Expression of Interest  
Professional Mapping and Design Services at the  
Chicopee Coal Company, Inc. S-3006-99 and S-3002-98  
Nicholas County, West Virginia  
DEP16557

Gentlemen:

CBC Engineers & Associates, Ltd (CBC) appreciates the opportunity to submit our proposal in response to your Request for Expression of Interest DEP16557 to provide professional mapping and design services. These services will result in the development of mapping, engineering drawings, contract specifications, and other contract documents required for the **Bond Forfeited Permits of Chicopee Coal Company, Inc. S-3006-99 and S-3002-98** project in Nicholas County, West Virginia.

CBC is particularly well qualified to provide the State with the above referenced services offered at the most satisfactory terms, from both a technical and cost standpoint. The work under this contract will be performed both in our Dayton, Ohio and Charleston, West Virginia offices. **CBC has provided the mining industry with quality engineering services since 1995**, and based on CBC's experience and knowledge of the current regulatory laws, regulations, procedures, interpretations and requirements, our firm is well suited to perform all referenced services.

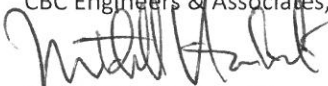

CBC welcomes you to visit our facility located at 3729 Teays Valley Road, Hurricane, WV 25526.

CBC has:

- On staff three (3) West Virginia registered civil and mining engineers who will review, stamp, and sign all work and contract documents.
- Available staff of geotechnical, civil and mining engineers, CADD operators, surveyors, and biologists with extensive expertise in reclamation engineering, hydrology, and geology: and
- Extensive experience in surface and underground coal mining, environmental, ecological principals, stream restoration and mitigation, and contract administration.

We look forward to building a strong relationship with the WVDEP-OSR.

Sincerely,  
CBC Engineers & Associates, Ltd.

Mitchell T. Hardert, PE  
Chief Engineer and Vice President

## 1.0 Introduction

CBC Engineers & Associates, Ltd. (CBC) proposes to provide professional mapping and design services to the West Virginia Department of Environmental Protection, Office of Special Reclamation (WVDEP-OSR). These services will result in the development of mapping, engineering drawings, contract specifications, and other contract documents as may be required for the Bond Forfeited Permits of Chicopee Coal Company, Inc. S-3006-99 and S-3002-98 project in Nicholas County, West Virginia. Prepared construction documents will consist of:

- Prepare work areas by clearing and grubbing.
- Install new and refurbish existing drainage controls and erosion protection (sediment ponds, sediment ditches, and diversions).
- Locate, protect and/or avoid existing utility lines, poles, gas lines, etc. Also, coordinate with utility companies for locating and relocating existing facilities and/or providing for new utility services.
- Construct new and upgrade existing access roads, and install culverts.
- Install mine seals, and subsurface drains.
- Preform blasting designs and pre-blast surveys, if needed for reclamation of site.
- Eliminate existing highwalls by backfilling and regading with materials available onsite, or designated borrow area sites nearby.
- Install surface water ditches where appropriate to control runoff.
- Repair or eliminate any slip areas on partially backfilled highwalls.
- Regrade/remove sediment ditches when not needed.
- Reshape, and add lime amendments to any potentially toxic coal refuse piles.
- Condition, stabilize, and revegetate disturbed land by the plan view acre, based on post-mine land use from permit files and landowners.
- If long term water treatment is anticipated on the site, prepare and regrade areas to accommodate space for structures or facilities.
- Design efficient passive and active water treatment and pumping systems which minimize maintenance and meet NPDES water quality standards.
- Design appropriate sludge handling facilities on site.
- Final site cleanup.

CBC is extremely well qualified to provide the State with the above referenced services. CBC has **Three (3)** West Virginia registered Professional Engineers, **Three (3)** professional Surveyors, and a team of geologists, environmental scientists, biologists, technicians, CADD operators, word processor operators, secretaries, and draftspersons. CBC has served the West Virginia Mining Industry for over **19 years**. These projects include:

- Subsidence evaluations, breakthrough analysis and Pillar design & stability,
- Coal refuse pile reclamation and design, including impoundment structures,

- Stream design, restoration, and mitigation,
- Acid mine drainage (AMD) evaluation and treatment,
- Mine portal reclamation,
- Wetlands replacement and development,
- Environmental liability assessments,
- Hydrologic/hydraulic design of erosion and sediment control structures,
- Soil analysis and re-vegetation plans,
- Construction monitoring services, surveying and inspection,
- Design of excess overburden disposal fills,
- Detailed reclamation plans,
- Detailed subsurface/geotechnical investigations for foundation, subsidence, and slope stability,
- Mine closure plans/post-reclamation land use,
- Permitting for deep and surface mine applications (NPDES, Nationwide Permits, U.S Army Corps of Engineers Section 404 permits, etc.),
- Probable hydrologic consequences (PHC) statement preparation,
- Phase I & II Environmental Site Assessments, and
- Assessment of contamination (e.g. PCB's, asbestos, lead)

Any sub-consultants to be utilized on this project are listed in the sub-consultant section of the Consultant Qualification Questionnaire, and are determined by scope of project. CBC will provide the required expertise to complete reclamation projects in a timely, economical, and efficient manner.

## 2.0 Corporate History and Experience

---

CBC Engineers & Associates, Ltd. is a multi-disciplinary geotechnical, civil, environmental, and mining engineering firm headquartered in Dayton, Ohio, with offices in Charleston, West Virginia; Lexington and Hazard, Kentucky; and Harrisburg, Illinois. Established in 1995, CBC employs over 45 engineers, scientists, and support personnel. Our eight (8) registered professional engineers have over 250 years of combined experience, offering a wide range of interdisciplinary skills, and are supported by a large group of experienced engineers, designers, surveyors, and technicians. Our firm has a diversified practice covering engineering (civil, mining, geotechnical, and environmental), permitting, site characterization and remediation, and general environmental consulting.

Our clients include state, local and federal government agencies, mining companies, manufactures, utility companies, commercial, residential, industrial and institutional clients, as well as local and national chain land developers.

CBC maintains company owned drill rigs and laboratory testing facilities in many principle locations that can provide all necessary geotechnical assessments and foundation support, along with in-house surveying and construction management services.

CBC has completed several projects similar to a WVDEP OSR type project. These include construction management and observation, design and permitting of refuse piles and slurry impoundments, evaluating mine drainage, reclamation design and monitoring, landslides, stream monitoring, grading plans, watershed assessments, wetland studies, and detention pond design.

From the analysis stage to project implementation, the professional staff of CBC provides clients with cost-effective engineering and planning solutions for their environmental problems. CBC's outstanding reputation is based upon dedicated service to clients and demonstrated technical abilities.

CBC proposes to utilize primarily our staff in the Charleston, and Dayton offices, with technical support and surveying by our Hazard and Lexington offices as required.

## 2.1 Design Engineering and Contract Document Preparation

---

CBC has extensive experience in design engineering and the preparation of documents for reclamation and related projects. CBC takes pride in staying creative and finding innovative approaches to difficult problems. Our 19 years of experience in the mining and related industries will ensure quality engineering for this and all future OSR projects.

All five of our Offices are involved in the coal and mining industries and have developed many professional relationships with state and federal agencies including MSHA, Corps of Engineers, and multi-state regulatory agencies. CBC is vastly familiar with WVDEP's guidelines for preparing drawings, technical specifications, and supporting documents.

During the design engineering phase of our projects, CBC evaluates alternative analysis and works closely with WVDEP and all regulatory agencies involved to review options and select the most practicable plan. CBC engineers and technical staff work together to review all aspects of each construction package to ensure the most feasible and economically sound methods are applied.

## 2.2 Surveying and Mapping

---

Surveying will be performed by CBC's in-house surveyors to provide the most cost efficient and timely services. CBC has **three (3)** licensed professional surveyors with over 75 years of combined surveying experience. Our surveyors are experienced in all aspects of surveying such as topographic mapping, boundary and property surveys, and construction surveys for layout of work, record drawings, quantity measurements, and environmental sampling and monitoring.

CBC's survey crew utilizes state-of-the-art "Field to Finish" equipment and software such as, Total Stations and GPS surveying equipment, Autocad 2014 software, and a Hewlett Packard Designjet 1050c Plus. Technicians use this information to generate plan views, profiles, cross sections and other engineering drawings.

All surveys conducted by CBC are completed under the supervision of a licensed land surveyor and will be performed under the general direction of a West Virginia registered professional engineer, the CBC

project engineer and the project manager. All surveys and mapping are completed to the standards as outlined by the National Map Standards, as well as other applicable quality standards to include OSR specifications.

Additional information on CBC's corporate history and experience is included in the Consultant Confidential Qualification Questionnaire included in **APPENDIX E**.

Blasting design within 1000 feet of a protected structure, pre-blast surveys and realty appraisal work, if needed for reclamation of the site(s) will be performed by a sub-contractor.

## **2.3 Subsurface Investigation**

---

CBC maintains company-owned drill rigs and a laboratory testing facility that can provide all aspects of geotechnical engineering investigations. Each geotechnical report contains written recommendations and construction procedures to obtain desired results. CBC's engineers are experienced in making sound judgments and advising owners on the structural and economic feasibility of any given project; starting with the evaluation of subsurface conditions, and ending with the determination of the physical and engineering characteristics of the soil/rock, and their probable behavior under stress.

In some situations it is not economically feasible to move our drilling fleet to a project location, so CBC has developed relationships with several drilling firms in order to ensure the most cost efficient options are employed. Should timing and cost dictate, CBC may choose to sub-contract drilling work out as necessary, under the supervision of the principle-in-charge and project manager.

## **2.4 Laboratory Services**

---

CBC operates full-service soils and materials laboratories in several offices.

CBC offers a wide range of special inspection and materials testing services; performed by our certified field staff using the most modern and up-to-date testing equipment and procedures. Our testing facilities have the capability to analyze natural materials such as soil and rock, and manufactured materials such as concrete and steel. The soils analysis capabilities include classification and compaction, proctor, and specific gravity. CBC also maintains several nuclear densometer testing gauges to monitor field compaction.

Coal refuse and water analysis, if needed for reclamation of the site(s) will be performed by a sub-contractor.

## **3.0 Qualifications of Personnel**

---

CBC is a privately owned company that is dedicated to staying lean, innovative, and current on engineering practices, technologies and regulations. CBC strives to deliver high quality, cost effective engineering solutions and services on schedule and on budget by supporting the motivated, flexible, and

focused teams of experienced employees. CBC values the importance of client relationships and will strive to continue to offer the best client-consultant experience in the business.

Mr. Mitchell T. Hardert, P.E. will serve as the principle-in-charge. Mr. Hardert is registered in 48 U.S. states, and the District of Columbia. He has **eighteen (18)** years of experience in refuse, impoundment, and dam design; geotechnical investigations; foundation engineering; stability analysis; buried structure design; and remediation. Mr. Hardert has a good working relationship with federal, state, and local regulatory agencies.

Roger W. Cornett, P.E., PLS will serve as a project engineer. Mr. Cornett has over **thirty-five (35)** years of experience in surface and underground coal mining design and permitting, environmental impact statements, mine feasibility and planning, and acting as liaison between coal companies and state and federal regulatory agencies.

Eugene D. Highlander, P.E. will serve as a project engineer. Mr. Highlander has over **forty-six (46)** years of experience in the coal mining industry and has worked on multiple projects involving the reclamation of acid-producing refuse piles.

John Corda, P.E. will serve as a project geotechnical engineer. Mr. Corda has over **forty-eight (48)** years of experience and has participated in the design of nearly 400 projects for dams, foundations, and coal impoundments. He has extensive experience in slope stability analysis, liquefaction, internal and surface drainage calculations, seepage and dams break analysis, as well as reclamation of strip mine areas. Mr. Corda has authored or co-authored 25 paper and 40 professional reports in the geotechnical and civil engineering fields.

Deepa Nair, P.E. will serve as a project geotechnical engineer. Ms. Nair has over **seven (7)** years of experience. She will serve as the primary internal consultant for geotechnical investigations. Ms. Nair will be involved in stability analysis, soils classifications, and boring log analysis.

Tony Bowling, P.E., PLS will serve as a project surveyor. Mr. Bowling has over **thirty (30)** years of surveying experience. He has managed surveying and engineering activities for The Kentucky Transportation Cabinet for over twenty (20) years and has lead CBC's surveying activities in our Hazard office for nearly ten (10) years. Mr. Bowling is responsible for the management of all work performed by our Hazard office and ensures that any required surveying is performed correctly and on time.

Gerald L. DeNeal will serve as a project engineer. Mr. DeNeal has over **thirty-four (34)** years of direct coal mine land reclamation and project management experience. Mr. DeNeal has done extensive coal mine reclamation planning and budgeting for surface strip operations (dragline/shovel), two seam truck carry-back operations, large truck/shovel carry-back operations and all sizes of underground coal operations, including longwall subsidence reclamation. In his career, Mr. DeNeal has demonstrated highly successful coal mine reclamation innovation and special techniques that improved vegetative productivity on "pre-law" abandoned mine lands.

Michael L Cross will serve as a project manager. Mr. Cross has over **thirty-two (32)** years of experience in the mining industry, including mine design and reclamation, reclamation inspection, reclamation liabilities studies, seepage studies, and implemented water treatment facilities for acid mine drainage. Mr. Cross has vast experience with US Army Corps of Engineers permitting and has overseen and monitored stream restoration and creation projects.

Chad Reed will serve as a project manager and has over **fifteen (15)** years' experience in the mining industry. He is involved in overseeing CBC's impoundment inspection and certification department, all aspects of permitting, design, evaluation, and geological modeling. Mr. Reed is experienced with state and federal regulations in WV, KY and OH.

S. Mark Summers, PLS and Bill Robertson will serve as Technical Specialists. Mr. Summers is a senior project manager with an extensive background in reclamation inspection and has over **thirty-seven (37)** years of experience in the mining industry. Mr. Robertson is our Director of Field Services who coordinates all construction observation and geotechnical drilling services.

Edward. G. Galaska, Erika Dunham, and Meredith Coll-Atkins will serve as environmental scientists. Mr. Galaska supervises our Environmental department and has over **twenty-seven (27)** years of experience in the environmental and biological fields. Mr. Galaska brings experience across many sectors including Mining, Airports, Hospitals, Schools and Commercial Real Estate and will oversee the activities of Ms. Dunham and Ms. Coll-Adkins on this project.

Ms. Dunham has over **seventeen (17)** years in Phase I & II Environmental Site Assessments, Asbestos Inspections, and Environmental Audits. Ms. Dunham coordinates all field activities, inspections, testing and reporting on all work performed by CBC. Ms. Dunham will coordinate and execute any related field activities on this project.

Ms. Coll-Atkins is the lead environmental scientist in our Charleston, WV office with **twelve (12)** experience. Meredith's duties and responsibilities have included preparation of all WVDEP permitting, Environmental Mitigation Strategies, U.S. Fish and Wildlife Protection and Enhancement Plans, phase release applications, planting plans, selenium treatment, water and soils analysis, drainage design, and stream delineation. She has experience in managing surface mine and deep mine permitting and reclamation projects and has coordinated pre-submittal and reclamation inspections with West Virginia Department of Environmental Protection (DEP). She is well respected among the staff of WVDEP Charleston, Oak Hill and Logan offices.

All of CBC's engineers have direct experience with mine reclamation, grading/drainage, feasibility studies, water study and design, stream restoration, and preparation of construction documents.

CBC's project managers will be supported by a team of staff engineers, geologists, environmental scientists, biologists, technicians, CADD operators, word processor operators, secretaries, and draftspersons, who will provide the expertise and manpower to complete the project.

## 4.0 Management Plan

CBC's proposed management organization is presented in **Figure 1 (Appendix G)**. The work will be performed by CBC's Dayton, Ohio and Charleston, West Virginia offices, which will allow ready access to the project area. Our Charleston office is convenient with respect to the WVDEP Charleston office. Assistance, if and when needed, will be provided by staff located in the Kentucky offices.

CBC's professional, technical and support staff have extensive experience on OSR related projects and are extremely well qualified to serve the WVDEP on this contract. CBC is ready to commit the personnel and resources required to complete the project in a timely, technically sound and cost efficient manner.

Project Management will be provided by Mr. Mitchell T. Hardert, P.E. or Michael L. Cross as shown in Figure 1. Mr. Hardert will be the principle-in-charge, responsible for contract management and overall performance of the project. He will review the proposed project, assign a project manager, assemble a project team and appoint key staff to develop a proposed scope of work. The principle-in-charge and the project manager will visit the site with the WVDEP-OSR to review site conditions and the proposed services to be completed and guide the preparation of a detailed proposal and cost estimate. The detailed scope of work along with cost estimate and man hours will then be submitted to the WVDEP-OSR for review. Upon WVDEP-OSR approval of the proposal, the project manager will arrange for start of project activities. The principle-in-charge will review the project budget and schedule during performance of the project and will provide a final QA/QC review of the documents prior to submittal to the WVDEP-OSR. The Project Manager will generally supervise the work in progress and review work products at intermediate points and finally prior to submittal to the WVDEP, and will be responsible for maintaining liaison with the WVDEP Project Manager including project status report, as required.

Day-to-day project activities will be performed under the direction of the Project Manager by one of the Project Engineers or Project Technicians (Michael L. Cross, Deepa Nair, M.S., P.E., I. John Corda, M.S., P.E., Roger Cornett, P.E., PLS, Chad Reed, Tony Bowling, P.E., PLS, S. Mark Summers, PLS and Bill Robertson) as shown in **Figure 1 (Appendix G)**. Their main activities will include development of detailed step-by-step project work plans to ensure the project activities are completed on-budget and on-time, review the work products at intermediate points and at project completion, providing guidance and direction to project staff, as well as engineering and design work.

Mr. Edward G. Galaska will oversee all environmental services performed by CBC. Field and technical analysis will be performed by Ms. Meredith Coll-Atkins and Ms. Erika Dunham. Surveys, reports, and documents will be reviewed by Mr. Galaska for QA/QC prior to submittal.

CBC's experienced staff in multiple locations allows for quick response time, provides flexibility, and permits for quality input from in-house experts. CBC's project management plan is to build small teams of highly qualified personnel, which ensures clients budget conscious, quality work.

WVDEP-OSR has indicated that 60 days are required for submittal of deliverables for the Professional Mapping and Design Services at the Chicopee Coal Company, Inc. S-3006-99 and S-3002-98 Project. CBC stands ready to meet your timeframe.

## **4.1 Project Budget Control**

---

The project manager will be responsible for monitoring the project budget and keeping the principle-in-charge informed of its status. CBC's staff submits time sheets on a weekly basis. All charges including labor hours and other project expenses are compiled and reported to the project manager by Tuesday of the following week. A detailed description of project expenses is available upon request.

## **4.2 Schedule Control**

---

Direct responsibility for the schedule control lies with the project manager. Initially, the Project Manager will review the work directive schedule requirements (understood to be 60 days for submittal for preliminary design documents) to see how they can be achieved with the anticipated scope of work. As the project progresses, the Project Manager will monitor progress and compare it with the established schedule on a weekly basis, keeping the principle-in-charge aware of the schedule's status. In this manner, the principle-in-charge can make staff adjustments to maintain the project schedule. If circumstances develop that make it impossible to maintain the project schedule, the Project Manager will contact the WVDEP Project Manager to develop mutually acceptable adjustment to the schedule.

## **4.3 Quality Assurance/ Quality Control**

---

Submittals to the WVDEP-OSR will be reviewed and commented on by the project manager and principle-in-charge prior to submittal to the WVDEP-OSR. CBC uses standard Quality Assurance/ Quality Control (QA/QC)

## **5. 0 Closing**

---

We look forward to serving WVDEP-OSR on the Chicopee Coal Company, Inc. S-3006-99 and S-3002-98 Project and bringing it to completion. Our commitment is to provide quality, cost effective and timely service, as well as exceed your expectations. We believe our track record of our professionals demonstrates our ability and commitment.

**Ohio Bureau of Workers' Compensation****Required Posting**

Effective Oct. 13, 2004, Section 4123.54 of the Ohio Revised Code requires notice of rebuttable presumption. Rebuttable presumption means an employee may dispute or prove untrue the presumption (or belief) that alcohol or a controlled substance not prescribed by the employee's physician is the proximate cause (main reason) of the work-related injury.

The burden of proof is on the employee to prove the presence of alcohol or a controlled substance was not the proximate cause of the work-related injury. An employee who tests positive or refuses to submit to chemical testing may be disqualified for compensation and benefits under the Workers' Compensation Act.

Compensation**

You must post this language with the certificate of premium payment.

## **Appendix B**

RFQ No. DEP16557STATE OF WEST VIRGINIA  
Purchasing Division**PURCHASING AFFIDAVIT**

**MANDATE:** Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

**EXCEPTION:** The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

**DEFINITIONS:**

**"Debt"** means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

**"Employer default"** means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

**"Related party"** means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

**AFFIRMATION:** By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

12. A. Is your firm experienced in Special Reclamation remediation/ Mine Reclamation Engineering?

**YES** Description and number of projects:

**CBC personnel, working directly for the coal industry, has experience in all phases of mine reclamation/engineering of over 25 permits/projects in WV including single and multiple seam contour surface mines, mountaintop removal surface mines, deep mines, refuse areas, prep plants and loadouts. Numerous other surface mines and deep mines in Kentucky were reclaimed to achieve final bond release.**

B. Is your firm experienced in soil analysis and coal refuse analyses?

**YES** Description and number of projects:

**CBC performs a geotechnical investigation for the refuse areas that it designs and permits. Soil analyses are part of investigation. Soil analysis are required for most surface and deep mine SMA's. CBC completes most soil investigations in-house but has used some sub-contractors depending on the type of soil analysis required.**

C. Is your firm experienced in hydrology and hydraulics for handling mine water discharges on mining sites?

**YES** Description and number of projects:

**WVDEP SMA's, NPDES applications and MSHA refuse areas designed and permitted by CBC contain detailed Storm Water Run-off Analysis (SWROA's), sediment control structures designs, conveyance channels designs and road designs including bridge, culverts, ditch designs. CBC has also prepared SMA's, NPDES applications and MSHA in Kentucky, and Illinois for the handling of mine water discharges on mining sites. Projects designed by CBC exceed 100+**

D. Does your firm produce its own aerial photography and development of contour mapping?

**NO** Description and number of projects:

**CBC has developed contour mapping based on field survey work related to coal refuse work. CBC does not own its own Aerial Photography service.**

E. Is your firm experienced in design of highwall elimination, grading and material handling plans for land reclamation?

**YES** Description and Number of Projects:

**CBC personnel, working directly for the coal industry, has experience in highwall elimination, grading and material handling of over 25 permits/projects. Highwalls eliminated ranged in height from 70 to 300 feet with slopes as steep as 1.33H:1V. Grading and materials handling conducted as part of final reclamation or contemporaneous reclamation plans of active permits.**

	YEARS OF OSR DESIGN EXPERIENCE:	YEARS OF OSR RELATED DESIGN EXPERIENCE: 34 Years	YEARS OF DOMESTIC WATERLINE DESIGN EXPERIENCE:

**Brief Explanation of Responsibilities**

Mr. DeNeal will serve as Senior Technical Reclamation Advisor.

Mr. DeNeal has over 34 years of direct coal mine land reclamation and project management experience with Peabody Coal Company (now Peabody Energy Corp.), J.J. Track Mining Co, Inc., Kerr-McGee Coal Corp., and The American Coal Company, Inc. In this capacity, Mr. DeNeal was site manager for large coal mine reclamation projects in Kentucky, Illinois, Indiana, Missouri, Oklahoma, Arizona and Wyoming. Mr. DeNeal has done extensive coal mine reclamation planning and budgeting for surface strip operations (dragline/shovel), two seam truck carry-back operations, large truck/shovel carry-back operations and all sizes of underground coal operations, including longwall subsidence reclamation. In his career, Mr. DeNeal has demonstrated highly successful coal mine reclamation innovation and special techniques that improved vegetative productivity on "pre-law" abandoned mine lands.

WATERLINE DESIGN  
EXPERIENCE:

## Brief Explanation of Responsibilities

Mr. Highlander will serve as a field engineer. He will coordinate the drilling and geotechnical analysis for slope stability design, identification of borrow site for soil cover, and investigation and design of solutions for subsurface hydrogeology within the deep mines and recommendations for mine seals.

EDUCATION (Degree, Year, Specialization)

B.S. Civil Engineering, 1966, West Virginia Institute of Technology

MEMBERSHIP IN PROFESSIONAL ORGANIZATIONS

REGISTRATION (Type, Year, State)  
P.E., 1973, West Virginia

16. CURRENT ACTIVITIES ON WHICH YOUR FIRM IS SERVING AS A CONSULTANT TO OTHERS

[illegible]

17. COMPLETED WORK WITHIN LAST 5 YEARS ON WHICH YOUR FIRM WAS THE DESIGNATED ENGINEER OF RECORD

PROJECT NAME, TYPE AND LOCATION	NAME AND ADDRESS OF OWNER	ESTIMATED CONSTRUCTION COST	YEAR	CONSTRUCTED (YES OR NO)
<i>CBC Engineers WV refuse/impoundment related experience - Design &amp; permitting projects</i>				
Tunnel Ridge Refuse Area, Structural Slurry Cells, Short Creek, Ohio Co., WV The scope of work included obtaining a SMA /NPDES from the WVDEP. Approval obtained from the WVDEP.	Tunnel Ridge, LLC, 771 Corporate Dr., Suite 1000, Lexington, KY 40503	NA.	2010	Under construction
Holden 22 Slurry Cells, Holden, WV The scope of work included the design of additional slurry cell stages, sediment structures, conveyance channels, an abandonment plan and a revegetation plan. Approval obtained from MSHA.	Coal-Mac, Inc., PO Box 1050 Holden, WV 25625	NA.	2013	Under construction
Nufac Slurry Cells, S-4025-86, Little White Oak Creek of Pinnacle Creek, Wyoming Co., WV The scope of work included the design of slurry cells, sediment control structures, conveyance channels, an abandonment plan and a revegetation plan. Approval obtained from the WVDEP and MSHA.	Bluestone Coal Corp., 100 Cranberry Creek, Beckley, WV 25801	NA.	2011	Yes
Five Mile Hollow Impoundment, S- 3033-07, Kanawha Co., WV The scope of work included obtaining a SMA/NPDES permit. Complete design for a slurry impoundment including sediment structures, conveyance channels, a toxic material handling plan, an abandonment plan and a revegetation plan.	Coyote Coal Co., LLC, 500 Lee St. East, Suite 900, Charleston, WV, 25301	NA	2013	No
Five Mile Combined Refuse Fill, S- 3033-07 Kanawha Co., WV The scope of work included obtaining a SMA/NPDES permit. Complete design for a slurry impoundment including sediment structures, conveyance channels, a toxic material handling plan, an abandonment plan and a revegetation plan. Design included conversion of a slurry impoundment to a combined refuse fill.	Coyote Coal Co., LLC, 500 Lee St. East, Suite 900, Charleston, WV, 25301	NA	2013	No
The American Coal Co., Reclamation Cost Evaluation, Saline Co., IL The scope of work included the evaluation of the reclamation costs for American Coal's use in planning for the future closure of its mining operations in southern Illinois.	The American Coal Co., PO Box 727, Harrisburg, IL 62946	Reclamation estimate \$22.9 million	2013	Under construction

1. COMPLETED WORK WITHIN LAST 5 YEARS ON WHICH YOUR FIRM HAS BEEN A SUB-CONSULTANT TO OTHER FIRMS (INDICATE PHASE OF WORK WHICH YOUR FIRM WAS RESPONSIBLE)

Reclamation Cost  
Evaluation / estimate

## THE AMERICAN COAL COMPANY RECLAMATION COST EVALUATION

**The American Coal Company**  
*Saline County, Illinois*

CBC Engineers & Associates, Ltd. Inc. (CBC) was retained by The American Coal Company to evaluate reclamation costs for its use in planning for the future closure of the American Coal's mining operations in southern Illinois. These operations include a longwall mine, a 2600 TPH preparation plant and multiple refuse disposal areas. The reclamation involves approximately 1431 acres.

Reclamation costs were included in the estimate for the following items; 1. Removal of all surface coal handling equipment; 2. Demolition of silos; 3. Removal of all structures and equipment; 4. Removal of structural concrete; 5. Removal of contaminated soil; 6. Removal of gravel from areas other than permanent access roads; 7. Plugging all boreholes, shafts, and slope; 8. Placement of agricultural lime on the refuse area; 9) Placing soil cover over all disturbed areas; and 10. Stabilizing and planting disturbed area

The reclamation estimate includes the moving and placement of 2.8 million cubic yards of soil. CBC estimated the direct cost of final reclamation of the surface facilities at the Galatia Operations at near \$22.9 million.

## TUNNEL RIDGE REFUSE FACILITY, WVDEP PERMIT APPLICATION

### Tunnel Ridge, LLC

*Ohio County, West Virginia*

CBC Engineers & Associates, Ltd. Inc. (CBC) was retained by Tunnel Ridge, LLC to permit a coal refuse disposal system for the Tunnel Ridge preparation plant's refuse production.

The new refuse facility will provide approximately 20 years of refuse storage. Because of its height and storage capacity, the structure was classified as a Class C, High Hazard Structure. CBC conducted an extensive review of the underground mine works as part of the Assessment of Failure and Consequences of Failure. CBC prepared an Emergency Waning Plan to protect the residents living downstream from the structure.

An existing combined refuse fill was located on the proposed site. CBC conducted an extensive environmental review as part of the permit application. Several environmental issues were present on the site. An alkaline cap was designed to prevent potential acid mine drainage issues for the Pittsburgh seam refuse. CBC prepared the mining and reclamation plan and incorporated the refuse plans submitted to MSHA.

The application was submitted to the WVDEP in December 2008 and approved in February 2010. Construction of the refuse facility began in summer of 2010.

## FREEMAN FORK SURFACE MINE DESIGN AND PERMIT APPLICATIONS

**Sturgeon Mining Company, Inc.**  
*Owsley, Breathitt, Perry Counties KY*

CBC Engineers & Associates, Ltd. Inc. (CBC) was retained by Sturgeon Mining Co, Inc. to design and permit a surface, underground and highwall miner mine. CBC submitted a Technical Information for a Mining Permit (MPA03) and Notice of Intent KPDES applications to the KY Div. of Mine Permits and the KY Div. of Water for the respective permits.

CBC coordinated a stream delineation to determine if any jurisdictional waters of the U.S. would be impacted by the surface mine. No fills, sediment control facilities or ponds were located in any jurisdictional waters, therefore a Corps 404 permit and a State 401 Certification were not required.

The MPA03 and KPDES applications contain plans for mine reclamation including but not limited to mining and reclamation, backfilling and grading, mine sealing/management, excess spoil disposal, slope stability, toxic materials handlings, planting/revegetation, drainage and sediment control, transportation, subsidence, blasting, and water monitoring.

CBC evaluated the mining area to determine the Probable Hydrologic Consequences (PHC) of the mining operation, with respect to the hydrologic balance, on the permit area, adjacent areas, and over the proposed mineral extraction area. CBC developed a hydrologic reclamation plan to minimize disturbances to the hydrologic balance within the permit and adjacent areas; to prevent material damage outside the permit area; to meet applicable federal and state water quality laws and regulations; and to protect the rights of present water use.

CBC also prepared and submitted a Socio Economic Demonstration and Alternative Analysis KY Division of Water for the surface and underground mining operations describing the location, extent, duration and economic analysis and alternatives for the impacts of the mine on the surrounding area.

The mining permits and discharge permits were issued in 2005, 2006 and 2007. Mining operations are extracting the coal at the present time.

## ROARING CREEK COMPLEX, CORPS 404 INDIVIDUAL PERMIT AND STATE 401 CERTIFICA- TION

**Roaring Creek Coal Company, LLC**  
*Randolph County, West Virginia*

CBC Engineers & Associates, Ltd. Inc. (CBC) was retained by Roaring Creek Coal Company, LLC to design and permit its Roaring Creek Complex. The complex consisted of a deep mine preparation plant and a coal refuse disposal area.

CBC submitted separate Surface Mine Applications (SMA's) and NPDES applications to the WVDEP for the deep mine, prep plant and refuse area. CBC submitted the refuse designs to MSHA. The refuse area consists of a coarse refuse embankment (slurry impoundment) and a coarse refuse fill (dry pile).

Due to the projected impacts to jurisdictional waters of the U.S., CBC prepared a 404 Individual Permit for submittal to the U.S. Army Corps of Engineers and a State 401 Certification to the WVDEP.

CBC prepared an Environmental Information Document (EID) for submittal to the Corps which contained an extensive alternative analysis to determine the least environmental damaging practicable alternative. As part of the evaluation of the project area, consideration was given to avoiding impacts to the aquatic ecosystem. If the impacts cannot be avoided, they must be minimized. CBC minimized the impacts. The EID also contained a determination of the cumulative effects on the aquatic ecosystem and addressed the NEPA Public Interest factors. CBC assisted with the development of Stream and Wetland Compensatory Mitigation Plan.

Work on the deep mine and prep plant sites has started. Work on the refuse area will commence once the remaining permit approvals are obtained.

## ROARING CREEK COMPLEX, DESIGN AND PERMIT APPLICATIONS

**Roaring Creek Coal Company, LLC**  
*Randolph County, West Virginia*

CBC Engineers & Associates, Ltd. Inc. (CBC) was retained by Roaring Creek Coal Company, LLC to design and permit it's Roaring Creek Complex. The complex consisted of a deep mine preparation plant and a coal refuse disposal area.

CBC submitted separate Surface Mine Applications (SMA's) and NPDES applications to the WVDEP for the deep mine, prep plant and refuse area. CBC submitted the refuse designs to MSHA. The refuse area consists of a coarse refuse embankment (slurry impoundment) and a coarse refuse fill (dry pile). The refuse facility will provide approximately 18.25 years of refuse storage. Due to its height and storage capacity, the slurry impoundment was classified as a Class C, High Hazard Structure.

The WVDEP applications prepared by CBC contain plans for mine reclamation including but not limited to mining and reclamation, backfilling and grading, mine sealing/management, excess spoil disposal, slope stability, toxic materials handlings, planting/revegetation, drainage and sediment control, transportation, subsidence, blasting, refuse disposal, and water monitoring.

CBC evaluated the mining area to determine the Probable Hydrologic Consequences (PHC) of the mining operation, with respect to the hydrologic balance, on the permit area, adjacent areas, and over the proposed mineral extraction area. CBC developed a hydrologic reclamation plan to minimize disturbances to the hydrologic balance within the permit and adjacent areas; to prevent material damage outside the permit area; to meet applicable federal and state water quality laws and regulations; and to protect the rights of present water users.

CBC conducted an extensive geotechnical evaluation of the refuse site including the collection of soil, geological, and hydrological data. CBC's engineering design included; 1) a hydrologic evaluation of the embankment, 2) an evaluation of hydraulic control structures, 3) the preparation of construction drawings and specifications, 4) the preparation of material specifications, compaction, and material qualities, 5) a slope stability analysis, 6) a seepage analysis, 7) a deep mine subsidence and breakthrough potential analysis, and 8) an access road designs.

Work on the deep mine and prep plant sites has started. Work on the refuse area will commence once the remaining permit approvals are obtained.

## HATCHET SURFACE MINE DESIGN AND PERMIT APPLICATIONS

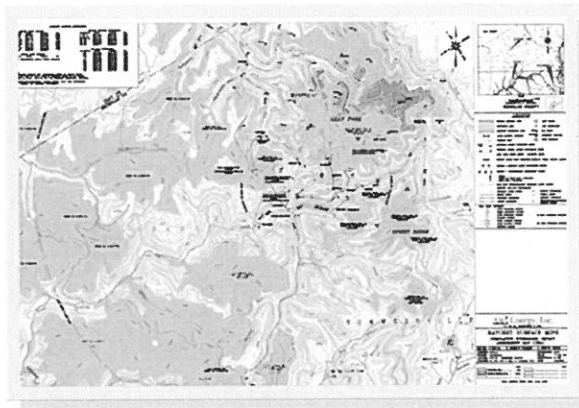

Alex Energy, Inc.  
*Nicholas County, West Virginia*

CBC Engineers & Associates, Ltd. Inc. (CBC) was retained by Alex Energy, Inc. to design and permit a surface and highwall miner mine. CBC submitted a Surface Mine Applications (SMA's) and NPDES application to the WVDEP.

CBC conducted a stream delineation to determine if any jurisdictional waters of the U.S. would be impacted by the surface mine. No fills, sediment control facilities or ponds were located in any jurisdictional waters, therefore a Corps 404 permit and a State 401 Certification were not required.

The SMA and NPDES applications contain plans for mine reclamation including but not limited to mining and reclamation, backfilling and grading, mine sealing/management, excess spoil disposal, slope stability, toxic materials handlings, planting/revegetation, drainage and sediment control, transportation, subsidence, blasting, and water monitoring.

CBC evaluated the mining area to determine the Probable Hydrologic Consequences (PHC) of the mining operation, with respect to the hydrologic balance, on the permit area, adjacent areas, and over the proposed mineral extraction area. CBC developed a hydrologic reclamation plan to minimize disturbances to the hydrologic balance within the permit and adjacent areas; to prevent material damage outside the permit area; to meet applicable federal and state water quality laws and regulations; and to protect the rights of present water use.

CBC also prepared and submitted a Community Impact Statement to the WV Office of Coalfield Community Development for the surface mining operations describing the location, extent, duration and impact of the mine on the surrounding area.

The SMA and NPDES applications were issued in 2006. Mining has been completed and the site has been reclaimed.

## METTIKI E-MINE, WVDEP PERMIT APPLICATIONS

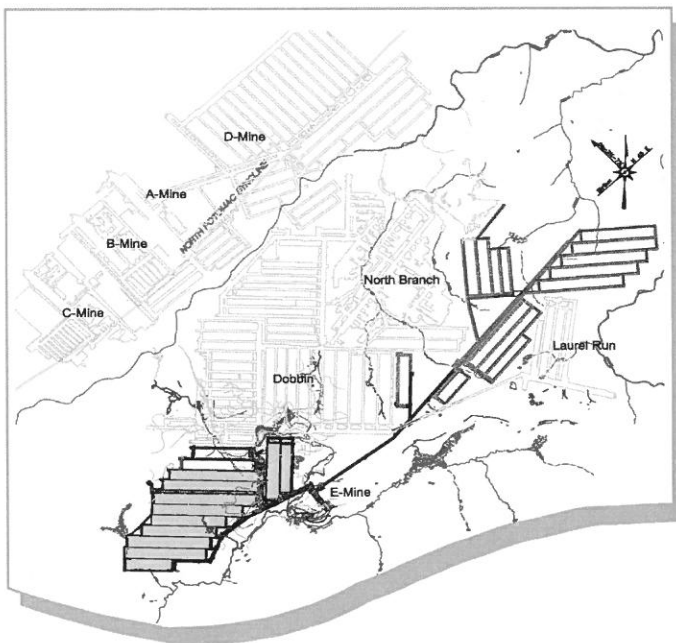

### Mettiki Coal (WV), LLC

*Tucker County, West Virginia*

CBC Engineers & Associates, Ltd. Inc. (CBC) was retained by Tunnel Ridge, LLC to prepare numerous revisions for their E-Mine Longwall Deep Mine. These revisions include numerous changes to their subsidence control plans and an Order from the Director involving mining near its freshwater impoundment. CBC has prepared detailed seepage analysis for all subsidence control plans and assisted with the development of post-mining water treatment system.

The E-Mine is located along the West Virginia and Maryland border. The E-Mine is currently mining the Upper Freeport Seam. The structure of this seam is influenced by the North Potomac Syncline, and is located in a highly sensitive environmental area near the Canaan Valley.

The E-Mine was initially approved in May 2005. The current revisions have extended the life of the mine approximately eight years.

## Impoundment Design Mingo County, West Virginia

This project encompassed the design of an impoundment for disposal of coarse refuse and slurry near Bias in Mingo County, West Virginia. The site is located at 37° 45' 00" North latitude and 83° 12' 03" West longitude and can be found on the Delbarton and Myrtle West Virginia 7.5 minute quadrangle maps of the U.S. Geological Survey series. The design includes a structure to be constructed atop the existing refuse disposal area with a final crest elevation of 1520 feet, providing approximately 26 years of slurry and coarse refuse disposal. Slurry will be disposed in the reservoir created by the embankment.

Downstream - Post Stage III Construction

Upstream - Post Stage III Construction

The overall concept for this project calls for construction of a starter dam and six (6) stages, the starter dam and four (4) stages are to be constructed in a downstream manner above the existing refuse disposal embankment by extending that embankment up to elevation 1320 feet, and two (2) upstream stages will be constructed to extend the crest to a final elevation of 1520 feet. The main portion of the embankment for this project is to be constructed in a downstream manner, with two (2) upstream stages being provided to maximize the disposal volume for both coarse and fine refuse. The embankment will have a decant pipe which will provide storm water passage and decant of the pool for each stage. The pipe will pass the design storm with three (3) feet of freeboard or greater for each stage. The decant pipe will evacuate 90% of the stored storm water in less than 7 days for all stages.

The embankment will be constructed with an initial starter dam embankment being constructed of coarse refuse excavated from within the impoundment, overburden, or plan run refuse. The remainder of the embankment will be constructed from coarse refuse once the plant begins operation. The embankment has a total of seven stages including the starter dam.

## BRAGG FORK REFUSE AREA, DESIGN AND PERMIT APPLICATION / CONSTRUCTION INSPEC- TION

### Hobet Mining, LLC

*Boone County, West Virginia*

CBC Engineers & Associates, Ltd. Inc. (CBC) was retained by Hobet Mining, LLC to design and permit a coal refuse disposal system for the Beth Station #79 preparation plant's refuse production. This new disposal facility was required due to the adjacent Slippery Gut Impoundment nearing completion.

CBC conducted a stream and wetland delineation and submitted a jurisdictional determination to the US Army Corps of Engineers to verify jurisdictional waters of the U.S. The least environmental damaging practicable alternative was selected for the location of the new refuse site; on top of an existing valley fill.

CBC conducted an extensive geotechnical evaluation of the site including the collection of soil, geological, and hydrological data. CBC's engineering design included; 1) hydrologic evaluation of the embankment, 2) evaluation of hydraulic control structures, 3) preparation of construction drawings and specifications, 4) preparation of material specifications, compaction, and material qualities, 5) slope stability analysis, 6) seepage analysis, and 7) access road designs.

The new refuse facility will provide approximately 21.2 years of refuse storage. Because of its height and storage capacity, the structure was classified as a Class C, High Hazard Structure. CBC submitted the refuse design to MSHA and the WVDEP. The WVDEP application consisted of an Incidental Boundary Revision (IBR), an NPDES modification and a dam control application.

CBC is currently performing seven day observation/construction inspections for the refuse project. These inspections include refuse density testing to ensure proper compaction of the refuse material. CBC is responsible for the submittal of quarterly certifications to WVDEP and annual certifications to MSHA.

Construction of the refuse facility began in September 2011.

## BLUE BRANCH REFUSE AREA, 404 CORPS INDIVIDUAL PERMIT AND STATE 401 CERTIFICA- TION

Green Valley Coal Company  
*Nicholas County, West Virginia*

CBC Engineers & Associates, Ltd. Inc. (CBC) was retained by Green Valley Coal Company, LLC to obtain a 404 Corps Individual Permit and State 401 Certification for the expansion of their existing Blue Branch Refuse Area.

CBC coordinated a stream and wetland delineation to determine the projected impacts to jurisdictional waters of the U.S. CBC prepared and submitted a jurisdictional determination to the US Army Corps of Engineers to verify jurisdictional waters of the U.S.

CBC prepared an Environmental Information Document (EID) for submittal to the Corps which contained an extensive alternative analysis to determine the least environmental damaging practicable alternative. As part of the evaluation of the project area, consideration was given to avoiding impacts to the aquatic ecosystem. If the impacts cannot be avoided, they must be minimized. CBC minimized the impacts. The EID also contained a determination of the cumulative effects on the aquatic ecosystem and addressed the NEPA Public Interest factors.

CBC coordinated the development and implementation of Stream Compensatory Mitigation Plan and development of the Wetland Compensatory Mitigation Plan. Final approvals of the 404 Corps IP and the State 401 Certification were obtained by CBC.
