**Re: RFQ DEFK8116**

Dear Selection Committee:

Chapman Technical Group is most interested in providing the required A/E services for the Multi-purpose Building for the West Virginia Army National Guard in Jackson County. We are a multi-discipline firm with experience in a wide variety of building types, including multi-use pre-engineered buildings.

Our experience ranges from a 50,000 square-foot multi-tenant building in Philippi to several smaller equipment and storage buildings for airports throughout West Virginia. One of the more interesting projects completed recently was the steel frame and masonry fish hatchery building for the West Virginia Division of Natural Resources. This building included a large open production area, an office area, as well as bunk rooms and a kitchen to support the seasonal staff.

We have worked with both the Air and Army National Guards in the past and understand that a high level of execution and communication is required and are anxious to prove that we are up to the challenge. We would very much appreciate a personal interview to present our project team and further discuss your project. Meanwhile, if you have any questions or need additional information, please contact me.

Sincerely,

**CHAPMAN TECHNICAL GROUP**

Joseph E. Bird, ASLA  
Vice President
