Dell's global customer pricing rates (GCP rates) are Dell's trade secrets and constitute confidential and proprietary information. This information is made available to customers on a confidential basis and may not be disclosed to any other party other than the party to which it is disclosed. Further, this information may not be disclosed to any person who does not require such information to carry out the specific purpose of this disclosure.

GCP rates may be used by Dell to convert U.S. Dollar prices to local currency prices but do not necessarily represent an offer to make an exchange. Due to the dynamic nature of foreign exchange markets, Dell may at any time change the instruments, currencies or process for these rates. In particular emerging market currencies, such as the Mexican Peso and South African Rand, are more likely to be adjusted due to their inherent volatile nature.
