WV PURCHASING
DIVISION

MCKINLEY
ARCHITECTURE + ENGINEERING

August 31, 2018

Melissa K. Pettrey, Senior Buyer
Department of Administration, Purchasing Division
2019 Washington Street East
Charleston, WV 25305-0130

Dear Ms. Pettrey and Members of the Selection Committee,

McKinley Architecture and Engineering is pleased to provide the General Services Division with our Statement of Qualifications for providing Architectural/Engineering evaluation and design and construction phase services for renovation of Building 74, located off-campus from the main West Virginia Capitol Complex. As you review this submission, we emphasize the following strengths of the McKinley with respect to your project:

McKinley Architecture and Engineering (*McKinley & Associates*) has been providing design services since 1981. With offices in **Charleston** and **Wheeling, WV** and **Pittsburgh, PA**, we support a professional staff of **Architects, Engineers, Construction Administrators**, a Qualified Commissioning Process Provider, a certified Interior Designer, a Historic Preservation Specialist, and more. Our staff also includes **LEED Accredited Professionals specializing in Building Design & Construction** (LEED AP BD+C) that have the experience and knowledge to add **energy efficient** aspects into your project.

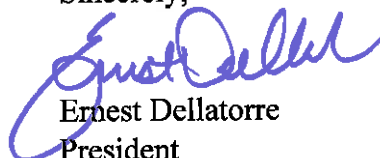

Your project will be led by **Thomas R. Worledge, AIA, LEED AP BD+C, REFP**, whom is an **Architect** and a **LEED Accredited Professional specializing in Building Design and Construction**. He has led multiple relevant renovation projects across the State, has award-winning projects, completed 2 LEED Certified and multiple LEED Registered projects (including West Virginia State governmental and office buildings), is a leader in energy efficient "green" design, and much more. He is the liaison and main Point of Contact between the General Services Division and our firm. He will be responsible for coordinating all the disciplines working on the design, which includes our in-house Architectural and Engineering staffs, a Construction Administrator, and more.

McKinley knows innovative design and the newest technology, and we know how and when to apply it effectively. We have vast **renovation** experience, including **many projects that occurred while the building was occupied**. We have also designed over 1,000,000 SF of commercial office space in the past 10 years, including the **LEED Certified Building 55: West Virginia State Office Complex**. Moreover, the Maxwell Centre, Orrick's Global Operations Center, and the Charleston Enterprise Center - three of our many renovation projects - have all won awards from the American Institute of Architects. We have won additional design awards and recognitions for many of those projects, as well as other awards and recognitions for other renovation projects. Many of these have **phased** construction plans to accommodate tenant occupancy during the construction.

In closing, one of the more exciting aspects of our job is **listening to you, our client**, in how you envision this project, and **transforming your ideas into realities**. This can only be accomplished by effectively working together with you. Most of our clients are repeat, which is a good indication of the services we provide. The main reason we have been able to maintain this relationship is because **we listen to their needs, and then deliver**. We encourage you to speak with our references because we feel this is the best way that our abilities can be conveyed to you.

We love what we do, so we care about the results you get. We are ready to begin **immediately** and will meet all your **project goals and objectives**. Thank you for reviewing our submission and considering McKinley Architecture and Engineering for your project. If you have any questions, please do not hesitate to call at any time.

Sincerely,

Ernest Dellatorre
President

McKinley Architecture and Engineering
(304) 340-4267

"Vendors should provide information regarding its employees, such as staff qualifications and experience in completing similar projects ...

First and foremost, we can state that McKinley Architecture and Engineering (*McKinley & Associates*) will devote whatever time is necessary to provide the General Services Division with a successful project. McKinley is a full-service A/E firm that employs a staff of multiple licensed Architects and architectural designers, registered Professional Engineers and engineering designers, and more. We have vast experience with similar projects, and know we will **successfully complete your 3 Project Goals and Objectives** you have listed in Section Three, Part 3 of the Solicitation.

Our **portfolio** include multiple relevant projects; examples of which you will see later in our proposal. Over the years, our firm has **won multiple local, State, and National awards and recognitions for our works, including multiple renovation projects.** No project is too large or small; we have designed projects ranging from a few thousand dollars to multi-million dollar projects. Additionally, we have vast experience with **phasing** construction if that is needed, and will coordinate your project as required. We we have designed over 1,000,000 SF of office space in the past 10 years, including the new **LEED Certified Building 55 - West Virginia State Office Complex** building. In addition, your facility may have many different criteria to address, such as sensitivity to the people using the facility, safety and security, as well as cost and energy efficiency. We have also renovated dozens of relevant buildings.

Our services ranges from feasibility planning and concept design through construction administration. We understand that the success of governmental and commercial/office renovation projects is measured not just by architectural design alone, but also by the added considerations of all members of the design and development team. Our team members have been **working up to 19 years together.** Our "in-house" registered professional architects and engineers work together everyday and have done most of the projects here as a group. If McKinley Architecture and Engineering is chosen for this project; we are **available to start immediately** upon our being selected, and will provide the necessary hours to complete your project on time. In addition to those key team members whose resumes are on the upcoming pages; we can also attribute more professionals from our various trades. The technical depth of our professional staff indicates that these projects can be accomplished without overloading our group or computer graphics systems.

McKinley Architecture and Engineering is on the forefront of innovative design. **Sustainable Design** is a fastly growing and supported philosophy. **We can incorporate energy efficient "green" design into the renovation project.** McKinley Architecture and Engineering identifies the changes necessary in the design of today's buildings to meet the demands of the future. This approach helps to retain the buildings' long-term profitability and value, which achieves the buildings' sustainability. We offer proactive solutions to complex problems such as indoor air quality, resource depletion, water quality, and much more. It is with this experience that we are able to bring insight to the design to retain and improve your long term value. We have **LEED Accredited Professionals specializing in Building Design and Construction** on staff, **which includes your Project Manager, Thomas R. Worlledge, AIA, LEED AP BD+C, REFP.**

On the following pages are the resumes of your design team, to see their individual staff qualifications and experience in completing similar projects.

Thomas R. Worlledge, AIA, LEED AP BD+C, REFP

Architect / Specialized LEED Accredited Professional

Southern WV-Area Manager / Charleston Office Manager

EDUCATION:

Virginia Polytechnic Institute & State University
Master of Architecture - 1992

Fairmont State College, School of Technology
B.S. Architectural Eng. Tech. - 1983

PROFESSIONAL AFFILIATIONS AND REGISTRATIONS:

Registered Architect in:

West Virginia
Ohio
Pennsylvania
Tennessee
Virginia

National Board Certification:

NCARB #48600

President:

West Virginia Society of Architects

Member:

The American Institute of Architects (AIA)
US Green Building Council (LEED AP BD+C)
Sustainable Building Industries Council
Recognized Educational Facility Professional (REFP)

Founder & Chairman of the Board:

US Green Building Council's West Virginia Chapter

Former voting member:

ASHRAE 90.1 Int'l Energy Code Committee

PROFESSIONAL EMPLOYMENT:

McKinley Architecture and Engineering
Manager, Charleston Office
Charleston, WV (2005 to present)

Proactive Architecture Inc.
President
Charleston, WV (1999-2005)

Silling Associates Inc.
Vice President
Charleston, WV (1992-1999)

TAG Architects
Charleston, WV (1985-1990)

Alpha Associates Inc.
Morgantown, WV (1983-1985)

SUMMARY OF EXPERIENCE:

Thom is a skilled **Architect (AIA)**, a **LEED Accredited Professional with a specialization in commercial building design and construction (LEED AP BD+C)**, and a **Recognized Educational Facility Professional (REFP)**. He is a registered architect in 5 states, including West Virginia. Mr. Worlledge is a former voting member of the ASHRAE 90.1 Standards committee that forms the basis of the International Energy Code. He was also the president of the state chapter of the AIA. Mr. Worlledge has been involved in design of projects ranging in from a small home additions (one of which was featured on HGTV's New Spaces Show) to multimillion dollar projects such as the \$20 million Parkersburg High School renovation/addition and historic preservation project, the fast-tracked \$6 million WVU IOT Maclin Hall renovation project, the **LEED Certified Building 55: West Virginia State Office Complex** in Logan, and the \$30 million Fairmont State University 3 building "University Terrace" Student Housing College Apartments Complex to name a few. Thom won a 2013 Placemaker Award for "Leadership, Inspiration, Stewardship" from West Virginia GreenWorks, at The Building Conference in Morgantown; moreover, 3 of his projects (N&D Natural Energy Design Building, Hilltop Elementary School, and Williamson SMART Office) all won Placemaker Awards. The **LEED Certified Hilltop Elementary School** won multiple State and National awards and recognitions.

NOTABLE PROFESSIONAL ACHIEVEMENTS:

WV Department of Health & Human Resources' Ohio County (Wheeling) office renovation / build-out

Building 55: WV State Office Complex in Logan (**LEED Certified**)

United States Postal Service - multiple projects across WV, including office build-outs, such as Parkersburg

Charleston Enterprise Center office renovation (**WV AIA Design Award winner** / energy efficient "green" design)

WVU Institute of Technology - Maclin Hall Dormitory renovations

West Virginia state Police - New Logan Detachment

WV State Police Academy - Renovations to Buildings A, B, and C; New Buildings D and Multi-Purpose Building

West Virginia University - University Police Building fit-out

West Virginia Plaster and Cement Masons Building

West Virginia School Building Authority - Renovations for Boone, Hancock, Marshall, & Wood County Schools

Marshall County Schools - Hilltop Elementary School (**LEED Certified - won multiple WV and National Awards & Recognitions**)

Bellann in Oakhill, WV (**LEED Registered**)

Veterans Affairs Medical Centers - multiple VAMCs around WV and PA
Big Sandy Arena & Convention Center

WVSU - Gus R. Douglass Economic Development Center renovations

Tim E. Mizer, PE, RA, QCxP

Architectural Engineer / Architect / Commissioning

Director of Engineering

EDUCATION:

Kansas State University
B.S. Architectural Engineering - 1983

University of Cincinnati
Architecture

PROFESSIONAL AFFILIATIONS AND REGISTRATIONS:

Registered Engineering in:
Ohio
West Virginia

Registered Architect in:
Ohio

**Qualified Commissioning Process
Provider**

PROFESSIONAL EMPLOYMENT:

McKinley Architecture and Engineering
Director of Engineering
Architect / Engineer / Commissioning
Wheeling, WV (1995 to present)

M.C.C. Engineering
Director of Design
Columbus, Ohio (1988-1995)

Schooley Caldwell and Associates
Electrical & Mechanical Design
Columbus, Ohio (1986-1988)

Mizer Design
Free Lance Architectural Engineering Design
Columbus, Ohio (1985-1986)

Envlrotek, Inc.
Drafting and Electrical & Mechanical Design
Raleigh, NC (1984-1985)

SUMMARY OF EXPERIENCE:

A very talented and unique professional who is registered both in **Engineering** and **Architecture**. Mizer's background has provided him with a total understanding of the engineering components and the process necessary for integrating architectural design and building systems. In addition, he is also an HVAC **Qualified Commissioning Process Provider**, where he has been formally trained to fully understand how integrated HVAC systems function and how systems interface with others to run your building efficiently. As the **Director of Engineering**, Mr. Mizer's presence is a key to the design procedures required to coordinate the functionality of the engineering systems into the aesthetics of a building space. Mr. Mizer joined McKinley Architecture and Engineering in 1995, and has over 30 years of experience.

NOTABLE PROFESSIONAL EXPERIENCES:

Building 55: WV State Office Complex in Logan (LEED Certified)

Building 34: WV State Office Complex in Weirton

West Virginia Department of Health & Human Resources' Ohio County office fit-out / renovations

Orrick's Global Operations Center restorations / renovations

Maxwell Centre restorations / renovations

Bennett Square restorations / renovations

Ft. Henry Building restorations / renovations

Catholic Heritage Center restorations / renovations

The Towers Building renovations

United States Postal Service - dozens of projects, including historic preservation / renovations

West Virginia Independence Hall historic preservation / renovations

Capitol Theatre restorations / renovations

WVU Colson Hall restorations / renovations

West Virginia State Police - dozens of renovations, additions, and new detachments State-wide

West Virginia Army National Guard - multiple projects

VAMC Beckley renovations

Dr Ganzer Office Building renovations

Raleigh County Emergency Services Authority's 911 Center and Emergency Operations Center renovations

Ohio County Justice Center renovations

Marshall County Justice Center

Marshall County Schools - Hilltop Elementary (LEED Certified)

Bruce A. Kennedy, PE

Electrical Engineer

EDUCATION:

The University of North Dakota
B.S. Electrical Engineering - 1975

DeVry Institute of Technology

MILITARY SERVICE:

US Air Force - Honorable Discharge

PROFESSIONAL AFFILIATIONS AND REGISTRATIONS:

Registered Engineer

PROFESSIONAL EMPLOYMENT:

McKinley Architecture and Engineering
Electrical Engineer
Wheeling, WV (2018 to present)

Advanced Electrical Simulations LLC
Owner/Principal Engineer
Spring, TX (2014 to present)

Cameron International
Principal Electrical Engineer
Houston, TX (2011-2014)

SUMMARY OF EXPERIENCE:

Mr. Kennedy has been an Electrical Engineer since 1975. He is an experienced power electronics/electrical systems design engineer with extensive electrical simulation experience using ETAP, SKM, EasyPower and PSIM. He personally owns and maintains ETAP license. He has completed electrical system designs for industrial, office, medical, educational, retail construction, and more.

NOTABLE PROFESSIONAL EXPERIENCES:

WVDOT, Division of Highways - District 6 Moundsville
Headquarters

The Towers Building renovations

Wetzel County Schools - Valley Field House

Harrison County Schools - Johnson Elementary School

Facilities arc-flash, short-circuit fault, protective device coordination, load flow and harmonics studies.

Facilities electrical system existing conditions, code compliance and problem solving surveys.

Drilling rig short-circuit fault current, protective device coordination, load flow and harmonics studies.

Application of NEC, IEC and ABS standards to mobile offshore drilling rig electrical systems.

Computer data center electrical system design and onsite project management.

Data center short-circuit fault current, protective device coordination and arc-flash studies.

Electrical system designs for medical, industrial, office and retail construction.

Building load analyses, emergency generator sizing and fault current studies.

Electrical system designs for hospitals, medical clinics and educational buildings.

Short-circuit fault current, protective device coordination and arc-flash studies.

Industrial battery charger and UPS systems power electronics design.

Custom power conversion equipment/systems design.

Scott D. Kain

Plumbing & Electrical Engineering Designer

EDUCATION:

Technology Education College /
Ohio State University
Associates In Mechanical Design - 1996

PROFESSIONAL EMPLOYMENT:

McKinley Architecture and Engineering
Engineering Designer
Wheeling, WV (2001 to present)

HAWA Inc.
Mechanical Designer
Columbus, OH (1998-2001)

Autotool Inc.
Engineer
Columbus, OH (1995-1998)

SUMMARY OF EXPERIENCE:

Mr. Kain is an accomplished engineering designer who has performed in all the engineering trades we provide; specializing in electrical, plumbing, and fire protection. He has been utilized for various McKinley Architecture and Engineering' projects that needed additional mechanical, structural, and architectural manpower. In addition, Mr. Kain has also provided 3D renderings, to aid in business development, during his long tenure at McKinley Architecture and Engineering.

NOTABLE PROFESSIONAL EXPERIENCES:

Building 55: WV State Office Complex in Logan (LEED Certified)

Building 34: WV State Office Complex in Weirton

WVDHHR's new Ohio County office fit-out

Cornerstone Group - new Highlands office building

Panhandle Cleaning & Restoration warehouse and office building

... proposed staffing plan ...

* McKinley Architecture and Engineering is willing to dedicate more professionals if they are needed; including more Architects and Designers, Construction Administrators, and more.

The work to be performed by your design team is very clear; to evaluate, prioritize and design within budget to meet the Project Goals and Objectives of the West Virginia General Services Division. You will see in the submittal that McKinley Architecture and Engineering has included several professionals to handle all aspects of the RFP. We are available to start **immediately** upon our being selected, and our Team is available to dedicate the necessary effort and hours to complete your project on time.

We know this Team possesses the required expertise to address all facets of your project - from architectural and engineering services, to phasing construction which accommodates current tenancy occupancy and minimizes disruption to concurrent operations of the facilities, meeting codes and current office building standards, conducting thorough evaluations and analysis, interior and exterior renovations, building envelope repairs, windows, roof, mechanical and electrical systems, plumbing, cost effective and energy efficient designs, and more. Our team can also provide other services which you might desire, such as possible interior design services, commissioning, and more.

We believe our strength lies in the quality of the people we employ. Our seasoned staff has an unsurpassed knowledge of the business and the dedication it takes to make each project a success. All of our project managers, Architects and Engineers, write their own specifications for a project. By doing so, the specifications are written for - and pertinent to - only your project.

We are confident we can meet your program requirements. We have worked with owners in many different sectors of business and have been able to comply with their various requirements and standards; we also have experience with owner standards from both Federal and State agencies, such as the GSD, WVSP, DOD, ARNG, VA, FAA, SBA, HUD, USPS, EPA, NPS, MSHA, NASA, DOE, DHHR, DRS, DOC, DOJS, DOT, and WVU to name a few. We are able to respond to their needs, and we are certain that we are able to respond to all of your needs as well. You appropriately recognize how codes, and state / federal regulations are important to a successful project. Our professional's design within these codes daily. All documents will be prepared with the current State Building Code and State Fire Code as well as all State and Federal Codes, Regulations, and Ordinances. We are members of many organizations, and follow their standards, such as NFPA, A4LE, AWI, WVEDC, AIA, NCARB, ASCE, ASPE, BOCA, ASHRAE, and ACI International to name a few.

McKinley Architecture and Engineering always strives to improve the services we provide. Here is a partial list of our Modeling Software as well as other equipment/software we use: Adobe Creative Cloud, Architectural Graphic Standards V 3.0, ASCE Standard, Autodesk Building Design Suite Premium (BIM) and Ultimate with Clash Protection (BIM), Autodesk Revit Architectural (BIM), Autodesk Revit MEP (BIM), 3D Studio Max, Autodesk Autocad Architecture, Autodesk Autocad MEP, Autodesk Autocad Civil 3D, Autodesk Ecotect Analysis, Carmel Design Build 4.0, Climate Consultant 3, COMcheck 3.2.1, Corel Draw 12, Cummins Power Suite, EELabs 3.1, Enercalc 5.6, eQUEST 2.02, HAP 4.34, Lite Pro, Visual Professional Edition (Light Modeling/Calculation Software), Macromedia Freehand 8, Masterspec, Ram Advantage 6.0, SketchUp, Storm Water Detention/Retention Design Tool, Sweet's, and more. **We know the new technology and we know how and when to apply it effectively.**

To showcase our quality of work, over the years our firm has won multiple local, State, and National awards and recognitions for our works. Some of the design awards we have won are: West Virginia Department of Environmental Protection's Clean Energy Environmental Award, West Virginia AIA Honor Award, 3 West Virginia AIA Merit Awards, 2 U.S. Department of Education Green Ribbon Schools, American School & University Magazine's Architectural Portfolio - Outstanding Design, Gold Medal Green Building Award by Building of America, Governor's Award for Historic Preservation, 2 Preservation Alliance of West Virginia - Heritage Tourism Awards, and 2 Black Bear Award for the Highest Achievement for the West Virginia Department of Education's Green Ribbon Schools program, just to name a few.

Our approach to design requires a dialog with the GSD. Throughout the design process, we will hold workshops with the GSD to get the critical information needed to achieve a design that meets your needs and budget. The most important element of the entire process becomes **communication from you** to our designers. We use and welcome your input throughout the project. We continually achieve success in projects by maintaining time and cost management, quality control and excellent communication amongst the client and contractors. We can and will perform for you on time and within your budget.

The way that we have historically **achieved success** with ANY construction project is by understanding fully the needs pertinent to the project by reviewing with the building Owner as early on as possible. Initial meetings with the users and staff will incorporate references to the standard with the object goal of determining budget, design and logistical priorities for the project.

When there are occupants that need to stay within the building during the interior renovations; through our vast experience we have found that a **clear up-front plan** for construction is the best solution to lessen the intrusion of the construction. **Many times, current occupants are not affected by renovations, for they are on different floors.** Also, many times there are **just minor inconveniences**, such as having a side entrance down for a small period of time, or an elevator that is temporarily used for contractors-only. That up-front plan will give every occupant forewarning of any minor inconvenience, **which makes for a smoother construction period** for both current occupant and contractor. **Moreover, since there might be current occupants whose areas will need to be renovated; where possible, we always try to plan for construction project phasing and achieve a "move once" scenario for the building occupants.** This is exactly what McKinley Architecture and Engineering has found to be most effective where these relocations occur one time, after the renovations have taken place to previously vacated areas of the existing buildings. Spaces requiring relocation within the building will need to be documented and approved by the General Services Division, and accommodations need to be made for "swing space" for temporary use during construction. **Phased construction will need to be done either by tenant space, or by floor.**

At the kickoff of the project, the McKinley Architecture and Engineering team members will meet with you to review scope and gather project information. We will review this existing material provided by you (such as floor plans) and prior work completed to ascertain if this information can be incorporated into the current program.

Upon completion of this step, McKinley will acquire all new information sufficient for use as base mapping, and will commence Schematic Design in connection with the design team and focus on designing the renovations.

Upon completion of the Schematic Design Phase, we will prepare a preliminary cost estimate of expected costs. Our Team will meet with you and discuss these findings and based upon conclusion of this meeting move forward with the preparation of the Design Development Phase. We will provide a milestone progress set for the client to review and provide comment at the completion of the Design Development phase.

After conclusion of this phase, McKinley Architecture and Engineering will prepare Final Construction Plans and Specifications and a final cost estimate for all aspects of the project. We will also submit necessary applications for jurisdictional permitting to allow construction.

We will assist in bid preparation and selection, and upon contract award provide construction contract administration, and McKinley Architecture and Engineering has Construction Administrators on staff to fulfill this need as well.

During the construction, the processing of shop drawings and submittals will be controlled and monitored by Mr. Worledge, your Project Manager / Architect, and includes the receipt, logging, review and return of submittals. Your Project Architect (and Engineers) will also be a part of some on-site meetings and will be available to answer RFIs during the construction portion of the project; moreover, one of our Construction Administrators (CAs), Mike Price, will now take the more active role. McKinley Architecture and Engineering has developed a more comprehensive role for the Construction Administrator assigned to your project. Our CAs performs the traditional tasks of monitoring construction to ensure compliance with Contract Documents, observing construction progress, conducting progress meetings, administering payment requests and change orders, and more. But our CAs also constitutes an important thread in the texture of project continuity: our CA is part of the project development from the first design team meeting. Since they are here from Day 1 (they are not thrown into the project only when construction starts; they are here from the beginning), so they know the ins-and-outs of the project. He becomes familiar with project goals, objectives, and building conditions concurrently with the other team members, and subsequently is able to maintain an informed, but usefully peripheral, coordination role that adds value to the process, both during design, and during construction. His position as site liaison is thus extended to include project liaison-in-house wherever he sees a missing link in communication. As his primary tasks are construction related, often, what he brings to the table is good construction sense. Also, during construction the primary objective of our Construction Administration service is to ensure completion of work the way the client wants it - as scheduled and as budgeted.

In addition, our Eleven Month Walk-Through is a process where our professionals return to your facility eleven months after the project is completed. At that time they review all the work that was completed and check all warranties. We are making sure all of the covered work is in order and that the warranties do not expire with equipment or product not working properly. We have been doing this walk-through long before it being adopted as part of the AIA 101 Standard.

We also conduct Post Occupancy Evaluations with the Owner to find out how well we matched the Owners' needs.

With our McKinley Architecture and Engineering's previous experience on multiple interior and exterior renovations projects; offices and related projects; phased construction projects; our vast experience with codes; and our great working relationship with various State agencies; we are confident that we have the talent and technology needed to make these renovations successful.

... Descriptions of past projects completed entailing the location of the project, project manager name and contact information, type of project, and what the project goals and objectives were and how they were met."

Orrick's Global Operations Center office building fit-out

Location: Wheeling, West Virginia

Contact: Mr. Will Turani

Orrick, Herrington & Sutcliffe LLP
2121 Main Street
Wheeling, WV 26003
304 / 231-2629

Type of Project: Office Building renovations

Project Description, Goals, and Objectives: This 100 year old warehouse was adaptive reused and renovated to create some of the most creative office space in the State. This four-story, 88,000 SF former historic warehouse is now a high tech "back office" for a major multinational company. The greatest challenge was to convert the 100 year old once very industrial wood-framed building into a modern "Class A" office facility while retaining the historical heritage of the structure and district itself. This \$8 million dollar project won a West Virginia AIA Merit Award.

Extensive restoration of the exterior was needed first. The entire exterior shell was designed and constructed in 6 months to attract a new tenant (it quickly became the home to the international law firm Orrick. This building soon became the company's Global Operations Center; no other firm has a 24/7 facility that rivals it. It provides the firm and its clients with a central business infrastructure that delivers comprehensive and reliable support services around the world, and around the clock). The exterior renovations included reconstructing 120 dilapidated steel windows and glazing, extensive brick repointing, roof, construction of a new public entrance, and parking lot.

The building was partially occupied while renovations continued. Architecture & engineering design was completed in-house and included a completely new mechanical/HVAC system, structural, civil, electrical and fire suppression systems. On the interior, the original facility was almost void of the vertical circulation needed a modern day, team oriented work environment. Now, an exposed steel atrium/elevator/stair core connects the four floors while introducing the industrial metals into the interior. Perforated columns, beams, and wire meshes allow daylight to filter in through usually solid steel construction. Two exposed, glass backed passenger elevators with stainless steel interior finishes now traverse the four floors allowing passengers a dynamic view through the atrium and walkways out to Main Street. The stainless steel and galvanized finishes of the exposed spiral ductwork, electrical conduits and cable trays, sprinkler piping, and perforated metal light fixtures further enhance the industrial concept of the design.

BEFORE and AFTER

Wagner Building - Multiple Office fit-out projects

Location: Wheeling, West Virginia

Contact: Mr. Dennis Kozicki

The Maxwell Partners

32-20th Street / Maxwell Centre #300

Wheeling, WV 26003

304 / 232-2280

Type of Project: Office Building renovations

Project Description, Goals, and Objectives: Located in the midst of the renaissance of downtown Wheeling, the historic Wagner Building is listed on the National Register of Historic Places and is the centerpiece of the new 10-acre Celoron Plaza Office Park. The Wagner Building was an old sugar warehouse built in the 1930s. After being vacant for over 30 years, McKinley Architecture and Engineering completed this \$6.2 million (*original renovation project cost*) adaptive reuse project by **totally renovating this 7-story brick and concrete structure in phases (on a floor-to-floor basis), and turned it into a corporate center that includes beautiful Class "A" office suites as well as a new bank.** This office tower dominates the waterfront skyline and affords tenants incredible and unsurpassed panoramic views of the majestic Ohio River. The original fit-out of the tenant spaces on the first, fifth, sixth, and seventh floors was completed in 2000, and the fit-out of the tenant space on the second, third, and fourth floors was completed in 2004. We planned for **flex space**; many of the floors are "open floor plans" where we help customize the suites to meet a new businesses' needs; hence, **we have worked on multiple renovations over the years**, and recently worked on a new 5th floor office build-out for a new client.

Work on this **60,000 square-foot structure** included **total design of mechanical, electrical, plumbing, fire suppression systems as well as all architectural components, exterior renovations, window replacements, roof, ADA compliance design, new elevators, and a total gut of the interior.** All of the existing **windows** were replaced, and we designed them to match a close profile with the original windows; this included wider flat faced muntins, and the sash in the top six floors are all industrial steel units built around 1926. Two elevator replacements were also a major part of the original project; after they were completed, and **when new construction is on-going**, the contractor has the ability to return one of the two elevators into temporary service as a construction lift. Our firm also worked within the Standards of the Department of Interior for this historic structure renovation.

BEFORE

& AFTER

Bennett Square Office Building - Multiple Office fit-out projects

Location: Wheeling, West Virginia

Contact: Mr. David H. McKinley
McKinley Properties, LLC
10 Kenwood Place
Wheeling, WV 26003
304 / 230-2400

Type of Project: Office Building renovations

Project Description, Goals, and Objectives: Bennett

Square is a historic 3-story, 22,000 SF renovation/rehabilitation project of the old Ohio County Public Library Building. The building was neglected and vandalized for over 30 years. **The finished \$7.5 million project houses "Class A" professional and medical office space in beautifully restored surroundings.** The building is located in the Centre Market Square Historic District in the National Register of Historic Places; therefore, a successful review submission to the Secretary of the Interior was necessary. We are also experienced with the Section 106 process required by SHPO and the Federal Department of the Interior. Documentation for state and federal tax credits is also a part of this project. **The project was completed in multiple phases beginning in 2007 and the final phase completed in 2013.**

Bennett Square has quickly become a cornerstone of the Wheeling business community with several key businesses occupying the space including: McKinley Carter Wealth Services headquarters, Dinsmore and Shohl LLC office, Dr. Don Chapman's Keep Smiling Family Dentistry office, and Omni Strategic Technologies office. Phase I included "Class A" office fit-out for the first and second floors, including preserved-in-place and salvaged architectural elements, as well as major electrical and mechanical systems designs. Renovations included both restored and new windows, doors, a new

and AFTER

roof with multiple skylights, terra cotta restoration, exterior masonry pointing, paint, stairwell upgrades, and a new elevator. Phase II completed the "Class A" office fit-out for the second floor. This phase also includes a major front facade restoration including pointing and replacement of the terra cotta banding, cornice, main entrance pediment and window trim, exterior brick masonry pointing and brick unit replacement to match existing. Finally, Dr. Chapman's dental office is a fit-out on the third floor. Planning included business offices, exam/operatory rooms, hygienist room, lab, custom casework, track lighting, specialty HVAC, special electrical and data, special plumbing for gases, a central dental dry vacuum system, and much more. All of these spaces were integrated into an existing interior historic building context. We were able to highlight important architectural features while also providing a sensitive atmosphere for the patients.

WV Department of Health & Human Resources' new Ohio County office fit-out project

Location: Wheeling, West Virginia

Contact: Mr. David J. Hildreth

WV Department of Administration

1409 Greenbrier Street

Charleston, WV 25311

304 / 558-1295

Type of Project: Office Building renovations

Project Description, Goals, and Objectives: We were asked by our client to **renovate a car showroom and service area into an office building** (now called the Mary Margaret Laipple Professional Building). **The first fit-out includes space for the Department of Health and Human Resources (DHHR).** The **56,783 SF building** was concrete and designed for cars; not people. The first challenge was to remove a large ramp that connected two floors of the building and level the concrete floors. **We worked with our client to fit the DHHR's program into the space and maximize the use of the space.** We had to work around the existing structural walls and columns and provide fire escapes at the different floor levels of the floor structure.

The **initial \$2 million fit-out project** was built in **three phases:** the **exterior was completed first (including new skin, doors, windows, etc.)**, next the **interior**, and then the **parking lot** so the project could be fast tracked to meet the Owner's 2013 move-in requirements. We worked with the local and State code officials to bring the building into compliance with the current building and fire codes and provide access to all of the occupied areas of the building. We worked with the owner of the building to allow a separate entrance for future tenants of the upper two floors and to keep the renovation cost to a minimum while providing a state of the art facility for the DHHR's use.

The showroom **windows** were mostly in-filled because of the sensitive nature of the materials in the DHHR's office, but windows high on the wall provide **natural daylight** in the space. **The fit-out was divided into three distinct spaces: secure office space, Client space, and training areas.** The **Office space is secured from the client area by an access control system.** The training space was designed to be stand alone for use by other State staff training.

and AFTER

Maxwell Centre - Multiple Office fit-out projects

Location: Wheeling, West Virginia

Contact: Mr. Dennis Kozicki

The Maxwell Partners

32-20th Street / Maxwell Centre #300

Wheeling, WV 26003

304 / 232-2280

Type of Project: Office Building renovations

Project Description, Goals, and Objectives: Dedicated to saving the past and long known as one of the state's leading historic preservation firms, McKinley Architecture and Engineering led the way for this **total renovation** and restoration of a 1908 structure. The **\$2.3 million** project represents the firm's effort in protecting the historic fabric of Wheeling. The Maxwell Centre is now Wheeling's premier business address. In just over a year's time, this former YMCA facility became the home for over 100 professionals in two law firms (Schrader, Byrd & Companion, PLLC and Burns White LLC), an accounting company (Wilson, Kozicki & Gwynn, PLLC), and McKinley Architecture and Engineering. The various companies had various program/space requirements we had to design. Each of the tenants had selected various upgrades, including parabolic light fixtures, chair rail, cove molding, ceramic tile, built-in bookcases, and wall coverings. Some of the other interior finishes and furnishings included a chandelier, fireplaces, casework, cabinets, reception desks, decorative ceiling upgrades, cornice, window sills, oriental carpeting, and signage among others. Work on this five story office building included researching the architectural past as well as all new systems, including: mechanical, electrical, plumbing and fire and life safety, data and communication, etc. All design work and construction administration was completed by our firm. The 51,000 SF building is found in the Centre Market Square Historic District (NRHP#: 84003651), in the National Register of Historic Places. We saved and restored multiple architectural elements, such as the main foyer tile, wooden floors, columns, windows, and more. We also helped the owner receive historic tax credits. The Maxwell Centre was recognized and awarded a West Virginia AIA Honor Award, a Governors Award for Historic Preservation, a Friends of Wheeling - Architectural Preservation Award, a Wheeling Victorian Society - Property Improvement Award for Adaptive Reuse, a Civitans Award - Grand Victorian Property Improvement Award, a City Council & Mayor's Award for Preservation, and a City of Hope Preservation Award.

Fort Henry Building projects

Location: Wheeling, West Virginia

Type of Project: Office Building renovations

Project Description, Goals, and Objectives: The 45,046 SF Fort Henry Building was originally designed and built as a Federal Style mansion in the 1850s. Because of its prime location, situated on a prominent downtown corner, the building was later purchased in 1890 to become the home to the budding Fort Henry Club (*where it gets its present name*). It served as a social club and meeting places until it closed in 2010; thereby leaving the building vacant. A few years later, the new owner could not find tenants, and began taking steps to demolish it. **That's when Fort Henry LLC (McKinley's subsidiary company) stepped in to save the building from demolition.**

Since the 4-story structure is included in the Wheeling Historic District in the National Register of Historic Places (NRHP Reference #: 79002597); McKinley Architecture and Engineering's goal is to maintain the historic character of the **interior and exterior by retaining any historic fabric, mouldings, finishes, windows, door frames, stone and masonry, etc.** All of the renovations being done are to comply with the United States Secretary of the Interior's guidelines for historic preservation and restoration. We have been grateful that the State Historic Preservation Office and other various entities have acknowledged our plans for the work, and we have been awarded a few Historic Preservation Grants, as well as has already recognized by the The City of Wheeling for our efforts to our commitment to the revitalization of downtown Wheeling.

To date, we have been successful in attracting multiple tenants, which has enabled us to commence with the development of the project. There is an anchor tenant which occupies the entire second floor, 2 other tenants occupy portions of the first floor, and we are designing another build-out for an additional tenant. Because the building had been in disrepair for many years, these **renovations/restorations** included upgrades required to **get the building up to current codes and standards, 2 ADA lobby entrances, windows rehab/replacement, masonry repairs, porch restoration, new HVAC, electrical service, plumbing, sprinkler & fire alarm systems, roof replacement, new elevators, storm & sewage line separation, sidewalks, and much more.** The tenant space renovations included office build-outs, work areas, conference rooms, restrooms, kitchenettes/break rooms, lobbies, and data systems among other scope. The current construction activities at the site have produced several inquiries for space and we continue to work with those prospective tenants.

The Towers Building projects

Location: Steubenville, Ohio

Contact: Mr. Thomas Gentile

Jefferson County Commissioners

301 Market Street

Steubenville, OH 43952

740 / 283-8500

Type of Project: Office Building renovations

Project Description, Goals, and Objectives: We have worked with the Board of Commissioners of the County of Jefferson on several projects over the past few years. One project example is **multiple phases of renovations and upgrades to The Towers Building**. This 76,300 SF building is a 40+ year old, 8 story high-rise in downtown Steubenville. Unusually cold weather, age, and the culmination of years of insufficient maintenance had resulted in a series of situations resulting in frozen pipes, systems shutting down, and continuing emergency maintenance issues in the building. In February 2014, due to primarily system malfunctions and weather related damages at the building, **an overall building condition assessment was determined to be necessary** by the Owner. Therefore, McKinley was hired to perform an **emergency Preliminary Analysis of the Needs and Energy Efficient Services** (including site visits, and write a report outlining our findings). Existing conditions related to the architectural, mechanical and electrical portions of the building were the primary focus of the study with the goal of addressing concerns associated with occupancy comfort, continued tenant satisfaction and to determine an efficient repair and maintenance recommendations for the building. Our recommendations address repair options, efficiency and energy saving solutions. McKinley's observations were conducted in a non-invasion fashion; essentially, this means that nothing was permanently removed or destroyed during the process. We completed a **Building Condition Assessment and Energy Efficiency Analysis Report**, and presented our findings.

After this, we have designed \$5 million in multiple phases of renovations for the building; a main roof replacement, mezzanine roof replacement and new skylight, building envelope repairs, a new boiler, new ADA handicapped ramp, sprinklering, and more. In addition, there was an adaptive reuse of a former bank on the first floor, into an office fit-out / renovations for the Jefferson County Board of Elections.

The exterior envelope repair project was around a \$800,000 project, and the contractor for that Phase was Church Restoration Group. This required masonry-clean all precast panels, including remove and replace all joint sealant, precast column repairs to realign columns as closely as

possible, attached new steel anchors, patch precast concrete where required, restoration of glazing system including new gaskets and anodized caps, and more.

For another phase, the new boiler project involved the replacement of existing inefficient electric boilers with a new gas fired boiler. The new boiler is of a **high energy efficiency**, and has a much **smaller footprint**. These projects were phased, and most were recently completed; the HVAC is currently under construction. The construction was performed with the building in operation.

Charleston Enterprise Center Office build-out

Besides the paint, what makes this office "green"?

McKinley Architecture and Engineering has been practicing "green" for years and has won awards for converting unused warehouse space into striking modern office buildings. We won a West Virginia Chapter of the American Institute of Architects Merit Award for this Charleston Enterprise Center renovation. One of the best ways to build green is to adapt an existing building; twenty percent of a building's energy consumption is embodied in the building's physical structure itself. The first thing you will notice is we left most of the existing structure exposed; this minimizes the amount of new materials required to define the space and allowed us to utilize some special features. For example, the centrally located conference room "Lantern" glows all day long from natural sunlight from above. This room's ceiling acts as a reflector, bouncing natural light throughout the space. In addition to reusing the space, we also reused doors to make all of the desks, workstations and conference table. The top of the dividers is made from "Homosote", a board made from 100% recycled newspapers and covered with a fabric made from 100% recycled polyester. An office full of unique, durable office furniture for less than 1/10th of the cost of standard modular furniture is another advantage. The office chairs are new, but the "Zody" chair by Haworth is the first chair to be **Cradle to Cradle Gold Certified**. This certification means that the manufacturer will take back the chair at the end of its useful life to disassemble and make a new chair, completing the cycle. Yes, the paint on the walls is green, but it also has very low volatile organic compounds (VOC's) which keeps the air we breathe cleaner, and contains an anti-microbial which inhibits the growth of mold and mildew. Most of the floor we chose to clean and seal with water based polyurethane, leaving the natural distressed state of the floor. The remainder of the space, we used a carpet tile by LEES which minimizes waste, has 35% recycled content and is **Green Label Certified**, meaning it **meets stringent indoor air quality requirements**. The window blinds allow the control of glare while maintaining the view and minimizing heat gain. The direct/indirect lights are controllable so the tenant can adjust the amount of electric lighting dependant on the amount of natural light coming in from the windows and skylight. Even the bowl on the conference room table is recycled from the original fire bell that used to be on the exterior of the building.

BEFORE

& AFTER

Building 55: West Virginia State Office Complex

Location: Logan, West Virginia

Contact: Mr. Robert P. Krause, PE, AIA

State of West Virginia, General Services Division

1900 Kanawha Boulevard East

Charleston, WV 25305

304 / 558-9018

Type of Project: Governmental Office Building - Full A/E Services - New Construction

Project Description, Goals, and Objectives: City leaders were searching for a catalyst to stimulate community efforts to revitalize downtown Logan, West Virginia. This **State office complex** has become that inspiration. In **March 2014**, this project became **LEED Certified**. The building is designed to reflect the history and culture of the area while incorporating **current technology and safety elements**, thus empowering the community leaders to create a vibrant connected urban core. This new **5-story building** underscores its major role in the development and revitalization of downtown Logan by uniting office space for **127 employees for 6 State agencies** under one roof, whom were once scattered throughout the city. The **53,200 SF building provides current technology, flexibility for future growth, and security features for existing and future tenants**. At the request of the Owner, the building was designed to be **energy efficient "green"** and meet sustainable design goals. To help achieve this, a tight building envelope was created with **closed cell foam insulation and thermal efficient windows**. One of the unique features of the building is the **natural daylight system** where we added **"light louvers"** which redirect daylight to the ceiling and diffuse natural light throughout the space. The open offices were placed around the exterior of the building and the enclosed offices along the interior wall so more of the tenants receive quality light. In addition, interior windows allow the daylight to pass to the center offices. The **HVAC system** included the installation of **2 high efficiency condensing boilers, packaged rooftop energy recovery ventilator, and much more**. For another feature, the plaza uses **recycled brick pavers** from the demolished street; the patterns intersect at a quilt star, a symbol of West Virginia heritage that is carried into the building's main entry. It is interesting to point out a stained glass window feature in this entry, which won a **2013 AIA Craftsmanship Award**. It is custom designed to reflect the culture and history of the area, and use as much glass from West Virginia Manufacturers as possible.

Per your request on the "General Terms and Conditions" Part 8 "Insurance," on the following pages you will see copies of our various Insurance Coverages.

ACORD™		CERTIFICATE OF LIABILITY INSURANCE			DATE (MM/DD/YYYY) 06/19/2018

PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

WITNESS THE FOLLOWING SIGNATURE:
