RE: Design of Repair/Refurbishment of Buildings #5,6,7
RFQ Number GSD076414

Dear Ms Ferrell,

Einhorn Yaffee Prescott Architecture & Engineering, P.C. (EYP) is pleased to submit our team's credentials in consideration for the project to renovate Buildings #5-6-7 at the West Virginia Capitol complex

For more than 35 years EYP has been working with existing buildings in the United States and around the world. We have developed a national reputation for our award winning design work and creative renovations for government clients at the local, state and federal levels. As a fully integrated architecture and engineering firm we find these projects to be particularly challenging and exciting.

For this project we have assembled a team with special skills that respond directly to the design opportunities of Buildings 5-6-7

- **David Fixler:** An internationally known preservation architect, David's particular passion is buildings of the mid-20th century "Modern Movement" Whether the building is a landmark such as the United Nations Headquarters, or "standard" office buildings such as Buildings 5-6-7, David's design skills will find the opportunities to breathe new life into the buildings and highlight the materials and spaces that are of greatest value.
- **EYP/energy:** Our in-house energy services group provides comprehensive consulting services to help protect you from the uncertainties of today's energy market. We can help you conserve energy, reduce costs, and advance your sustainability objectives.
- **Alpha Associates:** We have teamed with Alpha Associates as our local partner. With almost 40 years of successful work in the state of West Virginia, Alpha provides the team with expertise in architecture, engineering and construction administration.
- **Weidlinger Associates:** In addition to their reputation as highly skilled structural engineers, Weidlinger Associates (WAI) is also one of the leading authorities on the design of security upgrades to buildings. While no specific requirements have been stated regarding security upgrades having WAI on the team provides us access to the preeminent security design firm in the country if necessary.

We have assembled a highly skilled and motivated team that is excited about working with the State of West Virginia on this project. Our collective experience makes us particularly well suited to take on this challenge. If you have any questions please contact me at 202-471-5000 or via email at mchalifoux@eypae.com. We look forward to having the opportunity to present our qualifications and ideas in person.

Sincerely,

EINHORN YAFFEE PRESCOTT
