*RE: Expression of Interest – Summit Park Water Line Replacement Project
Requisition # DEP14348*

To Whom It May Concern:

Thrasher Engineering, Inc. is pleased to have the opportunity to submit this expression of interest and qualifications to provide engineering design services for the Summit Park Water Line Replacement Project. Our qualifications as West Virginia's largest full service civil engineering firm will provide the Department of Environmental Protection's Office of Abandoned Mine Lands and Reclamation with quality service in a timely and cost efficient manner.

Following our review of the project, we have developed a thorough understanding of the project needs. With that understanding, we offer the following qualifications that the selection of Thrasher Engineering for this project will bring to the DEP and the Office of Abandoned Mine Lands:

Experience with Summit Park Public Service District: Thrasher Engineering, Inc. has provided general civil engineering services to the Summit Park PSD since our formation in 1983. In addition to our general services, we also provided preliminary and design engineering services and construction management for a waterline replacement project.

Successful Project Experience with AML: In 2005, we were selected by the DEP to provide engineering design and mapping services for the Amherstdale and Ragland Road AML water line projects in Mingo and Logan Counties. As you are aware, each of these projects was completed on time and is currently at the DEP awaiting final steps prior to construction bid. Additionally we have extensive experience with water line projects in areas that are partially affected by AML; we currently are providing engineering services for three partial AML projects; two for the Town of Masontown and one for the Town of Terra Alta in Preston County.

Project Team: The qualifications of professionals on the team we have assembled to provide design services for this project are unmatched for this type of work. We have 25 engineers on staff, 14 of who are Registered Professional Engineers. Additionally, Thrasher Engineering offers 15 fully staffed survey crews with experience in water line replacement and extension projects. With our experience with AML and drainage projects, our qualified personnel and our expertise, Thrasher Engineering is the right choice for this AML project.

Following the instructions outlined in the RFQ, this proposal contains information regarding Thrasher Engineering's history, qualifications and management and staffing capabilities along with the required DEP /AML Consultant's Confidential Qualifications Questionnaire, and an affidavit stating Thrasher Engineering has no debt owed to the State of West Virginia.

We thank you for your consideration of our qualifications and look forward to the opportunity to present our qualifications and project methodology to you in person.

Sincerely,

THRASHER ENGINEERING, INC.
