A&E Services for Keaton Branch Complex Design Project

DEP 14945

Dear Mr. Bowman:

Please accept this letter and the enclosed Statement of Qualifications as Randolph Engineering's expression of interest to provide professional consulting engineering services for the design of stabilization measures for the Keaton Branch Complex Project in Raleigh County, West Virginia.

Randolph Engineering has successfully completed numerous projects for the WVDOT, U.S. General Services Administration as well as our private and municipal clients with a focus on quality, cost and schedule. We have extensive experience in earthmoving, storm water analysis, site development and construction administration projects throughout West Virginia. This experience gives us a unique insight into a project of this scope and complexity.

We have developed a reputation for providing our clients with innovative solutions for unique and challenging projects. From fast track schedules and restrictive budgets to complex engineering problems we strive to deliver the project in a manner that exceeds our clients' expectations.

We attempted to review the project area for our project understanding and review section and to take photos of the site, but due to heavy snow fall in recent weeks we were unable to reach the site after multiple attempts.

We appreciate your consideration of our qualifications as a candidate for selection to provide consulting engineering services and look forward further outlining our qualifications during the interview process.

Sincerely Yours, Randolph Engineering

Edward L. Mitchell

section 2 TECHNICAL PROPOSAL

INTRODUCTION TO RANDOLPH ENGINEERING

Randolph Engineering is a multi-disciplined consulting engineering firm in Teays Valley, West Virginia. The company recently celebrated 30 years of providing innovative engineering solutions to a variety of clients ranging from municipalities and government agencies to private land developers.

Randolph's success is the result of outstanding client service and satisfaction.

Our history

The company was founded by Roger Randolph in 1976, and from a modest beginning has grown into an award-winning regional engineering firm. Our attention to detail and commitment to client satisfaction have generated repeat and referral clients, some of whom have been with us since our inception.

Roger Randolph is an experienced Project Manager and lead engineer for a variety of municipal, stormwater, structural and land development projects. His wealth of knowledge and experience is a valuable asset to the company's next generation of engineers and designers.

Building on success

Randolph Engineering is situated in one of West Virginia's fastest-growing areas – a location that has afforded the opportunity to diversify into a full-service engineering firm. We offer an array of services including transportation engineering; municipal engineering; land development and surveying; structural engineering; building engineering; and construction engineering.

One of our keys to success is the reliability and stability provided by our employees' loyalty and longevity. Many of our staff members have been with Randolph for more than 25 years, with a number of others approaching that milestone.

Our projects

Our variety of clients and engineering projects creates interesting and unique challenges for the engineers and designers at Randolph Engineering. Some of our notable projects include the award-winning Jackson's Mill Bridge for the West Virginia Division of Highways; site improvements and plant expansions for Toyota Motor Manufacturing; complete renovation and expansion of the City of Hurricane wastewater treatment plant; land development for some of the largest retailers in the United States; and site designs for large, single- and multi-family residential subdivisions, townhouses and apartment complexes, including a 250-unit gated community near Charleston, W.Va.

Looking to the future

Successful projects such as these and an unending commitment to client satisfaction paint a bright picture for our future. We look forward to more engineering challenges and continued growth while working with you and the AML Program.

GENERAL EXPERIENCE, CAPABILITIES AND SERVICES

We have successfully completed numerous projects for local municipalities as well as private clients that encompass most of the tasks required for this work. Two of our most recent projects include the Storm Water Analysis for Toyota Motor Manufacturing and the Town of Buffalo Storm Water Outfall project. Both of these projects posed significant challenges for the design team including flat terrain, archaeological sites, erosion control and restrictive right-of-way.

In addition to these two notable stormwater projects, we have more than 30 years of experience in various engineering disciplines.

Randolph Engineering offers the following services:

- Civil Engineering
- Hydrologic and Hydraulic Engineering
- Stormwater Management
- Construction Administration
- Construction Monitoring
- Water Distribution & Treatment Engineering
- Wastewater Collection & Treatment Engineering
- Land Use Planning
- 404 Permit Preparation
- CADD Services
- Sediment & Erosion Control Plans
- Feasibility Studies
- Foundation Design
- Structural Engineering
- Surveying & Mapping
- Cost Estimating
- Construction Documents
- · Residential/Commercial and Industrial Site Engineering
- Wetland Investigation and Delineation
- Retaining Wall Design
- · Highway and Bridge Engineering

NOTABLE CLIENTS

Some of our more notable clients include:

- West Virginia Department of Highways
- West Virginia Division of Natural Resources
- West Virginia Housing Development Fund
- Toyota Motor Manufacturing of WV
- Town of Buffalo, WV
- Town of Winfield, WV
- The Fergus Companies
- AB Contracting and Development Co.
- Ahern Associates, Inc.
- Woolpert, Inc.
- Rite Aid Corporation
- Triad Engineering
- Clark Truck Parts, Inc.
- Hobet Mining Company
- Edward Tucker Architects
- J. Dan Snead and Associates
- Peerless Brick and Block Company
- Foster Supply Company
- Putnam County Commission
- Central Distributing Company
- Dow Chemical Company
- · Parkline, Inc.
- Teays River Construction Company
- Town of Bancroft
- Wiseman Construction Company
- Balanced Care Assisted Living Center
- Tri-State Hotels, Inc.
- Elkhorn Field Services, Inc.
- G&G Builders, Inc.
- Picerne Development Company
- Putnam P.S.D.
- City of Hurricane, WV

NOTABLE PROJECT EXPERIENCE

Some of the notable projects designed by Randolph Engineering include:

- Town of Buffalo Storm Water Outfall Project
- Toyota Motor Manufacturing Storm Water Analysis
- Poplar Fork Flood Mitigation Project
- Finney Branch Spillway Project
- Tackett's Branch Water Line Extension
- Morrison Hollow/Ranch Lake Estates Water Line Extension
- G&G/Massey Headquarters Sewer System
- Town of Bancroft Stormwater Improvements
- Hobet Mining Company Site and Warehouse Design
- City of Hurricane Raw Water Impoundment
- The Ridges Water & Sewer System Design
- Sahley Retaining Wall Replacement
- Red House Water Line Extension
- Eleanor Industrial Park Water Line Extension
- City of Hurricane Water Line Extension and Storage Tank
- Babcock State Park Wastewater Treatment Plant
- Pipestem State Park Wastewater Treatment Plant
- Sycamore Leachate Forcemain Line Project
- Sovine Road Water Line Extension Feasibility Study
- Tackett's Branch Sanitary Sewer Line Extension Feasibility Study
- Peach Ridge Sanitary Sewer Line Extension Feasibility Study
- Old Orchard Sanitary Sewer Line Extension Feasibility Study
- Castlenock Subdivision Sanitary Sewer & Water System Extension
- Milton Apartments Sanitary Sewer & Water System Extension
- Milton Nursing Home Sanitary Sewer & Water System Extension
- ZDS Design/Consulting WV Capitol Survey
- Star Title Company ALTA Surveys
- AEP/John Amos Flyash Waste Site Quality Control Survey

Detailed descriptions of these projects can be found in Section 3 of this prospectus.

PROJECT OUTLINE

Randolph Engineering is familiar with the type of project for which you are seeking professional engineering services. We have a thorough understanding of the work to be provided for this remediation project.

We have carefully reviewed your Request for Expressions of Interest have developed the following project outline:

Existing Conditions

- Site is located near the Odd Post Office.
- The site consists of a highwall and mine portals that need reclaimed.
- The site is frequented by hunters, creating a fall danger.
- The area is heavily vegetated above the high wall.

PROJECT OVERVIEW

Randolph Engineering will provide the necessary professional civil engineering and related services to plan and construct a drainage system to alleviate the mine drainage issues at this site.

Drainage System

Provide design and construction plans for an diversion channels and underdrain and piping/manhole system and/or ditches to transport drainage.

Mine Seals

Provide details for the installation of two (2) wet mine seals including bat gates.

Reclaim Highwall

Provide grading plan to remove the highwall and grade site to a safe, stable slope.

Sediment and Erosion Control Plan

Provide plans and details for the control of construction related run-off.

Final Seeding and Mulching

Provide detailed information for the final seeding and re-vegetation of all areas disturbed during construction activities.

TECHNICAL APPROACH

Preliminary Plan Phase

During this phase Randolph Engineering will survey the site for the development of topographic mapping and the establishment of project control. An on-site meeting with WVDEP personnel will be necessary to set the limits of the project and verify the locations of the mine portals. Any subsurface investigation and water sampling will be performed during this phase. We propose to then provide a preliminary layout and design of the grading and drainage system for review and approval by WVDEP personnel.

Final Design Phase

Once the preliminary plan is approved by WVDEP personnel, Randolph will proceed to final detailed construction plans and specifications. This will consist of a detailed plan view of the site with grading contours and drainage items, profile and cross sections of the reclaimed highwall, drainage system and mine seal details, sediment and erosion control plans as well as final seeding and mulching information.

Bidding Phase

During this phase, if needed, Randolph will prepare and issue any Addenda and, as necessary, assist in the Bid Opening, tabulate and distribute the Bid Tabulation, provide a recommendation for Award of Contract and complete the Notice of Award for the WVDEP.

Construction Phase

During this phase, if needed, Randolph will provide Construction Administration services as required. This may include processing requests for payment, requests for information, conducting construction and/or progress meetings, construction monitoring, shop drawing review and project closeout.

RESOURCE ALLOCATION

Randolph Engineering, as with all of our clients, is committed to providing professional engineering services to the state of West Virginia. We will commit the required staff, equipment and materials to accomplish the goals set forth for this project in a timely and cost effective manner.

SCHEDULE AND BUDGET CONTROL

We have a long history of completing projects within budget and time constraints. With a large client base of private and public clients, schedules, budgets and fees can quickly become make-or-break issues with regard to the feasibility of a project. Our project managers are experienced and well versed in meeting project schedules with budget constraints in mind. Additionally, Randolph Engineering is a West Virginia licensed contractor. This gives us a unique insight into potential economies within a project that may benefit our clients.

CLOSING

We look forward to establishing a long term relationship with the WVDEP/AML beginning with the Keaton Branch Complex project. Our commitment is to provide quality service, client satisfaction, quick response to your needs and to exceed your expectations with regard to project delivery. We look forward to further discussing our qualifications during the interview process.

section 3 REPRESENTATIVE PROJECTS

Hydraulic Analysis - Dog Creek

Roane County, West Virginia

Client West Virginia Self Storage 1677 Grannies Creek Road Newton, West Virginia 25266 Contact Mr. Rusty Reed 304.746.2168

Nature of Work

WV Self Storage Company contracted with Randolph Engineering to perform a hydraulic analysis of Dog Creek to determine the 100-year base flood elevation referenced as Zone A in the FEMA Flood Insurance Rate Map (FIRM).

Additionally, Randolph Engineering determined the effects of placing earth fill in the flood plain. Using the software program "HEC-RAS" (Hydraulic Engineering Center - River Analysis System) and traditional survey information, we were able to evaluate the stream and determine the water surface elevation of the stream. This information was then used to determine the impact of proposed site improvements on the flow characteristics of the stream.

Surveying services included topographic field mapping and hydraulic cross sections for analysis purposes.

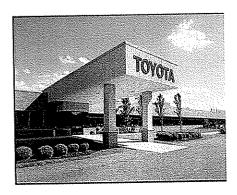

Key Personnel

Project Manager - Roger K. Randolph, P.E. Design Engineer - Jacob C. White, P.E.

Toyota of West Virginia – Storm Water Analysis

Putnam County, West Virginia

Client

Toyota Motor Manufacturing, WV, Inc 1 Sugar Maple Lane Buffalo, West Virginia 25033

Contact

Mr. Lyndon Jones 304.937.7299

Nature of Work

The goal of this project was to develop a baseline storm water analysis that would encompass the developed areas of the site including various plant expansions to be used in planning future plant expansions.

Project included an overall hydraulic study and analysis of the existing storm water system at the plant to determine the capacity for future expansion of the plant. Additionally, the project included an as-built field survey of the existing system and through the use of various stand-alone expansion drawings developed of a master set of storm water drawings.

Upon completion of this phase the scope of the project was expanded to include the design for increasing the capacity of the existing storm water detention pond to accommodate future plant expansion. A new detention pond was designed adjacent to the existing pond and provided and additional 392,000 C.F. of storage.

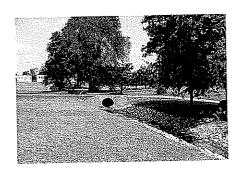

Key Personnel

Project Manager - Roger K. Randolph, P.E. Design Engineer - Jacob C. White, P.E.

Poplar Fork Storm Water Management

Putnam County, West Virginia

Client **Putnam County Commission** 400 North Poplar Fork Road Hurricane, West Virginia 25526 Contact Mr. Gary Tillis 304.586.0201

Nature of Work

Project included hydraulic analysis, culvert design, channel design, permitting as well as construction administration and inspection for a storm water management project that focused on alleviating flooding along Poplar Fork and tributaries.

The project consisted of over 3300' of channel design, placement of numerous culverts under local roads as well as residential driveways. Scour and erosion countermeasures, designed and incorporated into the plans included rock rip-rap and grouted rip-rap. Regulatory agencies designated to oversee this project included the US Army Corp of Engineers and the West Virginia Department of Environmental Protection.

Surveying services included topographic field mapping for design purposes and construction layout.

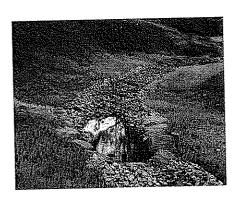

Key Personnel

Project Manager - Roger K. Randolph, P.E. Designer - Donald R. Hayes, P.L.S.

Finney Branch Spillway

Kanawha County, West Virginia

Client Hatfield Enterprises, Inc. 400 North Poplar Fork Road Hurricane, West Virginia 25526 Contact Mr. Robert Hatfield 304.552.1782

Nature of Work

Project included hydraulic analysis, channel design, spillway design, and permitting for an emergency spillway along Finney Branch in Dunbar, WV.

The project consisted of over 800' of channel design using the Army Corps of Engineers HEC-RAS stream modeling program. Scour and erosion countermeasures, designed and incorporated into the plans included rock rip-rap and various matting and vegetative linings. Regulatory agencies designated to oversee this project included the US Army Corp of Engineers and the West Virginia Department of Environmental Protection.

Surveying services included topographic field mapping for design purposes and construction layout.

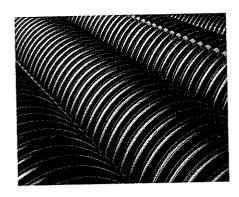

Key Personnel

Project Manager - Roger K. Randolph, P.E. Design Engineer - Jacob C. White, P.E.

Town of Buffalo 60" Storm Water Outfall

Putnam County, West Virginia

Client Town of Buffalo Buffalo, West Virginia Contact Mr. Kenneth Tucker, Mayor 304.937.2041

Nature of Work

The goal of this project was to develop a storm water outfall to the Kanawha River required by an expansion project for the Toyota Motor Manufacturing Plant.

Project included designing a 1600 L.F. storm water outfall consisting of 60" HDPE smooth wall pipe. The outfall included seven 8' diameter manhole junction boxes as well as a 60" diameter reinforced concrete pipe bored and jacked under WV Route 62. Additional features included a pre-cast headwall founded on helical anchors and 1400 S.F. of articulated concrete block erosion matting.

We performed a topographical survey to be used for design and provided construction stakeout and construction inspection services. Permitting requirements included an Archeological Study, WV DEP NPDES permit, and WVDOH Highway Encroachment permit.

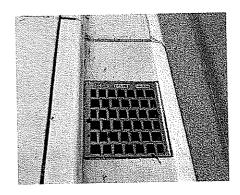

Key Personnel

Project Manager - Roger K. Randolph, P.E. Design Engineer - Jacob C. White, P.E.

Town of Bancroft - Storm Water Management

Putnam County, West Virginia

Client Town of Bancroft P.O. Box 58 Bancroft, West Virginia 25011 Contact Ms. Joyce Abbott, Mayor 304.586.3559

Nature of Work

Project included hydraulic analysis, culvert design, permitting as well as construction administration and inspection for an urban storm water management project that was designed utilizing an enclosed system of inlets and pipe culverts.

The project consisted of a system of pipe culverts and concrete inlets that were placed in and around various residence and business properties. The project was undertaken due to the health and safety hazards associated with standing water that, due to very flat terrain, would not drain naturally. Regulatory agencies designated to oversee this project included the West Virginia Department of Health and the West Virginia Department of Environmental Protection.

Surveying services included topographic field mapping for design purposes and construction layout.

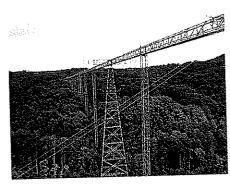

Key Personnel

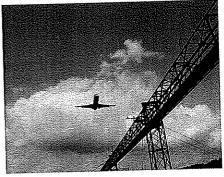

Project Manager - Roger K. Randolph, P.E. Designer - Donald R. Hayes, P.L.S.

Yeager Airport Expansion

Kanawha County, West Virginia

Client Triad Engineering, Inc. 4980 Teays Valley Road Scot Depot, West Virginia, 25560

Contact Mr. Dane Ryan 304.755.0721

Nature of Work

Triad Engineering, Inc., the construction manager for a 25 million dollar runway expansion project, contracted with Randolph Engineering to analyze a portion of the navigational lighting system after an impact from construction equipment.

The project required a large embankment fill that encompassed portions of several towers that support the navigational lighting system. Upon completion of the impact analysis it was noted that two of the support towers were showing signs of distress. Further analysis determined that these two towers would require a challenging retrofit to allow for settlement of the embankment fill. We designed the retrofit and developed a method of installing a new base connection that was to be constructed in-place at the new base elevation prior to removing the existing vertical legs of the tower.

This unique situation presented a challenge to the design team and was critical to the success of the overall expansion project.

Key Personnel

Project Manager - Jacob C. White, P.E. Design Engineer - Aaron C. Randolph, P.E.

Sycamore Landfill

Putnam County, West Virginia

Client City of Hurricane 3255 Teays Valley Road Hurricane, West Virginia 25526

Contact Mr. Ben Newhouse, City Manager 304.562.5896

Nature of Work

The City of Hurricane in conjunction with Sycamore Landfill contracted with Randolph Engineering to design a leachate line from the landfill to the City's wastewater treatment plant located adjacent to Interstate 64 in Putnam County, West Virginia.

The project scope included line routing and location, route surveying, lift station design, cost estimating, right-of-way easements and construction administration for a 2 mile route along state highways and through private properties.

Additional responsibilities involved the coordination with various review and funding agencies as well as elected officials and the general public.

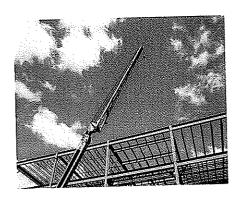

Key Personnel

Project Manager - Roger K. Randolph, P.E. Designers - Donald R. Hayes, P.L.S. & Stacey Call

Hobet Mining Office and Maintenance Complex

Logan County, West Virginia

Client Hobet Mining, Inc. P.O. Box 305 Madison, West Virginia, 25130 Contact Mr. Bob Euler 304.369.6780

Nature of Work

This project involved the design and construction of a 31,660 square foot office and maintenance building for Hobet Mining on an accelerated schedule. The project was undertaken on the Design-Build method of delivery.

The interior of the structure was zoned into three primary areas. The maintenance shop area utilizes 16,300 square feet with two 40 ton bridge cranes required to service massive earthmoving equipment, the warehouse area utilizes 10,800 square feet, and the office area utilizes 4,560 square feet.

The building structure consists of a 31,660 square foot manufactured metal building structure is founded on raft foundations. Design responsibilities included foundation and slab design, maintenance facility and office layout, mechanical, and electrical.

The schedule mandated by the client allowed 9 months for design and project construction with foundation construction beginning in the month of November.

Key Personnel

Project Manager - Roger K. Randolph, P.E. Designers - Max Dent and Don Hayes, P.L.S.

Equitable Gathering, Inc. - Dwale Compressor Station

Floyd County, Kentucky

Client Augusta Engineering & Design, Inc. 318-24 Fourth Avenue Plaza IV Building South Charleston, West Virginia 25303 Contact Mr. Nile L. Fisher, Jr., P.E. 304.744.9000

Nature of Work

Project included analysis of the Levisa Fork River in Floyd County, Kentucky to determine the impact of a construction project at the Dwale Compressor Station for Equitable Gathering, Inc on the Base Flood Elevation as determined by FEMA.

The project consisted of a river survey at specified cross section locations, analysis of proposed project plans, incorporation of all data into a hydraulic river modeling program, determination of impact to the flood plain, preparation of permit applications for FEMA and the State of Kentucky, and review of final project plans for compliance with modeling results.

Surveying services included topographic stream mapping for design purposes.

Key Personnel

Project Manager - Jacob C. White, P.E.

West Virginia Department of Natural Resources

Summers County, West Virginia

Client **WVDNR** 1900 Kanawha Boulevard East Building 3 Charleston, West Virginia 25305 Contact Mr. Brian Carney, P.E. 304.558.9125

Nature of Work

As part of their plans to upgrade the facilities at Bluestone State Park, the State contracted with Randolph Engineering to provide topographical surveying services for two areas of the park.

Our scope of work included topographic base mapping for the campground as well as the swimming pool / recreational complex. The scope of the mapping included all utilities and storm water structures and features as well as existing planimetric features such as roads, buildings, parking, landscaping and above ground utilities such as electric and telephone pole and lines.

Fayette Landing

Fayette County, West Virginia

Client Steve Louisos Development Co. 1808 Main Street East Oak Hill, WV 25901

Contact Mr. Steve Louisos 304,465,5689

Nature of Work

As part of his plan to develop an approximately 22 acre commercial development along US Route 119 in Fayette County, West Virginia, Steve Louisos contracted with Randolph Engineering to provide topographical and boundary surveying services for this high profile project.

Our scope of work included topographic surveying, property research, coordination with WVDOT on right-of-way issues, preliminary and final lot layout as well as final lot stakeout for Phase 1 and Phase 2 of the development. Additional responsibilities included preliminary and final access road design, stormwater management and design as well as preliminary and final site grading.

Under separate contracts we provided additional site, civil and municipal design services as well as construction stakeout for several tenants of the development including:

- **CVS Pharmacy**
- KFC
- Sheetz, Inc.

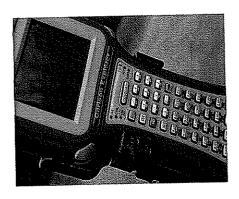

Key Personnel

Project Manager - Donald R. Hayes, P.L.S. Design Engineer - Jacob C. White, P.E. Coordinator - Stacey Call, S.I.

Capitol Complex As-Built Survey

Kanawha County, West Virginia

Client ZDS Design/Consulting Services, Inc 91 Smiley Drive St. Albans, West Virginia 25177

Contact Mr. Todd A. Zachwieja, P.E. 304.755.0075

Nature of Work

ZDS contracted with Randolph Engineering to provide as-built field surveys, verify contour mapping, provide finished floor elevations for the basements and first floors and develop detailed maps for a storm water improvement project within the Capitol Complex campus in Charleston.

Our scope of work included locating all improvements in the vicinity of Buildings 1, 3, 4, 5, and 7 including building footprints, sidewalks, utilities as well as trees, architectural features and monuments.

Key Personnel

Project Manager - Donald R. Hayes, P.L.S.

AEP Flyash Waste Disposal Site

Putnam County, West Virginia

Client Headwaters Resources 10653 S. River Front Parkway Suite 300 South Jordan, UT 84095

Contact Mr. Charles Roberts 304.557.0112

Nature of Work

As part of AEP's on-going operations at their flyash waste disposal site, Headwaters Resources contracted with Randolph Engineering to provide quality control surveying and stakeout at this facility located in Putnam County, West Virginia.

Our scope of work included control and boundary mapping for this 1000 acre disposal site. Additional responsibilities included tracking fill quantities, quality assurance and construction stakeout.

Key Personnel

Project Manager - Donald R. Hayes, P.L.S. Coordinator - Stacey Call, S.I.

ALTA Survey – Buckeye Hope Foundation

Various Locations, West Virginia

Client Star Title Agency, LLC 229 Huber Village Blvd., Suite 130 Westerville, Ohio 43081

Contact Mr. Jim Saad 614.396.3296

Nature of Work

Star Title Agency contracted with Randolph Engineering to provide property research, field surveying and the development of detailed property maps and as-built drawings for ten specific apartment complex sites located in various counties in central West Virginia. These multi-family residential housing complexes ranged from 2 acres to 9 acres.

Our scope of work included locating all improvements to the site including buildings, parking areas, sidewalks, utilities and recreational facilities.

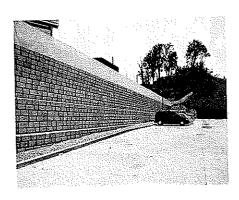

Key Personnel

Project Manager - Donald R. Hayes, P.L.S.

Sheetz, Inc. Convenience Store **Retaining Wall**

Cabell County, West Virginia

Client Sheetz, Inc. 351 Sheetz Way Claysburg, PA 16625

Contact Mr. Max Rodland 814.239.6017

Nature of Work

Project included structural design of a modular block retaining wall utilizing the "Redi-Rock" Wall System. The wall was required to maximize the footprint of a new store location with restrictive property boundaries located along Interstate 64 in Cabell County, WV. The wall has a maximum height of 15' and is 196' in length with a total square footage of 2200 SF. An adjacent building posed a unique challenge for this project in that there was limited space for geo-grid reinforcement behind the wall. We designed the wall as an un-reinforced gravity wall using a terraced set back along the entire length to meet this requirement.

Working closely with the contractor and the wall supplier we developed a wall design that met aesthetic requirements, property boundary limitations and was cost effective and easily constructible.

Key Personnel

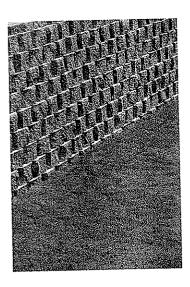

Project Manager - Aaron C. Randolph, P.E.

Estimated Construction Cost \$121,000.00

I-64 Dunbar-South Charleston Bridge **Retaining Wall**

Kanawha County, West Virginia

Client Peerless Brick & Block Company 400 Oliver Street St. Albans, West Virginia 25177

Contact Mr. Kevin Roberts 800.642.3054

Nature of Work

Project included structural design of a modular block retaining wall as part of a value engineering plan to replace the Mechanically Stabilized Earth retaining wall that was designed to minimize the grading footprint and to support the east abutment for the new Interstate 64 Dunbar-South Charleston Bridge spanning the Kanawha River. This signature bridge is an 8 span, concrete box girder bridge with a national record 760' center span that was constructed utilizing the balanced cantilever method.

Working closely with the contractor and the wall supplier we developed a wall design that met aesthetic requirements, was cost effective and easily constructible. The wall was 200 feet in length and totaled more than 2300 square feet.

Key Personnel

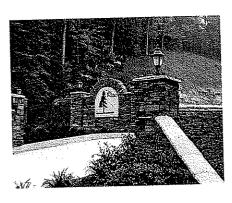

Project Manager - Aaron C. Randolph, P.E. Design Engineer - Aaron C. Randolph, P.E.

Estimated Construction Cost \$127,000.00

The Ridges at Rabel Subdivision

Kanawha County, West Virginia

Client AB Contracting, Inc. 5521 Ohio River Road Point Pleasant, West Virginia, 25550

Contact Mr. Allen Bell 304,546.5955

Nature of Work

This Design-Build project involved the study, design and preparation of contract documents for a 194 unit gated community to be constructed on a 152 acre parcel.

Site design responsibilities included subdivision lot layout, grading, interior roadway design, pavement design, well as the design of the storm water system and approximately one-half mile of two-lane access road. Included in the access road design included the design of a prefabricated two-lane arch structure to span Alum Creek.

Utility design included 3 miles of sanitary force main and 2.3 miles of gravity sewer lines as well as twin 45,000 GPD packaged treatment plants. The water system consisted of 2.4 miles of 8", 6" and 2" water lines including a pump station and a 110,000 gal storage tank.

Additional design responsibilities included obtaining all permits including N.P.D.E.S. permitting for the site work as well U.S. Army Corp of Engineer permitting of the creek crossing and WV Health Department and Kanawha County Planning Commission permits.

Surveying services included horizontal and vertical control, topographic mapping for design purposes, survey plat development and construction stakeout.

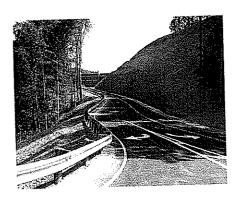

Key Personnel

Project Manager - Roger K. Randolph, P.E. Design Engineer - Jacob C. White, P.E. Designer - Donald R. Hayes, P.L.S.

G&G Builders, Inc. – Massey Headquarters Site

Boone County, West Virginia

Client G&G Builders, Inc. 500 Corporate Centre Drive Scott Depot, West Virginia 25560 Contact Mr. Gary Young President 304.757.9196

Nature of Work

This project involved the study, design and preparation of contract plans and related documents for the construction of a new corporate headquarter office complex located along US Route 119 in Boone County, West Virginia.

The project scope included the design of an approximately 4 acre site that overlooks US Route 119 in Boone County and included preliminary and final grading plans, storm water design including detention, utility design within the site as well as a package treatment plant and forcemain effluent discharge line. Additional responsibilities included the design of a new entrance and turn lane on US Route 119 and an access road into and through the site. The site design included final paving and parking design, a helipad, decorative pond with fountain, security bollard system, walking track and secondary service road design.

Surveying services included additional mapping control and construction layout.

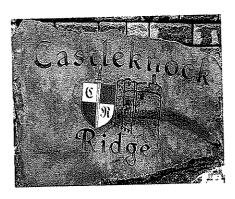

Key Personnel

Project Manager - Jacob C. White, P.E.

Castlenock Ridge Subdivision

Putnam County, West Virginia

Client DARR Incorporated 4414 Teays Valley Road Scott Depot, West Virginia, 25560 Contact Mr. Ron Hayes 304.768.8450

Nature of Work

This Design-Build project involved the study, design and preparation of contract documents for a 214 lot subdivision to be constructed on a 142 acre parcel located in Teays Valley, West Virginia.

Site design responsibilities included subdivision lot layout, grading, interior roadway design, pavement design, as well as the design of the storm water system including detention. Utility design included water distribution, sanitary sewer design and coordination with local electric, telephone and gas companies.

Additional design responsibilities included obtaining all permits including N.P.D.E.S. permitting for the site work as well U.S. Army Corp of Engineer permits and WV Health Department and Putnam County Planning Commission permits.

Surveying services included topographic mapping for design purposes, survey plat development and construction stakeout.

Vienna – Water System Model

Wood County, West Virginia

Client **Woolpert Consultants** St. Albans, West Virginia Contact Mr. Paul Amburgey, P.E. 304.722.1550

Nature of Work

Project involved the engineering study and development of a Cybernet Water Model for the existing and proposed expansion of the water distribution system of the city of Vienna, West Virginia. Working as sub-consultant for a nationally recognized engineering firm, we developed a model for the existing system that included the Vienna Mall area to be used to further study impacts of proposed and future developments within the system and to bring the system back to pre-contamination levels of service.

The model encompassed an existing gravity system that dates to the 1930's consisting of 6 water storage tanks with a total of 1.6 million gallons of storage, 14 pump stations and 12 water wells as well as distribution lines serving 5500 customers.

Responsibilities included obtaining current water consumption rates, pressure data at key locations, verify piping network and determining water distribution operational characteristics.

The results were incorporated into the current expansion design and allowed the City to plan for future expansion to developing areas within the City.

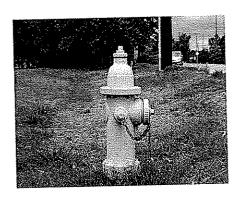

Key Personnel

Project Manager - Roger K. Randolph, P.E.

Tackett's Branch Water Extension

Putnam County, West Virginia

Client City of Hurricane 3255 Teays Valley Road Hurricane, West Virginia 25526

Contact Ben Newhouse, City Manager 304.562.5896

Nature of Work

Project included the design and preparation of construction documents, specifications and construction administration services for a system upgrade that consisted of more than 6000 L.F. of 6" diameter water line and 3000 L.F. of 2" diameter water line as well as fire hydrants, valves, and service line installation.

Additional responsibilities included right-of-way easements and coordination with existing utility companies and various review, emergency and permitting agencies.

Surveying services included topographic field mapping for system design as well as construction stakeout.

Key Personnel

Project Manager - Roger K. Randolph, P.E. Designer - Larry Stricker

Sovine Road Water System Extension

Putnam County, West Virginia

Client City of Hurricane 3255 Teays Valley Road Hurricane, West Virginia 25526

Contact. Mr. Ben Newhouse, City Manager 304.562.5896

Nature of Work

In an effort to keep up with the current and anticipated future growth and to assist with planning and funding sources, the City of Hurricane contracted with Randolph Engineering to provide preliminary design and cost estimates for a new waterline extension to serve 17 customers in the Sovine Road area of Putnam County.

The planned system extension included:

- 3 miles of 6" waterline extension
- Service to 17 Homes
- 2- 35,000 gallon water storage tanks
- 12 Fire Hydrants
- 1- Pump Station

Preliminary engineering services included hydraulic analysis, tank site locations line layout and cost estimates.

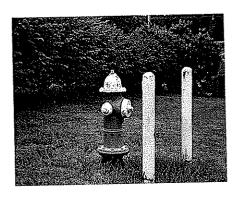

Key Personnel

Project Manager - Roger K. Randolph, P.E. Designer - Stacy Call, S.I.

Putnam County Commission Water Improvements

Putnam County, West Virginia

Client **Putnam County Commission** 3389 Winfield Road Winfield, West Virginia 25213

Contact Mr. Gary Tillis 304.586-0201

Nature of Work

The Putnam County Commission contracted with Randolph Engineering to provide professional design and construction administration services for two (2) water line extension projects to serve areas of need with the county.

We provided design, construction documents and permit applications for the following projects:

Eleanor Industrial Park Extension

Project included the design and preparation of construction documents, specifications and construction administration services for system upgrades consisting of more than 9,800 L.F. of 16" diameter water mains, valves, hydrants and service lines. Additional responsibilities included right-of-way easement plats and coordination with the appropriate review and regulatory agencies. Surveying services included topographic field mapping for design purposes and construction layout.

Red House Extension

Project included the design and preparation of construction documents, specifications and construction administration services for system upgrades consisting of more than 4,000 L.F. of 16" diameter water mains, valves, hydrants and service lines. Additional responsibilities included right-of-way easement plats and coordination with the appropriate review and regulatory agencies. Surveying services included topographic field mapping for design purposes and construction layout.

City of Hurricane Water System Upgrades

Putnam County, West Virginia

Client City of Hurricane 3255 Teays Valley Road Hurricane, West Virginia 25526

Contact Mr. Ben Newhouse, City Manager 304.562.5896

Nature of Work

In an effort to keep up with the current and anticipated future growth, the City of Hurricane contracted with Randolph Engineering to provide renovation and upgrade design services for their existing water treatment plant and various system upgrades. This upgrade included an analysis of the existing facility building and foundations as well as the addition of a new lab, new filter and the development of both steel and concrete alternates for a new 50' diameter clarifier.

Other plant and system upgrades have included:

- Design of various walkways and platforms as well as multiple piping configurations within the plant.
- Design, Surveying and Construction Administration services for system upgrades consisting of more than 17,000 L.F. of 12" diameter water line and 4,700 L.F. of 10" diameter water line as well as the design of a 1,000,000 gallon water storage tank including the foundations.
- Preliminary engineering study for the development of a new water storage impoundment and more than 6000' of raw water line.

Surveying services for these projects have included topographic field mapping for design purposes and construction layout.

Additional responsibilities involved the coordination with various review, permitting and funding agencies as well as elected officials and the general public.

Key Personnel

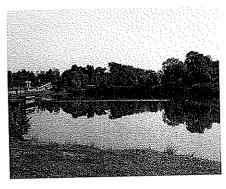

Project Manager - Roger K. Randolph, P.E. Designer - Max Dent

City of Hurricane Emergency Raw Water Storage

Putnam County, West Virginia

Client City of Hurricane 3255 Teays Valley Road Hurricane, West Virginia 25526

Contact Mr. Ben Newhouse, City Manager 304.562.5896

Nature of Work

In an effort to keep up with the current and anticipated future growth, the City of Hurricane contracted with Randolph Engineering to study and recommend solutions to provide emergency raw water storage.

This project involved cost analysis, feasibility studies, preliminary design and regulatory agency coordination for alternatives to provide secondary raw water storage. Preliminary responsibilities included the study of multiple alternatives including buying water from another utility, utilizing storage tanks and the analysis of various sites for the development of a storage impoundment. The selected site required an archaeological evaluation as well as a wetland delineation study for the US Army Corp of Engineers. Final design will begin upon completion of the regulatory reviews.

Surveying services for these projects have included topographic field mapping for preliminary design purposes as well as horizontal and vertical control.

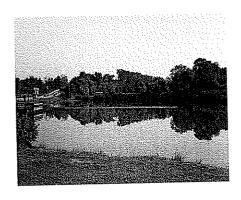

Key Personnel

Project Manager - Roger K. Randolph, P.E. Design Engineer - Jacob C. White, P.E.

City of Hurricane Water Impoundment

Putnam County, West Virginia

Client City of Hurricane 3255 Teays Valley Road Hurricane, West Virginia 25526 Contact Mr. Ben Newhouse, City Manager 304.562.5896

Nature of Work

In an effort to keep up with the current and anticipated future growth, the City of Hurricane contracted with Randolph Engineering to study and recommend a solution to the extreme silt build-up at their water storage reservoir.

This project involved the study, design and contract drawings for dredging and disposing of approximately 110,000 cubic yards of sediment from the City's water reservoir. Preliminary responsibilities included the study of multiple alternatives for the disposal of the waste sediment as well as coordinating with various regulatory agencies. Close coordination with agencies including US Army Corp of Engineers, US Fish and Wildlife, WVDEP and WVDNR was critical to the success of this project. Requirements for stream and wetland mitigation, property acquisition, leasing versus buying the dredge equipment and impacts to the surrounding city park were all factors that were studied during the preliminary phase of this project.

The plan that was chosen and developed for construction involved buying the dredge equipment to be used by city personnel and the construction of a two phase detention pond that allowed for the sediment to dry before being trucked off site. This plan had the advantages of allowing maintenance operations to continue at intervals that best serve the city's long term plan for the reservoir.

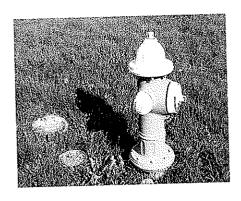

Surveying services for these projects have included topographic field mapping for design purposes and construction layout.

Key Personnel Project Manager - Roger K. Randolph, P.E. Designer - Max Dent

Town of Buffalo Water Improvements

Putnam County, West Virginia

Client Town of Buffalo P.O. Box 307 Buffalo, West Virginia 25033 Contact Mayor Kenneth Tucker 304.937.2041

Nature of Work

Randolph Engineering has a long standing relationship with the Town of Buffalo and has been responsible for various water distribution, tank design and rehabilitation as well as plant upgrade projects.

Some of the expansion and renovation design projects include the following:

- Design of a 250,000 gallon water storage tank.
- Design of clearwell tank and various building modifications.
- Design of miscellaneous piping renovations.
- Design of existing water storage tank repairs.
- Design of a 10,000 gallon backwash basin.

Responsibilities for these projects included design, surveying, development of contract drawings and construction specifications, bid evaluation, construction administration and construction inspection.

Key Personnel

Project Manager - Roger K. Randolph, P.E. Designer - Max Dent

section 4 PERSONNEL RESUMES

Roger K. Randolph, P.E., P.L.S.

Design Engineer/Project Manager

Experience and Qualifications:

Roger is an accomplished design engineer with more than 40 years of experience for a variety of civil, municipal, land development, structural and construction projects. His versatility, experience and wealth of knowledge provide valuable insight into possible pitfalls that may affect the success of any project. He is responsible for project management and design as well as leadership and mentoring of younger engineers on many projects in a range of disciplines.

His primary responsibilities include:

- Project Management
- **Municipal Engineering**
- · Building Engineering
- Structural Engineering

Representative Project Experience:

- Verizon Sales Building Structural Design
- U.C.C. Building 14 Structural & Foundation Design
- FAA Control Metering Building Colorado
- Parkline Manufacturing Facility Building and Site Design
- Central Distributing Warehouse and Office Facility **Building and Site Design**
- Hobet Mining Warehouse and Office Facility **Building and Site Design**
- Toyota Motor Manufacturing of WV Retail Sales **Building Design**
- Toyota Motor Manufacturing of WV Plant

SUB-CONSULTANT (Novel Geo-Environmental, PLLC)

Novel Geo-Environmental, PLLC

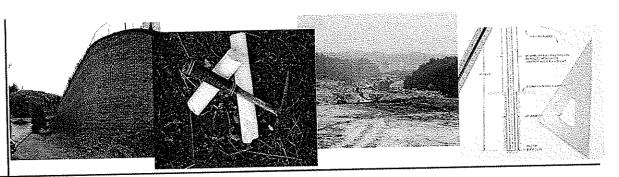

St. Albans, West Virginia

Exceptional staff.

Exceptional results.

Allow us to show what we can do for you.

Company Overview

Novel Geo-Environmental, PLLC (NGE) is a full-service geotechnical and environmental engineering firm with offices located in St. Albans, West Virginia, and Pittsburgh, Pennsylvania. Led by an experienced management team, NGE provides quality geotechnical services to a variety of clients in both the private industry and government sectors.

In business since 2002, NGE is one of the fastest growing engineering consulting firms in the country.

Who is NGE?

Our staff includes professional engineers, geologists, scientists, construction managers, and foremen with experience in a broad range of technical disciplines. Our management team averages 15+ years of experience per person

Why NGE?

NGE is large enough to fulfill the needs of our client in-house, yet small enough to provide the personal focus each client deserves. With smaller overhead than larger companies, NGE can provide exceptional services at lower cost.

NGE is a Certified Disadvantaged Business Enterprise (DBE) in West Virginia, Pennsylvania, Ohio, Maryland, and New Jersey and is certified by the Small Business Administration as an 8(a) Small Disadvantaged Business.

Geotechnical Engineering

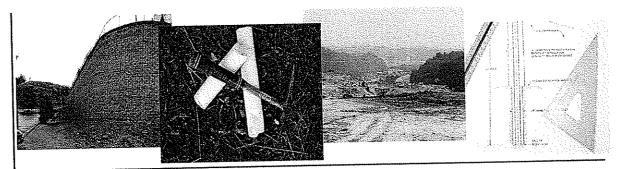

The natural complexity and variability present in the subsurface requires a specialized expertise to ensure reliable results. NGE investigates and evaluates subsurface soil, rock, and groundwater conditions to analyze their response to the needs of a given project, whether they be foundation loads, site grading operations/slope configuration, or retaining wall design. A sampling of the geotechnical services NGE provides includes the following:

- Foundation investigations commercial/residential construction, WVDOH bridge and roadway, airport geotechnical design, public and private utilities (water storage tanks, communications towers, etc.)
- Landslide investigations/remediation slope design, retaining wall design
- Forensic Engineering/Insurance investigations
- Mine subsidence investigations/ground stabilization
- Dam design/rehabilitation
- Pavement analysis and design
- Groundwater seepage analysis and design

Drilling Services

NGE is equipped with a variety of versatile drilling equipment to meet the demands of our clients even in the most demanding of environments.

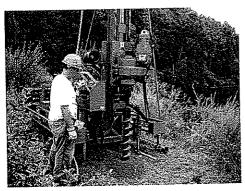

This includes:

- Truck-mounted rotary drill rig equipped with hollow stem augers used primarily for Standard Penetration Testing (SPT). It can also be used for conventional rock coring.
- Custom manufactured state-of-the-art trackmounted rotary drill rig, also equipped with hollow stem augers for SPT sampling. This machine is also equipped for wire-line coring and is uniquely designed to access hard-toreach areas (such as rugged terrain or limited access) with a minimum of disturbance.
- Portable Tri-Pod drill able to perform SPT sampling in areas that are inaccessible to conventional drilling equipment.
- Dynamic Cone Penetrometer portable device designed to provide comparable SPT "N-values" in areas with very limited access

NGE also provides monitoring well installation services that meet the requirements for the State of West Virginia Certified Monitoring Well Driller program.

Novel Geo-Environmental, PLLC

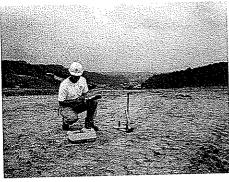

Construction Monitoring and Inspection Services

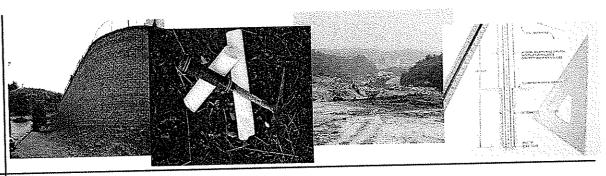

NGE offers inspection services to support a wide variety of construction projects, including highway, building, and airport. Our technicians are qualified and certified in a variety of services and will meet the specific needs of the client in an efficient and competent manner. NGE is also a West Virginia certified DBE firm as well as a federal Disadvantaged Business (8[a]). NGE can provide and manage the following services:

- Materials Testing and Analysis (concrete, asphalt, fill placement)
- Independent Construction Inspection
- Contractor Submittal and Shop Drawing Review
- Documentation and Process Verification
- Bidding Assistance and Analysis
- Cost Estimating and Cost Control Monitoring
- Design Review
- Value Engineering
- Project Partnering
- Quality Assurance Monitoring

Laboratory Testing Services

NGE can provide laboratory geotechnical testing in accordance with ASTM standards under controlled conditions to further estimate the engineering properties of soil and rock materials. Typical laboratory testing includes soil classification, compaction, compressibility, swell potential, and permeability.

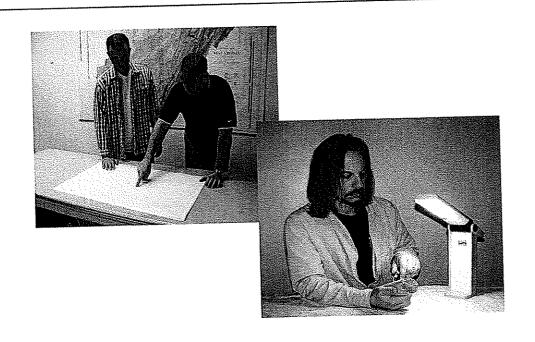

Crosshole Sonic Logging (CSL)

NGE provides Crosshole Sonic Logging (CSL) to test the integrity of drilled concrete shafts. CSL testing is a non-destructive method that checks the homogeneity and integrity of concrete in a deep foundation by sending ultrasonic pulses through the concrete from one probe to another. The test measures the propagation time and relative energy of the ultrasonic pulse between parallel access tubes (access tubes typically consist of 2-inch diameter steel tubes attached to the drilled shaft reinforcement cage). The pulse arrival time (a.k.a. first arrival time (FAT)) and energy are affected by the concrete. Uniform concrete yields consistent arrival times with reasonable wave speed and energy. Non-uniformities such as zones of poor quality concrete, honeycombing, voids, and soil inclusions exhibit delayed arrival times with corresponding reduced signal energy.

NGE's broad range of experience in each of the previously listed services enables us to provide our clients with high-quality geotechnical engineering, remediation and construction services while meeting budgets and deadlines.

Personnel

Amy L. Veltri, P.E., DEE

Over eleven years of experience as an environmental and civil engineer in consulting and industry. Currently serving as president of a geotechnical and environmental engineering consulting firm. Experience includes extensive management of personnel and large projects, including management of project schedules, scope of work, and budgets. Personnel management includes selection of project staffing, staff reviews, and mentoring. Significant experience in air quality for various industrial clients including Title V permitting and compliance, emissions inventories and control technology assessments. Completed numerous multimedia regulatory compliance audits and Phase I site assessments. Assisted clients with ISO 14001 registration process. Assisted industrial clients with NPDES permit compliance including completion of DMR's and permit renewal and negotiation. Completed general construction monitoring services including density testing and concrete testing.

Fields of Competence

- Personnel Management
- Project Management (schedule and budget)
- Air Quality Regulations/Compliance
- Wastewater Treatment/Permitting
- Environmental Management Systems (ISO 14001)
- Process Safety Management/Risk Management Planning
- Multimedia Compliance Audits
- Hazardous Waste Training
- Stormwater Permitting/Pollution Prevention Plans
- Spill Prevention Control and Countermeasure Plans
- Construction Monitoring and General Geotechnical Engineering

Education

- M.S., Civil Engineer, West Virginia University, 1996
- B.S., Civil Engineer, West Virginia Institute of Technology, 1989
- OSHA 1910.120 40-hour HAZWOPER Training, 1991

Registration/Certifications

- Registered Professional Engineer in Pennsylvania.
 Registration No.: PE-050393-E, Registration Date: 08/96
- Registered Professional Engineer in West Virginia.
 Registration No.: 14241, Registration Date: 09/99
- Diplomat Environmental Engineer, American Academy of Environmental Engineers, 07/02
- Certified Wastewater Treatment Plant Operator, Class A in Pennsylvania. Certificate No.: T3770, Registration Date: 06/01
- Certified ISO 14001 Lead Assessor, 04/02

- August 2002 Present President, Novel Geo-Environmental, LLC
- August 1998 August 2002
 Senior Project Manager, ERM
- November 1995 August 1998
 Regional Environmental Coordinator, US Airways
- March 1992 November 1995
 Project Engineer, ERM
- January 1990-September 1990
 Staff Engineer, ERM

John E. Nottingham, P.E., P.S.

Mr. Nottingham has served as lead Geotechnical Engineer on numerous government and commercial design and construction projects. His responsibilities on these projects include direction and coordination of all geotechnical engineering activities. Duties on these projects have included foundation investigation report production, foundation and retaining wall design, fill embankment and cut slope design, dam design and analysis, slope stability analysis, pavement design, design of drainage systems, supervision of subsurface drilling programs, field activity coordination, laboratory data computation and processing, performance of field work, client relations, and supervision of staff and project level geotechnical engineers.

Fields of Competence

- Highway & Airport Geotechnical Design
- Foundation Investigations
- Pavement Analysis and Design
- Landslide Analysis & Remedial Design
- Ground Water and Seepage Analysis & Design
- Retaining Wall Design
- Mine Subsidence Investigations
- Forensic & Insurance Investigations
- Construction Monitoring
- Personnel Management
- Project Management (schedule and budget)
- Project Estimating

Education

- B.S., Civil Engineering, West Virginia University 1987
- M.S., Civil Engineering, West Virginia University 1995

Registration/Certifications

- Registered Professional Engineer in West Virginia.
 Registration No. 12357 (since 1994)
- Registered Professional Surveyor in West Virginia.
 Registration No. 1495 (since 1995)

- November 2002 Present Branch Manager, Novel Geo-Environmental, LLC
- 1997 November 2002
 Geotechnical Services Manager, Triad Engineering, Inc.
- 1996 November 2002
 Senior Engineer, Triad Engineering, Inc.
- 1993 1996
 Project Engineer, Triad Engineering, Inc.
- 1988 1993
 Staff Engineer, Triad Engineering, Inc.

Larry C. Nottingham, PhD, PE

Mr. Nottingham served as a Principal Engineer at Triad Engineering, Inc. for over 25 years before joining the professional staff at NGE. During that time he has accumluted a broad range of experience in the numerous disciplines of geotechnical engineering. Mr. Nottingham also served as a professor and department chair of the Civil Engineering Department at the West Virginia University Institute of Technology in Montgomery, West Virginia. Mr. Nottingham was involved with consultation and review of many subsidence related projects performed for BRIM as well as the WVDEP.

Fields of Competence

- Foundation Investigations
- Landslide Analysis & Remedial Design
- Mine Subsidence Investigations
- Highway & Airport Geotechnical Design
- Pavement Analysis & Design
- Retaining Wall Design
- Forensic & Insurance Investigations
- Expert Witness Consultation
- Ground Water and Seepage Analysis & Design
- Dam Analysis & Design
- Personnel Management
- Project Management
- Project Estimating

Education

- B.S.C.E., Civil Engineering, West Virginia Institute of Technology, 1965
- M.S.C.E., Civil Engineering, University of Pittsburgh,
 1966
- Ph.D., Civil Engineering, University of Florida, 1975

Registration/Certifications

Registered Professional Engineer in West Virginia, Kentucky, and Ohio

- May 2005 Present Senior Egineer, Novel Geo-Environmental, PLLC
- 1979 May, 2005
 Principal Engineer, Triad Engineering, Inc.
- 1989 1994
 Professor and Department of Civil Engineering
 Chair, West Virginia Institute of Technology
- 1975 1979
 Senior Engineer, Fugro Gulf, Inc., Houston, Texas
- 1970 1974
 Project Engineer, Florida Department of Transportation
- 1967 1970
 Project Engineer Ackenheil & Associates, Inc.

Chuck Montgomery, P.G

Mr. Montgomery has served as Project Geologist on numerous projects for clients in private industry as well as for state and federal agencies. He has performed a variety of roles in various projects from office management activities to coordination of field activities. Duties on these projects have included foundation investigation report production, mine subsidence evaluation and assessment, supervision of subsurface drilling programs, field activity coordination, laboratory data computation and processing, performance of fieldwork, client relations, and supervision of staff.

Fields of Competence

- Foundation Investigations
- Landslide Analysis
- Mine Subsidence Investigations
- Seismic Site Class evaluation, per International Building Code (IBC) 2000 edition.
- Forensic & Insurance Investigations
- Personnel Management
- Project Management (schedule and budget)
- Project Estimating

Education

- B.S., Geology, Marshall University 1991
- OSHA 1910.120 40-hour HAZWOPER Training, 1992

Registration/Certifications

- Registered Professional Geologist in Kentucky.
 Registration No. KY-2258 (since 1999)
- Certified Monitoring Well Driller in West Virginia
- OSHA 1910.120 40-hour HAZWOPER Training, 1992

- February 2004 Present Project Manager, Novel Geo-Environmental, LLC
- 1996 February 2004
 Project Geologist, Triad Engineering, Inc.
- 1992 –1996
 Staff Geologist, Triad Engineering, Inc.

Gene Brown, E.I.

Mr. Brown has served as Staff Engineer on numerous projects for clients in private industry as well as for state and federal agencies. He has performed a variety of roles in various projects from office management activities to coordination of field activities. Duties on these projects have included foundation investigation report production, slope stability analysis, dam analysis, AutoCAD drafting, supervision of subsurface drilling programs, field activity coordination, field portion of environmental site assessments, structural inspections, GPS and conventional surveys, laboratory data computation and processing, performance of fieldwork, client relations, and supervision of staff.

Fields of Competence

- Foundation Investigations
- Landslide Analysis & Remedial Design
- Seismic Site Class evaluation, per International Building Code (IBC) 2000 edition.
- Construction Monitoring
- Personnel Management
- Project Management (schedule and budget)
- Project Estimating

Education

- BS, Civil Engineering Technology, Bluefield State College, 2000
- BS, Architectural Engineering Technology, Bluefield State College, 2000

Registration/Certifications

- Engineer Intern, West Virginia
- OSHA 1910.120 40-hour HAZWOPER Training, 2005

- October 2006 Present Staff Engineer, Novel Geo-Environmental, LLC
- 2001 2006
 Staff Engineer, Terradon Corporation
- 2000 2001
 Survey Technician, John E. Chance & Associates, Inc
- 1999
 Engineer Intern, Burgess & Niple, Ltd.

Christopher T. Dunlap

Mr. Dunlap has served as an engineering technician/field inspector on numerous government and commercial construction projects. His duties on these projects have included quality assurance/quality control (QA/QC), construction oversite and testing, coordination of field activities, liaison between general contractor and engineer, and project reporting. Mr. Dunlap also has experience with drilling inspection and computation of laboratory data.

Fields of Competence

- Fill placement monitoring/compaction
- Concrete testing and sampling
- Asphalt testing/compaction
- Project Management
- Drilling Inspection
- Project Documentation/Reporting

Education

 A.S., Mechanical Engineering Technology, WVU Institute of Technology, 2000

Registration/Certifications

- Certification for WV DOH Compaction Technician.
- Certification for WV DOH Concrete Technician/Inspector.
- Certification for WV DOH Asphalt Inspector.
- American Concrete Institute (ACI) Certified

- July 2004 –Present Staff Engineer, Novel Geo-Environmental, LLC
- August 2000 July 2004
 Field Technician, Triad Engineering, Inc.

Larry E. Easter

Mr. Easter has approximately 39 years experience as quality control technician/inspector and environmental technician. As a geotechnical technician, he has provided quality control overnight and testing services on numerous commercial and industrial projects. His duties have included compaction and concrete testing and observations, liaison between the general contractor and Engineer/Owner, and project reporting. He also has experience as a soils and concrete laboratory technician and as an engineering draftsman.

Fields of Competence

- Compaction testing and fill placement monitoring
- Concrete testing and sampling
- Drilling inspection
- Project documentation/reporting
- Geotechnical laboratory testing
- Concrete laboratory testing
- AutoCAD drafting and design

Education

- Certificate Computer Aided Drafting and Design;
 Ben Franklin Career Center, 2005
- Troxler Nuclear Moisture-Density Gauge Certification, 2005

STATE OF WEST VIRGINIA Purchasing Division

PURCHASING AFFIDAVIT

West Virginia Code §5A-3-10a states: No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owed is an amount greater than one thousand dollars in the aggregate.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Debtor" means any individual, corporation, partnership, association, limited liability company or any other form or business association owing a debt to the state or any of its political subdivisions. "Political subdivision" means any county commission; municipality; county board of education; any instrumentality established by a county or municipality; any separate corporation or instrumentality established by one or more counties or municipalities, as permitted by law; or any public body charged by law with the performance of a government function or whose jurisdiction is coextensive with one or more counties or municipalities. "Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceed five percent of the total contract amount.

EXCEPTION: The prohibition of this section does not apply where a vendor has contested any tax administered pursuant to chapter eleven of this code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

Under penalty of law for false swearing (West Virginia Code §61-5-3), it is hereby certified that the vendor affirms and acknowledges the information in this affidavit and is in compliance with the requirements as stated.
