**QUESTIONS AND ANSWERS - Addendum One**

**Questions:**

**Q1: In West Virginia, are Type A school buses required to have air powered stop arms and crossing control arms? I found somewhat conflicting information in, Policy 4334 WV Minimum Requirements for Design and Equipment of School Buses.**

Page 26

**STOP SIGNAL ARM AND CROSSING CONTROL ARM**

- A. ...**"The stop signal arm shall be air operated."....**
- B. ...**"The device shall be air powered."...**

Page 21

**LAMPS AND SIGNALS....continued**

G, c, 1. ...**"This system, stop arm, and crossing arm shall be wired through a master switch, but NOT through vehicle ignition switch."**

G, c, 5, b. ...**"Stop arm, if air or electrically powered, shall automatically extend."**

G, c, 5, c. ...**"and stop arm, if air or electrically powered, shall retract immediately."**

G, c, 5, d. ...**" Stop arm, if air or electrically powered, shall automatically extend."**

Looking through Policy 4334, it appears that the stop arm and crossing control arm may be able to be either air or electrically powered. Can we get an official response specifically for a Type A? I would like to get an official response quickly so we can give our customer a prompt answer for their orders.

**A1: There is no conflict in the 2 sections in Policy 4334. If air controlled or electric stop arm is used, the activation and retraction will still be the same as prescribed in Policy 4334 and the bid specifications. Currently the only stop arm permissible is air operated.**

**After consideration, permission for an exemption to use an electric stop arm or crossing arm installed on a type A1 bus will be granted for this bid.**

**Q2: "General terms and conditions, number 14, Purchasing Card Acceptance", I am requesting that the box be checked that "Vendor is NOT required to accept the State of West Virginia's Purchasing Card as payment for all goods and services. This has been an object of much discussion over the past several years as the required use of this method of payment will significantly increase the price of school buses due to the heavy fees assessed to the Vendor. Because of this, the box has always been checked to "not require".**

**A2: Consider the box checked. Vendors will not be required to accept the State of West Virginia's Purchasing Card as payment for all goods and services.**

**Q3: I would like to request that a Bid Classification be set up for all Type C "conventional and special needs conventional buses" for Gasoline powered engines. This could be accomplished by adding it to the alternate fuels section of the "West Virginia Minimum Requirements for Design and Equipment of School Buses". The gasoline powered school bus is a viable option for the State and would be less expensive than the current fuel offering types.**

**A3: The WVDE Office of School Transportation recognizes that per specification language, gasoline is not an alternative fuel.**

**At this time, the request to add gasoline powered engines in the "alternative fuel" section of the minimum requirements for this bid cycle is denied.**

**Other Information:**

- 1. Extend the bid opening date from October 27, 2016 to November 3, 2016 at 1:30 PM, EST.**
- 2. No additional questions will be accepted for solicitation CRFQ EDD1700000001.**

**QUESTIONS AND ANSWERS - Addendum One**

**Questions:**

**Q1:** In West Virginia, are Type A school buses required to have air powered stop arms and crossing control arms? I found somewhat conflicting information in, Policy 4334 WV Minimum Requirements for Design and Equipment of School Buses.

Page 26

**STOP SIGNAL ARM AND CROSSING CONTROL ARM**

- A. ...“The stop signal arm shall be air operated.”....
- B. ...“The device shall be air powered.”...

Page 21

**LAMPS AND SIGNALS....continued**

G, c, 1. ...“This system, stop arm, and crossing arm shall be wired through a master switch, but NOT through vehicle ignition switch.”

G, c, 5, b. ...“Stop arm, if air or electrically powered, shall automatically extend.”

G, c, 5, c. ...“and stop arm, if air or electrically powered, shall retract immediately.”

G, c, 5, d. ...“ Stop arm, if air or electrically powered, shall automatically extend.”

Looking through Policy 4334, it appears that the stop arm and crossing control arm may be able to be either air or electrically powered. Can we get an official response specifically for a Type A? I would like to get an official response quickly so we can give our customer a prompt answer for their orders.

**A1:** There is no conflict in the 2 sections in Policy 4334. If air controlled or electric stop arm is used, the activation and retraction will still be the same as prescribed in Policy 4334 and the bid specifications. Currently the only stop arm permissible is air operated.

After consideration, permission for an exemption to use an electric stop arm or crossing arm installed on a type A1 bus will be granted for this bid.

**Q2: "General terms and conditions, number 14, Purchasing Card Acceptance", I am requesting that the box be checked that "Vendor is NOT required to accept the State of West Virginia's Purchasing Card as payment for all goods and services. This has been an object of much discussion over the past several years as the required use of this method of payment will significantly increase the price of school buses due to the heavy fees assessed to the Vendor. Because of this, the box has always been checked to "not require".**

**A2: Consider the box checked. Vendors will not be required to accept the State of West Virginia's Purchasing Card as payment for all goods and services.**

**Q3: I would like to request that a Bid Classification be set up for all Type C "conventional and special needs conventional buses" for Gasoline powered engines. This could be accomplished by adding it to the alternate fuels section of the "West Virginia Minimum Requirements for Design and Equipment of School Buses". The gasoline powered school bus is a viable option for the State and would be less expensive than the current fuel offering types.**

**A3: The WVDE Office of School Transportation recognizes that per specification language, gasoline is not an alternative fuel.**

**At this time, the request to add gasoline powered engines in the "alternative fuel" section of the minimum requirements for this bid cycle is denied.**
