Attn: Charles J. Miller, Assistant Director

RE: Howesville Site – Sandy Run HW & Portals

Dear Mr. Miller:

E. L. Robinson Engineering Co. (ELR) is pleased to submit this proposal in response to your request to perform mapping and engineering design services on the above referenced project. These services will be associated with the design of the Howesville Site – Sandy Run HW & Portals located in Preston County.

Over the years we have provided high quality mapping under the surveying and mapping contracts. E. L. Robinson Engineering Co. has completed over 200 mapping projects for Government Agencies and other Consultants.

We have completed plans and specifications for numerous waterline and reclamation projects for WVDEP over the past ten years. In addition, we have completed numerous projects with ODNR over the past four years. We have descriptions of these projects in the attached proposal. **Please note that all staff that worked on these projects is still with E. L. Robinson Engineering.**

The Project Manager for this contract will be Eric J. Coberly, P.E. Mr. Coberly has considerable AML Design and Construction experience as well as AML Program experience gained during his 18 year employment with West Virginia's AML Program. Tim Cart, P.E. has served as Project Manager for ELR on the projects listed above and will continue to provide expertise on future projects in both management and engineering roles. E. L. Robinson has added a highly qualified designer and manager in Gary Facemyer, P.E. These individuals have combined experience in the design of over 150 AML Projects.

We are able to assemble multiple design teams with our current staff. The Cross Lanes office has eleven (11) registered professional engineers and four (4) engineers in training as well as several CADD technicians that may be used on these teams. We have recently hired **two additional CADD technicians** to enhance our capabilities.

E. L. Robinson Engineering Co. has grown from 13 employees in 1996 to over 70 employees today. Three areas of growth of our company which we believe will enable E. L. Robinson Engineering Co. to supply the West Virginia AML with enhanced services are expansion of our inspection capabilities, acquiring the latest GPS systems to enhance our surveying capabilities, and acquiring a small Mining Engineering/Surveying Company whose primary work involves preparation of permits and surveying for the mining industry. Through this growth period we have continued to meet project deadlines while providing a high quality engineering product.

Our office location in Cross Lanes, WV is centrally and conveniently located in respect to the referenced project.

ELR looks forward to serving your agency under this contract and if you have any questions or need clarification, please feel free to contact me at (304) 776-7473.

Very truly yours,  
E. L. Robinson Engineering Co.
