ENVIRONMENTAL HAZARDS

For **aquatic uses**, under certain conditions, treatment of aquatic weeds can result in oxygen depletion or loss due to decomposition of dead plants, which may contribute to fish suffocation. This loss can cause fish suffocation. Therefore, to minimize this hazard, do not treat more than one-third to one-half of the water area in a single operation and wait at least 10 to 14 days between treatments. Begin treatment along the shore and proceed outward in bands to allow fish to move into untreated areas. Consult with the State agency for fish and game before applying to public water to determine if a permit is needed.

For **terrestrial uses**, do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

PHYSICAL OR CHEMICAL HAZARDS

COMBUSTIBLE. Do not use or store the product near heat or open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

GENERAL INFORMATION

Mojave 70 EG is a dispersible granule intended to be mixed with water and surfactant(s) for application to non-cropland areas such as railroad, utility, pipeline and highway rights-of-way, utility plant sites, petroleum tank farms, pumping installations, fence rows, storage areas, farmyards and around farm buildings, non-irrigation ditchbanks and other similar areas where bare ground is desired. Mojave 70 EG may also be used for weed control under paved surfaces.

When applied either preemergence or postemergence to weeds, Mojave 70 EG will control most annual and perennial grasses and broadleaf weeds in addition to many brush and vine species and Mojave 70 EG will provide residual control of labeled weeds which germinate in the treated areas. For annual weed control, preferably apply Mojave 70 EG either at late preemergence-to-early postemergence for best results. For perennial weed control, Mojave 70 EG must be applied postemergence to the target weeds, since it will not control un-emerged perennial weeds. For maximum effect,
