RE: DEP14265 – Fairmont East Mine Drainage and Rachel Refuse & Structures

Dear Mr. Bowman,

HMB Professional Engineers, Inc. (HMB) is pleased to submit our Expression of Interest for the Fairmont East Mine Drainage and Rachel Refuse & Structures project. As our submittal clearly demonstrates, HMB draws upon an extensive list of AML project experience, most of which has been done for the West Virginia Office of Abandoned Mine Lands. Many of our past designs involved sealing mine portals, regrading refuse piles, removing structures and designing drainage control channels. Not only is our list of past AML projects extensive, but also relevant, due to the similarities with the above-referenced project.

HMB has long been a multi-disciplined firm, with a staff of over twenty (20) civil, structural, water and wastewater engineers capable of designing quality solutions for a wide variety of projects. In recent years, State and Federal government agencies have placed more emphasis on environmental analysis and design, and HMB has responded. We have expanded our staff to include environmental engineers, environmental technicians, geologists, biologists and a chemist. This additional staff has expertise in stream restoration, wetlands delineation, wetlands creation and restoration, C.O.E. 404 permits, and all environmental analysis required to prepare NEPA documents.

HMB has the capacity in our South Charleston, WV office to provide the services for this project. In addition, the WV office has the full support of our main office in Frankfort, KY, which has surveyors, geologists, biologists, environmentalists and over on staff. We hope that you consider using HMB's professional engineering services for this project.

Sincerely,
HMB PROFESSIONAL ENGINEERS, INC.

Greg Boleyn, PE
West Virginia Office Manager
