Additionally, the HIPAA Privacy, Security, Enforcement & Breach Notification Final Omnibus Rule was published on January 25, 2013. It may be viewed online at <http://www.gpo.gov/fdsys/pkg/FR-2013-01-25/pdf/2013-01073.pdf>. Any organization, that qualifies as the Agency's Business Associate, is expected to be in compliance with this Final Rule. For those Business Associates entering into contracts with a HIPAA Covered State Agency between January 25, 2013 and the release of the 2013 WV State Agency Business Associate Agreement, or September 23, 2013 (whichever is earlier), be advised that you will be required to comply with the 2013 WV State Agency Business Associate Agreement. Those laws include, but are not limited to, the Freedom of Information Act found in West Virginia Code § 29B-1-1 et seq.

If a Vendor considers any part of its bid to be exempt from public disclosure, Vendor must so indicate by specifically identifying the exempt information, identifying the exemption that applies, providing a detailed justification for the exemption, segregating the exempt information from the general bid information, and submitting the exempt information as part of its bid but in a segregated and clearly identifiable format. Failure to comply with the foregoing requirements will result in public disclosure of the Vendor's bid without further notice. A Vendor's act of marking all or nearly all of its bid as exempt is not sufficient to avoid disclosure and WILL NOT BE HONORED. Vendor's act of marking a bid or any part thereof as "confidential" or "proprietary" is not sufficient to avoid disclosure and WILL NOT BE HONORED. In addition, a legend or other statement indicating that all or substantially all of the bid is exempt from disclosure is not sufficient to avoid disclosure and WILL NOT BE HONORED. Vendor will be required to defend any claimed exemption for nondisclosure in the event of an administrative or judicial challenge to the State's nondisclosure. Upon request, the Vendor must provide all necessary releases to obtain information to enable the Purchasing Division Director or the Agency to verify that the Vendor is licensed and in good standing with the above entities.

**42. Such assignment shall be made and become effective at the time the purchasing agency tenders the initial payment to Vendor.

**43. VENDOR CERTIFICATIONS:** By signing its bid or entering into this Contract, Vendor certifies (1) that its bid was made without prior understanding, agreement, or connection with any corporation, firm, limited liability company, partnership, person or entity submitting a bid for the same material, supplies, equipment or services; (2) that its bid is in all respects fair and without collusion or fraud; (3) that this Contract is accepted or entered into without any prior understanding, agreement, or connection to any other entity that could be considered a violation of law; and (4) that it has reviewed this RFQ in its entirety; understands the requirements, terms and conditions, and other information contained herein. Vendor's signature on its bid also affirms that neither it nor its representatives have any interest, nor shall acquire any interest, direct or indirect, which would compromise the performance of its services hereunder. The Vendor as an independent contractor is solely liable for the acts and omissions of its employees and agents. Vendor shall be responsible for selecting,

supervising, and compensating any and all individuals employed pursuant to the terms of this Solicitation and resulting contract. Neither the Vendor, nor any employees or subcontractors of the Vendor, shall be deemed to be employees of the State for any purpose whatsoever. Vendor shall be exclusively responsible for payment of employees and contractors for all wages and salaries, taxes, withholding payments, penalties, fees, fringe benefits, professional liability insurance premiums, contributions to insurance and pension, or other deferred compensation plans, including but not limited to, Workers' Compensation and Social Security obligations, licensing fees, *etc.* and the filing of all necessary documents, forms and returns pertinent to all of the foregoing. Vendor shall hold harmless the State, and shall provide the State and Agency with a defense against any and all claims including, but not limited to, the foregoing payments, withholdings, contributions, taxes, Social Security taxes, and employer income tax returns.

- 46. INDEMNIFICATION:** The Vendor agrees to indemnify, defend, and hold harmless the State and the Agency, their officers, and employees from and against: (1) Any claims or losses for services rendered by any subcontractor, person, or firm performing or supplying services, materials, or supplies in connection with the performance of the Contract; (2) Any claims or losses resulting to any person or entity injured or damaged by the Vendor, its officers, employees, or subcontractors by the publication, translation, reproduction, delivery, performance, use, or disposition of any data used under the Contract in a manner not authorized by the Contract, or by Federal or State statutes or regulations; and (3) Any failure of the Vendor, its officers, employees, or subcontractors to observe State and Federal laws including, but not limited to, labor and wage and hour laws.
- 47. PURCHASING AFFIDAVIT:** In accordance with West Virginia Code § 5A-3-10a, all Vendors are required to sign, notarize, and submit the Purchasing Affidavit stating that neither the Vendor nor a related party owe a debt to the State in excess of \$1,000. The affidavit must be submitted prior to award, but should be submitted with the Vendor's bid. A copy of the Purchasing Affidavit is included herewith.
- 48. ADDITIONAL AGENCY AND LOCAL GOVERNMENT USE:** This Contract may be utilized by and extends to other agencies, spending units, and political subdivisions of the State of West Virginia; county, municipal, and other local government bodies; and school districts ("Other Government Entities"). This Contract shall be extended to the aforementioned Other Government Entities on the same prices, terms, and conditions as those offered and agreed to in this Contract. If the Vendor does not wish to extend the prices, terms, and conditions of its bid and subsequent contract to the Other Government Entities, the Vendor must clearly indicate such refusal in its bid. A refusal to extend this Contract to the Other Government Entities shall not impact or influence the award of this Contract in any manner.
- 49. CONFLICT OF INTEREST:** Vendor, its officers or members or employees, shall not presently have or acquire any interest, direct or indirect, which would conflict with or compromise the performance of its obligations hereunder. Vendor shall periodically inquire of its officers, members and employees to ensure that a conflict of interest does not arise. Any conflict of interest discovered shall be promptly presented in detail to the Agency.

The service provider is responsible for any costs associated with the fingerprint-based state and federal background inquiry.

The State reserves the right to prohibit a service provider's employees from accessing sensitive or critical information or to be present at the Capitol complex based upon results addressed from a criminal background check.

**52. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS:** Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or

such operations, from steel made by the open heath, basic oxygen, electric furnace, Bessemer or other steel making process.

The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:

- a. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or
- b. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

**53. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL:** In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a "substantial labor surplus area", as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products.

This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

**4. CONTRACT AWARD, PERCENTAGE DISCOUNT, CATALOG:**

- 4.1 **Contract Award:** The Contract is intended to provide the Agency with a discounted price on all Contract Items. The Contract shall be awarded to the Vendor that meets the RFQ specifications and provides the lowest Total Bid Cost for the Contract Items listed on the Pricing Pages. Notwithstanding the foregoing, the Purchasing Division reserves the right to award this Contract to multiple Vendors if it deems such action necessary and to disqualify a Vendor if that Vendor's bid fails to bid sufficient items to meet the State's needs.
- 4.2 **Discount Percentage:** Vendor shall quote a single Discount Percentage that will reduce the lowest price shown in the Catalog for every Contract Item. The resulting Discounted Price shall be the price Agencies pay for purchases of that Contract Item under this Contract.

miscellaneous costs that Vendor may require, including delivery charges as indicated below, because those fees, charges, or other miscellaneous costs will not be paid separately. The Agency shall only pay the appropriate Discounted Unit Price for items purchased under this Contract.

- 4.3 Pricing Pages:** Vendor should complete the Pricing Pages by filling in any blank spaces with the information requested. The information requested on the Pricing Pages for each category of frequently purchased Contract Item includes the Vendor's Contract Item manufacturer, the manufacturer's number for each Contract Item, Manufacturer's List Catalog Price, Discount Percentage from Manufacturer's List Catalog Price, Discounted Unit Prices, Estimated Quantities, and Extended Cost. The Discount Percentage from Manufacturer's List Catalog Price shall be the same for all Contract Items of that Category. The estimated unit quantity for each item represents the approximate volume of anticipated purchases only. No future use of the Contract or any individual item is guaranteed or implied.

Notwithstanding anything contained herein, the Purchasing Division may correct errors on the Pricing Pages. Vendors are **strongly encouraged** to complete the Pricing Pages electronically in Microsoft Excel. Doing so will reduce the number of, and the possibility for, calculation errors. The Pricing Pages were created as a Microsoft Excel document and Vendor can request an electronic copy for bid purposes by sending an email request to the following address: [krista.s.ferrell@wv.gov](mailto:krista.s.ferrell@wv.gov).

The Purchasing Division reserves the right to take Vendor's Pricing Pages and insert the appropriate numbers into the Microsoft Excel spreadsheet if Vendor chooses to complete the Pricing Pages in any other way.

**5. Catalog:**

- 5.1 Submission.** Vendor must submit its Catalog prior to award of this Contract for evaluation purposes. Vendor shall also mail the Catalog free of charge to any Agency desiring to use this contract. Copies of the Catalog may be requested in an electronic format and should be provided in that format if possible. Vendor's Catalog will be used by Agencies to order Contract Items under this Contract.

Vendor should identify all items listed on the Pricing Pages by circling or highlighting those items in its Catalog and earmarking or tabbing the pages for those items, to assist in the evaluation and verification of the bids and pricing. If any discrepancies exist between the Pricing Pages and the actual price listed in the Catalog, the actual price shall prevail and the Pricing Pages may be corrected by the Purchasing Division buyer for evaluation purposes.

- 5.2 Catalog Modification.** The Purchasing Division may permit Vendor to update its Catalog at each renewal date. Determination of whether or not to allow a Catalog update is at the sole discretion of the Purchasing Division. Any request by Vendor to update its Catalog must include a detailed listing of the following: (1) any Contract Items being removed, Discounted Unit Prices for those items, Agencies quantity usage of those items, and total spent by Agencies on those items; (2) any Contract Items being added to the Catalog and the Discounted Unit Price of those items; (3) all changes in the Discounted Unit Price to Contract Items, estimated usage relating to items that have changed in price, and the total impact of the price change on the State; and (4) justification for updating its Catalog. The Purchasing Division may waive the detailed listing requirement if it finds that doing so is in the best interest of the State. Unless an updated catalog is approved, the Contract Items available under this Contract and prices for those items shall remain unchanged during the term of this Contract.

In the event that multiple vendors are awarded a contract under the RFQ, The first priority vendor shall not be permitted to include in its updated Catalog items being sold by a vendor that is lower in ordering priority without the consent of that lower priority vendor.

**6. DEALER DELIVERY SYSTEM:**

- 6.1 Dealer Network:** Agency and Vendor agree that Vendor will provide Contract Items to the State through its dealer network. Prior to award, Vendor should

REQUEST FOR QUOTATION

provide a list of all of its Dealers in and around West Virginia that will be participating in this contract.

- 6.2 Dealer Agreement:** Any dealer that will be participating in this Contract must sign a dealer agreement and submit the same to the State for processing prior to performing under this Contract.

Vendor must submit its proposed dealer agreement prior to contract award for review by the State. If the Vendor and the State are unable to agree upon acceptable terms of the dealer agreement then the State may disqualify Vendor's bid and move to the next lowest bidder. After the dealer agreement has been approved, Vendor should submit the dealer agreement to its dealer network and then return the signed dealer agreements to the Purchasing Division for attachment to this Contract prior to Contract award.

Additional dealers may be added after contract award by submission of a dealer agreement that will then be incorporated into this contract through a change order as described in the modification section of the terms and conditions.

## 7. PAYMENT

- 7.1 Payment:** Vendor shall accept payment in accordance with the payment procedures of the State of West Virginia. Payment shall be to Vendor who is then responsible for ensuring that the dealers in its network are paid.

## 8. DELIVERY AND RETURN:

- 8.1 Delivery Time:** Vendor shall deliver standard orders for tires not in stock at a dealer location within ten working days after orders are received. Vendor shall deliver emergency orders for tires not in stock at a dealer location within two working day(s) after orders are received. Vendor shall ship all orders in accordance with the above schedule and shall not hold orders until a minimum delivery quantity is met.
- 8.2 Manufacturer's Warranty Documentation:** A copy of the manufacturer's warranty shall accompany all tires provided to Agency.
- 8.3 Locations:** The vendor shall have sufficient locations to assure prompt delivery and service in all areas of West Virginia.
- 8.4 Late Delivery:** The Agency placing the order under this Contract must be notified in writing if orders will be delayed for any reason. Any delay in delivery that could cause harm to an Agency will be grounds for cancellation of the delayed

order, and/or obtaining the items ordered from a third party.

Any Agency seeking to obtain items from a third party under this provision must first obtain approval of the Purchasing Division.

**8.5 Delivery Payment/Risk of Loss:** Vendor shall include the cost of standard order delivery charges in its bid pricing/discount and is not permitted to charge the Agency separately for such delivery. The Agency will pay delivery charges on all emergency orders provided that Vendor invoices those delivery costs as a separate charge with the original freight bill attached to the invoice.

**9. MISCELLANEOUS:**

**9.1 No Substitutions:** Vendor shall supply only Contract Items submitted in response to the RFQ unless a contract modification is approved in accordance with the provisions contained in this Contract.

Vendor shall also provide reports, upon request, showing the items purchased during the term of this Contract, the quantity purchased for each of those items, and the total value of purchases for each of those items. Failure to supply such reports may be grounds for cancellation of this Contract.

## COOPERATIVE TIRE QUALIFICATION PROGRAM (CTQP) COOPERATIVE APPROVED TIRE LIST (CATL) CATL-1922

### FOR US GOVERNMENT PURCHASE OF:

**Non-Military: New & Retread Passenger Car Tires, Pursuit and Emergency High Speed Tires, Light Truck Tires, Truck/Bus Tires, & Off Road Severe Application Tires (ORSA)**

**Military: Retread Light, Medium and Heavy Tactical Truck and Trailer Tires**

This CATL-1922, revised April 2007, replaces all other previous versions.

The changes are only the Qualification Expiration Dates and the information on pages 2 and 3 following.

COOPERATIVE APPROVED TIRE LIST (CATL)  
OF  
PRODUCTS QUALIFIED UNDER ASTM STANDARD F1922  
AND SAE J2014 (FOR MILITARY RETREADS)  
AND ADMINISTRATIVE MANUAL CTQP-AM-1 922  
FOR  
TIRES, PNEUMATIC, VEHICULAR (HIGHWAY AND SPECIAL APPLICATIONS)  
(NEW AND RETREADED)

Per the 2005 Base Re-alignment and Closure (BRAC), responsibility for Department of Defense (DOD) ground vehicle tire contracting and management moved from the U.S. Army Tank-Automotive and Armaments Command (TACOM) to DLA. DLA has privatized the tire supply, storage, and distribution functions with a 5 year contract awarded to Michelin North America. The CTQP is no longer administered by an independent contractor and is limited in scope to tire groups that include a DOD ground vehicle tire application. The Engineering Support Agency (ESA) for DOD ground vehicle tires remains within the Tank Automotive Research Development and Engineering Center (TARDEC);

Address: TARDEC Team Tactical Vehicles & Tires  
AMSRD-TAR-E/TACT MS: 267

The DLA Defense Supply Center Columbus (DSCC) has overall management responsibility.

TARDEC has technical responsibilities which include test site and test plan approval, review and approval of test results, and notification to DLA of qualifications/changes.

Michelin updates and publishes via the internet CATL 1922 and 1923 lists as directed by DLA

This approved tire list has been updated by Michelin North America as required by Defense Logistics Agency (DLA) contract SPM7L1-07-D-7002 March 2007.. It is prepared for Group 1, passenger car tires, Group 2, light truck tires, Group 3, medium and heavy truck/bus tires, and Special Application tires (see Chapter II.B for explanations of each group). Tires listed in this CATL have been tested and/or approved for procurement by U.S. Federal, State and Local Government agencies. This list is based on the results of Qualification Testing as prescribed in ASTM standard F1922 and accompanying Administrative Manual CTQP-AM-1922, issue in effect at qualification test run. This list is subject to change without notice and revisions or amendments will be issued as necessary. The inclusion of tires on this list does not release the supplier from compliance with the specification requirements for tires supplied to the government.

The Cooperative Tire Qualification Program (CTQP) is a voluntary program designed to help ensure tire quality and performance for Government agencies. There is no legal requirement or national government policy mandate for government agencies to use the CTQP or this CATL list when purchasing tires.

The complete process for revising the CTQP is planned in three phases:

Phase 1 is this document, which is the current (2005) CATLs 1922 and 1923 with new Qualification Expiration Dates (i.e 2005/2006 becomes 2010, 2007/2008 becomes 2011, 2009/2010/2011 becomes 2012), and the request for comments from industry.

Phase 2 will be the revision of this document with additions that were granted under the past process and deletions for out-of-production tire lines. These should be provided by individual tire companies to TARDEC at one of the addresses above. After review and approval by TARDEC, these will be provided to DLA who will direct the changes to be made/published by Michelin. Comments from industry will be requested.

Phase 3 will be the collaboration of DLA, TARDEC, potential test organizations and the tire industry to establish procedures for future qualifications and revisions to the CATL lists. DLA and TARDEC have collaborated on the following outline which is intended to provide some idea of changes from the past system.

CATL-1922, April 2007

Proposed outline of the new process for tire approval is as follows:

1. Tire manufacturer selects a test tire which meets the requirements for a DLA managed tire National Stock Number (NSN). I.E CATL Groups, such as 1922 Group 1, Pursuit & Emergency High Speed, that do not have an NSN requirement; will no longer be included. Most CATL Groups will continue to be included. Inclusion of multiple MODEL/BRAND DESIGNATIONS within a Group will continue.
2. Tire manufacturer prepares and submits a detailed test plan conforming to ASTM F1922 to TARDEC for review and approval.
3. Tire manufacturer selects a TARDEC approved independent test facility or proposes an independent test facility for TARDEC review and approval.
4. TARDEC selects the reference tire.
5. Tire manufacturer contacts with the test facility to perform testing and notifies TARDEC of the test schedule at least 30 days in advance.
6. Test results are certified by the independent test facility and a copy of the test results/final report are sent directly to TARDEC.
7. TARDEC reviews test results/report and notifies the tire manufacturer of the approval or disapproval decision within 30 days.
8. If approved, TARDEC notifies DLA and Michelin. Within 10 days of notification, Michelin publishes the updated CATL via the internet.

NOTES:

1. Since all tires produced by a particular manufacturer were not offered for testing, the omission of any tire from this CATL does not necessarily mean that the unlisted tire is either unsafe or inferior in quality.

2. CATL updates will now be published online within 10 days of tire approval.

3. All sizes and ply ratings for the tires models/brands shown in this CATL are acceptable with the exceptions of the Group 1, Pursuit and Emergency High Speed and Military Tactical retreads, which are qualified by size, brand designation, and/or vehicle application/mission.

4. For more information on how to use the CATL when purchasing tires refer to Chapter III, "Using the CATL when Purchasing Tires." Manufacturers may obtain more information on how to become approved by contacting TARDEC via email at: [TireEngineering@tacom.army.mil](mailto:TireEngineering@tacom.army.mil)

5. With the exception of Pursuit and Emergency High Speed tires, tires tested in the CTQP program and listed as qualified in this CATL were tested for treadlife durability only and qualified at speeds of not more than 65 miles per hour for Passenger Car and Light Truck tires and not more than 55 miles per hour for Truck & Bus tires. CATL treadlife testing and qualification as listed does not certify or verify a specific tires ability to perform at higher rates of speed. For speed capabilities of tires refer to the manufacturers own recommendations and speed ratings as required by Federal Motor Vehicle Safety Standards.

## **CHAPTER I – INTRODUCTION AND STANDARDS**

### **I.A. INTRODUCTION**

1. *On the surface the CTQP program and CATL 1922 appear to be difficult to use. But using the CTQP program and CATL when making tire purchases can be easier if you understand what the CTQP and CATL are, how the CATL is formatted, and what the various codes in the CATL signify.*

2. *These instructions are designed to explain how to use the CTQP program and this CATL list when purchasing tires.*

3. *Because specific agency procurement guidelines dictate the methods in which government agencies procure tires the recommendations provided in this CATL are only suggestions on how you may use the CATL. When purchasing tires your specific procurement guidelines or rules always take precedence.*

### **I.B. WHAT IS THE CTQP PROGRAM AND CATL LIST?**

1. *Before using the CATL and CTQP to make tire purchases, the government buyer should understand what the CATL and CTQP are. The following paragraphs help explain them.*

2. *What exactly is the CTQP program? Technically the letters "CTQP" is an acronym, which stands for "Cooperative Tire Qualification Program." But in simple terms it's a program, which was developed to replace the past Federal Tire Program.*

3. *For decades the Government would test and qualify tires for government purchase and tires that passed the tests were added to a list called the Qualified Products List (QPL). This list was used by many government agencies to help them make smart tire purchases. Because of streamlining and Acquisition Reform efforts, the Federal Tire Qualification Program was discontinued in January 1997 and many Federal or Military tire standards were deemed obsolete. However, because tires are usually one of the highest maintenance cost for vehicle fleets (typically only second to fuel), the U.S. Army saw a need and benefit to continue a modified program. As a result the CTQP program was developed. This new program is similar to the past program except that it is administered via contract using commercial standards. Even though the program is administered through a contractor the U.S. Army maintains the needed oversight by monitoring the contractors performance and requiring the contractor to remain independent from tire industry.*

## **CHAPTER I – INTRODUCTION AND STANDARDS (continued)**

### **I.B. WHAT IS THE CTQP PROGRAM AND CATL LIST? (continued)**

4. *What is this CATL list? The letters "CATL" are an acronym that stands for "Cooperative Approved Tire List." Basically the CATL is nothing more than an approved list of tires and manufacturers that have passed testing and/or technical reviews to certain standards.*

5. *This CATL document is published for Highway type tires, some special application type tires and military tactical retread tires.*

6. *Including this CATL document, there are many other elements, which make up the CTQP Program such as test standards, administrative guidelines and a Cooperative Plant Quality Certification (CPQC) program for retreaders. The CTQP also has separate standards, guidelines and a different CATL available for Low Speed, Off Highway type tires.*

### **I.C. STANDARDS USED**

1. *To become qualified in the CTQP and listed in this CATL-1 922 for highway type tires, manufacturers products must be tested to meet or exceed the following standards:*

- (a) Passenger Car, Light Truck, Truck/Bus and Severe Application Tires: ASTM Standard F1 922, Test Method for Tires Pneumatic, Vehicular, Highway.*
- (b) Pursuit, Emergency & High Speed Tires: ASTM Standard F1 922, Test Method for Tires Pneumatic, Vehicular, Highway which requires tests and certification to ECE Regulation 324 & SAE J1561, Laboratory Speed Test Procedures for Passenger Car Tires.*
- (c) Retreads: The retread process must pass on-vehicle tests using ASTM Standard F1 922 (mentioned above). In addition to testing, individual retread plants/facilities must also be inspected and certified annually, to meet the quality requirements of CTQP-441, Administrator's Approval and Requirements Manual.*

2. *In 1998, the standards used for the CTQP program were officially approved by the American Society of Testing and Materials (ASTM). A chart showing the names and standards used for the CTQP program is shown on the next page. When referencing the CTQP program in contract solicitations use the names and standards indicated.*

## CHAPTER II – CATL FORMAT, CODES & DEFINITIONS

### II.A. FORMAT

1. *The CATL is formatted and sorted by tire group first, manufacturer or brand name owner second (alphabetically), then in sequence by assigned government item numbers and specific tire brand names. Other information listed are the qualified production points, test qualification reference numbers (identifies the specific test), qualification expiration dates, tread class and tire codes. Also in Appendix A you will find a complete list of manufacturers, retreaders or brand name owners addresses, telephone numbers and assigned CATL numbers.*

2. *This section helps explain the various groups, codes and reference numbers. As you are going through the definitions that follow, please refer to page 14 which shows a sample illustration page from a section of the CATL.*

### II.B. TIRE GROUP DEFINITIONS

1. *Because there are a wide variety of tire sizes, and tire size designations, from one manufacturer to another, and tire size designations are constantly changing, most tires in this CATL list do not include the specific tire sizes. Instead, tires in this CATL are listed by group. These tire groups are based on generic vehicle applications. To properly use this CATL list to purchase replacement tires you must first determine what vehicle group your tires will be applied to.*

2. *There are three basic groups of common type tires applications and two groups of special application type tires. These groups are listed below with more detailed explanations that follow:*

#### **(a) Group 1, Passenger Car Tires and Pursuit/Emergency High Speed Tires**

*(1) These tires include common passenger car tires. You can usually (but not always) identify tires of this group by looking for the letter "P" at the beginning of the tire size that is imprinted on the sidewall of the tire. An example of a tire size designation for this type of tire would be P205/75R15. Some common applications for these tires would be sedans and mini-vans.*

*(2) This group also includes a section for Pursuit/Emergency, High Speed Tires that are listed by specific tire size, speed rating code and brand name. Pursuit/Emergency, High Speed Tires would be applied to vehicles such as police cars, ambulances and other high speed emergency vehicles. Examples of these type of tire sizes would be P225/60R15(V) {V is the speed rating} or 225/60ZR1 6 {Z is the speed rating}.*

## CHAPTER II - CATL FORMAT, CODES & DEFINITIONS (continued)

### II.B. TIRE GROUP DEFINITIONS (continued)

**(a) Group 2, Light Truck Tires**

*This group is your common Light Truck tires. You can usually (but not always) identify tires of this group by looking for the letter "LT" at the beginning of the tire size that is imprinted on the sidewall of the tire.*

*However many older tire designs of bias construction do not include an "LT" designation in the tire size. An example of a radial tire size designation for this type of tire would be LT235/85R16. An example of a bias tire size would be 7.50-16. Common applications for these tires would be Pick-Up Trucks, Sports Utility Vehicles and some Trailers.*

**(b) Group 3, Truck & Bus Tires**

*These tires include medium and heavy truck, bus and trailer tires. Unlike Passenger Car and Light Truck tires, these tires do not have a letter designation at the beginning of the tire size. Examples of a tire size designations for these type tires would be 11R22.5 {for radial} and 10.00-20 {for bias}. Some common applications for these type tires would be Buses, Semi-Trucks/Trailers, Delivery Vans, Cargo Trucks, and non-tactical Military Supply Trucks and Troop Carriers.*

**(c) Special Application: Off-Road, Severe Application (ORSA) Tires**

*These tires are Special Application, Light Truck tires, which are used in severe off-road conditions. Some vehicle applications for these tires would be Pick-Up Trucks and Sport Utility Vehicles used by the U. S. Border Patrol and U.S. Forestry Service.*

### II.C. GOVERNMENT ITEM NUMBER DEFINITIONS

*All tires listed in this CATL have been assigned Government Item numbers. These numbers can be used to help identify a specific tire easier. More importantly, these numbers have codes that provide detailed information and an identity for each tire brand listed. An example, with explanations of each code of an assigned Government Item Number follows on the next page.*

## CHAPTER II - CATL FORMAT, CODES & DEFINITIONS (continued)

### 11.C. GOVERNMENT ITEM NUMBER DEFINITIONS (continued)

#### Example Government Item Number: X3.2.12RA/RB

- *The first position, "X" is the tire style. There are two styles; X which is a new tire or Y which is a retread tire. In this example this would be a new tire.*
- *The second position, "3" is the tire group. This example is a Group 3, Truck and Bus Tire. 1 is Passenger Car; 2 is Light Truck; 3 is Truck/Bus; "ORSA" is Off-Road, Severe Application; and "MIL" is Military Tactical application.*
- *The third position, "2" is the manufacturers assigned CATL number. All manufacturers are assigned CATL numbers and in this example the manufacturer of the tire would be Bridgestone/Firestone (U.S.A.) Incorporated. See the list in Appendix A, which shows all manufacturers assigned CATL numbers.*
- *The fourth position, "12" is a sequence number assigned to the specific tire brand name when it was listed. In this example this tire is the 12<sup>th</sup> Bridgestone/Firestone Inc. tire that was listed for Group 3.*
- *The fifth and six position, "RA/RB" identifies the construction of the tire and whether it is tube or tubeless. In this example the tire is of radial construction and is available as either tube or tubeless. The following explain what these style codes stand for:*

> *RA = Radial, Tubeless.*

> *RB = Radial, Tube Type*

> *BA = Bias, Tubeless.*

> *BB = Bias, Tube Type*

> *RA/RB = Radial, Tubeless or Tube Type*

> *BA/BB = Bias, Tubeless or Tube Type*

## CHAPTER II - CATL FORMAT, CODES & DEFINITIONS (continued)

### II.D. CODE DEFINITIONS

*The CATL shows a column of additional codes assigned to each tire listed. These codes provide more details about the tire construction, usage information and vehicle/axle applications. Explanation of these codes follow:*

#### CODES

*AP = All Position (NOTE: Some o/o tires are designated by the manufacturer as All Position. Before placing o/o tire designated "DA" on the steer position, consult the tire manufacturer).*

*DA = Drive Axle only (NOTE: When this code is used in the Light Truck tire area, keep in mind that if you are placing these tires on a 4X4, "DA " does not mean that they can be placed on all axle positions).*

*LP = Low Profile*

*EHS = Emergency High Speed*

*PS = Polyester/Steel construction (Body Cord/Belt Cord)*

*PSA = Polyester/Steel/Arimid construction*

*PSN = Polyester/Steel/Nylon construction (Body Cord/Belt Cord/Breakers)*

*N = Nylon construction (Body Cord)*

*ND = Non Directional Tread (usually military design)*

*NRFSR = Not Recommended for Secondary Roads*

*SR = Speed Rating (see next page for speed code definitions)*

*SS = Steel/Steel construction (Body Cord/Belt Cord)*

*STC = Snow Traction Capability*

*TO = Trailers Only position*

## CHAPTER II - CATL FORMAT, CODES & DEFINITIONS (continued)

### II.E. SPEED CATEGORY CODES

*In addition to the normal tire codes, Pursuit and Emergency, High Speed Tires also have a Speed Category Code Assigned to them which tells the speed rating of the tires. Explanation of these codes follow:*

<u>SPEED SYMBOL</u>	<u>SPEED CATEGORY</u>
<i>S</i>	<i>112 MPH (180 KM/H)</i>
<i>T</i>	<i>118 MPH (190 KM/H)</i>
<i>U</i>	<i>124 MPH (200 KM/H)</i>
<i>H</i>	<i>130 MPH (210 KM/H)</i>
<i>V</i>	<i>149 MPH (240 KM/H)</i>
<i>W</i>	<i>168 MPH (270 KM/H)</i>
<i>Y</i>	<i>186 MPH (300 KM/H)</i>
<i>Z</i>	<i>See note below.</i>

#### NOTES:

- > *Speed category codes are assigned to a tire and denotes the maximum speed for which the use of the tire is rated (all EHS or PEHS coded tires are speed rated).*
- > *Open ended speed category "Z": For tires having a maximum speed capability above 149 MPH, a "Z" may appear in the size designation. For tires having a maximum speed capability above 186 MPH, a "ZR" must appear in the size designation. Consult the tire manufacturer for maximum speed capability of the particular tire when there is no service description.*

### II.F. TREAD "CLASS" DEFINITIONS

*The CATL also shows a column of tread class codes assigned to each tire listed. These tread class codes provide details about the tread design and how the tire should be used based on its tread design. Explanations of these tread class codes are on the next page. For more detailed tread class descriptions please refer to ASTM Standard F1 922 and Administrator Manual CTQP-AM 1922.*

<i>O/O/S =</i>	<i>ON/OFF ROAD SEVERE APPLICATION</i>
<i>M/S =</i>	<i>MUD AND SNOW (applies to Passenger Car and Light Truck tires only)</i>

*NOTE: To help describe the tire tread better, some tires may be identified further with a "(rib)" or "(lug)" designation next to the tread code.*

*NOTE: Some newer tires are designed for use in severe snow conditions and are marked on at least one sidewall with the letters "M" and "S" (e.g., MS, M/S, M&S, M+S, etc.) plus have a pictograph of a mountain with a snowflake. If you need more information on tires designed for severe snow conditions contact the CTQP Administrator (at (810) 677-5745) or refer to Rubber Manufacturers Association, Tire Information Service Bulletin, Volume 37, Number 2, February 1999 and titled "RMA Definition for Passenger and Light Truck Tires for Use in Severe Snow Conditions." An example of the mountain/snowflake is shown below.*

- G. This is the tire code which tells the tire construction and where and how the tire may be used. Refer to page 11 for definitions of these codes.

## CHAPTER III - USING THE CATL WHEN PURCHASING TIRES

*Your specific procurement guidelines will dictate the specific contract language you use when purchasing tires. However the following is a step-by-step example of how you may use the CATL when purchasing tires.*

**STEP 1, IDENTIFY WHAT YOU NEED:** *Identify the tire group you need to buy by looking at your vehicle applications and the tires you currently have. Provide a good description of the type and size for the tires you want to purchase in your contract solicitations. It's also recommended that you identify vehicle application info in your contracts when possible, as most manufacturers will match an appropriate tire for the application. When using the CATL to make purchases, make sure you identify the tire group, codes and tread classes. For example if you were purchasing replacement tires for a fleet of 1997 Ford Explorer Vehicles, that were originally equipped with radial, LT235/85R16 tire size, Load Range D, All Season, Rib type tread you could use the following description:*

**EXAMPLE:** Radial, LT235/85R16, Load Range D, for application on 1997, All Wheel Drive, Ford Explorer. Tires should be Group 2, Light Truck tires, All Season, Rib Tread class, and All Position as defined by the latest version of CATL 1922.

**STEP 2, REQUIRE CATL QUALIFICATION:** *Require in your contract solicitation that the prospective tire manufacturer or supplier be CATL qualified and that the tire brand be listed in the CATL or that the manufacturer/supplier provide proof of CATL qualification with a Qualification Certification Form (these forms are issued to all manufacturers upon successful completion of qualification testing). Example language you could use is as follows:*

**EXAMPLE:** Prospective contractors and their tire brands submitted under this solicitation must be qualified and listed in CATL 1922, or provide a Qualification Certification Form signed by the CATL program Administrator.

**STEP 3, PUT IT ALL TOGETHER:** *A complete example of contract language for purchasing new tires could be as follows:*

**EXAMPLE:** Tires are to be radial, LT235/85R16, Load Range D, for application on 1997 All Wheel Drive Ford Explorer. Tires should be Group 2, Light Truck tires, All Season, Rib Tread class, and All Position as defined by CATL 1922. The prospective contractor(s) and their tire brand(s) submitted under this solicitation must be qualified and listed in CATL 1922, or provide a Qualification Certification Form signed by the CATL program Administrator.

## CHAPTER III - USING THE CATL WHEN PURCHASING TIRES (continued)

**STEP 4, FOR RETREADS:** *For the obvious environmental and cost advantages, it's suggested that retreads be used to the maximum extent possible. Retread processes are also tested and listed in the CATL. However because quality may vary from one retread facility or franchise to another, each retread facility is also required to be inspected and certified annually to certain quality control standards (CTQP-441). Therefore the retreaders' process should not only be listed in the CATL but also the specific retread plant/facility should be able to provide a Cooperative Plant Quality Certification (CPQC).*

*A complete example of contract language for purchasing retread services could be as follows:*

**EXAMPLE:** Retread services for radial, LT235/85R16, Load Range D, for application on 1997 All Wheel Drive Ford Explorer. Tires will be retreaded for Group 2, Light Truck tires, All Season, Rib Tread class, and All Position as defined by the latest version of CATL 1922. The prospective retread contractor process brand name(s) must be qualified and listed in CATL 1922, or the retreader may supply a Qualification Certification Form signed by the CATL program Administrator. Prospective retread contractors must also provide a current copy of a Cooperative Plant Quality Certification (CPQC) which certifies compliance with CTQP-441 for any and all retread facilities or plants, which will provide retread services under this contract.

**STEP 5, VERIFY QUALIFICATIONS AND AWARD THE CONTRACT:** *Verify the contractor(s) and tire(s) qualifications by checking what is proposed to the CATL list. For retreaders make sure they also supply a copy of CPQC facility certification. If everything is in order award the contract.*

## OWNER/USE OBLIGATIONS

To make a claim under this limited warranty, you must present a claim with the tire/casing to a CTNA brand tire retailer or vehicle or authorized to handle tire adjustments. You will be required to the CTNA brand tire adjustment/replacement claim form.

You are responsible for payment of all applicable taxes and charges incurred during replacement or repair of tires including demounting, mounting and balancing. You are also responsible for payment for tire rotation, alignment, towing, road service and valve stem.

## IMPORTANT SAFETY WARNING AND MAINTENANCE INFORMATION

Any tire, no matter how well constructed, may fail as a result of a rupture, impact damage, improper inflation or other condition resulting from improper use. Tire failures such as a blowout or a tread and belt detachment may create a risk of injury or death and/or property damage, or reduce the risk of tire failure. Continental Tire strongly recommends you read the vehicle owner's manual, tire placard information, and tire sidewall information regarding safety warnings, proper tire use and maintenance.

## SERIOUS INJURY OR DEATH MAY RESULT FROM TIRE FAILURE OR EXPLOSION AS A RESULT OF ANY OF THE FOLLOWING:

- CHECK** the pressure in your tires at least monthly, preferably before every trip, when the tires are cool (after the vehicle has been stopped three (3) hours and then driven less than one mile). Do not reduce pressure when tires are hot. Use a quality tire gauge to check pressure and maintain it at the level recommended by the vehicle manufacturer. Remember - under inflation is the most common cause of blowouts or sudden failures in any kind of tire and may result in unexpected loss of vehicle control or accidents. Permanent tire damage due to underinflation and/or overloading cannot always be detected. Any tire known or suspected to have been run at 80% or less of normal operating inflation pressure and/or overloaded could possibly have permanent structural damage (steel cord fatigue). Ply cords weakened by underinflation and/or overloading may break one after another; until a rupture occurs in the upper sidewall with accompanying instantaneous air loss and explosive force.
- AVOID** explosion of the tire/rim/wheel assembly due to improper mounting. Never exceed 40 PSI (air pressure) when seating beads. Always use a safety cage or other restraining device and clip-on extension hose. Only specially trained persons should mount tires.
- AVOID** explosion of the tire/rim/wheel assembly due to welding the rim by first removing the tire and never rework, weld, heat, or prize the rim of a tire/rim/wheel assembly.
- NEVER** overload your tires. The maximum load carrying capability of your tires is molded on the sidewall of the tire and specific loading instructions are provided by the vehicle's manufacturer.
- ALWAYS** mount radial tires on approved radial rims or wheels. For tires requiring a tube, use only tubes and flaps approved for radial tires (identified with red band around valve and stem or stem marked "radial"

or "R"). Always use new radial tubes and flaps when mounting new tube-type radial tires.

**6. AVOID** excessive tire spinning when your vehicle is stuck in snow, mud or sand and never exceed 35 mph indicated on speedometer. The centrifugal forces generated by a free spinning tire/wheel assembly may cause a sudden tire expansion resulting in vehicle damage and/or serious personal injury. Use a gentle backward and forward rocking motion to free your vehicle for continued driving. Never stand near or behind a tire spinning at high speed while attempting to push a vehicle that is stuck.

**7. CHECK** your tires frequently for scrapes, bulges, separations, cuts or snags resulting from use. Impact can damage the inner portions of your tire without being visible on the outside. If you suspect that possible impact damage may have occurred, have an authorized CTNA dealer inspect the inner surface of your tire immediately in order to avoid possible sudden failure.

**8. NEVER** operate your vehicle in excess of lawful speeds or the maximum speeds justified by driving conditions.

**9. MAKE** every effort to avoid running over objects that may damage the tire through impact or cutting, such as chiselholes, glass, metal, etc.

**10. NEVER** drive on smooth tires. Vehicles under the jurisdiction of the Bureau of Motor Carrier Safety (more than 10,000 lbs. gross vehicle weight) must by law have at least 4/32nds inch tread depth on front-wheel tires. On vehicles of 10,000 lbs. or less gross vehicle weight, front tires must be replaced when worn to the treadwear indicators or 2/32nds inch. On any vehicle, tires in drive and/or trailer positions must be replaced when worn to the treadwear indicators or 2/32nds inch tread depth remaining.

## LIMITED WARRANTY/ADJUSTMENT POLICY

This Limited Warranty and Adjustment Policy ("Limited Warranty and Policy") issued by Continental Tire North America, Inc. ("CTNA") is a promise of replacement under certain specified conditions. It applies to tires in normal highway service displaying adjustable conditions (see Section 4 – Exclusions) and does not require the existence of a deficiency in workmanship or materials in order to qualify for adjustment. THIS LIMITED WARRANTY AND POLICY IS NOT A WARRANTY THAT YOUR TIRE WILL NOT FAIL OR BECOME UNSERVICEABLE IF NEGLECTED OR MISTREATED.

### I. ELIGIBILITY

This Limited Warranty and Policy applies to the original owner of new Continental/General brand On/Off-Highway Radial Truck Tires used in normal service bearing our brand name and serial numbers ("Eligible Tires").

Tires branded "Blom" (Blomish) will be adjusted on the original tread in the same manner as described below except ride and/or appearance conditions are not considered adjustable. Tires branded "used" or scribed with an "X" are not eligible under this Limited Warranty and Policy.

All tires must be installed and used according to the vehicle manufacturer's and CTNA's recommendations.

## 2. WHAT IS THE ADJUSTMENT POLICY AND FOR HOW LONG?

### ORIGINAL TREAD (New Tire)

Eligible Tires receive the following coverage: HSL Eco Plus and HDL Eco Plus have an extended original casing warranty of 7 years (84 months), all other products have a maximum of 6 years (72 months) from date of purchase. If a Medium or Heavy Truck Tire in normal service comes unserviceable from a condition other than those listed under section 4 during the time or treadwear periods shown below, it will be replaced with a comparable\*\* new Continental/General brand tire according to a, b and c, below.

### a. FREE REPLACEMENT POLICY

	Time*	Treadwear
All Radial Medium/ Heavy Truck Tires	First 12 Months (Whichever comes first)	First 10%
All Bias Truck Tires	None	First 10%

Owner pays for mounting and any other service charges.

### b. PRO-RATA REPLACEMENT CREDIT POLICY

After the free replacement policy expires and the tire or tube is still within the warranty time frame outlined in section 2c, you will receive a replacement pro-rata credit (excluding tax) toward the purchase of a comparable\*\* new Continental/General brand tire or tube equal to the percentage of tread depth remaining to the treadwear indicators (2/32nds of an inch), at which time the tread is worn out.

\* If the months of service and date of purchase for an Eligible Tire cannot be accurately determined, adjustment credit will be based upon the date of manufacture (DOT serial number) and tread depth remaining.

\*\* A "comparable" new Continental/General brand tire may be either the same tire line or the same basic construction but with a different sidewall or tread configuration. If a higher priced tire is accepted as replacement, the owner will pay the difference in price. Any tire replaced under this Limited Warranty and Policy will be covered by the then current CTNA Limited Warranty and Policy.

### c. RADIAL CASING PROVISIONS (Retreads)

The radial casing provisions will apply to tire/casing operating in "normal highway service" only – tire/casings used in off-the-highway service (construction or mining) are not eligible under these casing provisions.

In the event a Radial Medium or Heavy Truck Tire/Casing will not accept the first retread due to an adjustable condition, it is eligible for the applicable casing value shown below.

In addition, casings already retreaded and that are within the number of months specified below from date of manufacture of the casing (DOT Serial Number) or number of retreads specified, whichever comes first, are eligible for the applicable casing value shown in table 1 below.

All casing credits will be allowed toward the purchase of a comparable new Continental/General brand Medium or Heavy Truck Tire.

## 3. HOW CREDITS ARE CALCULATED

For adjustments made on original tread tires which are not eligible for a no charge adjustment as provided above, you will receive replacement credit toward a new tire equal to the percentage of remaining tread depth multiplied by the price shown on your original invoice, if available, or on the authorized adjusting retailer's regular selling price (excluding tax) at the time of the claim for a comparable new Continental/General brand tire. Owner pays current Federal Excise Tax (not applicable for Canadian sales).

## 4. WHAT IS NOT COVERED BY THE ADJUSTMENT POLICY

### a. NON-ADJUSTABLE CONDITIONS

**Road hazards** – cuts, snags, tread tearing or chunking, punctures, bruises or impact breaks and any damage caused by improper puncture or the repair such as separation in any part of the tire. Continued use while the tire is flat.

**Damage** – tire damage or failure resulting from improper operation or maintenance – load, speed and inflation practices, causing excessive operational temperatures to exceed the tire capabilities.

**Premature removal for irregular treadwear or fast wearout** – tire failure or tire damage resulting from: vehicle accidents, improper mounting, demounting, damaged wheel and rim components, wheel misalignment, tire truing, chain damage, brake or any similar mechanical problem, extreme temperature exposure, misuse, negligence or abusive driving such as tire spinning or racing, and improper use contrary to the vehicle manufacturer's tire recommendations.

**Age Conditions** – age conditions, such as cracks, on tires purchased more than four (4) years prior to presentation for adjustment are considered not adjustable. If proof of purchase date is not provided, the tire serial number will be used.

**Intentional Alterations** – such as tread regrooving or adding sealant materials to the tire.

**Casings** – if casings/retreads are not identified for number of retreads applied, credit will be allowed at the lowest value only.

Radial casing failure due to improper retreading practices or tread worn beyond retread point (4/32nds) or used in not approved service application. Radial casings older than the number of months specified from date of manufacture, or retreaded more than the number of specified times, or branded "used."

Ride/Vibration – after the Eligible Tire is more than 25% worn.  
Transferred Tires – from the vehicle than they were originally installed.

#### b. GENERAL EXCLUSIONS

- \* Tires/casings older than years/months specified in Section 2a., 2b., and 2c. from date of purchase are not covered by this Limited Warranty and Policy. If satisfactory proof of purchase date is not provided, the date of manufacture (tire serial number) will be used.
- \* Tires on any truck registered and operated outside the United States and Canada.
- \* Tread wearout is not covered by this Limited Warranty and Policy. Because of variations in vehicles, conditions of use and driver habits, CTNA does not warrant any tire will achieve a predetermined mileage.

No CTNA employee or dealer has the authority to make any warranty, representation, promise or agreement on behalf of CTNA except as stated in this Limited Warranty and Policy.

THIS LIMITED WARRANTY AND POLICY IS MADE IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. CONTINENTAL TIRE EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. SOME STATES AND PROVINCES DO NOT PERMIT SUCH A LIMITATION; FOR THOSE STATES AND PROVINCES, ANY IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED IN DURATION TO THE DURATION OF WRITTEN WARRANTY.

TO THE EXTENT PERMITTED BY LAW, CONTINENTAL TIRE DISCLAIMS LIABILITY FOR ALL CONSEQUENTIAL AND INCIDENTAL DAMAGES. THE REMEDIES SET FORTH IN THIS LIMITED WARRANTY ARE THE SOLE AND EXCLUSIVE REMEDIES FOR BREACH OR WARRANTY.

SOME STATES AND PROVINCES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES OR EXCLUSIONS OR LIMITATIONS ON IMPLIED WARRANTIES OR ON THE DURATION OF SUCH WARRANTIES, SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU.
