Building 8 and 10 Security Fence
Addendum 1
Technical Questions and Answers

1. What size should the pickets be (gauge, thickness, O.D.)?

Answer: See Revised Drawing 1B Wrought Iron Detail. Pickets are solid wrought iron, square in dimension: 5/8" x 5/8"

2. What is the thickness of the rails?

Answer: The dimensions given on Revised Drawing 1B should be considered as 1" High (measured from top to bottom) by 1-1/8" Deep (measured from front to back).

3. Due to the span shown, we feel there needs to be a center support. Can we extend the center picket down into concrete in the ground?

Answer: Revised Drawing 1B shows the addition of a center support, made of the same wrought iron material as the fence.

4. Is there a specification sheet available on the wrought iron fence?

Answer: No specification sheet is available. See Revised Drawing 1B and other technical questions and answers for specification on the fence.

5. Is the material galvanized and then painted or powder coated?

Answer: Wrought Iron fencing will be powder coated black. Material is not to be galvanized.

6. The 15' wide section is considerably wide, 7'6" wide section with a post in the center, or the pickets in the center should extend down and be concreted in the ground to give extra support?

Answer: Revised Drawing 1B shows the addition and detail for a center wrought iron post to be added to each section of fencing.

7. A third rail should also be considered for extra strength.

Answer: No. See Revised Drawing 1B.

8. The 5/8" pickets are on the small side for this type of project should the 1" SQ. picket considered. Will the pickets be hollow or solid?

Answer: The pickets will be solid. 5/8" square picket will be used.

Answer: See NEC code for type, size, cover and location.

10. Also, each column with either high or low voltage will require a junction box for each. Cannot be in same box unless divided. Where located (in column, in ground) and what size?

Answer: Size according to the wire size and NEC. Located in ground.

11. Will separation of low and high voltage conduits be required?

Answer: Yes, (see NEC and drawings in package).

Answer: Yes, electrical marking tape is required. Must meet NEC Code. Type of marking tape is up to the contractor.

Answer: No. The RFQ states all specifications must meet NEC and State of West Virginia Fire Marshall Code.

Answer: Minimum Two (2) digital timers must be provided on all lighting circuits. Timers will be located in basement adjacent from electrical panel. A contactor will be required. Type of digital timer is up to the contractor.
