STATE OF WV

CELL PHONE

PART 1

GENERAL INFORMATION:

The purpose of this RFQ is to seek bids from interested 2005 Gartner Wireless Magic Quadrant rated vendor(s) to provide a statewide cellular telephone contract. The State will also accept bids from vendor(s) currently providing cellular service to the State. State agencies currently utilize cellular services from several different vendor(s). They include, but are not limited to: Cingular, Alltel, US Cellular, Sprint, Nextel, Cellular One and Ntelos.

Our primary goal is to leverage the State of West Virginia's buying power to ultimately reduce our overall costs, while meeting our requirements and maintaining an acceptable level of quality.

This contract **may** consist of awards to **multiple vendor(s)** required to cover all features as described in the RFQ and all geographic areas of West Virginia in which the State needs service. As a result of this RFQ, the vendor meeting the mandatory requirements with the lowest cost will be considered the Prime Vendor. The other vendors meeting the mandatory requirements will be ranked by their cost, lowest to highest. Agencies needing cellular services will obtain service from the Prime Vendor as long as the Prime Vendor can provide the service requirements and features that meet the needs of the agency. Agencies that need cellular services in geographic locations (or have service requirements) that cannot be served by the **Prime Vendor** shall obtain service from the vendor with the next lowest cost and so on. All purchases will be directed to the Prime Vendor unless, in limited instances, that vendor cannot provide required features or coverage

The State reserves the right to award to one vendor or to split award to multiple vendors based on what is in the best interest of the State.

The State reserves the right to utilize inter-state agreements, such as the Western States Contracting Alliance (WSCA), or GSA pricing schedule, to purchase

equipment and service, outside of the terms and conditions of any contract resulting from an award of this RFQ. The Vendor(s) may make the products and services requested in this RFQ available to county and local municipalities, as well as any other official boards and commissions deemed eligible as legitimate, governmental entities. If the Vendor(s) exercises this option, the State will not be liable for billing, management or any other services related to these separate, independent agreements.

The vendor(s) is solely responsible for all work performed under the contract and shall assume prime contractor responsibility for all services offered and products to be delivered under the terms of this contract. The State will consider the vendor(s) to be the sole point of contact with regard to all contractual matters. The vendor(s) may enter into written subcontracts for performance of work under the contract; however, the vendor(s) is totally responsible for payment of all subcontractors.

The State of WV presently utilizes approximately 2700 cellular telephones, with air-time usage of approximately 7.5 million minutes annually, and approximately 200 data devices (Blackberries, Treos and similar data devices).

Geographic West Virginia, and bordering counties located in adjoining states, will be considered the "home area", or local call footprint, for all services related to this RFQ. "Roaming charges/long distance" will apply only when the user is outside of the "home area/local call footprint" and when not included in the package plan chosen. Roaming is defined as the area beyond the bordering counties in adjoining states within the continental United States.

Due to continuing evolution of the cellular technology and constant changes in each vendor's capabilities, the winning vendor(s) will have the opportunity to present the Chief Technology Officer information about new products, new services and new coverage areas offered for the State's consideration as well as proposed pricing. The Office of Technology will do an analysis of each proposal to insure the products and services offered continue to meet the State's needs in a cost-effective manner. The Office of Technology will also compare these offerings with offerings available in the marketplace to insure that the proposal is competitive, reasonable and proven. Only vendor(s) awarded contracts from the original RFQ may participate in this upgrade of the State's cellular services. If the proposed change is accepted by the Office of Technology, they must be processed through and approved as a change order by the Purchasing Division.

If the vendor offers different network technologies, i.e.: GSM, iDen, CDMA, etc., the vendor is required to submit a separate response for each network technology.
