Addendum # 1

Item 1: The contractor will have 180 days from the date of the Notice to Proceed to complete construction activities on the project. The \$250 per day liquidated damage clause will be in effect after the 180 days. However, the total performance period will be 365 days from the date of the Notice to Proceed for invoicing purposes.

Item 2: Prior to any work around existing gas lines, the Contractor should coordinate with Penn Virginia (Mr. Harry Jewell @ 304-294-6767). Please also refer to Section 10 (Utilities) of the Specifications for additional information concerning utilities, including contact information, procedures, and method of measurement.

Item 3: The existing gravel/dirt road on site leads to the potential soil borrow areas. The road is used by gas company personnel, and must remain open, passable, and available for use during construction activities. The road must be left in an equal to or better than condition upon completion of construction. Please refer to Section 4.1.3 of the Specifications concerning treatment of existing roads.

Item 4: Contractor is responsible for cleaning/removing silt and debris from the existing channels. In general terms, this includes the removal of infiltrated/accumulated sediment, debris, refuse, leaves, rocks, etc. Acceptability will be determined/approved by the WVDEP Engineer. Care must be taken not to damage the existing grout or compromise the integrity of the existing drainage channels.

Item 5: In reference to particle size for soil borrow, satisfactory soil is considered to be reasonably free of subsoil, clay clumps, stones and other objects over three inches in diameter, and shall be free of objectionable material. Soil cover shall have a consistency sufficient to support vegetation. Material with excessive coarse particles will not be acceptable. Note: original specifications stated that no objects over four inches in diameter would be acceptable. Since only six inches (total) of soil cover is required, the four-inch dimension is reduced to three inches.

Item 6: Prospective bidders are not permitted to drill and/or excavate with motorized equipment for exploratory purposes, without prior approval from the property owner. Contact information is available from the WVDEP upon request.

Item 7: Contractor is reminded that all rock used on the project must comply with the parameters outlined in Section 7.0 of the Specifications. The required certifications, as specified in Section 7.0, must be submitted to, and approved by, the WVDEP prior to delivery, or prior to the use of on-site borrow areas.

Item 8: The re-grading plan has been designed to balance. Contractor will not be permitted to use refuse as backfill material to re-grade excavated borrow areas. Contractor must submit a reclamation plan for all soil borrow areas and obtain approval from the engineer, prior to disturbance of the borrow areas.
