Such assignment shall be made and become effective at the time the purchasing agency tenders the initial payment to Vendor.
43. **VENDOR CERTIFICATIONS:** By signing its bid or entering into this Contract, Vendor certifies (1) that its bid was made without prior understanding, agreement, or connection with any corporation, firm, limited liability company, partnership, person or entity submitting a bid for the same material, supplies, equipment or services; (2) that its bid is in all respects fair and without collusion or fraud; (3) that this Contract is accepted or entered into without any prior understanding, agreement, or connection to any other entity that could be considered a violation of law; and (4) that it has reviewed this RFQ in its entirety; understands the requirements, terms and conditions, and other information contained herein. **52. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS:** Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or

such operations, from steel made by the open hearth, basic oxygen, electric furnace, Bessemer or other steel making process.

The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:

- a. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or
- b. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

**53. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL:** In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a "substantial labor surplus area", as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products.

This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

- Numerous amenities including 500-seat auditorium, day-care center, full service kitchen and cafeteria
- LEED® Certified

Mascaro worked with Horizon D.S.G. Associates (developer), Dick's Sporting Goods (tenant), and Strada Architects (architect) to develop a 670,000-square-foot corporate headquarters complex. The design of the five-story building integrates five distinctive "pods" into one complex situated on a 116-acre site. Within the complex are many unique features such as a full-size mock up of a store, the "Every Season" hall, and a 500-seat auditorium.

Pods A, B, and C provide space for corporate staff including legal, finance, human resources, sales, marketing, and IT. The data center collects up to the minute information on all store sales. As would be expected, it has multiple back-up and redundant systems to ensure 24-hours-per-day, seven days per week operation.

In keeping with its commitment to employee health and welfare, the facility features a full-service kitchen and cafeteria, recreation / fitness area, and daycare services in Pod E. Sports amenities include an indoor and outdoor basketball court, softball field, tennis courts, soccer field, and walking trails.

With a stone, brick, and glass exterior; the structural steel facility has the capability to expand to over two million square feet as Dick's grows.

The project is located in the North Field Development in Findlay Township and is bounded by Business Route 60, Clinton Road, and the Pittsburgh International Airport.

The new Buffalo Federal Courthouse is a 10-story landmark in downtown Buffalo overlooking Niagara Square. The 265,000-square-foot building has an elliptical shape that not only defines the structure, but provides maximum efficiency for interior space requirements.

The new building houses a number of courts and judicial chambers that were located in the outdated Dillion Federal Courthouse. Buffalo's new landmark contains nine courtrooms, eleven judge's chambers, and a 54-space, one-level underground parking garage. The building tenants include district and magistrate courts, the U.S. Court of Appeals, the U.S. Probation, U.S. Pretrial Service, U.S. Attorney, U.S. Marshal Service, Public Defender, and the General Services Administration.

A typical floor plan consists of two district courtrooms, separate judges' chambers, and jury deliberation suites. The interior circulation system provides the required level of security, and the exterior meets federally mandated security setbacks and force protection design.

The exterior appearance of glass and open space belie the federally mandated security requirements integrated into the structure including exterior blast resistant walls, security setbacks, and other force protection design requirements. Sustainable design elements are incorporated into the structure as well; and the new facility is LEED Gold certified. The entry point includes a pedestrian-friendly courtyard and a glass entry pavilion.
