommended minimum pavement sections offered in this report have been based on the following design assumptions:

- 11,279 18-kip Equivalent Single Axle Loads (ESALs) for light-duty parking areas (1.54 ESALS per day)
- 30,576 18-kip Equivalent Single Axle Loads (ESALs) for heavy-duty driveways and truck access lanes (4.20 ESALs per day)
- Design life of 20 years
- Subgrade soils have a minimum CBR value of 3. It is recommended that this CBR value be confirmed prior to construction of the pavement.

Based on these design assumptions, the pavement sections listed on the following table are recommended minimum thicknesses.

Pavement Section Thickness (inches)						
Traffic Area	**Alternative**	**Asphalt Concrete Surface Course**	**Asphalt Concrete Base Course**	**Portland Cement Concrete [1]**	**Aggregate Base Course [2]**	**Total Thickness**
Light Duty (Car Parking)	PCC	--	--	5.0	4.0	9.0
	AC	1.5	2.5	--	6.0	10.0
Heavy Duty (Drive Areas)	PCC	--	--	6.0	4.0	10.0
	AC	1.5	3.5	--	6.0	11.0
Trash Container Pad [3]	PCC	--	--	8.0	4.0	12.0

1. 4,000 psi at 28 days. PCC pavements are recommended for trash container pads and in any other areas subjected to heavy wheel loads and/or turning traffic.
2. Crushed limestone base material
3. The trash container pad should be large enough to support the container and the tipping axle of the collection truck.

The design approach used to determine the asphalt pavement thicknesses presented in the table was based on the National Asphalt Pavement Association (NAPA), which is specific to low-volume pavements. Portland Cement Concrete (PCC) pavement thicknesses were based on the American Concrete Institute (ACI) design recommendations. The above sections represent minimum thicknesses and, as such, periodic maintenance should be anticipated.

For concrete pavement, proper joint spacing will also be required to reduce the potentials of excessive slab curling and shrinkage cracking. All joints should be sealed to prevent entry of foreign material and dowelled where necessary for load transfer. Refer to ACI 330 “Guide for Design and Construction of Concrete Parking Lots” for additional information.

Pavement Drainage

Pavements should be sloped to provide rapid drainage of surface water. Water allowed to pond on or adjacent to the pavements could saturate the subgrade and contribute to premature pavement deterioration. In addition, the pavement subgrade should be graded to provide positive drainage within the granular base section. Appropriate sub-drainage or connection to a suitable daylight outlet should be provided to remove water from the granular subbase.

Based on the possibility of shallow and/or perched groundwater, we recommend installing a pavement subdrain system to control groundwater, improve stability, and improve long-term pavement performance.

Due to frost-susceptible soils and the possibility of perched groundwater, consideration should be given to installing a pavement subdrain system to control subgrade moisture, improve stability, and improve long-term pavement performance.

We recommend at least 6 inches of free-draining granular material be placed beneath the pavements. The use of a free draining granular base will also reduce the potential for frost action. We recommend pavement subgrades be crowned at least 2% to promote the flow of water towards the subdrains, and to reduce the potential for ponding of water on the subgrade. The design recommendations for the subdrains are provided in the following table:

Subdrain Design Recommendations	
Item	**Value**
Free Draining Granular Base Thickness below Pavement	6 inches of material meeting No. 57 aggregate specifications
Minimum Drain Pipe Diameter	4 inches
Drain Trench Width	16 inches or greater to provide minimum 6-inch annulus of drainage aggregate around drain pipe.
Invert Depth below Subgrade Elevation	3½ feet
Maximum Drain Pipe Spacing	50 feet
Subdrain Trench Backfill Material	No. 57 aggregate or ¾-inch aggregate

The subdrains should be hydraulically connected to the free-draining granular base layer. Subdrains should be sloped to provide positive gravity drainage to reliable discharge points. Periodic maintenance of subdrains is required for long-term proper performance.

Pavement Maintenance

The pavement sections represent minimum recommended thicknesses and, as such, periodic maintenance should be anticipated. Therefore, preventive maintenance should be planned and provided for through an on-going pavement management program. Maintenance activities are intended to slow the rate of pavement deterioration and to preserve the pavement investment. Maintenance consists of both localized maintenance (e.g., crack and joint sealing and patching) and global maintenance (e.g., surface sealing). Preventive maintenance is usually the priority when implementing a pavement maintenance program. Additional engineering observation is recommended to determine the type and extent of a cost-effective program. Even with periodic maintenance, some movements and related cracking may still occur and repairs may be required. Pavement performance is affected by its surroundings. In addition to providing preventive maintenance, the civil engineer should consider the following recommendations in the design and layout of pavements:

- Final grade adjacent to paved areas should slope down from the edges at a minimum 2%.

- Subgrade and pavement surfaces should have a minimum 2% slope to promote proper surface drainage.
- Install below pavement drainage systems surrounding areas anticipated for frequent wetting.
- Install joint sealant and seal cracks immediately.
- Seal all landscaped areas in or adjacent to pavements to reduce moisture migration to subgrade soils.
- Place compacted, low permeability backfill against the exterior side of curb and gutter.
- Place curb, gutter and/or sidewalk directly on clay subgrade soils rather than on unbound granular base course materials.

SEISMIC CONSIDERATIONS

The seismic design requirements for buildings and other structures are based on Seismic Design Category. Site Classification is required to determine the Seismic Design Category for a structure. The Site Classification is based on the upper 100 feet of the site profile defined by a weighted average value of either shear wave velocity, standard penetration resistance, or undrained shear strength in accordance with Section 20.4 of ASCE 7 and the International Building Code (IBC). Based on the soil properties encountered at the site and as described on the exploration logs and results, it is our professional opinion that the **Seismic Site Classification is D**. Subsurface explorations at this site were extended to a maximum depth of 65.1 feet. Subsurface conditions at the boring termination depth were assumed to continue to depths of 100 feet for the purpose of the seismic analysis. Additional deeper borings or geophysical testing may be performed to confirm the conditions below the current boring depth.

GENERAL COMMENTS

As the project progresses, we address assumptions by incorporating information provided by the design team, if any. Revised project information that reflects actual conditions important to our services is reflected in the final report. The design team should collaborate with Terracon to confirm these assumptions and to prepare the final design plans and specifications. This facilitates the incorporation of our opinions related to implementation of our geotechnical recommendations. Any information conveyed prior to the final report is for informational purposes only and should not be considered or used for decision-making purposes.

Our analysis and opinions are based upon our understanding of the project, the geotechnical conditions in the area, and the data obtained from our site exploration. Natural variations will occur between exploration point locations or due to the modifying effects of construction or weather. The nature and extent of such variations may not become evident until during or after construction. Terracon should be retained as the Geotechnical Engineer, where noted in the final report, to provide observation and testing services during pertinent construction phases. If variations appear, we can provide further evaluation and supplemental recommendations. If variations are

noted in the absence of our observation and testing services on-site, we should be immediately notified so that we can provide evaluation and supplemental recommendations.

Our scope of services does not include either specifically or by implication any environmental or biological (e.g., mold, fungi, bacteria) assessment of the site or identification or prevention of pollutants, hazardous materials or conditions. If the owner is concerned about the potential for such contamination or pollution, other studies should be undertaken.

Our services and any correspondence or collaboration through this system are intended for the sole benefit and exclusive use of our client for specific application to the project discussed and are accomplished in accordance with generally accepted geotechnical engineering practices with no third party beneficiaries intended. Any third party access to services or correspondence is solely for information purposes to support the services provided by Terracon to our client. Reliance upon the services and any work product is limited to our client, and is not intended for third parties. Any use or reliance of the provided information by third parties is done solely at their own risk. No warranties, either express or implied, are intended or made.

Site characteristics as provided are for design purposes and not to estimate excavation cost. Any use of our report in that regard is done at the sole risk of the excavating cost estimator as there may be variations on the site that are not apparent in the data that could significantly impact excavation cost. Any parties charged with estimating excavation costs should seek their own site characterization for specific purposes to obtain the specific level of detail necessary for costing. Site safety, and cost estimating including, excavation support, and dewatering requirements/design are the responsibility of others. If changes in the nature, design, or location of the project are planned, our conclusions and recommendations shall not be considered valid unless we review the changes and either verify or modify our conclusions in writing.

ATTACHMENTS

EXPLORATION AND TESTING PROCEDURES

Field Exploration

Our field exploration work included the drilling and sampling of exploratory soil borings consistent with the following schedule.

Number of Borings	Boring Depth (feet)	Planned Location
B-1	65	Building
B-2	65.1	Building
B-3	58	Building
B-4	11.5	Parking Areas
B-5	11.5	Parking Areas
B-6	11.5	Parking Areas

Boring Layout and Elevations: Specific locations of the soil borings are shown on our **Exploration Plan**. The locations were established in the field by Terracon personnel referencing existing site features. Coordinates were obtained from desktop software and elevations were estimated from Google Earth. The elevations shown on the boring logs are rounded to the nearest one foot. If elevations and a more precise boring layout are desired, we recommend the boring locations be surveyed.

Subsurface Exploration Procedures: The test borings were drilled with a track-mounted rotary drill rig. Hollow stem augers were used to advance the boreholes. Soil samples were collected using the split-barrel sampling procedure. In the split-barrel sampling procedure, the number of blows required to advance a standard 2-inch O.D. split-barrel sampler the last 12 inches of the typical total 18-inch penetration by means of a 140-pound Acker Rebel auto-hammer with a free fall of 30 inches, is the standard penetration resistance value (SPT-N). This value is used to estimate the in-situ relative density of granular soils and consistency of cohesive soils.

An automatic Standard Penetration Test (SPT) hammer was used to advance the split-barrel sampler in the borings performed on this site. A greater efficiency is typically achieved with the automatic hammer compared to the conventional safety hammer operated with a cathead and rope. Published correlations between the SPT values and soil properties are based on the lower efficiency cathead and rope method. This higher efficiency affects the standard penetration resistance blow count (N) value by increasing the penetration per hammer blow over what would be obtained using the cathead and rope method.

The spilt-barrel samples were sealed in watertight glass jars upon sample extraction. All samples were returned to the laboratory for testing and classification.

Information provided on the boring logs attached to this report includes soil descriptions, boring depths, sampling intervals, and groundwater conditions. The borings were backfilled with auger cuttings prior to the drill crew leaving the site.

Our exploration team prepared field boring logs as part of the drilling operations. These field logs include visual classifications of the materials encountered during drilling and our interpretation of the subsurface conditions between samples. Groundwater observations were also recorded. Final boring logs were prepared from the field logs. The final boring logs represent the engineer's interpretation of the field logs and include modifications based on observations and tests of the samples in the laboratory.

Laboratory Testing

The project engineer reviewed the field data and assigned various laboratory tests to better understand the engineering properties of the various soil strata as necessary for this project. Procedural standards noted below are for reference to methodology in general. In some cases, variations to methods are applied because of local practice or professional judgment. Standards noted below include reference to other, related standards. Such references are not necessarily applicable to describe the specific test performed.

- ASTM D2216 Standard Test Methods for Laboratory Determination of Water (Moisture) Content of Soil and Rock by Mass
- ASTM D4318 Standard Test Methods for Liquid Limit, Plastic Limit, and Plasticity Index of Soils
- ASTM D6913/D6913M(2017) Standard Test Method for Particle-Size Distribution (Gradation) of Soils using Sieve Analysis
- ASTM D7928(2017) Standard Test Method for Particle-Size Distribution (Gradation) of Fine-Grained Soils Using the Sedimentation (Hydrometer) Analysis
- ASTM D7012-14e1 Standard Test Method for Compressive Strength and Elastic Moduli of Intact Rock Core Specimens

The laboratory testing program included examination of soil samples by an engineer. Based on the material’s texture and plasticity, we described and classified the soil samples in accordance with the Unified Soil Classification System.

EXPLORATION RESULTS

BORING LOG NO. B-1

PROJECT: East End Building

CLIENT: Chapman Technical Group
Saint Albans, WV

SITE: Washington St E
Charleston, WV

LOCATION See Exploration Plan

Latitude: 38.337° Longitude: -81.6065°

Approximate Surface Elev.: 602 (Ft.) +/-

DEPTH	ELEVATION (Ft.)	DESCRIPTION
0.2	602+/-	**AGGREGATE BASE COURSE**
		FILL - POORLY GRADED SAND WITH GRAVEL, trace clay, fine to coarse grained, gray and brown, gravel consists of limestone crusher run
5.0	597+/-	**FILL - LEAN CLAY WITH SAND**, trace gravel, brown and gray
10.0	592+/-	**LEAN CLAY WITH SAND (CL)**, brown and gray, stiff
17.5	584.5+/-	**LEAN CLAY (CL)**, trace sand, gray with brown, very soft to soft
25.0	577+/-	

DEPTH (Ft.)	RECOVERY (in.)	FIELD TEST RESULTS	LABORATORY HP (tsf)	WATER CONTENT (%)	ATTERBERG LIMITS LL-PL-PI
	10	6-13-15 N=28			
	6	25-8-3 N=11			
5	18	1-3-2 N=5		25.0	
	12	1-3-4 N=7			
10	18	2-4-6 N=10	2.25 (HP)	27.4	33-20-13
	18	2-3-5 N=8			
15	18	1-3-6 N=9			
	18	1-1-2 N=3		28.1	29-17-12
20	18	0-0-1 N=1			
25					

Stratification lines are approximate. In-situ, the transition may be gradual.

Hammer Type: Automatic

Advancement Method:
Hollow Stem Auger/NQ2 Barrel

Abandonment Method:
Boring backfilled with bentonite
Surface capped with gravel

See Exploration and Testing Procedures for a description of field and laboratory procedures used and additional data (If any).

See Supporting Information for explanation of symbols and abbreviations.

Notes:
Elevation Reference: Google Earth

WATER LEVEL OBSERVATIONS

Groundwater encountered at 2.5 feet while drilling.

40 ft - Water introduced for rock coring.

Terracon
912 Morris St
Charleston, WV

SUPPORTING INFORMATION

GENERAL NOTES

DESCRIPTION OF SYMBOLS AND ABBREVIATIONS
East End Building ■ Charleston, WV
Terracon Project No. N2195065

Terracon GeoReport

SAMPLING	WATER LEVEL	FIELD TESTS
Rock Core Split Spoon	Water Initially Encountered Water Level After a Specified Period of Time Water Level After a Specified Period of Time Cave In Encountered Water levels indicated on the soil boring logs are the levels measured in the borehole at the times indicated. Groundwater level variations will occur over time. In low permeability soils, accurate determination of groundwater levels is not possible with short term water level observations.	N Standard Penetration Test Resistance (Blows/Ft.) (HP) Hand Penetrometer (T) Torvane (DCP) Dynamic Cone Penetrometer UC Unconfined Compressive Strength (PID) Photo-Ionization Detector (OVA) Organic Vapor Analyzer

DESCRIPTIVE SOIL CLASSIFICATION

Soil classification as noted on the soil boring logs is based Unified Soil Classification System. Where sufficient laboratory data exist to classify the soils consistent with ASTM D2487 "Classification of Soils for Engineering Purposes" this procedure is used. ASTM D2488 "Description and Identification of Soils (Visual-Manual Procedure)" is also used to classify the soils, particularly where insufficient laboratory data exist to classify the soils in accordance with ASTM D2487. In addition to USCS classification, coarse grained soils are classified on the basis of their in-place relative density, and fine-grained soils are classified on the basis of their consistency. See "Strength Terms" table below for details. The ASTM standards noted above are for reference to methodology in general. In some cases, variations to methods are applied as a result of local practice or professional judgment.

LOCATION AND ELEVATION NOTES

Exploration point locations as shown on the Exploration Plan and as noted on the soil boring logs in the form of Latitude and Longitude are approximate. See Exploration and Testing Procedures in the report for the methods used to locate the exploration points for this project. Surface elevation data annotated with +/- indicates that no actual topographical survey was conducted to confirm the surface elevation. Instead, the surface elevation was approximately determined from topographic maps of the area.

STRENGTH TERMS

RELATIVE DENSITY OF COARSE-GRAINED SOILS (More than 50% retained on No. 200 sieve.) Density determined by Standard Penetration Resistance		CONSISTENCY OF FINE-GRAINED SOILS (50% or more passing the No. 200 sieve.) Consistency determined by laboratory shear strength testing, field visual-manual procedures or standard penetration resistance			BEDROCK	
Descriptive Term (Density)	**Standard Penetration or N-Value Blows/Ft.**	**Descriptive Term (Consistency)**	**Unconfined Compressive Strength Qu, (tsf)**	**Standard Penetration or N-Value Blows/Ft.**	**Standard Penetration or N-Value Blows/Ft.**	**Descriptive Term (Consistency)**
Very Loose	0 - 3	Very Soft	less than 0.25	0 - 1	< 20	Weathered

		Hard	> 4.00	> 30		

RELEVANCE OF SOIL BORING LOG

The soil boring logs contained within this document are intended for application to the project as described in this document. Use of these soil boring logs for any other purpose may not be appropriate.

UNIFIED SOIL CLASSIFICATION SYSTEM

East End Building ■ Charleston, West Virginia

July 23, 2020 ■ Terracon Project No. N2195065

Criteria for Assigning Group Symbols and Group Names Using Laboratory Tests [A]					Soil Classification	
					Group Symbol	Group Name [B]
Coarse-Grained Soils: More than 50% retained on No. 200 sieve	**Gravels:** More than 50% of coarse fraction retained on No. 4 sieve	**Clean Gravels:** Less than 5% fines [C]	Cu ³ 4 and 1 £ Cc £ 3 [E]		GW	Well-graded gravel [F]
			Cu < 4 and/or 1 > Cc > 3 [E]		GP	Poorly graded gravel [F]
		Gravels with Fines: More than 12% fines [C]	Fines classify as ML or MH		GM	Silty gravel [F, G, H]
			Fines classify as CL or CH		GC	Clayey gravel [F, G, H]
	Sands: 50% or more of coarse fraction passes No. 4 sieve	**Clean Sands:** Less than 5% fines [D]	Cu ³ 6 and 1 £ Cc £ 3 [E]		SW	Well-graded sand [I]
			Cu < 6 and/or 1 > Cc > 3 [E]		SP	Poorly graded sand [I]
		Sands with Fines: More than 12% fines [D]	Fines classify as ML or MH		SM	Silty sand [G, H, I]
			Fines classify as CL or CH		SC	Clayey sand [G, H, I]
Fine-Grained Soils: 50% or more passes the No. 200 sieve	**Silts and Clays:** Liquid limit less than 50	**Inorganic:**	PI > 7 and plots on or above “A”		CL	Lean clay [K, L, M]
			PI < 4 or plots below “A” line [J]		ML	Silt [K, L, M]
		Organic:	Liquid limit - oven dried / Liquid limit - not dried	< 0.75	OL	Organic clay [K, L, M, N] / Organic silt [K, L, M, O]
	Silts and Clays: Liquid limit 50 or more	**Inorganic:**	PI plots on or above “A” line		CH	Fat clay [K, L, M]
			PI plots below “A” line		MH	Elastic Silt [K, L, M]
		Organic:	Liquid limit - oven dried / Liquid limit - not dried	< 0.75	OH	Organic clay [K, L, M, P] / Organic silt [K, L, M, Q]
Highly organic soils:	Primarily organic matter, dark in color, and organic odor				PT	Peat

[A] Based on the material passing the 3-inch (75-mm) sieve

[B] If field sample contained cobbles or boulders, or both, add “with cobbles or boulders, or both” to group name.

[C] Gravels with 5 to 12% fines require dual symbols: GW-GM well-graded gravel with silt, GW-GC well-graded gravel with clay, GP-GM poorly graded gravel with silt, GP-GC poorly graded gravel with clay.

[D] Sands with 5 to 12% fines require dual symbols: SW-SM well-graded sand with silt, SW-SC well-graded sand with clay, SP-SM poorly graded sand with silt, SP-SC poorly graded sand with clay

[E] $Cu = D_{60}/D_{10}$ $\quad Cc = \dfrac{(D_{30})^2}{D_{10} \times D_{60}}$

[F] If soil contains ³ 15% sand, add “with sand” to group name.

[G] If fines classify as CL-ML, use dual symbol GC-GM, or SC-SM.

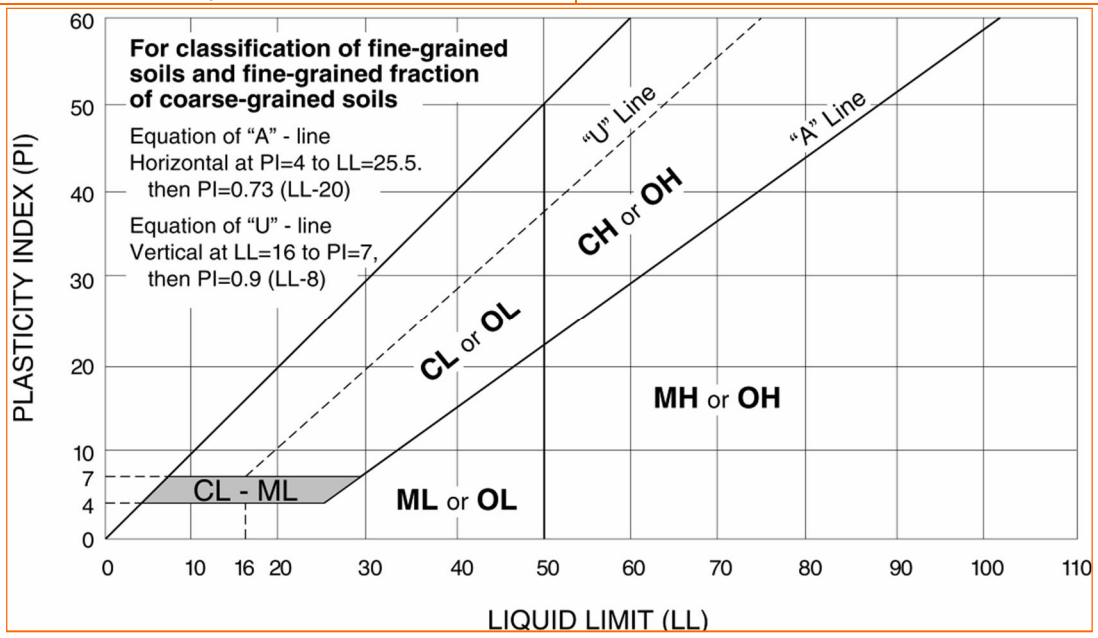
[H] If fines are organic, add “with organic fines” to group name.

[I] If soil contains ³ 15% gravel, add “with gravel” to group name.

[J] If Atterberg limits plot in shaded area, soil is a CL-ML, silty clay.

[K] If soil contains 15 to 29% plus No. 200, add “with sand” or “with gravel,” whichever is predominant.

[L] If soil contains ³ 30% plus No. 200 predominantly sand, add “sandy” to group name.



[M] If soil contains ³ 30% plus No. 200, predominantly gravel, add “gravelly” to group name.

[N] PI ³ 4 and plots on or above “A” line.

[O] PI < 4 or plots below “A” line.

[P] PI plots on or above “A” line.

[Q] PI plots below “A” line.

DESCRIPTION OF ROCK PROPERTIES

East End Building ■ Charleston, West Virginia

July 23, 2020 ■ Terracon Project No. N2195065

WEATHERING	
Term	**Description**
Unweathered	No visible sign of rock material weathering, perhaps slight discoloration on major discontinuity surfaces.
Slightly weathered	Discoloration indicates weathering of rock material and discontinuity surfaces. All the rock material may be discolored by weathering and may be somewhat weaker externally than in its fresh condition.
Moderately weathered	Less than half of the rock material is decomposed and/or disintegrated to a soil. Fresh or discolored rock is present either as a continuous framework or as corestones.
Highly weathered	More than half of the rock material is decomposed and/or disintegrated to a soil. Fresh or discolored rock is present either as a discontinuous framework or as corestones.
Completely weathered	All rock material is decomposed and/or disintegrated to soil. The original mass structure is still largely intact.
Residual soil	All rock material is converted to soil. The mass structure and material fabric are destroyed. There is a large change in volume, but the soil has not been significantly transported.

STRENGTH OR HARDNESS		
Description	**Field Identification**	**Uniaxial Compressive Strength, psi (MPa)**
Extremely weak	Indented by thumbnail	40-150 (0.3-1)
Very weak	Crumbles under firm blows with point of geological hammer, can be peeled by a pocket knife	150-700 (1-5)
Weak rock	Can be peeled by a pocket knife with difficulty, shallow indentations made by firm blow with point of geological hammer	700-4,000 (5-30)
Medium strong	Cannot be scraped or peeled with a pocket knife, specimen can be fractured with single firm blow of geological hammer	4,000-7,000 (30-50)
Strong rock	Specimen requires more than one blow of geological hammer to fracture it	7,000-15,000 (50-100)
Very strong	Specimen requires many blows of geological hammer to fracture it	15,000-36,000 (100-250)
Extremely strong	Specimen can only be chipped with geological hammer	>36,000 (>250)

DISCONTINUITY DESCRIPTION			
Fracture Spacing (Joints, Faults, Other Fractures)		**Bedding Spacing (May Include Foliation or Banding)**	
Description	**Spacing**	**Description**	**Spacing**
Extremely close	< ¾ in (<19 mm)	**Laminated**	< ½ in (<12 mm)
Very close	¾ in – 2-1/2 in (19 - 60 mm)	**Very thin**	½ in – 2 in (12 – 50 mm)
Close	2-1/2 in – 8 in (60 – 200 mm)	**Thin**	2 in – 1 ft. (50 – 300 mm)
Moderate	8 in – 2 ft. (200 – 600 mm)	**Medium**	1 ft. – 3 ft. (300 – 900 mm)
Wide	2 ft. – 6 ft. (600 mm – 2.0 m)	**Thick**	3 ft. – 10 ft. (900 mm – 3 m)
Very Wide	6 ft. – 20 ft. (2.0 – 6 m)	**Massive**	> 10 ft. (3 m)

Discontinuity Orientation (Angle): Measure the angle of discontinuity relative to a plane perpendicular to the longitudinal axis of the core. (For most cases, the core axis is vertical; therefore, the plane perpendicular to the core axis is horizontal.) For example, a horizontal bedding plane would have a 0-degree angle.

ROCK QUALITY DESIGNATION (RQD) [1]	
Description	**RQD Value (%)**
Very Poor	0 - 25
Poor	25 – 50
Fair	50 – 75
Good	75 – 90
Excellent	90 - 100

1. The combined length of all sound and intact core segments equal to or greater than 4 inches in length, expressed as a percentage of the total core run length.

Terracon Project No. N2207015

Mr. Bird,

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report. This assessment was performed in accordance with the agreement for services signed on May 22, 2020.

We appreciate the opportunity to be of service to you on this project. If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,
Terracon Consultants, Inc.

Levi J. Sheff, AEP, CNRP
Sr. Staff Scientist

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was performed in accordance with the agreement for services signed on May 22, 2020 and was conducted consistent with the procedures included in American Society of Testing and Materials (ASTM) E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The ESA was conducted under the supervision or responsible charge of Levi J. Sheff, Environmental Professional, who performed the site reconnaissance on May 28, 2020.

Findings and Opinions

A summary of findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

Site Description and Use

The site is comprised of 24 mostly paved lots and a 1.1-acre portion of another lot (25 lots total) for a total area of approximately 5.2-acres in a State Capitol Campus setting of Charleston, Kanawha County, West Virginia. There are three addresses and operations currently associated with the site. The first operation is an approximately 4,506 square-foot (SF) three-story West Virginia Early Learning Academy (Daycare) located at 2100 Washington Street East (Parcel ID: 11 28009800000000, 0.67 acres, utilized building was constructed 1936); the second is a 5,760-SF Mailroom including minor carpentry activities, located at 311 Jefferson Street (Parcel ID: 11 28008800000000, 0.13 acres, constructed 1930) and the third is a fenced groundskeeping headquarters area serving the City of Charleston (improved with eight structures: an approximately 2,500-SF tent; a 1,325-SF office; 925- and 900-SF garages; three 650-SF tents and one 50-SF storage shed, constructed between 1995-2009) at 312 Michigan Avenue. Additional site improvements include several transformers, paved surfaces, storm drains, an inactive water well, and typical urban utilities.

Historical Information

Based on a review of available historical information, the site was developed with roads (currently Jefferson Street and Michigan Avenue) by the late-1890s. By the early-1930s, over 25 dwellings and a few apartment complexes existed throughout the site, some with associated garages and sheds. Additionally, an automotive repair shop (unknown identity) operated on the northwestern portion, the Capitol School operated on the south-central portion, and Virginian Electric, Inc. operated on the eastern portion. By the early-1950s, a wholesale hardware store took over the building of the historical automotive repair shop. By the early-1970s, an open deck garage operated on the northwestern corner and a different unidentified automotive repair shop and Materials Control, Soils and Testing (MCS&T) - West Virginia Division of Highways occupied the general area where Virginian Electric, Inc. was historically located. By the late-1980s, various unidentified offices occupied an area formerly developed with dwellings (near the wholesale hardware facility). Moreover, Capitol School operations seized around this time; however, the building remained in

place for the time being. Nearly site-wide overhaul/demolition/redevelopment occurred until approximately 2007-2009, which is when the current site configuration of paved parking lots, the Mailroom (western portion of the site), the Daycare (south-central portion) and eight structures (tents, garages, and the Groundskeeping Office - on the eastern portion) have since occupied and operated.

The MCS&T operated on the northeastern portion of the site from at least 1972-1989 (documented utilization of solvents and total petroleum hydrocarbons [TPHs]). Based on the timeframe of operations, this historical site operator represents a REC to the site.

The adjoining properties had a very similar development history as the site (adjoining roads and dwellings which then were reutilized/redeveloped in modern time for more commercial utilization by various operators ranging from retailers to, banks, administrators, government entities, etc.). Of these various utilizations and redevelopments, a Chandler's Texaco fuel station operated on the northeastern corner of Michigan Avenue and Washington Street East (southeast-adjacent to the site and cross-gradient) from at least 1933-1967. No related regulatory information for this fueling station was available to further evaluate if there were/are associated impacts to the subsurface from their underground storage tanks (USTs). Considering the lack of information, the potential for related petroleum impacts to have impacted the site constitutes a REC to the site.

Records Review

Selected federal and state environmental regulatory database information and responses from inquiries to local governmental agencies were reviewed for the site and adjoining properties. MCS&T was historically located on the eastern portion of the site (312 Michigan Avenue) and was reported in the resource conservation recovery act (RCRA) non-generator/no longer regulated (NonGen/NLR) and enforcement and compliance history (ECHO) databases in 1987, 1991 and 2003 for historically generating a small quantity of halogenated/non-halogenated solvents (no reported violations). The facility also historically utilized a 6,000-gallon gasoline UST (1996-1990) and a 1,000-gallon used oil tank (1966-1992) formerly located by the eastern and southeastern exterior of the current groundskeeping office. Tank/piping removals occurred in 1990 and 1992 while having reportedly excavated/disposed impacted soils. The site received closures (IDs: C-2511-92 and C-720-90) in 1990 and 1992 once the horizontal and vertical extents of the excavated tank basins were sampled (soils) and analyzed for associated TPHs (gasoline range and oil range organics). TPH concentrations were below the laboratory reporting limit for the used oil tank basin and TPH ranged from 37-91 milligrams per kilogram (mg/kg) in the gasoline tank basin, which is below the current 100 mg/kg guidance threshold. Moreover, groundwater sample concentrations of TPH and benzene, toluene, ethylbenzene, and xylenes (BTEX) were reported below current regulatory thresholds for the gasoline tank basin (very close proximity to former used oil UST basin). Based on regulatory data indicating adequate cleanup and removal of impacted soils and tank infrastructure in combination with laboratory confirmation samples (soil and groundwater) reporting below governing thresholds, the former USTs represent a historic REC (HREC) to the site. MCS&T operations occurred in the same general area; however, volatile/semi-volatile organic compounds (VOCs/SVOCs - solvents) were not included in laboratory analysis during the UST closures; therefore, the MCS&T operations represent a REC (solvents) to the site.

Based on regulatory status, facility characteristics and/or interpreted gradient in relation to the site, the remaining facilities identified in the database report do not present RECs to the site.

Site Reconnaissance

At the time of the site reconnaissance, Terracon observed two air compressors (40-50 gallons) and one portable 25-gallon air tank, a natural gas stove with an electric above-head ventilation hood, numerous rooftop heating, ventilation and air-conditioning (HVAC) units; numerous window AC units, typical mailroom operations including minor carpentry, a washer and dryer, a backup natural gas burner, various groundskeeping machinery, mobile storage enclosures and equipment (lawnmowers, tillers, leaf blowers, fork lifts, seed feeders, etc. – including minor equipment maintenance [e.g. oil changes]); 500-gallon gasoline and diesel above-ground storage tanks (ASTs), typical cleaning items (bleach, soaps/detergents, countertop cleaners, etc.), a cage enclosing several 25-gallon pressurized propane tanks; small containers of groundskeeping products (light duty restoration floor cleaners, weed and grass killers, pesticides, etc.); flammable liquids and fuel containers, an empty 55-gallon steel drum and two 55-gallon plastic drums of Bulkie FW (a non-carcinogenic solvent [Butoxyethanol]), at least eight stormwater drains, several interior floor drains, a subsurface pit (maintenance garage); two pad-mounted transformers and at least 11 pole-mounted transformers, various materials/debris, etc. consistent with groundskeeping staging areas (tarps, light poles, lawnmowers, pallets, etc.), one scrap metal dumpster and three other dumpsters containing typical municipal waste; stained surfaces (maintenance garage) and an apparent inactive hand pump water well.

Garage 2 (maintenance area) had a subsurface pit with a drainage pipe corridor inside. Current site operators have not utilized the pit and were not knowledgeable of its components (e.g. oil-water separators) and specific historical utilization by MCS&T. The entire ground surface was very weathered/worn and had various blotches of what appears to be aged oily stains. The staining and pit in Garage 2 constitutes a REC to the site.

Adjoining Properties

The site is adjoined to the north by the Capitol Chiller Plant (218 California Avenue), the Kanawha River Railroad and Interstate 64; to the east by Veazey Street and residences; to the south by Virginia Terrace, State Credit Union (2200 Washington Street East) and numerous residences followed by Washington Street East, the West Virginia Bureau of Employment (112 California Avenue) and West Virginia Capitol - Purchasing and Finance facilities (2019 and 2101 Washington Street East); and to the west by California Avenue/Piedmont Road and West Virginia Capitol – Division of Highways (1900 Kanawha Boulevard East).

RECs were not identified in association with current adjoining property operations.

Significant Data Gap

Significant data gaps were not identified during completion of this ESA.

Item of Environmental Note

The site has undergone extensive redevelopment since at least the late-1890s; therefore, various related subsurface features (e.g. building footings, voids, etc.) may be encountered during redevelopment activities.

Conclusions

We have performed a Phase I ESA consistent with the procedures included in ASTM Practice E 1527-13 at the site, located at 311 Jefferson Street, 312 Michigan Avenue and 2001 Washington Street East in Charleston, Kanawha County, West Virginia. The following HREC and RECs were identified:

- Regarding former USTs in the groundskeeping area, regulatory data indicated adequate cleanup and removal of impacted soils and UST infrastructure in combination with laboratory confirmation samples (soil and groundwater) reporting below current governing thresholds. Therefore, the former USTs represent a HREC.
- In at least the 1930s, an automotive repair facility operated in the northwestern portion of the site where the current Mailroom is located. The potential for hazardous substance (petroleum and solvents) impacts to the subsurface from the historical facility represent RECs.
- A fuel station operated on the northeastern corner of Michigan Avenue and Washington Street East (southeast-adjacent to the site and cross-gradient) from at least 1933-1967. No related regulatory information for this fueling station was available to further evaluate if there were/are associated impacts to the subsurface. Therefore, considering the lack of information for review, the potential for related petroleum impacts to have impacted the site represents a REC.
- MCS&T operated on the northeastern portion of the site from at least 1972-1989 (use of solvents and petroleum). Based on the timeframe of operations and potential for subsurface impacts, this historical site operator represents a REC.
- Garage 2 (maintenance area) had a subsurface pit with a drainage pipe corridor inside. Current site operators have not used the pit and were not knowledgeable of its components and specific historical use by MCS&T. Various aged oily stains were observed on the floor throughout the garage and within the pit. Based on the historical review of hazardous substance handling by MCS&T (solvents and petroleum), the pit represents a REC.

Recommendations

Based on the scope of services, limitations and conclusions of this assessment, Terracon identified RECs which warrant additional investigation (limited site investigation related to potential soil, groundwater and vapor intrusion). Additionally, if the identified well is intended for future use, it should be tested for potability. If it is not intended for future use, it should be plugged and abandoned in accordance with applicable regulations.

1.0 INTRODUCTION

1.1 Site Description

Site Name	Proposed State Capitol East Campus Redevelopment.
Site Location/Address	Comprised of 25 parcels utilizing three addresses: 311 Jefferson Street, 312 Michigan Avenue and 2100 Washington Street East in Charleston, Kanawha County, West Virginia.
Land Area	Approximately 5.2-acres.
Site Improvements	A 13,518-SF Daycare, a 5,760-SF Mailroom, a fenced groundskeeping headquarter area (eight structures: an approximately 2,500-SF tent; 1,325-SF office; 900- and 925-SF storage structures; three 650-SF tents and one 50-SF storage shed), several transformers, paved surfaces, storm drains, an inactive water well, and typical urban utilities.
Anticipated Future Site Use	Redevelop to perpetuate and expand current operations.
Purpose of the ESA	Pre-redevelopment due diligence.

The site location is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the United States Geological Survey (USGS) 7.5-minute series topographic map. A diagram of the site and adjoining properties is included as Exhibit 2 of Appendix A. Acronyms and terms used in this report are described in Appendix F.

1.2 Scope of Services

This Phase I ESA was performed in accordance with the agreement for services signed on May 22, 2020 and was conducted consistent with the procedures included in ASTM E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews, including local government inquiries, as applicable, and a visual noninvasive reconnaissance of the site and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

ASTM E1527-13 contains a new definition of "migrate/migration," which refers to “the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.” By including this explicit reference to migration in ASTM E1527-13, the Standard clarifies that the potential for vapor

migration should be addressed as part of a Phase I ESA. This Phase I ESA has considered vapor migration in evaluation of RECs associated with the site.

1.3 Standard of Care

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

1.4 Additional Scope Limitations, ASTM Deviations and Data Gaps

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e. evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client; however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

- Terracon requested the client to complete a provided user questionnaire adhering to ASTM E1527-13 Section 6. Terracon has not received a response at the

issuance of this report. Based on other information reviewed for this ESA, this is not considered a significant data gap.

- Historical information dated back to 1899; however, not prior to first development on the site. Based on other information reviewed for this ESA, this is not considered a significant data gap.
- The site is proposed to be redeveloped for a renewed perpetuation and expansion of current operations. Due to the proposed plans and schedules, many site items and personnel were removed from the site or unavailable. Although Terracon was limited to the perspective of a portion of remnant items/operations, the observances appeared to be a considerable representation of fully employed operations and therefore is not considered a significant data gap.
- The site had various items and features stored inside the buildings and throughout the yards (tables, chairs, mulch, pallets, equipment, etc.), which limited visual observances during the site reconnaissance. Based on other information reviewed for this ESA, this is not considered a significant data gap.
- Terracon enquired the environmental sector of the Kanawha-Charleston Health Department for their knowledge and records of ASTs/USTs, potable water wells, septic systems, hazardous substance response incidents, potential environmental impacts or concerns, etc. on the site and adjoining properties. A response remains pending. Based on other information reviewed for this ESA, this is not considered a significant data gap.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of significant data gaps is based on the information available at the time of report issuance, and an evaluation of information received after the report issuance date may result in an alteration of our conclusions, recommendations, or opinions. We have no obligation to provide information obtained or discovered by us after the issuance date of the report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

1.5 Reliance

This ESA report is prepared for the exclusive use and reliance of Chapman Technical Group. Use or reliance by any other party is prohibited without the written authorization of Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and the signed Agreement for Services. The limitation of liability defined in the agreement is the aggregate limit of Terracon's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E1527-13 Sections 4.6 and 4.8. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E1527-13.

1.6 Client Provided Information

Terracon requested the client to complete a provided user questionnaire adhering to ASTM E1527-13 Section 6. Terracon has not received a response at the issuance of this report.

Client Questionnaire Item	Client Did Not Respond	Client's Response	
		Yes	No
Specialized Knowledge or Experience that is material to a REC in connection with the site.	X		
Actual Knowledge of Environmental Liens or Activity Use Limitations (AULs) that may encumber the site.	X		
Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the site.	X		
Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the site.	X		
Obvious Indicators of Contamination at the site.	X		

It is our understanding the client is proposing to redevelop the site and continue operations similar to the current.

2.0 PHYSICAL SETTING

Physical Setting Information		Source
Topography		
Site Elevation	Approximately 600 feet above mean sea level.	USGS Topographic Maps, Charleston East and West (1/1/1996) quadrangles Appendix A
Topographic Gradient	Site is located at the toe of a hill, sloped towards the Kanawha River to the south-southwest.	
Closest Surface Water	Kanawha River located approximately 750 south of the site.	
Soil Characteristics		
Soil Type	Ue (western portion of site): Udorthents smoothed-urban land complex. Uf (central): Urban land. UC (eastern): Urban land-Fluvaquents complex.	Kanawha County, West Virginia United States Department of Agriculture (USDA)-Natural Resource Conservation Service (NRCS) Online Web Soil Survey Reviewed in June 2020
Description	Generally, irrigated/urbanized land underlaid by fine-loamy alluvium derived from sedimentary rock.	
Geology/Hydrogeology		
Formation	Quaternary Alluvium.	References: Cardwell, D.H., Erwin, R.B., and Woodward, H.P., 1968 (slightly revised 1986), Geologic Map of West Virginia: West Virginia Geological and Economic Survey, Map 1, East Sheet, scale 1:250,000.
Description	Alluvial deposits of sand, gravel, silt and clay.	
Estimated Depth to First Occurrence of Groundwater	During a seasonal high-level fluctuation, as shallow as 5 feet below grade surface (bgs).	Terracon's experience in the site vicinity
*Hydrogeologic Gradient	Not known - may be inferred to be parallel to topographic gradient (primarily to the south-southwest).	

* The groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

3.0 HISTORICAL USE INFORMATION

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding areas. Copies of selected historical documents are included in Appendix C.

3.1 Topographic Maps, Aerial Imagery, and Sanborn Maps

Readily available historical USGS topographic maps, selected historical aerial photographs (at approximately 10- to 15-year intervals) from Environmental Data Resources Inc. (EDR) and historical fire insurance maps produced by the Sanborn Map Company were reviewed to evaluate land development and obtain information concerning the history of development on and near the site. Reviewed historical topographic maps, aerial photographs and Sanborn Maps are summarized below.

- Topographic map: Charleston, West Virginia, published in **1899** (1:125,000); Charleston, West Virginia, published in **1909**, **1931** and **1935** and revised in **1952** from 1952 imagery (1:62,500); and Charleston East/West, West Virginia, revised in 1957 and 1958 from **1955** imagery, revised in 1971 from **1971** imagery, revised in 1976 from **1976** imagery, revised in 1996 from **1996** imagery and published in 2014 (1:24,000).
- Aerial photograph: USGS, **1955**, **1960**, **1971**, **1977** and **1996**; USDA, **1986**; USGS/DOQQ, **1990**; USDA/NAIP, **2007**, **2011** and **2016** (1″ = 500′) and Google Earth, various years and scales.
- Sanborn Fire Insurance Map(s): Eastern maps – **1933**, **1950**, **1972** and **1989**; Western maps – **1912**, **1933**, **1950**, **1972** and **1989**.

Direction	Description
Site	Resolution quality for the 1899 topographic map was poor and features were obscure; however, numerous structures are depicted throughout the site and two north-south oriented roads (currently Jefferson Street and Michigan Avenue) intersect through the central portion by at least 1909. By 1933, identifiable/labeled developments include over 25 dwellings and a few apartment complexes throughout, some with associated garages and sheds (ongoing configurations thereafter). Moreover, an unidentified automotive repair shop was on the northwestern portion while the Capitol School is on the south-central portion and Virginian Electric, Inc. on the eastern portion. By 1950, a wholesale hardware facility took over and the building of the automotive repair shop. By 1972, an open deck garage operated on the northwestern corner and a different unidentified automotive repair shop and the MCS&T occupied the general area where Virginian Electric, Inc. was historically located. By 1989, offices occupied an area formerly developed with dwellings (near the wholesale hardware facility). Moreover, the school is no longer depicted; however, the building remained in place. Ground disturbances and demolition/redevelopment occurred until approximately 2007-2009, which is when the configuration appears to remain consistent (paved parking lots, one structure on the western portion, one structure in the south-central portion, and eight structures on the eastern portion).

Direction	Description
North	A northwest-southeast oriented railroad (Kanawha River Railroad) and road (currently Interstate 64) has bordered the site since at least 1899. By 1933, several dwellings adjoin the northwestern corner, south-adjoining to the railroad. An armory appears near those dwellings by 1950, which is converted into State Roads Commission offices by 1972. The dwellings were removed between 2007 and 2010, which is the general configuration of the area through at least 2016.
East	A northwest-southeast oriented railroad (Kanawha River Railroad) and road (currently Interstate 64) has bordered the site since at least 1899. Since at least 1933, a north-south oriented road (currently Veazey Street) and dwellings have adjoined the site.
South	Resolution quality for the 1899 topographic map was poor and features were obscure; however, the adjoining areas appear undeveloped. By 1909, an east-west oriented road (currently Washington Street East) borders the site and is followed by urban city block development comprised of roads and structures while the eastern portion of the site is bordered by structures before reaching Washington Street East. By 1933, identifiable/labeled developments include dwellings and apartment complexes which generally remained until at least 1950. Moreover, from at least 1933 through at least 1950, a gasoline filling station utilizing at least three USTs is located adjacent to the southeastern corner of the site along Michigan Avenue. The fuel station was demolished by 1972 and redeveloped with a new structure by 1986. Moreover, by 1972, various buildings were developed south-adjacent to the western portion of the site. Since then, ongoing redevelopment in the general area includes dwellings and commercial buildings.
West	Resolution quality for the 1899 topographic map was poor and features were obscure; however, the adjoining areas were undeveloped. By 1909, a north-south oriented road (currently California Avenue/Piedmont Road) has bordered site and is followed by urban city block development comprised of roads and structures. Dwellings border the western side of California Avenue through at least 1950. The general area is redeveloped as larger commercial buildings by 1972, which appears to be the same general adjoining/adjacent configurations through at least 2016.

In at least the 1930s, an automotive repair facility operated in the northwestern portion of the site where the current Mailroom is located. The potential for hazardous substance (petroleum and solvents) impacts to the subsurface from the historical repair facility presents a REC to the site.

An unidentified fuel station is depicted on Sanborn maps at the northeastern corner of Michigan Avenue and Washington Street East (southeast-adjacent to the site and cross-gradient) from at least 1933-1950. No related regulatory information for this fueling station was available to further evaluate if there were/are associated impacts to the subsurface or if cleanup activities have occurred. Therefore, considering the lack of information for review, the potential for related petroleum impacts to have impacted the site represents a REC to the site.

MCS&T operated on the northeastern portion of the site from at least 1972-1989 (documented use of solvents and petroleum, see Section 4.1). Based on the timeframe of operations and known solvent and petroleum use, this historical site operator represents a REC to the site.

3.2 Historical City Directories

The EDR Digital Archive and Polk's City Directory data studied for this assessment was provided by EDR (selected year[s] readily available for review: 1963 – 2017). Street listings were not available prior to 1963. Based on a review of the Sanborn maps, the site has had several historical addresses; however, features/facilities for those potential addresses have been evaluated and appropriately described in section 3.1 above. Therefore, this section focuses on the current site addresses (311 Jefferson Street, 312 Michigan Avenue and 2100 Washington Street East). Additionally, due to the extensive redevelopment history of the site and surrounding areas, the surrounding areas were fully evaluated up to 500 feet from the site; however, only the site and immediately adjoining/adjacent properties have been described below.

Direction	Description
Site	**2100 Washington Street East:** Capitol School (1967); State Commission on Aging (1978); State Building Risk and Management (1983); State Insurance Commission (1983 and 1987) and State Fire Commission (1992). **311 Jefferson Street:** Charleston Light Opera Guild Workshop and Children's Theatre (1983 and 1987). **312 Michigan Avenue:** MCS&T (1963-1987 and 1995 – see discussion below table) and Contract Administration (2005). ***No listings:** 1963, 2000, 2010, 2014 and 2017.
North	***No listings:** 1963-2017.
East	***No listings:** 1963-2017.
South	**1924 - 2205 Washington Street East:** various retailers, community attractions and governmental/administrative firms (Home Mission Church, Bethany Baptist Church, Capitol Sweeper and Vacuum, State of Emergency Planning, Appalachian Council, Magnet Bank, State Insurance, State Credit Union, etc. [1963-2017]). Of these listings, Chandler's Texaco fueling station (building 2200) was located southeast-adjacent to the site (1967 – see discussion below table).
West	***No listings:** 1963-2017.

***No listings:** No listings, or, listings are either residential, unknown, previously described by Sanborn map evaluations, or located beyond properties adjoining to the site.

As previously described in section 3.1 above, MCS&T operated on the northeastern portion of the site for a significant timeframe (city directory-specific data: at least 1963-1987 and 1995). The potential for subsurface impacts of petroleum and solvents from this historical site operator represents a REC to the site.

Chandler's Texaco operated on the southeast-adjacent property (cross-gradient to the site) in at least 1967 (aerial imagery indicated this facility to be redeveloped shortly after these operations). Terracon anticipates this operator to be the same operator identified as a fueling station in section

3.1 above (1930 to at least 1950). This historical southeast-adjacent operator represents a REC to the site.

3.3 Site Ownership

Based on a review of information obtained from the online Kanawha County Assessor Property Viewer records, the site is comprised of 24 lots and a portion of another (25 lots total) for a combined area of approximately 5.2 acres.

General Location	Parcel ID	Current Owner	Size (acres)
East of California Avenue	11 28007900000000	WEST VA STATE BLDG COMM	1.1 (portion)
East of Alley	11 28008500000000	WEST VA STATE BLDG COMM	0.12

*East of Michigan Avenue	11 28001070010000	WEST VA DEPT OF ADMIN REAL EST DIV	0.61

*Parcel is developed with at least one structure.

3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services. Unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report.

3.5 Environmental Liens and Activity and Use Limitations

Environmental lien and activity and use limitation records recorded against the site were not provided by the client. At the direction of the client, performance of a review of these records was not included as part of the scope of services and unless notified otherwise, we assume that the client is evaluating this information outside the scope of this report. While not requested by the client, the EDR regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site is not listed on the EC or IC databases. Review of this information does not constitute an environmental lien/AUL search per ASTM E1527-13. Please note that in addition to these federal and state listings, AULs can be recorded at the county and municipal level that may not be listed in the regulatory database report.

3.6 Interviews Regarding Current and Historical Site Uses

Interviewer	Name / Phone #	Title	Date/Time
Mr. Levi J. Sheff Terracon	Mr. Mark Crites (304) 881-3756	Owner Representative West Virginia Department of Administration	May 28, 2020 9:00 AM and June 11, 2020 10:00AM

Mr. Crites provided a general tour of the facility and provided additional information after the site visit. The following information was obtained from Mr. Crites and his team (West Virginia Department of Administrations – ‘they’):

- They have been associated with the site for a little over 10 years, acquired from the West Virginia Division of Highways.
- Aside from the assumed inactive well discussed in section 5.0, they are unaware of past/present wells or septic systems, or current USTs on the site.
- Aside from the historical UST removals, they are unaware historical spills, releases, environmental incidents or hazardous materials responses to the site. Likewise, for any pending, threatened or past environmental litigation, proceedings or notices of possible violations of environmental laws or liability or potential environmental concerns in connection with the site.
- Additional information has been provided; however, the information is presented in appropriate areas of this report (e.g. AST information is in Section 5.0 under ASTs discussion).

3.7 Prior Report Review

Terracon requested the client to provide previous reports they have for the site. Previous reports were not provided to Terracon for review.

4.0 RECORDS REVIEW

Regulatory database information was provided by EDR, a contract information services company. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

4.1 Federal and State/Tribal Databases

Listed below are the facility listings identified on federal and state/tribal databases within the ASTM-required search distances from the approximate site boundaries. Database definition, descriptions, and the database search report are included in Appendix D.

Federal Databases

Database	Description	Distance (miles)	Listings
SEMS (formerly CERCLIS)	Superfund Enterprise Management System (formerly Comprehensive Environmental Response, Compensation, & Liability Information System)	0.5	1
SEMS ARCHIVE (formerly CERCLIS / NFRAP)	Formerly Comprehensive Environmental Response, Compensation, & Liability Information System/No Further Remedial Action Planned	0.5	0
ERNS	Emergency Response Notification System	Site	0
IC / EC	Institutional Control/Engineering Control	Site	0
NPL	National Priorities List	1	0
NPL (Delisted)	National Priorities Delisted List	0.5	0
RCRA CORRACTS/ TSD	RCRA Corrective Action Activity	1	0
RCRA Generators	Resource Conservation and Recovery Act	Site and adjoining properties	2
RCRA Non-CORRACTS/ TSD	RCRA Non-Corrective Action Activity	0.5	0

State/Tribal Databases

Database	Description	Distance (miles)	Listings
Brownfields	Brownfields Sites	0.5	0
IC	Institutional Controls Sites	Site	0
AST	Aboveground Storage Tanks	Site and adjoining properties	0
UST	Underground Storage Tanks	Site and adjoining properties	2
LUST	Leaking Underground Storage Tanks	0.5	3
RGA LUST	Recovered Government Archive Leaking Underground Storage Tanks	0.5	0
LTANKS	Leaking Tanks	0.5	0
SPILLS	Spills Listing	0.5	0
SHWS	State Hazardous Waste Sites	0.5	0
SWF/LF	Solid Waste Facilities/Landfills	0.5	0

Database	Description	Distance (miles)	Listings
RGA LF	Recovered Government Archive Solid Waste Facilities List	0.5	0
LCP	Landfill Closure Program	0.5	0
VCP	Voluntary Cleanup Program	0.5	0
UIC	Underground Injection Wells	0.5	0
NPDES	Wastewater Discharge Permits Listing	Site and adjoining properties	0
MINES	MINES	0.5	0
Daycare Centers	Sensitive Receptor: Day Care Center List	0.5	0
DRYCLEANERS	Listing of Drycleaner Locations	0.5	0
COAL ASH	Coal Ash Landfills	0.5	0
CDL	Drug Lab Site Locations	0.5	0
ASBESTOS	ASBESTOS	Site	0
AIRS	Permitted Facility and Emissions Listing	Site and adjoining properties	0
Financial Assurance	Financial Assurance Information Listing	Site and adjoining properties	0
State Wetlands	Wetland Inventory	Site and adjoining properties	0
Various	Various Other Ascertainable Records	Site-0.5	0

In addition to the above ASTM-required listings, Terracon reviewed other federal, state, local and proprietary databases provided by the database firm. The following table summarizes site-specific information provided by the database and/or gathered by this office for facilities identified within 500 feet of the site (reflected in the table below). Facilities are listed in order of proximity to the site and cross-referenced for accuracy utilizing various resources. A list of the facility listings and reviewed databases is included in the regulatory database report attached in Appendix D.

Facility Name and Location	Estimated Distance / Direction/Gradient	Database Listings	Is a REC, CREC, or HREC to the Site
MCS&T – WV Division of Highways 312 Michigan Avenue	Eastern portion of site	RCRA NonGen/NLR ECHO WV UST	RECs
DOH Central Motor Pool 01701 212 California Avenue	South-adjacent / down-gradient	WV UST	None

MCS&T – WV Division of Highways

This facility is reported in the RCRA NonGen/NLR and ECHO databases in at least 1987, 1991 and 2003 for historically generating a small quantity of halogenated/non-halogenated solvents (no reported violations). Additionally, the facility historically utilized a 6,000-gallon gasoline UST (1996-1990) and a 1,000-gallon used oil tank (1966-1992) located by the eastern and southeastern exterior of the current Groundskeeping Office. There was reported evidence of leaks from the gasoline tank and approximately 50 gallons of free product from the oil tank during tank/piping removals. The impacted soils were sampled to at least 11 feet bgs and impacted materials were excavated for proper handling and disposal. The site received closures (IDs: C-2511-92 and C-720-90) in 1990 and 1992. The horizontal and vertical extents of the excavated basins were sampled (soils) and analyzed for associated TPH – gasoline range and oil range organics. TPH concentrations were below the laboratory reporting limit in the used oil tank basin and TPH ranged from 37-91 mg/kg in the gasoline tank basin, which is below the current 100 mg/kg guidance threshold. Moreover, groundwater sample concentrations of TPH and BTEX from the gasoline tank basin were reported below current regulatory thresholds (former UST basins were in very close proximity to each other). Based on regulatory data indicating adequate cleanup and removal of impacted soils and tank infrastructure in combination with laboratory confirmation samples (soil and groundwater) reporting below current governing thresholds, the historical USTs present a HREC to the site. Additionally, MCS&T operations occurred in the same area these tanks were located and laboratory analysis did not include testing for solvents during the UST closures; therefore, historical MCS&T operations present a REC to the site.

DOH Central Motor Pool 01701

This facility is reported in the WV UST database for historically utilizing one 4,000-gallon and two 6,000-gallon gasoline USTs and one 500-gallon used oil tank. The tanks were removed from the ground in 1998 except for one of the 6,000-gallon gasoline UST, which was removed in 1992. A closure (ID: C-57443-98) from 1998 noted no leak detections or residual impacts above governing thresholds from the tank basins upon their removals. Based on the down-gradient position of this property across Washington Street, it does not represent a REC in connection with the site.

Based on regulatory status, facility characteristics and/or interpreted gradient in relation to the site, the remaining facilities identified in the database report do not present RECs to the site.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The database report listed four orphan facilities in the unmapped section. Determining the location of unmapped facilities is beyond the scope of this assessment; however, they were not identified as the site or on an adjoining property. These facilities are listed in the database report in Appendix D.

4.2 Local Agency Inquiries

Terracon inquired to the following agencies for their knowledge and records of ASTs/UST, potable water wells, septic systems, hazardous substance response incidents, potential environmental

impacts or concerns, etc. on the site and adjoining properties. The following information was received in response to the inquiries:

Agency Contacted/ Contact Method	Response
Charleston, West Virginia - Fire Department Online Platform	Reported no information indicating historical response incidents or concerns for the site.
Kanawha-Charleston Health Department - Environmental By email: Environmental@kchdwv.org.	A response remains pending.
Kanawha County Assessor By email: SallieRobinson@kanawha.us	311 Jefferson Street (Mailroom): 5,760 SF, constructed in 1930. Further information was not documented due to associated tax exemptions/limitations.
West Virginia Flood Map Tool Online Platform	302 Jefferson Street (Daycare): 4,506 SF (three floor levels), constructed in 1936. 312 Michigan Avenue: information is not available for the current groundskeeping office/area.
West Virginia Department of Environmental Quality (DEQ) – Freedom of Information Act (FOIA) By email: Terry.A.Fletcher@wv.gov	WVDEQ provided regulatory file information for the USTs discussed above in section 4.1.

5.0 SITE RECONNAISSANCE

5.1 General Site Information

Information contained in this section is based on a visual reconnaissance conducted while walking through the site and the accessible interior areas of structures, if any, located on the site. The site and adjoining properties are depicted on the Site Diagram, which is included in Exhibit 2 of Appendix A. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

Site Reconnaissance				
Field Personnel	Levi J. Sheff, AEP, CNRP			
Reconnaissance Date	May 28, 2020			
Weather Conditions	Sunny, 85°F			
Site Contact/Title	Mark Crites | Project Manager (WV Dep. of Admin.)			
Building Description				
Building Identification	**Building Use**	**Approx. Construction Date**	**Number of Stories**	**Approx. Size (ft²)**
Mailroom	Offices, Storage, Mail Distribution and Limited Carpentry	1930	1	5,760

Drinking Water/Wastewater	City of Charleston			
Electric	American Electric Power (AEP)			
Natural Gas	Mountaineer Gas Corporation (MGC)			

5.2 Overview of Current Site Occupants and Operations

The site is comprised of 24 mostly paved lots and a 1.1-acre portion of another lot (25 lots total) for a total area of approximately 5.2-acres. There are three addresses currently associated with

the site (2001 Washington Street East - Daycare, 311 Jefferson Street – Mailroom, and 312 Michigan Avenue Groundskeeping Office).

5.3 Overview of Current Site Operations

There are three operations currently associated with the site. The first operation is a 4,506 SF three story Daycare located at 2001 Washington Street East, the second is a 5,760-SF Mailroom which also includes minor carpentry activities (e.g. cabinets, shelving, etc.) located at 311 Jefferson Street and the third is a groundskeeping headquarter area (administrating, staging/storage, maintenance, etc.) serving the City of Charleston, improved with eight structures: an approximately 2,500-SF tent; a 1,325-SF office; 900- and 925-SF storage structures; three 650-SF tents and one 50-SF storage shed (312 Michigan Avenue).

5.4 Site Observations

The following table summarizes site observations and interviews. Affirmative responses (designated by an “X”) are discussed in more detail following the table.

Category	Item or Feature	Observed or Identified
Site Operations, Processes, and Equipment	Emergency generators	
	Elevators	
	Air compressors	X
	Hydraulic lifts	
	Dry cleaning	
	Photo processing	
	Ventilation hoods and/or incinerators	X
	Waste treatment systems and/or water treatment systems	
	Heating and/or cooling systems	X
	Paint booths	
	Sub-grade mechanic pits	
	Wash-down areas or carwashes	
	Pesticide/herbicide production or storage	X
	Printing operations	
	Metal finishing (e.g., electroplating, chrome plating, galvanizing, etc.)	
	Salvage operations	
	Oil, gas or mineral production	
	Other processes or equipment	X
	Aboveground storage tanks	X

Category	Item or Feature	Observed or Identified
Aboveground Chemical or Waste Storage	Drums, barrels and/or containers ≥ 5 gallons	X
	MSDS or SDS	
Underground Chemical or Waste Storage, Drainage or Collection Systems	Underground storage tanks or ancillary UST equipment	
	Sumps, cisterns, French drains, catch basins and/or dry wells	X
	Grease traps	
	Septic tanks and/or leach fields	
	Oil/water separators, clarifiers, sand traps, triple traps, interceptors	
	Pipeline markers	X
	Interior floor drains	X
Electrical Transformers/ PCBs	Transformers and/or capacitors	X
	Other equipment	
Releases or Potential Releases	Stressed vegetation	
	Stained soil	
	Stained pavement or similar surface	X
	Leachate and/or waste seeps	
	Trash, debris and/or other waste materials	X
	Dumping or disposal areas	
	Construction/demolition debris and/or dumped fill dirt	X
	Surface water discoloration, odor, sheen, and/or free floating product	
	Strong, pungent or noxious odors	
	Exterior pipe discharges and/or other effluent discharges	
Other Notable Site Features	Surface water bodies	
	Quarries or pits	
	Wastewater lagoons	
	Wells	X

Site Operations, Processes, and Equipment

Air compressors

One approximately 40-gallon air compressor was bolted on railings secured to a concrete pedestal in the basement of the Daycare. It was also connected to natural gas. Moreover, a 50-gallon air compressor and a portable 25-gallon air tank were observed in Garage 2 (maintenance area). Evidence of historical or recent fluid releases were not observed on the compressors/tanks.

Ventilation hoods

The kitchen in the basement of the Daycare was equipped with one natural gas stove and an above-head electric hood exhausting above the rooftop of the structure through ventilation, which is not subject to permitting. No hazardous materials were observed on/near the hood.

Heating and/or cooling systems

Heating to the Daycare, Mailroom and Groundskeeping Office is through modern furnaces using natural gas. Four above-head forced air units were in the western and eastern garage spaces of the Mailroom (includes carpentry area) and one was in the restroom of Garage 2. Numerous HVAC units circulate air to the buildings except for the Groundskeeping Office. The Groundskeeping Office had numerous window AC units for cooling, and additionally, the Daycare also had window AC units available for voluntary use. Additionally, there was a freezer located on the northwestern exterior of the Daycare. Indications of hazardous substance releases (i.e. stains, stressed vegetation, odors, etc.) were not observed near these features.

Other Processes of Equipment

The internal Mailroom included typical mail assembly operations where trucks would deliver bulk mailings into the above-grade loading areas/garage bays which is then organized in bins for proper redistribution by truck. The facility has a lobby, mailboxes and an area in the western portion where minor carpentry work occurs (cabinets, shelving, trim, etc.). Some former remnant features of the historical automotive repair facility were observed (concrete markings/weathering of former infrastructure).

The Daycare was equipped with a washer and dryer for minor use, and a backup natural gas burner was in the basement. The burner is operable and no known historical malfunctioning incidents have occurred.

There were various groundskeeping machinery, mobile storage enclosures and equipment stored throughout the groundskeeping yard, tents and garages (lawnmowers, tillers, leaf blowers, fork lifts, seed feeders, etc.). The equipment appeared generally well maintained and indicators of releases was not observed on/by the machinery/equipment.

Machinery/equipment maintenance occurs inside Garage 2 (east of the Groundskeeping Office). Reportedly, maintenance is minor (small engine tweaking, changing oil, etc.). Used oils were stored inside a covered 55-gallon drum located on a secondary containment pallet on the eastern exterior of the Groundskeeping Office. Safety Kleen transfers and disposes contents on a demand basis (reportedly rare/infrequently). The current maintenance operations appear minor and for short term and are not a REC; however, building components were from historical operators, which included a subsurface drainage pit. See interior drains section below for further details.

Above-ground Chemical or Waste Storage

ASTs

Terracon observed the following ASTs during the reconnaissance:

Location	Contents	Quantity/Size (gallons) and Material	Associated Staining	Secondary Containment	Approximate Installation
Groundskeeping Area	Diesel	(1) 500 Pre-cast pebble/concrete	Yes	No	2012
	Gasoline	(1) 500 Pre-cast pebble/concrete	Yes	No	2012

Reportedly, the bulk ASTs are refilled on demand. Reportedly, there have been no damages to the tanks and they have not had a release incident. The tanks appeared in good condition and are without a reportable release, drips and similar types of spills (refilling seeps/fittings upon fuel transfers, etc.). Therefore, no REC is identified.

Drums, barrels and/or containers ≥ 5 gallons

Most of the typically stored cleaning items (bleach, soaps/detergents, countertop cleaners, etc.) were already removed from the facilities; however, some remnant items were observed in restrooms and custodial areas. There was a cage in the northwestern portion of the groundskeeping yard enclosing several 25-gallon pressurized propane tanks (forklift use - stressed vegetation was not observed by the enclosure). Pallets of 5-gallon paints, thinners, acrylic latex, etc. were observed in the groundskeeping tents.

Small containers of light duty restoration floor cleaners, weed and grass killers, pesticides, and other groundskeeping products were observed in the Groundskeeping Office and somewhat distributed in the groundskeeping tents and associated yard. Some were stored inside typical metal cabinets similar to the three observed cabinets enclosing flammable liquids and fuel containers inside Tent 4 by the southern fence line.

An empty 55-gallon steel drum was observed over an empty plastic secondary containment bin by the eastern exterior of the Groundskeeping Office by the equipment maintenance garage. Two 55-gallon plastic drums of Bulkie FW (a liquid additive containing a non-carcinogenic solvent [Butoxyethanol]) were observed in Tent 4. The empty 55-gallon drum is reportedly for storage of used oil changes until Safety Kleen manages transfer/disposal.

Evidence of hazardous substance releases was not observed on or near these items, no RECs were identified.

Underground Chemical or Waste Storage, Drainage or Collection Systems

Stormwater drains and surface water body

Terracon observed at least eight stormwater drains located throughout the parking lots and along the borders of the site and beneath Tent 2 in the Groundskeeping area. Evidence of hazardous substances was not observed stored next to the drains or emanating from the drains.

Pipeline Marker

A pipeline marker was not observed; however, recent West Virginia 811 public utility paint markings indicated natural gas lines in various places (generally roadways) throughout the sight (some yellow paint depictions appeared weathered).

Interior floor drains

Most drains in the site structures (Daycare, Mailroom and Groundskeeping) were directly piped to the municipal sanitary system. However, interior floor drains were observed in the basement and custodial closet of the Daycare and the storage garage of the Mailroom which reportedly connect to the municipal sanitary system. Indications of hazardous substance storage or releases were not observed near those drains.

Additionally, Garage 2 (maintenance area) had a subsurface pit with a drainage pipe corridor inside. Site operators have not used the pit and were not knowledgeable of its components and specific historical use by MCS&T. It is unknown where the pipe discharges. Based on the historical review of hazardous substance utilization by MCS&T (solvents and petroleum), the pit presents a REC to the site.

Electrical Transformers/PCBs

Transformers and/or capacitors

Two pad-mounted transformers, apparently owned by Federal Pacific, were observed on the eastern side of the northern extent of Jefferson Street (north-central portion of the site). At least 11 pole-mounted transformers were observed generally along Jefferson Street, Michigan Avenue and Virginia Terrace (generally, the southern and eastern portions of the site).

Some transformers contain mineral oil, which may contain polychlorinated biphenyls (PCBs); labels indicating potential PCB content were not observed on the transformers. The owner of the transformers maintains responsibility of fluid-containing transformers; and if transformers are "PCB contaminated," they are not required to flush and change their fluids unless a release is identified. Evidence of releases was not observed near the transformers.

Stained pavement or similar surface

The entire ground surface was very weathered/worn inside the maintenance garage (Garage 2) and had various blotches of what appears to be aged stains. The weathering and oily blotches represent a REC to the site.

Trash, debris and/or other waste materials

Various items consistent with groundskeeping staging areas (tarps, light poles, lawnmowers, pallets, fenceposts, gardening [seeded plants, pots, soils] etc.) were observed inside the northern and eastern fence line by the Groundskeeping Office and storage shed. An unused and weathered/damaged/aged HVAC unit was observed by the southern fence line. Indications of hazardous substances/material releases were not observed.

Construction/demolition debris and/or dumped fill dirt

There were three concrete enclosed barricades with either stockpiled gravel, soils, grass cuttings, and similar grounds composting organics (from the complex grounds: trees, flower beds, shrubbery beds, leaves in the fall etc.) within the southern fence line of the Groundskeeping yard. There were construction/building materials such as bricks, pallets, concrete masonry-unit blocks, shaped slab, etc. throughout the groundskeeping yard and along the northern boundary of the eastern portion of the site. Indications of hazardous substances/materials were not observed.

Releases or Potential Releases

Waste disposal

Numerous various sized (25-50 gallon) trash cans containing typical municipal waste (wrappers, paper, etc.) were observed throughout the Daycare, Mailroom and Groundskeeping areas. Two outdoor trash cans were observed; one was along the east-central border of the site (along California Avenue/Piedmont Road) and the other by the northeastern exterior of the Daycare.

One scrap metal dumpster, serviced on a demand basis, was in the northwestern portion of the fenced groundskeeping area. Materials were consistent with scrap metals (cables, wires, panels, pipes, etc.) with a periodic spray paint can or similar item (*de minimis)*. Additionally, one Waste Management dumpster was located by the northeastern exterior of the Daycare and two additional dumpsters were along the eastern interior of the fenced Groundskeeping yard (one had typical waste in trash bags while the other contained larger items of non-hazardous waste such as wooden pallets or fallen tree branches from recent storms, etc.). They are serviced on a weekly basis.

Evidence of staining, noxious odors, or hazardous waste disposal was not observed within or near the municipal waste bins or dumpsters.

Other Notable Site Features

Wells

An apparent hand pump and assumed water well was observed along the fence by the Groundskeeping storage shed. Reportedly, the current owners have not used the assumed well and reported it to be inactive. Further information about confirming the feature as a potable water well, or as another feature, and its formation specs was not known or readily available (installation, specifications, static water level, etc.). If the well is intended for future use, it should be tested for

potability. If it is not intended for future use, it should be plugged and abandoned in accordance with applicable regulations.

6.0 ADJOINING PROPERTY RECONNAISSANCE

Direction	Description
North	The Capitol Chiller Plant (218 California Avenue), a northwest-southeast oriented railroad (Kanawha River Railroad) and Interstate 64.
East	A north-south oriented road (Veazey Street) and residences.
South	An east-west oriented road (Virginia Terrace), State Credit Union (2200 Washington Street East) and numerous residences followed by Washington Street East, the West Virginia Bureau of Employment (112 California Avenue) and West Virginia Capitol - Purchasing and Finance facilities (2101 and 2019 Washington Street East).
West	A north-south oriented road (California Avenue/Piedmont Road) and West Virginia Capitol – Division of Highways (1900 Kanawha Boulevard East).

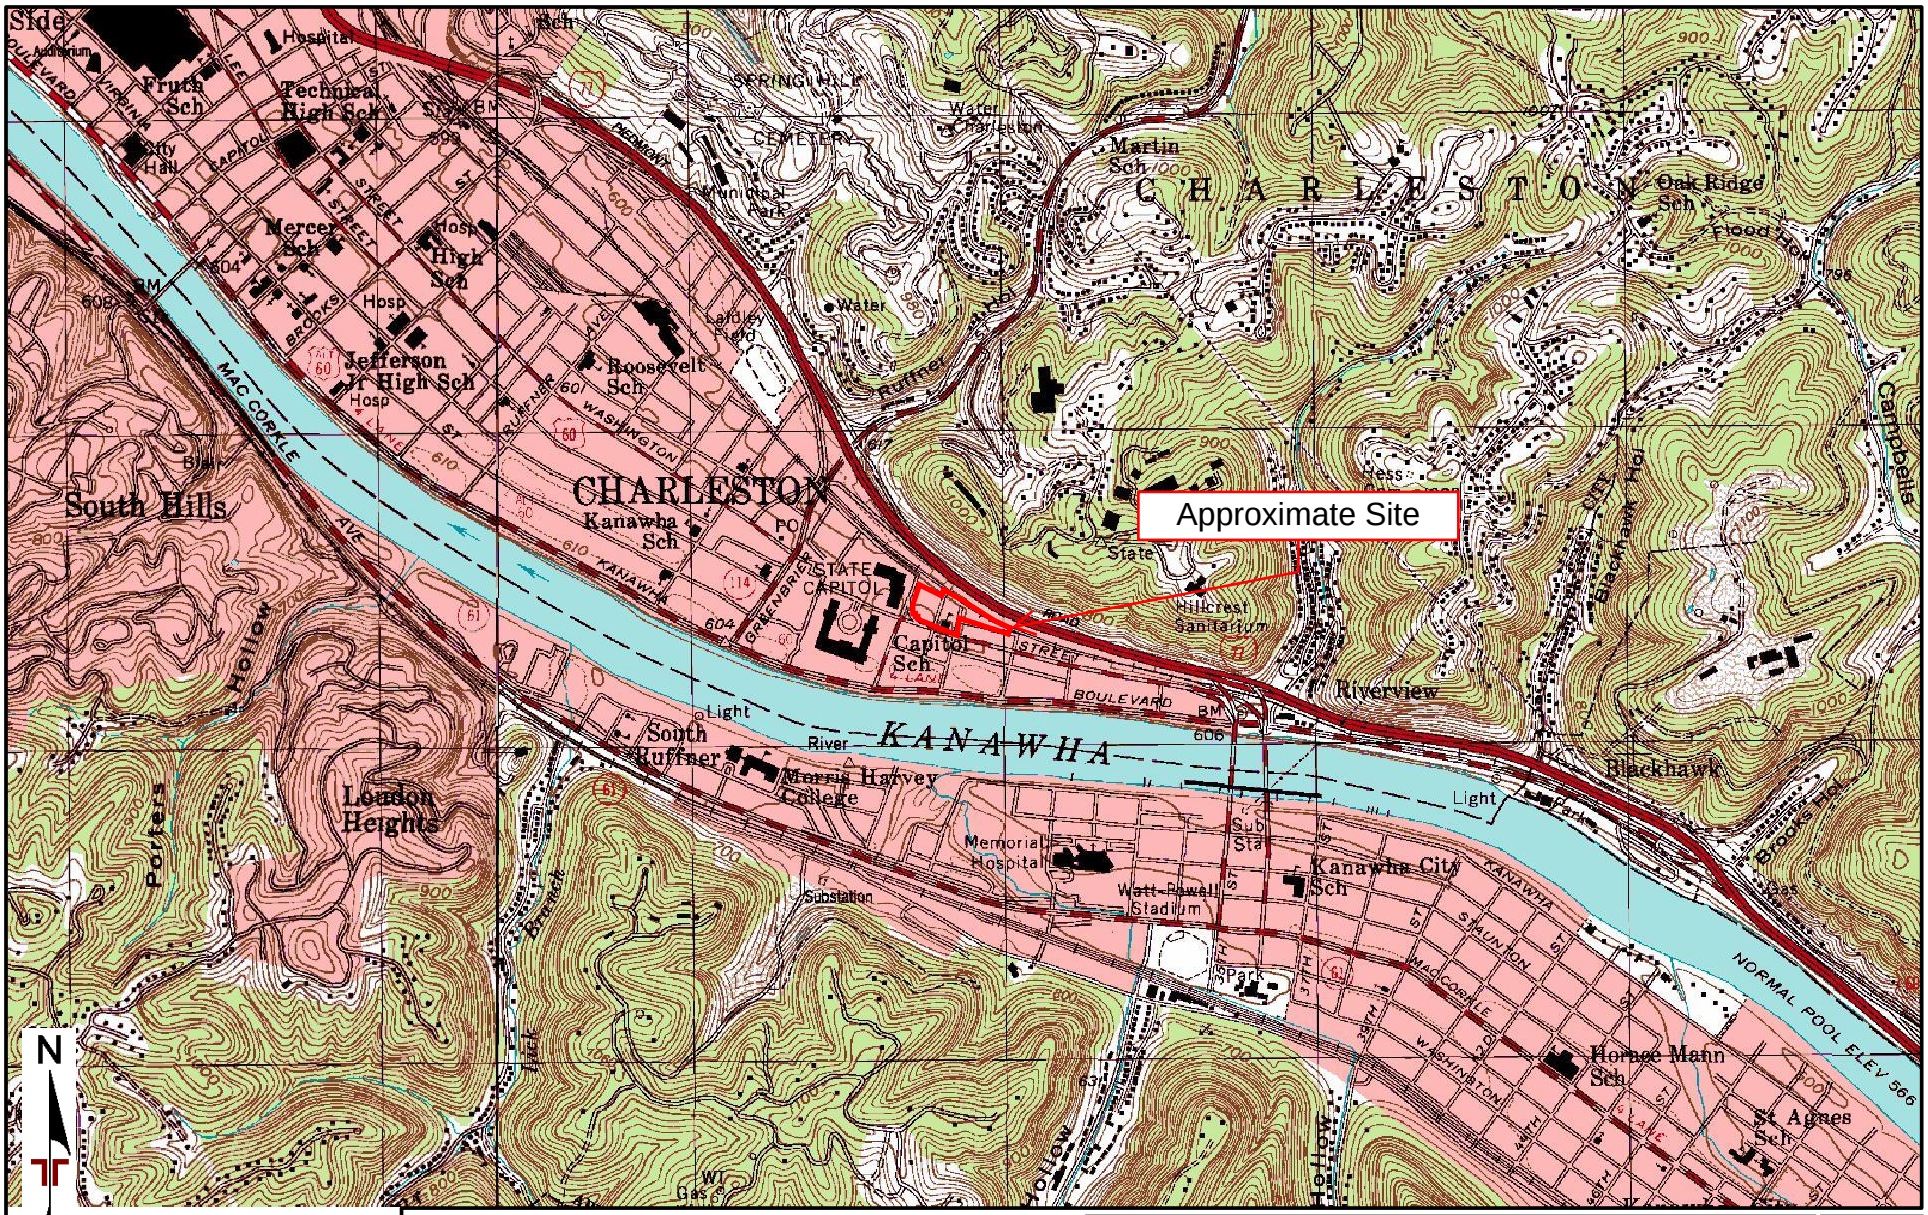
RECs were not identified in association with current adjoining property operations.

7.0 ADDITIONAL SERVICES

Per the agreed scope of services specified in the proposal, additional services (e.g. asbestos sampling, lead-based paint sampling, wetlands evaluation, lead in drinking water testing, radon testing, vapor encroachment screening, etc.) were not conducted.

8.0 DECLARATION

I, Levi J. Sheff, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.



Levi J. Sheff, AEP, CNRP
Sr. Staff Scientist

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Terracon were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Terracon were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

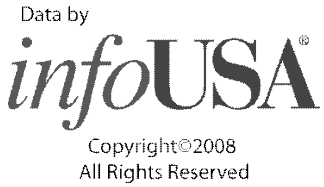
EXECUTIVE SUMMARY



DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

W. V. ID No. 2002608
Material Control Division
Michigan Avenue
Charleston, WV

Dear Mr. Wilson:

In reference to the above closure numbers, please find attached DNR Closure Report for the removal of a 1000 gallon used oil storage tank at the above location.

Also attached is a copy of the soil test results and corrective action. No further activity is planned at this location.

Should you need additional information please contact Mr. Jones at 558-7836.

Very truly yours,

Joseph T. Deneault

TANK CLOSURE REPORT FOR:
(Complete One for Each Tank)
WV I.D. No. 2002608
(If None, write None)
Closure No. C-2511-92

Company name W. V. Division of Highways
Address Equipment Division
Buckhannon W. V. 26201
Telephone no. (304) 472-1750

I. Tank closure:

A. Liquid waste:

1) Type of liquid waste emptied from tank: USED OIL.
2) Amount of liquid waste emptied from tank: 1000 gallon.
3) Disposal method of liquid waste ~~location~~ Waste Oil Contractor and location (Safty Clean Co.).

B. Solid waste (sludges, scale, etc.):

1) Amount cleaned from tank: 150 Gal ± Stored in Drums @ Nitro.
2) Disposal method and location facility to be disposed under Waste Contract.
3) Describe tank cleaning and vapor purging methods: Tank was transported to Dist. One HQ where ends of tank were removed, and inside was cleaned with high pressure water. This material was cycled through the oil/water separator.

II. Tank abandonment only (Date): N/A
A. Type of inert material used to fill tank:

III. Tank removal only (Date 6/13/92):
A. Tank destination Tank stored @ D&M. facility @ Penn. Ave (U.S. 119) off of I-77, Charleston.
B. Future use of tank: Junk.

IV. Piping closure (Date N/A):
A. Length of piping between tank and product dispenser: None feet.
B. Piping closure method: Note: Tank was used for storage of used oil. 3'± stand pipe.

V. Site Assessment (Date 6/13/92):

A. Free product present: Yes ✓ No ____.
B. Sampling:

1) Date of sampling: 6/13/92
2) Type of sampling device: Soils Trowel
Water
3) Type of sample container: Soils 902 Jar.
Water
4) Composite samples: Yes ✓ No ____.

C. Analysis:
1) Lab name: Technical Testing Laboratories
2) Date sample analyzed: 6/16/92 (Copies Att.) (NOTE: Provide Lab QA Plan).
3) A copy of original sample report as received from lab must be available upon request.

D. Provide a diagram of sample locations and depths.

Closure No. C-2511-92
WV. ID. No. 2002600
WV. Division of Highways
Material Control Soil Testing Division
Michigan Avenue
Charleston, WV

280.61:

On 5/18/92 the above closure numbers were obtained for the removal of a 1000 gallon underground storage tank which was used exclusively for the storage of used oil.

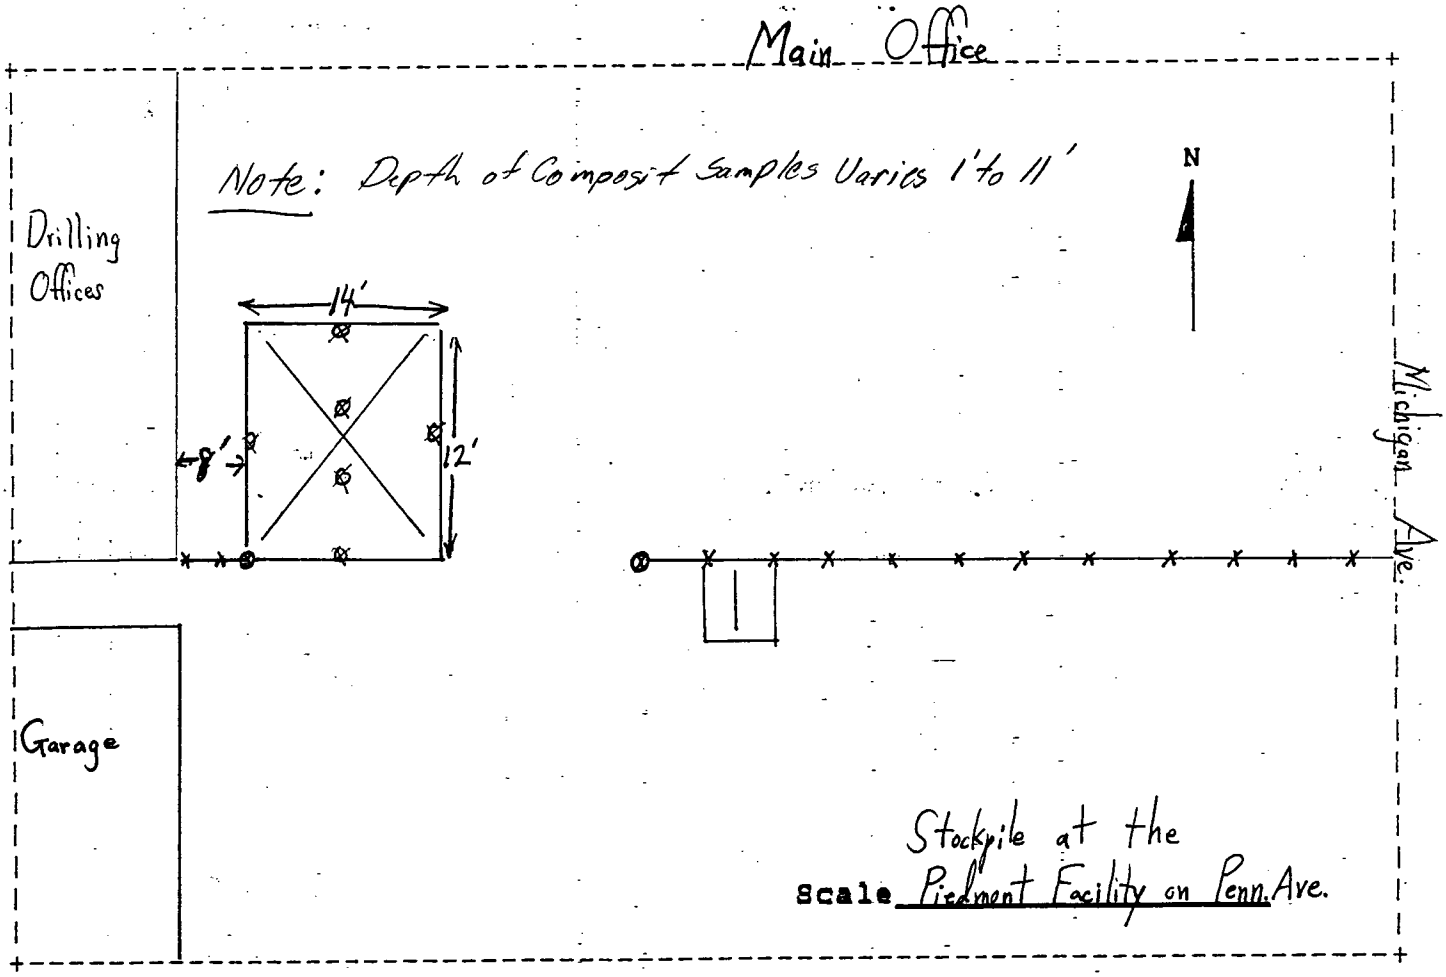
280.62:

On 5/18/92 the divisions waste oil contracts (Safety Clean) removed the contents of the tank. The tank was scheduled for removal on 6/13/92, at the time approximately 150 gallons of used oil and sludge was removed from the tank and the tank was removed from the ground. Approximately 50 ± gallons of used oil was present in the excavated area which was removed by excavating.

280.63:

The site is located on Michigan Avenue in Charlestons East End in a mostly residential area. The area is served by a municipal water and sewer system. Sub-surface conditions consist of sandy clay material and according to the soil test results the contamination was contained within the excavated area. The stockpiled material stored at the divisions facility on Pennsylvania Avenue was disposed of at the Sycamore Landfill at Hurricane, Putnam County West Virginia.

280.64



Mr. Jeff Beverly, District One Safety Inspector and Mr. Wayne Hess, Buildings and Grounds Supervisor, were present during the removal of free product. The material was excavated along with an additional two (2) feet ± of material and stock piled at our Pennsylvania Avenue complex and samples of the excavated area obtained.

Charleston, West Virginia 25301

Dear Mr. Sattler:

In accordance with our recent telephone conversation, please change the mailing address on Underground Storage Tank matters to;

West Virginia Division of Highways
Equipment Division
Post Office Box 610
Buckhannon, West Virginia 26201

Attention: Mr. Don E. Post
Fleet Planning Supervisor

Position responsibilities have changed since the Underground Storage Tank Program began. Tanks are now managed statewide by Mr. Post. Routing of pertinent correspondence to that office would be more efficient.

Thank you for your cooperation.

Sincerely,

Randall G. Biller
Executive Assistant

NOTICE OF CLOSURE

TO: Underground Storage Tank Owners and/or Operators

FROM: Underground Storage Tank Program
West Virginia Division of Natural Resources
Waste Management Section

DATE OF NOTICE: 5/12/92 EXPIRATION DATE: 7/12/92

This office has received your notice of tank removal and/or closure. Your site has been assigned closure number C-2511 -92. Please refer to this number on any further correspondence concerning this closure. The tank closure is not to begin until 30 days after the date of notice. The site assessment may be performed during those 30 days.

If you should have any questions, please call UST Office at (304) 558-6371.

Owner/Operator Mailing Address:
WV Div of Highways
PO Box 610 - Equipment Div
Buckhannon, WV 26201
Attn: Don Post

Location of tanks:
MC 5T0 N
312 Michigan Ave
Charleston, WV 25311

Date: 5/15/92
Signed: [signature]

Instructions:
1. Contact UST Office at least 5 days before beginning work.
2. If evidence of contamination if found, it must be reported to the WV DNR District office within 24 hours (See attached page).
3. Copies of site assessments indicating contamination are to be mailed to the appropriate WVDNR district offices. Notification forms are to be mailed to the Charleston office.

TYPE OF NOTIFICATION

☐ A. NEW FACILITY ☐ B. AMENDED ☐ C. CLOSURE

(6) No. of tanks at facility ____ No. of continuation sheets attached

INSTRUCTIONS

Please type or print in ink all items except "signature" in section V. This form must be completed for each location containing underground storage tanks. If more than five (5) tanks are owned at this location, photocopy the following sheets, and staple continuation sheets to the form.

GENERAL INFORMATION

Notification is required by Federal law for all underground tanks that have been used to store regulated substances since January 1, 1984, that are in the ground as of May 8, 1986, or that are brought into use after May 8, 1986. The information requested is required by Section 9002 of the Resource Conservation and Recovery Act, (RCRA), as amended.

The primary purpose of this notification program is to locate and evaluate underground tanks that store or have stored petroleum or hazardous substances. It is expected that the information you provide will be based on reasonably available records, or in the absence of such records, your knowledge, belief, or recollection.

Who Must Notify? Section 9002 of RCRA, as amended, requires that, unless exempted, owners of underground tanks that store regulated substances must notify designated State or local agencies of the existence of their tanks. Owner means—

a) in the case of an underground storage tank in use on November 8, 1984, or brought into use after that date, any person who owns an underground storage tank used for the storage, use, or dispensing of regulated substances, and

b) in the case of any underground storage tank in use before November 8, 1984, but no longer is use on that date, any person who owned such tank immediately before the discontinuation of its use.

c) if the State agency so requires, any facility that has undergone any changes to facility information or tank system status (only amended tank information needs to be included).

What Tanks Are Included? Underground storage tank is defined as any one or combination of tanks that (1) is used to contain an accumulation of "regulated substances," and (2) whose volume (including connected underground piping) is 10% or more beneath the ground. Some examples are underground tanks storing: 1. Gasoline, used oil, or diesel fuel, and 2. industrial solvents, pesticides, herbicides or fumigants.

What Tanks Are Excluded? Tanks removed from the ground are not subject to notification. Other tanks excluded from notification are:

1. farm or residential tanks of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes;
2. tanks used for storing heating oil for consumptive use on the premises where stored;
3. septic tanks;
4. pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
5. surface impoundments, pits, ponds, or lagoons;
6. storm water or waste water collection systems;
7. flow-through process tanks;
8. liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
9. storage tanks situated in an underground area (such as a basement, cellar, mineworking, drift, shaft, or tunnel) if the storage tank is situate upon or above the surface of the floor.

What Substances Are Covered? The notification requirements apply to under ground storage tanks that contain regulated substances. This includes any substance defined as hazardous in section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA. It also includes petroleum (e.g., crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

Where To Notify? Send completed forms to:

RECEIVED
MAY 9 1990
DIVISION OF NATURAL RESOURCES
WASTE MANAGEMENT SECTION

When To Notify? 1. Owners of underground storage tanks in use or that have been taken out of operation after January 1, 1974, but still in the ground, must notify by May 8, 1986. 2. Owners who bring underground storage tanks into use after May 8, 1986, must notify within 30 days of bringing the tanks into use. 3. If the State requires notification of any amendments to facility send information to State agency immediately.

Penalties: Any owner who knowingly fails to notify or submits false information shall be subject to a civil penalty not to exceed $10,000 for each tank for which notification is not given or for which false information is submitted.

TANK CLOSURE REPORT FOR:
(Complete One for Each Tank)
WV I.D. No. 03902608
(If None, write None)
Closure No. C-720-90

Company name WVDOH - MCS&TD
Address 312 Michigan Ave.
Telephone no. 348-3039

I. Tank closure:

A. Liquid waste:

1) Type of liquid waste emptied from tank: Water/Gas.
2) Amount of liquid waste emptied from tank: ≈ 1400 gallon.
3) Disposal method of liquid waste Fuel blending and location Nitro.

B. Solid waste (sludges, scale, etc.):

1) Amount cleaned from tank: .
2) Disposal method and location .
3) Describe tank cleaning and vapor purging methods:

II. Tank abandonment only (Date):
A. Type of inert material used to fill tank: .

III. Tank removal only (Date 4/17/90):
A. Tank destination Buckhannon Equipment Garage.
B. Future use of tank: Scrap.

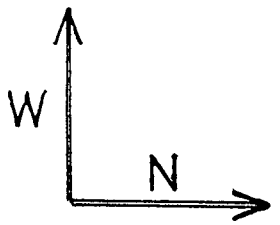
IV. Piping closure (Date 4/17/90):
A. Length of piping between tank and product dispenser: 15 feet.
B. Piping closure method: Removed.

V. Site Assessment (Date 4/17/90):

A. Free product present: Yes ____ No ✓.
B. Sampling:

1) Date of sampling: 4/17/90
2) Type of sampling device: Soils Scoop
Water Bailer.
3) Type of sample container: Soils Glass Jars
Water Glass Jar.
4) Composite samples: Yes ✓ No ____.

C. Analysis:
1) Lab name: REIC Laboratories.
2) Date sample analyzed: 4/23/90 (NOTE: Provide Lab QA Plan).
3) A copy of original sample report as received from lab must be available upon request.



D. Provide a diagram of sample locations and depths.

FOR TANKS IN **WV**

RETURN COMPLETED FORM TO:

UST NOTIFICATION
DEPARTMENT OF NATURAL RESOURCES
1260 GREENBRIER STREET
CHARLESTON WV 25311

STATE USE ONLY

I.D. Number 039026 08

Date Received

GENERAL INFORMATION

Notification is required by Federal law for all underground tanks that have been used to store regulated substances since January 1, 1974, that are in the ground as of May 8, 1986, or that are brought into use after May 8, 1986. The information requested is required by Section 9002 of the Resource Conservation and Recovery Act, (RCRA), as amended.

The primary purpose of this notification program is to locate and evaluate underground tanks that store or have stored petroleum or hazardous substances. It is expected that the information you provide will be based on reasonably available records, or, in the absence of such records, your knowledge, belief, or recollection.

Who Must Notify? Section 9002 of RCRA, as amended, requires that, unless exempted, owners of underground tanks that store regulated substances must notify designated State or local agencies of the existence of their tanks. Owner means—

(a) in the case of an underground storage tank in use on November 8, 1984, or brought into use after that date, any person who owns an underground storage tank used for the storage, use, or dispensing of regulated substances, and

(b) in the case of any underground storage tank in use before November 8, 1984, but no longer in use on that date, any person who owned such tank immediately before the discontinuation of its use.

What Tanks Are Included? Underground storage tank is defined as any one or combination of tanks that (1) is used to contain an accumulation of "regulated substances," and (2) whose volume (including connected underground piping) is 10% or more beneath the ground. Some examples are underground tanks storing: **1.** gasoline, used oil, or diesel fuel, and **2.** industrial solvents, pesticides, herbicides or fumigants.

What Tanks Are Excluded? Tanks removed from the ground are not subject to notification. Other tanks excluded from notification are:

1. farm or residential tanks of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes;
2. tanks used for storing heating oil for consumptive use on the premises where stored;
3. septic tanks;
4. pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
5. surface impoundments, pits, ponds, or lagoons;
6. storm water or waste water collection systems;
7. flow-through process tanks;
8. liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
9. storage tanks situated in an underground area (such as a basement, cellar, mineworking, drift, shaft, or tunnel) if the storage tank is situated upon or above the surface of the floor.

What Substances Are Covered? The notification requirements apply to underground storage tanks that contain regulated substances. This includes any substance defined as hazardous in section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA. It also includes petroleum, e.g., crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

Where To Notify? Completed notification forms should be sent to the address given at the top of this page.

When To Notify? 1. Owners of underground storage tanks in use or that have been taken out of operation after January 1, 1974, but still in the ground, must notify by May 8, 1986. **2.** Owners who bring underground storage tanks into use after May 8, 1986, must notify within 30 days of bringing the tanks into use.

Penalties: Any owner who knowingly fails to notify or submits false information shall be subject to a civil penalty not to exceed $10,000 for each tank for which notification is not given or for which false information is submitted.

INSTRUCTIONS

Please type or print in ink all items except "signature" in Section V. **This form must by completed for each location containing underground storage tanks.** If more than 5 tanks are owned at this location, photocopy the reverse side, and staple continuation sheets to this form.

Office of Waste Management-UST Section
1356 Hansford Street
Charleston, West Virginia 25301

Re: Central Motor Pool, 01701 Facility
212 California Avenue, Charleston, West Virginia

Dear Mr. Henger:

The Division of Highways proposes to permanently close the Central Motor Pool 01701 Facility located at 212 California Avenue, in Charleston WV, as called for in a plan of the West Virginia State Capitol Complex to locate H.V.A.C. units on this site.

Closure numbers are requested for the removal of a 6000 gallon gasoline tank, a 4000 gallon gasoline tank, and a 500 gallon used oil tank at this site.

The Division of Highways requests a waiver of the thirty (30) day notification period as notice.

TYPE OF NOTIFICATION

☐ A. NEW FACILITY ☐ B. AMENDED ☑ C. CLOSURE

____ No. of tanks at facility ____ No. of continuation sheets attached

INSTRUCTIONS

Please type or print in ink all items except "signature" in section VIII. This form must be completed for each location containing underground storage tanks. If more than five (5) tanks are owned at this location, photocopy the following sheets, and staple continuation sheets to the form.

GENERAL INFORMATION

Notification is required by Federal law for all underground tanks that have been used to store regulated substances , that are in the ground as of May 8, 1986, or that are brought into use after May 8, 1986. The information requested is required by Section 9002 of the Resource Conservation and Recovery Act, (RCRA), as amended.

The primary purpose of this notification program is to locate and evaluate underground tanks that store or have stored petroleum or hazardous substances. It is expected that the information you provide will be based on reasonably available records, of the existence of such records, your knowledge, belief, or recollection.

Who Must Notify? Section 9002 of RCRA, as amended, requires that, unless exempted, owners of underground tanks that store regulated substances must notify designated State or local agencies of the existence of their tanks. "Owner" means—

a) in the case of an underground storage tank in use on November 8, 1984, or brought into use after that date, any person who owns an underground storage tank used for the storage, use, or dispensing of regulated substances; and

b) in the case of any underground storage tank in use before November 8, 1984, but no longer in use on that date, any person who owned such tank immediately before the discontinuation of its use.

c) if the State agency so requires, any facility that has undergone any changes to facility information or tank system status (only amended tank information needs to be included).

What Tanks Are Included? Underground storage tank is defined as any one or combination of tanks that (1) is used to contain an accumulation of "regulated substances," and (2) whose volume (including connected underground piping) is 10% or more beneath the ground. Some examples are underground tanks storing: 1. Gasoline, used oil, or diesel fuel, and 2. industrial solvents, pesticides, herbicides or fumigants.

What Tanks Are Excluded? Tanks removed from the ground are not subject to notification. Other tanks excluded from notification are:

1. farm or residential tanks of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes;
2. tanks used for storing heating oil for consumptive use on the premises where stored;
3. septic tanks;
4. pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
5. surface impoundments, pits, ponds, or lagoons;
6. storm water or waste water collection systems;
7. flow-through process tanks;
8. liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
9. storage tanks situated in an underground area (such as a basement, cellar, mineworking, drift, shaft, or tunnel) if the storage tank is situate upon or above the surface of the floor.

What Substances Are Covered? The notification requirements apply to underground storage tanks that contain regulated substances. This includes any substance defined as hazardous in section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA. It also includes petroleum, e.g., crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

Where To Notify? Send completed forms to:

WV Division of Environmental Protection
Office of Waste Management
UST Section
1356 Hanford Street
Charleston, WV 25301

When To Notify? 1. Owners of underground storage tanks in use or that have been taken out of operation , but still in the ground, must notify by May 8, 1986. 2. Owners who bring underground storage tanks into use after May 8, 1986, must notify within 30 days of bringing the tanks into use. 3. If the State requires notification of any amendments to facility send information to State agency immediately.

Penalties: Any owner who knowingly fails to notify or submits false information shall be subject to a civil penalty not to exceed $10,000 for each tank for which notification is not given or for which false information is submitted.

CT&E ENVIRONMENTAL SERVICES INC.

TERMS AND CONDITIONS

By accepting a proposal or price quotation, placing a work request, submitting a sample for testing, or using a report from CT&E Environmental Services Inc. (CT&E ESI) the Client agrees to the following terms and conditions:

SCOPE OF SERVICES

CT&E ESI performs testing services on samples submitted to or collected by CT&E ESI using environmental testing industry accepted protocols, practices and standards and as requested by Client. CT&E ESI provides a written report of analytical results.

Turn around time (TAT) is measured in business days (weekends and holidays excluded) and begins the day after the sample arrives at the laboratory. CT&E ESI's typical TAT is 10 business days. Expedited service may be available with advance consultation.

DUTIES OF CUSTOMER

Client will submit written work requests to CT&E ESI stating scope and timing of work, testing criteria and any other information necessary for CT&E ESI to perform the work. Client will designate a representative to transmit instructions, receive information, and make decisions.

Samples delivered to CT&E ESI must be preceded or accompanied by written disclosure of any hazardous substances known or suspected by Client. Samples suspected of containing a hazardous substance must be packaged, labeled, transported and delivered in accordance with applicable laws, with safety of utmost concern.

CT&E ESI reserves the absolute right to refuse delivery or revoke acceptance of any sample which in the sole judgment of CT&E ESI is of unsuitable volume, arrives in a leaking or damaged container, or may pose a risk in handling, transport or processing or for any other reason, whether or not due to the presence in the sample of any hazardous substance and whether or not such presence has been disclosed to CT&E ESI by the Client.

PAYMENT TERMS & PRICE

For clients with approved credit, CT&E ESI will bill monthly for work completed during the previous month. Client agrees to pay invoices within thirty (30)days after receipt. Client agrees to pay a late charge on past due invoices at one and one-half percent (1.5%) per month (eighteen percent (18%) per annum (or such lower rate required by law. Client agrees to pay all expenses incurred by CT&E ESI, including attorney fees and court costs, to collect any past due amounts.

Fees are per CT&E ESI's current price list and are subject to change without prior notice. Fees include sample and shipping containers. CT&E ESI requires at least 3 business days notice to prepare and ship sample containers. Non-expedited shipping costs to the client are assumed by CT&E ESI. Rush delivery shipping charges are assumed by the Client. Results are delivered by mail or with special arrangements verbally, by fax or computer disk. Surcharges for rush analysis are: 1-2 Day TAT = 2 X Standard Fee; 3-5 Day TAT = 1.5 X Standard Fee.

LIMITED WARRANTY

CT&E ESI shall perform all services with reasonable care and diligence normal to the environmental testing industry. CT&E ESI's sole obligation hereunder shall be to re-perform services which are materially deficient without charge, so long as such deficiencies are reported in writing to CT&E ESI within thirty (30) days after the discovery thereof, but in no event later than one (1) year from the performance of the services by CT&E ESI.

By their very nature sampling, testing, and other CT&E ESI services are limited in scope and subject to expected measurement variability and possible interferences in the measurement process caused by the sample matrix. CT&E ESI makes no warranty that the tested sample is representative of the source from which the sample was taken or that any particular analysis can be performed on a particular sample. CT&E ESI may on occasion utilize subcontractors.

CT&E ESI MAKES NO EXPRESS OR IMPLIED WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE ON THE SERVICES OF CT&E ESI. IN NO EVENT SHALL CT&E ESI BE LIABLE FOR ANY INDIRECT, SPECIAL OR CONSEQUENTIAL DAMAGES. NOR SHALL CT&E ESI BE LIABLE IN ANY EVENT, INCLUDING ITS OBLIGATION TO RE-PERFORM, FOR ANY LOSSES, DAMAGES OR CLAIMS IN EXCESS OF THE AMOUNT PAIDTO CT&E ESI FOR THE SERVICES HEREUNDER.

CONFIDENTIALITY

CT&E ESI shall keep documents and information related to the Client confidential and will not disclose any such information to third parties without Client permission except in response to legal process after giving a copy of such process to Client.

FORCE MAJEURE

CT&E ESI shall have no liability for nonperformance caused in whole or in part by causes beyond our reasonable control. Such causes include but are not limited to Acts of God, civil unrest and war, labor unrest and strikes, equipment failures, acts of authorities, or delays in transportation, mail or delivery services.

RECORDS/SAMPLE RETENTION

CT&E ESI will retain copies of data and reports for five years after which such documents will be destroyed. If Client requests additional copies of reports or data during the retention period, an additional charge will apply for the preparation and delivery of such reports.

Samples known or suspected to contain hazardous substances or determined by CT&E ESI to be incompatible with existing waste streams may be returned at Client's cost, to the Client upon completion of testing. Samples not destroyed in testing and not returned to the Client will be retained for 30 days after submittal of the final data report, and thereafter disposed of by CT&E ESI. Samples can be retained beyond 30 days at a monthly storage charge payable in advance.

CHOICE OF LAW

The agreement between Client and CT&E ESI shall be interpreted under the laws of the state in which CT&E ESI receives the samples.

AMENDMENT AND CONFLICTING PROVISIONS

These Terms and Conditions may be amended only by written agreement of CT&E ESI. These Terms and Conditions shall override conflicting provisions contained in Client purchase order or other standard form documents.

Additional Terms and Conditions

Definition of Terms
When used in this document, the following terms shall have the meanings given below:

Used Oil means any oil that has been refined from crude oil or any synthetic oil, that has been used and as a result of such use is contaminated by physical or chemical impurities. As used herein, Used Oil includes oil generated by individuals through the maintenance of their personal vehicles (hereinafter do-it-yourselfer used oil). Petroleum hydrocarbons used as solvents are specifically excluded from the definition of Used Oil.

Nonhazardous Wastes include spent materials that are not listed in 40 CFR Part 261 Subpart D and do not exhibit any of the characteristics included in 40 CFR Part 261 Subpart C.

Vehicle Fluids are limited to Used Oils, nonhazardous antifreeze, and oily waters originating from the maintenance of vehicles, and household do-it-yourselfer used oil. The term vehicle as used herein includes, but is not limited to automobiles, buses, trucks, tractors, aircraft and similar type vehicles utilizing internal combustion engines.

Non-Vehicle Fluids include all Used Oils and Nonhazardous Wastes that are not classified as Vehicle Fluids. Non-Vehicle Fluids include, but are not limited to cutting oils, hydraulic fluids, compressor oils, metal working oils and other nonhazardous aqueous waste streams. Mixtures of Non-Vehicle Fluids with Vehicle Fluids are classified as Non-Vehicle Fluids.

Nonconforming Wastes include: 1) materials provided to Safety-Kleen which have been mixed, combined or otherwise blended with materials containing regulated levels of polychlorinated biphenyls (PCBs); 2) materials provided to Safety-Kleen which have been mixed, combined, or otherwise blended with materials regulated as hazardous wastes under applicable laws, including but not limited to 40 CFR Part 261; and 3) materials provided to Safety-Kleen that exhibit chemical or physical characteristics which deviate from the analytical results obtained from analysis of Customer's prequalification sample previously provided to Safety-Kleen.

CESQG, conditionally exempt small quantity generator. Customer is a CESQG if he generates no more than 100 kilograms of hazardous wastes in a given calendar month. In the event that Customer is located in a state that has adopted a more stringent definition, then the state definition shall apply.

SQG, small quantity generator. Customer is a SQG if he generates more than 100 kilograms but less than 1000 kilograms of hazardous wastes in a given calendar month. In the event that Customer is located in a state that has adopted a more stringent definition, then the state definition shall apply.

LQG, large quantity generator. Customer is a LQG if he generates more than 1000 kilograms of hazardous wastes in a given calendar month. In the event that Customer is located in a state that has adopted a more stringent definition, then the state definition shall apply.

I. Safety-Kleen's Oil Service

Safety-Kleen's oil service includes the collection, transportation, and recycling or treatment of Used Oils and Nonhazardous Wastes in accordance with the requirements of 40 CFR Part 279 and applicable solid waste regulations. Customer is responsible for properly classifying his waste streams in accordance with the provisions of 40 CFR 262.11. Safety-Kleen will collect and transport the materials, based on Customer's representation of the materials, in accordance with all applicable local, state, and federal regulations, and may use third party transporters or rail companies to transport said materials to its final destination. Safety-Kleen has the capacity and is permitted to accept, store and reclaim or process the materials described on the reverse side of this document.

Based on representations made by Customer regarding the type of oil generated and the hazardous waste generation rate, Safety-Kleen may screen the materials for the presence of regulated hazardous wastes. In addition, at the time of collection Safety-Kleen may take and retain a sample of the material collected. Upon request at time of service, Safety-Kleen will provide Customer with a retain sample of the material collected.

II. Warranties and Indemnification

Customer warrants and represents that the materials provided hereunder are limited to Used Oils, Nonhazardous Wastes, and/or CESQG wastes as defined above. Customer further warrants and represents that no Nonconforming Wastes, as defined above, have been provided to Safety-Kleen. Safety-Kleen relies on Customer's representations and Customer is responsible for informing Safety-Kleen of any process changes that may alter the characteristics of the materials provided to Safety-Kleen.

In the event that materials provided hereunder are found by Safety-Kleen not to conform, or are suspected of not conforming, with the representations provided herein, Customer agrees to provide Safety-Kleen or its representatives access to the tanks/containers which had stored the materials for the purpose of taking a sample of any remaining residuals.

In the event that any materials provided hereunder are found not to conform with representations provided herein, Safety-Kleen may, at its option and if allowed by law, return the materials, and all waste streams subsequently contaminated thereby, to Customer, or Safety-Kleen may cause such materials to be properly disposed of. Customer shall be responsible for all expenses incurred in the proper disposal of Nonconforming Wastes, and the disposal of materials subsequently contaminated thereby. Customer agrees to indemnify and hold harmless Safety-Kleen, its officers, directors, employees and agents from and against any and all losses, expenses, damages, demands, claims, or judgments arising out of or relating to Customer's breach of these terms and conditions.

INVOICES REFLECTING CHARGES TO CUSTOMER ARE SUBJECT TO AN INTEREST RATE OF THE LESSER OF 1.5% PER MONTH (18% PER ANNUM) OR THE MAXIMUM RATE ALLOWED BY LAW ON ANY INVOICES THAT ARE NOT PAID WITHIN 30 DAYS. IN THE EVENT OF DEFAULT, SAFETY KLEEN SHALL BE ENTITLED TO RECOVER COSTS OF COLLECTION, INCLUDING REASONABLE ATTORNEY'S FEES.
IN THE EVENT THE CREDIT CARD ISSUER REFUSES TO ACCEPT THE CREDIT CARD CHARGE FOR THIS TRANSACTION, YOU ARE AUTHORIZED TO CHARGE THE AMOUNT OF THIS TRANSACTION TO MY SAFETY-KLEEN ACCOUNT.

SAFETY-KLEEN RELIES ON THESE WARRANTIES OF THE CUSTOMER IN ENTERING INTO THIS AGREEMENT TO TRANSPORT THE USED FLUIDS IN ACCORDANCE WITH ALL APPLICABLE STATE AND FEDERAL REGULATIONS. CUSTOMER AGREES TO INDEMNIFY, DEFEND, AND HOLD SAFETY-KLEEN HARMLESS FOR ANY AND ALL DAMAGES SUFFERED BY SAFETY-KLEEN ARISING OUT OF OR RELATING IN ANYWAY TO ITS BREACH OF THE AGREEMENT OR ITS POSSESSION AND/OR USE OF THE ABOVE REFERENCED CONTAINER(S).

IN ADDITION TO AN IN ACCORDANCE WITH THE TERMS AND CONDITIONS ON THE REVERSE SIDE OF THIS DOCUMENT, CUSTOMER EXPRESSLY WARRANTS AND REPRESENTS TO SAFETY-KLEEN CORP. THAT:

1. THE MATERIALS PROVIDED HEREUNDER HAVE NOT BEEN MIXED, COMBINED OR OTHERWISE BLENDED IN ANY QUANTITY WITH MATERIALS CONTAINING POLYCHLORINATED BIPHENYLS (PCBs) OR ANY OTHER MATERIAL REGULATED AS A HAZARDOUS WASTE UNDER APPLICABLE LAWS, INCLUDING BUT NOT LIMITED TO 40 CFR PART 261, AND

2. THE BOX CHECKED IN THE GENERATOR STATUS SECTION ABOVE ACCURATELY REFLECTS CUSTOMER'S HAZARDOUS WASTE STATUS AND THE TYPE OF FLUIDS GENERATED, AS DEFINED ON THE BACK OF THIS DOCUMENT.

CUSTOMER AGREES TO INDEMNIFY AND HOLD SAFETY-KLEEN CORP. HARMLESS FOR ANY DAMAGES, COSTS, ATTORNEY'S FEES, ETC. ARISING OUT OF OR IN ANYWAY RELATED TO A BREACH BY CUSTOMER OF THE ABOVE WARRANTY OR THE ADDITIONAL TERMS AND CONDITIONS.

STATE OF NEW HAMPSHIRE CERTIFICATION (N.H. CUSTOMERS ONLY)

This used oil is destined to be recycled and is subject to regulation by the New Hampshire Department of Environmental services under Part ENV-WM 807. I certify that this used oil is not hazardous waste fuel as defined in ENV-WM 807.04 and that I have not mixed this used oil with any other hazardous wastes identified in Chapter ENV-WM 400 or any used oil classified as a hazardous waste fuel under 807.04. Customer signature is required on front.

B. Data Entry Clerk Initials _____
C. Owner Was Contacted to Clarify Responses. Comments

TYPE OF NOTIFICATION

☐ A. NEW FACILITY ☑ B. AMENDED ☐ C. CLOSURE

1 No. of tanks at facility ____ No. of continuation sheets attached

INSTRUCTIONS

Please type or print in ink all items except "signature" in section VIII. This form must be completed for each location containing underground storage tanks. If more than five (5) tanks are owned at this location, photocopy the following sheets, and staple continuation sheets to the form.

GENERAL INFORMATION

Notification is required by Federal law for all underground tanks that have been used to store regulated substances , that are in the ground as of May 8, 1986, or that are brought into use after May 8, 1986. The information requested is required by Section 9002 of the Resource Conservation and Recovery Act, (RCRA), as amended.

The primary purpose of this notification program is to locate and evaluate underground tanks that store or have stored petroleum or hazardous substances. It is expected that the information you provide will be based on reasonably available records, or in the absence of such records, your knowledge, belief, or recollection.

Who Must Notify? Section 9002 of RCRA, as amended, requires that, unless exempted, owners of underground tanks that store regulated substances must notify designated State or local agencies of the existence of their tanks. Owner means—

a) in the case of an underground storage tank in use on November 8, 1984, or brought into use after that date, any person who owns an underground storage tank used for the storage, use, or dispensing of regulated substances; and

b) in the case of any underground storage tank in use before November 8, 1984, but no longer is use on that date, any person who owned such tank immediately before the discontinuation of its use.

c) if the State agency so requires, any facility that has undergone any changes to facility information or tank system status (only amended tank information needs to be included).

What Tanks Are Included? Underground storage tank is defined as any one or combination of tanks that (1) is used to contain an accumulation of "regulated substances," and (2) whose volume (including connected underground piping) is 10% or more beneath the ground. Some examples are underground tanks storing: 1. Gasoline, used oil, or diesel fuel, and 2. industrial solvents, pesticides, herbicides or fumigants.

What Tanks Are Excluded? Tanks removed from the ground are not subject to notification. Other tanks excluded from notification are:

1. farm or residential tanks of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes;
2. tanks used for storing heating oil for consumptive use on the premises where stored;
3. septic tanks;
4. pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
5. surface impoundments, pits, ponds, or lagoons;
6. storm water or waste water collection systems;
7. flow-through process tanks;
8. liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
9. storage tanks situated in an underground area (such as a basement, cellar, mineworking, drift, shaft, or tunnel) if the storage tank is situate upon or above the surface of the floor.

What Subetances Are Covered? The notification requirements apply to under ground storage tanks that contain regulated substances. This includes any substance defined as hazardous in section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA. It also includes petroleum, e.g., crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

Where To Notify? Send completed forms to:

WV Division of Environmental Protection
Office of Waste Management
UST Section
1356 Hanford Street
Charleston, WV 25301

RECEIVED
JUL 26 1995
OFFICE OF WASTE MANAGEMENT
UST SECTION

When To Notify? 1. Owners of underground storage tanks in use or that have been taken out of operation , but still in the ground, must notify by May 8, 1986. 2. Owners who bring underground storage tanks into use after May 8, 1986, must notify within 30 days of bringing the tanks into use. 3. If the State requires notification of any amendments to facility send information to State agency immediately.

Penalties: Any owner who knowingly fails to notify or submits false information shall be subject to a civil penalty not to exceed $10,000 for each tank for which notification is not given or for which false information is submitted.

Mr. Gil W. Sattler
Department of Commerce, Labor &
Environmental Resources
Waste Management Section
1356 Hansford Street
Charleston, West Virginia 25301

Dear Mr. Sattler:

In accordance with our recent telephone conversation, please change the mailing address on Underground Storage Tank matters to;

West Virginia Division of Highways
Equipment Division
Post Office Box 610
Buckhannon, West Virginia 26201

Attention: Mr. Don E. Post
Fleet Planning Supervisor

Position responsibilities have changed since the Underground Storage Tank Program began. Tanks are now managed statewide by Mr. Post. Routing of pertinent correspondence to that office would be more efficient.

Thank you for your cooperation.

Sincerely,

Randall G. Biller
Executive Assistant

INSTRUCTIONS

Please type or print in ink all items except "signature" in section V. This form must be completed for each location containing underground storage tanks. If more than five (5) tanks are owned at this location, photocopy the following sheets, and staple continuation sheets to the form.

GENERAL INFORMATION

Notification is required by Federal law for all underground tanks that have been used to store regulated substances since January 1, 1984, that are in the ground as of May 8, 1986, or that are brought into use after May 8, 1986. The information requested is required by Section 9002 of the Resource Conservation and Recovery Act, (RCRA), as amended.

The primary purpose of this notification program is to locate and evaluate underground tanks that store or have stored petroleum or hazardous substances. It is expected that the information you provide will be based on reasonably available records, or in the absence of such records, your knowledge, belief, or recollection.

Who Must Notify? Section 9002 of RCRA, as amended, requires that, unless exempted, owners of underground tanks that store regulated substances must notify designated State or local agencies of the existence of their tanks. Owner means—

a) in the case of an underground storage tank in use on November 8, 1984, or brought into use after that date, any person who owns an underground storage tank used for the storage, use, or dispensing of regulated substances, and

b) in the case of any underground storage tank in use before November 8, 1984, but no longer is use on that date, any person who owned such tank immediately before the discontinuation of its use.

c) if the State agency so requires, any facility that has undergone any changes to facility information or tank system status (only amended tank information needs to be included).

What Tanks Are Included? Underground storage tank is defined as any one or combination of tanks that (1) is used to contain an accumulation of "regulated substances," and (2) whose volume (including connected underground piping) is 10% or more beneath the ground. Some examples are underground tanks storing: 1. Gasoline, used oil, or diesel fuel, and 2. industrial solvents, pesticides, herbicides or fumigants.

What Tanks Are Excluded? Tanks removed from the ground are not subject to notification. Other tanks excluded from notification are:

1. farm or residential tanks of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes;
2. tanks used for storing heating oil for consumptive use on the premises where stored;
3. septic tanks;
4. pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
5. surface impoundments, pits, ponds, or lagoons;
6. storm water or waste water collection systems;
7. flow-through process tanks;
8. liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
9. storage tanks situated in an underground area (such as a basement, cellar, mineworking, drift, shaft, or tunnel) if the storage tank is situate upon or above the surface of the floor.

What Substances Are Covered? The notification requirements apply to under ground storage tanks that contain regulated substances. This includes any substance defined as hazardous in section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA. It also includes petroleum, e.g. crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

Where To Notify? Send completed forms to:

Waste Management Section
Division of Natural Resources
1356 Hansford Street
Charleston, WV 25301

RECEIVED MAR 4 1992 DIVISION OF NATURAL RESOURCES WASTE MANAGEMENT SECTION

When To Notify? 1. Owners of underground storage tanks in use or that have been taken out of operation after January 1, 1974 but still in the ground, must notify by May 8, 1986. 2. Owners who bring underground storage tanks into use after May 8, 1986, must notify within 30 days of bringing the tanks into use. 3. If the State requires notification of any amendments to facility send information to State agency immediately.

Penalties: Any owner who knowingly fails to notify or submits false information shall be subject to a civil penalty not to exceed $10,000 for each tank for which notification is not given or for which false information is submitted.

GENERAL INFORMATION

Notification is required by Federal law for all underground tanks that have been used to store regulated substances since January 1, 1974, that are in the ground as of May 8, 1986, or that are brought into use after May 8, 1986. The information requested is required by Section 9002 of the Resource Conservation and Recovery Act, (RCRA), as amended.

The primary purpose of this notification program is to locate and evaluate underground tanks that store or have stored petroleum or hazardous substances. It is expected that the information you provide will be based on reasonably available records, or, in the absence of such records, your knowledge, belief, or recollection.

Who Must Notify? Section 9002 of RCRA, as amended, requires that, unless exempted, owners of underground tanks that store regulated substances must notify designated State or local agencies of the existence of their tanks. Owner means—
(a) in the case of an underground storage tank in use on November 8, 1984, or brought into use after that date, any person who owns an underground storage tank used for the storage, use, or dispensing of regulated substances, and
(b) in the case of any underground storage tank in use before November 8, 1984, but no longer in use on that date, any person who owned such tank immediately before the discontinuation of its use.

What Tanks Are Included? Underground storage tank is defined as any one or combination of tanks that (1) is used to contain an accumulation of "regulated substances," and (2) whose volume (including connected underground piping) is 10% or more beneath the ground. Some examples are underground tanks storing: **1.** gasoline, used oil, or diesel fuel, and **2.** industrial solvents, pesticides, herbicides or fumigants.

What Tanks Are Excluded? Tanks removed from the ground are not subject to notification. Other tanks excluded from notification are:
1. farm or residential tanks of 1,100 gallons or less capacity used for storing motor fuel for noncommercial purposes;
2. tanks used for storing heating oil for consumptive use on the premises where stored;
3. septic tanks;
4. pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
5. surface impoundments, pits, ponds, or lagoons;
6. storm water or waste water collection systems;
7. flow-through process tanks;
8. liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
9. storage tanks situated in an underground area (such as a basement, cellar, mineworking, drift, shaft, or tunnel) if the storage tank is situated upon or above the surface of the floor.

CHARLESTON, W. VA. 25311

What Substances Are Covered? The notification requirements apply to underground storage tanks that contain regulated substances. This includes any substance defined as hazardous in section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of RCRA. It also includes petroleum, e.g., crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

Where To Notify? Completed notification forms should be sent to the address given at the top of this page.

When To Notify? 1. Owners of underground storage tanks in use or that have been taken out of operation after January 1, 1974, but still in the ground, must notify by May 8, 1986. **2.** Owners who bring underground storage tanks into use after May 8, 1986, must notify within 30 days of bringing the tanks into use.

Penalties: Any owner who knowingly fails to notify or submits false information shall be subject to a civil penalty not to exceed $10,000 for each tank for which notification is not given or for which false information is submitted.

INSTRUCTIONS

Please type or print in ink all items except "signature" in Section V. **This form must by completed for each location containing underground storage tanks.** If more than 5 tanks are owned at this location, photocopy the reverse side, and staple continuation sheets to this form.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

N2207015
302 JEFFERSON STREET
CHARLESTON, WV 25311

TARGET PROPERTY COORDINATES

Latitude (North):	38.337069 - 38° 20' 13.45''
Longitude (West):	81.608436 - 81° 36' 30.37''
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	446824.8
UTM Y (Meters):	4243183.5
Elevation:	599 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	6010614 CHARLESTON EAST, WV
Version Date:	2014
West Map:	6014363 CHARLESTON WEST, WV
Version Date:	2014

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

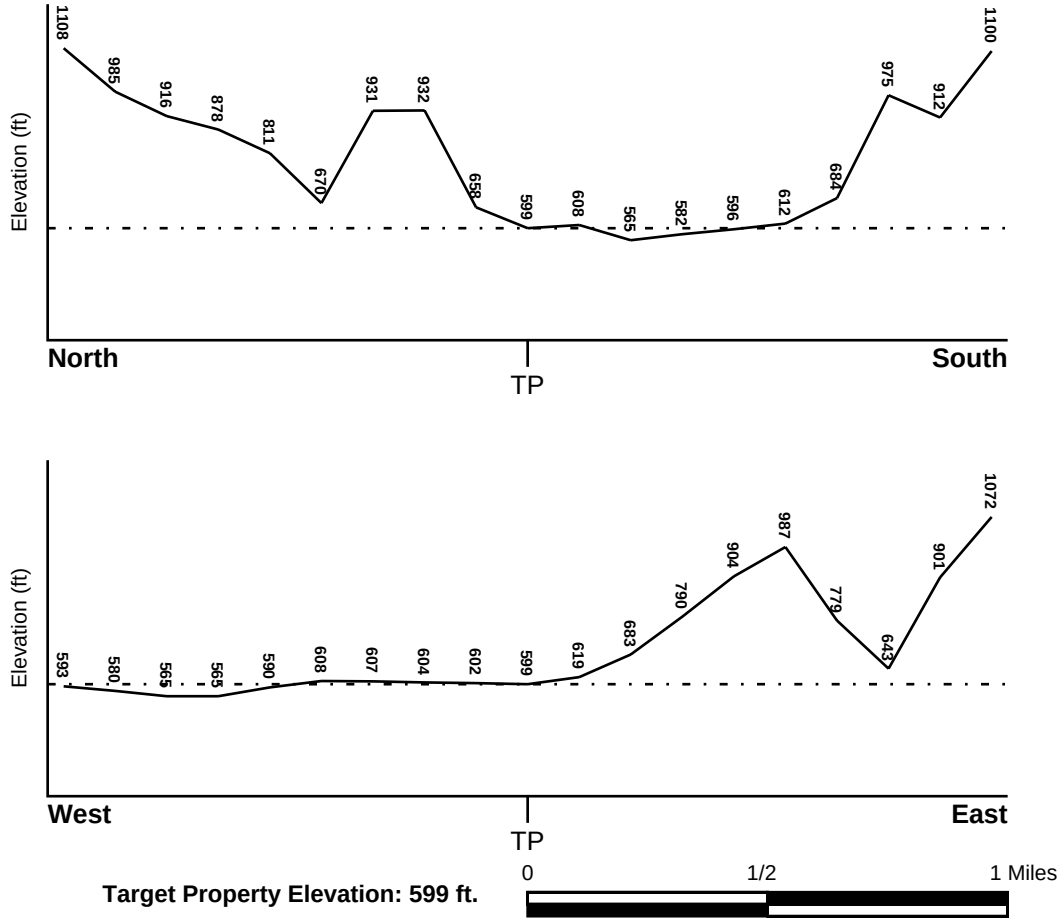
1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).



TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
54039C0428E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
54039C0427E	FEMA FIRM Flood data
54039C0426E	FEMA FIRM Flood data
54039C0429E	FEMA FIRM Flood data
54039C0409E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CHARLESTON EAST	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

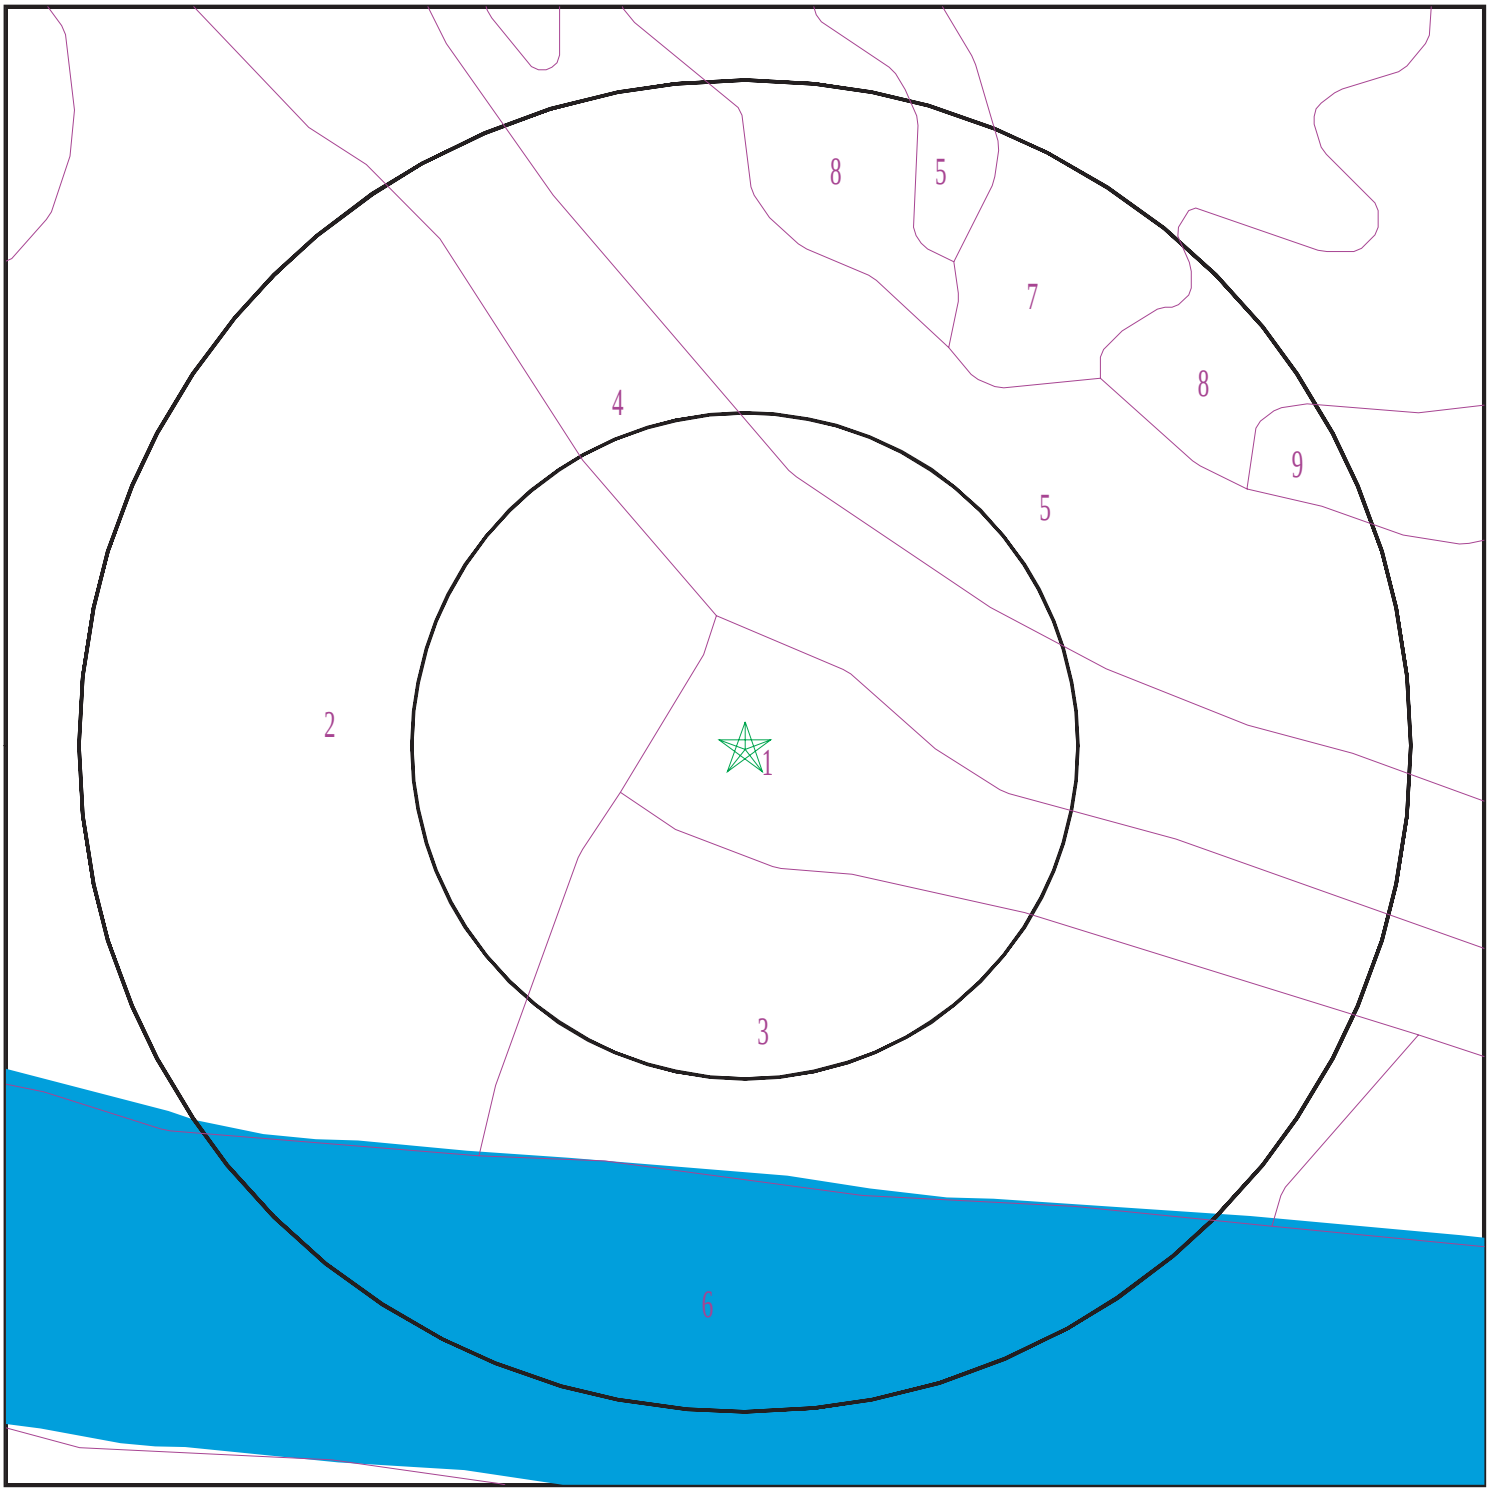
GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT



Era:	Paleozoic
System:	Pennsylvanian
Series:	Des Moinesian Series
Code:	PP2 *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Urban land

Soil Surface Texture: bedrock

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	bedrock	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 4

Soil Component Name: Udorthents, smoothed

Soil Surface Texture: bedrock

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 5

Soil Component Name: Clymer

Soil Surface Texture: channery loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 76 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	channery loam	Not reported	Not reported	Max: 4 Min: 1.4	Max: Min:
2	11 inches	37 inches	channery clay loam	Not reported	Not reported	Max: 4 Min: 1.4	Max: Min:
3	37 inches	51 inches	very channery loam	Not reported	Not reported	Max: 4 Min: 1.4	Max: Min:
4	51 inches	55 inches	weathered bedrock	Not reported	Not reported	Max: 4 Min: 1.4	Max: Min:

Soil Map ID: 6

Soil Component Name: Water

Soil Surface Texture: channery loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 7

Soil Component Name: Gilpin

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX E

CREDENTIALS

Levi J. Sheff, AEP, CNRP, PRA

SR. STAFF SCIENTIST

PROFESSIONAL NARRATIVE

By holistically evaluating biotic/abiotic variables and their interactions, Mr. Sheff's approach to scientific research is recognized for effectively characterizing ecosystem influencers/implications and amending adverse conditions on an array of private, commercial and protected lands. Throughout his career, he has provided scientific data for various curricula (e.g. State petroleum tank reimbursement programs, Brownfields sites, National Environmental Policy Act [NEPA], etc.) and to County, State and Federal agencies, civil works departments, commercial entities and local-internationally established organizations.

Supplementary to scientific research, Mr. Sheff develops businesses ranging from startup to store fronts for Fortune 500 enterprises, presiding over complete business operations & developing self-sustaining teams ranging from 5-100 personnel locally-internationally. Peripherally, Mr. Sheff historically designed & directed website & mobile application publications.

Recently, Mr. Sheff assisted in the early development of Terracon's Environmental Branch in West Fargo, North Dakota, initiated the Environmental Branch in Bismarck, North Dakota, and is currently directing the growth of Environmental and Natural Resource services in Charleston, West Virginia. He successfully meets objectives by steadily building community rapport, mentoring personnel and providing/designing/managing proposals and projects. Regular services include due-diligence property assessments (Phase I and II Environmental Site Assessments [ESAs] and succeeding assessments through corrective action/reclamation/restoration); NEPA and Environmental Assessments (EAs); aquatic resource delineations (including OHWM) and trending health condition assessments using chemical and biological indicators (e.g. laboratory testing, macro-invertebrates, plant communities, etc.); regulated materials surveys (e.g. asbestos); accustomed research (e.g. threatened, endangered and invasive species [habitat surveys]) and unaccustomed research (e.g. new in-situ brine remediation methods in the Bakken Formation). Moreover, Mr. Sheff assists geotechnical engineering projects (push-probe/hollow-stem augur boring advancements, temporary/permeant groundwater well installations, laboratory analysis [moisture, P200, atterbergs], etc.), serves on local social committee boards, supports the development/implementation of strategic company initiatives, and composes health & safety plans (HASPs) to lead an Incident & Injury-Free (IIF) workplace culture.

PROJECT EXPERIENCE

DUE DILIGENCE

Phase I Environmental Site Assessments: MN, ND, SD, KY, OH, WV, VA

Project manage and perform ESAs on a range of small-large business and property types (agricultural, petroleum, industrial, automotive, retail, healthcare, restaurants, transportation, telecommunications, etc.) for an array of curricula (State tank reimbursement programs, voluntary cleanup sites, Brownfields, etc.). The objective is to identify potential risks of hazardous substance impacts through an all-appropriate inquiry (AAI), which is performed by systematically performing site reconnaissance's, documenting site features and improvements (wells, septic, storage tanks, etc.), interviewing personnel, performing historical research (topographic/aerial imagery, city directories, Sanborn maps, title documents, assessor/equalization documents, etc.), reviewing regulatory reports (City, County, State, Federal), identifying recognized environmental conditions (RECs), and producing final reports with recommendations,

* *Work performed prior to Terracon*

according to American Society for Testing and Materials (ASTM) E1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. Mr. Sheff is recognized as an ASTM E1527-13 Environmental Professional (EP).

Phase II Environmental Site Assessments: MN, ND, SD, KY, OH, WV, VA
Design and oversee site investigations on a range of properties including State tank reimbursement programs, voluntary cleanup sites, Brownfields, etc. Compose HASPs and technical final site assessment reports for delineating vertical and horizontal site impacts (agricultural, petroleum, etc.). Field activities include conducting soil, groundwater, and vapor intrusion investigations using push-probe, hollow-stem auger, and/or hand-augur drilling equipment to collect initial or routine samples for laboratory analysis, installing sub-slap Vapor Pin® kits, and real-time monitoring with handheld field equipment (GPS, multiparameter sondes [temperature, dissolved oxygen, pH, PID, etc.).

Asbestos, Radon, Lead Paint, and Hazardous Materials Surveys: MN, ND, SD, WV
Conduct surveys in facilities including healthcare, commercial, residential, and telecommunications to identify and collect/submit samples of suspect asbestos-containing materials (ACMs) for confirmation laboratory analysis. Comparable surveys are conducted for radon and lead-based paint in facilities located in ND.

Geotechnical Investigations: MN, ND, SD
Assists with advancing and patching (when necessary) soil borings using a variety of drilling methods and equipment. Soil profiles are characterized during geotechnical soil investigations, which have ranged down to 80+ feet below grade surface (bgs). Experience has ranged from soil boring to installing temporary and permanent groundwater wells, to performing various Geotechnical soil tests in the laboratory.

NATURAL RESOURCES

Environmental Assessments: SD
EAs are concise public documents prepared under the NEPA to provide sufficient evidence of potential environmental impacts from a proposed federal action or action federally supported. The evaluation determines whether a proposed action would require preparation of an environmental impact statement (EIS), a finding of no significant impact (FONSI) or considering alternative actions to minimize potential impacts while ensuring the purpose/needs are fully satisfied. Experience includes a range of developing greenfield/rural to commercial expansion sites.

Wetland Research Scientist - North Dakota State University (NDSU)*
Research was conducted through NDSU for the Environmental Protection Agency (EPA), contributing to the initial stages of the ongoing 5-year National Wetland Health Condition Assessment (NWCA – year 2011). Mr. Sheff was part of the team of specialists selected for refining the progression/evolution of the plant community research standards which would then pilot the ongoing monitoring program throughout the Prairie Pothole Region. Research involved wetland delineations and health condition assessments including evaluations of their chemical, physical, and biological integrities while considering ecosystem influencers. Site set-up made use of GPS and ArcView Global Information System (GIS) software. Vegetation species, prominence, and densities were evaluated by quadrant surveying on upland, wet meadow and shallow marsh communities. Hydrology and soils were evaluated using wetland stress indicators and the results from submitted laboratory samples. Additional responsibilities entailed researching projects for graduate students and the assembly of taxidermy entries of terrestrial forb species into NDSU's Herbarium database.

Biological Specialist - USACE*
Vertical profiles were created using data obtained by routinely monitoring reservoirs located in the Red River Basin of the North with multi-parameter YSI/Hydrolab sonde and GPS/GIS equipment. The equipment was used to record limnological parameters per meter, for system stratification analysis; further evaluations utilized data of collected water samples submitted for laboratory analysis. Trends were evaluated and described in technical water quality reports. Additional projects included lake vegetation surveys and conducting other various chemical, biological, and ecological research on local region lakes and terrestrial USACE-jurisdiction properties.

Aquatic Resource and OHWM Delineations: MN, ND, WV
Conduct up to Level 3 assessments for potential aquatic resources (e.g. wetlands, tributaries, etc.) by evaluating hydrological, vegetative, and soil hydrology indicators on an array of environmental/topographic settings in the Midwest and Great Plains regions. The existence and physical limits of the aquatic resources are determined. Additionally, these assessments include analysis for connections to jurisdictional waters or interstate commerce, assistance on scope and effect and permitting services, and composing final aquatic resource delineation reports for regulatory concurrence.

Laboratory Scientist and C Certified Surface Water Treatment Operator – City of Greensboro, North Carolina*
Exercised independent judgment for routine and non-routine operation of modern 30 million gallons daily (MGD) and 24 MGD surface water treatment facilities to extract constituents and produce/distribute potable drinking water. Performed quality control tests, measured and adjusted chemical feed rates, operated and monitored electric and diesel pumps (1000 to 2500 HP), operated filtration units, monitored consumer utilization, and adjusted distribution system controls accordingly. Oversaw chemical transfers and inventory by semi-rig, maintained chemical inventories, generated plant operation and consumer reports and performed minor mechanical work and routine equipment maintenance. Laboratory activities included coliform and E-Coli testing, preparing bacteria media, accession, pH, fluoride, phosphate, heterotrophic plate counts, and a range of other typical parameters for municipal water treatment. Additionally, operated and maintained a variety of lab equipment including the stereoscopic microscope, sterilizers, stills, autoclaves and incubators, and more.

Water Quality Monitoring: ND
Monitored drain discharge impacts to the Oakes Aquifer from three closed basins. The monitoring assessment included analysis of constituents and trends on groundwater samples collected from monitoring wells and routine bi-weekly sampling events from the James River and nearby ditches along the discharge route. Water quality data was evaluated and compared to aquatic life standards and assessed in technical reports submitted to the North Dakota Department of Health (NDDH)/ND Department of Environmental Quality (NDDEQ). Other assessments include ongoing performance of Phase II ESAs to monitor groundwater for a range of constituents on an array of property types. Tasks include real-time monitoring with handheld field equipment (GPS, multiparameter sondes [temperature, dissolved oxygen, pH, etc.], photoionization detector [PID], etc.) and documenting relative observable data (emanating odors, indications of nuisances, well riser and screen structural integrity, etc.).

Critical Habitat Surveys: ND
Surveyed natural and disturbed/problematic/atypical prairie plant communities to determine the existence of habitat suitable to support a recovering population of the Dakota Skipper butterfly (*Hesperia dacotae*), declared as a Threatened species in 2014 under the Endangered Species Act. The assessments incorporated desktop and field assessments (Daubenmire Cover Class Method), delineation of suitable habitat if identified, collaboration with the United States Fish and Wildlife Service (USFWS) and composing final reports. The USFWS used the research aid for ongoing monitoring of the Dakota Skipper.

Macroinvertebrate Research: MN, ND*
Evaluated and determined the biological integrity of rivers and tributaries by comparing results of the assessed macro-invertebrate communities to the Biotic Index (indicator scale). Additional research included fundamentals on bank erosion, discharge rate, vegetative species identification, geomorphology, and identifying potential health influencers (point and non-point sources) within the ecosystem. Conclusions from the research was presented at exhibitions in the local Fargo-Moorhead community.

Wood Duck Migration Research: MN*
Researched Wood Duck migration patterns by evaluating monitored Wood Duck Box nests in the Rydell National Wildlife Refuge (RNWR), an approximately 2,120-acre National Wildlife Refuge (NWR). A summary of the research included documentation of freshly assembled Wood Duck nests and observations of evidence indicating the habitual nature of Wood Duck nesting in both new and historically-established nests. The RNWR compiled collected data from historical research to monitor Wood Duck nesting patterns.

REMEDIATION – RECLAMATION – CORRECTIVE ACTION

North Dakota Industrial Commission (NDIC) - Environmental and Spill Response/Reclamation
Oversaw implementation of corrective action plans to remediate and reclaim legacy sites damaged by exploration and production activities and unclaimed hydrocarbon and brine releases associated with former well pads, pits, and seismic boreholes under the Abandoned Oil and Gas Well Plugging and Site Reclamation Fund (AWPSRF). Oversight incorporates vertical and horizontal delineations of impacts, field testing established parameters during the remediation, and reclamation implementation. Closing tasks include assessing, evaluating/interpreting findings, and producing corrective action reports. Additional services include research to assist in development of new in-situ remediation methods.

Agronomy Facilities: MN, ND
Oversaw implementation of corrective action plans to remediate and reclaim legacy sites impacted by exploration and production activities and unclaimed hydrocarbon and brine releases associated with former well pads, pits, and seismic boreholes under the Abandoned Oil and Gas Well Plugging and Site Reclamation Fund (AWPSRF). Oversight incorporates background vegetation species research (for reclamation/seeding), vertical and horizontal delineations of impacts, continuous field testing and directing cleanup during the remediation, and reclamation implementation. Closing tasks include assessing, evaluating/interpreting findings, and producing corrective action reports. Additional services include research to assist in the development of new economical and effective in-situ remediation methods for the industry (e.g. including the incorporation of wetlands for natural attenuation).

Underground Storage Tank Removal: ND, SD, WV
Oversee underground storage tank (UST) removal activities are according to the scope of work, HASPs, and State approved standards. Field activities include monitoring with a PID, collecting soil and groundwater samples for laboratory analysis and documenting site characteristics and activities. Prepared technical reports to document project activities and UST basin conditions to submit to the appropriate governing agency for review.

PUBLICATIONS – PRESENTATIONS – HONORABLE MENTION

River Keepers Annual Water Quality Festival: Fargo, ND – Intermittently Since 2007
Mr. Sheff volunteers to educate 4th graders on the water quality (chemical and biological, including invasive species identification) of the local Red River of the North. Education included demonstrations, presentations, hands on games, collaboration with the community, etc.

Consulting, Environmental and Natural Resource Education, ND – Since 2014
Mr. Sheff educates various facets of the local community on the science sector of the consulting industry. Opportunities have included alumni panel discussions, guest speaking at local universities, and presenting at State-coordinated events.

Water Quality Analysis: Hawley, MN
Sampled, preserved, processed (including spectrometer calibrations and use), and reported water contaminant data for the MN department of natural resources (MNDNR) on local rivers (chemical and biological [duckweeds and other invasive species if identified]).

Local Hydrological Awareness - Bottled Water Campaign: Moorhead, MN*
Initiated and lead a hydrological awareness study for the local community. The study gathered municipal water consumer data from governmental agencies and public service departments to compare to top rated/popular bottled water brands in America using local and national drinking water standards. The purpose of this study was to identify and educate the public regarding the health risks, environmental implications, and purity standards in relation to the economics associated with our water resources. I collaborated with governmental agencies and businesses and presented findings at Concordia College.

APPENDIX F

DESCRIPTION OF TERMS AND ACRONYMS

Description of Selected General Terms and Acronyms

Term/Acronym	*Description*
ACM	Asbestos-Containing Material. Asbestos is a naturally occurring mineral, three varieties of which (chrysotile, amosite, crocidolite) have been commonly used as fireproofing or binding agents in construction materials. Exposure to asbestos, as well as ACM, has been documented to cause lung diseases including asbestosis (scarring of the lung), lung cancer and mesothelioma (a cancer of the lung lining). Regulatory agencies have generally defined ACM as a material containing greater that one (1) percent asbestos, however some states (e.g. California) define ACM as materials having 0.1% asbestos. In order to define a homogenous material as non-ACM, a minimum number of samples must be collected from the material dependent upon its type and quantity. Homogenous materials defined as non-ACM must either have 1) no asbestos identified in all of its samples or 2) an identified asbestos concentration below the appropriate regulatory threshold. Asbestos concentrations are generally determined using polarized light microscopy or transmission electron microscopy. Point counting is an analytical method to statistically quantify the percentage of asbestos in a sample. The asbestos component of ACM may either be friable or non-friable. Friable materials, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure and have a higher potential for a fiber release than non-friable ACM. Non-friable ACM are materials that are firmly bound in a matrix by plastic, cement, etc. and, if handled carefully, will not become friable. Federal and state regulations require that either all suspect building materials be presumed ACM or that an asbestos survey be performed prior to renovation, dismantling, demolition, or other activities that may disturb potential ACM. Notifications are required prior to demolition and/or renovation activities that may impact the condition of ACM in a building. ACM removal may be required if the ACM is likely to be disturbed or damaged during the demolition or renovation. Abatement of friable or potentially friable ACM must be performed by a licensed abatement contractor in accordance with state rules and NESHAP. Additionally, OSHA regulations for work classification, worker training and worker protection will apply.
AHERA	Asbestos Hazard Emergency Response Act
AST	Aboveground Storage Tanks. ASTs are generally described as storage tanks less than 10% of which are below ground (i.e., buried). Tanks located in a basement, but not buried, are also considered ASTs. Whether, and the extent to which, an AST is regulated, is determined on a case-by-case basis and depends upon tank size, its contents and the jurisdiction of its location.
BGS	Below Ground Surface
Brownfields	State and/or tribal listing of Brownfield properties addressed by Cooperative Agreement Recipients or Targeted Brownfields Assessments.
BTEX	Benzene, Toluene, Ethylbenzene, and Xylenes. BTEX are VOC components found in gasoline and commonly used as analytical indicators of a petroleum hydrocarbon release.
CERCLA	Comprehensive Environmental Response, Compensation and Liability Act (a.k.a. Superfund). CERCLA is the federal act that regulates abandoned or uncontrolled hazardous waste sites. Under this Act, joint and several liability may be imposed on potentially responsible parties for cleanup-related costs.
CERCLIS	Comprehensive Environmental Response, Compensation and Liability Information System. An EPA compilation of sites having suspected or actual releases of hazardous substances to the environment. CERCLIS also contains information on site inspections, preliminary assessments and remediation of hazardous waste sites. These sites are typically reported to EPA by states and municipalities or by third parties pursuant to CERCLA Section 103.
CESQG	Conditionally exempt small quantity generators.
CFR	Code of Federal Regulations

Description of Selected General Terms and Acronyms (cont.)

Term/Acronym	*Description*
CREC	Controlled Recognized Environmental Condition is defined in ASTM E1527-13 as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority) , with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report."
DOT	U.S. Department of Transportation
EPA	U.S. Environmental Protection Agency
ERNS	Emergency Response Notification System. An EPA-maintained federal database which stores information on notifications of oil discharges and hazardous substance releases in quantities greater than the applicable reportable quantity under CERCLA. ERNS is a cooperative data-sharing effort between EPA, DOT, and the National Response Center.
ESA	Environmental Site Assessment
FRP	Fiberglass Reinforced Plastic
Hazardous Substance	As defined under CERCLA, this is (A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title; (C) any hazardous waste having characteristics identified under or listed pursuant to section 3001 of the Solid Waste Disposal Act (with some exclusions); (D) any toxic pollutant listed under section 1317(a) of Title 33; (E) any hazardous air pollutant listed under section 112 of the Clean Air Act; and (F) any imminently hazardous chemical substance or mixture with respect to which the EPA Administrator has taken action under section 2606 of Title 15. This term does not include petroleum, including crude oil or any fraction thereof which is not otherwise listed as a hazardous substance under subparagraphs (A) through (F) above, and the term include natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).
Hazardous Waste	This is defined as having characteristics identified or listed under section 3001 of the Solid Waste Disposal Act (with some exceptions). RCRA, as amended by the Solid Waste Disposal Act of 1980, defines this term as a "solid waste, or combination of solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible illness; or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed."
HREC	Historical Recognized Environmental Condition is defined in ASTM E1527-13 as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time of the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition."

Description of Selected General Terms and Acronyms (cont.)

Term/Acronym	*Description*
IC/EC	A listing of sites with institutional and/or engineering controls in place. IC include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls. EC include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.
ILP	Innocent Landowner/Operator Program
LQG	Large quantity generators.
LUST	Leaking Underground Storage Tank. This is a federal term set forth under RCRA for leaking USTs. Some states also utilize this term.
MCL	Maximum Contaminant Level. This Safe Drinking Water concept (and also used by many states as a ground water cleanup criteria) refers to the limit on drinking water contamination that determines whether a supplier can deliver water from a specific source without treatment.
MSDS	Material Safety Data Sheets. Written/printed forms prepared by chemical manufacturers, importers and employers which identify the physical and chemical traits of hazardous chemicals under OSHA's Hazard Communication Standard.
NESHAP	National Emissions Standard for Hazardous Air Pollutants (Federal Clean Air Act). This part of the Clean Air Act regulates emissions of hazardous air pollutants.
NFRAP	Facilities where there is "No Further Remedial Action Planned," as more particularly described under the Records Review section of this report.
NOV	Notice of Violation. A notice of violation or similar citation issued to an entity, company or individual by a state or federal regulatory body indicating a violation of applicable rule or regulations has been identified.
NPDES	National Pollutant Discharge Elimination System (Clean Water Act). The federal permit system for discharges of polluted water.
NPL	The NPL is the EPA's database of uncontrolled or abandoned hazardous waste facilities that have been listed for priority remedial actions under the Superfund Program.
OSHA	Occupational Safety and Health Administration or Occupational Safety and Health Act
PACM	Presumed Asbestos-Containing Material. A material that is suspected of containing or presumed to contain asbestos but which has not been analyzed to confirm the presence or absence of asbestos.
PCB	Polychlorinated Biphenyl. A halogenated organic compound commonly in the form of a viscous liquid or resin, a flowing yellow oil, or a waxy solid. This compound was historically used as dielectric fluid in electrical equipment (such as electrical transformers and capacitors, electrical ballasts, hydraulic and heat transfer fluids), and for numerous heat and fire sensitive applications. PCB was preferred due to its durability, stability (even at high temperatures), good chemical resistance, low volatility, flammability, and conductivity. PCBs, however, do not break down in the environment and are classified by the EPA as a suspected carcinogen. 1978 regulations, under the Toxic Substances Control Act, prohibit manufacturing of PCB-containing equipment; however, some of this equipment may still be in use today.
pCi/L	Pico Curies per Liter of Air. Unit of measurement for Radon and similar radioactive materials.
PLM	Polarized Light Microscopy (see ACM section of the report, if included in the scope of services)
PST	Petroleum Storage Tank. An AST or UST that contains a petroleum product.

Description of Selected General Terms and Acronyms (cont.)

Term/Acronym	*Description*
Radon	A radioactive gas resulting from radioactive decay of naturally-occurring radioactive materials in rocks and soils containing uranium, granite, shale, phosphate, and pitchblende. Radon concentrations are measured in Pico Curies per Liter of Air. Exposure to elevated levels of radon creates a risk of lung cancer; this risk generally increases as the level of radon and the duration of exposure increases. Outdoors, radon is diluted to such low concentrations that it usually does not present a health concern. However, radon can accumulate in building basements or similar enclosed spaces to levels that can pose a risk to human health. Indoor radon concentrations depend primarily upon the building's construction, design and the concentration of radon in the underlying soil and ground water. The EPA recommended annual average indoor "action level" concentration for residential structures is 4.0 pCi/l.
RCRA	Resource Conservation and Recovery Act. Federal act regulating solid and hazardous wastes from point of generation to time of disposal ('cradle to grave"). 42 U.S.C. 6901 et seq.
RCRA Generators	The RCRA Generators database, maintained by the EPA, lists facilities that generate hazardous waste as part of their normal business practices. Generators are listed as either large (LQG), small (SQG), or conditionally exempt (CESQG). LQG produce at least 1000 kg/month of non-acutely hazardous waste or 1 kg/month of acutely hazardous waste. SQG produce 100-1000 kg/month of non-acutely hazardous waste. CESQG are those that generate less than 100 kg/month of non-acutely hazardous waste.
RCRA CORRACTS/TSDs	The USEPA maintains a database of RCRA facilities associated with treatment, storage, and disposal (TSD) of hazardous materials which are undergoing "corrective action". A "corrective action" order is issued when there is a release of hazardous waste or constituents into the environment from a RCRA facility.
RCRA Non-CORRACTS/TSDs	The RCRA Non-CORRACTS/TSD Database is a compilation by the USEPA of facilities which report storage, transportation, treatment, or disposal of hazardous waste. Unlike the RCRA CORRACTS/TSD database, the RCRA Non-CORRACTS/TSD database does not include RCRA facilities where corrective action is required.
RCRA Violators List	RAATS. RCRA Administrative Actions Taken. RAATS information is now contained in the RCRIS database and includes records of administrative enforcement actions against facilities for noncompliance.
RCRIS	Resource Conservation and Recovery Information System, as defined in the Records Review section of this report.
REC	Recognized Environmental Conditions are defined by ASTM E1527-13 as "the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment; 2) under conditions indicative of a release to the environment. *De minimis* conditions are not recognized environmental conditions."
SCL	State "CERCLIS" List (see SPL /State Priority List, below).
SPCC	Spill Prevention, Control and Countermeasures. SPCC plans are required under federal law (Clean Water Act and Oil Pollution Act) for any facility storing petroleum in tanks and/or containers of 55-gallons or more that when taken in aggregate exceed 1,320 gallons. SPCC plans are also required for facilities with underground petroleum storage tanks with capacities of over 42,000 gallons. Many states have similar spill prevention programs, which may have additional requirements.
SPL	State Priority List. State list of confirmed sites having contamination in which the state is actively involved in cleanup activities or is actively pursuing potentially responsible parties for cleanup. Sometimes referred to as a State "CERCLIS" List.
SQG	Small quantity generator.
SWF/LF	State and/or Tribal database of solid waste/Landfill facilities. The database information may include the facility name, class, operation type, area, estimated operational life, and owner.
TPH	Total Petroleum Hydrocarbons
TRI	Toxic Release Inventory. Routine EPA report on releases of toxic chemicals to the environment based upon information submitted by entities subject to reporting under the Emergency Planning and Community Right to Know Act.

Description of Selected General Terms and Acronyms (cont.)

Term/Acronym	*Description*
TSCA	Toxic Substances Control Act. A federal law regulating manufacture, import, processing and distribution of chemical substances not specifically regulated by other federal laws (such as asbestos, PCBs, lead-based paint and radon). 15 U.S.C 2601 et seq.
USACE	United States Army Corps of Engineers
USC	United States Code
USGS	United States Geological Survey
USNRCS	United States Department of Agriculture-Natural Resource Conservation Service
UST	Underground Storage Tank. Most federal and state regulations, as well as ASTM E1527-13, define this as any tank, incl., underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10% or more beneath the surface of the ground (i.e., buried).
VCP	State and/or Tribal facilities included as Voluntary Cleanup Program sites.
VOC	Volatile Organic Compound
Wetlands	Areas that are typically saturated with surface or ground water that creates an environment supportive of wetland vegetation (i.e., swamps, marshes, bogs). The Corps of Engineers Wetlands Delineation Manual (Technical Report Y-87-1) defines wetlands as areas inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. For an area to be considered a jurisdictional wetland, it must meet the following criteria: more than 50 percent of the dominant plant species must be categorized as Obligate, Facultative Wetland, or Facultative on lists of plant species that occur in wetlands; the soil must be hydric; and, wetland hydrology must be present. The federal Clean Water Act which regulates “waters of the US,” also regulates wetlands, a program jointly administered by the USACE and the EPA. Waters of the U.S. are defined as: (1) waters used in interstate or foreign commerce, including all waters subject to the ebb and flow of tides; (2) all interstate waters including interstate wetlands; (3) all other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, etc., which the use, degradation, or destruction could affect interstate/ foreign commerce; (4) all impoundments of waters otherwise defined as waters of the U. S., (5) tributaries of waters identified in 1 through 4 above; (6) the territorial seas; and (7) wetlands adjacent to waters identified in 1 through 6 above. Only the USACE has the authority to make a final wetlands jurisdictional determination.

Proposed State Capitol East Campus Redevelopment
311 Jefferson Street, 312 Michigan Avenue and 2100 Washington Street East
Charleston, Kanawha County, West Virginia (the Site)
Terracon Project No. N2207019

Dear Mr. Bird:

Terracon Consultants, Inc. (Terracon) is pleased to have prepared the enclosed report for LSI services performed specific to soil sampling at the Site. Our services were performed in accordance with our Master Service Agreement, Work Order corresponding to Terracon Proposal No. PN2207019, authorized on July 31, 2020.

We appreciate the opportunity to continue serving you, please contact us if you have questions regarding this report or if we may be of further assistance.

Sincerely,
Terracon Consultants, Inc.

Terracon Project No. N2207019
August 31, 2020

1.0 SITE DESCRIPTION

The Site is comprised of 24 mostly paved parcels and a 1.1-acre portion of another parcel (25 total) encompassing an overall area of approximately 5.2-acres in a State Capitol Campus setting of Charleston, Kanawha County, West Virginia. There are three addresses and operations currently associated with the Site. The first operation is an approximately 4,506 square-foot (SF) three-story daycare (West Virginia Early Learning Academy) located at 2100 Washington Street East (Parcel ID: 11 28009800000000, 0.67 acres, constructed in 1936); the second is a 5,760-SF Mailroom including minor carpentry activities, located at 311 Jefferson Street (Parcel ID: 11 28008800000000, 0.13 acres, 1930) and the third is a fenced groundskeeping headquarters serving the City of Charleston (improved with eight structures: an approximately 2,500-SF tent; a 1,325-SF office; 925- and 900-SF garages; three 650-SF tents and one 50-SF storage shed, 1995-2009) at 312 Michigan Avenue. Additional Site improvements include several transformers, paved surfaces, storm drains, a potential inactive water well, and typical urban utilities. Exhibits 1 and 2 in Appendix A provide the Site location and relevant depictions.

2.0 SCOPE OF SERVICES

This limited site investigation (LSI) was performed in response to the findings and recommendations of Terracon's June 12, 2020 Phase I Environmental Site Assessment (Phase I ESA – Report No. N2207015, issued June 11, 2020), which identified the following recognized environmental conditions (RECs) in connection with the Site:

- In at least the 1930s, an automotive repair facility operated in the northwestern portion of the Site where the current Mailroom is located, and the Materials Control, Soils and Testing division (MCS&T) of the West Virginia Division of Highways operated on the northeastern portion of the Site from at least 1972-1989. The potential for associated impacts to the subsurface from the historical facility operations represented RECs to the Site.
- Garage 2 (maintenance area) had a subsurface pit with a drainage pipe corridor inside. Various aged oily stains were observed on the floor throughout the garage and within the pit, which was identified as a REC to the Site.
- A fuel station operated on the northeastern corner of Michigan Avenue and Washington Street East (southeast-adjacent to the Site and cross-gradient) from at

least 1933-1967. No related regulatory information for this fueling station was available to further evaluate if there were/are petroleum impacts in the subsurface soils/groundwater at the adjacent property for evidence of potential associated migratory impacts onto the Site. Therefore, considering the lack of information for review, the potential for related migratory impacts onto the Site represented a REC.

Our LSI services were not intended to identify/evaluate/delineate all potential hazardous substances at the Site; rather, services were limited to investigate for potential impacts associated with the referenced RECs identified in the Phase I ESA. Investigative details are described in the following sections.

2.1 Standard of Care

Terracon's services were conducted in a manner consistent with generally accepted practices of the profession undertaken in similar studies in the same geographical area during the same time. Terracon makes no warranties, either express or implied, regarding the findings, conclusions, or recommendations. Please note, Terracon does not warrant the work of laboratories, regulatory agencies, or other third parties supplying information used in the preparation of this report. These services were conducted in accordance with the scope of services agreed with you, our client, as reflected in our proposal and were not restricted by American Society of Testing and Materials (ASTM) E1903-19.

2.2 Additional Scope Limitations

Findings, conclusions, and recommendations resulting from these services are based upon information derived from the site activities and other services conducted under this scope of services; such information is subject to change over time. Certain indicators of the presence of hazardous substances, petroleum products, or other constituents may have been latent, inaccessible, unobservable, nondetectable, or not present during these services. We cannot represent that the site contains no hazardous substances, toxic materials, petroleum products, or other latent conditions beyond those identified during this assessment. Subsurface conditions may vary from those encountered at specific borings/wells or during other surveys, tests, assessments, investigations, or exploratory services. The data, interpretations, findings, and our recommendations are based solely upon data obtained at the time and within the scope of these services.

2.3 Reliance

This LSI report has been prepared for the exclusive use and reliance of Chapman Technical Group (CTG-client). Any unauthorized distribution or reuse is at the client's sole risk. Reliance on the LSI by the client and authorized parties will be subject to the terms, conditions, and limitations stated in the proposal for this authorized scope of work, the Authorization Agreement, Reliance

Agreement, and this report. The defined contractual limitation of liability is the aggregate limit of Terracon's liability to the client and all relying parties.

3.0 FIELD INVESTIGATION

Terracon conducted field work under a health and safety plan (HASP) developed for this project. Work was performed using United States Environmental Protection Agency (USEPA) Level D work attire consisting of hard hats, safety glasses, protective gloves, and protective boots. Additional to requesting public utility location services, Terracon contracted a private utility locator to assist in identifying potential private underground utility infrastructure within the proposed investigative footprint. The LSI field services were performed on August 11, 2020.

3.1 Soil and Groundwater Sampling

A total of seven temporary groundwater sampling points (SP-1 through SP-7) were installed. Four temporary sampling points were installed to at least 10 feet below grade (bg), while three temporary sampling points (SP-2, SP-4 and SP-7 [one representation per REC area]) were installed to 20 feet bg due to groundwater not being encountered while performing the scoped 10-foot installations. Groundwater was not encountered during the assessment; therefore, only soil samples were submitted for chemical analysis at a National Environmental Laboratory Accreditation Program (NELAP)-accredited laboratory. Soil samples were selected by the field professional from an area most likely to exhibit evidence of a release. The soil samples were transported to the laboratory and analyzed for total petroleum hydrocarbons – gasoline/diesel range organics (TPH – GRO/DRO) and volatile organic compounds (VOCs). Samples were handled under standard chain of custody procedures and analyzed by ALS Laboratories (ALS) in Charleston, West Virginia. Field activities were completed by thin-spreading excess soil cuttings in gravel/grass-surfaced areas while backfilling the boring advancements with bentonite, and where appropriate, finished with concrete surfaces.

3.2 Geology/Hydrogeology

The soil-probe logs in Appendix B indicate the observed soil stratigraphy. In general, Terracon encountered an approximately three-inch layer of either concrete or crushed rock/gravel periodically followed by a 4-inch layer of scoria before encountering a brown and gray lean clay profile including moderate quantities of salt flecks, manganese oxidations, silts and periodic intervals of coal fragments. Moisture increases were generally observed around seven feet bg, 10 feet bg, 15 feet bg and 18 feet bg. Prior to being abandoned, Terracon allowed the temporary groundwater sampling points to recharge for the full time elapsed to complete field work; however, groundwater was not encountered.

3.3 PID Field Screening

Organic vapor readings were recorded per two-foot interval of the soil-probe advancements. PID readings were consistently less than one parts per million.

4.0 ANALYTICAL RESULTS

Laboratory analytical results are summarized on Table 1 (TPH and VOCs), and the official corresponding Report of Laboratory Analysis are provided in Appendix C. Detected concentrations in soil samples were compared to the following guidance's:

- West Virginia Department of Environmental Protection (WVDEP) – Division of Land Restoration Office of Environmental Remediation (DLROER) Quality Assurance Protection Program (QAPP); Appendix A: Typical List of Contaminants of Concerns (COCs), Leaking Underground Storage Tank (LUST) Program Action Levels, effective September 21, 2016; and,
- WVDEP – Voluntary Remediation and Redevelopment Rule (VRRR) *De Minimis* & Relative Benchmarks Table; residential/industrial screening levels (consolidated document, includes USEPA residential/industrial Regional Screening Levels [USEPA RSLs] and National Oceanic and Atmosphere (NOAA) Office of Response and Restoration – Screening Quick Reference Tables [SQuiRTs] – the most stringent thresholds were used for evaluations when more than one threshold was available), effective through the WVDEP, June 2020.

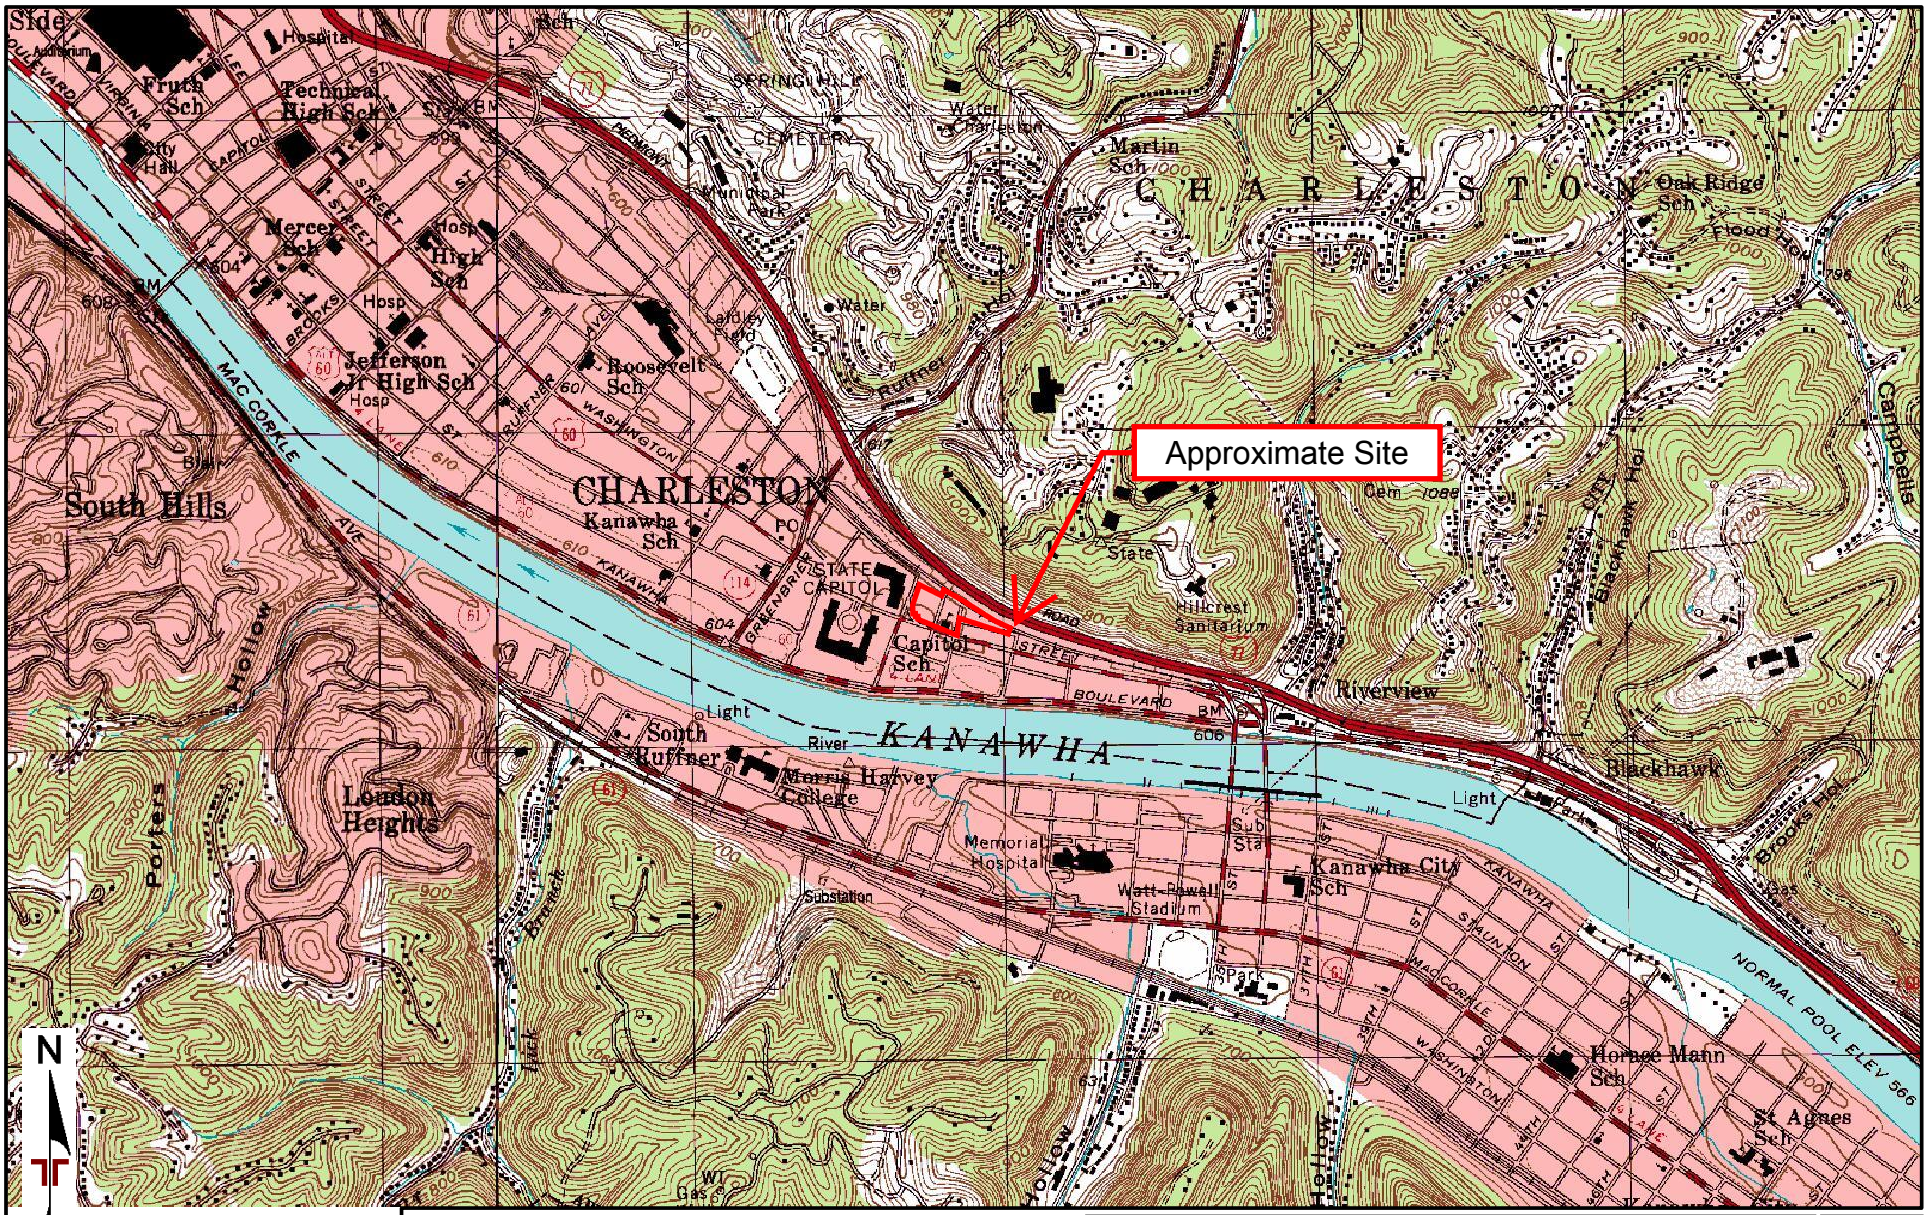
A 'J' analytical qualifier was mostly reported for TPH-DRO samples, which is defined as: Analyte is present at an estimated concentration between the minimum detection limit (MDL) and reporting limit.

TPH-GRO: Concentrations were not detected above the laboratory MDLs (ranged from less than [<] 1.6 milligrams per kilogram [mg/kg] to <2.1 mg/kg) at SP-1 through SP-7. The WVDEP-QAPP action level is 100 mg/kg.

TPH-DRO: Detected concentrations ranged from 4.9^{J} to 10 ^{J} mg/kg between two and eight feet bg in SP-1 through SP-5 and between eight and 10 feet bg in SP-6 and 18-20 feet bg at SP-7; The WVDEP-QAPP action level is 100 mg/kg.

VOCs: A 0.0120^{J} mg/kg concentration of *methylcyclohexane* was detected between two and four feet bg at SP-4; remaining analysis reported VOC concentrations below the MDLs.

5.0 CONCLUSIONS AND RECOMMENDATIONS



The following summary is based on the completed scope of services (subject to the limitations described herein):

Although the soil samples analyzed by the laboratory did not exhibit impacts above guidance concentrations, TPH-DRO was detected in each soil boring between two and eight feet bg across the Site (general redevelopment disturbance zone) and in some areas (SP-6 and SP-7), deeper. Additionally, the results of this LSI are limited to the specific vertical/horizontal locations of the soils selected for analysis. Due to the evidence of residual TPH-DRO impacts to soils in combination with an evident ongoing redevelopment history, Terracon recommends generation and use of a Site-specific soil management plan (SMP) to safely handle impacted soils potentially encountered during redevelopment activities.

WATER LEVEL

Water Initially Encountered

Water Level After a Specified Period of Time

Water Level After a Specified Period of Time

Water levels indicated on the soil boring logs are the levels measured in the borehole at the times indicated. Groundwater level variations will occur over time. In low permeability soils, accurate determination of groundwater levels is not possible with short term water level observations.

FIELD TESTS

(HP)	Hand Penetrometer
(T)	Torvane
(b/f)	Standard Penetration Test (blows per foot)
(PID)	Photo-Ionization Detector
(OVA)	Organic Vapor Analyzer

DESCRIPTIVE SOIL CLASSIFICATION

Soil classification is based on the Unified Soil Classification System. Coarse Grained Soils have more than 50% of their dry weight retained on a #200 sieve; their principal descriptors are: boulders, cobbles, gravel or sand. Fine Grained Soils have less than 50% of their dry weight retained on a #200 sieve; they are principally described as clays if they are plastic, and silts if they are slightly plastic or non-plastic. Major constituents may be added as modifiers and minor constituents may be added according to the relative proportions based on grain size. In addition to gradation, coarse-grained soils are defined on the basis of their in-place relative density and fine-grained soils on the basis of their consistency.

LOCATION AND ELEVATION NOTES

Unless otherwise noted, Latitude and Longitude are approximately determined using a hand-held GPS device. The accuracy of such devices is variable. Surface elevation data annotated with +/- indicates that no actual topographical survey was conducted to confirm the surface elevation. Instead, the surface elevation was approximately determined from topographic maps of the area.

STRENGTH TERMS

RELATIVE DENSITY OF COARSE-GRAINED SOILS (More than 50% retained on No. 200 sieve.) Density determined by Standard Penetration Resistance Includes gravels, sands and silts.			CONSISTENCY OF FINE-GRAINED SOILS (50% or more passing the No. 200 sieve.) Consistency determined by laboratory shear strength testing, field visual-manual procedures or standard penetration resistance

RELATIVE PROPORTIONS OF SAND AND GRAVEL

Descriptive Term(s) of other constituents	Percent of Dry Weight
Trace	< 15
With	15 - 29
Modifier	> 30

GRAIN SIZE TERMINOLOGY

Major Component of Sample	Particle Size
Boulders	Over 12 in. (300 mm)
Cobbles	12 in. to 3 in. (300mm to 75mm)
Gravel	3 in. to #4 sieve (75mm to 4.75 mm)
Sand	#4 to #200 sieve (4.75mm to 0.075mm
Silt or Clay	Passing #200 sieve (0.075mm)

RELATIVE PROPORTIONS OF FINES

Descriptive Term(s) of other constituents	Percent of Dry Weight
Trace	< 5
With	5 - 12
Modifier	> 12

PLASTICITY DESCRIPTION

Term	Plasticity Index
Non-plastic	0
Low	1 - 10
Medium	11 - 30
High	> 30

UNIFIED SOIL CLASSIFICATION SYSTEM

Criteria for Assigning Group Symbols and Group Names Using Laboratory Tests [A]					Soil Classification	
					Group Symbol	Group Name [B]
Coarse Grained Soils: More than 50% retained on No. 200 sieve	**Gravels:** More than 50% of coarse fraction retained on No. 4 sieve	**Clean Gravels:** Less than 5% fines [C]	$Cu \geq 4$ and $1 \leq Cc \leq 3$ [E]		GW	Well-graded gravel [F]
			$Cu < 4$ and/or $1 > Cc > 3$ [E]		GP	Poorly graded gravel [F]
		Gravels with Fines: More than 12% fines [C]	Fines classify as ML or MH		GM	Silty gravel [F,G,H]
			Fines classify as CL or CH		GC	Clayey gravel [F,G,H]
	Sands: 50% or more of coarse fraction passes No. 4 sieve	**Clean Sands:** Less than 5% fines [D]	$Cu \geq 6$ and $1 \leq Cc \leq 3$ [E]		SW	Well-graded sand [I]
			$Cu < 6$ and/or $1 > Cc > 3$ [E]		SP	Poorly graded sand [I]
		Sands with Fines: More than 12% fines [D]	Fines classify as ML or MH		SM	Silty sand [G,H,I]
			Fines classify as CL or CH		SC	Clayey sand [G,H,I]
Fine-Grained Soils: 50% or more passes the No. 200 sieve	**Silts and Clays:** Liquid limit less than 50	**Inorganic:**	PI > 7 and plots on or above "A" line [J]		CL	Lean clay [K,L,M]
			PI < 4 or plots below "A" line [J]		ML	Silt [K,L,M]
		Organic:	Liquid limit - oven dried	< 0.75	OL	Organic clay [K,L,M,N]
			Liquid limit - not dried			Organic silt [K,L,M,O]
	Silts and Clays: Liquid limit 50 or more	**Inorganic:**	PI plots on or above "A" line		CH	Fat clay [K,L,M]
			PI plots below "A" line		MH	Elastic Silt [K,L,M]
		Organic:	Liquid limit - oven dried	< 0.75	OH	Organic clay [K,L,M,P]
			Liquid limit - not dried			Organic silt [K,L,M,Q]
Highly organic soils:	Primarily organic matter, dark in color, and organic odor				PT	Peat

[A] Based on the material passing the 3-inch (75-mm) sieve

[B] If field sample contained cobbles or boulders, or both, add "with cobbles or boulders, or both" to group name.

[C] Gravels with 5 to 12% fines require dual symbols: GW-GM well-graded gravel with silt, GW-GC well-graded gravel with clay, GP-GM poorly graded gravel with silt, GP-GC poorly graded gravel with clay.

[D] Sands with 5 to 12% fines require dual symbols: SW-SM well-graded sand with silt, SW-SC well-graded sand with clay, SP-SM poorly graded sand with silt, SP-SC poorly graded sand with clay

[E] $Cu = D_{60}/D_{10}$ $\quad Cc = \dfrac{(D_{30})^2}{D_{10} \times D_{60}}$

[F] If soil contains ≥ 15% sand, add "with sand" to group name.

[G] If fines classify as CL-ML, use dual symbol GC-GM, or SC-SM.

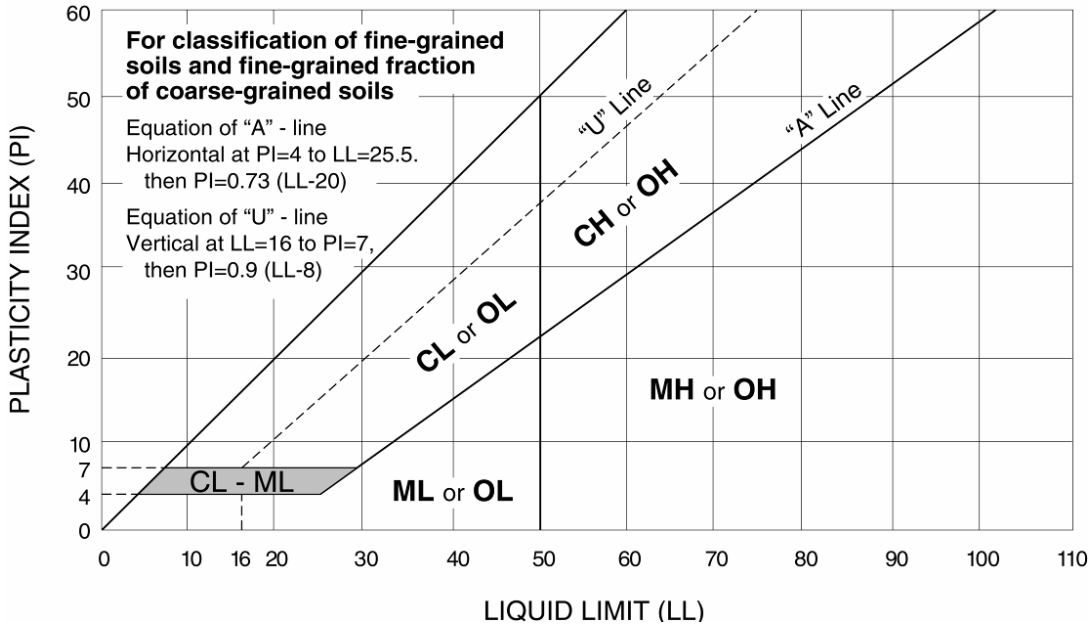
[H] If fines are organic, add "with organic fines" to group name.

[I] If soil contains ≥ 15% gravel, add "with gravel" to group name.

[J] If Atterberg limits plot in shaded area, soil is a CL-ML, silty clay.

[K] If soil contains 15 to 29% plus No. 200, add "with sand" or "with gravel," whichever is predominant.

[L] If soil contains ≥ 30% plus No. 200 predominantly sand, add "sandy" to group name.



[M] If soil contains ≥ 30% plus No. 200, predominantly gravel, add "gravelly" to group name.

[N] PI ≥ 4 and plots on or above "A" line.

[O] PI < 4 or plots below "A" line.

[P] PI plots on or above "A" line.

[Q] PI plots below "A" line.

Re: **N2207019** Work Order: **20080750**

Dear Levi,

ALS Environmental received 8 samples on 11-Aug-2020 01:34 PM for the analyses presented in the following report.

The analytical data provided relates directly to the samples received by ALS Environmental - Holland and for only the analyses requested.

Sample results are compliant with industry accepted practices and Quality Control results achieved laboratory specifications. Any exceptions are noted in the Case Narrative, or noted with qualifiers in the report or QC batch information. Should this laboratory report need to be reproduced, it should be reproduced in full unless written approval has been obtained from ALS Environmental. Samples will be disposed in 30 days unless storage arrangements are made.

The total number of pages in this report is 55.

If you have any questions regarding this report, please feel free to contact me:

ADDRESS: 3352 128th Avenue, Holland, MI, USA
PHONE: +1 (616) 399-6070 FAX: +1 (616) 399-6185

Sincerely,

Rebecca Kiser

Case Narrative

Samples for the above noted Work Order were received on 08/11/2020. The attached "Sample Receipt Checklist" documents the status of custody seals, container integrity, preservation, and temperature compliance.

Samples were analyzed according to the analytical methodology previously transmitted in the "Work Order Acknowledgement". Methodologies are also documented in the "Analytical Result" section for each sample. Quality control results are listed in the "QC Report" section. Sample association for the reported quality control is located at the end of each batch summary. If applicable, results are appropriately qualified in the Analytical Result and QC Report sections. The "Qualifiers" section documents the various qualifiers, units, and acronyms utilized in reporting. A copy of the laboratory's scope of accreditation is available upon request.

With the following exceptions, all sample analyses achieved analytical criteria.

Volatile Organics:
No other deviations or anomalies were noted.

Extractable Organics:
No other deviations or anomalies were noted.

Wet Chemistry:
No other deviations or anomalies were noted.

Client: Terracon
Project: N2207019
WorkOrder: **20080750**

QUALIFIERS, ACRONYMS, UNITS

Qualifier	Description
*	Value exceeds Regulatory Limit
**	Estimated Value
a	Analyte is non-accredited
B	Analyte detected in the associated Method Blank above the Reporting Limit
E	Value above quantitation range
H	Analyzed outside of Holding Time
Hr	BOD/CBOD - Sample was reset outside Hold Time, value should be considered estimated.
J	Analyte is present at an estimated concentration between the MDL and Report Limit
ND	Not Detected at the Reporting Limit
O	Sample amount is > 4 times amount spiked
P	Dual Column results percent difference > 40%
R	RPD above laboratory control limit
S	Spike Recovery outside laboratory control limits
U	Analyzed but not detected above the MDL
X	Analyte was detected in the Method Blank between the MDL and Reporting Limit, sample results may exhibit background or reagent contamination at the observed level.

Acronym	Description
DUP	Method Duplicate
LCS	Laboratory Control Sample
LCSD	Laboratory Control Sample Duplicate
LOD	Limit of Detection (see MDL)
LOQ	Limit of Quantitation (see PQL)
MBLK	Method Blank
MDL	Method Detection Limit
MS	Matrix Spike
MSD	Matrix Spike Duplicate
PQL	Practical Quantitation Limit
RPD	Relative Percent Difference
TDL	Target Detection Limit
TNTC	Too Numerous To Count
A	APHA Standard Methods
D	ASTM
E	EPA
SW	SW-846 Update III

Units Reported	Description
% of sample	Percent of Sample
µg/Kg-dry	Micrograms per Kilogram Dry Weight
µg/L	Micrograms per Liter
mg/Kg-dry	Milligrams per Kilogram Dry Weight

Terracon Project No. N2207016

Dear Mr. Bird:

Terracon Consultants, Inc. (Terracon) is pleased to submit the attached report for the above-referenced project to The Chapman Technical Group (Client). The purpose of this report is to present the results of an asbestos survey which was performed at the site on May 27, 2020 and in general accordance with our proposal dated September 10, 2019. We understand that this survey was requested in support of the planned renovation or demolition pertaining to three structures (Building 33, a maintenance garage, and a storage shed) located at the West Virginia State Capitol Complex, 321 Michigan Avenue in Charleston, West Virginia.

Terracon appreciates the opportunity to provide this service to The Chapman Technical Group. If you have any questions regarding this report please contact the undersigned at 513-321-5816.

Sincerely,
Terracon Consultants, Inc.

EXECUTIVE SUMMARY

Terracon Consultants, Inc. (Terracon) conducted an asbestos survey of three structures (Building 33, a maintenance garage and a storage shed) at the West Virginia State Capitol Complex located at 321 Michigan Avenue in Charleston, West Virginia. We understand that this survey was requested as required by the United States Environmental Protection Agency (USEPA) National Emission Standards for Hazardous Air Pollutants (NESHAP) regulation 40 CFR Part 61, Subpart M for the purpose of a planned renovation or demolition pertaining to the three structures. The survey included identifying and sampling accessible suspect asbestos-containing materials (ACM) for laboratory analysis, and providing information regarding the identity, location, condition, and approximate quantities of ACM, if any, associated with interior and exterior building components. The survey was performed on May 27, 2020 by a USEPA-accredited and state of West Virginia licensed asbestos inspector in general accordance with our proposal dated September 10, 2019, and the sampling protocols established in USEPA 40 Code of Federal Regulations (CFR) Part 763, Subpart E, known as the Asbestos Hazard Emergency Response Act (AHERA). Terracon collected a total of 62 bulk samples from 18 homogeneous areas of suspect ACM. Please note that previous asbestos reports were also provided by the Client to Terracon for review prior to the field survey. Information from the prior reports was integrated into our survey as feasible.

Based on the results of laboratory analysis in regard to the samples collected, and a review of previous asbestos reports, the materials listed below were identified to contain asbestos.

Material Description	Material Location	% and Type Asbestos	Estimated Quantity**
Black Tar	Seams on Top of Parapet Walls on Roof of Building 33	5% Chrysotile	100 Square Feet (SF)
Roof Flashing*	Roof of Building 33	7-9% Chrysotile	375 SF
Roof*	Roof of Building 33	7-9% Chrysotile	5,600 SF
Exterior Window Caulking	Maintenance Garage Windows	<1% Chrysotile	10 SF or 5 Windows

* Material indicated positive by laboratory analysis in prior asbestos reports.

**Estimated quantities listed above are based on a cursory field evaluation, and actual quantities may vary significantly, especially if ACMs are present in hidden and/or inaccessible areas not evaluated as part of this survey. This is not a bidding document and contractors would be responsible for drawing their own conclusions on quantities present.

Asbestos was not identified in the samples collected from the shed structure.

A summary of the identified ACMs is also included in Appendix A. A sample and results summary is included in Appendix B, and laboratory analytical reports are included in Appendix C. A photo

log showing examples of the identified ACM is included as Appendix E. Prior asbestos reports are included as Appendix G (Client-Provided Information).

If the above identified ACMs will be impacted by renovation, or if the two structures with ACM will be demolished, the ACMs will need to be taken into consideration for proper compliance with federal and, state EPA NESHAP regulations, Occupational Safety and Health Administration (OSHA) asbestos regulations, and local asbestos regulations.

ASBESTOS SURVEY
Three Structures
West Virginia State Capitol Complex
321 Michigan Avenue
Charleston, West Virginia 25305

Terracon Project No. N2207016

June 8, 2020

1.0 INTRODUCTION

Terracon Consultants, Inc. (Terracon) conducted an asbestos survey of three structures (Building 33, a maintenance garage, and a storage shed) at the West Virginia State Capitol Complex located at 321 Michigan Avenue in Charleston, West Virginia. The survey was conducted on May 27, 2019 by United States Environmental Protection Agency (USEPA)-accredited and state of West Virginia licensed asbestos inspectors in general accordance with Terracon proposal number PN4197167, dated September 10, 2019. Accessible interior and exterior building components were surveyed. Homogeneous areas of suspect asbestos-containing materials (ACM) were visually identified and documented. Although reasonable effort was made to survey accessible suspect materials, additional suspect but un-sampled materials could be located in walls, in voids, or in other concealed areas. Suspect ACM samples were collected in general accordance with the sampling protocols outlined in (USEPA) 40 Code of Federal Regulations (CFR) Part 763, Subpart E, known as the Asbestos Hazard Emergency Response Act (AHERA). Samples were delivered to an accredited laboratory for analysis by Polarized Light Microscopy (PLM).

Previous asbestos reports for the subject buildings were provided by the Client to Terracon for review prior to the field survey. Pertinent information from the previous reports was utilized where feasible in conjunction with our current survey (e.g. Terracon did not re-collect samples of suspect ACMs which had been previously confirmed by laboratory analysis to contain asbestos). A copy of previous reports is included in Appendix G (Client-Provided Information).

1.1 Project Objective

We understand that this survey was requested for the purpose of a planned renovation or demolition of the three subject structures referenced above. Asbestos surveys are required prior to renovation and demolition to satisfy requirements of the USEPA 40 CFR Part 61, Subpart M, the National Emission Standards for Hazardous Air Pollutants (NESHAP) regulation (as well as the state NESHAP equivalent).

1.2 Reliance

This report is for the exclusive use of The Chapman Technical Group (Client) for the project being discussed. Reliance by any other party on this report is prohibited without written authorization of Terracon and the Client. Reliance on this report by The Chapman Technical Group and all authorized parties will be subject to the terms, conditions, and limitations stated in the proposal, this report, and the agreement between the Client and Terracon.

2.0 BUILDING DESCRIPTION

The three structures located at the West Virginia State Capitol Complex included a single story mail building (Building 33), a maintenance garage, and a storage shed. Building 33 is a 5,600 square foot slab-on-grade structure with concrete masonry unit (CMU) block walls and a flat wood roof deck with asphalt roofing materials. The maintenance garage structure consists of approximately 950 square feet of interior floor space with metal walls and a sloped metal roof. The storage shed consists of approximately 50 square feet of interior floor space with CMU block walls and a sloped asphalt shingled roof.

3.0 FIELD ACTIVITIES

The survey was conducted by Mr. Lemuel Weyer and Mr. Joshua Vogel, EPA AHERA-accredited and state of West Virginia licensed asbestos inspectors. A copy of Mr. Weyer's and Mr. Vogel's West Virginia asbestos inspector license is attached as Appendix D. The survey was conducted in general accordance with the sample collection protocols established in USEPA 40 CFR Part 763, Subpart E, 763.86, AHERA. A summary of survey activities is provided below.

3.1 Visual Assessment

Survey activities were initiated with visual observation of the accessible interior and exterior areas of the facility to identify homogeneous areas of suspect ACM. A homogeneous area (HA) consists of building materials that appear similar throughout in terms of color and texture with consideration given to the date of application. Additionally, the prior asbestos survey reports were utilized to locate previously identified ACMs.

3.2 Physical Assessment

A physical assessment of each HA of suspect ACM was conducted to assess the friability and condition of the materials. A friable material is defined by the USEPA as a material which can be crumbled, pulverized, or reduced to powder by hand pressure when dry. Friability was assessed by physically touching suspect materials.

3.3 Sample Collection

Based on results of the visual observation, bulk samples of suspect ACM were collected in general accordance with USEPA AHERA sampling protocols. Samples of suspect materials were collected from randomly selected locations in each homogeneous area. Bulk samples were collected using wet methods as applicable to reduce the potential for fiber release. Samples were placed in sealable containers and labeled with unique sample numbers using an indelible marker.

The selection of sample locations and frequency of sampling were based on Terracon's observations and the assumption that like materials in the same area are homogeneous in content. Previously identified ACMs, indicated in the Client-provided reports included in Appendix G, were not re-sampled.

Terracon collected a total of 62 bulk samples from 18 homogeneous areas of suspect ACM. A summary of suspect ACM samples collected during the survey is included as Appendix B.

3.4 Sample Analysis

Bulk samples were submitted under chain of custody to EMSL Analytical Inc. (EMSL) in Indianapolis, Indiana for analysis by PLM with dispersion staining techniques per USEPA methodology 600/R-93/116. The percentage of asbestos, where applicable, was determined by microscopic visual estimation. EMSL is accredited under the National Voluntary Laboratory Accreditation Program (NVLAP), accreditation number 200188-0. When applicable for friable material samples identified by PLM to have a low asbestos-content (typically 5% or less), the additional point count method (400 points) was utilized for a more accurate quantification. EMSL is also licensed through the state of West Virginia, Bureau of Public Health as an asbestos and bulk sample analytical laboratory, license number LT000628.

The asbestos analytical report data is included in Appendix C.

4.0 REGULATORY OVERVIEW

The asbestos NESHAP (40 CFR Part 61, Subpart M) regulates asbestos fiber emissions and asbestos waste disposal practices. It also requires the identification and classification of existing materials prior to demolition or renovation activity. Under NESHAP, ACM are classified as either friable, Category I non-friable or Category II non-friable ACM. Friable materials are those that, when dry, may be crumbled, pulverized or reduced to powder by hand pressure. Category I non-friable ACM includes packings, gaskets, resilient floor coverings and asphalt roofing products containing more than 1% asbestos. Category II non-friable ACM are any materials other than Category I materials that contain more than 1% asbestos.

Friable ACM, Category I and Category II non-friable ACM which is in poor condition and has become friable or which will be subjected to drilling, sanding, grinding, cutting or abrading and which could be crushed or pulverized during anticipated renovation or demolition activities are considered regulated ACM (RACM).

In the state of West Virginia, asbestos activities are regulated by the Office of Environmental Health Services (OEHS) under the West Virginia Department of Health and Human Resources (DHHR). DHHR requires that any asbestos-related activity conducted in a public building be performed by personnel licensed by the DHHR OEHS. Asbestos abatement must be performed by DHHR OEHS-licensed asbestos abatement contractors.

RACM must be removed prior to renovation or demolition activities which will disturb the materials. The owner or operator must provide the DHHR OEHS with written notification of planned removal activities at least 10 working days prior to the commencement of asbestos abatement activities. Please note that the 10 working day notice is also applicable for building demolition, regardless of the presence or lack of ACM. Removal of RACM must be conducted by a State of West Virginia-licensed asbestos abatement contractor.

The OSHA Asbestos standard for construction (29 CFR 1926.1101) regulates workplace exposure to asbestos. The OSHA standard requires that employee exposure to airborne asbestos fibers be maintained below 0.1 asbestos fibers per cubic centimeter of air (0.1 f/cc). The OSHA standard classifies construction and maintenance activities which could disturb ACM, and specifies work practices and precautions which employers must follow when engaging in each class of regulated work. States which administer their own federally-approved state OSHA programs may require additional precautions.

5.0 FINDINGS AND RECOMMENDATIONS

Based on the results of laboratory analysis in regard to the samples collected, and a review of previous asbestos reports, the materials listed below were identified to contain asbestos.

Material Description	Material Location	% and Type Asbestos	Estimated Quantity**
Black Tar	Seams on Top of Parapet Walls on Roof of Building 33	5% Chrysotile	100 Square Feet (SF)
Roof Flashing*	Roof of Building 33	7-9% Chrysotile	375 SF
Roof*	Roof of Building 33	7-9% Chrysotile	5,600 SF
Exterior Window Caulking	Maintenance Garage Windows	<1% Chrysotile	10 SF or 5 Windows

* Material indicated positive by laboratory analysis in prior asbestos reports.

**Estimated quantities listed above are based on a cursory field evaluation, and actual quantities may vary significantly, especially if ACMs are present in hidden and/or inaccessible areas not

evaluated as part of this survey. This is not a bidding document and contractors would be responsible for drawing their own conclusions on quantities present.

Asbestos was not identified in the samples collected from the shed structure.

A summary of the identified ACMs is also included in Appendix A. A sample and results summary is included in Appendix B, and laboratory analytical reports are included in Appendix C. A photo log showing examples of the identified ACM is included as Appendix E. Prior asbestos reports are included as Appendix G (Client-Provided Information).

If the above identified ACMs will be impacted by renovation, or if the two structures with ACM will be demolished, the ACMs will need to be taken into consideration for proper compliance with federal and, state EPA NESHAP regulations, Occupational Safety and Health Administration (OSHA) asbestos regulations, and local asbestos regulations.

6.0 LIMITATIONS/GENERAL COMMENTS

In addition to any limitations indicated in other sections of this report, Terracon did not perform sampling which required demolition or destructive activities such as knocking large holes in walls, dismantling of equipment or removal of protective coverings. Reasonable efforts to access suspect materials within known areas of restricted access (e.g., crawl spaces) were made; however, confined spaces or areas which may pose a health or safety risk to Terracon personnel were not sampled. Sampling did not include suspect materials which could not be safely reached with available ladders/man-lifts.

This asbestos survey was conducted in a manner consistent with the level of care and skill ordinarily exercised by members of the profession currently practicing under similar conditions in the same locale. The results, findings, conclusions, and recommendations expressed in this report are based on conditions observed during our survey of the building. The information contained in this report is relevant to the date on which this survey was performed, and should not be relied upon to represent conditions at a later date. This report has been prepared on behalf of and exclusively for use by The Chapman Technical Group for specific application to their project as discussed. This report is not a bidding document. Contractors or consultants reviewing this report must draw their own conclusions regarding further investigation or remediation deemed necessary. Terracon does not warrant the work of regulatory agencies, laboratories, or other third-parties supplying information which may have been used in the preparation of this report. No warranty, express or implied is made.

Charleston, West Virginia 25305
June 8, 2020

IDENTIFIED ASBESTOS-CONTAINING MATERIALS BY HOMOGENEOUS AREA (HA)

HA No.	Material Description	Material Location	% and Type Asbestos	EPA NESHAP Classification	Condition	Estimated Quantity*
13	Black Tar	Seams on Top of Parapet Walls on Roof of Building 33	5% Chrysotile	Category I Non-Friable	Good	100 Square Feet (SF)
16	Exterior Window Caulking	Maintenance Garage Windows	<1% Chrysotile	Not Regulated by EPA NESHAP (<1%) – Regulated by OSHA	Good	10 SF or 5 Windows
-	Roof Flashing	Roof of Building 33	7-9% Chrysotile	Category I Non-Friable	Good	375 SF
-	Roof	Roof of Building 33	7-9% Chrysotile	Category I Non-Friable	Good	5,600 SF

***Estimated quantities** are based on a cursory field evaluation, and actual quantities may vary significantly, especially if ACMs are present in hidden and/or inaccessible areas not evaluated as part of this survey. This is not a bidding document and contractors would be responsible for drawing their own conclusions on quantities present.

The materials listed in this table have been sampled and determined to contain asbestos. When disturbed, various federal, state and local regulations apply. If to be left in place, and in good condition, these materials should be monitored for damage over time and repaired as necessary by appropriately trained personnel. Removal may be necessary for materials if in poor condition (an airborne exposure concern), before renovations, and in most cases before a demolition. See Appendix B for a summary of samples collected. See Appendix C for detailed analytical results.

EMSL maintains liability limited to cost of analysis. The above analyses were performed in general compliance with Appendix E to Subpart E of 40 CFR (previously EPA 600/M4-82-020 "Interim Method"), but augmented with procedures outlined in the 1993 ("final") version of the method. This report relates only to the samples reported above, and may not be reproduced, except in full, without written approval by EMSL. EMSL bears no responsibility for sample collection activities or analytical method limitations. Interpretation and use of test results are the responsibility of the client. All samples received in acceptable condition unless otherwise noted. This report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST or any agency of the federal government. EMSL recommends gravimetric reduction for all non-friable organically bound materials prior to analysis. Estimation of uncertainty is available on request.

Samples analyzed by EMSL Analytical, Inc. Indianapolis, IN NVLAP Lab Code 200188-0, AZ0939, CA 2575, CO AL-15132, TX 300262

AIA® Document A101™ – 2017

Standard Form of Agreement Between Owner and Contractor where the basis of payment is a Stipulated Sum

AGREEMENT made as of the day of in the year
(In words, indicate day, month and year.)

BETWEEN the Owner:
(Name, legal status, address and other information)

and the Contractor:
(Name, legal status, address and other information)

for the following Project:
(Name, location and detailed description)

19024 - Ritchie County Board of Education

The Architect:
(Name, legal status, address and other information)

The Owner and Contractor agree as follows.

ADDITIONS AND DELETIONS:
The author of this document has added information needed for its completion. The author may also have revised the text of the original AIA standard form. An *Additions and Deletions Report* that notes added information as well as revisions to the standard form text is available from the author and should be reviewed. A vertical line in the left margin of this document indicates where the author has added necessary information and where the author has added to or deleted from the original AIA text.

This document has important legal consequences. Consultation with an attorney is encouraged with respect to its completion or modification.

The parties should complete A101™–2017, Exhibit A, Insurance and Bonds, contemporaneously with this Agreement. AIA Document A201™–2017, General Conditions of the Contract for Construction, is adopted in this document by reference. Do not use with other general conditions unless this document is modified.

EXHIBIT A INSURANCE AND BONDS

ARTICLE 1 THE CONTRACT DOCUMENTS

The Contract Documents consist of this Agreement, Conditions of the Contract (General, Supplementary, and other Conditions), Drawings, Specifications, Addenda issued prior to execution of this Agreement, other documents listed in this Agreement, and Modifications issued after execution of this Agreement, all of which form the Contract, and are as fully a part of the Contract as if attached to this Agreement or repeated herein. The Contract represents the entire and integrated agreement between the parties hereto and supersedes prior negotiations, representations, or agreements, either written or oral. An enumeration of the Contract Documents, other than a Modification, appears in Article 9.

ARTICLE 2 THE WORK OF THIS CONTRACT

The Contractor shall fully execute the Work described in the Contract Documents, except as specifically indicated in the Contract Documents to be the responsibility of others.

ARTICLE 3 DATE OF COMMENCEMENT AND SUBSTANTIAL COMPLETION

§ 3.1 The date of commencement of the Work shall be:
(Check one of the following boxes.)

[ ] The date of this Agreement.

[ ] A date set forth in a notice to proceed issued by the Owner.

[ ] Established as follows:
(Insert a date or a means to determine the date of commencement of the Work.)

If a date of commencement of the Work is not selected, then the date of commencement shall be the date of this Agreement.

§ 3.2 The Contract Time shall be measured from the date of commencement of the Work.

§ 3.3 Substantial Completion

§ 3.3.1 Subject to adjustments of the Contract Time as provided in the Contract Documents, the Contractor shall achieve Substantial Completion of the entire Work:
(Check one of the following boxes and complete the necessary information.)

WARNING: This AIA® Document is protected by U.S. Copyright Law and International Treaties. Unauthorized reproduction or distribution of this AIA® Document, or any portion of it, may result in severe civil and criminal penalties, and will be prosecuted to the maximum extent possible under the law.** This document was produced by AIA software at 16:02:19 ET on 09/13/2019 under Order No.4568032601 which expires on 04/04/2020, and is not for resale.
User Notes: (1500799824)

[ ] Not later than ( ) calendar days from the date of commencement of the Work.

[ ] By the following date:

§ 3.3.2 Subject to adjustments of the Contract Time as provided in the Contract Documents, if portions of the Work are to be completed prior to Substantial Completion of the entire Work, the Contractor shall achieve Substantial Completion of such portions by the following dates:

Portion of Work	Substantial Completion Date

§ 3.3.3 If the Contractor fails to achieve Substantial Completion as provided in this Section 3.3, liquidated damages, if any, shall be assessed as set forth in Section 4.5.

ARTICLE 4 CONTRACT SUM

§ 4.1 The Owner shall pay the Contractor the Contract Sum in current funds for the Contractor's performance of the Contract. The Contract Sum shall be ($), subject to additions and deductions as provided in the Contract Documents.

§ 4.2 Alternates

§ 4.2.1 Alternates, if any, included in the Contract Sum:

Item	Price

§ 4.2.2 Subject to the conditions noted below, the following alternates may be accepted by the Owner following execution of this Agreement. Upon acceptance, the Owner shall issue a Modification to this Agreement.
(Insert below each alternate and the conditions that must be met for the Owner to accept the alternate.)

Item	Price	Conditions for Acceptance

§ 4.3 Allowances, if any, included in the Contract Sum:
(Identify each allowance.)

Item	Price

§ 4.4 Unit prices, if any:
(Identify the item and state the unit price and quantity limitations, if any, to which the unit price will be applicable.)

Item	Units and Limitations	Price per Unit ($0.00)

§ 4.5 Liquidated damages, if any:
(Insert terms and conditions for liquidated damages, if any.)

§ 4.6 Other:
(Insert provisions for bonus or other incentives, if any, that might result in a change to the Contract Sum.)

User Notes: (1500799824)

ARTICLE 5 PAYMENTS

§ 5.1 Progress Payments

§ 5.1.1 Based upon Applications for Payment submitted to the Architect by the Contractor and Certificates for Payment issued by the Architect, the Owner shall make progress payments on account of the Contract Sum to the Contractor as provided below and elsewhere in the Contract Documents.

§ 5.1.2 The period covered by each Application for Payment shall be one calendar month ending on the last day of the month, or as follows:

§ 5.1.3 Provided that an Application for Payment is received by the Architect not later than the day of a month, the Owner shall make payment of the amount certified to the Contractor not later than the day of the month. If an Application for Payment is received by the Architect after the application date fixed above, payment of the amount certified shall be made by the Owner not later than ( ) days after the Architect receives the Application for Payment.
(Federal, state or local laws may require payment within a certain period of time.)

§ 5.1.4 Each Application for Payment shall be based on the most recent schedule of values submitted by the Contractor in accordance with the Contract Documents. The schedule of values shall allocate the entire Contract Sum among the various portions of the Work. The schedule of values shall be prepared in such form, and supported by such data to substantiate its accuracy, as the Architect may require. This schedule of values shall be used as a basis for reviewing the Contractor's Applications for Payment.

§ 5.1.5 Applications for Payment shall show the percentage of completion of each portion of the Work as of the end of the period covered by the Application for Payment.

§ 5.1.6 In accordance with AIA Document A201™–2017, General Conditions of the Contract for Construction, and subject to other provisions of the Contract Documents, the amount of each progress payment shall be computed as follows:

§ 5.1.6.1 The amount of each progress payment shall first include:

.1 That portion of the Contract Sum properly allocable to completed Work;

.2 That portion of the Contract Sum properly allocable to materials and equipment delivered and suitably stored at the site for subsequent incorporation in the completed construction, or, if approved in advance by the Owner, suitably stored off the site at a location agreed upon in writing; and

.3 That portion of Construction Change Directives that the Architect determines, in the Architect's professional judgment, to be reasonably justified.

§ 5.1.6.2 The amount of each progress payment shall then be reduced by:

.1 The aggregate of any amounts previously paid by the Owner;

.2 The amount, if any, for Work that remains uncorrected and for which the Architect has previously withheld a Certificate for Payment as provided in Article 9 of AIA Document A201–2017;

.3 Any amount for which the Contractor does not intend to pay a Subcontractor or material supplier, unless the Work has been performed by others the Contractor intends to pay;

.4 For Work performed or defects discovered since the last payment application, any amount for which the Architect may withhold payment, or nullify a Certificate of Payment in whole or in part, as provided in Article 9 of AIA Document A201–2017; and

.5 Retainage withheld pursuant to Section 5.1.7.

§ 5.1.7 Retainage

§ 5.1.7.1 For each progress payment made prior to Substantial Completion of the Work, the Owner may withhold the following amount, as retainage, from the payment otherwise due:
(Insert a percentage or amount to be withheld as retainage from each Application for Payment. The amount of retainage may be limited by governing law.)

AIA Document A101™ – 2017. Copyright © 1915, 1918, 1925, 1937, 1951, 1958, 1961, 1963, 1967, 1974, 1977, 1987, 1991, 1997, 2007 and 2017 by The American Institute of Architects. **All rights reserved.** **WARNING: This AIA® Document is protected by U.S. Copyright Law and International Treaties. Unauthorized reproduction or distribution of this AIA® Document, or any portion of it, may result in severe civil and criminal penalties, and will be prosecuted to the maximum extent possible under the law.** This document was produced by AIA software at 16:02:19 ET on 09/13/2019 under Order No.4568032601 which expires on 04/04/2020, and is not for resale.
User Notes: (1500799824)

§ 5.1.7.1.1 The following items are not subject to retainage:
(Insert any items not subject to the withholding of retainage, such as general conditions, insurance, etc.)

§ 5.1.7.2 Reduction or limitation of retainage, if any, shall be as follows:
(If the retainage established in Section 5.1.7.1 is to be modified prior to Substantial Completion of the entire Work, including modifications for Substantial Completion of portions of the Work as provided in Section 3.3.2, insert provisions for such modifications.)

§ 5.1.7.3 Except as set forth in this Section 5.1.7.3, upon Substantial Completion of the Work, the Contractor may submit an Application for Payment that includes the retainage withheld from prior Applications for Payment pursuant to this Section 5.1.7. The Application for Payment submitted at Substantial Completion shall not include retainage as follows:
(Insert any other conditions for release of retainage upon Substantial Completion.)

§ 5.1.8 If final completion of the Work is materially delayed through no fault of the Contractor, the Owner shall pay the Contractor any additional amounts in accordance with Article 9 of AIA Document A201–2017.

§ 5.1.9 Except with the Owner's prior approval, the Contractor shall not make advance payments to suppliers for materials or equipment which have not been delivered and stored at the site.

§ 5.2 Final Payment
