Site 1 Questions & Answers:

Item 6: Q) Will the pond be drained; is this the area where the cofferdam is to be placed? What is the method of installation of the pipe conveyance pipe?

A) The pond will not be drained. The cofferdam was not shown on any plan sheet to be implemented; it is in the detail sheet as a method to be used if working in the stream was necessary. The trench will be a type "A" trench repair with concrete placed around the pipe because of the limited cover over top of the mine seal pipes.

A) Trash within the limits of construction on site 1 will be removed.

Item 8: Q) What is to be done with debris removal from existing structures?

A) Specification 4.2 discusses debris removal.

Item 9: Q) Where are soil borrow areas?

A) Soil borrow areas are designated on the plan sheets and test pit information on each site is available on the Existing Plan Sheets.

Item 10: Q) Can site 3 be accessed across the creek?

A) If the contractor chooses to access site 3 from across the creek the contractor is responsible for permits crossing the creek.

Item 11: Q) Where is refuse removed to be placed?

A) The plans show a fill to be constructed adjacent to the refuse pile where the refuse can be placed.

Item 12: Q) Where is the inlet to be placed for water service to the home at site 5 and is the contractor to run the waterline?

A) The contractor is to discuss with homeowner where to place the inlet before installation. The contractor is not responsible for waterline to the home.
