**Addendum #1 - Questions During Pre-Bid Meeting
For DEP14704
Roaring Creek #4 Project**

- 1.) Q. Will it be necessary for the contractor to purchase soil cover material?
A. It is not necessary as there are potential soil borrow areas identified on the drawings. However, it is a possibility as the contractor is required to cover all areas to be revegetated with soil material capable of establishing vegetation. Most, but not all of the disturbed area is expected to require soil covering.
- 2.) Q. What if we go over on revegetation?
A. The contractor will be paid for the actual quantity of acres revegetated as long as the area that was disturbed was necessary to complete the reclamation work for the project.
- 3.) Q. Do we look for the tires or just clean up the ones we encounter?
A. The tires are located in a confined space as opposed to being scattered. So, if any tires are encountered in the reclamation process it won't involve any searching; their location will be evident and they cannot be ignored.
- 4.) Q. Is drainage control shown on the plans?
A. Yes.
- 5.) Q. Is the underdrain item on an as needed basis?
A. No. The installation of underdrain is part of the reclamation plan and shall be installed at the locations shown on the drawings.
- 6.) Q. Is the contractor responsible for keeping livestock off of the revegetated area?
A. The contractor is responsible for erecting temporary fence around the revegetated area. The landowner will be responsible for keeping his livestock outside the fenced area until the end of the one year warranty period.
- 7.) Q. Where is the nearest available area for soil cover material?
A. The potential soil borrow sites are shown on the plans within the construction limits.
- 8.) Q. Do we borrow only within the construction limits?
A. That is up to the contractor, but if he goes off-site then he is responsible for submitting a reclamation plan and obtaining his own right-of-entry agreement with the affected property owner.
- 9.) Q. Can you dig test holes before the bid?
A. Whatever you do before being awarded a contract is between you and the property owner. However, there is information provided in the specifications from the subsurface investigation that was conducted during design.

- 10) Q. Are all areas expected to get 9" of soil cover?
A. Not necessarily. Any areas cut to grade that are in material capable of sustaining vegetation do not require additional soil cover material. Just remember, the contractor is responsible for establishing vegetation on all disturbed area.
- 11) Q. What percent must be covered?
A. 85%.
- 12) Q. Will we be paid for whatever quantity we use for cover material?
A. No. The contractor will be paid per acre for the quantity of acres that he covers with 9" of soil cover material.
- 13) Q. Will livestock be allowed on the seeded areas before the one year warranty period is up?
A. As previously indicated, the answer is no.
- 14) Q. Have the soil borrow areas been drilled?
A. To the extent that is provided by the drill logs in the specifications.
- 15) Q. Will there be regrading over the gas line?
A. Not intentionally, but the gas line location shown is only approximate.
- 16) Q. Are all soil borrow areas located within the construction limits?
A. Yes.
- 17) Q. How many accesses are there to the site from the county road?
A. Two.
- 18) Q. Is any bedding required over the gasline?
A. If the contractor trams equipment across the gasline, the bedding requirements will be as dictated by the gas company.

The Contractor shall have 270 days from the Notice to Proceed to complete construction activities on the project. The \$250 per day liquidated damage clause will be in effect after the 60 days. However, the total performance period will be 365 days from the date of the Notice to Proceed for invoicing purposes.
