Failure to comply with the foregoing requirements will result in public disclosure of the Vendor's bid without further notice. A Vendor's act of marking all or nearly all of its bid as exempt is not sufficient to avoid disclosure and WILL NOT BE HONORED. Vendor's act of marking a bid or any part thereof as "confidential" or "proprietary" is not sufficient to avoid disclosure and WILL NOT BE HONORED. In addition, a legend or other statement indicating that all or substantially all of the bid is exempt from disclosure is not sufficient to avoid disclosure and WILL NOT BE HONORED. Such assignment shall be made and become effective at the time the purchasing agency tenders the initial payment to Vendor.

43. Vendor's signature on its bid also affirms that neither it nor its representatives have any interest, nor shall acquire any interest, direct or indirect, which would compromise the performance of its services hereunder. Any such interests shall be promptly presented in detail to the Agency.

The Vendor as an independent contractor is solely liable for the acts and omissions of its employees and agents. Vendor shall be responsible for selecting, supervising, and compensating any and all individuals employed pursuant to the terms of this Solicitation and resulting contract. Neither the Vendor, nor any employees or subcontractors of the Vendor, shall be deemed to be employees of the State for any purpose whatsoever. Vendor shall be exclusively responsible for payment of employees and contractors for all wages and salaries, taxes, withholding payments, penalties, fees, fringe benefits, professional liability insurance premiums, contributions to insurance and pension, or other deferred compensation plans, including but not limited to, Workers' Compensation and Social Security obligations, licensing fees, *etc.* and the filing of all necessary documents, forms and returns pertinent to all of the foregoing. Vendor shall hold harmless the

State, and shall provide the State and Agency with a defense against any and all claims including, but not limited to, the foregoing payments, withholdings, contributions, taxes, Social Security taxes, and employer income tax returns.

46. **INDEMNIFICATION:** The Vendor agrees to indemnify, defend, and hold harmless the State and the Agency, their officers, and employees from and against: (1) Any claims or losses for services rendered by any subcontractor, person, or firm performing or supplying services, materials, or supplies in connection with the performance of the Contract; (2) Any claims or losses resulting to any person or entity injured or damaged by the Vendor, its officers, employees, or subcontractors by the publication, translation, reproduction, delivery, performance, use, or disposition of any data used under the Contract in a manner not authorized by the Contract, or by Federal or State statutes or regulations; and (3) Any failure of the Vendor, its officers, employees, or subcontractors to observe State and Federal laws including, but not limited to, labor and wage and hour laws.

After the contract for such services has been approved, but before any such employees are permitted to be on the grounds or in the buildings of the Capitol complex or have access to sensitive or critical information, the service provider shall submit a list of all persons who will be physically present and working at the Capitol complex to the Director of the Division of Protective Services for purposes of verifying compliance with this provision.

The State reserves the right to prohibit a service provider's employees from accessing sensitive or critical information or to be present at the Capitol complex based upon results addressed from a criminal background check.

52. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS: Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open heath, basic oxygen, electric furnace, Bessemer or other steel making process.

The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:

- a. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or

- b. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

53. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL: In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a “substantial labor surplus area”, as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products.

This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

Each of the adjoining compartments shall have a 3" diameter round water equalizing portal located as low on the longitudinal wall as possible and inside the screened area, also a 3" diameter round equalizing portal between each of the in-line compartments inside the screened area and as low to the floor as possible to allow water levels to maintain equal volume in each of the six compartments during use of the re-circulating system (see fig #1).
- LIDS:** The lids are to be 24" wide and 27" long (see fig #13). Each lid will be 3/16" thick 5052 aluminum and shall have 2" thick injected polyurethane foam insulating core. Compartment lids numbered 1,2,3 and 4 shall open towards the cab of the truck or the front of the tank (see fig #3) and compartment lids numbered 5 & 6 shall open toward the center of the tank (see fig #13). Each lid will be outfitted and supported with two (2) heavy duty gas spring pistons; the piston brackets shall be made of 1/4" aluminum (see picture #6) that hold the lid in an open position without wedge like back rests. A single Pular Model 503 lid clamp is to be mounted in the center of each lid. A 5" diameter screened vent centered and mounted flush with the top deck surface, and a 3" open piano hinge to extend the width of the lid (with 1/4" stainless pin) shall be installed on each lid. The entire inside of the lid is to have a half round rubber gasket seal and lids shall be flush mounted to the top deck of the tank.

EXIT DRAIN:

There shall be two (2) 8 5/8" outside diameter and 1/4" thick walled aluminum pipe inline drains that shall extend 6" out from the rear of the tank (see fig #1 & 4). All fish are discharged compartment to compartment via a solid slide gate assembly which covers 12" wide x 8" high discharge chutes centrally located on the dividing walls in line with the rear exit drains. The gate bottom shall rest on the tank floor with no countersunk groove. This assembly should be as water tight as possible. Pull rods for these assemblies extend up through the deck and have a recessed, stainless steel "T" handle. The slide gate assembly shall be constructed to hold at any position and not be pulled out of the guide slots at its full up position. **The rear most slide gates must be water tight** using an "O" ring and pressure devise configuration to eliminate excessive water discharge when the pipe cap is removed. Rear handles for slide gates must be a rectangle stainless.

TANK FLOORS:

The tank floor will be solid and level, there shall be no slope front to rear (this tank will be mounted on a dump bed truck). **The bottom of each compartment shall be sloped side to middle**, (see figure #7) toward flat channels in the centers of each compartment. The channels will be lined up with the bottoms of the slide gate assemblies.

OVERFLOW DRAINS:

One (1) 1" diameter "snap-tite" marine drain plug shall be installed per compartment to allow 6" of air space between water level and the inside surface of the lid (see fig. #7). The drain is covered on the inside by a perforated disc to prevent fish from escaping. These are to be mounted at the center of each compartment. Each of the plugs shall be attached to the tank by a size 1 brass safety chain.

TANK MOUNTING BRACKETS:

A 3" x 3" by 1/2" angle aluminum bracket shall be secured at each end of the tank. The brackets must extend the entire width of the tank and the weld shall also extend for the entire length of the bracket. There shall be no pre-drilled holes on the brackets; this will be done at the hatchery site (see fig #9).

INTERNAL SCREENS:

Screening to cover aerator intake tube, O2 diffusers, and water re-circulating systems will be 1/8" thick aluminum having 1/8" diameter holes on 3/16" staggered centers. All screen joints, corners, and points where screens meet walls will be close fitting to prevent small fish from entering aerator area. Top screen should be angled downward and close fitted around the "fresh-flo" aerator opening. No openings around the screen will be more than 1/16". **These screens must be removable** (see figure #2).

RECIRCULATION:

A 2 inch pipe water re-circulating system shall be installed.

The intake pipes shall run through each of the two (three inline compartment) areas. The intake pipes will terminate at the bottom and back of the outside of the tank with a removable cleanout cap (see fig #3). The intake pipes shall have ½" holes two inches apart for the entire length of the pipe that is inside the tank. The intake pipes will extend 3" outside of the front of the tank and have standard male threads.

The discharge pipes shall run through each of the two (three inline compartment) areas. The discharge pipes will terminate at the top and back of the outside of the tank with a removable cleanout cap. The discharge pipes will not have any holes pre-drilled (we will drill the holes). The discharge pipes will extend 3" outside of the front of the tank and have standard male threads. (see fig #3 & 4).

AERATION:

Each compartment will be equipped with a Fresh-Flo Model TT aerator centrally positioned in the screened area inside the compartment and secured to the tank top by two stainless toggle clamps. Each aerator shall have a weatherproof outlet box with minimum 15 amps rated 2-pin trolling motor connectors compatible to the protected power outlet and configured as in figure #13. The aerator tube shall be four inches from the tank bottom and the impeller should be two inches from the end of the tube.

OXYGEN DIFFUSER LINES AND ACCESSORIES:

Flow meters will be on a manifold (with suitable protection) on the front of the tank, passenger side, inset 14" from the side of tank (fig. #13), so the top of flow meters are below the top of tank. There will be one flow meter (5 LPM) for each of the holding compartments. A single line, fitted with a regulator for compressed oxygen, will feed all flow meters from the oxygen tank (3/8" line and regulator will be provided and installed by hatchery staff). Therefore, the inline on the manifold will be a brass barbed nipple to accommodate a 3/8" ID line. Oxygen lines from the flow meters to diffusers in each compartment will be run externally in two U-channels along the center of the top of the tank (FIG. #13) and then through the top of tank in aluminum tube (welded in place) of appropriate size to accommodate the ¼" ID oxygen lines. This will be done in such a way as to minimize interference with employee activities on top of the tank. Diffusers will be located in each compartment on the "floor" of tank and behind the screens and kept in place against screens with two pieces of 1/8" aluminum angle welded to tank "floor" (fig. #2). **Stones must be secure but removable.**

DIFFUSER SPECIFICATIONS:

24 ¼" X 2 3/8" ULTRA FINE, made by Point Four Inc.

- ELECTRICAL POWER SUPPLY:** The tank will be electrically wired to provide a 12 VDC outlet, low profile mounted; between each pair of aerator portholes (see fig #13). Wiring will be through conduit embedded in the deck of the tank. A waterproof junction box equipped with 6 switches and "power on" indicator lights (one for each aerator) will be positioned on the front end top drivers side of the tank, (inset 14" from side to accommodate for the front ladder) see figure #5 & #13), ready for hook-up to electrical power from the cab of the truck. All electrical items used are to be heavy duty, weatherproof and designed for outdoor use. Receptacles are to be two pin trolling motor style, heavy duty, weather resistant and located as close to the aerator is as practical, and receptacles are to face the rear of the tank. Each electrical outlet shall be designed and secured for protection against personnel or other mechanical damage.
- DRAIN VALVE:** The tank shall have two (2) 2" brass glove drain valves positioned at the bottom of the rear compartments and located within the screened aerator area. The valves should be able to be removed and/or replaced from the outside of the tank (see fig #1 & #4).
- LIFTING RINGS:** The tanks shall have 3/8" aluminum lifting hardware mounted on each of the four corners and designed for the purpose of lifting the tank on and off the truck (see figure #8).
- TOE RAIL:** The tank shall have a toe rail installed around the outside top edge of the sides and rear, leaving the front section open for the ladder mounting plates. Rail is to end 12" from front of tank (see fig #10 and picture #4). This rail shall be 7/8" stainless marine style pipe securely attached to the tank with boat rail fittings. The top of the rail shall be two inches high from the top of the tank.
- FRONT LADDER MOUNT:** A 12" x 3" x 1/2" thick aluminum plate shall be securely welded at front top corners of the tank deck (see figure #5). The aluminum plate shall have four 1/2" diameter holes drilled and threaded for attaching the ladder as configured in Figure #5.

PURCHASING AFFIDAVIT

West Virginia Code §5A-3-10a states: No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owed is an amount greater than one thousand dollars in the aggregate.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Debtor" means any individual, corporation, partnership, association, limited liability company or any other form or business association owing a debt to the state or any of its political subdivisions. "Political subdivision" means any county commission; municipality; county board of education; any instrumentality established by a county or municipality; any separate corporation or instrumentality established by one or more counties or municipalities, as permitted by law; or any public body charged by law with the performance of a government function or whose jurisdiction is coextensive with one or more counties or municipalities. "Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

EXCEPTION: The prohibition of this section does not apply where a vendor has contested any tax administered pursuant to chapter eleven of this code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

Under penalty of law for false swearing (**West Virginia Code §61-5-3**), it is hereby certified that the vendor affirms and acknowledges the information in this affidavit and is in compliance with the requirements as stated.
