Extended Description:

CMA STATEWIDE COOPERATIVE AWARD (SOURCEWELL MASTER AGREEMENT # 121223-MRL)

Change Order No. 02 is issued to update the Contract Products & Pricing to mirror the SourceWell Master Agreement, per the attached documents.

Effective Date: 09/01/2025

All provisions of the original Contract and subsequent Change Orders not modified herein shall remain in full force and effect.

NO OTHER CHANGES

CMA 0212 LIFTMV25: MOTOR VEHICLE LIFTS, Garage, and Fleet Maintenance Equipment

This Statewide open-end contract with MOHAWK LIFTS LLC is to provide Motor Vehicle Lifts, Garage, and Fleet Maintenance Equipment to all West Virginia State Agencies and Political Subdivisions via the attached Participating Addendum Agreement (Sourcewell Master Agreement No. 121223-MRL) all incorporated herein by reference and made apart hereof.

This Contract does not permit the installation of products. Installation (if needed) will be procured separately under the Purchasing Entities delegated authority and may be subject to West Virginia Code 5-22.

Vehicle Lifts, Garage, and Fleet Maintenance Equipment will be provided at the established Discount Percentage from the List Price provided in the attached Vendor Catalogs

Line	Commodity Code	Manufacturer	Model No	Unit	Unit Price

			0.00		

Commodity Line Description: Motor Vehicle Lifts and Accessories

Extended Description:

Motor Vehicle Lifts and Accessories provided at Discount from List Price percentages.

See attached pricing pages for contract pricing.

**CONTRACT AMENDMENT
PRICE AND PRODUCT CHANGE REQUEST
FORM**

Supplier Name: Mohawk Lifts, LLC

Sourcewell Contract Number: 121223-MRL

Request Type: Adding Products/Services;Deleting Products/Services;Price Increase;Price Decrease

Changed Product List

Mohawk price list update – including additions (2 items), price changes (-100%-9.49%), description changes (1 item); Hunter price list update – including deletions (105 items), additions (34 items), price changes (3.13% - 71.19%); Gray Price List update - including deletions (7 items), additions (11 items), price changes (-11.48% - 18.01%), description changes; Westmatic Price List update - including price changes (8%-12%); Worky Price List update – including additions (20 items).

Justification for Changes

Please see the included additional support for all the details on price changes and justifications

Product additions only

Products were added to expand the product line, replace obsolete equipment and offer additional capacity and/or performance options

Price changes or product/service additions only

Pricing is consistent with previously established Sourcewell Contract Pricing

Approvals

Supplier Offer:

This Price and Product Change Request has been submitted for review to be considered as an amendment to the above referenced Contract.

**CONTRACT AMENDMENT
PRICE AND PRODUCT CHANGE REQUEST
FORM**

Supplier Name: Mohawk Lifts, LLC

Sourcewell Contract Number: 121223-MRL

Request Type: Adding Products/Services

Changed Product List

Addition of Rapid Air Product Line

Justification for Changes

See attached catalog and supply letters for additional documentation

Product additions only

Mohawk Lifts LLC requests to add RapidAir as an authorized supplier under our current Sourcewell Contract #121223. RapidAir's compressed air piping systems and related components will enhance and expand our current product offering to Participating Entities, providing additional solutions that align with the Equipment, Products, and Services described in our original proposal.

RapidAir's products are primarily used for compressed air delivery systems in commercial, municipal, and fleet maintenance garages. Typical applications include:

- Compressed air piping – Modular aluminum or HDPE piping systems that route compressed air from a central compressor to multiple workstations throughout the garage.
- Air drops & outlets – Convenient, safe, and organized placement of air outlets for pneumatic tools, tire inflation, and cleaning operations.
- Flexible layouts – Quick-connect fittings and modular components allow for easy expansion or relocation of air lines as shop layouts change or additional bays are added.
- Reduced leaks & pressure loss – Engineered to minimize air loss compared to black iron or PVC, helping tools run at peak performance.
- Clean, professional installation – Wall- or ceiling-mounted systems reduce tripping hazards, improve shop organization, and maintain a professional work environment.

RapidAir products provide garages with an organized, efficient, and professional-grade compressed air delivery network to support a wide range of operations, from pneumatic tools to spray equipment. This addition aligns with our established practice of utilizing our current suppliers to meet Participating Entity needs. All RapidAir products will be offered through Mohawk's distribution channel in full compliance with the contract's terms, conditions, and pricing requirements.

Price changes or product/service additions only

Pricing is consistent with previously established Sourcewell Contract Pricing

FAST PIPE[®]

BY RAPIDAIR

Modular Aluminum Compressed Air Piping

SIZES RANGE FROM:

$\frac{3}{4}$ " - 1" - 1½" - 2" - 3" - 4" - 6"

Today's Improved Compressed Air Piping Method

Fast Installation

- Compression style fittings make installation simple
- Aluminum piping is easy to cut and lift
- O-ring seals ensure a leak free system
- No gluing, threading, or soldering
- Installs in half the time as some traditional methods

Diverse

- Install in small shops to industrial plants
- Connect to any existing piping system
- Expand or modify the system with ease

Superior Air Quality

- No corrosion in the pipe and fitting means longer tool life
- Cools hot compressed air quickly for better filter performance

Energy Efficient

- Smooth inner wall and free flowing fittings lower compressed air costs
- Sealed connections means your compressor run time is less

3/4" - 3" Compression Type

Step 1

(see page 11 for detailed instructions)

Step 2

Step 3

4" - 6" Lug Type

(see page 12 for detailed instructions)

Technical Specs

- 190 psi working pressure
- 0° F to 140° F
- Compatible with all types of compressor lubricants
- Compressed air, vacuum, inert gas

General System Ratings

- Fire resistant to flammability standard UL94HB
- OSHA Compliant

Aluminum Pipe Specs 3/4" - 6"

- Alloy grade
- Extruded to ASTM B221, B429
- Blue powder coat, RAL5012 outside
- Green powder coat, RAL6018 outside
- Non-chromate conversion coating inside

Fittings Specs 3/4" - 2"

- Nylon 6 base with fiberglass reinforcement
- Bite ring: stainless steel
- O-ring: Nitrile

Fittings Specs 3"

- Diecast Aluminum Alloy
- Bite ring: stainless steel
- O-ring: Nitrile
- Electrocoated

Fittings Specs 4" - 6"

- Diecast Aluminum Alloy
- Seal: Nitrile
- Powder Coat

Fittings Parts

- A. O-Ring
- B. Backer
- C. SS Bite Ring
- D. Collet
- E. Cone Nut
- F. Tension O-Ring*

Tension O-ring (F) is found on the 3/4" & 1" sizes only

Saddle Drop Installation

- System must be de-pressurized before installing
 - To prevent chips from entering the pipe interior, stop drilling occasionally and blow out chips, grease the end of the drilling tool
1. Position saddle drop opposite the side of the pipe that needs the hole. Tighten securely and mark the pipe by the raised locating mark on the fitting. Mark the pipe both horizontally & vertically along the fitting edge
 2. Drill thru one side of the pipe with the drill bit, using the hole in the fitting as a locator
 3. Insert the saddle drop gasket into the molded cavity
 4. Position the saddle drop over the drilled hole with aligning marks, tighten securely
 5. Attach the necessary drop pipe or threaded adapter

MAIN SIZE	DRILL BIT	GASKET
1"	9/16" F0043	F1210C
1½"	3/4" F0044	F4210C

3"	3/4" F0044	F17210C
4"	15/16" F0045	
6"	15/16" F0045	

Flat Surface Installation

- Use pipe clips to secure pipe to any flat surface with mounting screw
- Ceiling or wall mount
- Clip has 5/16" thru hole and hex bore for a 5/16" hex nut
- Hex nut serves as a backer for screws
- Use #10 Drywall Screw or Tapcon
- In horizontal installations, mount clip pivot tab up

MAIN SIZE	PART NUMBER	X DIMENSION

FAST PIPE

BY RAPIDAIR

FastPipe Installation

1
Cut Pipe to length
with tubing cutter
(cut must be square)
(DO NOT USE HACK SAW)

2
Deburr the end of the pipe outside and inside
(a smooth edge allows easy fitting assembly and no damage to the fitting O-ring)

3
Mark end of pipe
for the proper insertion depth

3/4" Fittings:	2 inches
1" Fittings:	2 - 3/4 inches
1 1/2" Fittings:	4 inches
2" Fittings:	4 - 3/4 inches
3" Fittings:	4 - 1/2 inches

4
Wet end of pipe
with very diluted soapy water
DO NOT USE ANY OIL OR GREASE LUBRICANT

5
Loosen FITTING CONE NUT PARTIALLY
LOOK INSIDE EACH FITTING FOR INNER PARTS
(inner parts, o-ring, stainless steel bite ring)

6
Insert pipe into fitting until pipe bottoms out
Hand tighten fitting
Fully tighten fitting with FastPipe spanner wrenches

TAB MUST ALIGN TO NOTCH

Tool Set

MAIN SIZE	PART NUMBER
3/4"	F0136

FASTPIPE[®]

BY RAPIDAIR

Warnings

- Compressed air is DANGEROUS if not used properly
- Always use EYE PROTECTION when using compressed air
- DO NOT POINT compressed air at your body or any person
- Pressurize system SLOWLY
- TURN OFF air compressor when not in use
- CHECK local building codes before installation

- ALWAYS RELIEVE the system pressure when installing or performing maintenance
- Systems must have a SAFETY RELIEF valve installed at the compressed air source to prevent over pressurization
- When using FastPipe in direct sunlight, cover or paint the polymer fittings to protect from UV exposure (Pipe needs no covering and can be exposed)
- Keep children away from the system

FastPipe is NOT designed:

- For underground burial
- To electrically ground equipment
- To be welded
- To take violent impacts
- To be used where the compressed air temperature is above 140° F
- For environments of caustic or corrosive chemicals

WARNING: This product can expose you to chemicals including lead, which is known to the State of California to cause cancer. For more information, go to www.P65Warnings.ca.gov. Wash hands after handling.

CONTAINS LEAD: MAY BE HARMFUL IF EATEN OR CHEWED. MAY GENERATE DUST CONTAINING LEAD. KEEP OUT OF THE REACH OF CHILDREN.

Installation Tips & Recommendations

Care must be taken on any installation of the FastPipe system. Pipes will be carrying compressed air/gas up to 190 psi. The FastPipe system is only as safe as a thorough installation. Read all installation instructions and watch videos before starting. Below are some tips for a safe installation.

We strongly recommend that the installer contact our tech department for installation questions PRIOR to the installation.

- Assemble all NPT PIPE THREADS with two wraps of Teflon tape and then pipe sealant which prevents thread galling.
- Support the pipe with clips/ hangers a maximum of 10 FT. SPACING and on ONE SIDE OF EACH FITTING.
- FastPipe can be bent to a maximum of 15° DO NOT OVER BEND. 3/4" Fastpipe can be bent to 45°
- Any machine/compressor plumbed to the FastPipe must have a JUMPER HOSE to reduce vibration.
- Any piping system will expand and contract with temperature changes. Use EXPANSION JOINTS to compensate for this movement of aluminum pipe in non-conditioned buildings.
- DO NOT USE FastPipe for PULSING desiccant dryers or other like equipment.
- CAUTION installing inert gas bulk tank systems, gas must be warmed up to FastPipe temperature range.
- Use a strain relief attached to the building for any rubber hose drops attached to the piping.
- DO NOT connect quick couplings for air hoses to reducing elbows or tee fittings. The constant connecting/ disconnecting and pulling or air hoses could loosen the fitting. Use the FastPipe WALL OUTLET which can be secured to a wall or post. Any hoses attached in the ceiling area to a fitting must use a strain relief attached to the building structure.
- CHECK that all fittings are tightened before pressurizing the system for the first time.
- For initial installation, pressurize system SLOWLY to 50 psi and check for leaks, then pressurize slowly to MAX 190 psi.
- AFTER 24 HOURS of being pressurized, depressurize the system and RETIGHTEN the compression nuts. Some settling of components may have occurred. This is not optional, it must be done.
- Make sure compressor output temperature does not exceed 140° F.

Letter of Compliance

Product Description: Modular compressed air piping system 3/4" thru 8" Fastpipe

Technical Specifications: Compressed air, vacuum (29in-Hg), and inert gas applications 190 psi maximum working pressure, 600 psi burst pressure, temp range 0°F to 140°F Compatible with common compressor lubricants

General Ratings: Conforms to ASME B31.1
UL94HB fire resistance, compliant to OSHA

Pipe Specifications: Pipe:
Aluminum alloy grade 6063 USA produced, 3/4"-8"
Blue powder coat, color RAL5012
Green powder coat, color RAL6018 outside 3/4"-2"
Non-chromate conversion coating inside
Trade size callout measured with O.D.

3/4" size	20 mm	.79 O.D. x .69 I.D
1" size	25mm	.98 O.D. x .87 I.D

COMBO FILTER REGULATOR UNITS

Industrial, compact design of a regulator combined with a water separator/filter.

Tech Specs:

- Compressed air applications
- 175 psi maximum inlet pressure
- 0-150 psi adjustable pressure range
- Temperature range 32°F to 140°F
- 5 micron filtration

General Ratings:

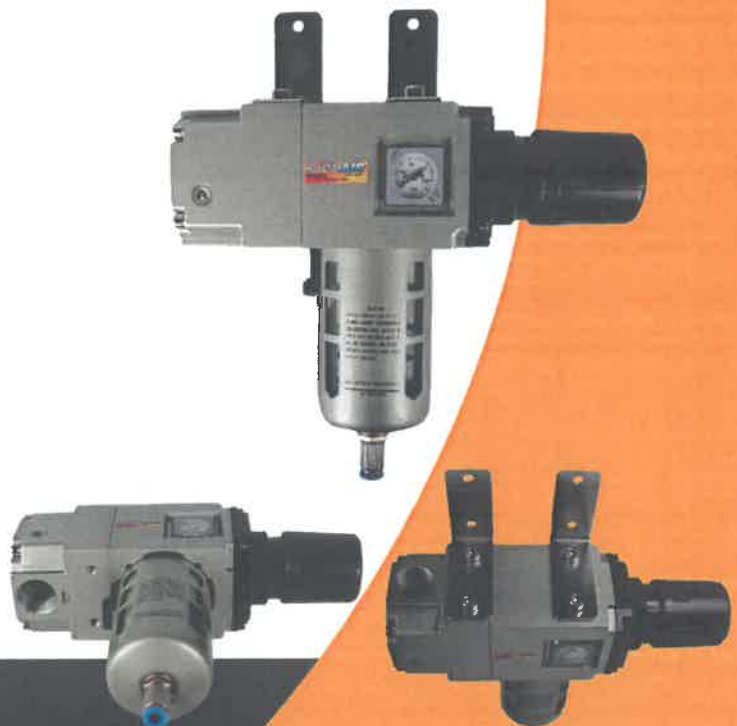

- Manual bowl drain
- Square embedded gauge
- Flow direction, reversible for horizontal port units
- Flow direction, top to bottom for vertical port units
- Zinc die cast body
- Compatible with common compressor lubricants

Horizontal Ports:

K93215 3/8" NPT female, 100 cfm
K93216 1/2" NPT female, 150 cfm
K93217 3/4" NPT female, 300 cfm
K93218 1" NPT female, 350 cfm

Vertical Ports:

K96075 3/4" NPT female, 300 cfm

- Temperature $-4^{\circ}\text{F} \sim +158^{\circ}\text{F}$

BG2025 Blow Gun

- Cast aluminum body allows for a lightweight and durable tool
- High-pressure flow for superior efficiency and lower air consumption

- **Specifications**

- 1/4" Port
- Max Working Pressure 363 psi / 25 Bar
- Working Temperature Range 23° F - 140° F

BG2225 Blow Gun w/ Nozzle Set

- Cast aluminum body allows for a lightweight and durable tool
- High-pressure flow for superior efficiency and lower air consumption
- 5" nozzle with rubber tip
- 5" nozzle

- **Specifications**

- 1/4" Port
- Max Working Pressure 363 psi / 25 Bar
- Working Temperature Range 23° F - 140° F

BG2425 Pocket Air Gun

- Lightweight and easy to operate
- Easy to carry with a pencil-style design
- Adjustable air intensity
- Designed with a rubber tip

- **Specifications**

- Max Input Pressure 150 psi / 10 Bar
- Max Output Pressure 90 psi / 6.2 Bar
- Working Temperature Range -4°F - 176°F

BG2125

Blow Gun w/ Rubber Nozzle

- Cast aluminum body allows for a lightweight and durable tool
- High-pressure flow for superior efficiency and lower air consumption
- 5 Inch nozzle with rubber tip

- **Specifications**

- 1/4" Port
- Max Working Pressure 363 psi / 25 Bar
- Working Temperature Range 23° F - 140° F

BG2325

Blow Gun w/ High Flow Nozzle

- Cast aluminum body allows for a lightweight and durable tool
- High-pressure flow for superior efficiency and lower air consumption
- High flow nozzle

- **Specifications**

- 1/4" Port
- Max Working Pressure 636 psi / 43 Bar
- Working Temperature Range 23° F - 140° F

K3005

Pistol Tire Inflator

- Cast aluminum body allows for a lightweight and durable tool
- Measure and inflate tire pressures with precision
- Measure and release pressure

- **Specifications**

- 1/4" Port
- Max Working Pressure 232 psi / 16 Bar
- Working Temperature Range -4° F - 140° F

PUSH ON AIR HOSE

Build your own custom length air hose for machine hook-ups and drop lines with a variety of fitting choices for the ends.

Easy to Use:

- No clamps needed, simply place the end of the hose in boiling water to soften, and push on the barb fitting

Specs:

- Pliable rubber hose
- Brass fittings
- 200 psi working pressure

MAXLINE[®]
BY RAPIDAIR

INDUSTRIAL
Compressed Air
Piping System

SIZES: ½" to 2"

Installation

- Long tubing rolls allow for fewer joints
- Compression fittings reduce labor
- Bury underground or underneath concrete
- Expand or modify the system layout with ease

Versatile

- Install in small shops to large manufacturing facilities
- On wall, in wall and underground applications
- Connect to any existing piping system

Air Quality-Energy Efficient

- No corrosion with HDPE tubing and nickel plated fittings
- Double o-ring design ensures leak free joints
- Efficient flowing smooth inner wall

Burial

- This product can be direct buried in the soil or under concrete
- Wrap all fittings underground and do a pressure test before covering

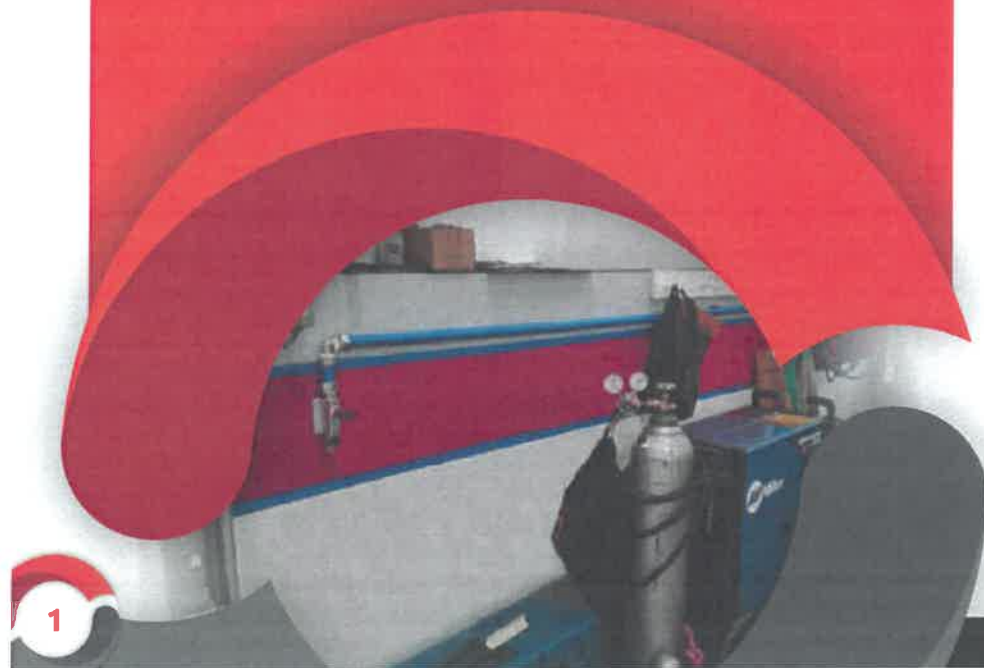

Compression Fittings

- 200 psi at 73°F
- 160 psi at 140°F
- Nickel Plated Brass
- Double O-Ring Seal: Nitrile
- ASTM F1282
- ASTM F1974

Press Fittings

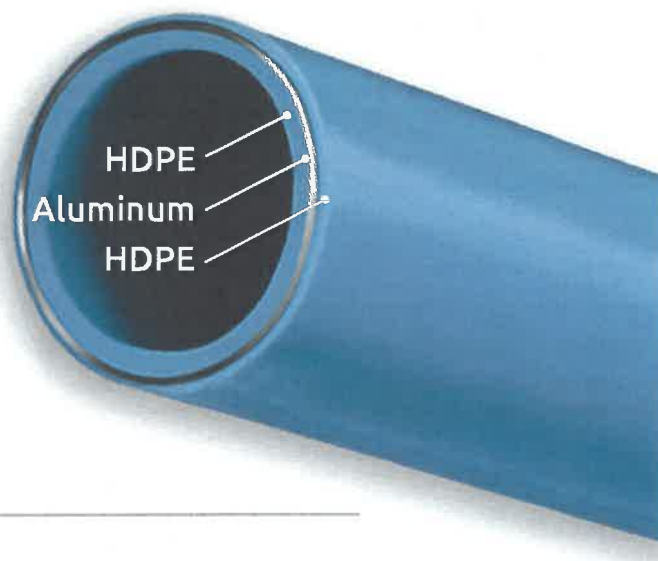

- 232 psi at 73°F
- 180 psi at 140°F
- Nickel Plated Brass Body
- Stainless Steel Crimp Sleeve
- Double O-Ring Seal: Nitrile
- ASTM F1282
- ASTM F3374

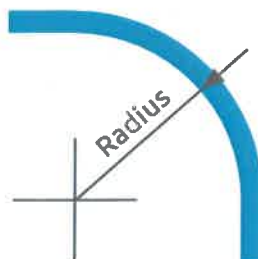

Tubing

- Multi-Layer semi flexible tubing
- Inner and outer layer - HDPE
- Center layer - aluminum
- Sizes measured on inside diameter
- -40°F to 140°F
- Compressed air
- Inert gas
- OSHA compliant

Bend Radius

- 1/2" Tubing: 4-6 inches
- 3/4" Tubing: 8-10 inches
- 1" Tubing: 10-12 inches
- 2" Tubing: 36-48 inches

MaxLine will hold any bent shape.

Warnings

- Compressed air is **DANGEROUS** if not used properly
- Always use **EYE PROTECTION** when using compressed air 
- **DO NOT POINT** compressed air at your body or any person
- Pressurize system **SLOWLY**
- **TURN OFF** air compressor when not in use
- **CHECK** local building codes before installation
- **ALWAYS RELIEVE** the system pressure when installing or performing maintenance
- Systems must have a **SAFETY RELIEF** valve installed at the compressed air source to prevent over pressurization
- When using **MaxLine** in **direct sunlight**, cover or paint the plastic tubing to protect from UV exposure (Fittings need no covering and can be exposed) 
- Keep children away from the system

MaxLine is **NOT** designed:

- To be glued
- To take violent impacts
- To be used where the compressed air temperature is above 140° F
- For environments of caustic or corrosive chemicals

WARNING: This product can expose you to chemicals including lead, which is known to the State of California to cause cancer. For more information, go to www.P65Warnings.ca.gov.

Wash hands after handling.

CONTAINS LEAD: MAY BE HARMFUL IF EATEN OR CHEWED. MAY GENERATE DUST CONTAINING LEAD. KEEP OUT OF THE REACH OF CHILDREN.

Installation Tips & Recommendations

MAXLINE INSTALLATION TRAINING: Care must be taken on any installation of the MaxLine system. Tubing will be carrying compressed air/gas up to 200 psi. The MaxLine system is only as safe as a thorough installation. Read all installation instructions and watch installation videos before starting. Below are some tips for a safe installation.

Each shipment will contain installation instructions, if you do not receive them please call immediately 800-954-3310. Videos can be found at www.rapidairproducts.com. ***We strongly recommend that the installer contact our tech department for installation questions PRIOR to the installation.***

- **CUT** the tubing **STRAIGHT** with the supplied cutter; do not use a hacksaw.
- **CHAMFER** the end of the tubing with the supplied tool. When pushing the tubing into the fitting, the o-ring must insert smoothly. If the end of the tube is sharp, it will cut the o-ring and **CAUSE LEAKS**. Use a spray bottle with a couple of drops of dish soap and fill it with water for lubrication.
- **TUBING** must be **INSERTED** into the fitting fully to the shoulder inside.
- Fitting nuts must be tightened to a minimum of 3/4 of a turn.
- Support the tubing with clips/ hangers.
- Any machine/compressor plumbed to the system must have a **JUMPER HOSE** to reduce vibration.
- **DO NOT USE** MaxLine for **PULSING** desiccant dryers or other like equipment.
- **CAUTION** installing inert gas bulk tank systems, gas must be warmed up to MaxLine temperature range.
- **DO NOT** connect quick couplings for air hoses to reducing elbows or tee fittings. The constant connecting/ disconnecting and pulling or air hoses could loosen the fitting. Use the MaxLine **WALL OUTLET** which can be secured to a wall or post. Any hoses attached in the ceiling area to a fitting must use a strain relief attached to the building structure.
- Assemble all NPT **PIPE THREADS** with two wraps of Thread tape and then pipe sealant which prevents thread galling.
- **CHECK** that all fittings are tightened before pressurizing the system for the first time.
- For initial installation, pressurize system **SLOWLY** to 50 psi and check for leaks, then pressurize slowly to MAX 200 psi.
- **AFTER 24 HOURS** of being pressurized, depressurize the system and **RETIGHTEN** the compression nuts. Some settling of components may have occurred. This is not optional, it must be done.
- Make sure compressor output temperature does not exceed **140° F**.

CUT the tubing square with the cutter, ROTATING wrist while cutting

2

BEVEL the inside of the tubing by inserting the reaming tool and rotating it at least 3 full turns. Use:

- Peg #32 for 1" tubing
- Peg #25 for 3/4" tubing
- Peg #16 for 1/2" tubing

Remove nut and split ring from fitting and place on tubing

3

PUSH the fitting onto the tubing and fully against the shoulder of the fitting (soapy water will help this process)

4

TURN the nut hand tight. Put a reference mark on the nut and fitting body

5

TIGHTEN nut with wrench a minimum 3/4 of a turn or until tight

Press Tool
MC8092

Cutter
M8091 1/2" - 3/4"
M8051 1/2" - 3/4" - 1"

Bevel Tool
M8095 1/2" - 3/4" - 1"

Straightening Tool
M8097

Bender Tool
M8096

1/2" - 3/4" - 1" Press Fittings

1

CUT the tubing square with the cutter, ROTATING wrist while cutting

2

BEVEL the inside of the tubing by inserting the reaming tool and rotating it at least 3 full turns. Use:

- Peg #32 for 1" tubing
- Peg #25 for 3/4" tubing
- Peg #16 for 1/2" tubing

3

MARK from the end of tubing for insertion depth:

- 1/2" tubing = 3/4"
- 3/4" tubing = 1 1/8"
- 1" tubing = 1 1/8"

4

PUSH the fitting onto the tubing and fully against the shoulder of the fitting (soapy water will help this process)

5

CRIMP the fitting with the RapidAir hand tool with correct jaw size

Installation 2"

- CUT** the tubing square with the wheeltype cutter, apply extra pressure so wheel does not walk out of cut groove.
- APPLY** soapy water to the ALUMINUM plunger. Use a soft hammer to pound the plunger into the tubing and back out again (this makes the tubing round after cutting).
- BEVEL** the inside of the tubing with the reaming tool. Rotating repeatedly until a large chamfer forms.

- APPLY** soapy water to the fitting and tubing end. Put crimp sleeve on the tubing, and push fitting stem into the tubing fully.
- CRIMP** fitting with tool to 6500 psi.
- COMPLETED**

Nitrile O-ring seal

Digital Automatic Tire Inflator

K3060 & K3063

Crafted from durable aluminum with a digital display, this inflator is built to last and withstand heavy-duty use. Its digital features make it easy to set and monitor the desired tire pressure, providing convenience and precision for any automotive maintenance needs.

Features:

- Ceramic sensor allows for precise accuracy, which inflates accurately with a hose up to 50m long. Oil and water resistance, high accuracy, long service life.
- High-definition digital display, large easy to read LCD with backlight
- Standard inflate/deflate (example: Connect the tire to start inflating and deflating automatically and stop automatically when the pressure is reached)
- Comprehensive diagnostic and error reporting with audible warning
- Unit selection: psi, BAR, kPa, kg/cm³ for units can be selected convenient for customers in different countries to use
- Over Pressure Setting Function for tire shops, where new tires are fitted, and you need to ensure that the tire inflates to a pressure where the tire seats correctly on the rim and then deflates automatically to the required pre-set pressure
- Robust aluminum diecast housed digital auto inflator is simple to use

K3060

One preset inflates and deflates pressure setting

K3063

Three presets inflates and deflates pressure setting

ComPRESSED[™]

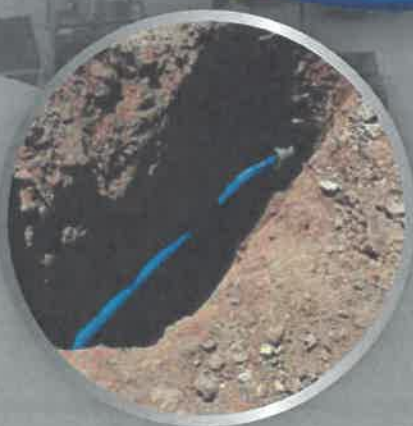

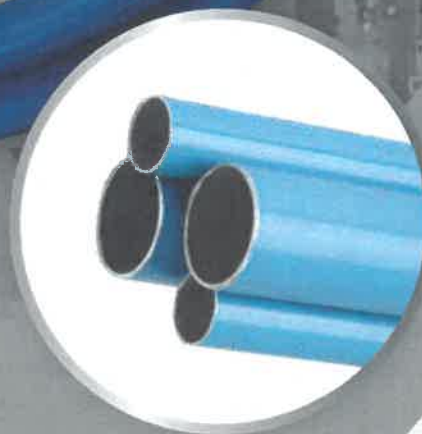

METAL FITTINGS SYSTEM

INDUSTRIAL

Press Type - All Metal Fitting
Compressed Air Piping System
Rigid Pipe and Flexible Tubing

SIZES: 1/2" to 6"

Energy Efficient

- Smooth inner wall and free flowing fittings lower compressed air costs
- Sealed connections means your compressor run time is less

RAPID Installation

- Press fittings are fast to install
- O-ring system gives leak free system performance
- Material/construction for lifetime reliability
- Designed for ease and consistent installation
- May be applied to aluminum and stainless piping and semiflexible tubing

Superior Air Quality

- No corrosion system means longer tool life
- Cools hot compressed air quickly
- Free flow fittings allow maximum air flow capacity

Versatile Applications

- Suitable for all applications and environments
- Connect to any existing piping system
- Compressed air and inert gases

LIFETIME WARRANTY

Rigid Pipe System

Fittings Specs 3/4" - 4"

- Press Style
- 304 Stainless Steel
- O-Ring: Nitrile

Fittings Specs 4" - 6"

- Lug Style
- Diecast Aluminum Alloy
- Seal: Nitrile
- Powder Coat

Rigid Pipe System Ratings

- 232 PSI Working Pressure
- -4°F to 176°F
- Compressed Air
- Inert Gas
- Vacuum 29 Hg
- Oils, lubricants
- Non-Potable Water
- UL94 HB Fire Resistant
- OSHA Compliant
- ASME B31.1, B31.9
- ASTM B241

Alum Pipe 3/4" - 6"

- Alloy grade 6063, 5052 T5
- Blue powder coat, RAL5012 outside
- Green powder coat, RAL6018 outside
- Non-chromate conversion coating inside

SS Pipe 3/4" - 2"

- 304 Grade
- Surface Finish OD 0.6µ
- Surface Finish ID 0.4µ

Flex Tubing System

Fittings Specs 1/2" - 2"

- Press style
- Nickel Plated Brass Body
- Crimp Ring: Stainless Steel
- Double O-Ring: Nitrile

Flex Tubing System Ratings

- 232 PSI Working Pressure
- -40°F to 140°F
- Compressed Air
- Inert Gas
- Vacuum 29 Hg
- Non-Potable Water
- OSHA Compliant
- ASTM F1282
- ASTM F3347

Tubing 1/2" - 2"

- Multi-layer semi flexible tubing
- Inner and outer layer - HDPE
- Center layer - aluminum
- Sizes measured on inside diameter

Bend Radius

- 1/2" Tubing: 4-6 Inches
- 3/4" Tubing: 8-10 Inches
- 1" Tubing: 10-12 Inches
- 2" Tubing: 36-48 Inches

Will hold any bent shape.

Warnings

- Compressed air is DANGEROUS if not used properly
- Always use EYE PROTECTION when using compressed air
- DO NOT POINT compressed air at your body or any person
- Pressurize system SLOWLY
- TURN OFF air compressor when not in use
- CHECK local building codes before installation

WARNING: This product can expose you to chemicals including lead, which is known to the State of California to cause cancer. For more information, go to www.P65Warnings.ca.gov.

Wash hands after handling.

CONTAINS LEAD: MAY BE HARMFUL IF EATEN OR CHEWED. MAY GENERATE DUST CONTAINING LEAD. KEEP OUT OF THE REACH OF CHILDREN.

Rigid Pipe is NOT:

- For underground burial
- To electrically ground equipment
- To be welded
- To take violent impacts
- To be used where the compressed air temperature is above 176°F
- For environments of caustic or corrosive chemicals

Flex Tubing is NOT:

- To be glued
- To take violent impacts
- To be used where the compressed air temperature is above 140°F
- For environments of caustic or corrosive chemicals
- When using in direct sunlight, cover or paint the plastic tubing to protect from UV exposure (Fittings need no covering and can be exposed)

Installation Tips & Recommendations

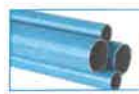

Care must be taken on any installation of the FastPipe system. Pipes will be carrying compressed air/gas up to 232 psi. The FastPipe system is only as safe as a thorough installation. Read all installation instructions and watch videos before starting. Below are some tips for a safe installation.

We strongly recommend that the installer contact our tech department for installation questions PRIOR to the installation.

- Assemble all NPT PIPE THREADS with two wraps of Thread tape and then pipe sealant which prevents thread galling.
- Support the pipe with clips/hangers a maximum of 10 FT. SPACING and on ONE SIDE OF EACH FITTING.
- FastPipe can be bent to a maximum of 15° DO NOT OVER BEND.
- Any machine/compressor plumbed to the FastPipe must have a JUMPER HOSE to reduce vibration.
- Any piping system will expand and contract with temperature changes. Use EXPANSION JOINTS to compensate for this movement of aluminum pipe in non-conditioned buildings.
- DO NOT USE FastPipe for PULSING desiccant dryers or other like equipment.
- CAUTION Installing inert gas bulk tank systems, gas must be warmed up to FastPipe temperature range.
- Use a strain relief attached to the building for any rubber hose drops attached to the piping.
- DO NOT connect quick couplings for air hoses to reducing elbows or tee fittings. The constant connecting/disconnecting and pulling or air hoses could loosen the fitting. Use the FastPipe WALL OUTLET which can be secured to a wall or post. Any hoses attached in the ceiling area to a fitting must use a strain relief attached to the building structure.
- CHECK that all fittings are tightened before pressurizing the system for the first time.
- For initial installation, pressurize system SLOWLY to 50 psi and check for leaks, then pressurize slowly to MAX 232 psi.
- CUT the tubing STRAIGHT with the supplied cutter; do not use a hacksaw.
- CHAMFER the end of the tubing with the supplied tool. When pushing the tubing into the fitting, the o-ring must insert smoothly. If the end of the tube is sharp, it will cut the o-ring and CAUSE LEAKS. Use a spray bottle with a couple of drops of dish soap and fill it with water for lubrication.
- TUBING must be INSERTED into the fitting fully to the shoulder inside.

PRODUCTS MANUFACTURED BY THE SELLER CARRY A WARRANTY. SEE WWW.RAPIDAIRPRODUCTS.COM FOR MORE DETAILS.

Wall or Ceiling Installation

- Use pipe clips to secure pipe to any flat surface with mounting screw
- Ceiling or wall mount
- Clip has 3/4" thru hole and hex bore for a 3/4" hex nut

- Hex nut serves as a backer for screws
- Use #10 Drywall Screw or Tapcon
- In horizontal installations, mount clip pivot tab up

Saddle Drop Installation

- System must be de-pressurized before installing
- To prevent chips from entering the pipe interior, stop drilling occasionally and blow out chips, grease the end of the drilling tool

- Position saddle drop opposite the side of the pipe that needs the hole. Tighten securely and mark the pipe by the raised locating mark on the fitting. Mark the pipe both horizontally & vertically along the fitting edge.
- Drill thru one side of the pipe with the drill bit, using the hole in the fitting as a locator.
- Insert the saddle drop gasket into the molded cavity.
- Position the saddle drop over the drilled hole with aligning marks, tighten securely.
- Attach the necessary drop pipe or threaded adapter.

RapidAir System Designer**

Design your air system in minutes!

Request to Add RapidAir - Mohawk Contract #121223

Mohawk Lifts LLC requests to add RapidAir as an authorized supplier under our current Sourcewell Contract #121223. RapidAir's compressed air piping systems and related components will enhance and expand our current product offering to Participating Entities, providing additional solutions that align with the Equipment, Products, and Services described in our original proposal.

The discount structure for RapidAir products will follow the same model as our other authorized suppliers under Sourcewell Contract #121223. All RapidAir products will be offered at a consistent percentage off list price (10.70%), in alignment with the previously established practice used for vendors such as Hunter and others in our supplier network. This ensures uniformity in pricing, transparency for Participating Entities, and compliance with the contract's requirement that all equipment, products, and services be provided at or below the contracted discount from list.

RapidAir's purchasing process will mirror the approach used with Mohawk's other suppliers under this contract: Participating Entities will continue to issue orders directly to Mohawk, with all orders referencing our Sourcewell Contract #121223. Pricing, order flow, and fulfillment will remain consistent with the established procedures already in place with our current supply partners, ensuring a seamless experience for Participating Entities

RapidAir's products are primarily used for compressed air delivery systems in commercial, municipal, and fleet maintenance garages. Typical applications include:

- **Compressed air piping** – Modular aluminum or HDPE piping systems that route compressed air from a central compressor to multiple workstations throughout the garage.
- **Air drops & outlets** – Convenient, safe, and organized placement of air outlets for pneumatic tools, tire inflation, and cleaning operations.
- **Flexible layouts** – Quick-connect fittings and modular components allow for easy expansion or relocation of air lines as shop layouts change, or additional bays are added.
- **Reduced leaks & pressure loss** – Engineered to minimize air loss compared to black iron or PVC, helping tools run at peak performance.
- **Clean, professional installation** – Wall- or ceiling-mounted systems reduce tripping hazards, improve shop organization, and maintain a professional work environment.

RapidAir products provide garages with an organized, efficient, and professional grade compressed air delivery network to support a wide range of operations, from pneumatic tools to spray equipment.

This addition aligns with our established practice of utilizing our current suppliers to meet Participating Entity needs. All RapidAir products will be offered through Mohawk's distribution channel in full compliance with the contract's terms, conditions, and pricing requirements.

Thank you

A handwritten signature in black ink that reads "Christine O'Reilly". The script is fluid and cursive, with the first letters of each word being capitalized and prominent.

Christine Oreilly
CFO
Mohawk Lifts LLC

June 25, 2025

To Whom It May Concern:

Engineered Specialties, LLC, doing business as Rapid Air, is pleased to submit this Letter of Supply in support of our intent to participate as a supplier under the Mohawk Lifts Sourcewell contract for vehicle lifts and related garage equipment.

Rapid Air, together with our nationwide network of sales and service professionals, is committed to supplying Sourcewell participating agencies with products and support services as authorized under the Mohawk Sourcewell award.

Rapid Air is enthusiastic about the opportunity to work alongside an experienced contract holder. We look forward to receiving guidance and support from the Mohawk team to ensure successful sales execution and compliance under the Sourcewell contract.

We appreciate the opportunity to be part of this multi-year agreement and contribute to its success

Sincerely,

A handwritten signature in black ink that reads "Jenifer Hoppe". The signature is written in a cursive, flowing style.

Jenifer Hoppe, CFO

**CONTRACT AMENDMENT
PRICE AND PRODUCT CHANGE REQUEST
FORM**

Supplier Name: Mohawk Lifts, LLC

Sourcewell Contract Number: 121223-MRL

Request Type: Adding Products/Services;Deleting Products/Services;Price Increase;Price Decrease

Changed Product List

Hunter price list update – including deletions (37 items), additions (29 items), price changes (6.52%-68.36%)

Rapid Air price list update - price changes (-74.11%-355.54%)

Justification for Changes

RapidAir:

Implemented a price adjustment averaging 18.61% across their product line. This increase is driven by tariff changes, rising material costs, labor expenses, and logistics. These adjustments directly impact our costs and have been incorporated into our revised price list.

Hunter Engineering:

During an internal review, we identified a formula error in the pricing for the TCX Series offered through Hunter Engineering in the previous price adjustment (July 2025).

- The TCX Series should have reflected a 10% price increase, but due to the formula error, it only reflected a 3.27% increase — resulting in a difference of 6.25%

Product additions only

Products were added to expand the product line, replace obsolete equipment and offer additional capacity and/or performance options

Price changes or product/service additions only

Pricing is consistent with previously established Sourcewell Contract Pricing

Approvals

Supplier Offer:

This Price and Product Change Request has been submitted for review to be considered as an amendment to the above referenced Contract.
