STATE OF WEST VIRGINIA Purchasing Division

PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, properly taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, fallure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the insurance Commissioner and remains in compliance with the obligations under the

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceed five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

Volkstone Perimeter Fencing Camp Dawson

August 29, 2018 1:30PM CEOI 0603 ADJ190000004

EXPRESSION OF INTEREST

August 29, 2018

Department of Administration Purchasing Division 2019 Washington St. E. Charleston, WV 25305

Attn: Stephanie L. Gale

RE: CEOI 0603 ADJ1900000004
Volkstone Perimeter Fencing (Design) Camp Dawson

Dear Ms. Gale,

Alpha Associates, Incorporated team is pleased to submit our qualifications to provide architectural and engineering services for the design of a perimeter fence for the Volkstone training site at Camp Dawson located near Kingwood, West Virginia. We have established a strong internal team for this important project. Alpha's past experience with similar projects, along with our intimate knowledge of Camp Dawson make us a perfect teaming partner with you to complete your project.

Since 1969, Alpha has partnered with numerous Federal, State, and local governments to provide architectural and engineering services for projects around West Virginia, including several projects at Camp Dawson. In addition to our experience with Camp Dawson, Alpha has completed design on various fencing projects around the state. Our qualified staff of Surveyors, Civil and Structural Engineers will provide the design for the fencing that will provide the maximum life for an economical cost. Our designs will insure the security of the Volkstone Site for generations.

Design Team

Alpha is a West Virginia owned and operated architectural and engineering design firm with locations in Morgantown, and Martinsburg. Our 22-person professional staff includes architects, civil and structural engineers, surveyors, cost estimators, construction representatives, landscape designers, interior designers, and technicians. The personnel that will be dedicated to your project are highly qualified professionals and support staff with the technical expertise to meet and exceed expectations of this project. This project will be managed

from Alpha's Corporate Office located in Morgantown, West Virginia. Alpha's Office in Morgantown is approximately 45 minutes from the site. This allows us to offer the WV National Guard and Camp Dawson a cohesive design team for a seamlessly completed project.

Project Understanding

The Army National Guard is looking to partner with a firm to design and develop construction documents for a perimeter fence for the Volkstone training site for increased protection and security. There will be some areas that will need to be environmentally protected during the project. A preliminary survey to locate all buildings on the training site and delineates all wetland areas near the site will also be included.

Summary

The Alpha Team is looking forward to building a successful relationship with the WV Army National Guard and the State of West Virginia by providing excellent service at affordable costs. Our dedicated team of professionals will make your project a priority. If you would like to further discuss this upcoming project, please contact me at (304) 296-8216 ext. 102.

Sincerely,

ALPHA ASSOCIATES, INCORPORATED

Architectural Design Civil Engineering Structural Engineering Surveying Interior Design Landscape Architecture Construction Administration

Alpha Associates, Incorporated was established in 1969 and since that time has completed hundreds of projects throughout Morgantown and the state of West Virginia. Alpha's Corporate Office is located in Morgantown with our Eastern Regional Office located in Martinsburg.

STATEMENT OF QUALIFICATIONS

Alpha Associates, Incorporated is a West Virginia-based architectural and engineering design firm that provides services in the areas of architectural design, interior design, construction administration, civil engineering, structural engineering, landscape design, project management, and surveying. Our clients benefit from our unique combination of extensive design and construction experience, advanced technical tools, dedicated principals and highly skilled staff members.

Since 1969, Alpha has provided architectural and engineering design services on numerous industrial projects. Alpha's philosophy has always been to provide exemplary services for fair fees. We have always believed that the best way to succeed as a business is to go above and beyond the basic requirements of our contracts and do whatever is necessary to successfully complete the given project. What is best for the client is inevitably best for us too.

Everyone at Alpha, from the President to the administrative staff, works towards the goal of completing successful projects. Our principals are involved with projects from the earliest stages right through final completion and beyond. They will provide frequent updates on the project by using effective communication tools to manage the projects and all the involved parties. Our skilled staff of 22 architects, engineers, surveyors and administrative personnel all work diligently towards producing the drawings and specifications that will deliver our clients successful projects, completed on time and within budget.

Alpha has thrived for 49 years because we are a professional organization dedicated to providing superior architectural and engineering design services to our clients. While our staff is large enough to handle any size project, we are also small enough to give each and every one of our projects the individual attention to detail that will make them successful projects for our clients.

STAFFING PLAN

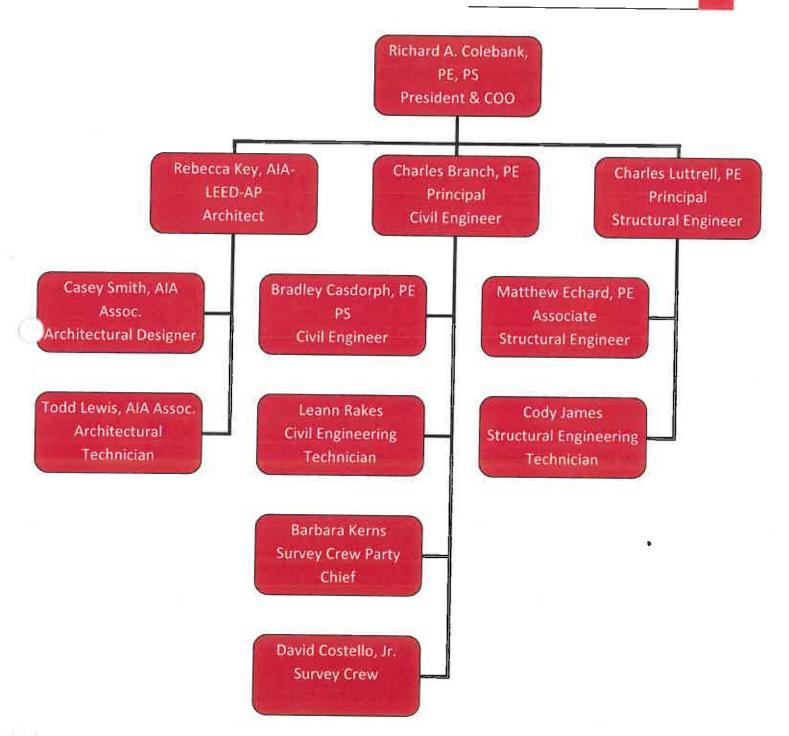

All work to be performed for the West Virginia Army National Guard will be managed out of Alpha's Morgantown office. In addition to your dedicated Project Team, Alpha's staff of 22 includes engineers, architects, architectural designers, interior designers, landscape designers, technicians, and support staff that is available to assist with any potential project need.

TEAM ORGANIZATION

COST AND SCHEDULE CONTROL

L

Alpha Associates, Incorporated has an excellent track record of producing projects on time and within the Owner's budget. Many A/E firms can claim the same successes few actually achieve the results Alpha has over the years. One of the determining factor is the tools the firms utilize to produce the budgets. Alpha utilizes a number of tools, both traditional and modern to exceed our clients' expectations.

A project schedule is a dynamic, ever changing entity. Your project schedule depends on many factors including:

- Personnel assigned to the project
- Chosen method of construction
- Changes to project scope
- Unique construction elements for each project

Successful project management depends upon consensus regarding work efforts, milestones and goals. The Alpha team has found that the development of detailed work plans, which delineate tasks and deliverables for each project phase, in concert with the client and full project team, is the most effective means of establishing expectations regarding the efforts required by the respective disciplines. In addition to guiding the efforts of the design team, the work plan sets forth specific time frames and decision points for Owner and user reviews, comments and approvals. Adherence to the schedule is the responsibility of the Project Manager. The Project Manager must insure the team members, including the owner have bought into the schedule and are maintaining their respective duties.

Developing an overall project schedule is a critical task that must take into account many factors: building type, owner's desire for occupancy, scope of work and level of documentation, whether contract(s) is bid or negotiated, available fee, and prior experiences on similar projects. Characteristic of the client, its organization, or the involvement of a construction manager and his responsibility for document review must also be considered.

This starts with a kick-off meeting which establishes ground rules, responsibilities, and line of communication. We have found that a team visioning session is a

great way to get everyone started off on the right track.

Determining a project schedule is a task that must be done with all parties involved in the process. Once the design process begins, a very detailed, realistic project schedule can be developed and communicated to all involved.

In a world where "time is money", the schedule of a project is almost as important as controlling the cost. Alpha also works diligently to control the budget of a project. The best way to control the cost of a project is to avoid the "scope creep" that can occur

Alpha also has an excellent record of budget control. Alpha's in house cost estimators, combined with an excellent relationship with contractors throughout the area enable us to develop accurate estimates early in the design process. The Alpha estimators begin at the schematic design phase of the project and develop a line item estimate of probable construction costs that can be carried through each of the project phases. At each phase the project estimate is updated to include a more detailed estimate in order that the accuracy can be enhanced. During these updated estimates, specific increases or decreasing can be identified allowing the owner to make informed decisions moving forward on the important budget issues for the project.

Many projects employ the use of alternatives' to control the budget through obtaining actual contractor pricing during the bid process. This allows flexibility for the owner in determining the costs of portions of the project that may be optional and critical for budget control.

Capacity

Alpha Associates, Incorporated is prepared to commit staff resources to the Camp Dawson project. Alpha has the qualified and experienced personnel, administrative support, along with the production equipment and resources to ensure the successful completion of this project. We are confident in our ability to provide the West Virginia Army National Guard with a committed and dependable design team. Our multidisciplinary design team is prepared to meet and exceed the expectations of the State by committing any resources necessary to meet the project schedule.

<u>Software</u>

The project team incorporates the latest computer and software capabilities required to complete the working drawings and specifications for this project. Our cost accounting system is top-of-the-line and we have the ability to differentiate fees according to task. We have secure e-mail and internet capability to allow efficient transfer of information between Alpha and the client. We currently have the latest editions of the following software:

- ➤ AutoCAD 18
- > REVIT (Editions up to 2018)
- ➤ Civil 3D
- ➤ RISA 3D
- ➤ RISA Floor
- RISA Foundation
- ➤ MathCAD

- Autodesk Suite
- Enercalc
- ➤ AutoTURN
- > TopCon GR5 GPS System
- TopCon Total Station with Reflectorless Capabilities
- Carlson Surveyor & Data Collector

SUMMARY

Richard A. Colebank, PE, PS | President and COO

Mr. Colebank is President and Chief Operating Officer of Alpha. He has been with Alpha Associates, Incorporated since 1985. He began his career with Alpha as a staff engineer and progressed through the ranks from Project Manager to his current position. Mr. Colebank has worked with diverse clients such as WVU, City of Morgantown, WVDOH, WVU Foundation, and the Morgantown Municipal Airport, as well as numerous other public and private clients. Since 1988, Mr. Colebank has been the Principal-In-Charge of the Civil Engineering projects developed at Alpha. In his current capacity, Mr. Colebank provides financial and administrative guidance for the day to day operations of the company while continuing to manage projects.

SUMMARY

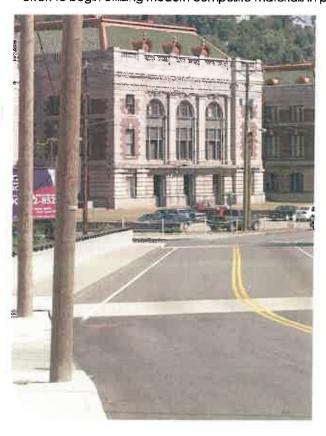

ALPHA RESUMES

Charles B. Luttrell, PE | Principal, Structural Engineer

Mr. Luttrell has worked with Alpha Associates, Inc. since 1996. He is the chief structural engineer on all projects at Alpha. Before coming to Alpha, Mr. Luttrell's graduate work resulted in several contributions to the cold-formed steel deck industry. His new method of analysis for non-uniform loads on composite concrete and cold formed steel decks has been made a permanent part of the Steel Deck Institute's design manual. Mr. Luttrell also worked on projects that involved pre-stressed timber bridge research with the WVU Constructed Facilities Center. Since coming to Alpha, Mr. Luttrell has had significant involvement in the effort to begin utilizing modern composite materials in practical bridge applications.

PROFILE

Matthew T. Echard, PE Structural Engineer, Associate

SUMMARY

Mr. Echard joined Alpha Associates, Inc. in early 2016 with a strong belief that his clients deserve intelligent, performance-based and value-oriented solutions. Drawing on experience working across the United States, Europe, and the Middle East, Mr. Echard returned to West Virginia to provide world-class service in a historically underserved region while making positive contributions to the future growth of his home state. Mr. Echard places a large value on the collaborative work process, believing that a building's form and function are derived from many contexts. Mr. Echard's office is located in the corporate office in Morgantown, WV.

Massachusetts Institute of Technology Masters - Engineering & Environmental Mechanics 2002 West Virginia University Bachelors of Science - Civil Engineering 2000

QUALIFICATIONS

- License: Professional Engineer: West Virginia, California
- California OES SAP Evalutor

AFFILIATIONS

American Concrete Institute (ACI) American Institute of Steel Construction (AISC) American Society of Civil Engineers (ASCE) American Wood Council (AWC)

PROFILE

Broad-based responsibilities in the following areas:

- Structural Engineering
- Structural Forensics
- Project Management

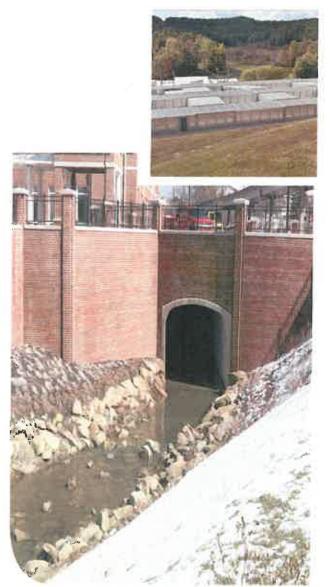

PROFESSIONAL HIGHLIGHTS

Structural Engineering:

- •Grant County Bank; Petersburg, WV
- WVDOH Arnettsville Bridge Replacement; Monongalia County, WV
- WVDOH Deckers Creek Pedestrian Bridge; Morgantown, WV
- Jane Lew Truck Stop; Jane Lew, WV
- Queen Street Underpass; Martinsburg, WV
- Westover Goodwill Structural Design; Morgantown, WV
- Weyerhaeuser Roof Evaluation; Heaters, WV
- Weyerhaeuser OSB Facilities Alterations; Heaters, WV
- Weyerhaeuser Hazardous Material Transfer Encloser; Heaters, WV
- Mapletown High School Elevator; Mapletown, PA
- •Knauf Insulation Melter Line Structural Supports; Inwood, WV
- Knauf Insulation Cooling Tower & Heat Exchanger Structure & Foundations; Inwood, WV
- 57 Middleway Pike Commercial Building; Inwood, WV
- GrafTech Furnace Structural Assessment; Grafton, WV
- FedEx Distribution Facility Structural Damage Assessment; Morgantown, WV
- Los Mariachis UTC; Morgantown, WV

ALPHA EXPERIENCE

Federal Bureau of Prisons | 2012

Architectural Case Study

Federal Correctional Institution Medium Security Facility Hazelton, WV

The new medium security facility for the Federal Bureau of Prisons is located 40 miles east of Morgantown, WV on a 44.04 acre site.

The project was procured through the designbuild method by Hensel Phelps Construction Company and the architectural team of Alpha Associates and Mosley Architects with Alpha being the Architect of Record for the entire project.

Alpha provided architectural design and structural engineering services for the three buildings "outside of the fence": 19,285 sq ft. Administration Building, 13,805 sq. ft. Utility Plant and 603 sq. ft. Wastewater Plant.

Alpha's services also include surveying the site and construction administration for "outside the site" buildings. The size and schedule of this project require multiple design and construction packages and significant coordination and review not only internally with the team but also with the Federal Bureau of Prisons and the technical design guidelines that govern the design and construction of the facility.

Martinsburg Fields

2011

Recreation Case Study

Martinsburg Little League FieldsMartinsburg, WV

Alpha Associates, Incorporated provided architectural and engineering design services for the new Martinsburg Little League Field Recreation Project. This project included a new little league field including: 200' of Sod Field, two-story concrete press box, concrete dugouts, batting cages, fencing, field lighting, and irrigation. Also included in the design was a new tee ball fielding including: 150' of Sod Field, concrete dugouts, fencing and field lighting. A new poured concrete two-story utility/storage building was designed for future use as concessions and restrooms.

This project was fast tracked to meet the needs of the Martinsburg community for the 2011 league season. Notice to Proceed was June 18, 2010 and Final Completion was March 2011.

STREAM RESTORATION EXPERIENCE

WVU Alumni Center Stream Restoration

Design included rerouting a portion of Popenoe Run and enclosing approximately 300 feet of the stream in a large box culvert. To compensate for the impact to this stream, The Army Corps of Engineers required that off-site mitigation be done elsewhere to improve another stream in the area.

Cobun Creek was chosen because of its importance to the City of Morgantown and the advance erosion and degradation of the stream banks. Cobun Creek flows from the eastern portion of the Monongalia County to the lake at White Park. This lake serves as the secondary water supply for the City of Morgantown. Because of erosion problems along the banks of Cobun Creek and the entire watershed, the lake is quickly filling with sediment and deposits, adversely affecting the aesthetics of the lake and threatening the secondary water source for the City.

The section of Cobun Creek chosen is approximately 300 linear feet where the bank erosion is impacting a local farmer's field and releasing massive quantities of sediment into the stream. Alpha used Natural Stream Design techniques to analyze and design a stabilization plan, employing rock vanes, bankfull benching and native plantings to prevent erosion of the stream banks and to recreate a natural environment and habitat for wildlife.

The Augusta Stream Restoration

The Augusta apartment complex project required off-site mitigation to compensate for the impact to Falling Run.

For this project, Alpha performed a complete analysis of the existing stream using Natural Stream Design methodology and designed a plan based on these techniques which included j-hook vanes, stone slope protection, bankfull benching, and a livestock crossing to restore the stream to its natural characteristics.
