**PURCHASING AFFIDAVIT**

**West Virginia Code §5A-3-10a states:** No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owed is an amount greater than one thousand dollars in the aggregate.

**DEFINITIONS:**

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Debtor" means any individual, corporation, partnership, association, limited liability company or any other form or business association owing a debt to the state or any of its political subdivisions. "Political subdivision" means any county commission; municipality; county board of education; any instrumentality established by a county or municipality; any separate corporation or instrumentality established by one or more counties or municipalities, as permitted by law; or any public body charged by law with the performance of a government function or whose jurisdiction is coextensive with one or more counties or municipalities. "Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceed five percent of the total contract amount.

**EXCEPTION:** The prohibition of this section does not apply where a vendor has contested any tax administered pursuant to chapter eleven of this code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

Under penalty of law for false swearing (**West Virginia Code §61-5-3**), it is hereby certified that the vendor affirms and acknowledges the information in this affidavit and is in compliance with the requirements as stated.

## ***Executive Summary***

Summit Engineering, Inc. proposes to provide design and specification services, surveying and mapping, and any required laboratory or subsurface investigation, in support of the Department of Environmental Protection's (DEP) effort to reclaim lands and water affected by coal mining which occurred prior to the promulgation of the Surface Mining Control and Reclamation Act of 1977. We also propose to offer the service of construction contract document preparation and contract administration to these projects.

Summit Engineering, Inc. is a large, diverse mining and civil engineering firm with seven regional offices strategically located in the Appalachian Coalfields and in close proximity to the anticipated projects requested by the Department for the required scope of work. Our three West Virginia offices are located in Charleston, Chapmanville and Bridgeport, West Virginia. We have combined our individual talents and expertise to benefit many post mining projects in the region. Being a mining *and* civil engineering firm, we have many corporate attributes that uniquely qualify our firm to provide services for abandoned mine lands reclamation projects in the state of West Virginia.

These attributes include:

- Strategically located offices in West Virginia coalfields (Charleston, Chapmanville and Bridgeport)
- Successful working relationship with West Virginia DEP
- Award-winning post mining land use projects
- Extensive background in coal mine design
- Experienced and available professional staff
- Vast amount of existing data in areas of potential projects

Summit has taken the opportunity to conduct field investigations of this project and has an understanding of the project scope.

## Firm Highlights

- Founded in 1977
- Over 30 years experience in engineering and architectural services
- Combined experience of more than 110 highly trained employees
- Professionals registered in multiple states:

<i>Kentucky</i>	<i>Virginia</i>
<i>West Virginia</i>	<i>Indiana</i>
<i>Tennessee</i>	<i>Ohio</i>
<i>Pennsylvania</i>	<i>Arkansas</i>

## Firm History

Summit Engineering, Inc. is a Pikeville, Kentucky based firm. Established in 1977, we have rapidly expanded to meet the growing civil, architectural and mining engineering needs of Kentucky, western Virginia and West Virginia. Summit opened its second office in 1980 which is now located in Big Rock, VA. In 1981, Summit's Civil Engineering Design Headquarters opened in Lexington, KY. A fourth branch opened in 1985 in Chapmanville, West Virginia. Summit Architectural Services was created in April 1995 and operates out of the Pikeville office. Our second West Virginia office was opened in Charleston in 1996. Summit's sixth office opened in Hazard, Kentucky in 1998. In February 2008, Summit opened its third West Virginia office in Bridgeport, West Virginia.

Summit's experience and expertise offers a wide range of civil & mining engineering, surveying, architecture and environmental assessment consultation and design services.

## Mining Engineering Services

Our firm has decades of combined experience in the mining and reclamation projects. Summit is proud to have accumulated an enormous amount of experience, which ensures our clients of high quality services at very competitive fees. Projects include:

- ↳ Plan Design
- ↳ Surveying and Mapping
- ↳ Hydrologic Investigation
- ↳ Geologic Investigation
- ↳ Permitting
- ↳ Environmental Monitoring and Testing
- ↳ Technical Report Preparation

Summit's most valuable asset is the experience of our staff. Our staff has over of 100 years of cumulative experience in the mining industry. The experience, knowledge, and skills of our staff enable us to assist with the planning and permitting needs of the coal industry in order to overcome the obstacles faced in today's market. Summit has also been instrumental in the development of unique post mining land uses. We have been involved in developing golf courses, residential subdivisions, commercial developments and recreational facilities on previously mined sites, thus illustrating our capacity to combine different disciplines of engineering for the benefit of industry, community, and the environment.

Charleston, West Virginia Office

## ***Civil Engineering Services***

For over 30 years, Summit's staff of experienced civil engineers has provided civil engineering services for several municipalities as well as water and sewer districts. It is Summit's mission to provide cost-effective solutions to meeting the needs of our clients. Summit's services range from project design and management to bidding and construction administration. As municipal engineers for various communities and projects, Summit has worked extensively with local, state and federal regulations that may be encountered during project development.

Services provided by our Civil Engineering division include:

- Roadways and Bridges
- Urban planning
- Water supply systems
- Sanitary and storm sewer systems
- Utilities/Infrastructure Needs Studies
- Regional Facilities Planning
- Industrial & Commercial site development
- Sanitary landfills
- Residential communities

It is our goal to be a full-service provider for your project. Summit also provides additional services to our civil engineering clients, including project administration, construction inspection and funding assistance.

## ***Environmental Services***

Summit has developed an in-depth understanding of environmental situations, investigations, and mitigation plans. Our staff of highly trained and experienced personnel enables Summit to provide quality, efficient results on projects ranging in size and sensitivity. Project owners have utilized Summit's services for both mining and civil engineering projects requiring:

- Environmental site assessments
- Reclamation liability studies
- Aquatic biologic surveys
- Stream and wetland mitigation
- Wetland delineation
- Corps of Engineers permits
- Toxic release inventory reporting
- Water quality studies
- Land reclamation cost analysis
- Stream benthic surveys
- KPDES permit applications
- Air quality permits and reporting
- Spill prevention control and countermeasures plans
- EPA underground injection permits

## *Surveying*

Summit Engineering's field staff offers more than 100 years of combined experience in both conventional and global positioning (GPS) survey methods. Our survey staff is comprised of six qualified field personnel who have accumulated an impressive depth of experience on jobs, both large and small, the majority of which are in challenging terrain.

Our projects are held to the highest standards of accuracy by utilizing state of the art equipment, software and support vehicles. Summit's experience has been gained on a wide array of survey projects including:

- Planimetric
- Reconnaissance
- Terrain
- Boundary
- Property and subdivision
- Roadway surveys
- Cross-sections
- Construction staking
- Control surveys for aerial photography
- Mine Surveys
- Underground
- Quarries
- Stockpiles
- GPS Capability
- ALTA Plat Standards

Summit's organization combines fieldwork experience with superior project management.

## ***Experience & Capabilities***

### **CORPORATE EXPERIENCE WITH ABANDONED MINE LAND PROJECTS**

Summit Engineering has been involved in AML reclamation projects since 1983. We have provided services to the West Virginia Department of Environmental Protection – Division of Abandoned Mine Lands, the Virginia Division of Mined Land Reclamation, the Kentucky Division of Abandoned Mine Lands and directly to the Office of Surface Mining. Projects in all three states have included some or all of the following: study, planning, permitting, design and construction oversight on varied types of projects including landslide and other soil and rock stability problems, mine and refuse fire abatement, sealing of hazardous shafts and other portals, mine subsidence problems, channel restoration, acid mine drainage mitigation and facility demolition, water studies and infrastructure projects. Our projects completed for West Virginia's Division of Abandoned Mine Lands include the Godby Branch Project and the Twin Branch Portal Closings Project.

The following exhibit of Abandoned Mine Lands and Reclamation Experience, which briefly describes prior and on-going AML&R projects by Summit, is a quick reference guide to our experience and expertise with AML projects. You will note that most of these projects have been successfully built and have dealt with a variety of issues that might be encountered when dealing with a reclamation project.

Our most recent experience has been obtained in the area of ground water contamination studies. Consequently, many of our studies have resulted in the funding of multiple water supply projects. As an illustration of this success, Summit is proud to have several water supply projects in the region fully funded and in various stages of final design and construction

Summit maintains the experienced staff and other in-house and/or sub-contracted capabilities for all phases of Abandoned Mine Land projects which require services in surveying and mapping, geotechnical investigation, design engineering, contract drawings and specifications, contract document preparation and administration. Thus we are expertly qualified to provide these services for the abatement of problems resulting from abandoned mine lands.

### **QUALIFICATIONS OF PERSONNEL**

Today, Summit Engineering employs approximately 125 highly-trained staff members representing a diverse range of professional backgrounds and technical expertise. Our employees include engineers, geologists, environmental scientists, hydrologists, surveyors and resident inspectors who are complemented by a dedicated support staff.

These individuals have worked on many projects that have addressed both mining and civil engineering concerns. Many of those projects have dealt with post-mining land use or abandoned mine lands. Several of these projects have uniquely integrated all of our engineering disciplines. One similar project is the Stone Crest Golf Course, where previously mined lands were developed into an 18-hole championship golf course in Prestonsburg, Kentucky. Another of these projects is the Grant's Branch Park, where a community facility along with a fishing lake was developed on post-mining lands.

### **PROJECT TEAM ORGANIZATION**

Summit Engineering utilizes an interdisciplinary team approach to develop realistic, cost-effective solutions to the environmental issues associated with abandoned mine lands. This approach allows for the collective input of ideas and expertise and gives the client and the project the "best of both worlds" utilizing our mining and civil engineering departments.

The Principal-in-Charge will ultimately be responsible for the entire scope of the project. **Jim Canterbury, PE**, who will serve as the Principal-in-Charge and is a legally authorized official of our firm, is authorized to sign all contractual documents related to AML work. Mr. Canterbury serves as the Office Manager of our Charleston office where he will have direct, hands-on control of any awarded project. Mr. Canterbury has worked for years as an advocate of the coal mining industry and continues to serve on many panels and in industry organizations.

The Project Manager will be responsible for the overall management of each project assigned. **Donald Bailey, PE** will serve as project manager on all WV DEP AML projects. Mr. Bailey is a professional engineer with an intimate familiarity with the DEP on many levels. A portion of his responsibilities as project manager will be as the official project liaison with the DEP. Mr. Bailey and/or key members of his staff will review the work directive, visit the site(s) and develop and execute a work plan.

Additional project engineers may be assigned by the project manager. The majority of the Project Manager's work will involve the technical aspects of the project (i.e., design of engineering plans, detailed review of calculations and drawings, preparation of technical reports and construction documents), however he will also assume some managerial duties. Particularly, he will coordinate the technical efforts and field work of the team members and will

*State of West Virginia*  
***Montana Mine Subsidence RFP***

be responsible for any subcontractors regarding their specific assignments as well as regular monitoring of the design process.

Summit Engineering's survey team is led by **Steve Haywood, LS (WV)**. Topographic and control surveying are integral parts of the services we provide. Our survey staff offers specialized expertise in various types of field surveys including boundary surveys, topographic surveys, control surveys for aerial mapping, construction surveys and spad setting in underground mine works. We have performed surveying and mapping on projects ranging from mine reclamation projects to water and wastewater lines and from underground mine layouts to construction layout for major projects including roadways, golf courses and industrial sites. Our survey staff is equipped with the latest technology including the use of GPS Systems and other precision instruments for making extremely accurate measurements in the rugged terrain of the Appalachian coalfields.

CAD Technicians dedicated to this project include staff from the Charleston office as well as the Bridgeport and Chapmanville offices, based on the office most readily available to the project site and DEP personnel. Utilizing state of the art equipment and software, we are able to offer a spectacular product of mapping, exhibits and illustrations in a clear and concise format.

#### **PROJECT MANAGEMENT PLAN**

Project management is focused on the commitment of resources – physical, fiscal, and personnel – to ensure completion of assigned projects within the specified time and budgetary constraints. The management function encompasses the basic tasks of organizing, staffing, deciding, directing, monitoring, controlling and evaluating all aspects of project formulation and implementation. Summit's West Virginia offices have both the technical capabilities and qualified staff, to efficiently and effectively implement a work plan that has been proven successful on previous AML projects in West Virginia, Kentucky and Virginia.

The team assigned to your projects has worked together on previous occasions, many of which are similar in scope to the upcoming DEP projects. Summit is committed to the allocation of additional personnel and any other required resources that may be necessary to successfully complete your projects in an efficient, timely, professional and cost effective manner.

## **AML AND RECLAMATION PROJECT EXPERIENCE**

Project Name	Location	Owner
<u>Twin Branch Portal</u> Abandoned deep mine reclamation, portal/shaft closure, hydrologic/hydraulic design/evaluation, mine/refuse fire abatement, project specifications, stream restoration. <i>Jim Canterbury, PE, Project Manager</i>	Mingo County, WV	WV DEP 601 57 <sup>th</sup> Street, S.E. Charleston, WV 25304
<u>Godby Branch Portal AML Project Drainage Phase II</u> Abandoned deep mine reclamation, portal/shaft closure, hydrologic/hydraulic design/evaluation, project specifications, stream restoration. <i>Jim Canterbury, PE, Project Manager</i>	Logan, WV	WV DEP 601 57 <sup>th</sup> Street, S.E. Charleston, WV 25304
<u>Dent's Run Bridge</u> Hydrologic/hydraulic design/evaluation, equipment/structure removal. <i>Jim Canterbury, PE Principle in Charge</i> <i>Mike Hill, PE, Project Manager</i>	Monongalia County, WV	William Henrich, ROW Division WV Dept. of Transportation, Bldg. 5 Charleston, WV 25305
<u>Vanita Stanley Group AML Project</u> Design of Remediation Project <i>Kevin Howard, PE, Project Manager</i>	Pike County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141
<u>Fedscreek-Mouthcard AML Water Supply Project</u> Phase I & II contracts: Design, bid documents and construction admin for AML water supply project. Funding supplemented with RD,DWSRF & Coal severance funds. 48 miles of 4,6,8,10 & 12" line, 2. MGD plant, 1.0mg tank, 300,000 gal. tank 2 skid tanks over 20,000 gal, 3 booster pump stations and telemetry. <i>Kevin Howard, PE, Project Manager</i>	Pike County, KY	Mountain Water District P.O. Box 3157 Pikeville, KY 41501 (606) 631-9162
<u>Ferrell's Creek AML Groundwater Contamination Study</u> Ground water study of multiple watersheds in Pike Co., KY. Organized as 4 MOAs covering Woodman, PawPaw, Shelby Valley, Straight Hollow and Ferrells Creek. Included 294 AML eligible households. <i>Kevin Howard, PE, Project Manager</i>	Pike County, KY	Mountain Water District P.O. Box 3157 Pikeville, KY 41501 (606) 631-9162
<u>Lula Neece</u> Survey for volume calculations. <i>Steve Haywood, LS, Project Manager</i>	Perry County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 502) 564-2141
<u>Garrett Refuse</u> Survey for volume calculations <i>Steve Haywood, LS, Project Manager</i>	Floyd County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141
<u>Redwine</u> Inspection of remediation project. Includes 64,500 CY earthwork on 22 acre site, 1,100 tons of soil additive, 3,200 CY of gabion and 3,215 tons of rip rap. <i>Mike Hill, PE, Project Manager</i>	Morgan County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141
<u>Carter Slide</u> Design of remediation project. 100 LF of pile and lagging wall to protect Frank Carter residence from landslide. <i>Mike Hill, PE, Project Manager</i>	Pike County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141

## **AML AND RECLAMATION PROJECT EXPERIENCE**

<p><u>Chloe Group</u> Design of remediation project. Includes reclamation of 10 acres of disturbance at 7 sites. Work includes 36,000CY earthwork, 125 LF pile and lagging wall, 17 portal closures, 1,320 CY gabion ditch, and 130 CY gabion wall. <i>Kevin Howard, PE, Project Manager</i></p>	<p>Pike County, KY</p>	<p>KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141</p>
<p><u>Fouch Drainage</u> Design of remediation project. Two acre slide behind Fouch and Tiller residences. Includes 1,100 CY earthwork, 500 CY gabion retaining wall, and 300 LF storm drain system. <i>Kevin Howard, PE, Project Manager</i></p>	<p>Pike County, KY</p>	<p>KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141</p>
<p><u>Stanley Slide</u> Design and inspection of remediation project. Project involved 400 CY of gabion retaining wall and 2,000 CY earthwork behind Stanley home. <i>Kevin Howard, PE, Project Manager</i></p>	<p>Pike County, KY</p>	<p>KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141</p>
<p><u>Davella Slide II</u> Design of remediation project. Project consisted of stabilizing a half-acre landslide threatening a grave by material removal. <i>Kevin Howard, PE, Project Manager</i></p>	<p>Martin County, KY</p>	<p>KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141</p>
<p><u>Job Project</u> Design of remediation project. Project included three sites. The project involved silt pond elimination, slide stabilization by restraint and slide stabilization by removal. <i>Kevin Howard, PE, Project Manager</i></p>	<p>Martin County, KY</p>	<p>KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141</p>
<p><u>Manton II</u> Design of remediation project. Project consisted of stabilizing and re-vegetating three abandoned coal refuse piles. The project involved approximately 10 acres of disturbance. <i>Kevin Howard, PE, Project Manager</i></p>	<p>Floyd County, KY</p>	<p>KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141</p>
<p><u>Little Fork Project-Phase I</u> Design of remediation project that included a two-acre landslide behind Turner Robinson home to be stripped to rock. Work includes 33,677 CY earthwork, 250 LF pipe, 1,000 CY gabion ditch, and seven (7) mine portal closures. <i>Kevin Howard, PE, Project Manager</i></p>	<p>Pike County, KY</p>	<p>KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141</p>
<p><u>Ashcamp Project</u> Design and resident inspection of remediation project. Includes 200 LF of 6" RCP, 500 LF lined ditch, and silt pond removal. <i>Jack Sykes, PE, CEO, Project Manager</i></p>	<p>Pike County, KY</p>	<p>KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141</p>
<p><u>Winns Branch Project</u> Design and resident inspection of remediation project. Project stabilization of 0.5 acre slide adjacent to a home. <i>Kevin Howard, PE, Project Manager</i></p>	<p>Pike County, KY</p>	<p>KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141</p>

## ***AML AND RECLAMATION PROJECT EXPERIENCE***

<p><u>Johns Creek Silt Pond</u> Design for correcting a 10 acre slide, removal of a silt pond and associated diversion channels. <i>Mike Hill, PE, Project Manager</i></p>	Morgan County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141
<p><u>Ferguson Slide Project</u> Design of remediation project. Includes 1 acre of general reclamation and a gabion retaining wall. <i>Jack Sykes, PE, CEO, Project Manager</i></p>	Pike County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141
<p><u>Pike / Floyd Project</u> Design of remediation project. <i>Jack Sykes, PE, CEO, Project Manager</i></p>	Pike County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141
<p><u>McDowell Slides Project</u> Design of remediation project. Three slides corrected by combination of re-grading and material removal. <i>Mike Hill, PE, Project Manager</i></p>	Floyd County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141
<p><u>Lane Branch Slide Project</u> Design of remediation project. Thirteen-acre slide was stabilized by material removal. <i>Mike Hill, PE, Project Manager</i></p>	Floyd County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141
<p><u>Hellier Refuse Phase III</u> Design and resident inspection of remediation project involving twenty acres of coal refuse reclaims. Twelve portals were also closed. <i>Mark Sanders, PE, Project Manager</i></p>	Pike County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141
<p><u>B J &amp; C</u> Design and resident inspection of remediation project. Ten -acre slide was stabilized by re-grading. <i>Kevin Howard, PE, Project Manager</i></p>	Pike County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141
<p><u>460 Portals</u> Project included closing of six (6) abandoned mine openings. <i>Jack Sykes, PE, CEO, Project Manager</i></p>	Buchanan County, VA	Virginia Div. Of Mined Land Reclamation
<p><u>Lee Mining</u> Design and resident inspection for abandoned contour mine site with steep and eroding outcrops. <i>Kevin Howard, PE, Project Manager</i></p>	Martin County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141
<p><u>Ashland M &amp; D</u> Design and resident inspection for three (3) abandoned mountaintop removal sites totaling approximately 112 acres. Includes 10 separate slides totaling 33 acres <i>Jack Sykes, PE, CEO, Project Manager</i></p>	Martin County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141
<p><u>Fletcher Ridge Subsidence Project</u> Evaluation and determination of the extent of potential subsidence on a residence. Initiation of plans and specifications to correct and stabilize problem. <i>Jack Sykes, PE, CEO, Project Manager</i></p>	Russell County, VA	Virginia Division of Mined Land Reclamation

## ***AML AND RECLAMATION PROJECT EXPERIENCE***

<u>Sizemore Landslide Project</u> Initiation of preparation of plans & specifications to correct 2 landslides covering approximately 4 acres Jack Sykes, PE, CEO, Project Manager	Russell County, VA	Virginia Division of Mined Land Reclamation
<u>Hellier Refuse</u> Developed plans & specifications for restoring approximately 2900 feet of Marrowbone Creek, & correct AMD from refuse area. Kevin Howard, PE, Project Manager	Pike County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141
<u>Roadrunner Mine</u> Developed plans for restoration of approximately 600 feet of Fords Branch. Kevin Howard, PE, Project Manager	Pike County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141
<u>Virginia Dept. of Mines, Minerals &amp; Energy</u> Work involved analysis of surface & groundwater samples collected by Dept. to document water quality Jack Sykes, PE, CEO, Project Manager	Big Stone Gap, VA	Virginia Dept. of Mines, Minerals & Energy P.O. Drawer 900 Big Stone Gap, VA 24219
<u>Dry Hollow Sedimentation Project</u> Restored 1930 feet of Conaway Creek near Conaway, VA. Jack Sykes, PE, CEO, Project Manager	Buchanan County, VA	Virginia Division of Mined Land Reclamation
<u>Hellier Refuse</u> Project included demolition of abandoned tipple & removal of abandoned equipment. Mike Hill, PE, Project Manager	Pike County, KY	KY Division of Abandoned Mine Lands 2521 Lawrenceburg Road Frankfort, KY 40601 (502) 564-2141

**OFFICE LOCATIONS & RESOURCES**

Summit's Charleston office will be the primary provider of services required for this project. Our Chapmanville and Bridgeport offices will also be utilized for field reconnaissance and other services when one of those offices is within closer proximity to the project. Additionally, Summit's multiple office locations will make it possible to add additional team members as the project necessitates. The work will be performed as a tightly coordinated effort between Summit and sub-consultants. As a result, DEP will not only receive quality service but will be utilizing the highest level of expertise within the individual disciplines within our firm.

You will note that our three West Virginia offices are located in manageable proximity to the project locations, affording us quick response time to project location. Our Charleston office particularly will allow our staff direct and immediate service to the Department of Environmental Protection.

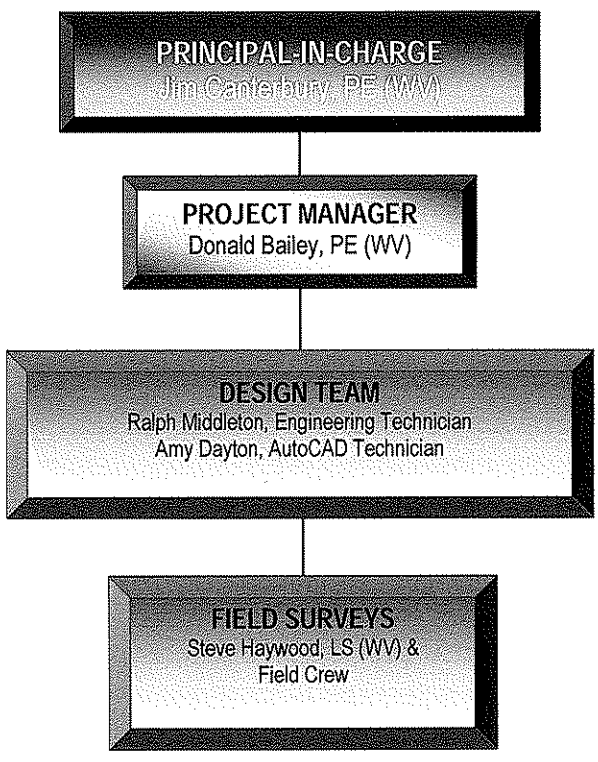

# SUMMIT ENGINEERING OFFICE LOCATIONS

*Project Team Chart*

## ***Project Discussion***

The Montana Mine Subsidence project is located in the town of Montana in Marion County. This location is approximately two and a half (2.5) hours from Summit's Charleston office and approximately 45 minutes from Summit's Bridgeport office.

Mr. Don Bailey from our Charleston office visited the various locations listed in the "Expression of Interest" packet to become familiar with the site along with the design and construction issues associated with this project. All of the sites are situated in now-rural/residential areas. None appeared to be located more than 200 feet from a nearby paved road with most being accessible via residential yards.

Mr. Bailey walked the sites listed and visited with several of the homeowners to get a better understanding of the size and location of the problem areas. The sites area spread out across the town of Montana with several of them being within relatively close proximity to each other. Most of the openings have been filled in over the years by the nearby homeowners with light fill material. Most of the damage to the homes reported seems to have been repaired, as well, making identification of the voids more difficult. Mr. Bailey was able to get rough locations and photographs from some of the homeowners. However, drilling will still be necessary to find the necessary openings – especially those near Munza, Nichols, Masters, Ralston, and Ward.

A resident of the Masters residence provided pictures of the open shafts for a more detailed evaluation of their locations and sizes. This site has potentially seven (7) or eight (8) or more vent shaft openings and other voids throughout the yard, under the house and garage, and around and underneath the swimming pool. Mr. Nichols pointed out to Mr. Bailey that one vent shaft is located in a group of trees approximately 10-15 feet from the corner of his home. Mr. Bailey noticed a slight yellow/brown discoloration in standing water in a low marshy area behind the Munza residence indicating potential mine drainage which will have to be dealt with. According to Nichols a mine tunnel runs underneath the front half of home and possibly underneath a portion of the Munza home. The Sigley site contained approximately five (5) visible holes in a thicket of trees and brush in large swale. These holes are still open and range in size from 10 to 36 inches in diameter. All of the homeowners spoken to seemed willing to cooperate with construction activities during this project

As detailed from Mr. Bailey's site visits and the information provided in the "Expression of Interest" packet, this project will require a detailed set of plans specific to each site. Summit understands the major components of engineering for these sites will include 1) providing design plans and specifications for the project areas; 2) designing for drilling in potentially unstable areas within close proximity to structures; 3) designing drainage channels and planning for pumps to divert surface water and mine drainage safely off site; 4) providing design for filling the mine voids with concrete/grout meeting appropriate slump and strength for creating a column to support the mine roof; 5) providing design for soil cover over the regraded areas and other disturbed areas; 6) providing revegetation standards for all disturbed areas; 7) providing estimated quantities; 8) preparing cost estimates; and 9) having the preliminary design documents ready within 60 days from issuance of a Purchase Order.

This project would be completed at Summit's Charleston office. The Charleston office has successfully completed two (2) WVAML projects, but at the present time does not have a WVAML project they are designing. Summit currently has three (3) WV Registered Professional Engineers at the Charleston Office with over thirty five (35)

*State of West Virginia*  
***Montana Subsidence RFP***

---

years of coal mining reclamation engineering experience. Mr. Canterbury, manager of the Charleston office, has personally been involved in the design, bidding and/or construction of over one hundred WV Abandon Mine Lands Projects. This project would be an excellent size project for Summit to complete and show the WV Abandon Mine Lands Section Summit's capabilities.

If a US Army Corps of Engineers permit is required to complete this project, Summit has the experience to complete an Army Corps of Engineers permit application and has worked with the Huntington Corps on several mining permit applications.

If awarded this project Mr. Jim Canterbury (PE) will oversee the project with Mr. Don Bailey (PE) being the Project Engineer with Mr. Ralph Middleton (Engineering Technician) and Ms. Amy Dayton (Auto Cad Technician) providing support. Any surveying required will be completed by Summit Engineering. Therefore, Summit will be able to commit qualified resources to completing this project within the required time frame.

A. Is your firm experienced in Abandoned Mine Lands Remediation/Mine Reclamation Engineering?

**YES** Description and Number of Projects:

Our services include mining permits, reclamation projects and AML water line projects through our civil, mining, surveying and environmental divisions. The number of projects is well over 100 due to our 29 years of service to the various industries, public and private clients we serve.

NO

B. Is your firm experienced in Soil Analysis?

**YES** Description and Number of Projects:

We perform routine services such as slope stability analyses and small retaining wall design. We utilize sub-consultants for exploration and detailed analysis such as consolidation, liquefaction, etc. Number of Projects is well over 100 as we do soil analysis for many of our mining clients as well as for stream bank stabilization and environmental projects.

NO

C. Is your firm experienced in hydrology and hydraulics?

**YES** Description and Number of Projects:

Summit designs have primarily addressed the control, treatment, and diversion of surface and ground water. Summit has designed well over 100 projects involving hydrology and hydraulics.

NO

D. Does your firm produce its own Aerial Photography and Develop Contour Mapping?

**YES** Description and Number of Projects:

We develop contour maps by field survey for sites up to 50 acres. We utilize sub-consultants for mapping by aerial photogrammetry for sites larger than 50 acres. Number of projects is well over 100 as we do mapping for all mining and civil engineering and surveying clients.

NO

E. Is your firm experienced in domestic waterline design? (Include any experience your firm has in evaluation of aquifer degradation as a result of mining.)

**YES** Description and Number of Projects:

Summit's civil engineering division has over 30 years of experience with domestic waterline design.

NO

F. Is your firm experienced in Acid Mine Drainage Evaluation and Abatement Design?

**YES** Description and Number of Projects:

Summit Engineering has been doing mining permits for 30 years and has addressed acid mine drainage in each of those. As a firm we have only completed one project that directly mitigated acid mine drainage.

NO
