**Removal of Underground Storage Tanks and Assessments
at
Various Locations in West Virginia**

INFORMATION FOR BIDDERS

008

The State of West Virginia, Department of Environmental Protection, Office of Environmental Remediation is requesting quotes for removal of abandoned Underground Storage Tanks (USTs) and assessments for all of West Virginia. There will be no engineering services for this contract.

DEP will enter into an open-end contract for these services and reserves the right to award this contract up to 10 vendors. Work Directives will be issued for individual or multiple sites or projects in accordance with the criteria set forth in this RFQ.

The contract shall become effective from the date of award and shall continue for a period of one (1) year or until such reasonable time thereafter as is necessary to obtain a new contract or renew the original contract. The reasonable time period shall not exceed twelve (12) months. During said reasonable time, the Contractor may terminate this contract for any reason upon giving the State thirty (30) days written notice.

WVDEP expects to receive a minimum of \$1.6 million dollars through the economic stimulus package for cleanup of leaking underground storage tank sites within the first 16 months of this contract, in addition to current allotted funds for such work.

*** All work is expected to be issued and completed in an expeditious manner.**

BACKGROUND

It is the intent of this contract to reduce West Virginia's backlog of low priority leaking underground storage tank sites by addressing these sites that are abandoned, where the owner has an inability to pay for clean-ups, or where the owner has been served an enforcement order to clean up but has been recalcitrant to state enforcement actions.

SERVICES REQUIRED

The WVDEP/OER is requesting quotes to properly close multiple underground storage tanks varying in sizes and performing assessments at various locations throughout West Virginia.

The WVDEP/OER shall be responsible for retaining the right of entries. The WVDEP/OER shall be responsible for collection and analyses of soil and water samples during closure activities.

The Contractor will be responsible for complying with any and all health and safety requirements related to the work, including, but not limited to, employees, traffic control, and utility location verification. The Contractor will be responsible for contacting Miss Utility. The Contractor will also be held responsible for all cost associated for replacing or repairing any utilities damaged by the Contractor. WVDEP will not reimburse Contractor for any repair or replacement of any such damaged utility. WVDEP will not pay any down time due to utility damage/repair or any other unforeseen reasons. Contractor shall also be responsible for obtaining and complying with any city or county ordinances, such as building or demolition permits.

The Contractor shall be responsible for paying and/or securing all taxes, permits, fees, compensation, and any other items necessary to render and hold the WVDEP and the property owner free and harmless from all claims arising from services performed under this contract.

The Contractor shall take such steps as are required to ensure equal opportunity for employment in accordance with policies promulgated by the President's Committee on Equal Opportunity.

Work and services to be performed under this contract shall be subject to continuous monitoring and inspection by the State's authorized representatives. Such inspection will, among other things, ensure technical compliance.

In accomplishing services to fulfill the requirements of this RFQ, neither the Contractor nor his subcontractor shall create any adverse environmental effects, and shall be responsible for compliance with all applicable local, state and federal environmental and occupational health and safety laws and regulations pertinent to the work.

It is the responsibility of the contractor to pay his or her employees the prevailing wage rate for the county in which they are working. A certified payroll may be requested.

The Contractor must have a "Class B" WVDEP certified person on site during closures of USTs as required by State Regulations and all boring/drilling activities must be done in accordance with 47CSR59 "Monitoring Well Regulations" and 47CSR60 "Monitoring Well Design Standards".

Contractor's critical personnel at the job site shall have completed the mandatory 40 hour health and safety training course, with annual refresher, in accordance with the requirements of the Occupational Safety and Health Administration 29CFR 1910.120.

Contractor must submit at least one Class B WVDEP certified UST remover's name, certification number and expiration date on the attached schedule.
