purchasing agency tenders the initial payment to Vendor.

- 43. VENDOR CERTIFICATIONS:** By signing its bid or entering into this Contract, Vendor certifies (1) that its bid was made without prior understanding, agreement, or connection with any corporation, firm, limited liability company, partnership, person or entity submitting a bid for the same material, supplies, equipment or services; (2) that its bid is in all respects fair and without collusion or fraud; (3) that this Contract is accepted or entered into without any prior understanding, agreement, or connection to any other entity that could be considered a violation of law; and (4) that it has reviewed this RFQ in its entirety; understands the requirements, terms and conditions, and other information contained herein. Vendor's signature on its bid also affirms that neither it nor its representatives have any interest, nor shall acquire any interest, direct or indirect, which would compromise the performance of its services hereunder. Any such interests shall be promptly presented in detail to the Agency.

52. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS: Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open heath, basic oxygen, electric furnace, Bessemer or other steel making process.

The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:

- a. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or
- b. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

53. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL: In Accordance

with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a "substantial labor surplus area", as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products.

This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

ATTACHMENT AQuestions:

Q1: Do you know if they will be marking the basketball court with the appropriate lines?

A1: The basketball court will not be painted or marked.

Clarifications:

C2: Remove Section 1.01, Part C – Basketball Court in its entirety and replace with the following:

C. Basketball Court:

- 1) The new basketball court will be located to the front left side of building 'J'. There are two existing volleyball nets located to the left side of building 'J'. The new basketball court will be located in the area where the closest volleyball net is located to building 'J'. The DOC will remove the existing two (2) volleyball poles and net.
- 2) The new basketball court must be thirty-six (36') feet wide by sixty-five (65') feet long.
- 3) The DOC has purchased the two (2) basketball hoops, which also includes the backboards, nets, and poles. The contractor is to install the basketball hoops and assorted items previously mentioned. The DOC will turn over to the contractor for installation. The top of the basketball hoop must be ten (10') above finished grade. The basketball hoop poles must be installed three (3') feet deep with concrete poured around the poles. The concrete must be one (1') foot in diameter and three (3') feet deep. Poles must not be easily pushed over.
 - a) Site preparation for new basketball court:
 1. For the area where the basketball court will be located, the contractor must remove eleven (11") inches of existing soil for the thirty-six (36') feet wide by sixty-five (65') feet long area. Ground must be compacted. Any soil that is removed, the DOC has a location onsite that the spoils can be dumped.

b) Installation of new base:

1. A new hard base made of number fifty-seven (#57) crush and run gravel must be put down and compacted to six inches (6") in height for the entire thirty-six (36') feet wide by sixty-five (65') feet long area. The contractor cannot lesson the thickness of the new base.

c) Installation of asphalt:

1. For the thirty-six (36') feet wide by sixty-five (65') feet long area, a new course asphalt pavement (base #2) must be put down over top the new base. The course asphalt pavement base must be three (3") inches thick in height after rolled and compacted. A new wearing layer of asphalt pavement must be put down over top the course asphalt pavement base. The wearing asphalt layer must be two (2") inches thick after rolled and compacted.
2. The entire thirty-six (36') feet wide by sixty-five (65') feet long area finished product must be even with the top of the existing ground. There must not be any tripping hazards on the sides of the new walking track.
3. The new basketball court must be level and no standing water should puddle on top of the basketball court.
4. The contractor cannot lesson the thickness of the previous stated amounts of asphalt pavement in items c(1). If the contractor must adjust the amount of gravel and soil to be removed to be more than what is specified previously, it is the contractor responsibility.

C3: Remove Section 1.01, Part D – Walking Track (Alternate #1) in its entirety and replace with the following:

D. Walking Track (Alternate #1)

- 1) In front of building 'J' there is an existing concrete sidewalk. Around the large field area, there is a gravel walkway that links to two (2) different areas of the existing concrete sidewalk. The existing gravel walkway is an estimated three (3") inches to six (6") inches thick. This is just an estimate and the DOC is not responsible for any misinformation in this measurements.

- 2) The new asphalt walking track will be located in the same area where the gravel walking track is located. The new walking track will be six hundred-eighty (680') feet long and eight (8') feet wide.
- a) Site preparation for new walking track:
1. At the end of the walking track closest to the main building, the contractor must remove eleven (11") inches of the existing gravel and soil below the existing normal ground level for the six hundred eighty (680') feet that must be at least eight (8') feet wide. Ground must be compacted. Any gravel and soil that is removed, the DOC has a location onsite that the spoils can be dumped. If all possible, please separate the gravel and soil.
- b) Installation of new base:
1. A new hard base made of number fifty-seven (#57) crush and run gravel must be put down and compacted to six inches (6") inch height for the entire six hundred eighty (680') feet by eight (8') feet wide. The contractor cannot lesson the thickness of the new base.
- c) Installation of asphalt:
1. For the six hundred eighty (680') feet by eight (8') feet wide, a new course asphalt pavement (base #2) must be put down over top the new base. The course asphalt pavement base must be three (3") inches thick in height after rolled and compacted. A new wearing layer of asphalt pavement must be put down over top the course asphalt pavement base. The wearing asphalt layer must be two (2") inches thick after rolled and compacted.
 2. The entire six hundred eighty (680)' feet long by eight (8') feet wide track finished product must be even with the top of the existing ground. There must not be any tripping hazards on the sides of the new walking track.
 3. The contractor cannot lesson the thickness of the previous stated amounts of asphalt pavement in items c(1) and c(2). If the contractor must adjust the amount of gravel and soil to be removed to be more than what is specified previously, it is the contractor responsibility.

C4: Contractor must use tac spray between the new course asphalt pavement (base #2) and the wearing asphalt layer.
