**Addendum #1 - Questions During Pre-Bid Meeting
For DEP 14139
Borgman Refuse & Portals Project**

The following questions were identified from the Pre-Bid Conference. The answers provided herein take precedence over verbal answers at the PBC should there be any conflicts between the two.

- 1.) **Q.** Do you know what the pH of the mine drainage discharge from the mine openings proposed for wet mine seal installation is?
A. Water sampling conducted in 2003 indicated that the field pH of the drainage from portals on Sites 2 and 3 ranged from a low of 2.45 to a high of 2.72.
- 2.) **Q.** Where is the soil material for covering the exposed refuse intended to be obtained.
A. There are potential soil borrow sites within the Construction Work Limits identified on the Plans. In addition, material for soil cover may be obtained from excavation involved with the construction of diversion ditches and/or underdrains.
- 3.) **Q.** Is the quantity of CYs of "Unclassified Excavation" broken down per site in the calculations?
A. Yes, and that information can be retrieved and provided to the bidder who is awarded the contract upon request. The cut and fill quantities balance for each individual site.
- 4.) **Q.** Do any of the borings shown on the Plans need to be reclaimed?
A. There are four piezometers associated with the wet mine seal installation that have been left for the Contractor's use during dewatering operations that will require abandonment. The specific borings that have piezometers are identified in the bore logs.
- 5.) **Q.** Is there language in the Specifications addressing reclaiming of the bore holes?
A. The monitoring wells shall be removed by a person who has been certified by the State of WV in accordance with 47CSR59 "Monitoring Well Regulations". Payment for this work shall be considered incidental to the unit price bid for "Wet Mine Seals" for the particular mine opening that has a piezometer associated with it. Furthermore, payment for reclaiming the abandoned well identified on Site 1 and the sink hole on Site 1 shall also be considered incidental to payment for Wet Mine Seal installation.
- 6.) **Q.** Do you want all of the bore holes identified in the bore logs closed?
A. Only the boreholes identified as monitoring wells require a specific closure technique. Any of the other bore holes still remaining open may be excavated or otherwise removed or plugged.
- 7.) **Q.** Do you want the areas identified for clearing and grubbing clear cut or do you want the Contractor to clear around; i.e., save, certain trees?
A. The areas to be cleared are those within the limits shown on the Plans for disturbance. Clearing is required to be within these limits. The Contractor is not required to clear the entire site within these limits. There are no specific trees in the project area that have been designated to remain. However, the Contractor should only clear as much area on each site as is necessary to complete the work on that site.

- 8.) Q. How are the stumps from the clearing and grubbing operation to be handled?
A. The stumps are to be burned in accordance with the conditions set forth by the required burning permits or otherwise disposed of in a waste area in accordance with the Special Provisions of the Specifications.

Borman Refuse & Portals
Scope of Work Revisions
Addendum No. 1
09/20/2007

007

The following information identifies revisions to the scope of work for this project.

A farm gate meeting the specifications provided herein shall be installed near the entrance to Site #3, as directed by the Engineer, in order to limit access to the site after completion of the reclamation activities at the site.

The gate shall be a factory painted, 12' x 4' tubular steel gate with tube braces. The gate frame shall be constructed of 2", 16ga tubing.

The gate shall be equipped with an engineer approved chain, suitable locking device, and satisfactory provisions for padlocking. The chain shall be attached to the gate to prevent theft. Three two inch hinge clamps shall be attached to the gate.

Three 1' X 3/4" threaded gate hinge bolts shall be attached to one of the gate posts. The bolts shall extend completely through the gate post and shall be attached with nuts and washers on both sides. Hinges shall be pivot type with bearing surfaces capable of being clamped to the gate tubing. The bolts shall be arranged so that the gate cannot be lifted from its hinges. The gate shall be of the full 180° open swing type.

Posts for the gate shall be 8' X 6" X 6" treated wooden posts. The gate posts shall extend 24 to 36 inches into the existing ground.

This project shall be bid in accordance with the attached revised Bid Schedule.
