Purchasing Division
Building 15
2019 Washington Street, East
Charleston, WV 25305-0130

Dear Ms. Ferrell,

On behalf of Comdata, we appreciate the opportunity to respond to the State of West Virginia Request for Proposals for Fuel Card RFP number FLT094800.

Comdata is a leading provider of fuel card services and transaction processing. We will work with the State of West Virginia to provide tax-exempt transactions on refined fuel products and alternative fuels that are dispensed into State agency vehicles.

Comdata will provide all card services, allowing the State to access all related fuel and maintenance work at any location that accepts MasterCard. This will enable the State to continue receiving the necessary data at fueling locations throughout West Virginia, neighboring states and Canada. The card can be used at retail, state-owned locations, marinas, airports, and mobile locations coast-to-coast. Due to this universal acceptance, the State of West Virginia will no longer need a separate card for each one of those functions or to run concurrent dual programs.

Comdata allows the State of West Virginia to receive a tax exemption on Gasoline and Diesel fuel that is used in agency vehicles. We will also work with the State of West Virginia to provide a tax-exempt transaction on additional grades of gasoline and alternative fuels run in State vehicles.

The Comdata-supplied MasterCard program offers the State of West Virginia several benefits and value unparalleled in the industry today: **Acceptability, Tax Exemption, National Discounts, Real-time Transaction History, Acceptance in Canada and a Merchant friendly program.** Our team will provide the State of West Virginia a one-card solution capable of tax exempt pricing and easy integration with the State's current fleet management system.

Sincerely,

A handwritten signature in cursive script that reads 'Brian Truman'.

Brian Truman
Vice President Public Sector
Comdata Network, Inc.
5301 Maryland Way
Brentwood, TN 37027
Phone: (615) 370-7763
Fax: (615) 376-6960

Executive Summary

The Comdata Team offers a compelling and high-value proposal to the State of West Virginia that will allow the State to take advantage of universal card acceptance, an ever-expanding network of discount locations, financial incentives, robust reporting and controls, the ability to purchase fuel products net of applicable taxes and a program that is friendly to the merchants in the State of West Virginia.

Comdata Corporate Overview

Comdata is redefining the movement of money and information through technology for businesses, their customers and employees. Comdata has over 39 years of experience in transaction processing and the fueling industry.

Founded in 1969, Comdata has been a premier service provider in the transportation industry for over three decades. Comdata is a subsidiary of Ceridian Corporation and is headquartered in Brentwood, TN. Comdata serves more than three million cardholders, transfers more than \$30 billion in funds annually for more than 25,000 fleet customers who employ more than one million professional drivers.

Comdata's philosophy involves listening to our customers' needs to enhance the core business, while also moving beyond the transportation industry with our core competency: enabling businesses to cut costs and improve efficiency in payment services and data transactions through "trust-enabled" protocols that ensure authorization and authentication according to each individual business' rules. Comdata is divided into multiple divisions that come together as a cohesive unit to service our current and potential customer base. Comdata has various business units that make us diverse in all areas of card processing. Business units include Transportation Services, Fleet Services, Business Services, Merchant Services, Regulatory Compliance, Payment Services, Payroll Distribution and SVS (Stored Value Systems).

The Business Services Division represents the Comdata MasterCard Fleet Card product, which is the primary product offering to the State of West Virginia. The Comdata MasterCard brings many of the conveniences of the Comdata solution to the government fleet environment. Cardholders enjoy the universal acceptance of the MasterCard product with the additional security and data capture features. The card may also be used in Comdata's proprietary truck stop network. Additionally, Comdata has expanded the Business Services card to include travel and entertainment, procurement and management of mobile fueling, bulk fueling, onsite and

propane, aviation-related fueling and services and other forms of energy purchasing.

Comdata's primary business objective is to be the single-source transaction processing and reporting tool for all energy-related and fleet maintenance purchases for our customers. Comdata excels in building synergies between our company and other third-party vendors to achieve successful partnerships for the benefit of each other and our mutual customers. Today, Comdata processes fueling transactions for all grades of diesel, unleaded, propane, aviation and other alternative fuels through a multitude of purchase methods including our proprietary network of travel plazas, mobile fueling providers, bulk fuel providers, automated card locks and MasterCard locations through a single piece of plastic. In addition, all fleet and/or maintenance procurement activity regardless of grade or purchase method can be provided back to the client in one invoice.

Combined Strengths

The Comdata Team has combined strengths to form a collaborative relationship that will provide supply chain management solutions for fueling at the retail, wholesale and bulk levels. The Comdata Team is a licensed provider of gasoline and diesel with the ability to supply and distribute refined petroleum products on a nationwide basis.

Executive Summary - Key Points to Consider in Proposal Criteria and Evaluation

1. Experience

While other fleet card vendors may claim their company as the leader in state experience, the fact is Comdata is the true leader in state government experience and overall fleet experience. Comdata has been in business since 1969, longer than any other fleet card company in the industry today and has been listening to customers and providing true solutions to customer needs, not just talk.

Also, with Brian Truman assigned to your State contract, the State will have more experience than all other companies. Brian Truman has been involved in the fleet card industry for 17 years with the entirety of that experience concentrated on state government and State solutions. He knows your business from the inside and no other vendor can make that claim. Brian brings the most experience to the table to implement your account and to provide true solutions.

2. Fuel Card Implementation

While there won't be a great need for implementation we contend that if the State talks with the most recently implemented Comdata customers, they will see the true reason that fleets have made the switch to Comdata. For example, a large commercial customer was implemented by issuing 70,000 cards in 45 days and no other competitor can make that claim and by providing discounts that cannot be provided by our competitors. We encourage the State to ask our recent converted customer the reasons why they made the switch to Comdata from Wright Express. Comdata offers a complete program for government and educational institutions and financial incentives to make the best program for the State.

3. Alternative Fuel Reporting

Brian Truman has attended several conferences on alternative fuels from E-85 and Propane to Bio-diesel, to see what the future holds and to provide the State with the best information in the marketplace today. With the incessant demands on agencies to provide alternative fuel reporting to the Legislature and the Governor's Office, we know it is important for the State to provide accurate and timely data. At Comdata, we offer a means for the State to receive the correct information in order to report the true volume of alternative fuel purchased while enabling agencies to purchase alternative fuel from a much wider range of merchants due to the universal acceptance of the Comdata MasterCard.

4. Cost/Discounts

Comdata provides the State with the flexibility to choose either retail or Opis adder pricing. We offer a large network of discount locations—a cost-saving means that agency fleets have sought for many years. Legislatures and agency budget analysts alike are continually demanding that State agencies “operate more like a business”. By utilizing a network of discount locations—oftentimes, the very same locations currently used by State fleets—cost savings are immediate, measurable and widespread. The wide variety of discount locations in our network encompasses all brands, even though our competition would have you believe that it consists only of the highest priced marketers—a statement that is far from the truth. In most cases, the discounts are offered by many of the lowest priced marketers, thereby adding to the savings for the State. Our discount network continues to grow and we are able to provide this immediate cost-savings solution to the State.

In terms of sound fiscal practices throughout the life of the contract, please take into account the overall cost of a program, not just to the State, but to its taxpayers and marketers in the State's revenue base.

5. State and Federal Tax Exemption

Comdata was the first universal fleet card issuer to provide Federal Diesel Tax exemption and continues to offer tax exemption on both gas and diesel transactions and did not need to seek legislative help to accomplish this task.

6. Comdata MasterCard Universal Acceptance

The Comdata card is accepted anywhere that MasterCard is accepted giving the State the most widely accepted card for both Fuel and Maintenance. We can also limit the State to level three locations only, a feature which our competition does not and cannot offer.

Comdata contends that the proposal evaluation process will demonstrate that we are the best fuel card provider for the State , offering the highest value and cost savings, the smoothest and most timely implementation process and fully meeting your needs.

We believe if the State is looking for a fuel card vendor that offers the best product and solutions today, and in the future, then Comdata is the choice for the State. The following are many other benefits, features and solutions that distinguish Comdata from our competition and offer reasons why Comdata is the best choice for the State.

7. Merchant Friendly Program

Less Interchange Rate - We offer a greater economic benefit to the State through an interchange rate that is nearly half of the rate charged by our competitors' proprietary card acceptance. This provides for better merchant relations with the State and allows for the State's volume to leverage strategic supplier discounts. The Comdata MasterCard rate to merchants is reduced.

Merchant Tax Participation- Merchants receive full settlement for the transaction as the Comdata Team applies for the taxes instead of the station or wholesaler. Comdata does not burden the marketer with applying for the taxes the state is exempt from therefore merchants

don't have to opt in or out of our tax program. This allows for greater participation.

In terms of sound fiscal practices throughout the life of the contract, please take into account the overall cost of a program, not just to the State, but to its taxpayers and marketers in the State's revenue base.

Other Distinguishing Benefits to Manage Fleet Costs

Some other advantages that will help reduce the State's fleet costs include these following areas:

CARD ACCEPTANCE

1. Better rural coverage and merchant relations because:
 - a. Merchant fees are about half of the competitor's proprietary card
 - b. Most widely accepted business-to-business card worldwide
 - c. Merchant receives full settlement for the transaction as the Comdata Team applies for the taxes instead of the station or wholesaler
2. Card is universally accepted for all fuel products, enhancing the State's ability to purchase alternative fuels, such as E85 and Bio-diesel
3. Card is widely accepted at Marina and Aviation locations thus no need for carrying multiple cards
4. Card is accepted in Canada and Mexico, thus precluding the need for dual cards or programs
5. The State can use the same card for Retail fuel as well as Bulk, On-site and Mobile fueling and receive one invoice.

MAINTENANCE PURCHASES

1. Card is widely accepted at maintenance and non-fuel locations and may be used for all fleet related purchases such as car washes, oil changes, tires, auto parts and service merchants, etc.
2. Comdata has the ability to pass data from maintenance locations for comprehensive reporting of service, parts and labor provided.
3. The Comdata card can be used as a "virtual card" for expenditures.

TAX EXEMPTION

1. Federal Excise Tax on diesel is exempted at the transaction level, not posted as a lump sum credit in the month following
2. Fuel taxes are exempted at accepting merchants including independent fuel merchants who pass the proper data.

3. The Comdata Team files for the refund, the wholesaler and merchant are not burdened with the task of documenting and filing for each tax exempt sale

ACCOUNT AND DATA MANAGEMENT TOOLS

1. Smart Buy-- an online tool showing the least expensive retail and wholesale pricing, in real-time, across the state and the country
2. Ability to view transactions and authorizations in real-time without having to wait 48-72 hours for a transaction to post, and immediately determine if a driver enters the wrong PIN number, swipes the card incorrectly, has exceeded limits, etc.
3. Comprehensive data capture and reporting for both vehicle cards and driver cards
4. Can interface with mobile re-fuelers to capture data from fueling at remote locations
5. Technical services support provided to “map” transaction data directly into fleet management software
6. Ability to assign General Ledger coding to transactions and map the corresponding data to the agency’s financial system
7. Comdata provides 15 levels of Hierarchy and reporting

CONTROLS

1. Cards can be reassigned/moved without having to reissue plastic
2. Pre-determined controls/purchase profiles may be assigned to a single card or an entire fleet
3. Controls allow for a one-time override with automatic reset to previous levels
4. Both soft-limits and hard-limits may be applied on the same card
5. All authorizations and transactions—on-site and retail—are processed internally by Comdata for greater control and more accurate data capture.
6. Comdata process all transactions internally providing more control and accurate data.

FINANCIAL INCENTIVES

1. Signing bonus based on the total spend history for the State.
2. Early pay incentives for payments made based on several options.
3. A discount of \$.02 to \$.05/gallon at a network of conveniently located commercial locations and travel plazas throughout the entire country.
4. Incentive based on either total gallons or dollars.

Real-Time Authorizations

Comdata customers have the ability to view transactions and authorizations in real-time without having to wait 48-72 hours for a transaction to post, and immediately determine if a driver enters the wrong PIN number, swipes the card incorrectly, exceeds agency limits, etc. One important feature is the ability to view authorizations and declines in real-time and if a transaction is declined, for whatever reason, the authorized agency fleet manager, would be able to go online immediately and see why the transaction failed. In addition to citing the reason for the decline, the system suggests a corrective action. For example, if the driver's assigned PIN number is "12345" and the driver mistakenly enters "12354", the system will capture that information and display it online *as it occurs*. The driver could be informed while still present at the station. Using other card provider systems, the vendor must be contacted via phone or email, the vendor must research the information and then get back to the person that posed the question, sometimes taking hours or days to accomplish. This functionality is available online to agency-authorized users. With the online enhancement, the customer will be able to view transaction authorizations, declines and settlements as they occur in the field. Various queries/reports can be generated from the data provided. If the State is concerned about an employee, the fleet manager can watch, via computer, every step of the transaction in real time by that individual.

Smart Buy

Comdata's Smart Buy Fuel System gives you greater control of your fuel cost by helping you make better fuel buying decisions. With this system, you can find the best-priced stations, negotiate discounts and benchmark fuel purchases for your fleet. The Smart Buy Fuel System displays OPIS pricing for regular unleaded gasoline and diesel, by retail station for the entire United States. Using several search options, you can obtain a list of stations by state and city or for a specific zip code, within a three, five or 10-mile radius. Your search results will show all the locations on a map and a list of locations in order by price. You can also obtain rack-to-retail margins for each location giving you key information to negotiate discounts with chains and individual stations.

E-Learning

This product came about from customers wanting their drivers to be trained on the Comdata fleet card program and wanting to see if they really understood the product and all the tools to manage their own accounts.

Comdata has a real-time internet product called IConnectdata.com that customers can use for all their account management function, gathering reporting, and access to other real time tools. Beyond having access to a help section that describes each section and function the new E-Learning tool actually is now in audio and walks the customer/driver through each module of the internet product. With E-Learning, the fleet manager can

receive a list of those of who went through the E-Learning process and which modules were completed, how long it took them to go through each module, and it also has a test at the end. Again, the fleet manager can receive a report showing the score of each person and which questions they missed so they can then have that customer/driver go through that section again, if necessary.

Best fuel price notification via Cell Phone

Comdata, using the fuel pricing data received on a daily basis through the Smart Buy product, will now be able to send directly to a driver in the field, via a GPS-equipped cell phone, where the lowest price fuel location is, nearest to that driver. Working with a cell phone company, the fleet manager can view Smart Buy and see where the lowest fuel price is that day in the driver's area and then select a button and the phone then sends a text message to the driver advising of the nearest location to purchase the lowest price fuel.

Daily Exception reports

Comdata pioneered the distribution of exception reports via daily emails. Daily emails containing Excel files containing exceptions can be automatically emailed to specified users. This occurs by Comdata gathering the information in the evening and then emailing out to the customer, the next morning, their exception report based on the parameters they have requested. This way, each morning, the fleet manager can open an excel spreadsheet with the exceptions and then take the appropriate steps for correction.

IRS Approved Process - Diesel Tax Exemption

The Comdata Team through this strategic alliance tax-exempt customers, such as the State of West Virginia, are given the unique opportunity to purchase retail and bulk fuel at a contracted price exclusive of applicable taxes. The Comdata MasterCard Fleet Card is the purchasing mechanism that initiates the transaction and captures the detail to be provided for re-pricing. In addition, the Comdata MasterCard provides cardholder with controls and validation (PINs), mileage capture, line item detail and the ability to purchase fuel and/or other products.

This proposal summary highlights the financial and administrative benefits that can be achieved through the implementation of the proposal offered by the Comdata Team. A brief description of the key product features are included, as well as recommendations for implementation.

MasterCard Enhanced Merchant Data Reporting (EMR)

The State will have the ability to track purchases from socio-economic categories and other demographic profiles of the organization's merchant base with MasterCard EMR. The web-based application provides comprehensive purchasing card transaction data with regular updates that enable organizations to view and download critical data in customized formats, including:

A comprehensive merchant category profile with information on 1099 status, business owner (e.g. minority-owned, woman-owned, or disabled-owner) and whether a company is a small business, disadvantaged, or has a specific certification

Other critical data like total spend, average ticket size, industry sector spending, mandated supplier spend and large ticket spend that can help an organization manage its purchasing operations

Reports are available as PDF files, or in files that can easily imported into a database.

EMR is refreshed on a monthly basis and merchant and transaction data are retained for a rolling 16-month period; completed reports and files are maintained on the site for 3 months. To ensure accuracy of merchant socio-economic data, EMR uses validated data on over 14 million merchants supplied by.

MasterCard has ongoing activities in place to ensure tax identification data is verified, accurate, and consistent and delivered in a timely manner. MasterCard works with Acquirers to review validate and correct this information on a quarterly basis.

MasterCard has applied to become a QPCA designated payment card organization to better serve its customers in soliciting accurate merchant data. As a QPCA, MasterCard will have the authority to act on behalf of cardholders and merchants, will undertake TIN solicitation activities, participate in the IRS TIN Matching Program and provide IRS validated merchant data wherever possible.

Comdata Processes All Transactions Internally

Unlike most card issuers, Comdata processes all MasterCard and proprietary transactions internally on our HOST systems. We do not use an external financial institution or acquiring bank for processing. The benefit to the State of West Virginia is that this enables Comdata to control and view all pre-authorizations in a real-time environment and may alleviate some of the delays with providing authorization and settlement data to our

customers. Comdata does not receive batched information nightly, therefore providing better control over the data processed and reported.

Innovation

Based upon industry standards, corporations and other entities that implement a managed fuel card program can expect 10-15% in fuel management cost savings per month (source: Automotive Fleet magazine). This figure represents improvements ascertained through improved driver productivity, asset/driver management, fraud prevention, and efficiencies achieved in administration through consolidation in the fuel management environment.

Increased Driver Productivity

- Driver convenience and increased productivity with the consolidation to a one-card fuel purchasing system (can be used for bulk, mobile, State owned card lock, truck stop and traditional retail fueling)
- Universal acceptance of the MasterCard allows a driver to purchase fuel at over 177,000 nationally.
- Allows a driver to choose lower cost fuel given the abundance of station options.

Analyze Vehicle Cost Performance

- With data capture, obtain better knowledge of vehicle cost analysis at the asset and fleet levels
- Use fuel data and data capture to feed preventative maintenance programs

Reduce Exposure and Manage Purchase Exceptions with "Real-Time" Tools

- Card-level controls and profiles for all validation and data capture items. Each card can have unique purchase limits and restrictions.
- Real-time PIN/Vehicle ID validation at POS/terminal fuel site
- Fuel or Fuel/Maintenance restriction capabilities
- Restrict fueling hours — card can be open for specific days and times
- Monitor purchasing exceptions by vehicle via Comdata's automated email delivery process, which allows individual users to receive exceptions from the previous day's transactions through, scheduled email delivery.

- Re-priced reporting exclusive of applicable sales and/or federal taxes provided in a timely and consolidated form
- Real-time card maintenance when utilizing a vehicle card (i.e. card blocking, purchasing profile changes in times of emergencies such as hurricanes and earthquakes).

Reduced Administrative Expenses through Consolidation

- Consolidated invoice for fueling transactions that reflects the re-pricing of the fuel at the contracted prices and exclusive of applicable state and/or federal taxes.
- Reduce management of manual fueling receipts and logs as all detailed transactions are consolidated to one statement.

Portfolio Management

Additional savings may be achieved through an increased opportunity with discounts, hedging and cost/margin management. The Comdata Team's business relationship also includes proactively working together to improve the cost/margin structure throughout the bulk and retail network.

- Consolidated buying power through a universal card system provides leverage for rebate/discount programs with retailers.
- The Comdata Team provides improved fueling costs through supply chain management/margin management. Detail tax-exempt costs can be managed to the asset level.

Comdata Implementation and Support Strategy

Comdata will be the primary day-to-day support provider to provide optimal support for the State of West Virginia. Comdata will provide a project manager to make sure all efforts that remain to be completed are finished and will coordinate efforts between Comdata and the State of West Virginia. The project manager will serve as liaison between all internal and external parties. A Comdata systems engineer will also be partnered with the project manager and serve as technical liaisons. Comdata has assigned Tracy Sims within our Customer Relations department that will be instrumental in the long-term support of the account. Comdata associates may be added to the team as warranted by the account.

Project Manager

The Comdata project manager and systems engineer will follow through until all site integration and fuel supply services are activated in the field and all issues have been resolved. At the same time, the Comdata

customer relations team will continue full support of the State of West Virginia account.

During integration, project planning meetings/conference calls will be conducted on a weekly basis. The project manager will submit weekly status reports to all members of both teams to keep everyone abreast of the current accomplishments as well as possible reasons for delay. The goal of the team is to make the Comdata MasterCard program a success. The team is flexible and will adjust to the needs of the State.

Card Level Controls

Comdata's system allows card level controls that allow the customer to manage the purchase habits for each user and/or vehicle. The options for card control are virtually limitless. Customers can restrict (by individual card, company standard (grouping), CUST ID or account) the following:

- Purchases to fuel locations only**
- Fuel and maintenance locations**
- Merchant Category Code restrictions**
- Purchase amounts**
- Purchasing times (off-hours, days, weekends)**
- Velocity (number of transactions per day, per week, per cycle, etc.)**
- Combination of all of the above**
- Level 3 (auth prompt/data capture) merchant restrictions**
- Limited network capabilities allowing cards to be restricted to particular retail chains, marketers/vendors or individual stations by merchant ID**

Reporting and Other Online Features

Comdata provides a variety of reports in many formats to detail the settlement and transaction activity through the card. For the marketer/vendor, settlement reports are available in electronic and print formats, depending upon the needs of the client. Report options are detailed within the RFP.

Virtual Card

Comdata recently launched the virtual MasterCard. The virtual card is available in an online Internet format or can be integrated directly into the State of West Virginia's financial system. The virtual card allows the State of West Virginia to initiate "one-time" MasterCard number (no plastic) to make payments for specific amounts. The virtual card has a limited window of availability with expiration dates of 30-90 days. Most importantly, the virtual card interface provides a user interface for the State of West Virginia to enter transaction-specific data before the card can be created and issued. The data elements include vehicle, PO number, GL, Warranty Information, etc. The data that is populated follows the transactions through to settlement and can be invaluable for today's fleet management.

Recommendations

Based upon our experiences with similar government entities and private sector customers, we would welcome the opportunity to meet with you at our Brentwood, TN office, or at your State offices to discuss the program in greater detail. If you wish to arrange such a meeting or have questions about our response please feel free to contact Brian Truman at 615-370-7663.

3.2.1 Fuel Card

3.2.1.1 Provide a number, list of names, and locations of fuel distributors which will honor the supplied credit card for West Virginia, Virginia, Kentucky, Ohio, Maryland and Pennsylvania.

Comdata Response

The Comdata MasterCard offers and allows drivers to purchase fuel at over 177,000 fuel locations nationwide, including a total of 1,449 locations in West Virginia. The Comdata card is accepted in all 50 states along with Canada and Mexico. In addition to acceptance at MasterCard locations, our fuel card is also accepted at approximately 8,000 - 10,000 truck stops and travel centers across the United States and Canada. Please see Appendix 8 for a complete listing of fueling locations.

The Comdata card is accepted at multiple merchants in all counties in West Virginia. The Comdata card provides additional acceptance beyond our competitors in that our card is accepted at all the same locations as their proprietary card plus more sites because of the MasterCard acceptance.

Note: Comdata has scrubbed the site listing data to eliminate duplicate listings so the State can make apples to apples comparison.

With the Comdata MasterCard, Comdata can provide the State with acceptance at Level III sites only, if the State chooses. Comdata can set parameters for the State so that transactions at any other site level will be declined. As an industry standard there is no other fleet card vendor that can provide the State a 100 percent Level III network. On average, our fleets are currently experiencing 98% and higher Level 3 coverage.

Also, the State may consider that, in extreme rural areas, the likelihood of an independent station accepting a Comdata MasterCard is much higher than accepting a competitor's proprietary card.

Listed are some of the brands that accept the card in West Virginia. Please see the enclosed Fuel Site listing for a complete listing by city.

The Comdata MasterCard Fleet Card is accepted anywhere MasterCard is accepted, including many retail locations already familiar to The State of West Virginia. In addition to numerous independent fuel merchants, locations include:

Shell/Texaco	Citgo
BP Oil	Sunoco
Exxon/Mobil	Marathon
Chevron	7-Eleven
Sheetz	Getty
One Stop	BFS Foods
Little General's	Par Mar
Unbranded	Getgo

Aviation

The Comdata MasterCard Fleet Card is currently accepted at 10 aviation locations in the State of West Virginia. Comdata is currently building a network of Fixed Based Operators that accept the Comdata card for general aviation purchases and streamline all purchases into a single invoice, thus eliminating the need for the State of West Virginia to have separate cards for aviation fueling. The Comdata MasterCard Fleet card is currently accepted at 2,888 FBOs and is providing Level III data.

Marinas

The Comdata MasterCard Fleet card is also accepted at 10,398 marinas throughout the U.S and 25 Marinas and Marine Service Supply locations in the State of West Virginia.

Acceptance for the surrounding states is as follows:

State	Fuel	Maintenance
Virginia	7,124	7,960
Kentucky	4,893	4,511
Ohio	10,323	13,393
Maryland	6,044	7,502
Pennsylvania	9,713	15,297

Maintenance and Repair Services

The Comdata MasterCard can be opened on a card-by-card basis to allow purchasing at maintenance and repair locations. The card is universally accepted and can be used at any merchant that accepts MasterCard. Likewise, over 2,113 Maintenance locations within West Virginia accept the card.

Proprietary

In addition to MasterCard acceptance, Comdata also has a proprietary network in excess of 8,000 locations which consists of mostly truck stops. Comdata's unique proprietary processing capabilities and ability to expand upon our own network gives us additional acceptance opportunities in the retail marketplace as well as bulk fueling, mobile fueling, fleet maintenance and aviation. Comdata can negotiate proprietary rates with merchants that do not typically accept MasterCard or other branded cards in order to increase acceptance for the State of West Virginia. All proprietary transactions provide full fleet data capture and reporting.

Truck Stops

For the Comdata MasterCard only, our proprietary network of over 8,000 US truck stops and 29 in West Virginia focus on meeting the needs of the transportation industry. Our network provides real-time, comprehensive Level III data for all transactions, which helps fleet operators, control their variable expenses.

Mobile Fueling and Propane

Comdata's network of nearly 100 mobile fuel suppliers provides Level III data.

3.2.1.2 Vehicle mileage information must be captured at the pump before any fuel can be purchased.

Comdata Response

The State can have Driver ID and Odometer/vehicle mileage prompted for, however vehicle mileage is a capture function only in the industry and Comdata will report to each agency what the driver input's at the pay at the pump outside or the point of sale inside.

3.2.1.3 Vendor must have the ability to invoice individual agencies as designated by the Fleet Management Office. The vendor will pay directly to fuel suppliers all charges, except any assessed taxes, made by drivers and invoice the designated agency on a monthly basis.

Comdata Response

Comdata will partner with each participant who falls under the terms of the contract with the State of West Virginia to set up specific billing requirements. Each participant or entity can chose semi monthly or weekly invoicing. Additionally, those entities billed weekly can choose a specific day of the month or week for invoicing to occur.

Our variety of billing formats and invoicing options (web access, disk, FTP and email) will allow for a solution that will fit the needs of each agency.

Comdata and MasterCard pay fuel suppliers daily for fuel purchased by our customers.

3.2.1.4 Vendor must be able to 1) provide a mechanism to exclude Federal Excise Taxes at the fuel pump before the fuel supplier is paid, or 2) reimburse these taxes to the appropriate agency. The ability to exclude Federal Excises Taxes at the pump is preferred. Note: From the addendum released March 27th to exclude federal excise taxes and State Taxes at time of billing. Agencies are not to be charged any taxes.

Comdata Response

Tax Exempt

The Comdata Team will exempt the State from Federal taxes for fuel purchases that capture appropriate fuel product detail (i.e. Level II or Level III data). Today, such detail is provided by 155,000+ retail fueling locations, more than 8,000 to 10,000 truck stops and over 1,000 card lock locations and most mobile fuel providers. Comdata currently serves nine state fleet programs and various other public sector accounts and has extensive experience with tax exemption billing. The service provided is to handle the tax exemption process which is vitally important as we do not push the responsibility for tax exemption back on to the merchant, therefore having greater acceptance and a happier supplier network. The billing and reporting are provided net of applicable tax at the transactions level electronically.

TAX EXEMPTION

1. Appropriate Federal Excise Tax on gasoline and diesel are exempted at the transaction level as applicable, not posted as a lump sum credit in the month following.
2. Fuel taxes can be exempted at accepting merchants including independent fuel merchants.

3. The Comdata Team files for the refund, the wholesaler and merchant are not burdened with the task of documenting and filing for each tax exempt sale nor is the State.

With the Comdata Team's program, the State of West Virginia will save considerably on time and resources each month, therefore, no waiting for credits to be applied on the following months invoice.

For other non-fuel or automotive-related/maintenance purchases, tax-exempt agencies will need to inform the merchant that they are exempt from the appropriate taxes in order for the exemption to take place and provide their tax exempt form prior to running the transaction.

State Motor Fuel Flat Rate Tax

As Comdata mentioned at the pre-bid meeting it is our understanding from our tax department, tax partners as well as the State of West Virginia that only the State agencies can apply for the .205 Motor Fuel Flat Rate Tax and not the credit card issuer or the merchant. Comdata spoke with Carol Brown at the State Tax Department at 304-558-8672. If this information Comdata has received is not correct and we can apply for the tax on the state's behalf we could gladly exempt the State Motor Fuel Flat Rate Tax for the State.

Merchant Tax Participation - Merchants receive full settlement for the transaction as the Comdata Team applies for the taxes instead of the merchant or the State. Comdata does not burden the marketer with applying for the taxes the state is exempt from therefore merchants don't have to opt in or out of our tax program. Since the Comdata team applies for the tax refund all level III transactions are exempted and require no involvement of the merchant or the State. This allows for greater participation.

3.2.2 Reporting

3.2.2.1 Standardized reports will be distributed to designated agencies as determined necessary without additional charge. Additionally, the vendor will develop specialized reports unique to each agency's needs.

Comdata Response

Reporting Options

Comdata's iConnectData (www.icconnectdata.com) offers a unique report feature called Report Builder. Report Builder is a web-based feature that allows customers to generate customized reports of recent account cardholder activity. View a report online, print it, or download it to a PC in Microsoft Excel format. Report Builder begins to accumulate data as soon as transactions occur. Using Report Builder, customers access transaction data using predefined templates displayed in HTML, PDF, and Microsoft Excel formats.

Through iConnectData customers decide which reports are beneficial, and customize the user display eliminating the need for unnecessary navigation. The data can be imported into Microsoft Excel or Access to use for other management activities such as trend evaluation and usage statistics. Data is available only to those individuals who have customer-granted access.

A list of available reports is shown in a query list on the Report Builder home page. The report name is the link to the Report Builder form — the data entry screen — for each report. When the report query is chosen, the system displays the entry form for that query. By choosing from the screen selections, customers can define the level of detail for the report (for example, activity for all cardholders or a particular cardholder). Data accessed through the Report Builder module will reflect only card transactions that were recorded during the date range selected. There are multiple sorting and viewing options available that allow customization to meet specific needs. The Comdata team can provide these reporting elements and is doing so for many customers today.

The reports can be provided on a monthly basis or can be accessed using our online product and the report builder tool that is mentioned below and Comdata can provide them to State in a variety of formats. Comdata will work with the state in the implementation phase to provide the reports that the State needs.

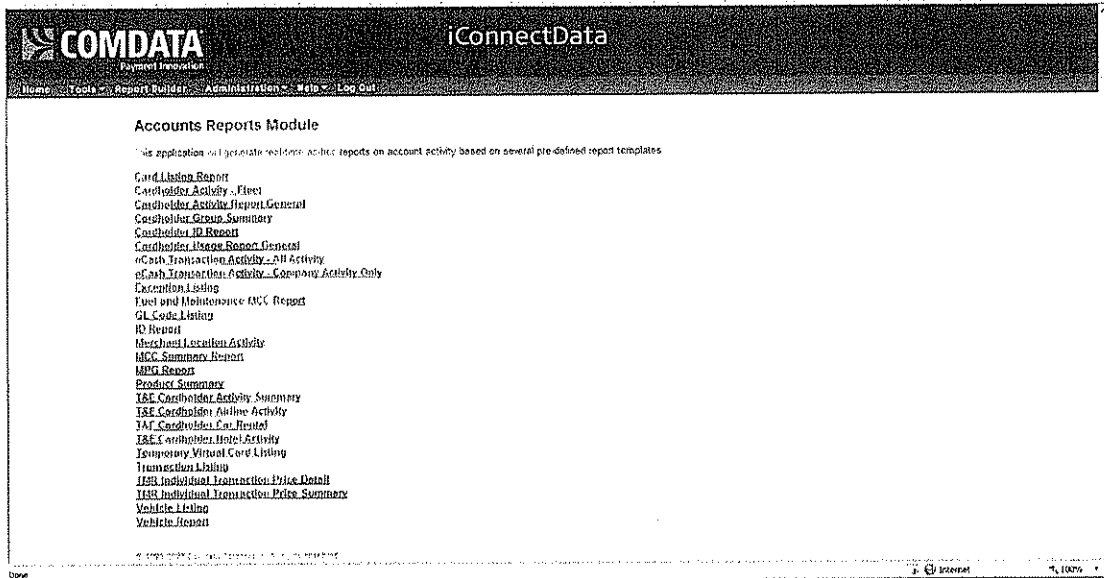

iConnectData's Report Builder Features

- **Account Level or Hierarchical Reporting:** All reports can be queried by account level with data pulled by account code and/or Customer ID (CUST ID). In addition, users have the new option of querying reports by hierarchy, as specified by the customer.
- **Descriptors for Account, CUST and Hierarchy levels:** Comdata has added relevant descriptions to define the Account Code and CUST ID's. Pop-up windows allow the user to select an Account Code, CUST ID or Hierarchy level. Customer-defined descriptions such as the Division name, Location/City name and/or department (examples) are now associated with the Account Code/CUST ID.
- **Download Functionality:** Header information is included in all downloaded files. Downloads are created in an EXCEL format (excel is limited to 65,536 rows).
- **Summary Report Options:** The Summary feature allows users to select a "summary" report for print only. The summary will generate totals at the Account,

CUST or hierarchy level, omitting the details of the transactions. Detailed transactions reports can still be generated in print or file format.

Ad Hoc /Customizing reports can be generated via the web by our customers by selecting the data fields listed. Once fields are selected, name the record/report and save template for future needs for this report or select frequency of when you would like the report to run and the time you want it to run.

The following is a screen shot of the queries available on Report Builder

1. **Cardholder Activity** – Corporate: Transaction detail by cardholder including product information, prompting data, odometer, and vehicle data.

2. **Cardholder Activity** – Fleet: Transaction detail by cardholder including product information, prompting data, odometer, and vehicle data.

3. **Cardholder Activity Report** – General: This report provides a “one line” transaction recap by card. Basic line item detail is provided including transaction date, merchant name, product and line item detail. The report “breaks” by card.

4. **Cardholder Usage Report** – General: This report provides a “one line” transaction recap by card. Basic line item detail is provided including transaction date, merchant name, product and line item detail and the shipping address for the cards. The report “breaks” by card. Card numbers are truncated on the report, so only the last 4-digits are viewed.

5. **Cardholder Group Summary**- Displays purchasing totals by MCC Grouping (spend category). MCC Groups include Maintenance, Hotels, Rentals, Airline, Travel Miscellaneous, Restaurants, Business Services, Financial Services, Medical and Miscellaneous. The report is sorted by Card, with a secondary sort by CUST ID.

6. **Card List Report**- This report displays all Comdata MasterCard's queried by active, blocked or both card types. Reports can be sorted by card number, department number, last name, last activity, etc.
7. **Exception Listing**- Displays transactions are deemed "exceptions" based upon the exception parameters are established by the customer. Exceptions include high costs, after-hours/weekend purchasing, multiple purchases per day and transaction limits exceeded.
8. **Exception Tracking Interface**- Provides an interface for review of exceptions, tracking comments and escalation procedures to be interfaced with customer database and tracking system.
9. **Fuel and Maintenance MCC Report**- Transaction detail, including card, vehicle, product and line item information sorted by Fuel and Maintenance MCC Groups.
10. **GL Codes Listing**- Displays all transaction activity by GL Code. To use this report, the customer must use the GL coding process featured within the BusinessLink option. Customer GL codes must be uploaded into the online system and transactions coded for report display.
11. **ID Report**- Report subtotals transactions for each vehicle by the ID number provided at the point-of-sale. Transactions are sorted by Merchant Category Code (MCC) and provide a summary by merchant for each MCC where the transaction occurred. Customer prompts for ID/Trip uses this report.
12. **MCC Summary**- This report summarizes Comdata MasterCard purchases by MCC Code. MasterCard places merchants into different Merchant Category Codes (MCC) based on their business type.
13. **MPG Report**- This report calculates each vehicle's Miles Per Gallon (MPG) and Cents Per Mile (CPM), based upon the fueling data and odometer information collected at the point of sale.
14. **Product Summary**- This report summarizes all purchases by product description.
15. **Merchant Location Activity Report**- Report summarizes transaction data by individual merchant and chain.
16. **Temporary Virtual Card Listing**- This listing provides detailed data on virtual cards issued, cards used, and cards unused.
17. **Transaction Listing** Transaction listing displays Comdata MasterCard purchases for the date range specified, including transaction and line item detail. The report is similar to the Cardholder Activity and Vehicle Reports.
18. **Vehicle Listing**- This report provides detail of vehicles within an Account Code and/or Customer ID, with the corresponding Vehicle Description, Miscellaneous 1 and Miscellaneous 2 fields, with the option to define primary and secondary sorting.
19. **Vehicle Report**- Transaction detail by vehicle including product information, prompting data, odometer, vehicle and driver data.

Comdata will work with the State of West Virginia during implementation to structure the reporting to the State's specific needs. See Appendix 9 for sample reports.

3.2.2.2 Provide training as required for full understanding and utilization of reports and analysis of operating costs and costs trends.

Comdata Response

Training

During the Implementations phase, Comdata will develop a Training Plan for the State of West Virginia that addresses your specific training needs.

MODES OF TRAINING

Training will be provided using various methodologies and delivery channels including:

- Instructor Led Training (ILT) - on site and Web-based conference calls with live facilitators
- Printed (hard-copy) training materials
- Self-paced training using online courses

Comdata's experience shows that a combination of training methods works most effectively, as determined in conjunction with the customer's needs. For example, we have successfully used the following training plans:

- State of Florida – Multiple on-site training sessions for specific state agencies rolling out the fuel card program initially. This was followed by numerous web cast sessions.
- State of Texas - All training for Texas agencies was conducted via web cast. Texas had the largest attendance of web users due to the size of state agencies and number of iConnectData users.
- State of Montana - All training for Montana agencies was conducted via web cast.
- State of West Virginia - All training for West Virginia agencies was conducted via web cast

TRAINING CURRICULUM

Program Administrator's training will include the following components:

- How does the Comdata MasterCard fleet card program work
- How to build your account to meet your needs
- Basic card functionality: a) driver card vs. vehicle card, b) prompting, c) profiles, d) exception limits and tracking
- How to use the card at the point of sale device (provide instructions and pictures)
- Card maintenance: a) add a card, b) edit a card, c) replace a card
- Report Builder: a) reporting options and functionality, b) reporting issues with merchants

- **Real-Time Transaction History:** a) real-time authorizations and declines, b) decline reasons in real-time to assist with cardholder issues
- **Invoicing:** Net billing.

TRAINING MATERIALS

Comdata understands the importance of effective training. The material in our training library was developed by card experts and training professionals and is updated regularly based on customer feedback.

FLEET SPECIFIC GUIDES:

Comdata will provide a Merchant Network Guide with these enhancements:

- **Service stations and maintenance locations providing level II and level III data**
- **Merchants that provide discounts to Comdata fleet card users**
- **Online Smart Buy guide to locations with the lowest fuel prices**

CARD USE INSTRUCTIONS FOR FLEET

Comdata currently provides customers with step by step guides, such as the ones described in the RFP. We have found that, due to the complexities of prompts at the pump, detailed training guidance is required to ensure drivers enter the right information. By following these procedures, drivers will reduce or eliminate transactions that fail at the pump.

Comdata's e-learning tool can help users understand how to use the Comdata MasterCard Fleet card. In response to customer requests, we provide a handy guide to train drivers on features and functionality of the Comdata Fleet Card. Card instructions outline:

- **Cardholder responsibilities**
- **Authorized uses for the card**
- **Toll Free or collect-call customer service numbers**
- **How to use numeric key pads at fuel pumps and cash registers with PIN pads to enter driver or vehicle ID or odometer reading**

Comdata has assigned Brian Truman as account manager who will be responsible to provide quarterly reviews with the state to identify issues, trends and ways for greater savings. Brian will start the review process and identify savings opportunities with the first review upon award of the RFP.

3.2.2.3 All reports must be mathematically correct. Rounding of individual costs and/or totals is not acceptable.

Comdata Response

Reports produced by Comdata would have two and three decimal place numbers. For example Quantity would be 17.35 gallons or the Cost fields would be \$179.29 and the example of three digit number would be for Price per Unit of \$1.799.

3.2.2.4 Provide on-line computer access (viewing only) for expense information. Estimated number of view-only users is approximately one hundred (100).

Comdata Response

Comdata's online product, www.icconnectdata.com provides the State with real-time features and access. Comdata's Account Services option enables users to perform basic account and card maintenance activities such as card ordering, card blocking and vehicle/ID modifications.

The following services are available:

- **Cardholder Card Maintenance:** This function allows a user to add new employee cardholders and edit existing cardholder information, such as the status of the card.
- **Vehicle Card Maintenance:** This function allows a user to add new vehicle cardholders and edit existing vehicle card information, such as status of the card.
- **Cardholder Replacement Card:** This function allows a user to replace an existing cardholder card with a new card.
- **Vehicle Replacement Card:** This function allows a user to replace an existing vehicle card with a new card.
- **ID Number Maintenance:** This function allows a user to add, edit and delete Driver ID numbers.
- **Vehicle Maintenance:** This function allows a user to add, edit and delete vehicle information.
- **User Profile:** This function allows an authorized user to add, edit and delete his/her profile for on-line account access to www.icconnectdata.com.
- **Change Address:** This function allows an authorized user to change invoice and physical address information about your account.
- **Invoicing:** This function allows an authorized user to pull up their current invoice and then print it off as a pdf document if they need a hardcopy paper version.

Comdata also has a "one-time" override capability online allowing an authorized user to "open" all restrictions on a card for a one-time purchase for a particular dollar amount. Once the purchase is made, the original cards restrictions are automatically reset on the card. This is done in real time.

3.2.3 Management/Administration

3.2.3.1 The vendor shall send key personnel as identified by Fleet Management Office at no additional cost to visit designed agency representatives upon request. No more than four (4) half day visits will be required during the contract period.

Comdata Response

Comdata has assigned Brian Truman as account manager who will be responsible to provide quarterly reviews with the State to identify issues, trends and ways for greater savings. Brian will start the review process and identify savings opportunities with the first review upon award of the RFP.

A quarterly account review will be scheduled to review fueling trends, discuss cost savings opportunities, benchmarking, and to review the completion status of the project plan

The account review consists of 16 pages of data. The data is a rolling 13-month review of data consisting of the following reports: Portfolio summary, spend report, gallon report, fuel type usage snapshot, premium fuel gasoline, non-fuel spend snapshot, average price per gallon (gas and diesel), transaction report, activation report, brand report (gasoline, diesel and maintenance), and the opportunity report by driver.

Brian will bring those key personnel as identified by Fleet Management Office to any visit as requested.

Others involved with the State of West Virginia will be the following:

Customer Relationship Manager

A Customer Relationship Manager (CRM) Amber Dorton, will oversee support and training for the State of West Virginia and be the State's primary contact. The CRM helps you further design and support your program objectives and coordinates the resources you will need during the tenure of your program.

During normal business hours, the State's first contact point for customer service is their designated Customer Relations Representative on the Customer Relations team which is Amber Dorton. Should there be a time when the designated CRR is busy, calls are routed to another Customer Relations team member. If all Public Sector support team members are busy, calls are automatically routed to our 24 hour customer service representatives. These associates are available 24/7/365 and are the same service team that handles cardholder calls.

Camille Boutwell

Camille is a Project Implementation Manager and has successfully managed the implementation of various large private and public sector accounts including the State of West Virginia. She has also led initiatives to on-board many downstream public sector accounts related to the state contract. As the Implementation Project Manager, Camille has provided end to end direction from account setup and data capture to full rollout. During implementations, Camille initiates quality assurance checks on invoicing and transaction data including the exemption of applicable taxes. Camille is involved in all facets of the customer implementation plan and has successfully incorporated project management methodologies to the implementations resulting in clear communication and increased customer satisfaction.

Ricky Johnston

Ricky Johnston is an account coordinator and will oversee customer service on a daily basis once the account has been implemented. Ricky will also be involved in the implementation from the beginning so he will be associated with the entire process for the State of West Virginia account. Ricky Johnston began his career at Comdata in October 1980 and has held a variety of roles, all revolving around supporting customers. Ricky has extensive knowledge of Comdata MasterCard products, particularly MasterCard Fleet. Ricky has experience implementing large fleet accounts and was the core support representative for the State of Florida, Coca-Cola Enterprises and Pepsi and Frito Lay all large fleets with vehicles numbering greater than 20,000. Ricky is located in our corporate office in Brentwood, TN.

3.2.3.2 Participate at Fleet Management Office's request, (with proper advance notice) at seminars to educate drivers/Fleet customers on program requirements in West Virginia at no additional cost to the state. Maximum participation will not exceed two per year.

Comdata Response

Brian Truman as the account manager would look forward to participating in seminars to educate drivers/Fleet customers on program requirements at no cost to the state.

3.2.3.3 Provide capability for Fleet Management and designee to interact online with vendor for ordering, inquiry, information updating and reporting purposes. The estimated number of interactive users is approximately ten (10).

Comdata Response

Comdata's online product, www.iconnectdata.com provides the State with real-time features and access. Comdata's Account Services option enables users to perform basic account and card maintenance activities such as card ordering, card blocking and vehicle/ID modifications.

The following services are available:

- **Cardholder Card Maintenance:** This function allows a user to add new employee cardholders and edit existing cardholder information, such as the status of the card.
- **Vehicle Card Maintenance:** This function allows a user to add new vehicle cardholders and edit existing vehicle card information, such as status of the card.
- **Cardholder Replacement Card:** This function allows a user to replace an existing cardholder card with a new card.
- **Vehicle Replacement Card:** This function allows a user to replace an existing vehicle card with a new card.
- **ID Number Maintenance:** This function allows a user to add, edit and delete Driver ID numbers.
- **Vehicle Maintenance:** This function allows a user to add, edit and delete vehicle information.
- **User Profile:** This function allows an authorized user to add, edit and delete his/her profile for on-line account access to www.iconnectdata.com.
- **Change Address:** This function allows an authorized user to change invoice and physical address information about your account.

- **Reporting:** This function allows an authorized user to generate standard reports and also customize reports of recent cardholder activity.

Comdata also has a “one-time” override capability online allowing an authorized user to “open” all restrictions on a card for a one-time purchase for a particular dollar amount. Once the purchase is made, the original card's restrictions are automatically reset on the card. This is done in real time.

3.2.3.4 Allow Fleet Management Office to periodically visit the vendor to verify/review the program in operation.

Comdata Response

Based upon our experiences with similar government entities and private sector customers, we would welcome the opportunity to meet with you at our Brentwood, TN office to discuss the program in greater detail. If you wish to arrange such a meeting or have questions about our response please feel free to contact Brian Truman at 615-370-7663.

3.2.4 Vendor Capability and Stability

3.2.4.1 The vendor must have at least three (3) years of experience providing similar maintenance management services for a wide variety of vehicles at high volume levels (minimum of 1,000 vehicles per fleet).

Comdata Response

For nearly four decades, Comdata has been at the forefront of payment innovations. Comdata pioneered the concept of electronic payments for transportation, and in the process launched the Comdata Card - a payment solution that helped drive an industry. Comdata provides custom solutions for a wide range of industries such as transportation, retail, government services, aviation, construction, service businesses, restaurants and hospitality.

Comdata serves more than one million cardholders, transfers more than \$30 billion in funds annually for more than 25,000 fleet customers who employ more than one million professional drivers. Comdata's fueling network is the largest in North America. Comdata's philosophy involves listening to our customers' needs to enhance their core business, enabling them to cut costs and improve efficiencies while ensuring authorization and authentication according to each individual business' rules. Moving beyond the transportation industry with our core competency of enabling business through "trust-enabled" protocols we have taken payment innovation to new levels earning the business of multi-billion dollar corporations for multiple areas of spend including T&E, Purchasing and fleet-related expenditures.

Over the past five years Comdata has experienced double-digit revenue and bottom-line growth. During this timeframe, Comdata has earned the business of five of the top 10 U.S. fleets as ranked by Automotive Fleet and secured contracts with nine state governments. As a MasterCard branded product, Cardholders have true universal acceptance of the MasterCard product with enhanced security and data capture features. The card may also be used in Comdata's proprietary truck stop network (8,000 truck stops and over 1,700 diesel discount locations nationally).

Comdata Best Practices

Best practices are innovations that the State of West Virginia can readily incorporate into their card program. In the pages that follow, the Comdata Team describes best practices that are currently saving customers millions of dollars a year through reductions in cost and labor and improvements in quality.

Comdata Fleet Card Best Practices

Comdata has developed best practices based on its experience providing fleet cards to customers throughout the public and private sectors.

Comdata Best Practice 1: Driver Training

Beneficiary: Multiple government and commercial organizations

E-Learning is an audio tutorial that walks the driver through each module of IConnectData.com, our Internet-based, desktop management tool for account management, reporting, and real-time tools. With E-Learning the fleet manager can receive a list of E-Learning participants, modules completed, duration for completion of each module. E-Learning also incorporates a test at the end of each module.

Results

The fleet manager can read the score of each driver, determine individual areas that need improvement and schedule retests.

Comdata Best Practice 2: Fleet Card For Immediate Access To Authorization Information
Beneficiary: Multiple government and commercial organizations

Before Real-Time Authorization was available to fleet managers, they might have to wait as much as 72 hours to learn the reason for a rejected transaction. In many instances, the problem was the driver having entered an incorrect PIN. With Real-Time Authorization, the fleet manager can see in real time why a transaction was rejected and call the driver while he or she is at the station, and provide the correct PIN. See Appendix 10 for sample screen shots of Real-Time Transaction history.

Results

Because fleet managers can view approval and rejection of fueling transactions in real-time and take immediate corrective action, the organization saves time that would have been expended in calls to customer service and delays getting vehicles refueled.

Comdata Best Practice 3: Fleet Card to Identify Inappropriate Spending Patterns
Beneficiary: Multiple government and commercial organizations

Daily Exception Reports were developed to give customers timely access to transaction information. During the course of the day, Comdata gathers data on any transaction that falls outside customer-defined parameters. The data is encapsulated in an Excel file, and a Daily Exception Report is emailed to the fleet manager at close of business.

Results

In addition to enabling fleet managers to take prompt corrective action for an individual transaction, these reports provide data that can be used to formulate more strategic changes, such as spending controls by MCC or individual supplier.

Comdata Best Practice 4: Fleet Card Access to Current Fuel Costs
Beneficiary: Multiple government and commercial organizations

Teaming with OPIS (Oil Price Information Service), Comdata developed a real-time online product guide called Smart Buy. Fleet managers can use the information on Smart Buy to find service stations with the best prices and use that information to establish price benchmarks. Search options allow managers and drivers to determine stations with the best prices in specific locations and along planned travel routes.

Smart Buy also calculates rack-to-retail margins for each location, providing fleet managers with valuable data to negotiate discounts with chains and individual stations. See Appendix 11 for screen shots of Smart Buy.

Results

Fleet managers report Smart Buy has led to savings of 1.5 to 2 cents per gallon for gasoline and diesel.

Other Distinguishing Benefits to Manage Fleet Costs

Some other advantages that will help reduce the State's fleet costs include these following areas:

CARD ACCEPTANCE

1. Better rural coverage and merchant relations because:
 - a. Merchant fees are about half of the competitor's proprietary card
 - b. Most widely accepted business-to-business card worldwide
 - c. Merchant receives full settlement for the transaction as the Comdata Team applies for the taxes instead of the station or wholesaler
2. Card is universally accepted for all fuel products, enhancing the State 's ability to purchase alternative fuels, such as E85 and Bio-diesel
3. Card is widely accepted at Marina and Aviation locations thus no need for carrying multiple cards
4. Card is accepted in Canada and Mexico, thus precluding the need for dual cards or programs
5. The State can use the same card for Retail fuel as well as Bulk, On-site and Mobile fueling and receive one invoice.

MAINTENANCE PURCHASES

1. Card is widely accepted at maintenance and non-fuel locations and may be used for all fleet related purchases such as car washes, oil changes, tires, auto parts and service merchants, etc.
2. Comdata has the ability to pass data from maintenance locations for comprehensive reporting of service, parts and labor provided.
3. The Comdata card can be used as a "virtual card" for expenditures.

TAX EXEMPTION

1. Federal Excise Tax on diesel is exempted at the transaction level, not posted as a lump sum credit in the month following
2. Fuel taxes are exempted at accepting merchants including independent fuel merchants who pass the proper data.
3. The Comdata Team files for the refund, the wholesaler and merchant are not burdened with the task of documenting and filing for each tax exempt sale

ACCOUNT AND DATA MANAGEMENT TOOLS

1. Smart Buy-- an online tool showing the least expensive retail and wholesale pricing, in real-time, across the state and the country
2. Ability to view transactions and authorizations in real-time without having to wait 48-72 hours for a transaction to post, and immediately determine if a driver enters the wrong PIN number, swipes the card incorrectly, has exceeded limits, etc.
3. Comprehensive data capture and reporting for both vehicle cards and driver cards
4. Can interface with mobile re-fuelers to capture data from fueling at remote locations
5. Technical services support provided to "map" transaction data directly into fleet management software
6. Ability to assign General Ledger coding to transactions and map the corresponding data to the agency's financial system
7. Comdata provides 15 levels of Hierarchy and reporting

CONTROLS

1. Cards can be reassigned/moved without having to reissue plastic
2. Pre-determined controls/purchase profiles may be assigned to a single card or an entire fleet
3. Controls allow for a one-time override with automatic reset to previous levels

4. Both soft-limits and hard-limits may be applied on the same card
5. All authorizations and transactions—on-site and retail—are processed internally by Comdata for greater control and more accurate data capture.
6. Comdata process all transactions internally providing more control and accurate data.

FINANCIAL INCENTIVES

1. Signing bonus based on the total spend history for the State.
2. Early pay incentives for payments made based on several options.
3. Discounts at a network of conveniently located commercial locations and travel plazas throughout the state and entire country.

MERCHANT FRIENDLY PROGRAM

Less Interchange Rate - Comdata offers a greater economic benefit to the State through an interchange rate that is nearly half of the rate charged by our competitors' proprietary card acceptance. This provides for better merchant relations with the State and allows for the State's volume to leverage strategic supplier discounts. The Comdata MasterCard rate to merchants is reduced.

Merchant Tax Participation - Merchants receive full settlement for the transaction as the Comdata Team applies for the taxes instead of the merchant or the State. Comdata does not burden the marketer with applying for the taxes the state is exempt from therefore merchants don't have to opt in or out of our tax program. Since the Comdata team applies for the tax refund all level III transactions are exempted and require no involvement of the merchant or the State. This allows for greater participation.

3.2.4.2 Vendors must provide five (5) customer references, from private or government organizations for which similar services have been provided. The references must substantiate the requirement listed at 3.2.4.1. The reference should contain at a minimum: the names of the organization, mailing address, a contact person and telephone number.

Comdata Response

VENDOR REFERENCE #1

FIRM NAME: State of Florida
ADDRESS: 4050 Esplanade Way Tallahassee, Florida 32399
CONTACT PERSON: David Bennett
POSITION TITLE: Contract Manager
TELEPHONE NUMBER: 850-921-4072

VENDOR REFERENCE #2

FIRM NAME: State of Texas
ADDRESS: 1711 San Jacinto Austin, TX 78711
CONTACT PERSON: John Dechene
POSITION TITLE: Contract Analyst

TELEPHONE NUMBER: 770-989-3361

VENDOR REFERENCE #4

FIRM NAME: Federal Express
ADDRESS: 30 FedEx Parkway 1st FL Vertical Collierville, TN 38017
CONTACT PERSON: Cheryl Yates
POSITION TITLE: Fuel Administrator
TELEPHONE NUMBER: 901-263-4355

VENDOR REFERENCE #5

FIRM NAME: State of Oklahoma
ADDRESS: 2401 N. Lincoln Suite 116 Oklahoma City, OK 73152
CONTACT PERSON: Theresa Johnson
POSITION TITLE: Contract Manager
TELEPHONE NUMBER: 405-521-2289

Comdata has numerous customers of similar size but and has provided the above three references for the State's review.

- 3.2.4.3 All use of subcontractors must be specifically identified in the vendor's proposal and the prime contractor must describe the type of contractual arrangement that will exist will all subcontractors. All subcontractors must have at least two (2) years of experience in the services they are providing. (see 3.4.9)

Comdata Response

Mansfield Oil located at 1025 Airport Parkway, SW Gainesville, GA 30501 will be a subcontractor for Comdata. Mansfield aids Comdata in the Invoice, Reporting, Tax Removal and Tax Form preparation process however the State will pay directly to Comdata. All other services are performed by Comdata.

Done

The Fuel Product Summary will summarize all fuel purchases by fuel type and then by date range.

The screenshot shows a Microsoft Internet Explorer browser window displaying a report from Comdata. The browser's address bar shows the URL: <https://www.icomnectdata.com/icomnectdata/reportbuilder.nsf>. The browser's menu bar includes File, Edit, View, Favorites, Tools, and Help. The browser's toolbar includes Back, Forward, Stop, Refresh, Home, Search, Favorites, History, Mail, Print, and Edit. The browser's status bar shows the address: <https://www.icomnectdata.com/icomnectdata/reportbuilder.nsf>.

The report page has a header with the Comdata logo and the text "COMDATA A Centex Company". Below the logo is the text "Reporting". The main heading of the report is "Comdata Accounts Reports Module Account Reporting and Invoices". The report title is "Comchek MasterCard Non-fuel Product Summary". The report is dated "From 6/1/2002 to 6/10/2002" and was "Produced Tuesday 6/11/2002 1:03:50PM". The report is for "Acct Code: QY001" and "Cust ID: All".

The report content is as follows:

Product Description	Units/Gallons	Total cost
Cust ID: 27591		
Motor Oil	4.00	4.92
Summary 1 Records	4.00	4.92
Cust ID: 27595		
Motor Oil	21.00	23.66
CDN Fee	12.00	-185.28
Summary 17 Records	33.00	-161.62
Cust ID: 27597		
Motor Oil	10.00	13.24

The browser's status bar shows "Done" and "Internet".

The Non-fuel Product Summary will summarize all non-fuel purchases by date range.

The screenshot shows a Microsoft Internet Explorer browser window displaying a report from the Comdata Accounts Reports Module. The browser's address bar shows the URL: <https://www.icomnectdata.com/icomnectdata/reportbuilder.nsf>. The browser's menu bar includes File, Edit, View, Favorites, Tools, and Help. The toolbar contains icons for Back, Forward, Stop, Refresh, Home, Search, Favorites, History, Mail, Print, and Edit. The browser's status bar shows the address: <https://www.icomnectdata.com/icomnectdata/reportbuilder.nsf>.

The report page features the Comdata logo and the text "A Centel Company". The main heading is "Comdata Accounts Reports Module Account Reporting and Invoices". The report title is "Comchek MasterCard MPG Report". The report is produced on Thursday, 6/13/2002, at 9:36:51 AM, covering the period from 6/1/2002 to 6/13/2002. The report includes the following data:

Unit #	Mpg	Cur Hub	Cost/Mile	Gallons	Trans Date	Card #	Driver #	ID #	Merch Name	City	Account Code:	Customer ID
1	0.00	0	\$0.00	50.00	6/3/2002	1519182440	1		CHANEY'S TS	B'WOOD

Using the Smart Buy Fuel System

This system is easy to use with only three screens:

- On the initial search options screen,

Smart Buy Fuel System

find the best priced stations, negotiate discounts and benchmark your purchases

The screenshot shows a search interface titled "SEARCH". It includes a "State:" dropdown menu with "Select a state" as the placeholder, a "City:" dropdown menu with "Select a city" as the placeholder, and an "Or Zip Code:" text input field. Below these are two sections: "FUEL TYPE" with radio buttons for "Gasoline" (selected) and "Diesel", and "SEARCH AREA" with radio buttons for "3 mile", "5 mile" (selected), and "10 mile". A "Search" button is located to the right of the search area options.

- Select a state and city or a zip code.
 - Select the fuel type - gasoline or diesel
 - Select the search area - 3, 5 or 10 miles
- On the search result screen, you can

Smart Buy Fuel System

find the best priced stations, negotiate discounts and benchmark your purchases

- Use the map "zoom in/out" feature if you want to change the view.
- Click the name of a station in the table below the map to view the station details.
- Click any column heading in the station list to sort differently.
- Enter different search options for another search.
- On the station detail screen, you can

Significant Automotive Industry News of Particular Interest to Fleet Management Executives

The Fleet Spot

This Week: **Brian Truman**

Brian Truman
VP of Public Sector
Comdata Corporation

btruman@comdata.com

Brian Truman is Vice President of Public Sector for Comdata Corporation. Brian has over 17 years of experience in the fleet card industry with 16 years strictly dedicated to government accounts. He has vast experience with all facets of the government process from sales, implementation to account management. Brian has been involved in several of the organizations involved with governments and is a regular attendee at the National Association of State Procurement Officials (NASPO) conference and the National Conference of State Fleet Administrators (NCSFA) conference and has been a presenter and on panel discussions.

Comdata is known for its managed payment technologies. Could you give us an update on how Comdata is positioning itself now for the entire fleet market and particularly for state and local government?

A top priority for Comdata is helping companies reduce their fuel costs. There are many ways Comdata provides value with helping fleets in managing/reducing their price of fuel. We offer solutions like Smart Buy, a fuel stop locator, an extensive fuel discount network, etc. We also, provide real-time reporting that detects abuse and fraud in real-time. We have emergency fueling solutions which is important, especially in areas like Florida or Texas. Those are some of the key benefits and some of the areas where we really see ourselves focusing.

Does emergency fueling mean situations where fuel is not available?

That is correct. For example, when hurricanes hit, Comdata can help provide solutions to find fuel for first responders, if needed. We make sure that state tanks are topped off before a hurricane comes. We also provide assistance with fuel, whether it is by our mobile refuelers that we contract with or with other partners, to make sure that fuel is available for first responders.

Interesting you should mention pricing structure and

fuel purchasing economics. Is this something that you've always done? You are not involved with futures are you? How does this pricing structure work?

No, we are not involved in futures. Comdata has been helping fleets manage their fuel cost for almost 40 years. Comdata has currently developed a consortium with our largest fleets in the private sector that we leverage to provide discounts. We take all of their gallons collectively and approached different marketers or oil companies to get discounts. This now includes over 30,000 sites.

So the client, whether it is a public sector fleet or a private commercial enterprise, purchases the fuel at the pump price using your payment processing system – you card – and when it comes in, then you off-set that cost with some sort of a discount program that you've got?

Correct. Based on our agreement with the contracted marketer, we provide the fleet a discount. We also provide back to the marketer a monthly report showing the number of gallons from our fleets. That is the key to making the discount program effective. Some of our fleets are able to work with their drivers, change behavior and drive those fleets into those stations. That marketer is then also realizing more gallons sold, which makes them more readily willing to offer the discount.

What do you call it?

The Comdata Fuel Consortium. This discount program was devised as a consortium of our largest fleets and consolidating their gallons for buying power. All of our fleets enjoy the benefits of the CFC.

You suggested that you actually help your clients find service station outlets that have discounted gasoline prices?

Comdata's SmartBuy Fuel Locator is an online fuel saving device that quickly locates the best fuel prices within a designated area. This searchable database provides pricing for regular unleaded gasoline and diesel fuel at retail and truck stop locations throughout the United States. Specify a designated mile radius and the tool will generate a list of nearby retail locations with prices ranked and displayed along with an easy-to-read road map. Those locations offering a fuel discount will also be highlighted within your search results. Plus, using a cell phone or an approved communication device, your drivers can press a button to locate the best fuel price and directions to that location real-time, while they are on the road.

Beyond your normal fueling credit card processing system, what other business credit card services are you providing?

Many of our customers use Comdata not only for fuel, but also for maintenance, purchasing, virtual, and T&E. Many customers use Comdata's Pay Card Solution to pay their employees instead of paper checks or direct deposit. The public sector mainly uses it for retail fuel, onsite fueling and maintenance.

What is it about Comdata that is different or separates you from Voyager or Wright Express?

Comdata can help companies consolidate and control all of their fuel and maintenance expenses with best-in-class personalized service. Three key areas of differentiation are: real-time controls and reporting; best in class customer service and guaranteed savings via our discount network. We also provide a one-card solution for all fleet needs. Additionally, the Comdata MasterCard is accepted at @600,000 fuel and maintenance locations plus universally accepted at more than 25 million locations worldwide.

The state and municipal governments are outsourcing a lot of these services these days. What is the principle service or approach that you have in terms of state fleets?

Comdata provides more than just a retail fuel card – we offer a whole fuel management solution.

Comdata helps fleets realize cost savings and efficiencies by consolidating all fueling sources – diesel, gasoline, unattended stations, bulk, mobile fueling – into one system. Our customers receive the lowest posted fuel discounts through the largest fuel discount network. As mentioned previously, Comdata's online fuel saving solution, Smart Buy Fuel Locator, quickly locates the best fuel prices within a designated area.

Some of our government sector customers use our card for retail and onsite locations. Some pay for fuel on a consignment basis, meaning that they pay for it as they use it – not in a full bulk drop.

Your credit cards would enable a state fleet, for example, to purchase E85 and any outlet that has alternative fuel, your card would cover it?

That is correct, whether it is E85 or CNG or propane.
