SPECIFICATIONS

The following sections of the West Virginia Department of Transportation, Division of Highways Standard Specification Roads and Bridges, adopted 2000, as modified by the current Supplemental Specifications shall apply to the administration of this Contract: 101, 102.4, 102.5, 105.1, 105.3, 105.4, 105.10, 105.11, 105.12, 105.13, 106.3, 106.4, 106.5, 106.6, 106.7, 106.9, 107.1, 107.2, 107.3, 107.14, 107.19, 107.20, 108.8, 109.1, 109.2, and 109.20

The terms "Contractor" and "Vendor" used in the above specifications or this contract are interchangeable. Contractor shall mean Vendor and Vendor shall mean Contractor.

West Virginia Department of Transportation, Division of Highways Standard Specifications Roads and Bridges, adopted 2000 and the current Supplemental Specifications may be obtained from:

Office of the Director of Contract Administration Division
Room A-729
West Virginia Division of Highways
State Capitol Complex, Building 5
Charleston, West Virginia 25305

Herbicide furnished under this contract shall conform to the physical and chemical properties set out in the EPA Registration of the product provided by the Vendor.

2. BIDDING INSTRUCTIONS

Vendors may quote on any or all of the chemical products listed herein.

It is the intent to award a Statewide Contract for each chemical product listed herein. The contract will be awarded to the lowest compliant bidder for each item. The award for each item will be based on the bid price per gallon, pound or ounce and not the lot or container amount.

The vendor shall list the trade name and EPA Registration Number, where applicable, on the Bidding Schedule for each chemical product bid. Failure to list this information may result in the disqualification of the vendor's bid on that product.

Vendors shall not qualify bids. Any qualification of bids or any modification of the specifications or conditions governing the bids may be cause to reject bids.

The successful vendor shall furnish two product labels, for each product awarded, to the West Virginia Division of Highways. The labels shall provide pertinent information regarding product storage and handling or this information shall otherwise be provided with each shipment.

Equivalency where requested as, chemical name or equivalent, shall mean equal and not necessarily identical. Prior to award of low bid the Division of Highways may require samples for evaluation to determine equivalency when applicable. Product specifications and technical information should be submitted with bid and may also be used to determine equivalency. The final determination of equivalency will be made by the Division of Highways and award will be based upon the item providing the intended service or result and unit price.

3. CONTRACT AWARD

Qualified vendors who submit a valid low bid will be awarded a contract for those items for which their bid is low.

The State of West Virginia reserves the right to make multiple awards on this contract when it is in the best interest of the State to do so.

4. ACCEPTANCE PLAN

With each delivery of herbicide products to the Division, the vendor shall certify that the products so delivered do conform to the properties described in the EPA Registration.

Material failing to comply with the quality requirement will not be accepted.

5. TESTING PROCEDURES

Constituents ineffective as spray adjuvants	83.0%
TOTAL	100.0%

All ingredients are exempt from tolerance requirements under 40 CFR 180.1001 (d).

CAUTION: KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Avoid breathing vapors or spray mist. Avoid contact with skin. Wear long-sleeved shirt, long pants, socks, shoes, and chemical resistant gloves. Avoid contact with eyes.

GENERAL INFORMATION

ALENZA Defoamer is a proprietary silicone defoamer/antifoam emulsion designed for quick reduction and continued control of foam formation in aqueous solutions. The functional properties include quick dispersibility, slight insolubility, good stability, and spreadability in ionic solutions.

ALENZA Defoamer performs very well in agricultural pesticide tank mixes, especially ***ROUNDUP*** offering antifoaming qualities when used in a premix or defoaming characteristics on already existing foam. All emulsifiers used in this formulation are nonionic, offering superior compatibility.

**Reg. Trademark of Monsanto.*

USE RECOMMENDATIONS

Use **ALENZA Defoamer** at 1/2 to 2 ounces per 100 gallons of solution. It may be necessary to adjust the amount used according to individual conditions.

NOTE: It is always best to add defoamer to tank mixture before foam has already formed.

FIRST AID

Call a poison control center or doctor immediately for treatment advice.

If Swallowed: Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

ALENZA

Drift Retardant

PRINCIPLE FUNCTIONING AGENTS:

Proprietary Polyvinyl Polymer Emulsion 100%

All ingredients are exempt from tolerance requirements as specified in federal regulation 40 CFR 180 1001 (c).

WARNING: KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS: Hazards to humans and domestic animals. Causes skin and moderate eye irritation. Do not get in eyes, on skin or clothing. Harmful if absorbed through skin.

ALENZA Drift Retardant . . .

Is an effective, easy-to-use adjuvant for deposition improvement and drift retardation in spraying operations

Is designed for general use in standard ground and aerial applications

Is fully compatible with a wide variety of spray configurations including those with AI and other specialized drift reduction nozzles.

Is compatible in tank mix application with a broad spectrum of crop protection pesticides

FIRST AID

Call a poison control center or doctor immediately for treatment advice.

If Swallowed: Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If on Skin or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.

If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye. Have the product container with you when calling a poison control center or doctor, or going for treatment.

DIRECTIONS FOR USE

Dosages may be adjusted to compensate for environmental conditions or mechanical factors. Lower dosages may be used when spraying under calm winds, slow application speeds, low pressures, and lower boom heights with nozzles closer to the target. The greater the shear on the spray boom nozzle head, the greater the spray droplet fragmentation that produces fines (mists), which may drift to non-targeted areas or evaporate. For best results in aerial application, use state-of-the-art techniques such as pressure less than 45 psi and nozzles oriented 45 degrees back to straight back.

MIXING

ALENZA Drift Retardant is very concentrated and performs effectively at ultra low use rates, even as low as 1-4 oz. per 100 gal. of water. Start with low dosage rates and increase as needed. A thickened or "stringy" solution indicates that too much **ALENZA Drift Retardant** has been used.

Step 1. Select proper dosage for the spraying operation. **Step 2.** Fill mix tank with water, pesticide, fertilizer, surfactant /additives and agitate. **Step 3.** Shake bottle well before using. **Step 4.** For best mixing results, either (1) inject **ALENZA Drift Retardant** liquid into the suction side of the feeder or recirculating pump to obtain adequate dispersion of the polymer throughout the pesticide solution, or (2) slowly add **ALENZA Drift Retardant** liquid to the agitating tank mix at the area of highest turbulence. **Step 5.** Continue to agitate mix tank for at least 3 minutes before spraying. **Step 6.** Follow all cleanup precautions on label of pesticide used. Follow governmental procedures for disposal of pesticide spray solution.
