RE: Recycled Content**

**Jadcore is proud to participate in the environmentally sound movement that is gaining awareness throughout this nation. As a matter of fact Jadcore has been recycling plastic since 1974 and today we are the Mid-West's largest recycler. We salvage plastic scrap from all over the nation, bring it back to Indiana and convert the scrap back into usable, recycled raw material.**

**Our film division uses this 100% recycled material to manufacture our line of Premium Can Liners, which we have been doing for over 20 years. In short Jadcore has been and will continue to be a friend to the environment.**

## CERTIFICATE

of  
the Biodegradability of Plastic Products Made by  
**Poly Plastic Products of Sigma Plastics Group**  
that Incorporate the  
**ECM MasterBatch Pellet Technology**

*This is to certify that numerous plastic samples, submitted by ECM BioFilms, Inc., have been tested by independent laboratories in accordance with standard test methods approved by ASTM, ISO and other such standardization bodies to determine the rate and extent of biodegradation of plastic materials.*

*A Degradable Plastic is defined (ASTM 1991) as a plastic that is designed to undergo a significant change in its chemical structure under specific environmental conditions resulting in a loss of some properties that may vary as measured by standard test methods appropriate to the plastic and the application in a period of time that determines its classification. A Biodegradable Plastic is defined as a degradable plastic in which the degradation results from the action of naturally occurring microorganisms such as bacteria, fungi and algae.*

*The biodegradation of the submitted plastic samples were tested using ASTM D5209-91, "Standard Test Method for Determining the Aerobic Biodegradation of Plastic Materials in the Presence of Municipal Sewage Sludge", ASTM D5338-98, "Standard Test Method for Determining Aerobic Biodegradation of Plastic Materials under Controlled Composting Conditions", which is equivalent to CEN prEN WI 261085, and the ISO 14855 method, "Evaluation of the Ultimate Aerobic Biodegradability and Disintegration of Plastic Materials Under High-Composting Conditions"; ASTM 5511, "Standard Test Method for Determining Anaerobic Biodegradation of Plastic Materials Under High-Solids Anaerobic Digestion Conditions." The results of these tests and the related biodegradation and ecological impact experiments in various environments are contained in the Ecological Assessment of ECM Plastic report dated February 16, 1999, which certifies that plastic products manufactured with ECM additives can be marketed as biodegradable and safe for the environment.*

*This Certificate and the Ecological Assessment of ECM Plastic report, along with Scanning Electron Microscope and other studies that have been conducted since the publication of the Ecological Assessment, all of which use a one percent loading rate for the ECM MasterBatch Pellets rather than the higher additive levels used earlier, have been presented to **Poly Plastic Products of Sigma Plastics Group** and may be used by it to validate its claims to the biodegradability and environmental safety of plastic products that it manufactures that are made consistent with the manufacturing guidelines for uses of ECM MasterBatch Pellets presented to it by ECM BioFilms, Inc.*

## CANLINE11A

- 1) Q. We will be representing 4 distributors that are submitting pricing for our liners on this bid for you. I would like to know if the samples that are needed would be sent directly to you stating of course for "All Distributors" or do the distributors need to present them individually with their pricing at the time of the bid opening?
  - A. Please note that the samples need to reflect what bidder is sending them in against their bid. They need to be identified as to the Bidder and RFQ number that they go along with.
- 2) Q. I found out today when I delivered my can liner bid and samples that the bid opening date had been changed until August 17<sup>th</sup>. Is there any way in the future that I would receive notice of the change orders. I was out of the office today and maybe notification was faxed to me today. I have not had a chance to read the bid again. Was there any changes other than opening date on the bid.
  - A. If you are a registered vendor you can go on to our website, at [www.state.wv.us/admin/purchase](http://www.state.wv.us/admin/purchase), go to the Purchasing Bulletin, sign-in, click on the RFQ, and download any applicable addendums. If you are not a registered vendor, you can call the bid request line at (304) 558-2063, give them the RFQ number and request any applicable addendums that may have been issued. It is the vendor's responsibility to follow-up on any changes that may be applicable. We do however, send out to the vendors, that we are aware of, copies of the addendum and they are scanned and on-line immediately when the addendum is released.
- 3) Q. I see canline11a has been extended. Any particular reason? We have already submitted our bid. Can we get it back to rework it or do we need to submit a new bid?
  - A. It was extended due to technical issues. No, you can not get your bid back, if you need to make a revision to your bid, you need to send a new bid stating that it supersedes, the previous bid that you have submitted.
- 4) Q. I was inquiring about the can liner bid. Is it only one item on the bid? My manufacturer called me and told me it was 19 items on the bid. The bid only has one item on it. The small liners. Are there more items on it?
  - A. Please refer to page 10 of the RFQ, the cost sheet. There are 19 line items to be bid.
