Buyer: BC-23

April 29, 2008

Dear Mr. Bouman:

Burgess & Niple, Inc.
4424 Emerson Avenue
Parkersburg, WV 26104
304 485.8541
Fax 304 485.0238

Burgess & Niple, Inc. (B&N) is very interested in assisting the West Virginia Department of Environmental Quality (WVDEQ) with the proposed project at the Marion County Landfill. B&N is well qualified and experienced in site characterization studies, closure cap designs, leachate management systems, and quality assurance/quality control for landfill sites. The attached Statement of Qualifications and Consultant Confidential Qualification Questionnaire clearly demonstrate our experience related to the proposed project.

Understanding of the Work to be Performed

B&N has reviewed the technical information provided for the site provided by WVDEQ to develop a preliminary understanding of the project and a preliminary technical approach. We proposed to work closely with WVDEQ staff to develop a cost-effective design solution for short-term repair and long-term development and care of the site.

Staff

We have professional engineers, professional surveyors, and licensed remedial specialists registered in the state of West Virginia on staff. Our current staff is experienced in similar landfill repair projects with other municipal and private clients and is immediately available for the project. B&N has provided services in the field of solid waste management since the 1960s for municipalities, counties, regions, private individuals, and industries. We have completed 12 designs for new landfills, landfill expansions, environmental improvements, and landfill closures since 1989. We have a construction services group that has provided construction management and support since 1912. B&N has conducted environmental monitoring including groundwater, surface water, and explosive gas, for more than 30 years. We have also provided surface water and wetlands services since enactment of the Clean Water Act in 1972.

If you have any questions or comments, please do not hesitate to call.

Sincerely,

Mark R. Rowland
