Thank you for the opportunity to submit this bid for DPS 1413. Our proposal includes genuine Ford and Motorcraft, original equipment brakes and rotors for the Ford applications. Where available, we will use Motorcraft Super Duty brake pads, that are specifically designed to meet the extremes of commercial use vehicles, such as Ambulance, Police, and Taxis. All Ford and Motorcraft brakes and rotors are certified to meet FMVSS standards and carry a two (2) year, unlimited mileage warranty, that includes labor, effective with purchases made after October 1, 2013.

For the GM and Dodge applications, we will use brakes and rotors from the Professional line of GM Durastop. This product line is D3EA certified, and carries a 12 month / 12,000 mile parts warranty.

I am available for discussion if any questions arise.

Motorcraft®

OUR BRAKES MEET FMVSS STANDARDS!

Certified to Federal Safety Standards

Because they're built to Ford specifications, every Motorcraft® brake friction part undergoes thorough FMVSS 105/135 On-Vehicle Federal Certification Testing. This testing ensures the safe operation of the vehicle's braking system under a variety of real-world driving conditions. On-vehicle testing is far more costly and complex but gives much more accurate feedback than dynamometer tests.

In addition, the Los Angeles Sheriff's Department and Michigan State Police have contributed to the development of the Interceptor braking package. Input from this development testing has helped maximize braking performance and long pad life.

- FMVSS testing evaluates stopping distance and fade from different speeds
 - At light loads
 - At the maximum gross vehicle weight
 - At extreme brake temperatures with minimum recovery time between tests
 - Under partial system failure conditions such as losing power assist if engine stalls (i.e. ran out of gas)
- FMVSS testing is required testing for OE manufacturers
- Aftermarket manufacturers are not required to perform FMVSS tests and often rely on dyno or D3EA testing
- Motorcraft® brake friction parts are FMVSS tested on EVERY Ford vehicle platform
- On-vehicle testing allows parts to be fine-tuned to each vehicle platform for optimum performance and front to rear balance

What FMVSS Testing Means to You

When you install Motorcraft® brake pads and shoes on your vehicles, you know you're installing quality. You know that they have been thoroughly tested to meet Federal guidelines for:

- Stopping distance
 - 62 mph – 0 w/112 lbs. of pedal pressure
 - Full system active = 229 feet or less
- Brake fade
 - Repeated stops with limited recovery time
 - Tests system to ensure brake balance during simulated emergency situations

Friction Formulas are ALL ON-VEHICLE Tested

Motorcraft® premium brake pads and shoes are designed, engineered, tuned AND TESTED for EACH specific vehicle. And, as design changes occur after original testing has been completed, they are incorporated into new Motorcraft® products, something aftermarket manufacturers typically don't do.

Best of all, they're backed by Ford Motor Company and its 100 years of experience, so you know they've been tested tough!

Quality Issue with Competitor Oil Filters*Bulletin 10D-121*

GM has recently seen an increase in engine damage caused by aftermarket filters that often don't meet or exceed GM filter performance specifications (GM Service Bulletin #10-06-01-003). The filter failures have resulted in increased warranty expense and reduced customer satisfaction.

It should be explained to your customers that ACDelco oil filters are designed to the original-equipment specifications of his or her GM vehicle and there is a risk when using a filter that doesn't meet those specifications.

ACDelco and General Motors have produced several reference items that address the issue and explain the importance of using ACDelco filters. Contact your WD or ACDelco Rep for information.
