Charleston, WV 25305

Re: RFQ# HHR12070 – Auditing of Long Term Care Financial and Statistical Reports

Dear Ms. Wagner:

We appreciate receiving the above-referenced bid information from your office. Although the project was of interest to our firm, Myers and Stauffer will be unable to submit a proposal in response to this request.

We continue to be interested in receiving request for proposals issued for the State of West Virginia in regards to accounting and consulting engagements in the health reimbursement area, including consulting services regarding state plan review and analysis, assistance in the preparation of required findings and assurances, litigation support including legal strategies and expert testimony, Omnibus Budget Reconciliation Act (OBRA) consulting, pharmacy cost surveys, and services regarding rebasing/recalibration of Diagnosis Related Groups (DRG)-based reimbursement systems for inpatient hospital services.

We have also developed personal computer applications to meet specific state agency needs. These include the collection, analysis, and transmission of resident assessment data submitted on the Minimum Data Set (MDS) and related instruments. This information has been incorporated into quality of care review, case mix rate setting, and research. In addition, we perform per diem rate setting calculations, desk reviews, field audits (both limited and full scope), as well as related accounting and auditing services.

May we ask to remain on your list of prospective bidders to receive further request for proposals issued by the Department of Administration. We look forward to other bidding opportunities with the State of West Virginia and hope to hear from your office again.

Sincerely,

Lisa Stevenson
Marketing Coordinator
