RE: Expression of Interest for Architectural and Engineering Services  
State Office Building – Clarksburg, West Virginia

Dear Ms. Ferrell and Members of the Selection Committee:

Perfido Weiskopf Wagstaff + Goettel (PWWG) is very pleased to submit our qualifications to provide Architectural and Engineering Services for the design of a new State Office Building in downtown Clarksburg, WV. We have carefully studied the RFQ, the site, and the surrounding context of downtown Clarksburg. As a result of these observations, we have outlined several potential approaches to the project within this submission that serve as examples of the open minded thinking we will bring to the project. In addition to these initial observations, the following factors also underscore the qualifications of our team:

- We are committed to assigning the most experienced, talented staff for this project. To that end, two of the three principals of the firm will have high levels of involvement in this project.
- We have composed a team of talented consultants, specifically selected for their suitability to this project. This includes the major involvement of firms located in West Virginia.
- We are committed to sustainable design principles. Your building will be evaluated and designed to achieve the appropriate LEED certification level that is in the best interest of the State of West Virginia.

It is well documented that design influences worker productivity and even long term health. Your project will be designed not only to achieve an enhanced working environment, but also to be a source of pride for the citizens of West Virginia. It would be an honor for us to once again be of service to the State of West Virginia and we look forward to the opportunity of an interview to discuss our insights for the Clarksburg State Office Building in greater detail.

Sincerely,

Alan Weiskopf, AIA  
Managing Principal
