Answers to Technical Questions

- 1.) On page 7, item number 5 of your RFQ states Scrubber-sweeper must be able to produce a cleaning path of 40-60 inches wet or dry with a forward speed of at least 6 miles per hour. The Tennant M 20 has two available wet cleaning paths of 40 and 54 (See attached Tennant Technical Spec)? The product we intend to bid as an alternate has three available wet cleaning paths of 43, 48 and 54. To properly comply with the RFQ as stated, I will be forced to quote all three of our models. I assume Tennant will do the same with their two versions. Can you talk with your end users and narrow down the wet cleaning path they need ?

Answer: The original intent of this statement was to provide a cleaning path of at least 40 inches and not to exceed 60 inches wet or dry. We are comfortable and would accept any dimension between 40 and 60 inches for this portion of the specification.
