Re: Expression of Interest for DEP 15600 – MacArthur Subsidence Project

Dear Mr. Bowman:

Mead & Hunt, Inc. is pleased to submit this Expression of Interest to provide professional engineering design services for the MacArthur Subsidence Project in Raleigh County.

We are a national company with a strong local presence in West Virginia that offers a greater depth of skills and years of experience as a full-service, full-discipline engineering design firm. We have 20 employees in our Charleston office including eight engineers, three surveyors, two CADD technicians, two environmental professionals and three support staff members. We offer one of the strongest, local civil engineering design teams in West Virginia.

Mead & Hunt engineers have prepared civil engineering design, surveying, environmental documents, construction plans, construction specifications, contract documents, and cost estimates for hundreds of projects across the great state of West Virginia. Mead & Hunt's local engineers have provided cost-effective, quality engineering designs for the state of West Virginia for many years. Mead & Hunt's local engineers are experts in all areas of sediment and erosion control measures, grading and drainage design and will be able to complete this project on schedule and on budget. Please give us another opportunity to serve our great state.

Mead & Hunt has developed a project specific QA/QC program to assure quality products are produced for this project. Mead & Hunt will work closely with AML to ensure that all deliverables are prepared to the highest standards...anything less will be unacceptable to our mission. Thank you for allowing our firm the opportunity to submit this Expression of Interest!

Sincerely,

Mead & Hunt, Inc.

James A. Bumgarner, Jr., P.E.

Corporation History and Experience

Mead & Hunt is an employee-owned firm with more than 500 professional, technical and support staff in offices nationwide, including an office in Charleston, West Virginia, with our corporate headquarters in Madison, Wisconsin. We have been serving clients in both the public and private sectors since our founding in 1900. Additional information can be obtained by visiting our website at www.meadhunt.com.

Mead & Hunt consists of Engineers, Land Surveyors, Environmental Specialists, and Inspectors that provide many years of experience in project management, survey, design, environmental and inspection. Mead & Hunt can handle multiple projects of any size with aggressive schedules. Our value to the client is our ability to provide expertise in a multitude of engineering disciplines.

Mead & Hunt's experience with abandoned mine land reclamation is highlighted below:

The **Stephenson (Mills) Subsidence** stabilization project consisted of stabilizing a void from abandoned underground mining beneath the residence located at HC 69, Box 29B in Stephenson, West Virginia. The project area overlies an undocumented underground coal mine. The mine void was determined to be in the Beckley Coal Seam and is located approximately 135 feet below the existing site grade. Damages were reported in the residential structure.

Stabilization focused on filling the mine void with grout and/or concrete beneath the residential structure to stabilize the subsidence. Site restoration, including revegetation, was considered an integral component of the Stephenson (Mills) Subsidence stabilization project.

The **Hughes Creek (Burke-Quinn) Portals** project is located along Hughes Creek in Kanawha County, West Virginia, near the town of Glasgow. This project encompassed two sites. Site 1 (Burke) consisted of nine collapsed or partially collapsed mine portals. Site 2 (Quinn) consisted of three collapsed or partially collapsed mine portals. This project included the installation of wet mine seals and drainage structures for these mine portals.

The **Trace Branch Refuse Pile** project is located along Trace Branch in McDowell County, West Virginia, near the town of Kyle. This project consisted of an abandoned refuse pile and approximately nine collapsed or partially collapsed mine portals. This project included the reclamation of the refuse pile, installation of wet mine seals and drainage conveyances for these mine portals.

The design aspects that were met in these projects were as follows:

- Clearing and grubbing at the site, and removal or burning of debris, trash, tree roots, garbage and associated materials;
- Construction and installation of support areas and maintenance of access roads to the site;
- Construction and installation of drainage control items including channels, culverts, and low-water crossings;
- Re-grading of refuse;
- Installation of wet/modified mine seals and animal guards;
- Providing sediment control;
- Placement of soil cover material on the disturbed areas and exposed refuse areas;
- Placement of lime, fertilizer, seed and mulch and establishing vegetation on all areas re-graded and disturbed during construction; and
- Final site cleanup.

Mead & Hunt is committed to providing quality products for our clients. We have recently been awarded multiple Engineering Excellence awards by the State of West Virginia for our design work for the West Virginia Department of Transportation, Division of Highways.

12. A. Are your firm's personnel experienced in Abandoned Mine Lands Remediation/Mine Reclamation Engineering ?

YES Description and Number of Projects: Members of our engineering staff have completed eight (8) AML Projects. These projects involved the preparation of constructions drawings for sediment and erosion control measures, clearing and grubbing, drainage structures, grading, water quality testing, stabilizing structures with grout/concrete, and installing mine seals.

NO

B. Are your firm's personnel experienced in Soil Analysis?

YES Description and Number of Projects: Members of our engineering staff have performed soil analyses on many civil engineering projects.

NO

C. Are your firm's personnel experienced in hydrology and hydraulics?

YES Description and Number of Projects: Our engineers have significant experience in performing hydrologic analyses, channel designs, culvert designs, storm drain system designs, erosion and sediment control pond designs, storm water management structure designs, hydraulic river analysis utilizing HEC-RAS, preparation of Hydrology and Hydraulics (H&H) reports, evaluating scour at structures, and natural stream design. Our engineers have completed H & H designs on numerous projects.

NO

D. Does your firm produce its own Aerial Photography and Develop Contour Mapping?

YES Description and Number of Projects:

NO Mead & Hunt does not produce Aerial Photography or develop contour mapping. When aerial photography is not available for a project, we usually employ a subcontractor to develop the photography. Mead & Hunt does have a survey crew on staff and have developed contour mapping from topographic surveys on dozens of projects.

E. Are your firm's personnel experienced in domestic waterline design? (Include any experience in evaluation of aquifer degradation as a result of mining.)

YES Description and Number of Projects: Members of our engineering staff have completed hundreds waterline design projects for local municipalities. These waterline projects involved the preparation of construction drawings, estimates, and specifications. These projects also required Bureau for Public Health permits.

NO

F. Are your firm's personnel experienced in Acid Mine Drainage Evaluation and Abatement Design?

YES Description and Number of Projects:

NO Mead & Hunt does not have any specific experience in Acid Mine Drainage Evaluation and Abatement Design.

13. PERSONAL HISTORY STATEMENT OF PRINCIPALS AND ASSOCIATES RESPONSIBLE FOR AML PROJECT DESIGN (Furnish complete data but keep to essentials)

NAME & TITLE (Last, First, Middle Int.) Bumgarner, James A. Jr. Project Manager	YEARS OF AML DESIGN EXPERIENCE: 4	YEARS OF AML RELATED DESIGN EXPERIENCE: 13	YEARS OF DOMESTIC WATERLINE DESIGN EXPERIENCE: 5
---	--------------------------------------	---	---

Brief Explanation of Responsibilities
 Jamie will be the Project Manager and will perform all Quality Control for this project. He will be the point of contact with WVDEP AML&R staff. He will monitor the design schedule and will take all necessary measures to make certain that all agreed upon design schedules are met. These measures shall include staffing levels, staffing changes, and shifting of priorities. He will ensure that QC audits are performed as outlined in Mead & Hunt's internal Project Design Quality Management Plan. He will maintain proper filing, coding, and maintenance of all project documentation in an organized fashion to make it retrievable during and after the project. He will manage all team personnel and resources including design engineering subconsultants. These management activities include, but are not limited to assignment of responsibilities, oversight and evaluation of design quality and quantity, and review of billable hours.

EDUCATION (Degree, Year, Specialization)

13. PERSONAL HISTORY STATEMENT OF PRINCIPALS AND ASSOCIATES RESPONSIBLE FOR AML PROJECT DESIGN (Furnish complete data but keep to essentials)

NAME & TITLE (Last, First, Middle Int.) Plumley, Matthew, L., PE Civil Engineer	YEARS OF AML DESIGN EXPERIENCE:2	YEARS OF AML RELATED DESIGN EXPERIENCE:7	YEARS OF DOMESTIC WATERLINE DESIGN EXPERIENCE:1
---	----------------------------------	--	---

Brief Explanation of Responsibilities
 Matt will be one of the design engineers for this project. He was recently one of the lead design engineers on the Stephenson (Mills) Subsidence and Hughes Creek Portals projects and for several Waterline Feasibility Studies that we completed for AML&R. He will assist the Project Manager in various engineering services including preparation of construction plans, erosion control, and Civil3D grading design. He will also perform calculations necessary for reclamation design, drainage design, and earthwork. He will also assist in the preparation of the project specifications and detailed cost estimates.

EDUCATION (Degree, Year, Specialization)
 Bachelor of Science, 2005, Civil Engineering

MEMBERSHIP IN PROFESSIONAL ORGANIZATIONS

STATE OF WEST VIRGINIA
Purchasing Division

PURCHASING AFFIDAVIT

West Virginia Code §5A-3-10a states: No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owed is an amount greater than one thousand dollars in the aggregate.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Debtor" means any individual, corporation, partnership, association, limited liability company or any other form or business association owing a debt to the state or any of its political subdivisions. "Political subdivision" means any county commission; municipality; county board of education; any instrumentality established by a county or municipality; any separate corporation or instrumentality established by one or more counties or municipalities, as permitted by law; or any public body charged by law with the performance of a government function or whose jurisdiction is coextensive with one or more counties or municipalities. "Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceed five percent of the total contract amount.

EXCEPTION: The prohibition of this section does not apply where a vendor has contested any tax administered pursuant to chapter eleven of this code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

Under penalty of law for false swearing (*West Virginia Code* §61-5-3), it is hereby certified that the vendor affirms and acknowledges the information in this affidavit and is in compliance with the requirements as stated.
