# Recommendation

occupant of the vehicle, with mounting systems tested in accordance with the requirements of FMVSS 205;

v. Only use child restraint devices in the position for which they are designed and tested; and

b. EMS agencies should have appropriately-sized child restraint system(s) readily available on all ambulances that may transport children. Additionally, personnel should be initially and recurrently evaluated and trained on the correct use of those restraint systems;

i. The device(s) should cover, at minimum, a weight range of between five (5) and 99 pounds (2.3 - 45 kg), ideally supporting the safest transport possible for all persons of any age or size;

ii. Only the manufacturer's recommendations for the weight/size of the patient should be considered when selecting the appropriate device for the specific child being transported; and

## Solution - ACR4

The Ambulance Child Restraint provides the safe and effective transport of infants and children in an ambulance, covering weight ranges from 4lbs to 99lbs.

In addition to the Small (11-26lbs), Medium (22-55lbs) and Large (44-99lbs) sizes, this innovative, flexible and fully adjustable harnessing system now comes in an Extra Small (4-11lbs) and are all colour coded for easy selection.

Quick release clips dock with the ACR harness, holding the patient in place to prevent potentially dangerous movement during transportation.

### Features and benefits

- History - 7 years proven track record
- Open channel design allows complete patient access from the airway to the waist without unrestraining the child.
- The restraint tightens into the mattress of the stretcher not into the child preventing any additional injury to the patient.
- Compact packaging, the ACR-4 fits into its own 10 x 10 custom bag taking up less room in the back of an ambulance.
- ACR-4 replaces the need to carry multiple devices to accomplish the task of restraining all size patients
- Machine washable

**QUANTUM**  **EMS**  
MINIMUM EFFORT, MAXIMUM EFFICIENCY

## Advantages of the ACR 4

- Allows for the safe, effective, restraint of all children from 4-99 pounds.
- ACR-4 offers four size of restraints in a single device XS: 4-11 pounds, SM: 10-26 pounds, MED: 22-55 pounds, LARGE: 44-99 pounds.
- Open channel design allows complete patient access from the airway to the waist without un-restraining the child.
- The restraint tightens into the mattress of the stretcher not into the child preventing any additional injury to the patient.
- Compact packaging, the ACR-4 fits into its own 10 x 10 custom bag taking up less room in the back of an ambulance.
- ACR-4 is universal will work on any stretcher or backboard without a bracket.
- ACR-4 replaces the need to carry multiple devices to accomplish the task of restraining all size patients
- ACR-4 has been fully crash tested under the strictest of standards
- Color coded for easy size identification
- Machine washable
