CIVIL & ENVIRONMENTAL ENGINEERING SERVICES

October 22, 2008

Mr. Chuck Bowman
WV Department of Environmental Protection
Office of AML&R
601 57th Street SE
Charleston, WV 25304

**RE: Expression of Interest
Mount Storm 25A
Requisition #DEP 14369**

Dear Mr. Bowman:

Alder Run Engineering, LLC (ARE) is pleased to submit this Expression of Interest to provide professional services for the Mount Storm 25A Project (Requisition #DEP14369) to the West Virginia Department of Environmental Protection. This package contains one proposal plus a convenience copy and one copy on CD.

ARE has been providing design services for mine reclamation and mine drainage projects since 2003. Our current projects include mine land reclamation, highwall reclamation, stream channel re-establishment, and mine drainage handling and treatment in both the bituminous and anthracite coal regions of the eastern United States.

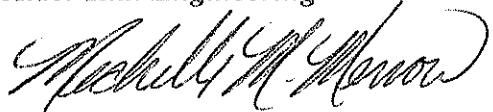

We have assembled a project team that includes Blazosky Associates, Inc. (BAI), Wetlands Habitat Management, Inc. (WHM), and Land and Mapping Services (LMS). This project team combines ARE's experience with mine land reclamation with the experience of the well-established companies of BAI, WHM, and LMS. All of these companies perform work throughout the eastern United States, and this project team is currently under contract with the Pennsylvania Department of Environmental Protection Bureau of Mining and Reclamation for design services under contract PA BMR DES-01.

Mr. Chuck Bowman
WV Department of Environmental Protection

October 22, 2008
Page 2 of 2

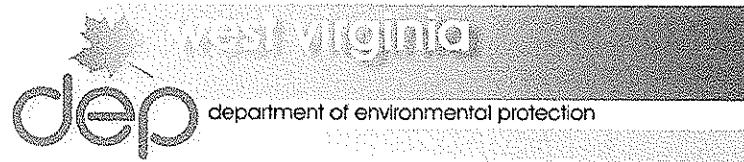

We thank you for this opportunity to provide this proposal to the West Virginia Department of Environmental Protection. Please feel free to contact me at (814)339-6998 if you have any questions or if you need additional information following your review of these documents.

Sincerely,
Alder Run Engineering

Michelle M. Merrow, P.E.
President

EXPRESSION OF INTEREST

PROFESSIONAL ENGINEERING DESIGN SERVICES AND CONSTRUCTION MONITORING SERVICES

MOUNT STORM 25A IN GRANT COUNTY, WEST VIRGINIA

Requisition #DEP14369

October 2008

Table of Contents

1. Background Information
2. Company Profiles
3. Consultant Confidential Qualification Questionnaire (CCQQ)--Attachment B
4. Related Project Experience Matrix (RPEM)—Attachment C
5. Purchasing Affidavit

BACKGROUND INFORMATION

Alder Run Engineering, LLC, (ARE) has submitted this Expression of Interest for the Mt Storm Mine 25A Project (Requisition #DEP14369) to provide architectural/engineering services and construction monitoring services for the project. ARE and all project team firms as licensed architectural/engineering (A/E) firms with a successful track record of design of similar projects.

The Mt Storm Mine 25A site consists of 1400 linear feet of highwall, a strip pit, and acid mine drainage (AMD). The highwall averages 25 feet in height and ranges from vertical to sloughed-in and vegetated. An occupied home is located approximately 300 feet to the south of the highwall. A small pit is located at the base of the southern end of the highwall, and the pit measures approximately 20 feet wide and 70 feet long. Due to mining activities that altered the topography, the natural drainage flows into the pit. As a result, the surface water percolates through the strip pit and spoil creating several AMD seeps along the toe of the spoil. Site visitation is evident throughout the project area with scattered debris, roads, and ATV trails present. Additionally, an occupied home, with children residents, is located within 300 feet of the problem area.

Based on the available mine maps, it appears that the Elk Lick Coal Seam was mined at this site. The coal dips to the northwest direction, and the coal was mined extensively by surface mining. The overburden of the coal seams in the region is known for its high acid-producing potential. Consequently, the unreclaimed and uncompacted strip mine spoil from past mining activities acts as a source of acidity creating AMD.

The mission or purpose of this project is to provide design services for the following:

- Upgrade 1500 feet of access road to the site;
- Dewater the impoundment and backfill the highwall area with compacted mine spoil;
- Construct underdrains and diversion ditches to carry the water safely off-site;
- Construct natural stream channel and grouted riprap channel with culverts; and
- Condition and revegetate all areas disturbed by construction.

Design aspects will include, but are not limited to, civil, structural, geological, and hydrological engineering.

ARE has been providing design services for mine reclamation and mine drainage projects since 2003. Our current projects include mine land reclamation, highwall reclamation, stream channel re-establishment, and mine drainage handling and treatment in both the bituminous and anthracite coal regions of the eastern United States.

We have assembled a project team that includes Blazosky Associates, Inc. (BAI), Wetlands Habitat Management, Inc. (WHM), and Land and Mapping Services (LMS). This project team combines ARE's experience with mine land reclamation with the experience of the well-established companies of BAI, WHM, and LMS. All of these companies perform work throughout the eastern United States, and this project team is currently under contract with the Pennsylvania Department of Environmental Protection Bureau of Mining and Reclamation for design services under contract PA BMR DES-01. ARE would serve as the prime contractor for this project.

COMPANY PROFILE

Alder Run Engineering was formed in 2003 to provide civil and environmental engineering services in the central Pennsylvania region. Since that time, we have expanded our service area to contain all of Pennsylvania, including both the anthracite and bituminous coal regions, as well as parts of West Virginia and Ohio.

We provide a full range of engineering design services starting with identification of problems and goals and progressing through project planning and design to project construction and post-construction monitoring. We specialize in water resource-related projects and design, such as watershed assessments and restoration plans, the design of mine drainage treatment systems, development of erosion and sediment control and post-construction stormwater management plans, and hydrologic and hydraulic analyses. We are able to assist clients with identifying funding sources and obtaining funding for watershed restoration projects.

Our staff includes licensed, professional engineers and geologists, watershed/acid mine drainage specialists, environmental technicians, foresters, and AutoCAD draftsmen. We are a small business dedicated to providing innovative, high-quality services and personal attention to each and every client.

Our clients include local and state government agencies such as the Pennsylvania Department of Environmental Protection and the Pennsylvania Game Commission, for which we provide mine drainage treatment design services and mine reclamation design. We provide services for conservation organizations such as watershed groups and the Rocky Mountain Elk Foundation. We also assist private industry and other engineering firms with design and plan review services.

Alder Run Engineering is certified as a Pennsylvania Woman Business Enterprise (WBE), a Federal HUBZone business, a Small Business Concern registered with the Small Business Administration (SBA), and a Self-Certifying Small Disadvantaged Business. Alder Run Engineering, and our principal engineer, are licensed to provide engineering services in West Virginia.

COMPANY PROFILE**BLAZOSKY ASSOCIATES, INC.**

Blazosky Associates, Inc. (BAI) is a mid-sized environmental consulting firm that was founded by John J. Blazosky, P.E., in 1986. The firm was originally developed to fulfill the technical consulting needs of the private and public sectors of the waste management industry. Over time, BAI has expanded its expertise into many other areas to become a full service environmental consultant. This diversification of services was also followed with expansion in the geographic area and clientele it serves. After successfully operating the firm for almost 22 years, John Blazosky selected Michael Rudy, P.E., a long time employee of BAI, to become his successor.

A key element of BAI's success is attributed to the people that comprise the firm. BAI maintains a mosaic of individuals that possess expertise in many types of environmental and civil engineering, geology, soil science, and other technical disciplines. These individuals possess unique skills and experiences that are regularly used as resources by their colleagues. We have found that this diversity is important in allowing our staff to think creatively when addressing our client's issues. As a team, this group of individuals has proven to be very flexible in adapting to specific project requests from our clients and delivering well thought out solutions.

The remaining component of our success is largely attributed to establishing long-term professional relationships with our clients and other project stakeholders. For our clients this has been achieved through listening to what their needs are and providing high quality consulting services to meet expectations at a reasonable cost. For the remaining stakeholders, it is primarily focused on establishing and maintaining credibility by developing solutions that balance their needs as well.

While it is inevitable that BAI will continue to modify our practice to keep current with new technologies and market opportunities, we will continue to embrace the aforementioned lessons learned. With a long and successful track record, we are confident that these fundamentals will guide the firm in a direction that will be mutually beneficially for our clients; namely, sharing our client's vision and helping them achieve their goals.

Michael L. Rudy, P.E.
President

Corporate History

Wetlands Habitat Management, Inc. (WHM) is a multi-discipline corporation committed to providing environmental resource solutions. With specific expertise in water resources, our organization specializes in:

- Wetland and stream mitigation, design, and construction
- Wetland delineations
- Natural channel design (NCD)
- Passive wetland treatment systems
- Mine drainage solutions
- Flood control
- Dam removal
- Environmental monitoring
- Local, state and federal permitting
- Watershed assessments
- Geomorphic stream classification assessments
- Reestablishment of Riparian zones along stream channels
- Stream stabilization
- Aquatic habitat assessments
- Biological and ecological assessments
- Threatened and endangered species surveys and studies

WHM is owned by its original founders, who are professionals with backgrounds in government and governmental relations, environmental permitting, environmental engineering, the natural sciences, construction, business development (in the United States and abroad), and economic development.

WHM originated by providing third-party professional support to clients dealing with complex wetland, stream and other highly regulated environmental issues. **WHM** served as a vehicle to design, permit, construct, monitor, and own sophisticated, dynamic wetland sites developed as mitigation, recreation, or developer enhancements.

With our main office in State College, Pennsylvania, **WHM** maintains a close relationship with university resources concerned with environmental or wetlands related issues. Our satellite office in Harrisburg, Pennsylvania, allows **WHM** to maintain close communications with regulators and legislators and to monitor emerging government environmental initiatives. Associates of **WHM** with offices in Delaware Valley and Pittsburgh provide coverage throughout Pennsylvania and the surrounding regions. Directly and through collaboration with other organizations, **WHM** serves a variety of clients throughout the eastern and southeastern United States.

The Directors and Associates of **WHM** have worked on a wide array of business and environmental interests. Examples of the breadth of services are:

- Wetland determinations and delineations for various construction projects.
- Biological surveys, studies, and assessments for threatened and endangered species such as the bog turtle, the red-bellied turtle, and the timber rattlesnake.
- Surface water characterization studies, including macroinvertebrate population counts.

- Complete environmental permitting for large, complex projects.
- Construction management and professional engineering certification.
- Ground and surface water quality studies, site assessments, and remediation.
- Implementation of reuse strategies for abandoned industrial properties.
- Preparation of bid documents and project specifications for environmental studies.

Land & Mapping Services

CORPORATE OVERVIEW

Land & Mapping Services was formed to provide its clientele with "State of the Art Professional Photogrammetric Mapping and Surveying Services". Firm wide our staff is well experienced in all phases of digital photogrammetry and its associated surveying services. The current experience level of our senior employees averages well over twenty-five years and encompasses projects located throughout the world.

Professional Land Surveyor registrations cover eleven states of practice. Also on staff are one *Certified Photogrammetrist*, three *Certified Open Water Divers* and seven *Certified GPS Technicians*. Taking into account a strong commitment by management to utilize only the latest technologies in hardware and software *Land & Mapping Services* is proud to attest that it is truly "*Committed to Excellence*".

ANALYTICAL BRIDGING

Land & Mapping Services has full in house capabilities to perform all phases of analytical bridging. This technology gives us the ability to quickly resolve control problems and more importantly to keep control costs to a minimum. All projects are pugged on a *Wild PUG -3 Point Transfer Devise* or a *Kern CMP2+* and/or measured on *First-Order Analytical Stereo Instruments* then adjusted via "*Albany*" analytical bridging software.

DIGITAL PHOTOGRAHMETRIC MAPPING

All digital mapping is collected via one of *Seven (7) Intergraph/Zeiss IMA* first order stereo instruments. These machines are known to be one of the top stereo collection instruments in the industry. The primary software utilized for map compilation is a combination of *Cadmap DGN* and *Intergraph Microstation*. The combination of these two powerful packages gives us the ability to economically collect clean *3D* (three-dimensional) data files.

CAD EDIT

The process of cad edit is completed on one of *eight (8) cad edit stations* running *Intergraph Microstation*, *Autocad*, *Arc View*, *ARC/INFO*, *Terra Model Plus 3* and others as required. All five workstations are Pentium based systems of 200 MHz to dual 750 MHz speeds. Projects can be shipped on floppy diskettes, cartridge tapes or CD-ROMS along with crisp color inkjet plots. All digital files are monitored to assure that they are of minimum size; you will not find clusters of useless points in our files.

DIGITAL ORTHO-PHOTO PRODUCTION

Digital ortho rectification is completed buy utilizing *PCI Enterprises Inc. or Intergraph "Z Station"* software. If required the *3D* ground points can be provided in-house through our photogrammetric mapping group or secured/produced through other data sources. Additional information is available on file sizes, pixel size to ground units, image scanning recommendations etc.

GIS/LIS

Collectively our staff has been responsible for the production of well over a thousand square miles of GIS/LIS base mapping. We can provide you with everything from the design and production of your base data to complete turn-key systems including data, software, hardware, custom applications and training. If you have an existing system there's a good chance that it can be improved or is in need of updating, the staff at *Land & Mapping Services* has the expertise to provide these services too.

FIELD CONTROL & COMPLETION

Everyone should realize that 100% of the detail cannot be located by photogrammetric techniques, and possibly due to your current backlog your survey crew(s) may not be available. It is at these times that our survey group can be of significant value to you. Our current equipment list includes total stations, data collectors, digital levels & field computers along with *TDS*, *Eagle Point* and *Softdesk* software. Some of our latest acquisitions include *four (4) Nikon* one second total stations and *Husky* data collectors running *TDS* software, *Trimble XR & XRS* code based GPS units and *four (4) Trimble 4400 Real Time Kinematic "RTK"* receivers. We have real-time capabilities on both the *Trimble 4400* and the *Trimble XRS* via a real-time satellite link subscription service. We believe that our continued investment in new technology and employee training has truly helped to give us the "edge" over our competition. In exchange it has given us the ability to offer our clients alternative methods to "*economically locate*" various types of information in the field.

GPS LOCATION SERVICES

As a value-added service to our clients we do provide both code phase and carrier phase GPS services. The addition of this service enables us to provide our clientele with the comfort in knowing that **all services were completed "in-house"** and under the direct supervision of a Professional Land Surveyor and Certified Photogrammetrist.

LASER SCANNING & MODELING

Our *Cyrax* System is a P.C. based auto-scanning system that measures and models large complex structures and sites with an unprecedented combination of speed and accuracy. The 3D files that are produced reflect complete surface geometry and can be utilized as-is or modeled into highly accurate renderings. In short the system works very much like a reflectorless total station only it has the ability to gather 3D data (survey points) at the rate of 800 points per second.

Quality Control & Scheduling

As everyone knows a firm's ability to deliver accurate professional services in a timely manner can only be equal to the quality of the people that produce that product; there just aren't any short cuts. Starting from the beginning our employees are some of the most experienced in the business. Our management group is made up of experienced professionals that have an average of over twenty-six years of experience. In reference to our firm as a whole, our average experience level totals over fifteen years each. Not only are our people highly experienced, we have provided them with the most up-to-date equipment and software available today. This is not to say that we do not have a system of final checks for our products and services, we do. But it is our belief that the quality of the final product is proportional to the amount of experience and methodology utilized to produce the product.

At Land & Mapping Services quality is everyone's job starting from the original layout and design, through completion.

CONSULTANT SERVICES

Consulting services are available encompassing a wide range of photogrammetric and surveying services. Please call for additional information or to arrange a meeting.

"New technology has a tendency to level the playing field between the large & small sized businesses"

Letter of Self Certification

Land & Mapping Services with its main office located in Clearfield, Pennsylvania is a
“Certified HUBZone Small Business Concern”.

I attest to the statement as printed above.

ADDITIONAL INFORMATION
ALDER RUN ENGINEERING, LLC**

12A. See also charts at the end of this Attachment and Attachment C. Our AML remediation/reclamation projects have included or involved re-grading, alkaline addition, design of water handling measures, removal of remaining coal, and revegetation practices.

12C. Alder Run Engineering specializes in hydrosystems engineering. Representative projects include hydrologic analysis using a variety of methods including gage analysis, regional regression methods, or mathematical modeling; hydraulic analyses of rivers, stream, conveyance structures, and outlet structures using models such as HEC-RAS, HEC-HMS, and VT/PSU-HM; and hydraulic design of structures such as reconstructed stream channels, standard conveyance channels, spillways, outlets, and energy dissipation and stabilization structures.

12F. Alder Run Engineering has experience with managing and performing broadly scoped water resources engineering projects. Our projects typically include some type of mine drainage treatment component, whether active, semi-active, or passive treatment. We currently have completed or are conducting approximately 30 projects involving AMD treatment ranging from small passive treatment systems for mild discharges to dosing treatment of larger discharges that cannot be treated using conventional passive methods.

19. Use this space to provide any additional information or description of resources supporting your firm's qualifications to perform work for the West Virginia Abandoned Mine Lands Program. Alder Run Engineering specializes in water resources/hydrosystems engineering, including hydrologic and hydraulic modeling using methods such as HEC-HMS which allow the company to design collection and conveyance systems for mine discharges. The company has provided construction oversight services for a variety of minelands reclamation projects ranging from stream restoration and channel reconstruction, highwall backfill, and treatment system construction.

CONSULTANT CONFIDENTIAL QUALIFICATION QUESTIONNAIRE RESPONSES (P. 20)

PREPARED BY:

**Blazosky Associates, Inc.
2525 Green Tech Drive
Suite D
State College, PA 16803
Phone: 814/238-2060
Fax: 814/238-7123**

- 12.A. YES 25+ BAI is located in central PA where there are many abandoned coal mines. Thus many landfill projects, brownfield and land development projects utilize abandoned or pre-Act coal mine lands. Many of these projects include acid mine drainage and lack vegetation. We are fully experienced in reclamation-including contouring, earthmoving and vegetation. We have worked on AMD treatment, land application of sewage sludge and wetlands. These efforts are directed for private companies, public entities and watershed groups.
- 12.B. YES BAI has performed many soil analyses in the field. Our lead professional is a Sewage Enforcement officer and a professional geologist. For detailed analyses such as permeabilities and complete textural analyses, BAI utilizes local laboratories.
- 12.C. YES 25+ For all of the projects listed in 12a above, there is a component involving hydrology and hydraulics. Aside from the normal erosion control channel design, landfills are a special more detailed case involving hydrology. The HELP model developed by the Army Corp of Engineers predicts water quantities for various layers for a given area. BAI has utilized this model extensively.
- 12.D. NO BAI routinely utilizes subcontractors experienced in such mapping and we provide guidelines and criteria for their preparation. We then utilize the maps to calculate earthmoving volumes and design.
- 12.E. NO
- 12.F. YES 10+BAI has worked on several projects which involve the treatment of acid mine drainage. Most of the projects involve passive treatment utilizing wetlands. Other active treatment processes have also been evaluated for use at five different 5000gpm discharges.

13. PERSONAL HISTORY STATEMENT OF PRINCIPALS AND ASSOCIATES RESPONSIBLE FOR AML PROJECT DESIGN (Furnish complete data but keep to essentials)

NAME & TITLE (Last, First, Middle Int.)	YEARS OF AML DESIGN EXPERIENCE:	YEARS OF AML RELATED DESIGN EXPERIENCE:	YEARS OF DOMESTIC WATERLINE DESIGN EXPERIENCE:
Blazosky John J., P.E./Project Manager	30yrs	30yrs	

Brief Explanation of Responsibilities

Founder; responsible for company-wide oversight of current and future projects.

EDUCATION (Degree, Year, Specialization)

B.S., Civil Engineering, The Pennsylvania State University (PSU), University Park, PA, 1973.
Graduate Courses and Research, Sanitary Engineering, PSU, University Park, PA, 1976 - 1977.

MEMBERSHIP IN PROFESSIONAL ORGANIZATIONS

Chi Epsilon, Civil Engineering Honor Society
Solid Waste Association of North America
American Academy of Environmental Engineers

14. PROVIDE A LIST OF SOFTWARE AND EQUIPMENT AVAILABLE IN THE PRIMARY OFFICE WHICH WILL BE USED TO COMPLETE AML DESIGN SERVICES

SEE ATTACHED:

CONSULTANT CONFIDENTIAL QUALIFICATION QUESTIONNAIRE RESPONSES (P. 23)

BLAZOSKY ASSOCIATES, INC. (BAI) SOFTWARE AND EQUIPMENT

BAI carefully selects equipment that will make us more efficient to our clients. We generally avoid the latest technological fad, viewing new technology as an investment. However, we are continually upgrading and expanding our information systems to keep up with the many changes in analyzing, describing, and transmitting information to each other and to our clients.

Information Technology: BAI maintains a modern equipment base to assist in providing high quality products efficiently. Our technical personnel utilize an extensive array of computer systems to perform complex design calculations and computer modeling. BAI also has desktop publishing with graphics capability, color laser and oversized document printers, and comprehensive software packages to provide rapid turnaround when producing or revising reports and documents. BAI continually upgrades computer systems to enhance document quality and office efficiency. Of course, each of our offices maintains copier and fax machines.

Field-Based Information Technology and Communication: BAI firmly believes that information technology needs to be accessible beyond our office settings. For this reason, we have laptop computers with wireless modem capability available for our professionals' field and remote use. High-resolution digital cameras and silver halide-based photographic supplies provide our field professionals a wide range of imaging capabilities. All of our professional services and field staff have cellular telephones to ensure accessibility from the field to clients and project team members. For communications on large sites on which there is not cellular reception, we often utilize VHF radio communication.

CAD and GIS Technology: BAI graphic design professionals provide designs and plans for presentation of project deliverables. We are equipped and staffed to assure immediate reproduction of project plans and presentations. BAI's computer-aided design (CAD) capability further increases efficiency and accuracy of graphic representation. We efficiently generate high-resolution topographic plans, cross sections and cut-and-fill volume calculations. The CAD computer systems utilize modern technology such as AutoCAD Land Desktop 2008 and AutoCAD Civil 3D 2008 software to provide accurate graphic representations with maximum efficiency and cost effectiveness. We utilize a 36" high-resolution, full color plotter for printing engineering diagrams, plans, and over-sized documents.

We also utilize GIS to build and produce maps and diagrams incorporating multiple layers of information. Utilizing surveyed data as well as data located with our handheld GPS equipment, BAI has the capability of customizing and revising client-provided and publicly-available data layers to efficiently produce task-specific maps. In addition to producing standard to oversized printouts of GIS-based diagrams, we have developed GIS-based presentations on behalf of our clients.

Geotechnical/Construction Management Field Equipment: BAI possesses an extensive supply of field equipment for Construction Management and QA/QC programs. We are licensed and own several Troxler, Model 3440, Surface Moisture-Density Gauges for measuring *in situ* moisture content, density, and compaction of soils ranging from clays to soil/stone matrices. The Model 3440 is one of the most accurate instruments of its type available to construction engineers and QA/QC personnel, providing over 30 special functions to insure fast, reliable test results at the testing site.

BAI can also provide the necessary field-lab equipment for our staff to conduct the following tests:

CONSULTANT CONFIDENTIAL QUALIFICATION QUESTIONNAIRE RESPONSES (P. 23)

Standard Proctor	ASTM D-698
Sand Cone	ASTM D-1556
Thin-Walled Tube Sampling	ASTM D-1587
Standard Oven Dry	ASTM D-2216
Nuclear Density Testing	ASTM D 2922
Nuclear Moisture Testing	ASTM D-3017
Drive Cylinder	ASTM D 2937
Atterberg Limits	ASTM D-4318
Microwave Oven Dry	ASTM D-4944
Moisture Content By Direct Heat	ASTM D-4959
Two-Stage Borehole Test	ASTM D-6391

Water Quality and Waste Sampling Equipment: For water quality and waste sampling and monitoring, BAI owns an extensive inventory of pumps, generators, balers, water level probes, hoists, and specialized sample collection equipment. As a full service consultant in environmental services, we possess all equipment normally used to collect surface and ground water samples, solid and sludge samples, macroinvertebrate samples, and asbestos. With instrumentation changing rapidly for more complex projects such as multi-media remediation, BAI typically leases the latest proven technology. This approach has proven more cost effective than owning and maintaining outdated technology.

Air Sampling Equipment: With respect to air quality, BAI owns sampling and testing equipment. Beyond the normal air quality and gas sampling equipment, specialized testing equipment is available to measure a variety of parameters. An explosive gas meter is used for this purpose and as a landfill gas-monitoring probe. A photo ionization detector is used on tank removals, site assessments, and remediation projects. Most recently, a Gas Data LMS was acquired to meet the Clean Air Act monitoring requirements for our landfill clients. This data logger and analyzer accurately and rapidly measures methane, carbon dioxide, oxygen, temperature and atmospheric pressure in the field, which greatly assists our engineers in diagnosing landfill gas systems.

Wetlands Habitat Management, Inc. (WHM)
2525 Green Tech Drive Suite B
State College, Pa 16803
Phone: 814-689-1650
Fax: 814-689-1557

12. C. YES (25+); The wetland and stream projects for which we seek solutions require an analysis of the hydrology and hydraulics. For example for our wetland creation projects, the hydrology needs to be readily determined to assure the success of the newly established vegetation.

Similarly the projects involving stream channel modifications and dam removal require hydraulic analysis to determine floodplain considerations.

All projects listed under section 12 meet this qualification.

12. F. YES (25+); WHM's Directors and Professional staff have a vast amount of collective experience relating to Acid Mine Drainage Evaluation and Abatement Design. With complementing backgrounds and technical disciplines, the staff as a team provides expertise for a total project solution.

The following list of projects summarize our experience in performing detailed studies and investigations to evaluate multiple alternative strategies for addressing the impacts of mine discharge.

The Emigh Run Project located in Central Pennsylvania in Boggs Township, Clearfield County
ER-8

Phase I –the design and permitting for the ER-8 abatement project including additional water sampling, design work, and completion of required permitting.

ER-13

Phase I – completion of the detailed design and permitting of a treatment plan that will address the discharge, along with installing a drainage system to collect the multiple seeps in the area.

ER- Headwater Relocation Project
Prepared Construction Documents

Abandoned Mine Drainage Project on Morgan Run Central Pennsylvania in Boggs and Decatur Township, Clearfield County

Tuff

Prepared Construction Documents

Frog

Prepared Construction Documents

MR-7

Phase I - detailed design plan for a treatment system to abate the MR-7 discharge and necessary permitting to begin Phase II of the project.

CONSULTANT CONFIDENTIAL QUALIFICATION QUESTIONNAIRE
RESPONSES (p. 20)

MR-8

Phase I – completion of the detailed design and permitting

Ross

Phase I – completion of the detailed design and permitting

Stream Quality Assessment Emphasizing Abandoned Mine Drainage in the Headwaters of

Moshannon Creek

Sampling, analysis, and evaluation.

Rogues Harbor Run, Clearfield PA

Watershed Assessment – Identified AMD and other Pollution Sources, Macroinvertebrate sampling , identification and evaluation.

Loop Run West Keating Township, Clinton County, Pennsylvania

LR - 10

Phase I - design and permitting for the LR-10 abatement project including surveying, design work, and completion of required permitting.

11. OUTSIDE KEY CONSULTANTS/SUB-CONSULTANTS ANTICIPATED TO BE USED. Attach "AML Consultant Confidential Qualification Questionnaire".

13. PERSONAL HISTORY STATEMENT OF PRINCIPALS AND ASSOCIATES RESPONSIBLE FOR AML PROJECT DESIGN (Furnish complete data but keep to essentials)

NAME & TITLE (Last, First, Middle Int.)	YEARS OF AML DESIGN EXPERIENCE:	YEARS OF EXPERIENCE
John J. Blazosky, P.E./Principal	30yrs	30yrs

Brief Explanation of Responsibilities

As an engineer, he has worked for the regulatory community in a permitting capacity and as a consultant performing major project assignments for corporations of all sizes, municipalities and government entities, attorneys, and other organizations.

Since 1986 as founder of Blazosky Associates, Inc., Mr. Blazosky has established a successful and highly reputable consulting firm serving the waste management and environmental consulting needs of a growing list of clients. He has expanded this consulting practice to three offices to provide environmental consulting services throughout Pennsylvania and the surrounding states. In addition, he is founder and an owner of Wetlands Habitat Management, Inc., a company dedicated to seeking responsible solutions to wetland issues. In this capacity he has been a developer of wetlands, creating credits for wetland mitigation. His current interests relate to the use of wetlands to treat stormwater, mine drainage and the restoration of streams.

EDUCATION (Degree, Year, Specialization)

B.S., Civil Engineering, The Pennsylvania State University (PSU), University Park, PA, 1973.
Graduate Courses and Research, Sanitary Engineering. PSU, University Park, PA, 1976 - 1977.

NAME & TITLE (Last, First, Middle Int.)	YEARS OF AML DESIGN EXPERIENCE:	YEARS OF EXPERIENCE
D. Josh Lincoln, COO	10yrs	10yrs

Brief Explanation of Responsibilities

D. Josh Lincoln received a degree in Environmental Resource Management from The Pennsylvania State University and currently specializes in stream and wetland sciences. Mr. Lincoln has seven years of experience in natural channel design and has completed projects in Pennsylvania, North Carolina, New York, Maryland, and West Virginia. Mr. Lincoln has been involved in a wide range of services beginning with watershed assessments, stream monitoring, stream design, wetland delineation, permitting, and construction management. His diverse background in this field allows him to provide turnkey services for water resources projects.

CONSULTANT CONFIDENTIAL QUALIFICATION QUESTIONNAIRE RESPONSES (p. 23)

WETLANDS HABITAT MANAGEMENT, INC. (WHM) SOFTWARE AND EQUIPMENT

GEOGRAPHIC INFORMATION SYSTEMS (GIS) TECHNICAL SUPPORT AND MAPPING:

The GIS team at WHM has assisted numerous clients with GIS mapping and land analysis utilizing the most up-to-date data and technology. Our staff can make information readily available to our clients by helping visualize spatial relationships, producing statistical data and determining environmental concerns based on GIS research. WHM has utilized this technology to assist clients with property acquisition, environmental management, project planning and development, and feasibility studies for a wide variety of projects, including stream channel and wetland design, wind resource analysis, project feasibility studies, land cover studies, and topographic mapping.

Our staff utilizes data that is both publicly available through spatial database's and privately acquired by our Survey team using GPS technologies. By integrating these services, as well as CAD, our firm has also had great success determining the suitability of a site for a specific development project. The end products we generate fulfill our client's needs in planning, managing and decision making for all types of projects. This translates into a high probability of success using less construction effort and saving substantial funds with our efficient and effective use of these technologies.

SOFTWARE:

AutoCAD Landdesktop 2008

Microstation V8

Trimble TerraSync Software

Trimble GPS Pathfinder Office Software

ESRI ArcGIS 9.2

EQUIPMENT:

Spectra Precision Laser LL400 Laserrometer

Trimble GPS unit Geo XH 2005 Series

Large format (size E) plotters

Large format plotter / scanners

Stream Assessment Equipment:

WHM has specialized equipment used for characterizing stream ecology and morphology. As full service stream consultants, we possess all equipment normally used to collect sediment transport, flow, suspended sediment and macroinvertebrate data.

CONSULTANT CONFIDENTIAL QUALIFICATION QUESTIONNAIRE
RESPONSES (p. 27)

19. Today many natural stream channels are impaired due to continual development, sprawl, and agricultural practices. It is important to restore impaired waterways not only for water quality, recreation, and aesthetics, but also because streams provide habitat for complex ecosystems and are vital to the overall health of any watershed. Stream restoration includes returning a stream, its floodplain, and riparian area to its natural and stable condition as well as re-establishing its biological habitat and function.

Natural Channel Design (NCD) is a method of restoring or creating a stable stream channel by using a natural system as a model for the design. WHM has successfully designed stream restoration projects using NCD methods in Pennsylvania, New York, Maryland, North Carolina and West Virginia. We offer full service solutions beginning with background data collection, design, permitting and construction.

12. A. Is your firm experienced in Abandoned Mine Lands Remediation/Mine Reclamation Engineering?

NO, we are not engineers, but we do have a great deal of surveying and mapping experience working directly in the specialty of correcting the problems related to AMD.

B. Is your firm experienced in Soil Analysis?

NO, but we have located thousands of test sites, well locations, soil probe holes, and sample locations on past projects.

C. Is your firm experienced in hydrology and hydraulics?

YES Description and Number of Projects: We have completed hydrographic surveys, engineering surveys (cross sections, profiles, quantity surveys, etc.) and temperature profiles on well over 100 projects.

D. Does your firm produce its own Aerial Photography and Develop Contour Mapping?

YES Description and Number of Projects: LMS has completed work on well over 300 projects of this nature. Work included Aerial Photography, Photographic Lab Services, GPS Control & Site Monumentation, Analytic Bridging, Digital Topographic Mapping, Digital Ortho's, Engineering Surveys (Cross Sections, Profiles, test locations, wetland boundary's, etc.), Stake-out, Laser Scanning & Modeling, Hydrographic Surveys, Cadd Services and Volumetric Quantities.

E. Is your firm experienced in domestic waterline design? (Include any experience your firm has in evaluation of aquifer degradation as a result of mining.)

YES Description and Number of Projects: Our firm has completed aerial photography, control surveys and digital photogrammetric mapping on well over three hundred projects of this nature.

F. Is your firm experienced in Acid Mine Drainage Evaluation and Abatement Design?

YES Description and Number of Projects: Our firm has completed aerial photography, control surveys and digital photogrammetric mapping on well over two hundred projects of this nature.

13. PERSONAL HISTORY STATEMENT OF PRINCIPALS AND ASSOCIATES RESPONSIBLE FOR AML PROJECT DESIGN (Furnish complete data but keep to essentials)			
NAME & TITLE (last, first, middle init.) James E. Pahel, P.L.S., C.P., P.S.M. Professional In Charge		YEARS OF AML SURVEYING & MAPPING EXPERIENCE: 30+	YEARS OF RELATED DESIGN EXPERIENCE: 0
Brief Explanation of Responsibilities Jim will serve this contract as the Chief Surveyor, Photogrammetrist & Hydrographic Surveyor. He has over 30 years of surveying, mapping and general civil design experience and is a registered Professional Land Surveyor in twelve states which includes WV. He is also a Certified Photogrammetrist and Certified GPS Operator. Jim has worked on over 300 projects of this nature.			
EDUCATION (Degree, Year, Specialization) 2 Year Technical Degree / 1972 / Drafting & Design 2,800+ Hours C.E. Credits / Surveying, Photogrammetry & Teaching			
MEMBERSHIP IN PROFESSIONAL ORGANIZATIONS WV Association of Land Surveyors, PA Society of Land Surveyors Plus approximately eight other organizations.		REGISTRATION (Type, Year, State) WV, PA, NY, NJ, DE, MD, TN, KY, NC, SC, FL & OH (Professional Land Surveyor)

Final products shipped in Intergraph file format. Some projects included super low rotary wing based mapping.	Unknown Current contract for \$1 million extended thru March 2009	50%

State wide open-end surveying and mapping contract	Pennsylvania State System of Higher Education Harrisburg, PA	Engineering surveys, property surveys, aerial photography and photogrammetric mapping.	Unknown \$1 million (active work threshold contract)	0%
Sunbury Power Generation Facility Shamokin Dam, PA	Sunbury Generation, LLC Old Trail Road Shamokin Dam, PA 17876	Engineering surveys, hydrographic surveys, aerial photography, GPS control surveys & monumentation, topographic mapping.	Unknown Work completed, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, & 2008	For 2008 0%, all others 100%
System wide surveying and mapping services	National Fuel Gas Corporation 1100 State Street Erie, PA 16501	Property surveys, subdivisions, engineering surveys, forensic surveys, well locations, aerial photography, lab services, GIS control & monumentation, analytical bridging, digital mapping, ortho production, and more. Work also included a system wide hardcopy to softcopy record conversion project. Work included all company owned gas transportation & distribution lines and engineering drawings. Work was completed in AutoCAD, Intergraph, ARC/INFO and others.	One Billion Plus	On-going \$1 million in contracts completed to date
U.S. Army Fort Sill Airfield & Obstructions Survey	Responsible for all surveying and mapping related work.	U.S. Army 2418 NW Macomb Road Ft. Sill, OK	Unknown Contract Amount: \$50K	0%
TOTAL NUMBER OF PROJECTS:			TOTAL ESTIMATED CONSTRUCTION COSTS:	
For engineer of record "0", as surveyor of record	3000+	Over one billion dollars.		

16. CURRENT ACTIVITIES ON WHICH YOUR FIRM IS SERVING AS A SUB-CONSULTANT TO OTHERS

PROJECT NAME, TYPE AND LOCATION	NATURE OF FIRMS RESPONSIBILITY	NAME AND ADDRESS OF OWNER	ESTIMATED COMPLETION DATE	ESTIMATED CONSTRUCTION COST	
				ENTIRE PROJECT	YOUR FIRMS RESPONSIBILITY
NY District ACOE Open-end District Wide "Hydrographic Surveying & Mapping Contract"	Responsible for all surveying and mapping related work.	New York District U.S. ACOE 26 Federal Plaza New York, NY 10278-0090	2009	Unknown Total contract amount \$3 million	Unknown (on going)
City wide surveying and mapping	Responsible for all surveying (engineering surveys, GPS control surveys & monumentation) and mapping related work.	City of Corning Corning, NY	Unknown (ongoing)	Unknown	\$162K to date, but the project is on going
City wide surveying and mapping	Responsible for all surveying and mapping related work.	City of Williamsport, PA	Unknown (on going)	Unknown	\$260K

Cherry Island Landfill Quarterly Up-date	Responsible for all surveying and mapping related services. Color aerial photography, lab services, GPS control, analytical bridging, mapping & color ortho's.	Delaware Solid Waste Authority Wilmington, DE	Unknown (on going)	Unknown (on going)	Working on a quarterly basis under several multi year contracts (1997 to date). Fees: \$2.2 million to date
Proposed wind farm Potter County, PA	Responsible for all mapping related services: aerial photog., lab services, airborne GPS, LiDAR data collection, digital mapping & ortho's	Unknown, work being completed for the Buffalo, NY office of URS	Fall 2008	Unknown	Fees: \$93K
FBI Biometrics Center (Secure Facility) Clarksburg, WV	All surveying and mapping services, including: aerial photography, lab services, GPS control & site monumentation, analytical bridging, digital mapping and ortho photo production.	FBI Washington, DC	2008	Unknown	Facility wide surveying and photogrammetric mapping Option Dependant
Glen Dale Water Line Improvements project Moundsville, WV	All surveying and mapping services including: aerial photog. lab services, GPS control & monumentation, analytical bridging and digital mapping.	City of Glen Dale Marshall County Moundsville, WV	Spring / Summer 2008	Unknown	Mapping of six (6) areas for waterline design \$4K

STATE OF WEST VIRGINIA
Purchasing Division

PURCHASING AFFIDAVIT

VENDOR OWNING A DEBT TO THE STATE:

West Virginia Code §5A-3-10a provides that: No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owed is an amount greater than one thousand dollars in the aggregate.

PUBLIC IMPROVEMENT CONTRACTS & DRUG-FREE WORKPLACE ACT:

West Virginia Code §21-1D-5 provides that: Any solicitation for a public improvement construction contract shall require each vendor that submits a bid for the work to submit at the same time an affidavit that the vendor has a written plan for a drug-free workplace policy in compliance with Article 1D, Chapter 21 of the West Virginia Code. A public improvement construction contract may not be awarded to a vendor who does not have a written plan for a drug-free workplace policy in compliance with Article 1D, Chapter 21 of the West Virginia Code and who has not submitted that plan to the appropriate contracting authority in timely fashion. For a vendor who is a subcontractor, compliance with Section 5, Article 1D, Chapter 21 of the West Virginia Code may take place before their work on the public improvement is begun.

ANTITRUST:

In submitting a bid to any agency for the state of West Virginia, the bidder offers and agrees that if the bid is accepted the bidder will convey, sell, assign or transfer to the state of West Virginia all rights, title and interest in and to all causes of action it may now or hereafter acquire under the antitrust laws of the United States and the state of West Virginia for price fixing and/or unreasonable restraints of trade relating to the particular commodities or services purchased or acquired by the state of West Virginia. Such assignment shall be made and become effective at the time the purchasing agency tenders the initial payment to the bidder.

I certify that this bid is made without prior understanding, agreement, or connection with any corporation, firm, limited liability company, partnership or person or entity submitting a bid for the same materials, supplies, equipment or services and is in all respects fair and without collusion or fraud. I further certify that I am authorized to sign the certification on behalf of the bidder or this bid.

LICENSING:

Vendors must be licensed and in good standing in accordance with any and all state and local laws and requirements by any state or local agency of West Virginia, including, but not limited to, the West Virginia Secretary of State's Office, the West Virginia Tax Department, West Virginia Insurance Commission, or any other state agencies or political subdivision. Furthermore, the vendor must provide all necessary releases to obtain information to enable the Director or spending unit to verify that the vendor is licensed and in good standing with the above entities.

CONFIDENTIALITY:

The vendor agrees that he or she will not disclose to anyone, directly or indirectly, any such personally identifiable information or other confidential information gained from the agency, unless the individual who is the subject of the information consents to the disclosure in writing or the disclosure is made pursuant to the agency's policies, procedures and rules. Vendors should visit www.state.wv.us/admin/purchase/privacy for the Notice of Agency Confidentiality Policies.

Under penalty of law for false swearing (*West Virginia Code §61-5-3*), it is hereby certified that the vendor acknowledges the information in this said affidavit and is in compliance with the requirements as stated.

Vendor's Name: ALDER RUN ENGINEERING, LLC
Authorized Signature: Michelle Y. Brown Date: 10-21-08
