RE: Req#: DEFK 8180, Expression of Interest
A/E Services for Joint Interagency Training and Education Center (JITEC)
West Virginia Army National Guard, Camp Dawson, Kingwood, WV

Dear Mr. Abbott:

Introduction. Jacobs Engineering Group Inc. has been successfully providing planning, design and construction support services to the Army National Guard (ARNG) for over two decades. We have current working knowledge of the ARNG criteria (and USAR and other DoD) for training facilities, and we have been successful in helping states, like WV, get funding for other-than-standard facilities, e.g. exceptions to criteria. We have also worked with NGB in helping them update their criteria. Using our proven processes and experience in facilitating complex projects, like the JITEC, we are able to help you execute your project expediently. In addition, we may help facilitate your JITEC through the NGB process, thereby saving you time and money.

Jacobs Experience. We have provided planning services on 115 projects; full design services on 34 projects and PM/CM on 16 projects for the ARNG in the past 3-1/2 years. Thirteen of these projects were training facilities, similar to the JITEC, including joint requirements for the ARNG, ANG, USAR, USNR, USMCR and many state agencies. This means that we have the project-type experience to manage your project through the design and review process. As you can see in the following pages, we are proposing a design team who has successfully designed facilities of this type in the recent past. An experienced team saves you time and money.

Our recent West Virginia experience includes: Project Planning Document Charrette (PPDC) for the Armed Forces Reserve Center, Elkins, a joint-use facility; CM support for the WV ANG C5 Beddown, Martinsburg; CM support for the IRS Martinsburg Computing Center; and construction management for the Federal Courthouse and IRS Complex, Beckley, WV. We currently have 18 architects and engineers licensed to practice in West Virginia and hundreds of others willing to apply for reciprocal registration, should that be needed.

Subconsultants. Most the work will be provided by Jacobs in-house resources. We have added Triad Engineering Inc. to our team for civil engineering; geotechnical engineering; and site survey. Triad was selected to support our in-house team with working knowledge of the local building environment and local building codes and regulations at Camp Dawson.

We have expanded on each of the above items in the next few pages, and we have attached a copy of our ARNG Standard Form 330 to provide an overview of the broad range of ARNG experience. It includes resumes (some in Section E, the rest in the Resume Appendix) of our proposed team and a detailed look at the dozens of projects on every building type in the ARNG inventory. Section H highlights our professional qualifications, specialized experience, capacity, etc. These are selection criteria frequently used to select A/Es for design work, similar to the JITEC project.

If you have questions, please call (703.627.3917) or email: frank.mastel@jacobs.com.

Sincerely,
Jacobs Engineering Group Inc.

Franklin P. Mastel, AIA
Project Executive
