HAZARD ANALYSIS AND CRITICAL CONTROL POINTS

JTM has been operating under a Hazard Analysis and Critical Control Points (HACCP) program since 1999, as required by USDA Code of Federal Regulations 9 CFR 417, which meets all the requirements of the USDA and third-party auditors. Our CCP's (Critical Care Points) are all temperature control points, through the process of receiving, processing, cooking and chilling our products. The full plan is available for review by our customers at our facility at any time within normal business hours.

The key features of our program, which is routinely audited by government and other third-party agencies, include:

- A HACCP team, comprised of members from across the plant, has been established and meets on a routine basis. The team includes personnel trained in a formal, external HACCP course.
- Each product has been described, and current process flow diagrams maintained.
- A documented HACCP program, detailing the 7 principles, is established and up-to-date. A hazard analysis has been completed.
- CCP's (Critical Control Points) have been identified. The critical control points are identified on the process flow chart as well as in the documented HACCP plan.
- Critical limits have been scientifically established and are documented.
- CCPs are monitored at regularly scheduled intervals. Monitoring procedures are documented and monitoring records are maintained.
- Corrective action procedures have been identified and are taken, if critical limits are not met.
- Corrective action records are maintained. Product disposition is documented.
- Appropriate verification procedures have been established. They are documented, and verification records are maintained.
- All records are appropriately signed/initialed and dated.
- The HACCP plan is verified annually through an independent audit. The verification audit is documented by a report. The verification audit results are maintained in the HACCP plan's historical records.
- JTM utilizes an outside USDA certified laboratory as needed for product testing.
- Our Food Security Plan is approved and active with USDA. Our plan number is 19428996794

The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.
9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and / or debarment.

INSTRUCTIONS

It is important that a separate form be prepared for each destination (Item 2) when delivery conditions require changes in elements of information in Items 5, 6, 7, 8, or 9.

In the "Type of Action" entry, check one box only indicating whether the form is to provide data for: (1) a NEW destination, (2) notification of CHANGE in data for an existing receiving point, or (3) DELETION of a destination receiving point.

- 1 Self-explanatory.
- 2 Name of the City to which shipment is to be made. Show only if different from item 3.
- 3 Self-explanatory.
- 4 Enter the title of the Distributing Agency's representative who is accountable for distribution of donated foods. Names are not to be shown unless essential to the Distributing Agency's operations. The Entity Number is the code designation assigned by USDA for a destination receiving point, and will be filled in by the Distribution Agency each time the form is submitted.
- 5 If delivery at destination is to be accepted by the Distributing Agency's representative (shown in item 4), enter "Same as item 4". If delivery at destination is to be accepted by someone other than the representative shown in Item 4, that person's title is inserted here. Names are not to be shown unless essential to the Distributing Agency's operation.
- 6 This item is used jointly with Item 7 since the information to be supplied is dependent upon the method of shipment indicated in Item 7.
 - A. For Rail Delivery – No entry is to be made unless delivery to a specific location is essential to program operations, e.g., the receiving warehouse is located on a rail siding. When an entry is necessary, the address shown shall include the specific location at which the car is to be placed for unloading. Where reciprocal switching is not in effect at the point of delivery, the name of the railroad which serves this location shall be shown. For example:

"Blank's Warehouse, ACL," or "Industrial Siding, PPP." Where reciprocal switching is in effect at the point of delivery, no delivering carrier shall be specified. If delivery is to be made on a team track, the name of a specific team track shall not be shown unless it is essential to program requirements.

Limitations. Show limiting conditions, if any, at the destination point, e.g., "Cannot handle cars over maximum length of 53 feet."

B. For Truck Delivery – Show exact street address for location at which delivery will be accepted. If same as for "Rail Delivery," enter "Same as for rail delivery."

Limitations. Show limiting conditions, if any, at the destination point, e.g., "12 ½ foot clearance."

- 7 It is desirable that shippers be allowed to make shipment by either rail or truck so that the means of transportation can be selected which will result in least transportation costs. Distributing agencies may restrict the method of shipment only when necessary to their program operations. If a specific mode of transportation is shown, an explanation must be made of the need for the restriction.
- 8 If this person is the same as the one to whom the Notice of Shipment is sent, enter "Same as Item 9." Names are not to be shown unless essential to the Distributing Agency's operations.
- 9 Self-explanatory. Names are not to be shown unless essential to the Distributing Agencies operations.
- 10 Indicate the outlet(s) to which distributions are made from this destination point.
- 11 12, 13, and 14 self-explanatory.
- 15 And 16 The Distributing Agency's representative (Item 4) will complete these entries.
