**Biodiesel B5, Winterized Biodiesel B5, & Heating Fuels**

**2.4 SPECIAL REQUIREMENT OF THE DIVISION OF**

**HIGHWAYS:** During the period of November 1 to February 28, diesel motor fuels, including the Biodiesel B5, shall be blended with a permissible diesel/biodiesel additive to reduce operability parameters (cloud point, cold filter plug point) and to increase winter operability, maintaining state/federal mandated regulatory specifications for on-road diesel fuel.

The various grades of fuel oil shall conform to the detailed requirements for Fuel Oils "National Bureau of Standards" CS-12-48, dated September 25, 1948, or the latest edition: It is the intent of these specifications that failure to meet any requirements of a given grade does not automatically place an oil in the next grade unless in fact it meets all requirements of the lower grade.

The technical requirements of the National Bureau of Standards Commercial Standard CS-12-48 are identical in substance with tentative specifications for fuel oil, American Society of Testing Materials D396-48T latest edition.

Fuel oil not meeting specifications is unacceptable to any of the localities and must be removed from tank at vendor's expense. No additional product may be added to change the grade of the product.

No allowances shall be made for any reproducibility factors in the prescribed test methods. The supplier will allow samples to be taken prior to discharging of product into localities tanks. Samples will be taken without prior notices.

**IV. PRICING:** The State of West Virginia will accept bids only by Region locations. Vendors must bid a firm fixed mark-up price per gallon on fuel delivery with product price tied to the OIL PRICE INFORMATION SERVICE (OPIS) publication. **RFQ: FUELTW12**  
**Addendum No. 2**  
**Technical Questions and Answers**

- 1.) What happened to the 800 gallon minimum order requirement in order to qualify for contract purchases? All previous contracts contained this provision?
  - a. Irrespective of the method of transport, the minimum delivery quantity shall be 800 gallons. Vendors should remind ordering agencies that less than 800 gallons can be delivered as "off contract" purchases.
- 2.) Why are the bids being opened on separate dates? Historically, these are due on the same date and time. For those of us who hand deliver our bids and stay for the opening one bid opening date is more convenient and time effective.
  - a. While the Purchasing Division may open bids on any specified date and time, both the FUELTW12 and FUELTT12 bids will open on 08/09/2011 at 1:30 pm.
- 3.) The first paragraph of each RFQ specifies unleaded diesel and it should be ultra low sulfur diesel.
  - a. Unleaded diesel is a typographical error and is herein replaced by "ultra low sulfur diesel"
- 4.) B5 Biodiesel on the tankwagon RFQ (FUELTW12) will be difficult to obtain for most vendors who do not inventory B5 Biodiesel at their bulk plants (virtually all of us). B5 is readily available in some (PA) terminaling areas and can be readily accessed and delivered via transport deliveries only.
  - a. Agree. B5 Biodiesel is stricken from FUELTW12, but remains a part of FUELTT12.
- 5.) There are no bid sheets included in either RFQ.
  - a. Bid sheets were provided as a part of Addendum, but revised bid sheets are included as a part of this addendum.
