RFQ Response for  
**Licensure/Records product & content Management  
System**

Prepared for:

**West Virginia Board of Medicine**

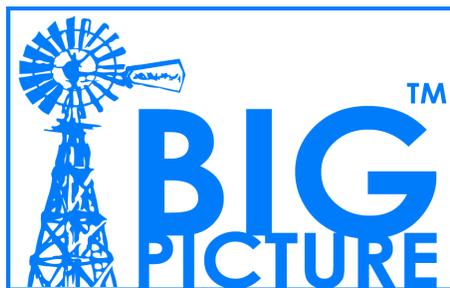

In response to

**CRFQ 0945 BOM1700000005**

*February 15th, 2019*

By

**Big Picture Software** (a product of Albertson Consulting Inc.)

February 15<sup>th</sup>, 2019

Mr. Mark Spangler Executive Director  
West Virginia Board of Medicine  
101 Dee Dr. #103  
Charleston, WV 25311  
(304) 558-2921

Dear Mr. Spangler,

Thank you for the opportunity to present an Albertson Consulting Big Picture™ eLicensure & Content Management Database & Software for your needs. The Big Picture™ **eLicense Database & Content Management System** is a complete web-based regulatory licensing, digital information and content management solution that will allow licensees, users and administrators to collaborate in one unified web-based database/system.

Our unified online system facilitates a robust website, a powerful and flexible database interface and an administrative interface, so you are able to manage your day-to-day operations easily and efficiently. Our unified system leads to much lower support and operating costs long-term.

Our customers are not just numbers. They are partners with us in our business. It is critical to the success of our business that we execute every implementation and support contract successfully. We are excited about the opportunity to propose this solution and win your business long-term.

My signature on the bottom of this document confirms and is my word that we have read and fully understand the requirements within the RFQ. We will execute the project within the quoted price.

The cost proposal is valid for **180 days** from the date of submission.

Regards,

Troy Rauschenberger, Director of Government Markets  
Big Picture Software  
100 Main Street South  
Minot, North Dakota 58701

## Introduction

Albertson Consulting (Big Picture™ Software) is honored by the invitation to respond to this Request for Quote (RFQ) for the **West Virginia Board of Medicine**. We realize and understand the necessity of the sensitive timeline set-forth in this RFQ and fully comprehend the scope of this RFQ.

We believe that the **West Virginia Board of Medicine** will require eLicensing database & content management system that not only meets the board's current requirements but also has the configurability and flexibility to meet the board's future requirements. This will require a vendor who is mission-aligned, accountable and reliable and who demonstrates the competency to fully execute the requirements contained within the RFQ.

When it comes to **configurability, we are the champions**. Other software vendors may claim that they have the ability to easily configure, add or modify record types or record fields. With other vendors, any of these modification requests will, in most cases, require that you call their support line and incur some support costs. With Big Picture™ Software, we enable the customer to easily add record types, modify fields and create custom templates and forms. Our intuitive user interface gives complete control to our customers which not only provides cost savings and reduces support calls, but also saves time by allowing the customer to make modifications at any time.

Not only is deploying and supporting the software easier when you host your site with us; there is also a substantial cost savings for your agency. No additional equipment or technical resources are necessary. When Big Picture™ Software hosts your application, we provide easy access for your staff and board members. Our web-based application is always accessible via the Internet. Over 99% of our customers host their sites with us, and we provide the experience, knowledge, security and added peace-of-mind that comes with a professional hosting service like ours.

Albertson Consulting (Big Picture™ Software) is pleased to present this proposal which will outline our past experience, expertise and in-depth understanding of the needs and requirements of boards like yours.

## What We Offer

We are more than just a software licensing company. We pride ourselves on building long-term partner relationships with our customers – just ask any of them. We believe that every one of our customers is an asset to our continued growth and the ever evolving strength of our product. Software licensing for regulatory boards, such as your board, requires a licensure management database and software solution that has the maturity, sustainability and configurability to change as the boards' requirements change.

In our proposal, we offer the board a technology partner who will proactively respond to change, deliver on-time within budget and provide a level of continued customer service that we hope will surpass the board's expectations.

## **Corporate Experience**

Albertson Consulting, the parent company of the COTS Big Picture™ Software, was established in 2000. Since its inception, Albertson Consulting has engaged in the business of software development, support and hosting. In 2003, we deployed our first Big Picture™ Software solution, and we have been licensing and supporting it for clients across the nation ever since. Customers consistently appreciate our ability to understand some of the many challenges they face with licensing requirements/regulations and legislative changes. Our licensure database management software provides a targeted approach and solution to all of these challenges. We produce excellent deliverables on-time and within budget.

In addition to mission alignment, Albertson Consulting brings a working knowledge of the business requirements and processes unique to the board's licensing needs. Our licensure database management software has been deployed to state regulatory boards, agencies and departments for over ten years. We have successfully worked with some of the largest associations of retired educators in the U.S. along with doing very specialized work for the National Air Transportation Association (NATA). Our customers, regardless of industry, utilize the same core database and components demonstrating the configurability of our software.

Albertson Consulting possesses over sixty years of cumulative experience in software database architecture, design and development. We specialize in delivering a world-class license management solution that improves business processes, increases efficiency and enhances overall board management.

Our goal is to provide a licensure database software solution that the board will continue to use for the next ten years and beyond like our other customers. Albertson Consulting will provide a world class licensure management database solution at an affordable price that will exceed the board's requirements. If the board selects Albertson Consulting, you will capitalize on our experience, expertise and ability to successfully execute on our deliverables.

## **What Makes Us Different**

We realize that a handful of other software licensing providers have expressed interest and will likely submit competing proposals to provide a licensure management system. However, we believe that our proven deployment method offers the most configurable, scalable and timely installation to fulfill the **West Virginia Board of Medicine** licensing needs.

We believe our proposal is unique for several reasons:

- ACI provides over ten years of proven expertise in software licensing and database solutions
- Configurability
- Proven methodology of deployment with similar boards in West Virginia
- A deployment team that understands and possesses extensive experience in similar implementations
- Track record of on-time within budget deployments
- Outstanding customer care team
- An unequaled understanding that one software size does not fit all
- Innovative team of developers along with a quality management team that continues to exceed client expectations
- True 100% **web-based** licensure database management software solution that from conception was designed with the cloud in mind
- Working knowledge of WV State Treasury payment interface
- **WVBOM solution currently deployed for the last 4 years**

Albertson Consulting is confident that while other respondents may be offering some of the same licensing components, we are proposing a licensing solution that will meet the West Virginia Board of Medicine current and future needs without additional costs. We are able to do this because of the architectural foundation of our software that allows our customers to easily make changes without having to continually pay for support or enhancement services.

## In Closing

The **West Virginia Board of Medicine** needs a technology partner that not only can meet their required timeline for implementation, but who can also offer a product that instills complete confidence in the board and its staff. We strongly believe that the implementation methodology and robust software solution outlined in this proposal accomplishes both.

This proposal establishes our understanding of the technical requirements of the **West Virginia Board of Medicine** and how Albertson Consulting (Big Picture™ Software) aligns itself to meet the needs of the board outlined in this RFQ.

It is our sincere desire to have the opportunity to work with the **West Virginia Board of Medicine**, and we hope that the board can see the many benefits of choosing the Albertson Consulting Big Picture™ Licensing Management Software solution.

If you have any questions regarding the cost proposal, please contact **Troy Rauschenberger, Director of Government Markets**, at [troy@ebigpicture.com](mailto:troy@ebigpicture.com) or you can call **701-839-7523 Ext. 114**. Thanks again for

allowing Albertson Consulting the opportunity to present our cost proposal. We look forward to speaking with you.

## Understanding of Scope

After reviewing the requirements for the RFQ, it is our understanding that the **West Virginia Board of Medicine** is looking for **vendor hosted** off-the-shelf web-based centralized **eLicense Database & Content Management System**. The **eLicense Database & Content Management System** will provide a unified database for all records, products and content management. The new licensure management software will also have the ability to process online applications and renewals, discipline and regulatory components and online services for license verification and change requests. The board also will require the vendor to host the software application for the **eLicense Database & Content Management System**.

Board will require redesign and integration into the boards pre-existing web-site. The website re-design will integrate online applications, renewals, disciplinary/regulatory components, inspections, documents, calendars, news and articles to communicate with constituents. The system will provide functionality to allow end-users/staff the ability to search license verification, update and change address of licensee along with staff functionality to search, sort, and export any data field within the database. The system will include functionality to print licenses and wallet cards along with certificates, receipts as well as the ability to process payments through the WV State Treasurer's Office system.

The system will also provide a secure cloud-based documentation program interface which will reduce the steps required to perform any actions of the end-user, either the licensee or board staff member. The contract with the vendor will provide software licensing, customization & implementation of the software to meet the board's requirements within this RFQ. The contract with the vendor will also provide a hosted solution and support, training of staff including a redesign and integration of the current website for functionality with the new system. Board will retain ownership of all the boards' data and license a copy of Big Pictures licensing software. The Big Picture licensure management /database software is supported 100% internally by our staff.

## Database & Existing Records & Reports

Since Big Picture is already the software that is utilized by the board. No data migration will need to take place. The proposal deliverables listed below will meet or surpass the board's requirements listed in the RFQ within the quoted price. Currently the board has requested up to approximately 35,000 licensees. The board administrative staff currently consists of sixteen (16) people There are currently (16) board members.

## Software Ownership

Albertson Consulting retains all ownership rights to the software and grants a non-exclusive perpetual license for the board to use the software for its intended purpose as long as the annual support agreement fees are paid in full. All other ownership rights remain with Albertson Consulting including the exclusive right to make changes to the source code.

Albertson Consulting typically signs a three-way agreement where if Albertson Consulting for some reason becomes insolvent and declares bankruptcy, our hosting facility service provider will be given the right to step in and support the board in deploying this application on a virtualized environment that is completely under your control. This is the agreement we have in place for many of our hosted enterprise customers.

## Data Conversion Service

Big Picture will be able to import electronic records that are delivered to our staff. Typically these records are in delimited text files. Often other types of files are delivered to our staff to import into our central repository. In the case where a customer is not capable of delivering their records, our staff may be able to pull the records out of the existing internal database system if it has ODBC connectivity or data dump capabilities that render textual files.

## Implementation Costs & Terms

Albertson Consulting, Inc. (ACI) proposes to license one copy of the Big Picture™ Software for use by the **West Virginia Board of Medicine**. ACI retains the rights to the software. The Board cannot sell, give, maintain or distribute the software in any way to any other entity. The Board retains ownership of all data related to the project.

ACI retains all ownership rights to the software and grants a non-exclusive, perpetual license for the Board to use the software for its intended purpose as long as the annual support agreement fees are paid in full. All other ownership rights remain with Albertson Consulting, Inc. including the exclusive right to make changes to the source code.

Annual License/Support Plan: Includes, software version updates, system maintenance and support including up to 5 non-accumulating hours of development, assistance or issue resolution billable annually. Annual License/Support Plan fees apply no matter where the system is deployed.

Albertson Consulting Inc. prefers to enter into a multi-year contract and recognizes and agrees that all maintenance, enhancements and support beyond the Annual License/Support Plan and outside the initial scope of work, will be billed at **\$150.00 per hour** commencing upon execution of the contract.

## Deliverables for General RFQ Requirements

**3. QUALIFICATIONS:** Vendor, or Vendor's staff if requirements are inherently limited to individuals rather than corporate entities, shall have the following minimum qualifications:

**3.1.** The Vendor must have supplied and supported a licensing database substantially similar to the specifications herein to another professional licensing board of a state or territory of the United States within the last three (3) years.

**Albertson Consulting meets this requirement. Currently many boards around the country including many in West Virginia utilize our products and services including this one.**

**3.2.** Compliance with experience requirements will be determined prior to contract award by the State through references provided by the Vendor with its bid or upon request, through knowledge or documentation of the Vendor's past projects, or some other method that the State determines to be acceptable. Vendor should provide a current résumé which includes information regarding the number of years of qualification, experience and training, and relevant professional education for each individual that will be assigned to this project. Vendor must provide any documentation requested by the State to assist in confirmation of compliance with this provision. References, documentation, or other information to confirm compliance with this experience requirement are preferred with the bid submission, but may be requested after bid opening and prior to contract award.

Please see references section

**4. MANDATORY REQUIREMENTS:**

**4.1 Mandatory Contract Item Requirements and Deliverables: Vendor shall provide Agency with the Contract Item and Services below on an open-end and continuing basis.** Contract Item and Services must meet or exceed the mandatory requirements listed below.

**4.1.1 Website:** Vendor must provide and design an integrated website as described in this subsection of the Solicitation, utilizing the Board’s existing website content located at <http://www.wvbom.wv.gov/>. It must allow Board staff to add web pages, make changes to all informational web pages, and upload documents for public viewing. It must also create a system for the Board to manage Member applications, Member renewals, practice agreements and status changes for all Board Authorizations and all Members. It must allow Members to securely access the website to perform the actions and functions below, without any cost from the Vendor to the Member. And, it must allow for public access (also at no cost) to view records and other documentation with limited constraints.

The website must be fully integrated with the Content Management Database System (outlined in Section 4.1.2) and Cloud Based Documentation Program (outline in Section 4.1.4) to allow the accurate and seamless transfer of data and information as needed, while also retaining all Historical Data. The website must, at a minimum:

**4.1.1.1** Provide detailed real-time verification capabilities to provide an online search feature that can be utilized by the public to obtain a Member’s Board Authorization Member Status, Member Type, malpractice history, work address or other such categories, and includes the ability for disciplinary orders to be viewed through the website. It must also have the capability to allow the public to create a mass list of

exportable information (i.e. a roster), of Members using any of the public information listed above, without limitation. For example, this function should allow a user to search and create a list of all Members having active allopathic physician licenses practicing in Charleston, West Virginia.

**4.1.1.2** The website must contain an application and renewal system incorporated within a Member portal that allows Members to: complete and submit applications and renewals for Board Authorizations online; access a Member dashboard which provides Members real time information concerning member status, application and renewal application status and the member's historical record with the Board. The Member portal should permit Members to access the Member's application materials and send and receive secure messages with Board Staff. The portal must have a HIPAA compliant level of security to handle confidential information and communications. Vendor should submit an attestation verifying that the system has a HIPAA compliant level of security, along with supporting documentation with their bid submission, this documentation will be required before award. The portal must allow for Members and Board staff communicate during the application process and allow for the secure uploading and sharing of documents as needed.

**4.1.1.3** The application and renewal system must have a status capacity so that Members login and check to see the application or renewal status themselves from the web, and can see and print or download the application or renewal status and supporting documentation from the website. The Member should also be able to review their licensure status and history.

- 4.1.1.4** Members must be able to login into the application and renewal system using their email address as a username and a customizable password that contains at least eight (8) letters and requires at least one capital letter, number and symbol. The password system must allow for Member to change/update their username (i.e. email) and/or password after logging on, and also provide a secure retrieval system if Members forget their password.
- 4.1.1.5** Members must have the ability to provide a change in contact information online (i.e. address, telephone, email) through the Member portal. The system must allow for any functionality which allows for the Member to change data and include additional functionality which allows Board staff to review, revise, and approve such changes before the changes take effect and are reflected in the database or on the website. The system must store all Historical Data related to a Member’s contact information.
- 4.1.1.6** Allow for PCI Compliant Payment Processing through an interface with the West Virginia State Treasurer’s payment applications systems, “E-Gov” for payment processing for electronic revenue.
- 4.1.1.7** Allow for the upload of various documents and storage of those documents with associated records in the associated database.
- 4.1.1.8** Allow for the placement of incoming data in a chronological sequence.
- 4.1.1.9** All Historical Data from changes must be retained and viewable by staff internally, including a timestamp when changes were made.

**4.1.1.10** The applications and renewal system must have a portal for Board staff that has the capability to allow Board staff to review applications and documents submitted by Members and save as Adobe.pdf document and/or print any Member forms (including applications, communications, reports and supporting documentations from the Members' access on the website). This portal should allow Board staff to oversee and manage the application and renewal process. For example, Board staff should be able to approve applications, communicate with Members through email, text alerts and/or a secure messaging system which alerts a Member to communications from the Board which are accessible through the Member portal. Board staff should also be able to make revisions to applications, hold applications or archive applications depending on the status of the application. It should also allow Board staff to place documents for any Member or group of Members in chronological sequence and allow for future deletion according to the Board's document retention policy. This portal should be a customizable workspace depending on the tasks needed to be performed by Board staff.

**4.1.1.11** The application and renewal system must permit Board staff to customize and modify application content as needed. It must maintain legally sufficient archival copies of all prior iterations of all applications which have been utilized by any Member. For example, Board staff must be able to obtain a true and complete copy of all application questions and content as viewed by a Member and which was in use on a specified date. Application content which is common to multiple Member Types should be easily transferable from one application type to another. For example, if Board staff develop one or more common sets of questions applicable to multiple types of Members, such content must be easily incorporated by Board staff into any application and must also be easily customized in the subsequent application as needed.

- 4.1.1.12** The application and renewal system must allow Members with multiple renewal types to have the option of completing all available renewal applications in a cohesive process prior to remitting a single, combined renewal fee calculated by the system. For example, if a Member is eligible to renew a medical license and a drug dispensing registration, the Member should be able to complete all necessary renewal information for both renewals and be charged a combined fee (MD license renewal fee and drug dispensing registration fee) which can be paid in one single payment.
- 4.1.1.13** The application and renewal system must provide Board staff the capability to establish which applications require staff review and approval prior to database content changes being effectuated with the data from the application.
- 4.1.1.14** The application and renewal system must employ an address verification tool for all address fields. The application and renewal system must employ uniform formatting for similar filed types, such as telephone numbers. The application and renewal system must accept international addresses and telephone numbers.
- 4.1.1.15** All application and renewal data must be recordable in the Content Management System Database at the discretion of Board staff, and field content history must be preserved and remain searchable after a renewal or other subsequent member application is submitted.
- 4.1.1.16** The application and renewal system must generate a legally sufficient and accurate record of a Member's final responses to all application

questions. At a minimum, the legally sufficient record of application must: mirror all written content and application instructions viewable to Members (but not necessarily the format); accurately reflect the information entered and saved by the Member in response to each question; be automatically saved in .pdf format in the Member's database record resources; contain Member identity and page number information on each page of the .pdf record; include the date of electronic submission by the Member; utilize readable font no smaller than the visual size of 11 point Times New Roman font; be accessible to the Member through the Member portal.

**4.1.1.17** The physician application portion must be able to interface with the FSMB Uniform Application and Federation Credential Verification Service packet so that applicable Members are able to electronically transfer data from that system into this one.

**4.1.1.18** All components of the website, including the application renewal system, must be fully functional on all mobile device formats currently in use.

**4.1.1.19** The Vendor must be capable of developing a mobile application with a HIPAA compliant level of security that may be freely downloaded from an "App Store" on any mobile device for Members to access the Board's website and which is fully integrated into the application and renewal system and Content Management Database System.

**4.1.1.20** A complete Historical Record of the website must be retained to allow Board staff to determine what content was on the website on any given previous day.

Response To all Mandatory requirements 4. – 4.1.1.20:

**\*\*\*Big Picture will meet with Board to establish a gap analysis plan that will address any and all changes necessary to meet the board requirements listed above.**

#### **Vendor Hosted System**

Albertson Consulting Inc., pricing includes a vendor hosted solution for the board.

#### **Website Redesign and Functionality Integration**

Albertson Consulting Inc. will work with the board to develop an integrated website utilizing the Board's existing website layout and content. The website integration will allow the board to manage online applications, renewals, perform licensee verification, and have a full licensee management portal with history, update profile features and status. Other key functionality will include tracking, disciplinary/regulatory aspects and public access areas along with a secure online service access for licensees to verify, view change and update license information.

#### **Big Picture™ Licensure Verification Module**

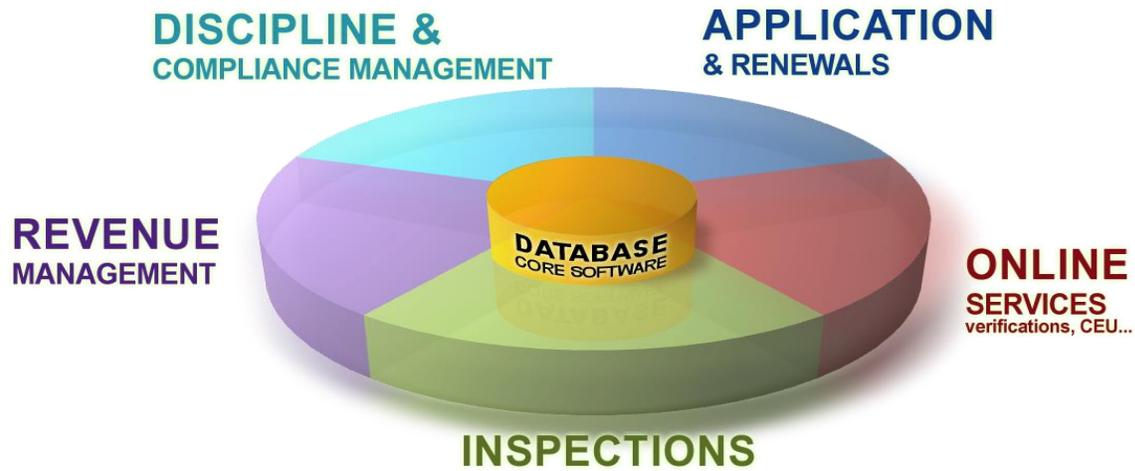

The Licensure Verification Module allows visitors to the public website to get real-time verification of certifications and licenses that the Board has in the database. If the individual has disciplinary documents available in a public discipline folder in the integrated document repository, they can be made available if the board desires.

#### **Big Picture™ Application and Renewal Member portal Option**

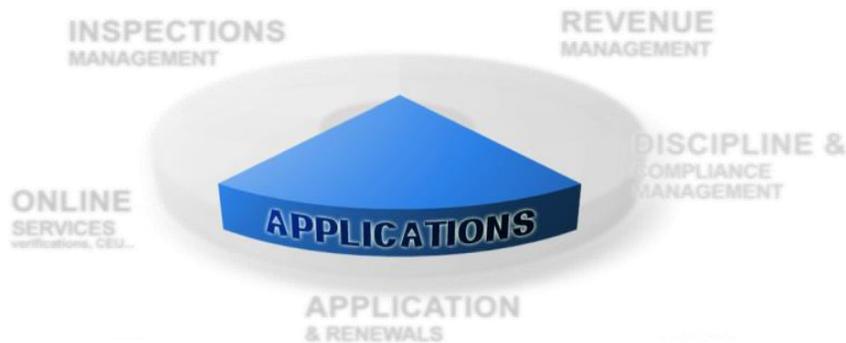

Big Picture will provide a portal interface to the board that will meet all board requirements.

#### **Big Picture COTS Software Solution Overview**

Our cloud-based COTS software solution allows state boards and agencies to manage licensee information in a real-time, secure online environment. The web-based database is available from any Internet-connected PC, allowing immediate access to licensee information anytime, anywhere. Below are some of the various modules used during a typical deployment of our solution.

- Easy-to-use clean unified interface
- New easier to use record navigation
- Online application
- Quick full export

### Big Picture™ Applications Option

The board will benefit by moving the licensure process to an online environment which will provide increased efficiencies by allowing licenses and public to access board information such as license verification, license status, disciplinary actions etc., via the board's public website. Licensees will also be able to take advantage of the online license renewal and applications which will allow the licensee to complete their license renewal or new application beyond regular office hours of the board, ultimately increasing customer satisfaction.

### Application Module

Allows system administrators to receive and process applications for licensure for all license classes through the State regulatory board website or received by mail or in person. The online application process begins with an applicant selecting the corresponding license type form they wish to submit for

processing. The application screen provides some verbiage describing the process and the requirements to complete the process. They are prompted to enter some verifiable pieces of information such as name, address, SSN, and/or birth date. The applicant is then presented with various questions about their submission, followed by a payment processing screen.

In the administrative area, web submitted applications will appear in a pending status until they are reviewed and everything is approved at which time the applicant will be inserted into the production database. In some cases, the application can be written to a PDF and stored in the repository.

The licensing module can be set-up for an **unlimited amount of license types or classes**, allowing the applicant to select the correct application for submission. Application fees will correspond with each application type and will be calculated accordingly with the application is processed.

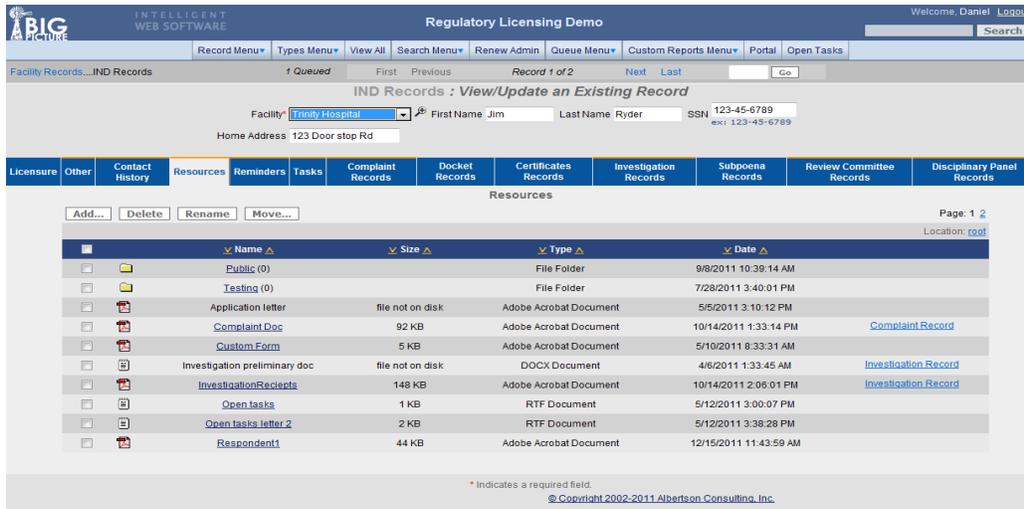

The application module is **100% configurable** to any **business process** or **workflow** requirement that the Board currently follows or anticipates utilizing in the future. Refunds issued for either in person receipting or fees originating online require supervisor approval. After a licensee has selected the license type form, the application screen provides verbiage describing the process and the requirements to complete the submission of the application (per board’s workflow/requirements process). The applicant is prompted to enter verifiable information such as name, address, social security number and/or birth date etc. The applicant is then presented with various questions about their submission, followed by a payment processing screen

After **payment is authorized**, a customer receipt and number is generated which can be printed by the applicant. Once the application is submitted the data is reviewed and processed. All documentation that was uploaded during application is inserted into the licensee database automatically along with a PDF of the application that can be automatically pushed to the integrated online document repository.

As applications of various types are submitted for approval, tasks are created automatically by application type and assigned for processing to the appropriate administrator or analyst. Upon completion of workflow tasks by assigned analyst, the application process is completed.

A complete **history** is tied to the applicant’s record; any data fields that have been captured during the application process are retrievable within the database through searches, queries or reports. Any future correspondence such as letters, emails, notifications or updates can be generated directly from the database. Correspondence received from the applicant will also be saved and can be retrieved from the database.

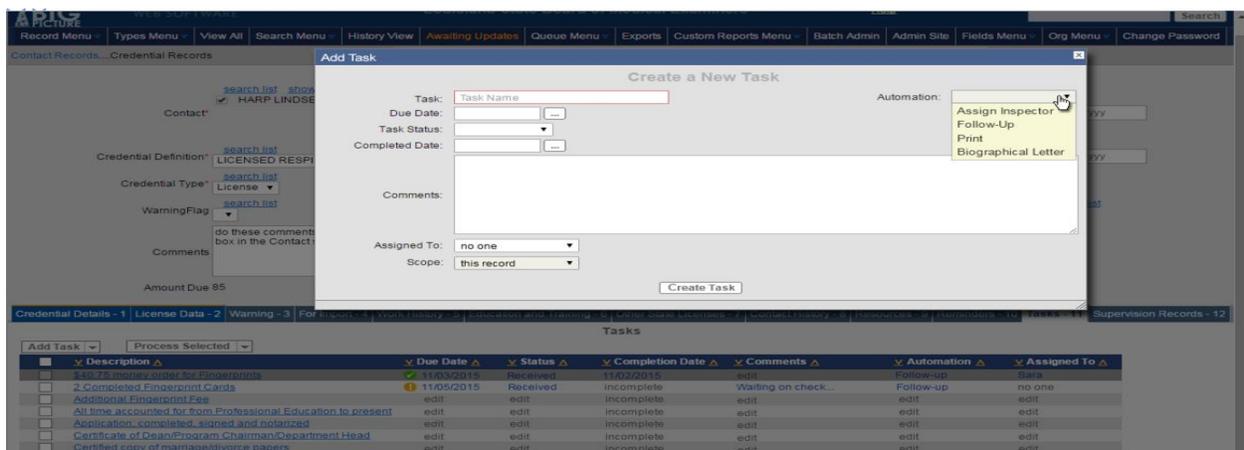

Application **status** for applicants is also available with licensing of this option. This software runs off of the integrated database and the Tasks tool in the administrative interface. (See screenshots below for additional views of sample application screens)

### Task Tracking

Tasks can be configured to be automatically generated for any submission. Tasks are editable in the Administrative area for each submission type. They then show up for every record entered in the system. A Due Date is entered for each task in the Checklist / Workflow. Once a task list has been generated by a user, a new record is created for in the system. Tasks are automatically created per the rules in the administrative area. When a user logs into the system they will be presented a list of outstanding tasks associated their user id. Also, there are additional widgets that can be configured in the user portal interface to ensure that all upcoming and past due tasks are attended to appropriately. Supervisors can also review outstanding tasks from their user portal interface for all staff.

**Big Picture™ Renewals Option**

Our Online Renewals Option Module is very similar to the applications option but allows administrators to receive and process renewal requests through the front end website. Just like applications, a robust structure already exists and both utilize the revenue collection system previously mentioned.

| Product                                      | Cost Amt | Begin Date | End Date  |

| 41. WHOLESALER RENEWAL LATE                  | \$200    | 02-JUN-10  | 31-DEC-10 |

Applications and renewals both utilize a payment gateway to finalize the transaction. We have integrated our software to various payment gateways including the WV State Treasurer’s Office “E-Gov” payment gateway. Licensees have the ability to check license status through the website with both the application and renewal process and can also update information such as name, address, etc. online via the board’s website. Licensee can also upload any supporting documents, certifications, continuing education at time of application or renewal. All data uploaded is synched with the central database real-time at the point of submission from the web portal

**Online Services**

### Licensure Verification/Online Form Submission/Public Queries

Online services such as online license verifications and online complaint forms allow licensees and public users the ability to search out licensees. During deployment, the system will be configured for your search criteria and to display necessary data details. Other online services will be configured to facilitate license renewal and application and complaint submission to your specifications including uploading of supporting documentation.

### Find a Practitioner/Verify License Status

#### North Dakota Physician, Physician Assistant and Fluoroscopy Technician Search (Licensure and Disciplinary Information)

This page offers information about the licensure status of physicians, physician assistants and fluoroscopy technicians who are currently licensed to practice in North Dakota or were recently licensed to practice in this state. If you are searching for a licensee whose name does not appear in this data bank, you may contact our office, however, all current licensees are included. Some former licensees who were first licensed many years ago may not be listed. The types of physician licenses that will be included in the search are: active, inactive, resident, provisional temporary, locum tenens, and special emeritus as well as physician assistant and fluoroscopy technician licenses.

#### Name Searches

When you enter a name the spelling must be correct, however, it is possible to begin a search by entering only a partial last name. If you are unsure of the last name of the physician or physician assistant for whom you are searching, you may improve your chances of finding a match by typing only the first few letters of the last name. However, if you wish to specify a first name for a licensee, you must correctly type the entire last name. Again, searching by only the first few letters of a last name will give you a better chance of locating the information you want if you are not certain of the correct spelling, however, you will have more data to sort through.

#### License Number Searches

To initiate a search by license number, you must enter the entire number. Please enter numbers only; do not include any alpha characters that precede or follow the numbers.

**Disclaimer**

The North Dakota Board of Medicine presents the information on this website as a service to the public. The board has attempted to ensure that the information contained in this electronic document is as accurate as possible, however, the Board makes no warranty or guarantee concerning the accuracy or reliability of the content of this website or the content of any other website to which it may link. Practice specialties and board certifications are self-proclaimed. Assessing the accuracy and reliability of the information obtained from this website is solely the responsibility of the user. The Board shall not be liable for errors contained herein or for any damages resulting from the use of the information contained herein.

The software enables visitors to the public website to get real-time verification of certifications and licenses that the Board has in the database. If the individual has disciplinary documents available in a public discipline folder in the integrated document repository, they can be made available if the Board desires.

**North Dakota Physician, Physician Assistant and Fluoroscopy Technician Search (Practice, Licensure and Discipline Information)**

**Individual Results**

| Name                 | Title | License Number | Status                 | Specialty       | Certified | Location  |
|----------------------|-------|----------------|------------------------|-----------------|-----------|-----------|
| Marisa Ann Albertson | MD    | 12516          | Active - Unconditioned | Family Practice |           | Minot, ND |

**License History**  
 PT=Provisional Temporary; SL=Special License; LT=Locum Tenens; RL=Resident License; TRL=Temporary Resident License; PAC=Physician Assistant; FT=Fluoroscopy Technician; TSL=Temporary Special License; SEL=Special Emeritus License; PTA=Provisional Temporary Administrative.

| License Type and Number | License Date | Expiration Date |
|-------------------------|--------------|-----------------|
| 12516                   | 11/16/2012   | 5/25/2017       |
| LT 12516                | 09-13-2012   | 10-13-2012      |
| PT 12516                | 10-12-2012   | 11-16-2012      |

Unless otherwise noted, licensing is continuous between the License Date and the Expiration Date.

**Discipline History**  
 The Summary of Action and the link to the Public Disciplinary Documents are available from 2012 forward. If "Yes" is indicated in the Discipline column below and there is no Summary of Action or Public Disciplinary Documents provided, please [contact the board](#) to obtain the public disciplinary documents prior to 2012.

| Discipline | Summary of Action   | Public Disciplinary Documents |
|------------|---|-------------------------------|
| Yes        | 9-9-13: Complaint issued. 11-6-13: Stipulation entered. 11-22-13: Order entered. License suspended - stayed. Breach of patient confidentiality. Physician accessed medical records of a person who was not her patient. | <a href="#">11222013</a>      |

**Education History**

Many of the components mentioned above will be utilized in the deployment of the final product. In the end, it will be a “one-stop” site for all actions and programs offered by the board. It will have a public feature that allows for a search engine to look up items such as physician disciplinary information, Physician specialty and will allow board members the ability to access information and documents based on the profile. In addition to those features, it will have offer online license application process including the ability to pay on-line and upload CEU or other necessary documents.

### **System Access Controls**

The software provides a security configuration during implementation which defines user roles and permissions that allow the board staff to perform tasks or other actions within the system.

The core component of the database controls the security and access rights to the entire system. It is role-based security built on groups. Users are grouped by their roles and have access to perform different tasks within the system based on their group

The security system allows administrators the ability to configure what users are allowed in the system and based on which group they are in they will have a completely different user experience. Group permissions dictate everything from fields, ability to modify records, views, portal widgets and which record types are available.

The security section also allows administrators to setup tighter security by limiting access not only at a user account level but also at an IP address level so administrators can limit access to the database or administrative access to only be allowed from certain IP addresses or ranges. It also allows administrators the ability to filter and view access to the system. These restrictions can be put in place for both the Database interface and the Administrative interface separately

### **User Roles & Permissions**

As part of our system configuration, we will produce a custom security specification during the implementation stages of the software. This specification includes user roles and permissions which define who can perform every action within the system. Big Picture will specify and configure the system per the board’s requirements for multiple user roles. Big Picture is a security and user role based application. Each system user will have their own unique login credentials and Big Picture will configure the various user roles per the board’s instructions to maintain and enforce which users are authorized to perform updates, overrides and/or view only.

**MANDTORY REQUIREMENTS:**

**4.1.2 Content Management Database System:** The Content Management Database System (“Database”) must handle all Board Authorization Member Types, including future types, required by the Board and meet the following requirements, at a minimum:

- 4.1.2.1** Must be a replacement for the Board’s current Database.
- 4.1.2.2** Must be housed in a centralized location. The Board’s preference is for a Linux or SQL server (or equal) for the application.
- 4.1.2.3** The complete enterprise solution (content management, software/application licensing, web design, etc.) shall be provided by a single Vendor and shall be functional with all current mobile device formats.
- 4.1.2.4** The Vendor and system must provide secure functionality for a redesign/replacement and integration of the Board’s current website and data system, new database, online applications, licensure and renewal applications and processing of such, plus provide documents, calendars, news and articles to meet the Board’s requirement to communicate to its constituents.
- 4.1.2.5** Must provide for document and data repository capability and indexing capability to store application, renewal, malpractice, disciplinary and historical documents, Historical Data and images. Storage of all documentation, information and materials shall take the place of current paper historical files of Members, and **remains the property of the Board.** The system must also provide for searching, sorting and exporting records for staff to manage record changes.
- 4.1.2.6** Must enable access controls to protect documents from unauthorized viewers.

- 4.1.2.7** Must allow for scanned document uploads for any required documentation (in Adobe.pdf format).
- 4.1.2.8** Must provide the Board branding into screens, web pages, reports, documents, printed licenses, certifications, permits, letters, email correspondence, etc.
- 4.1.2.9** Must allow Board staff to manually enter applications and documents submitted to the Board directly.
- 4.1.2.10** Must provide the functionality to automatically generate customizable and form email, text and secure Member portal messaging confirmations for all Board required applications, reports, and document submissions, without limitations on character counts, and to maintain a legally sufficient record and of any such communications to each Member. It must also notify the Board if the email was undeliverable.
- 4.1.2.11** Must provide the functionality to generate emails to all or any specific Members, or cohort of Members, at the Board's convenience for informational purposes, without limitations on characters counts, and to maintain a legally sufficient record of any such communications for each Member.
- 4.1.2.12** Must have a reminder system that supports recurrence and notification to multiple parties and includes disciplinary compliance and monitoring.
- 4.1.2.13** Transactional contact history must record multiple contact types including email, telephone, in-person meetings and written correspondence.
- 4.1.2.14** Must have a web portal dashboard that can allow for staff access security levels based upon the Board's determination of their need to know.
- 4.1.2.15** Must provide for Disciplinary and Complaints case management and reporting. Must allow for tracking and managing enforcement and

compliance activities, such as recording complaints received, opening complaints, conducting investigations, managing outcomes, etc. The system should have the capacity for up to 500 complaints per year. The system must have the ability to retain historical information about prior complaints indefinitely or subject to the discretion of the Board in accordance to the record retention requirements of the Board.

- 4.1.2.16** Must provide for compliance management and reporting. System must be able to store documents, video and audio files with each case. System must have HIPAA compliant level of security (see Specification Item: 4.1.1.2).
- 4.1.2.17** Must provide for Continuing Medical Education data collection, management, and reporting.
- 4.1.2.18** Must have printing capability for Board Authorizations, reports, wallet cards, address labels and correspondence/envelopes with mail merges, all of which should be simple to use, meaning requiring no more than one point-and-click action, if possible, but otherwise minimizing the number of steps required to produce a printed document.
- 4.1.2.19** All changes to data must be stored in a transactional record so historical audit reports can be generated. Must provide for the ability to scan, upload, store, archive and retrieve documents and tie them to an individual's or entity's relevant record.
- 4.1.2.20** Must provide file naming mechanism to ensure standardization.
- 4.1.2.21** Must provide for complete Board staff content management over reports/exports, modules and front-end user screens, which will allow staff to customize reports and build templates for reusable reports.
- 4.1.2.22** Must provide an audit trail for all scanned, uploaded, stored, archived and retrieved documents.
- 4.1.2.23** All changes to data and Historical Data, including audit trail of the user making the change(s), must be stored in a transactional record so

historical audit reports can be displayed and generated. The system must accurately record and display the user making the change(s) and the date and time of the change(s).

- 4.1.2.24** Must have ability for Board staff to perform data-mining searches and save those searches for later use.
- 4.1.2.25** Must be able to store and provide Member data for management and reporting purposes.
- 4.1.2.26** Must be able to generate custom inspection reports and be able to provide a roster of Member applicants.
- 4.1.2.27** Must provide the capability to search, sort, export, and/or create reports to enable Board Staff to manage each Member's status at any juncture of the application or renewal process. For example, the reports should include but are not limited to: quarterly reports of newly licensed, registered, permitted or certified individuals or entities; total number of Board Authorizations by Member Type, Member Status and/or Member Type and Member Status; quarterly revenue reports of fees received by Member Type; reports of all Board Authorization holders by Member Type and Status and/or county of residence for the current fiscal period, etc.
- 4.1.2.28** Must provide the capability to generate a printable and downloadable report which provides the following current public data for any member: full name, member type, member status, Authorization types and numbers, authorization issue date, date authorization was last renewed, date of next authorization renewal, complete preferred mailing address and complete work/practice address. For entity Members, the report shall also include data specific to the ownership of the entity. For non-entity Members, the report shall also provide, as applicable, education and training information (for non-entity Members), any company affiliation, current WV hospital privileges, current specialties, current supervision or collaboration, board actions and reported malpractice.

- 4.1.2.29** Must provide the capability to generate a printable and downloadable report which provides current public data for any member as set forth in the preceding paragraph, as well as the Member's historical record with the Board to include license renewal history, member status change history, previous hospital privileges, previous names and previous supervision/collaboration.
- 4.1.2.30** Reports identified in the preceding two paragraphs must be customizable for internal use by Board Staff and Board Members to include other current data fields as needed, such as date of birth and email address.
- 4.1.2.31** Must store and report on the history of a record by way of a User ID and time stamp of when record was updated and saved.
- 4.1.2.32** Must have functionality that allows staff to create and manage workflow for automatic and ad-hoc generated tasks. Task management, user assignment, templates, reports, new Member Types and workflow modules must be customizable by the Board via user interface without custom development, coding or programming to accommodate.
- 4.1.2.33** Must maintain a viewable and searchable record of Members' application responses and information. For example, Board staff should be able to query the database for all Members (or all Members of a specific Member Type or Member Status) who responded "yes" or "no" to a particular application question during a particular renewal cycle. If new questions are added to an application type, the database system should identify the date the question and associated data field were added.
- 4.1.2.34** Must allow for revenue collections from the online applications (renewals and all other online services), but also be able to allow the Board to process manual payment in one interface that interfaces that payment data with the West Virginia Treasurer's Office "E-Gov" system for posting to the Board's revenue account in the State of WV's accounting system.

- 4.1.2.35** Must have capability to create an infinite number of compliance form letters to inform a Member of his/her/its current status with the Board.
- 4.1.2.36** Must have the capability to allow a Member to log-in to his/her/its record and print and download or email to a digital wallet a copy of any correspondence generated by the Board and/or a current Board Authorization, including correspondence/information related to Member's status and history with the Board.
- 4.1.2.37** Must provide the ability for a Member to save any application(s) in process and log back in later to pick up where he/she/it left off.
- 4.1.2.38** Must provide the ability for Members to log-in to the Member portal and view the current status of his/her/its application throughout the approval process.
- 4.1.2.39** Must protect access to a Member's social security number (SSN), birthdate, medical information, home address, and other Personally Identifiable Information (PII).
- 4.1.2.40** Must provide the ability to add new Member Types or sub-types as needed.
- 4.1.2.41** Must be able to generate a customizable roster listing all Members or defined cohort of Members (by Member Type and/or Member Status and/or any timeframe) containing the Member's name, Board Authorization number, contact information, etc.)
- 4.1.2.42** Must migrate all financial activity and member status activity information located in current system for historical purposes.
- 4.1.2.43** Must generate status reports at the end of each renewal cycle for all Member Types.
- 4.1.2.44** Must provide quarterly and fiscal year financial reports of revenue collected broken down by each member type as well as totals.

- 4.1.2.45** Must allow Board Staff access to all fields to create customized reports. Must allow Board Staff to create custom report templates that may be saved and applied to different data and/or record sets.
- 4.1.2.46** Must provide Board Staff access to a report generator to create and store frequently queried information and reports.
- 4.1.2.47** Must allow Board Staff to create ad-hoc reports using any field or data contained in system.
- 4.1.2.48** Mobile Application. Must allow for functionality on mobile devices for Members to login and complete all tasks and submit applications when applying for and renewing Board Authorizations, including the upload of any documents associated therewith.
- 4.1.2.49** Must include a component that captures all pre-requisites, mandatory information and documents needed to process Board Authorizations, applications/renewals, and automatically tracks all deficiencies for each transaction and can notify individuals of any deficiencies.
- 4.1.2.50** Must allow for capability to automatically change Member Status from active to inactive, inactive to active or any other status to expired at a specific predetermined time set by the Board.
- 4.1.2.51** Board Staff must have the ability to access the Database remotely and on their mobile device.
- 4.1.2.52** The Database must allow for video/audio files to be uploaded to the cloud documentation program.
- 4.1.3 Administrative Interface:** The system must provide for an administrative interface that allows the Board staff the ability to manage and edit the website components, while tracking and recording any changes. It must support Board staff being able to manage all content on the website including:
  - 4.1.3.1** News articles
  - 4.1.3.2** Documents, applications and other various forms

- 4.1.3.3 Photos, media and video
- 4.1.3.4 Calendars, schedules and newsletters
- 4.1.3.5 Events management
- 4.1.3.6 Surveys
- 4.1.3.7 Information pages
- 4.1.3.8. Banners, headers and footers
- 4.1.3.9 A notification system that is integrated into the database to pull and merge information and enable mass email for informational purposes

**RESPONSE TO 4.1.2 – 4.1.3.9**

**Content Management Database System**

The Licensure Management Database Module allows state entities to manage all license types and corresponding information in a real-time secure online environment. The web-based database is available from any Internet connected PC, allowing immediate access to licensee information anytime, anywhere.

**\*\*\*Big Picture will meet with Board to establish a gap analysis plan that will address all changes necessary to meet the board requirements listed above.**

**Centralized Database**

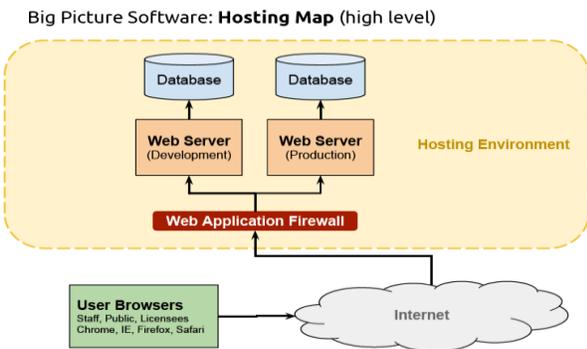

All data is stored in a centralized database repository for easy access and search requests.

**Single Vendor Solution Provider**

Big Picture Software provides a single vendor hosted solution.

**Hosted Solution**

We offer the STATE a hosted turn-key license management system. We currently host and support applications for roughly 150 customers in 17 states nationwide. Our carrier-class facility is certified SAS 70 and PCI Compliant. Our application sits behind a PCI / DSS -Compliant Web Application Firewall (WAF) from Breach to protect our clients’ software and data. The systems are checked for vulnerabilities by Nexpose, a Rapid 7 product. This vulnerability detection system ensures that our network, operating systems, existing and new software are held to a manageable level of vulnerability from outside threats.

We will host your solution on our servers or no additional charge. Our annual support/maintenance plan includes hosting your software application and database in our world class hosting facility. We have a 99.9% uptime so you can be confident that your application will be online and ready to assist your agency 24 hours a day, 7 days a week, and 365 days a year. Our servers are housed in a carrier class data center, where security is of the utmost importance,

authorized-only access to the hardware and software is required.

Not only is deploying and supporting the software easier when you host your site with us; there is also a substantial cost saving for your agency. No additional equipment or technical resources are necessary. Our hosted solution provides easy access for your staff and agency members. Our web-based application is always accessible via the Internet. Over 95% of our customers

Because we have many other customers just like you, we can offer a very quick turnaround on support and deploying changes to the system. Our cloud-based software as a service offering has been chosen by many other state entities and successfully managed for years. It has also been chosen, audited and verified by TSA in a recent audit and by various publically traded companies that we do other types of business with.

Network security and support is critical in managing deployments. Our hosted deployments have had great success with this in terms of our ability to execute deployments, provide high quality, timely support coupled with exceptional uptime, consistency, and security.

Backups are performed daily for portions of the system and on a more frequent basis for other portions of the system, first to tape and then to an external data recovery location. All data and privacy protection are done in accordance with industry standards.

In terms of our free hosting, the application sits behind clustered firewalls, switches and network gear running in a virtualized environment backed by an enterprise clustered server and NAS. This environment is currently supporting most of our clients and has been for the last thirteen years with remarkable uptime and satisfactory response times.

Working with your staff and state IT professionals, we will do our best to deploy the application into a similar environment.

### Document Imaging/Finger Print Cards

Our COTS software solution has the capabilities store images, photos jpg. tif, files and other documents under an individual or firm’s record in the database. Once the image is uploaded into the record that image can be printed or tied to another corresponding record.

**Internal Controls and Audit Trails**

The system has a fully integrated audit trail with user/time stamp functionality ensuring complete tracking and an audit trail of everyone who accesses, modifies or changes a record in the database. Complete logging and tracking of updates to all data with date and time stamps are easily accessible for review. The administrative interface allows many

views to be setup for different fields and record types. Every record has a history of every change that has been made to the record since the inception of the database.

The core component of the database controls the security and access rights to the entire system. It is role-based security built on groups. Users are grouped by their roles and have access to perform different tasks within the system based on their group.

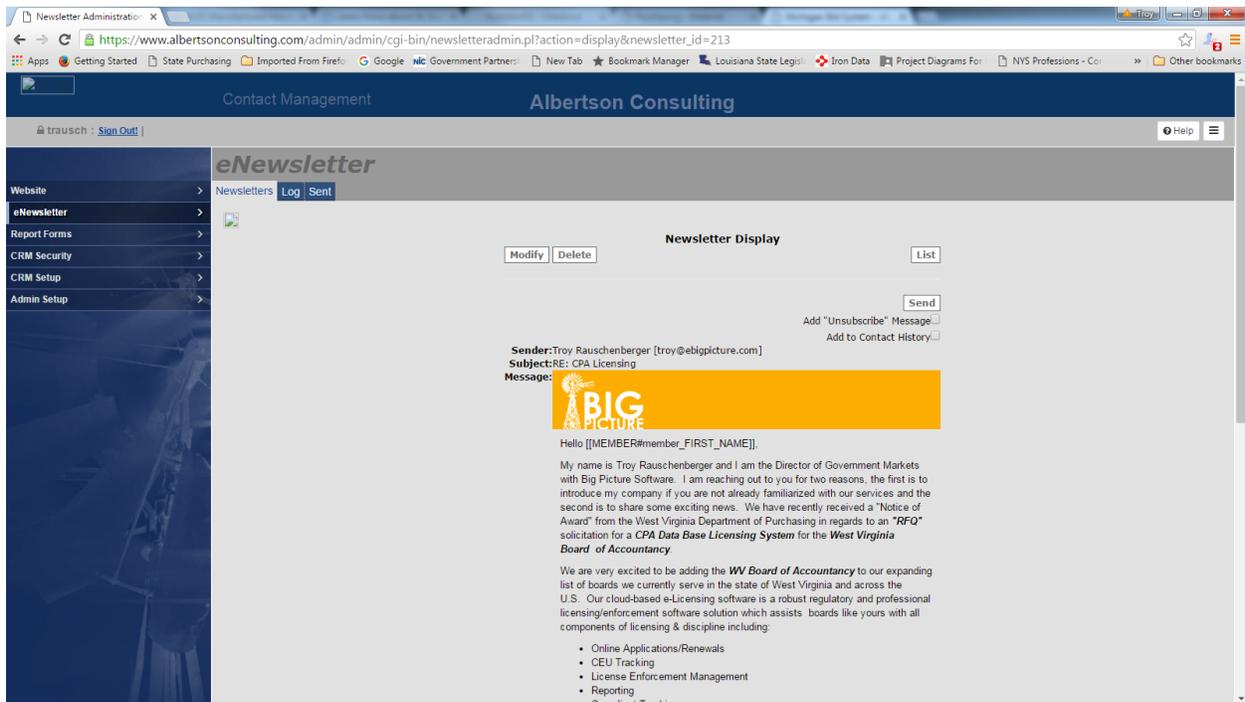

The security system allows administrators the ability to configure what users are allowed in the system and based on which group they are in they will have a completely different user experience. Group permissions dictate everything from fields, ability to modify records, views, portal widgets and which record types are available.

The security section also allows administrators to setup tighter security by limiting access not only at a user account level but also at an IP address level so administrators can limit access to the database or administrative access to only be allowed from certain IP addresses or ranges. It also allows administrators the ability to filter and view access to the system. These restrictions can be put in place for both the Database interface and the Administrative interface separately.

### E-blast Option

Our e-blast tool allows administrators the ability to send out high quality professional looking email messages. The recipient lists can be created in the database by any search criteria and stored as saved searches or saved queues, either of which can be accessed by the e-blast tool.

Messages can contain user selectable fields merged from the database so system users can personalize the messages. The rich text editor allows users the ability to change fonts, styles, and other popular attributes. Messages can also have attachments. After a message is ready, it can be previewed, and if the user selects to have this recorded as a contact in the database, the information will show up under this person's record in the Contact History.

### Integrated Document Management/ Repository

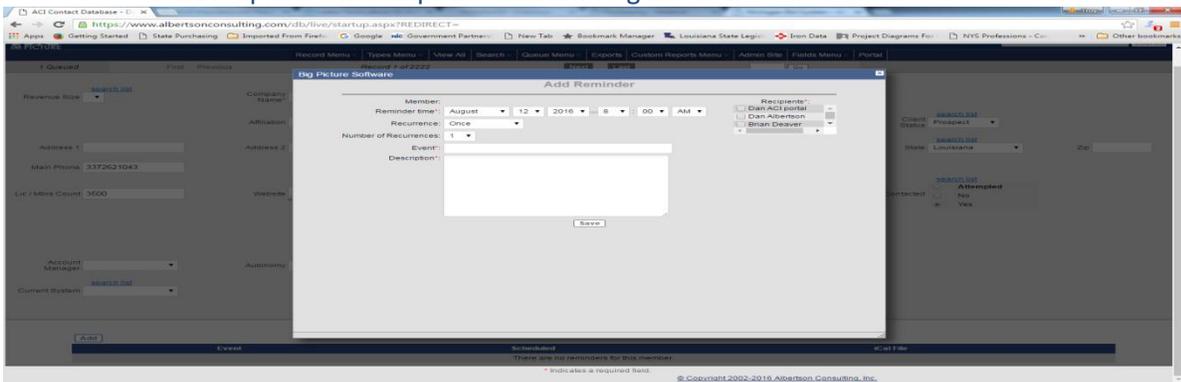

- Manage documents
- Track inspections
- Historical Data search and retrieval
- Email integration lets you work within Outlook
- Renewal/Application integration – automatically store documents and images such as disciplinary tracking, malpractice etc., in central database repository
- Public folder for verifications – As public discipline documents become available they can be shared and accessible to the web-based employer verification software
- Edit merged templates and save them back to the repository or print them for the entire queue
- Tracking of all licensee related practice privileges for Licensure is available in the base system
- Database will store licensee employment, education, examination, discipline documents for report generation
- Audio and video files can be stored

- Full integration to Board meeting software
  - Push documents to meeting software

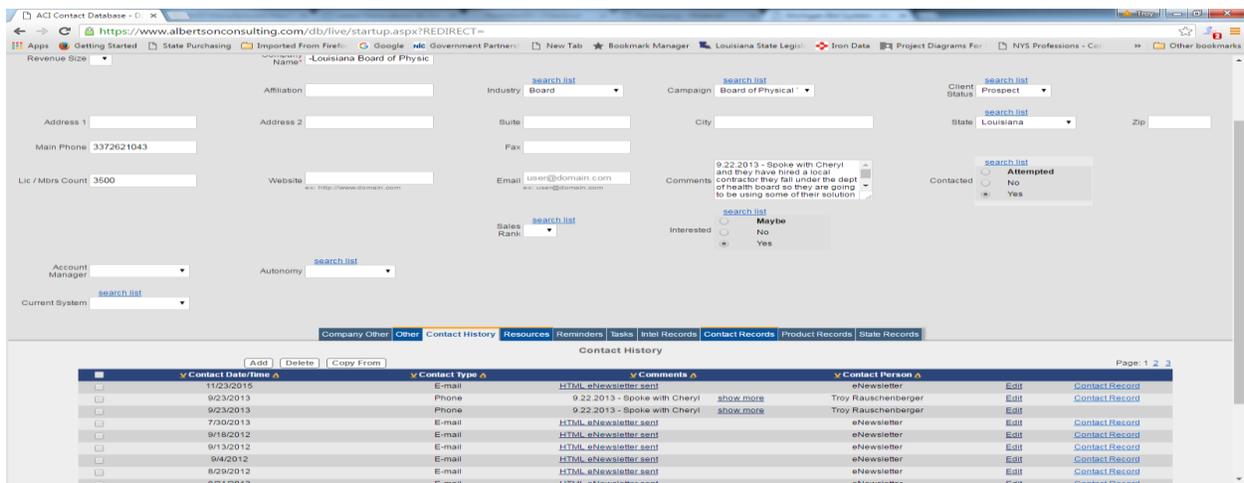

**Internal Reminder System**

- Setup and view recurring reminders at a licensee level
- Awaiting updates – easily commit all website or renewal updates right to the database
- Discipline and compliance monitoring alerts and reminders

**Contact History**

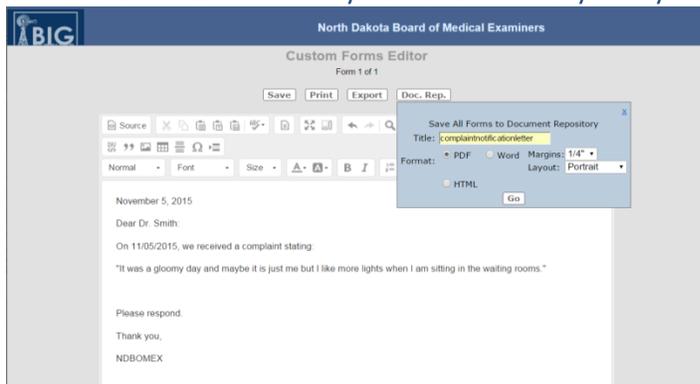

- Record transactional contact history by contact type and contact individual for respective licensee
- Email integration correspondence tracking
- Track phone conversations, meetings, webinars, board meetings, hearings, etc.
- E-blast integration – All emails from an e-blast can be recorded in the contact history of each licensee for future reference

### Portal integration and reporting

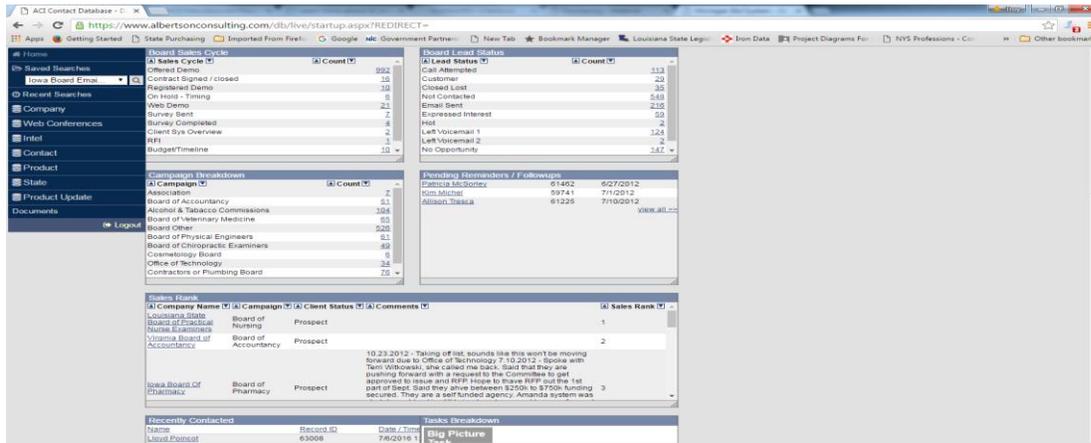

The following views are available to system users.

- Tasks – upcoming and past due
- Upcoming reminders
- New documents added to document repository
- Recent contacts – Pulled from contact history
- Disciplinary type breakdown widget
- Security, permissions and access controls set at user level
- Recent test results widget
- More widgets available out of the box and anything in the system can be summarized or customized to meet your needs either by the system users or by developers.

### Integrated manageable portal view

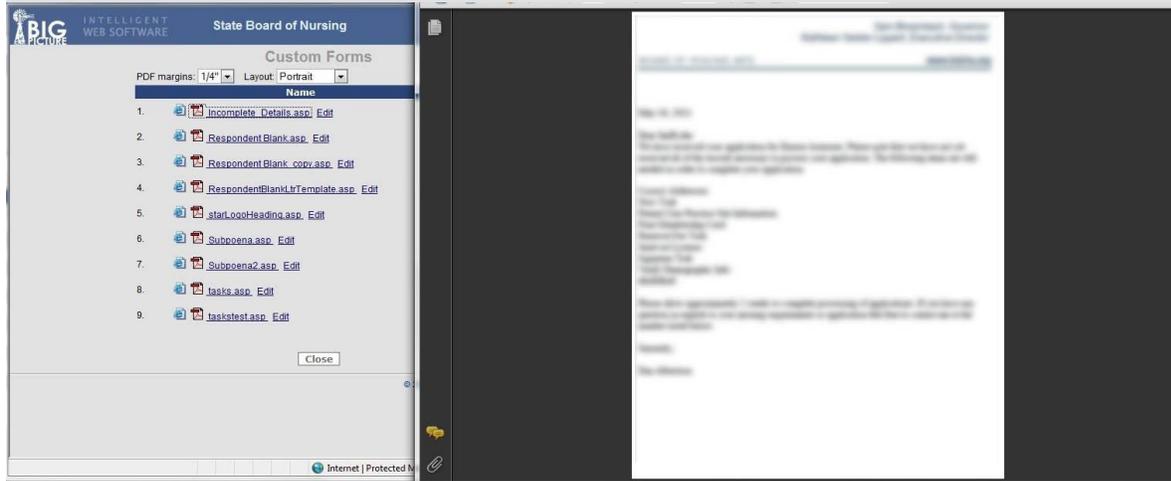

Data from ad hoc queries/templates can be stored for view by different users/groups in the Portal for simplified licensee/discipline lifecycle management. These summarized views or detailed views can be very valuable in alerting system users to various processes within the organization. These summarized views or detailed views are setup and managed by the system user as they see fit.

Internal queue management system to manage batches of records

- Remove
- Add All
- Add
- Empty queue
- Process queue
- Load queue

**Database Configuration Option**

Database Configuration Option enables system users to modify/add values in the drop down fields, manage fields, manage where they are displayed on the screen, manage what tabs they fall under, and manage record types. A unique feature of our software is that administrators can add as many Record Types to the system as needed and then manage what fields are related to that record type. This is an extremely powerful feature that allows you to completely manage additional license types as the Board grows.

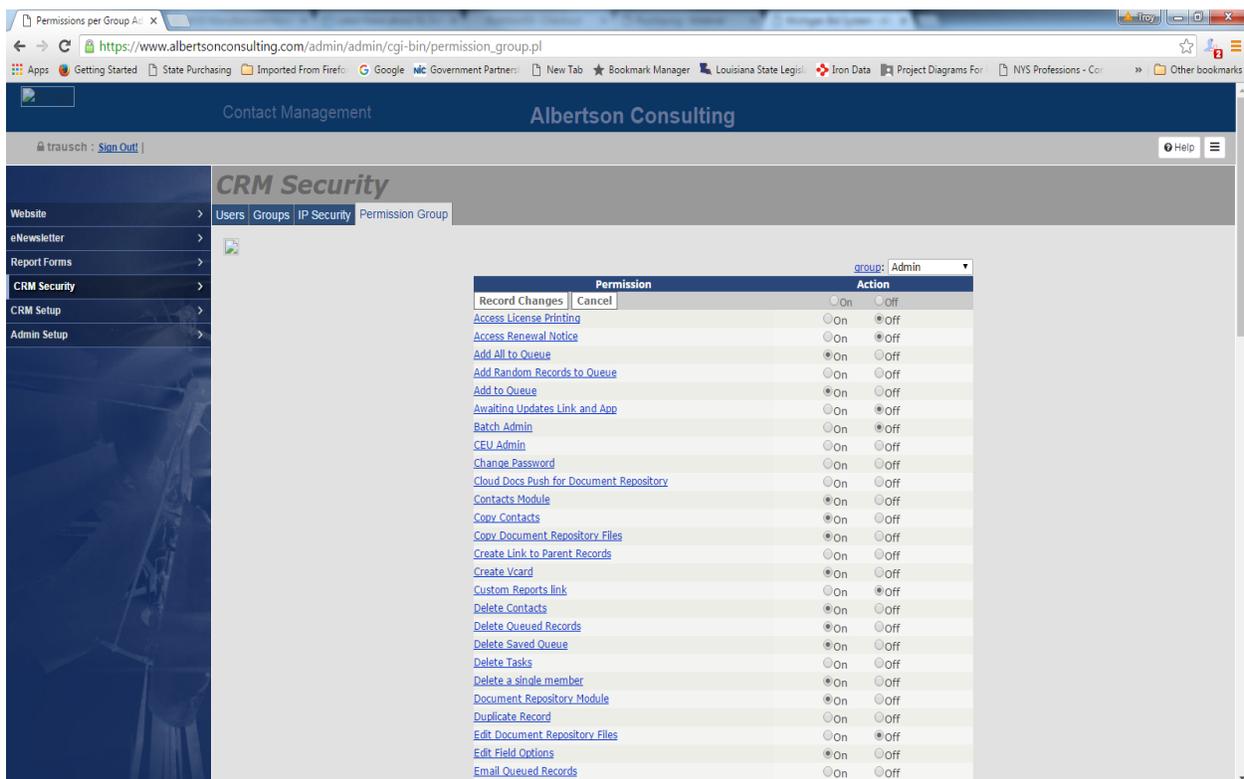

1. License application workflows
2. Hearing agenda workflow
3. Payment and receipting workflows
4. Enforcement workflows
5. Communications workflows, including standard letters

They can then utilize the built-in file loader to **import the data** for this new record type. They can then set up the views for them so the screen is laid out how they would like to view the fields. Administrators can then create reports and if they want them to be promoted to “Widgets” they can also do that in the Portal administrator tab.

**Administrator Tools**

- Users and user permissions
- Roles and role permissions
- Role-based access controls (users can be members of none, one or more than one roles)
- Licensee attributes configuration
- Exam providers, tests, and scoring
- Accounting codes configuration
- Cost tracking configuration

### **Data Conversion**

Data conversion can be one of the most crucial pieces of any implementation that is why a well-executed data conversion plan is essential for project success. For the past 13 years we have successfully utilized our data conversion strategies in implementations for other state boards similar to your board and can successfully migrate any legacy system and data regardless of size of the existing data.

The data you currently have in your system will become the data in our system. When we stand up a new system your field names will become field names in Big Picture. Our system is a blank slate. The first thing we do is identify the names of the fields that you require in the new system then we get a copy of your data and begin uploading it to our system. This data identified by currently understood field names is used for all functions in the database such as on the screen for views, correspondence, and reporting

Big Picture will be able to import electronic records that are delivered to our staff. Typically these records are in delimited text files. Often other types of files are delivered to our staff to import into our central repository. In the case where a customer is not capable of delivering their records, our staff may be able to pull the records out of the existing internal database system if it has ODBC connectivity or data dump capabilities that render textual files.

Big Picture will lead the conversion effort and specifically assist in the following areas. We expect that the board will provide resources knowledgeable with the historical data to assist in the data migration/conversion effort.

- data mapping
- script development for conversion
- assist in data testing and validation
- assist with the planning and execution of the final data conversion

Once the data mapping has been defined, a board representative will sign off on the data maps. The board staff and ACI staff will be responsible for the data conversion programs to load data from the staging tables to database.

Typically, two data conversions tests are scheduled prior to the final conversion effort and implementation of the data into the production database; however, there are times (based on complexity) when this process exceeds the anticipated three conversions.

### **Interfaces**

Our COTS software solution provides interfacing capabilities with most any external system allowing for data exchange. We have built multiple interfaces for many other boards that required interfacing with national associations and organizations. Our development team will work with the boards and other external organizations to configure the necessary interfaces. Interfaces with state gateway payment systems for point of sale and batch collection are supported with the software. In some cases, portals

can be configured for investigators or other officials to access a limited possibly read only relevant view of the data.

ACI's solution will specify and develop interfaces to move data between a third party and the board. ACI will develop a technical specification for each interface that will be required by the board. Including:

- Data Mapping
- Functional Requirements
- Interface flow

ACI is capable of designing and implementing any third-party interface for virtually any flat file or web service data exchange, below are common types of data interfaces typically used during a deployment of our software.

- Exam scores / test results
- Scanned documents (images, PDFs, etc.)
- CEU supporting documentation
- Payment processing information
- Renewal data import/export
- Continuing Education data & CPE (Hours, Courses, Providers, etc.)
- Audio files import
- Facility information
- Corporation data
- Accounting information
- Financial data
- Medical data

### **CPE Monitor Program**

We have worked with several national associations and integrated with their CEU tracking programs for a variety of both regulatory and professional licensing state boards. We have extensive knowledge of building and integrating these types of programs with state boards.

### **Online Payments**

All financial transactions are supported, including partial and overpayments. Big Picture Software includes a built-in robust accounting system, capable of handling all accounting functions: payments of any type, refunds, transfers, adjustments, NSF checks etc., along with built-in reconciliation reports and tools.

Every transaction is logged in audit tables. Permissions are tightly controlled at the function and user level. Payments can be accepted by mail, walk-in and online as needed. Any number of payment types are supported and can be configured per the board's requirements. Standard financial reports are

included. Specific board business rules regarding amounts, payment types, refund policy etc., and approvals are configurable per board’s request.

The board will be able to accept all internal and online payments options tracking each payment individually and what payment method was used. Appropriate users can be granted privileges that would allow them to override required payments.

**Payment Processing & Revenue Management**

In the administrative interface, system users can manage products related to revenue collection. Products and prices have a begin and end date so that as years go by and prices of various products change different amounts will appear for any online revenue collection item such as renewals for various license classes or applications amounts.

| Product                                      | Cost Amt | Begin Date | End Date  |
|--|----------|------------|-----------|

Revenue collection and cash management processes will be accessed in a batch administration interface. System users can manage products related to revenue collection. Whether a payment is collected online or in person, our **Batch Admin** system allows funds to be accounted for and credit given for enforcement, licensure or any other product to licensed or unlicensed individuals and exported to integrated third party accounting systems. Applicable fees, refunds, and NSF will be recorded appropriately to comply with boards internal controls/policies

Interfaces with state gateway payment systems for point of sale and batch collection are supported with the software. In some cases, portals can be configured for investigators or other officials to access a limited possibly read only relevant view of the data. We currently have many existing payment gateway interfaces available for revenue collection of application fee's, renewals, fines etc.

### Application for License to Practice Medicine Receipt

Your confirmation number is 68343. [Printer Friendly Receipt](#)

Name: Dan Albertson  
Total: \$205.00  
Credit Card Number: 4012 ..... 8888  
Date/Time: 5/1/2013 2:19:49 PM

**!** If you are connected to a printer, you may print this receipt for your records using the Printer Friendly Receipt link above. However, a copy of this receipt will be sent to the email address that you selected during application.

**✓** Thank you. Your application has been received. Once your application has been processed, you can login to see the status of your application. Applications are processed in the order received.

#### Application Status

The easiest way for you to determine the status of your pending application is to do it online. Go to "Application Status" under the Quick Links at the bottom of the page. Once logged in, you will be able to see the status of each required component of your application. You will see when it has been received by the board and the items still needed. If there is a question about any component, you will see a comment reflecting what needs to be done to clarify the matter.

This application status checklist is updated upon receipt of each component of your application, and you can trust that it reflects the most up-to-date status of your application. We encourage you to refer to it periodically to make sure the board is receiving all information required to process your application and issue your license.

**Products**

Every product in the system is editable using our Product tool found in the Big Picture administration interface. Product price, product name, and account number are configured. Canned reports allowing display and searching of products, transactions, and deposits, along with batches and payment methods are available.

There are many financial reports that allow you to break down deposits, renewals, applications, scope of service, address changes and many other revenue affecting items

**Document Repository**

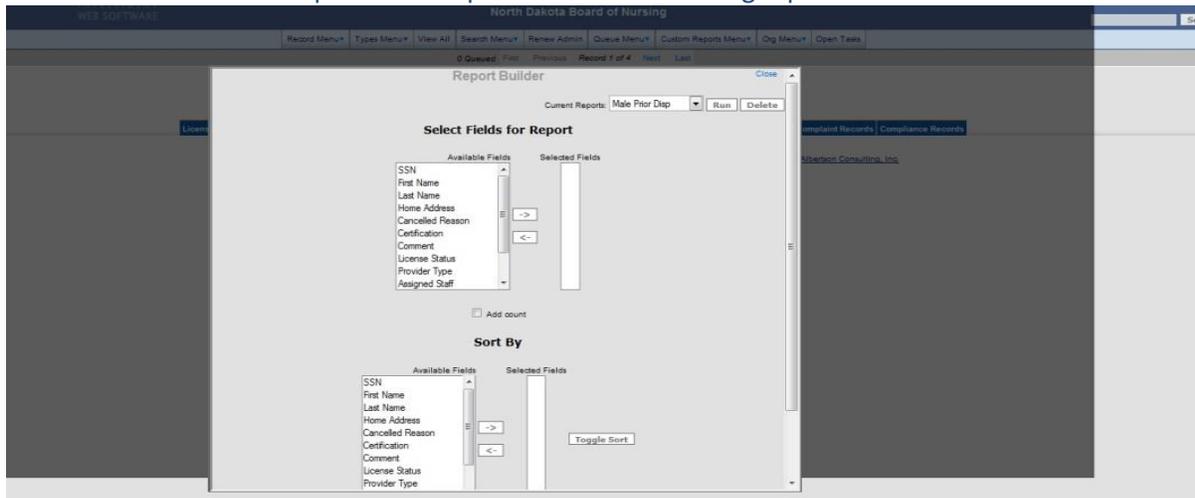

Big Picture has a fully integrated document management system allowing the ability to upload and store any type of electronic file directly with the related license record for a new application, application renewal, CPE or CEU, case management, inspections etc. Applicants along with any other authorized firm or party are able to upload documentation using the board’s public website. They system can support paper-based submission of complaints by staff, stakeholders or public. Paper documents will need to be scanned and uploaded and data manually typed into the database. Size constraints are imposed by the board from public facing online collection activities such as Applications or Renewals.

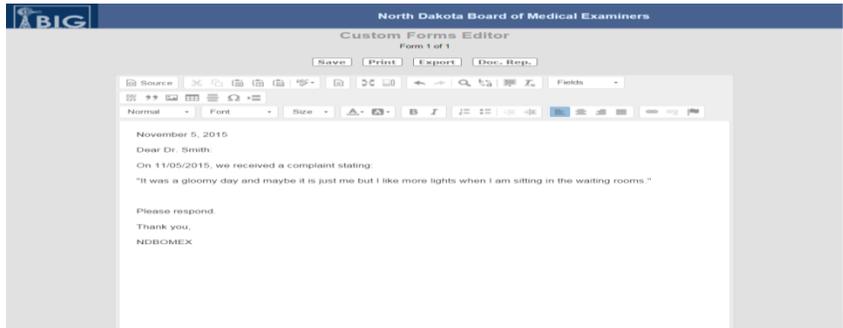

An integrated document repository resides within our web deployed application. It facilitates searching by any field in the database to drill down to the desired document. Any record type in the system has an optionally correlated view into the repository for imaged documents. When documents arrive in the repository, they are stored at the appropriate location and are available for viewing or distribution when necessary. For example, an original document submission containing all data and uploaded attachments such as an accepted application will automatically be stored as a PDF in the licensee record and retained

per state regulations. The board can elect any type of file to be stored in the system. Typical deployments utilize any of the following file type extensions. tif., gif., exe., doc., docx. pdf., txt., rtf.

- All Licensee and/or record **data is encrypted** at rest.
- Certain personally identifiable information, such as social security numbers, is stored in a **“masked” state** like xxx-xx-1234 as displayed in the record view (staff-only).
- Database record fields are placed in **Record Views** that are used for the appropriate **Permission Group**. For example, SSN could be on a View that only Admin Staff group can see.
- Publicly viewable data, such as disciplinary information, is **made available only as your business process** allows during setup. For instance, a Complaint is private, internal only, until a Disciplinary Action is taken, whereby it may be viewable on the appropriate view by the public, such as in License Verification.
- Reporting
- Our support staff works with your staff to create the custom forms and reports required to replace the existing reporting functionality in the current database application. The system’s infrastructure simplifies the implementation of existing reports.

The **search view** in the software eliminates the need for many reports and is critical to the reporting in the system. Most questions and queries can be accomplished right from within the software. **Every field** for any **record type** can be utilized as **search criteria**. The system allows for multiple fields to be searched at one time. After a search has been completed, it can be **saved** for later use. It then shows up in the search drop down and on the **Portal** screen where a user can access it with one click.

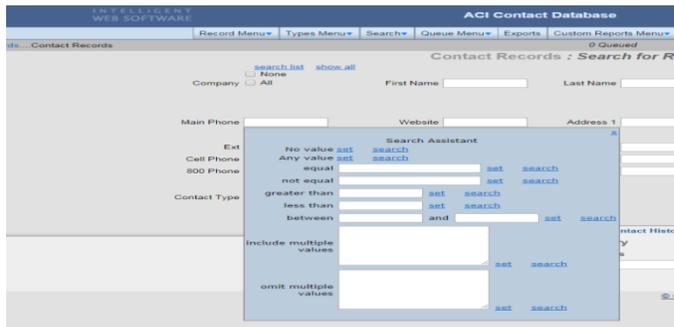

The **“search assistant”** is evoked upon focus on a field on the search screen. It gives users the ability to search for **“No value”** in a field or **“Any value”** in a field. Additionally, the search assistant allows users to search for records where that field is **“Equal”** or

**“Not Equal”** to some user entered data. Wildcard searching permits the user to enter some portion of desired search data. For example: if a user performs a wildcard search on the first name entering **“Dan”**, all individual records will be returned that contain **“Dan”** anywhere in the first name field i.e., a first name of **“Dan”**, **“Danette”**, and **“Daniel”**. Performing a **‘No Match Search’** on first name field for **“Dan”** will return those records in the database where **“Dan”** is not found in whole or in part in that field.

**Phonetic searching** is available in the search assistant, along with **historical searching** of our audit trail entries. Phonetic allows a user to do **“sounds-like”** search of all active records in the database. An algorithm has been deployed and is very effective. It may require some configuration during deployment. Historical searching allows a user the ability to search historical entries in our audit trail. For example, if an address was changed 4 years ago and that address is now searched by performing a historical search, the current active record will be found and the old address will be in the history view for that record.

A user can also perform searches containing a list of **“multiple values”** separated by commas. For example

entering **“Dan, David, Brian, Tim”** in the **“Include multiple values”** search box will return all those records from the database where the first name is either **“Dan, David, Brian, Tim”**. **“Omit multiple values”** search works the same way in that a comma separated list can be entered, but those items listed in the search are not included in returned search records.

The Search Assistant changes search options based on the context of the field type being searched. If the field is numerical in nature searches for between or less than or greater than appear.

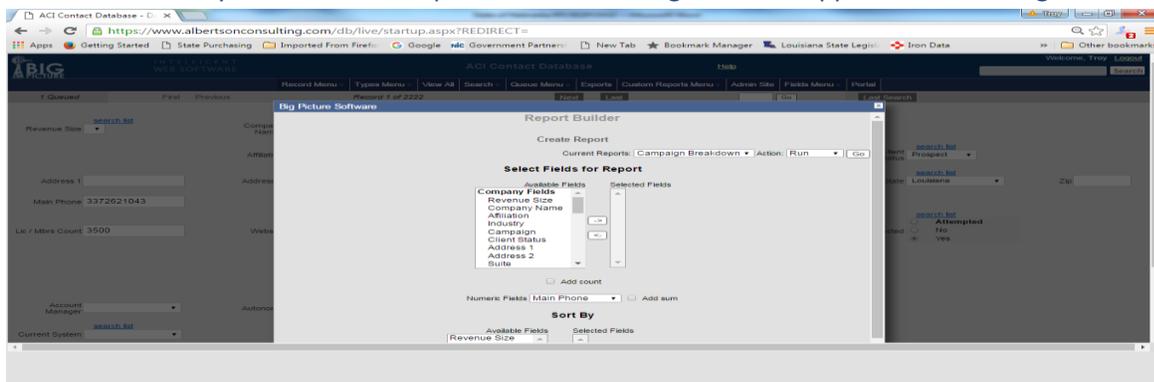

In some unique cases, we may be called upon to build custom **saved searches** that can pull together searches that become rather challenging in the user interface. Although this is rare, we have used it on occasion to prepare a record set that is otherwise not accessible from the main search screen. pulled from the database by either a manual or saved search of one or more fields, it can be viewed on the View All

screen, or it can be resorted by any field. A quick print is available on the View All screen. If that is not sufficient, this record set can be stored in a **queuing system** that allows the user many options such as **print envelopes, mailing labels, mass update, export to Office, print certifications or renewal requests with barcodes** or other options including the ability to merge the records into any **custom form** in the system. Custom forms are **editable** by the users of the system in our administration area. After the merge, these forms are either available in PDF or HTML for printing from the browser.

Once in the queue system, other options exist such as the ability to **temporarily store** these specific records to a static list that can be either **added to or subtracted from** by doing more searching in the database Search screen. After the user is satisfied with the record set in the queue, they can **save** it for future use.

Many of the reports/merges/exports will be incorporated into the base core reporting engine. Those of the financial type are typically referenced in the administrative interface where we have many **financial reports** that breakdown revenue, products, deposits, payments, statistics and many other canned revenue type reports. In some cases, we will need to modify or enhance these to fulfill the requirements of some of the existing financial reports.

In addition to all of the other tools, Big Picture has an automated *Report Generator* that allows users to search out records and then place fields from the resulting recordset into a report. The user can also summarize or add counts to facilitate management reports. These reports can be exported to Excel, PDF or HTML. They can also be promoted to Widgets and appear in the Big Picture portal

In those situations that a **mail merge** type of report is required, a determination is made to either build the hard coded report online, utilize our online user-defined tool set to build a mail merge custom template or export the data to **Microsoft Office**.

At times we can utilize an **existing** PDF, if one exists, to create a new report from our system. For example, we may employ this technique if your existing license is a PDF. In this streamlined process, we effectively modify the PDF to include fields from the database and then make that available in our system.

Our developers are adept in solving any reporting needs. We have met the needs of our customers with the capabilities listed above and have built and deployed custom report packages utilizing Microsoft SQL Reporting Services (**SRS**), Adobe PDF, Access, Crystal Reports and HTML reports.

All report templates can be sent to local standard printers for printing. There exist no limitations by the system in this regard. Printer capabilities may affect whether special documents (placards, wallet cards, etc.)

These reports will exist as report templates where authorized users can reuse these existing reports or retune them to suit present-day needs. The solution provides the ability to export to Excel as well as allowing for mail merge functions for letters and mailing labels.

**Discipline**

Tracking and reporting of disciplinary orders and compliance are easily managed with our software. Our integrated batch administration interface will be utilized to collect investigative fines and costs and will interface with accounting and cash management systems in accordance with the agency's requirements.

At the time of deployment, we will configure the internal portal system to allow your investigations staff access to investigative case information and provide the ability to update case records and issue citations. GPS options exist and can be configured and integrated upon further requirement gathering. Users from other agencies and associations can be granted access to the portal interface based on role based security. The portal will be configured to display and share disciplinary and investigative information upon stand-up of the system. Exports, reports, and interfaces will be configured and deployed per the agency's needs for other agencies and associations.

- Recent test results widget
- More widgets available out of the box and anything in the system can be summarized/customized to meet the needs either by the system users or by developers.
- Integrated disciplinary web service included.

### License Certificates and Pocket Cards

The software has the capability to print licenses, wallet cards, reports, correspondence, envelopes and other miscellaneous items that need to be printed as part of the licensure cycle. Our software can also provide third party vendor appropriate data through EFT.

### License Maintenance

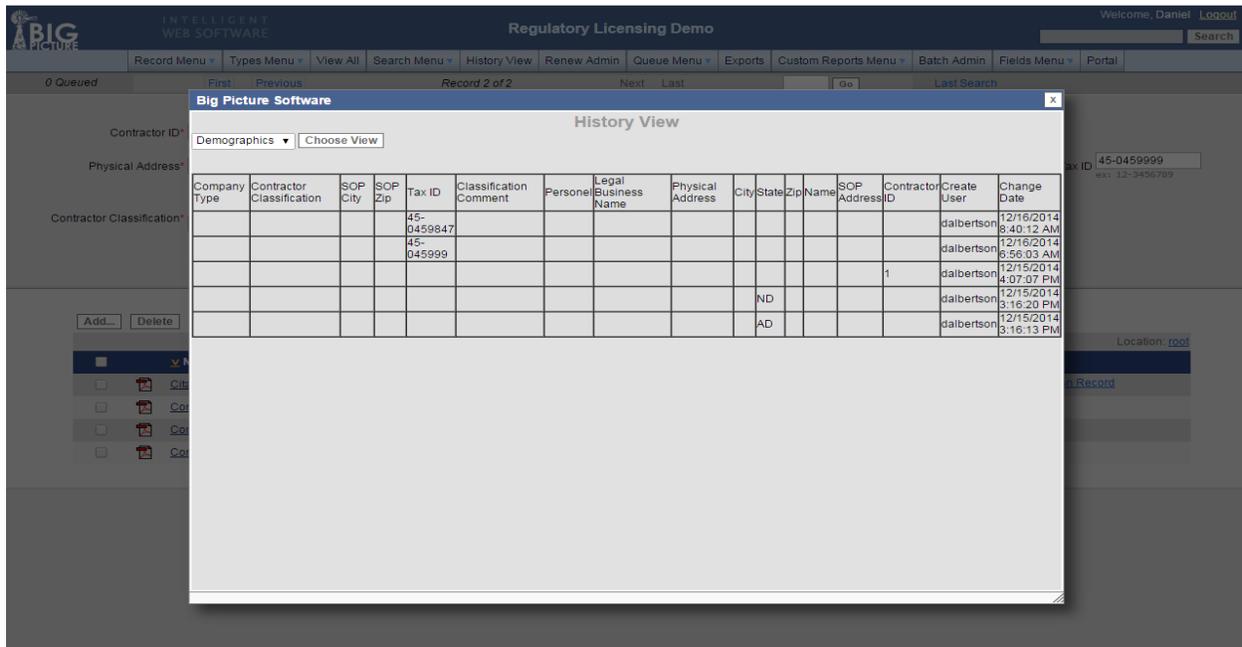

All licensee data/information that is stored in the database can be modified at any time by authorized staff personnel. The agency can define and modify all information collected and stored in the database. Role-based security exists to ensure users have access to appropriate fields and functions.

### License Status Changes

Each license within the database can have multiple associated statuses throughout the licensure life cycle. The software can display historical statuses by configuring our history view tool.

The database has a fully integrated audit trail with user/time stamp functionality ensuring complete tracking and an audit trail of everyone who accesses, modifies or changes a record in the database. Complete logging and tracking of updates to all data with date and time stamps are easily accessible for review. The administrative interface allows many views to be setup for different fields and record types. Every record has a history of every change that has been made to the record since the inception of the database.

Every licensee has a full audit of every change that was made to the record since the inception of the database.

**Continuing Education & Accreditation Tracking**

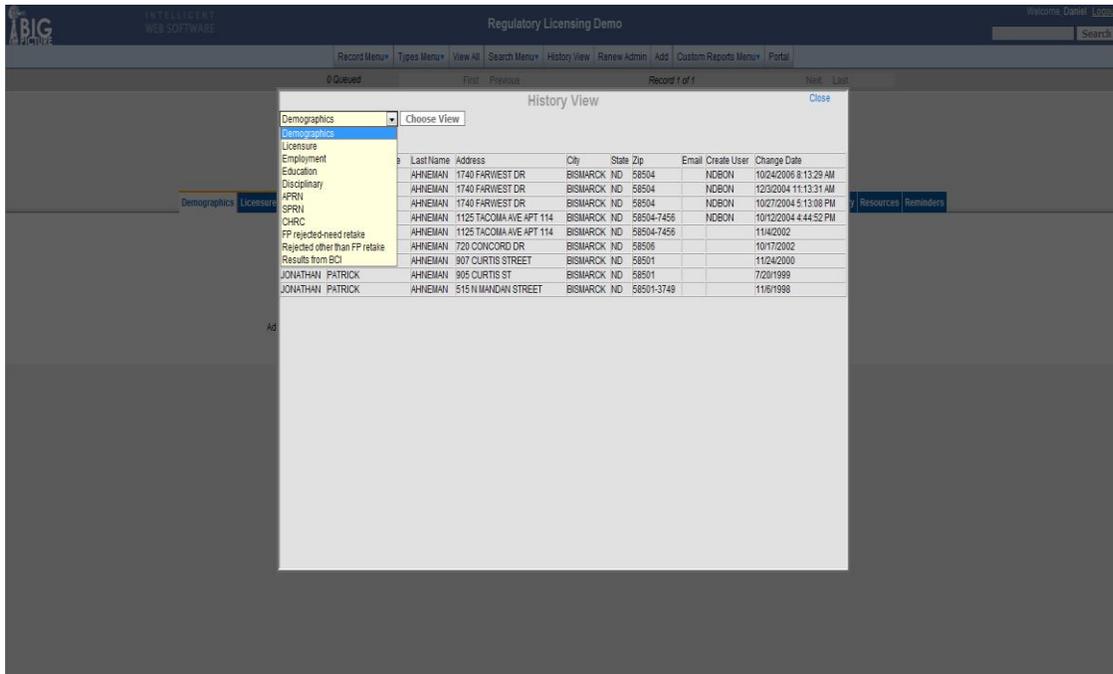

Provides the ability to create, view, search, list or maintain courses and classes. Imports and exports are available to allow licenses or authorized system users to upload rosters for continuing education courses at any-time. Requirements for CEs will be set-up per the board’s advisement. Licensees can upload CE information via the website which will allow board staff to create a printable log format provided by the board. All CE information is retained indefinitely.

**License Printing**

Software has the capabilities to print licenses, wallet cards, reports, certificates, correspondence, envelopes with mail merge capabilities and other miscellaneous items that need to be printed as part of the licensure cycle.

**History view**

- Logging and tracking of updates to all data history with date and time stamp
- Administrative panel allows many views to be setup for different fields/record types
- Every licensee has a full audit of every change that was made to the record since the inception of database tracking any changes to the record.
- Security levels allow complete audit trail of all changes made to a record by a staff/board member etc.

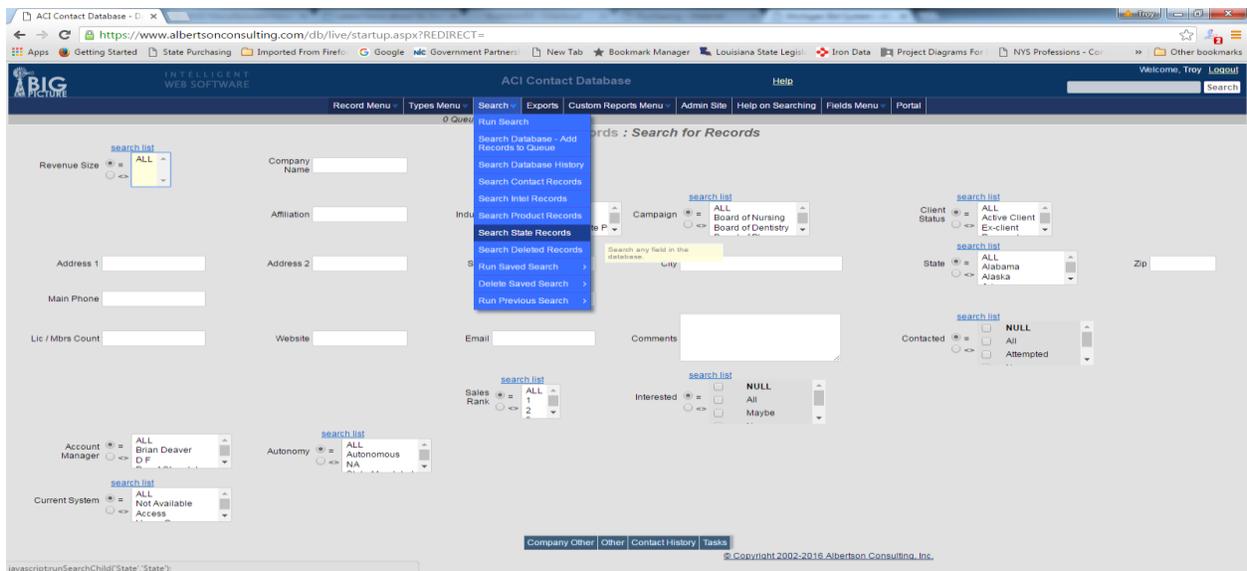

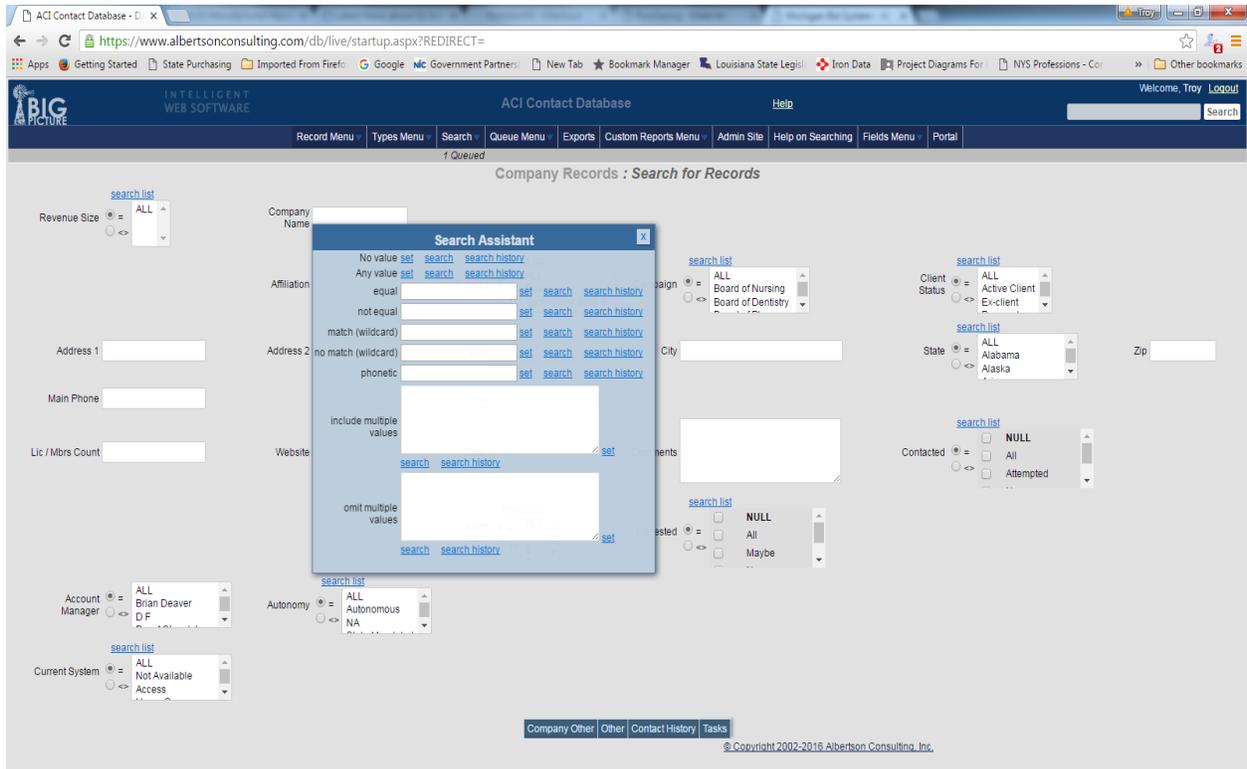

**Search Panel**

License Management Database Module is critical to all data mining searches and reporting related operations in the system. Queries can be accomplished right from within the software. After a search has been completed, it can be **saved** for later use. It then shows up in the search drop down and on the **Portal** screen where a user can access it with one click.

**Search view**

- Every field is searchable, sortable and exportable.
- Enhanced query options by one or many fields.
- Saved search capabilities

**Data Mining**

All data pertaining to a licensee are stored within the centralized database and available to generate custom reports, queries or searches. Every field within the database is searchable, sortable or exportable.

**Audit Trail/History View**

- Logging and tracking of updates to all data history with date and time stamp.
- Administrative panel allows many views to be setup for different Fields/Record types.
- Every licensee has a full audit of every change that was made to the record since inception of database

**Workflow Management – TASKS**

- Every record type can contain Tasks. These tasks are editable in the Administrative area. They then show up for every record entered in the system.
- A Due Date is entered for each task in the Checklist/Workflow.
- Once that task has been completed it another date is entered. The tasks that are outstanding pop up when you access this licensee’s record. Also there widgets that can be configured in the portal interface to ensure that all upcoming and past due tasks are attended.
- Tasks are editable by the administrative team/staff for each record type. This workflow engine is utilized with Inspections, Discipline and Application Processing to ensure that all tasks associated with these items are successfully managed.
- Records can be added ad-hoc to a specific record.
- All tasks can be customized and managed by board staff based on permissions and job roles etc.

**Integrated batch administration/revenue collection software**

- Batch administration allows system users to manage revenue collection. This software specializes in cohesively managing revenue collected manually and online from online applications or renewals.
- It facilitates a quick fetch of all licensees to streamline creation of a Batch with or without the use of bar coded renewal requests.

- Software interfaces for reconciliation with state treasury department(s) and other designated state collection agencies.

**North Dakota Board of Pharmacy** Signed in as Pharmacy [Logout](#)

Type: Intern

Create Date: 3/22/2011  
 Create User: Pharmacy

Status: Open

Type\*:  Payment  Adjustment  Credit Card  Check

Member IDs will be checked that they are valid before they will be recorded if they are not valid they will not be recorded.

\* indicates a required field.

- It is the center for revenue related business process which occurs automatically when a payment is posted to a license account.
- **“Note” Big Picture Software already has an interface with the WV Treasurer’s Office “E-Gov” payment system in place with another WV Licensure board.**
- *Administrative Interface*
- The Administrative Package is the tool that puts the management system in your hands. Allows internal user to upload video, photos or other media related items and manage all aspects of website components.
- Send out surveys or questionnaires to entire database contacts or targeted group of individuals

- Internal notification system for reminders of calendar events, past due notices, letters, disciplinary action follow-up etc.
- Manage events, articles, publications, custom letters, and calendars through the administrative interface.
- Manage all website content

**Mobile Inspections**

Inspections can be grouped chronologically. For example Quadrant 1 – SE State, Quadrant 2 – NW Section of the state. Inspections can also be grouped by zip code or within a geographic radius from office position etc. We will configure the solution per the board's requirements for territory management, assignments etc. during the deployment of the solution.

Our COTS software enables the board with the ability to collect inspections from field representatives in real-time. It is a very flexible solution that can be customized to meet the demands of your business. It facilitates multiple collectors gathering information into the central repository. These collections can come while in the field or anytime your business process requires. The module will lower your overall cost of inspection management and protect the public by increasing the accuracy and timeliness of information.

Collections are tightly integrated into the Big Picture Database. Depending on your business process, once these collections arrive in the repository they establish a historical record that can be printed and reported on. All inspection data is searchable, sortable and exportable. Inspection data in detail or in a summarized fashion is available in the portal view for managers, staff or inspectors depending on the security group.

**Mobile Features**

- Create inspections, schedule, and Reschedule inspections
- Create Case/Permit/Records out in the field
- Ability to see GIS map if applicable
- Upload, or save inspection result
- Group multiple inspections and reschedule

Our easy to use, easy to deploy mobile inspection software empowers your mobile inspections personnel to complete entirely paperless inspections, from simple questionnaire checklists. With our mobile inspection software you can:

- Improve Inspection Process Consistency
- Perform the required actions on their mobile devices
- Perform and Automatically Transmit Paperless Mobile Inspections
- Capture Condition Photos and Customer Signature
- Job details and historical data on the installed assets are provided.
- Take snapshot pictures or add videos at any stage of the inspection
- Completed inspection results from the field are collected automatically in real time or offline when internet connection becomes available

After the inspection system is deployed you are left with full management capabilities in our system administration software to modify inspections and collections. Questions, answers, fields, field types, and responses are manageable. Also using our standard web-based editing software administrators can configure inspection templates easily without the need for any programming. Our software can be configured to collect any data for any entity anywhere an internet connection exists. All collections occur over SSL to ensure secure inspection collections.

### Inspection Facility

A list of these minimum standards shall be posted prominently in the waiting rooms of the facility 26-4-5.2.J

Complies  N/A

A veterinarian shall store and maintain radiographs whether in film or digital format for a minimum of three years. All exposed radiographs shall have a permanent identification bearing the clients name, the patients name, the date and either left or right exposure 26-4-4.3.B

Complies  N/A

A veterinarian shall store all repackaged legend drugs dispensed for animals in approved safety closure containers. This provision does not apply to drugs dispensed to any person who requests that the medication not be placed in these containers, or to drugs in such form or size that they cannot be dispensed reasonably in these containers 26-4-4.4.D

N/A

All repackaged legend drugs dispensed shall be labeled with the following: (1) The name, address, and telephone number of the facility; (2) The client's name; (3) The patient's name; (4) The date dispensed; (5) The directions for use; (6) The name of the drug and its strength (if more than one dosage form exists); (7) The name of the prescribing veterinarian; (8) The number of refills, if any 26-4-4.4.E

Complies  N/A

The veterinarian shall maintain records of all medications prescribed and dispensed for any animal in that animal's individual file 26-4-4.4.F

N/A

All controlled substances dispensed or prescribed shall be recorded in a controlled substance register. Each veterinarian who maintains a DEA registration shall maintain a controlled substance register. This register shall indicate the following: (1) The name of the prescribing veterinarian; (2) The name of the medication dispensed or prescribed; (3) The quantity dispensed or prescribed; (4) The dosage of the medication, if applicable; (5) The number of refills; (6) The date of the dispensing or prescribing; (7) The patient name and name of the client record; (8) The method used for prescribing, such as written script, phone, fax or any other electronic means; and (9) The name and phone number of the pharmacy or pharmaceutical agent which received the script from the veterinarian, if not delivered directly to the client 26-4-4.4.H

N/A

The minimum amount of support equipment required for the delivery of assisted ventilation is: (1) resuscitation bags of appropriate volumes, and (2) an assortment of endotracheal tubes of various sizes in working condition 26-4-4.5.A

N/A

A veterinarian shall have an oxygen supply available at all times 26-4-4.5.B

Complies  N/A

A veterinarian shall maintain anesthetic equipment in proper working condition 26-4-4.5.F

Complies  N/A

A veterinarian shall use an acceptable method of sterilization sufficient to kill spores on all instruments, packs, and equipment intended for use in surgical procedures 26-4-4.6.A.3

Complies  N/A

Running water shall be accessible to the sites of the surgical procedure 26-4-4.6.B

Complies  N/A

A veterinarian shall maintain individual records at his or her place of business which shall include but not be limited to identification of the patient, the patient's medical history, immunization records and diagnostic procedures performed 26-4-4.9.A

Complies  N/A

A veterinarian shall provide and maintain sanitary methods for the disposal of deceased animals in compliance with the local, state, and federal health rules and regulations 26-4-4.13

Complies  N/A

A veterinarian shall dispose of medical waste in accordance with local, state, and federal laws 26-4-4.14

Complies  N/A

Print name of person signing this form for the facility:

Name of Inspector

The system will be set up of all inspection templates, business process, workflow, portal widgets, and security for inspectors, training, testing and deployment to the internet-enabled collection devices of your choosing. Our standard collection devices are Windows-based laptops and tablets and Android-based laptops, tablets, and phones. Big Picture Software supports complaint workflows, which will allow the board to automatically route work and/or tasks to various board staff in the system based on customized business rules and workflow processes.

### Complaint & Investigation Tracking & Compliant Processing

Our COTS software will enable the Board investigators to track complaints against a licensee. Configuration upon stand-up of the system will allow **complaints** to be **associated** with the originating entity and license record. The system is able to tie many investigations & enforcement actions to multiple licenses and cases.

Complaint cases are assigned to an investigator. Information is gathered and stored for investigative, reporting, and retention purposes. A workflow process is created for all types of investigation cases. The process will be configurable based on business requirements and modification will be allowed to accommodate changes in business rules. Content validation is required. The complaint process is detailed at length above.

Once an investigation case is assigned to an investigator a workflow process will be initiated. Tasks will automatically be generated per type and assigned to the investigator for the individual or entity under investigation. Tasks, enforcement types, task types (serial or parallel), assignees are all configurable items

within the COTS software. Serial task type allows tasks to be assigned in order upon completion. It requires the prior task to be completed before the next task can be assigned. Parallel type tasks allow for a group of tasks to be assigned for simultaneous completion.

Complaint records can contain necessary information about the complainant, respondent, and allegations. If additional complaints, respondents or allegations exist they will be related appropriately to the complaint record. All documents, contact history, reminders, tasks or additional data for complaint records, complainants, respondents or allegations will be stored per the Board's current business process and retrieval needs. The analysis will take place during the stand-up and importation of data to ensure an efficient business process.

Every case will be assigned a **tracking number**. Case numbers will be assigned sequentially according to complaint type. Our deployment team will configure the system for record keeping, workflow management, and document retention to meet requirements of the board.

Paper documents will need to be scanned and data manually entered into the database. Those received electronically through the Board's online **complaint system** or mobile applications will automatically populate the complaint record and generate a PDF.

As records are updated with public information in the database we will configure the online mobile and website verification system to display data, status, and documents intended for public viewing.

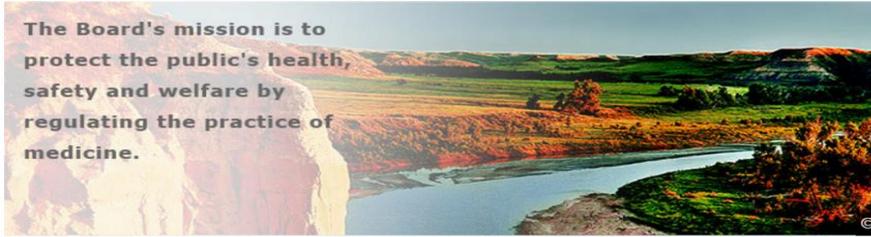

Online complaint forms allow licensees and public users the ability to search out licensees. During deployment, the system will be configured for your search criteria and to display necessary data details. Other online services will be configured to facilitate license renewal and application and complaint submission to your specifications including uploading of supporting documentation.

helping to ensure quality health care for the citizens of north dakota

### Complaint Form

Name of Person Submitting This Complaint:

**Address of Person Submitting This Complaint**

Street Address:  City:

State:  Zip:  Daytime Phone:

Evening Phone:  Email:

Name of Physician/Physician Assistant About Whom You Are Complaining:

Name of Patient Involved in the Incident Which Gives Rise to This Complaint:

Place (Hospital/Clinic, etc.) Where the Incident Giving Rise to This Complaint Occurred:

Date of the Incident Giving Rise to This Complaint:

Please describe the conduct about which you are complaining. It is important to be as specific as is reasonably possible. If you are in possession of medical records or other documents which support your allegations, you may provide them to the board by uploading them as indicated below, or by mailing them to the board at North Dakota Board of Medicine, 418 E. Broadway, Suite 12, Bismarck, ND, 58501. Note: The character limit for this field is 4000 characters.

### Thank You

 Your complaint has been submitted and will be investigated promptly and presented to an investigative panel of the board at its next regularly scheduled meeting.

You may receive a telephone call from staff at the Board of Medicine if there are any questions about the complaint you submitted. You will receive a letter shortly explaining the disciplinary process the board follows.

If, at any time, you have further information you would like to submit about this complaint, you may do so by contacting the board through its website, [www.ndbom.org](http://www.ndbom.org), or by calling the board office at 701-328-6500.

No two board disciplinary action systems are identical. It will be configured to the board's needs. In some examples, we have also integrated an inspection step where once it gets to a certain point in the investigation an inspection is ordered and once the results are available they can be included in the investigation proceedings.

**Enforcement**

Our COTS software solution will enable the boards to manage enforcement of board directed orders. Board staff will be able to track drug tests, perform monitoring, levy fines complete the enforcement life cycle of a board ordered action. Enforcement staff will be able to mark an individual available for applying renewing.

When a deployment begins we will work with your staff to understand an ideal process for managing your unique enforcement needs. The analysis will be done to ensure your enforcement needs are met. We will import your existing data and put it in our system. At that point, we will train you on how to utilize the system to manage your enforcement.

Tracking and reporting of disciplinary orders and compliance are easily managed with our software. **Orders and compliance.** Our integrated online forms management system will be configured to collect payments for investigative fines and costs and will interface with accounting and cash management systems in accordance with the Board's requirements.

The portal will be configured to display and share enforcement and monitoring information upon stand-up of the system. Exports, reports, correspondence and interfaces will be configured and deployed per the Board's needs for agencies and associations.

### **Integrated Enforcement Portal Overview**

Administrators can setup and manage any field, any view and any tab for them to appear on this are fundamental to our Enforcement management software. During implementation, it will be configured to meet your needs. It facilitates storage of the following records in the database:

- Drug/Alcohol test results tracking
- Workplace impairment tracking
- Licensee Monitoring
- Reminders-recurrence
- Recent document submissions
- Public/Private document retention
- Any other document types such as docket, cases, complaints, and any other record type can be configured in the system and stored.

### **Portal integration and reporting.**

The following views are available to system users.

- Upcoming reminders widget
- Disciplinary type breakdown widget
- Recent test results widget
- Probation tracking
- Recent fines status of paid not paid
- Monitoring of licensee rehab program participation and attendance
- More widgets available out of the box and anything in the system can be summarized/customized to meet the needs either by the system users. Anything that can be reported on or searched on in the system can become a widget.

### **ADMINISTRATIVE Interface (4.1.1.20 & 4.1.3)**

Our COTS software solution allows administrators the ability to manage all content associated with a website including editing and setup of web pages and content. The content management tool supports editing and setup of web pages and content. It provides a management and a transactional log of all changes made to the website and all News Articles, Documents, Applications. Photos, Media, video, Calenders, Events, Surveys, E-Blasts and informational pages. During the deployment of this new website, a new version of the content management tool will be put in place. New system allows us to:

#### **Work on drafts and publish content when it suits you**

- If you didn't get to finish your page but want to save your progress and continue working with it later, that's no problem at all. In Umbraco you decide whether you want to publish your changes immediately or just save them and publish them at a later time. You can even schedule your new content to replace the existing live content at a specific time, so you don't have to log-in again to publish the new content when it's needed.
- Oh, and you can of course always preview your progress along the way without the content going live. This way you can be absolutely sure that everything looks perfect and works as intended before publishing.
- Track changes so you can see what was on the site in the past.

#### **Versioned Content - an infinite undo button**

- Worried about making a mistake or losing content? Perhaps you need to work on content that's already been published? None of the above is a problem as all content in Umbraco is versioned. This means that you can always rollback to an older version. It's like an infinite undo button - imagine what that'll do for your stress levels.

Additional edit capabilities to the system exist in the administrative site that allow:

- Portals, Widgets, Reports, and correspondence templates are all editable by system users in our administrative site
- Custom report building / editing tool allows staff to build and publish reports from license and application data
- Record types can be related to other record types in any manner and with all related field are completely editable
- Staff will have the ability to manage user defined fields in the database. These fields or multiple fields can be used to generate queries for reports/exports and create custom templates for later use
- Administrative site allows complete control over front end user screens.
- All fields, record types, codes, products, templates, in the database are manageable

- Exports can be of the entire data set, or data and the fields that were queried can then be rearranged to fit the necessary needs
- Commonly used export templates may be saved for later use

**4.1.4 Cloud-Based Documentation Program:** The system must include an integrated and secure cloud-based documentation program whose interface should require minimal steps to access the managed content. The cloud-based program must not allow for documentation to be locally stored on a machine or device. The program must permit:

- 4.1.4.1** Board staff to upload documents and audio/video files.
- 4.1.4.2** Board staff and Board Members (at no additional user license cost) must have secure access to uploaded documents and audio/video files. Must be able to process, store and make viewable large file size documents and audio/video files without system delay.
- 4.1.4.3** Must be functional for ease of use on mobile devices.
- 4.1.4.4** Must allow users to reset their password twenty-four (24) hours a day, seven (7) days a week.
- 4.1.4.5** Must allow functionality to limit access of any specific user(s) to workspaces or specific documents/files.
- 4.1.4.6** Must provide for a portal that allows the Board to securely send or receive confidential documents with an authorized third-party. Must be an encrypted file transfer platform with HIPAA compliant level of security.
- 4.1.4.7** As the entire system must be integrated, meaning that it operates from a single unified database, this Contract Item must operate from the same database as all other components.
- 4.1.4.8** Must be an internet-based solution with the capability to be changed after implementation to support the Board's needs.

**Big Picture CloudDocs (2.0)**

Big Picture Software provides a cloud-based document software program which is part of unified database used for the licensing management system. Board members or board staffs have the ability to access up to the minute documents in a secure online environment. Board members can upload PDF & word documents, audio and video files to folders, set-up auto email notifications to board members. Documents can be viewed in a browser environment and can be accessed on the internet with email and a password.

Board members can also manage hierarchies of folders & documents stored in the same unified database document repository. The easy note taking annotations feature of our **CloudDoc's™** Software allows permitted users to easy access to safely store notes, questions and comments in the Cloud. Add annotations to text or images, tag notes within keywords and view notes outside of documents. Board members can organize notes with tags and descriptions, highlight, strikethrough and insert annotations in a real-time cloud based environment. All confidential documents are stored via encrypted connections. Ability to search and access annotations from outside the document which (may or may not) reside on the local laptop or machine depending on the boards preference.

**Document Repository**

Gives board members access to up-to-the-minute documents in a secure online environment.

- Upload PDF and Word documents to folders
- Auto email notifications to members
- View documents in a browser
- Support for iOS, Android, Mac, and Windows
- Easy access on Internet with email and password
- Easy Document duplicate and join capabilities
- INTEGRATED TO database document repository, Web, Portal and CloudDocs
- Manage hierarchies of folders and documents
- Stores Audio and video files securely for the board to review during meetings.

**Easy Note-Taking Annotations**

The intuitive interface allows any permitted user easy access to safely store notes, questions, and comments in the Cloud.

- Add annotations to text or images
- Tag notes with keywords
- View notes outside of documents
- Organize notes with tags and descriptions
- Highlight, strikethrough, insert annotations

### Security

Know that your confidential documents are stored via encrypted connections.

- Search and access annotations from outside the document
- Documents don't reside on workstation machines - no worries about device theft!
- Cloud-based Software As A Service (SAAS) frees boards from server and hosting management

**\*\*A new version of Big Picture CloudDocs system will be available that is similar, more feature rich and meets the requirements set forth in the RFQ.**

## 5. PERFORMANCES:

- 5.1 Installation and Implementation:** This contract becomes effective upon Vendor's receipt of the notice to proceed. The Installation and Implementation part of the Contract, as fully described in these specifications, must be completed within one hundred-eighty (180) calendar days. Upon completion of the Installation and Implementation process, and upon Acceptance by the Agency as defined in these specifications, a Change Order will be issued by the agency with approval of the Purchasing Division that will start the five-year fixed term for maintenance, support, warranty and hosting services by the Vendor.

The successful Vendor must:

- 5.1.1** Meet with the Board staff and current database Vendor (if new Vendor is awarded contract) as is necessary to plan data conversion, data migration, system customization end implementation. At least two (2) on-site visits are required, but the vendor shall include the costs of this required visits and any additional visits they expect to need to conduct in their bid.
- 5.1.2** Provide a complete schedule for installation and implementation within ten (10) calendar days of award of the contract. The schedule should indicate all phases of installation and implementation, note any meetings for which Board staff attendance is required, and explain how installation and implementation will affect the availability of current website services to Members and availability of the database to Board Staff. Installation and implementation should minimize the amount of time during which Members and Board Staff cannot access the Board's business services.
- 5.1.3** All data conversion is to be part of the implementation process. **The Board will retain ownership of all data related to the project, including any fields with codes appended by the Vendor to create a join between data tables.**

- 5.1.4** Provide and execute a plan, in coordination with the Board staff, for notifying Members and others of the new website and system.
- 5.1.5** On or before acceptance of the Contract, provide at least one electronic copy of an instruction manual for Board staff (which allows the Board staff the ability to reproduce as needed to circulate to staff during the life of the contract). The instruction manual must be updated from time-to-time as may be needed due to changes made by the Vendor to the Contract Item and Services over time.
- 5.1.6** Provide training for use of the system to all Board staff (currently numbering 16), including intensive software training for Board's IT staff and high-end users. Initial training must be on site at the Board's office in Charleston, West Virginia. Training must cover both the system software and the customized processes of the Board as they exist in the system. Vendor will be expected to provide training to any additional license users during the life of the Contract (at the cost of the Unit Price for the additional license, see Section 6.2.8, below). Training for any subsequent additional users may be on site or remote by electronic communication.
- 5.1.7** Vendor shall be responsible for all mileage and travel costs, including travel time, associated with performance of the contract.
- 5.2 Acceptances:** Acceptances shall be defined as successful demonstration and testing of all system requirements including training, with the ability for all users to navigate and utilize the system to perform their roles. The Agency with the Vendor's acceptance will issue a written letter and Change Order request to WV Purchasing Division as formal Acceptance of the system. Upon mutual agreement of Acceptance by both the Agency and Vendor, the Change Order issued by WV Purchasing will start the Five-Year term for maintenance, support, warranty and hosting by providing a signed/dated letter agreeing to the start date of the Maintenance and Support to the Board.
- 5.3 Maintenance and Support:** The five-year term for maintenance and support will be added by formal Change Order after completion of the Installation and Implementation process and upon the Agency's formal Acceptance of the system. The successful Vendor must provide maintenance and support at a fixed annual cost that

meets the following requirements, as well as any other requirements set forth in this Solicitation.

Vendor must include in their bid the fixed annual cost of maintenance and support for years 1, 2, 3, 4 and 5. The successful Vendor must provide maintenance and support meeting the following requirements:

### **5.3.1 User Help Desk**

**5.3.1.1** Vendor must provide 24 hour-per-day, 7 days per-week access to online or telephonic technical support to both the Board staff and the end user Members during the life of the contract. Such must be provided at no additional cost to the Board beyond the annual base cost for maintenance and support.

**5.3.1.2** Support must also include support to Board's administrative users and IT staff for configuration to the website, the database, the administrative interface and the cloud-based program. Such must be provided at no additional cost to the Board beyond the annual base cost for maintenance and support.

**5.3.1.3** Vendor must also be able to provide remote desktop support for both Members and Board staff. Such must be provided at no additional cost to the Board beyond the annual base cost for maintenance and support.

### **5.3.2 Software Patches and New Releases**

**5.3.2.1** During the life of the contract, Vendor shall make available to the Board all new software versions and patches of defects. Though the expectation is that software updates and patches will be installed remotely, none shall be undertaken without the prior notification, in writing, to the Board and without the Board's prior approval. Such must be provided at no additional cost to the Board beyond the annual base cost for maintenance and support.

### **5.3.3 Customization of the System**

- 5.3.3.1** All customization of software required to meet the requirements of the Solicitation and the Board, and to achieve Acceptance, shall be included in the Base Bid.
- 5.3.3.2** Any defects/errors discovered (post-acceptance) in the system that relate to requirements/specifications in the original Solicitation must be cured by the Vender, and any work performed by the Vendor related thereto shall not be considered new customizations such that the defects shall be cured by the Vendor at no additional cost to the Board beyond the annual base cost for maintenance and support. Defects/errors include functions/capabilities/specifications that were included in the original Solicitation specifications but are not working properly, are non-compliant or were omitted from the system.
- 5.3.3.3** Each year of subsequent support shall include (up to) at least five (5) hours of development hours from the Vendor to be used by the Board for making new customizations to the system (including, but not limited to, adding a new type of license, etc.), at no additional cost to the Board beyond the annual base cost of maintenance and support.
- 5.3.3.4** Should a (post-Acceptance) customization require hours from the Vendor in addition to the five provided each year, the Vendor shall be required to create a scope of work and a signed, dated quote for the actual cost of the work (with hours billed per the Unit Price – Item #9 on the Pricing Page provided in wvOASIS and Section 6.2.9 below, and noting that the contractually provided five hours are first used), to be processed as a Change Order request for increasing the Contract amount. Note: only upon approval by the State Purchasing Division and the WV Attorney General’s Office (as to form only) shall any work be undertaken on such customization request. This “Scope of Work” should also include a timeline for deliverables, and notifications of any potential downtime (including estimated dates and times of occurrence and duration) required for its implementation. After the change order is processed and Vendor commences work on new

customizations, Vendor shall submit itemized invoices to the Board with sufficient descriptions of the work performed.

- 5.3.3.5** All (post-Acceptance) customization requiring hours from the Vendor shall include an installation, testing and post-installation defect correction. Any defects/errors discovered to any new customizations after implementation must be cured by the Vendor at no additional cost to the Board. Defects/errors include functions/capabilities/specifications arising from or related to the new customizations but are not working properly, are non-compliant or were omitted.
- 5.3.3.6** No (post-Acceptance) customization will result in a change of the cost of basic support, maintenance or hosting as provided in the original Contract or any subsequent years.

#### **5.3.4 Hosting Services**

- 5.3.4.1** The Vendor shall install and maintain the system on their own server.
- 5.3.4.2** The Vendor should provide continuous access to the system. However, it is understood that the system may require expected outages for maintenance. Vendor shall perform all planned system outages during off-peak hours (between 12:00 am and 6 am EST) and shall notify Board in writing (email suffices) prior to any such outage, providing the estimated date and time of the outage and a brief explanation of the cause of the outage.
- 5.3.4.3** In the event of an unplanned outage, the Vendor shall notify the Board (in writing, email suffices) within one hour after the outage, and shall provide the time of the beginning of the outage and the estimated time for when the outage will end.
- 5.3.4.4** The Vendor shall have and provide as part of this Contract a disaster recovery plan which Vendor shall have in place for insuring remote backup of the Board's data. Vendor shall work with the Board staff to develop a secondary backup system on the agency's existing equipment.

- 5.3.5** Vendor should provide with their bid a copy of any and all Software Terms and Conditions or licenses that the State of West Virginia or the Agency will have to agree to or accept as part of this solicitation. **This information will be required before Purchase Order is issued.**

Vendor should include a copy of any Maintenance Terms and Conditions or Licenses that the State of West Virginia of the Agency will be required to agree to and accept as a part of this solicitation. **This information will be required before Purchase Order is issued.**

- 5.3.6** Ninety (90) calendar days before the Contract expiration and/or termination, or as soon as practicable thereafter, the Vendor shall work jointly with the Board and any subsequent Vendor during the conversion and new system startup, to ensure a smooth transition and changeover, prior to releasing the Vendor's Performance Bond.

**5.3.7 At the close of the Contract, the Board shall retain control of any intellectual property that is developed for the Board and essential to on-going operations.** During the Contract period, and any renewal periods the Board shall be licensed to use, for its own purposes, the intellectual property furnished for use with the System, including software, communications protocols, processes and procedures.

#### **Installation & Implementation**

Albertson Consulting Inc. will meet with the board and staff upon award of contract. Vendor & Board staff will determine roles in relation to board liaison and establish milestones for system enhancements and implementation schedule to meet the boards 180 calendar day implementation timeline. This time line will be streamlined because Big Picture already has the data migration completed and all application and renewal forms built and functioning. Meeting will cover a gap plan to address all available system updates, changes, customizations or implementation requests listed above in scope in this RFQ.

After scope of work has been established there will be a schedule provided within (10) calendar days of award. Schedule will contain all phases of deployment & implementation of software, meetings and discuss website integration and any issues (if any) that may occur during the transition to the new system.

Board will use Albertson Consulting Inc., proven gap planning process. A plan will be developed with the board and to address the necessary changes required by this RFQ

### **Documentation**

Instructional manuals will be provided for the board and staff for internal reference and training purposes. The manual will be in an electronic format and may be reproduced by the board for internal purposes.

### **Training**

Training will be conducted for all staff members currently (5) and Board's IT staff on the new software/database system. Method of training meaning either on-site or via webcasts will be determined at kick-off meeting. Training will be specific for each job role within your organization. On-going training of board staff will be conducted as new staff is added. On-going training of board staff will be conducted as new staff is added.

### **Staff Training**

The expectation is that the majority of training and documentation will be completed prior to production go-live. After production go-live, there should be a support resource available to answer questions on the use of the system (or troubleshooting issues) on an as needed basis. Big Picture will provide training and guidance to designated client staff prior to beginning UAT to teach them how to test the system. Big Picture will dedicate ample resources to resolving any identified issues quickly.

Big Picture will facilitate a series of web-based software demonstrations for the purpose of introducing the board's project team members to the core functionality and features of the Big Picture licensing software and database. For many of the project team members, this will be their first exposure to the Big Picture Licensing software. These demonstrations will provide an initial overview of the features and functions of the new software and will serve as a basis of on-going software training and knowledge transfer that will increase in frequency and complexity as the project progresses through the subsequent design, configuration and deployment phases. The web-based software demonstrations will be facilitated multiple times over on a weekly basis or more if needed to accommodate project team member schedules.

### **User Manuals**

Instructional manuals for both system and user will be provided for the Board and staff for internal reference and training purposes. The manual will be in an electronic format and may be reproduced by the Board for internal purposes

### **System Testing**

The goal of System Acceptance Testing is to ensure that the software is functioning properly and meets the requirements within the RFQ & scope of work prepared prior to implementation. During the testing board staff will be able use the new system for their applied job roles to ensure that system meets the board's business requirements.

### **Support/Maintenance**

Upon completion of implementation and the software has successfully been deployed, the board will receive ongoing support & maintenance for the life of the contract. An allotted number of support hours will be included within the Annual Support & Maintenance agreement. Board may elect to increase the number of hours of support at any time during the contract term. Our goal is to keep our customers satisfied while provided a world class level of support. It is required that a support/maintenance agreement be paid to utilize the software.

### **Customer Support/Help Desk**

Albertson Consulting Inc., will provided 24/7 support for the **board staff, board members & IT staff members**. A dedicated Project Manager & Customer Service Representative will be assigned to assist with initial implementation and ongoing support. Supported users will be listed in the Big Picture administrative site under the security panel. Desktop support via desktop sharing technology will also be available as a method if required to resolve technical issues or end user support.

### **Board Staff Response Time**

As with every deployment and implementation we understand that the board's staff may have other priorities that arise during the project implementation which may cause delays in receiving response or required information needed for the project team on our side. We will work with the board staff to ensure that both the board and our project team have agreed upon reasonable response times for requested information etc.

### **Board Staff Inquiries**

The board staff will have access to the project team and key individuals working with the project staff. Both email and phone communication will be utilized for support issue and problem resolution related to the project. Urgent items are addressed the same day. Non-urgent items are addressed within 24 hours.

### **Technical & Customer Support**

Our technical and customer support is offered through our office in Minot, North Dakota. Standard technical support is available Monday-Friday from 8:00 AM-5:00 PM. Standard support typically encompasses any type of training, deployment efforts, development, enhancements support, testing, and project management efforts to access these resources during normal business hours.

A dedicated Project Manager & Customer Service Representative will be assigned to assist with initial implementation and ongoing support. Desktop support will also be available as a method if required to resolve technical issues or end user support

Standard response callback time is within 24 hours or one business day. Depending on the type of task requested for support times to complete will vary depending upon complexity of the problem. The preferred method of contact would be through our Task Management System. Escalation process will be discussed and finalized during kick-off meeting.

Typically these requests are confirmed in one business day. Standard support will also be providing strategic support and any other necessary services. Below would be a typical support level offering.

We will supply the end user and administrative user along with online manuals that can be used to train future staff. All future training outside of the original scope of work can be directly addressed under the agency's maintenance agreement.

#### **Hours of Support**

Phone, email, and online support is offered M-F between 8:00 am to 5:00 pm (CST), excluding recognized holidays.

On-site support can be requested and scheduled at customer's request if necessary at additional cost. Time and material will be billed to customer.

#### **Software Updates**

In either type of deployment hosted or deployed state side our project managers will work with your IT people to understand what updates are available and how to best apply them to your system. Then our support staff will perform the updates according to your schedules.

Software updates are included in the annual support and maintenance agreement. Software updates are installed by our support technicians as part of our annual support agreement. Typically we demonstrate the available upgrades annually or semi-annually and then you pick which upgrades you would like and we install the

#### **Configuring & Custom Development**

One feature that sets Big Picture Software apart from other software vendors is the configurability of our software. Most if not all business process can be configured to meet the board's specific requirements, without affecting the base code of the software. All Big Picture Software modifications/configurations are managed through the Administrative Portal. Administrators can setup and maintain a number of custom enhancements to their system. If additional enhancements are necessary the system is capable of being extended per your board's needs.

#### **Ongoing Support**

Big Picture™ Software realizes that the board will require ongoing support after the initial implementation. We realize that all post implementation support plans require different levels of

support based on the boards ongoing needs. With Big Picture we will establish an annual support plan tailored to agency's ongoing requirements.

**Free Hosting**

Big Picture Software will host your solution on our servers or no additional charge. Big Picture's annual support/maintenance plan includes hosting your software application and database in our world class hosting facility. We have a 99.9% uptime so you can be confident that Big Picture Software is online and ready to assist your agency 24 hours a day, 7 days a week, and 365 days a year.

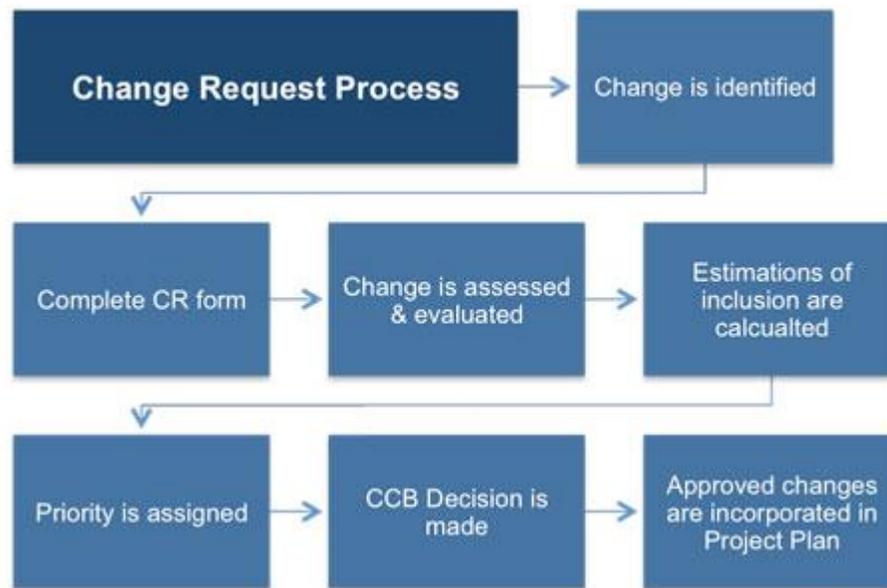

Our servers are housed in a carrier class data center, where security is of the utmost importance, authorized-only access to the hardware and software is required. Because of security concerns, Big Picture Software will provide our Disaster Recovery Plan, Back-up Strategy, and Security Statement with the Board and Office of Technology upon awarded contract. At the present time Big Picture Software is hosting three other West Virginia regulatory boards.

**In-House-Task Management System**

The board will utilize our in-house task management system that has been utilized for 15 years. It will serve as the main project management, enhancement management and support management for the lifetime of the project. This website primarily will serve as a central repository of all project communication and document storage. It will also include an outstanding list of tasks and issues that can be utilized for support purposes.

**Change Order Request Process**

As with most all projects change requests are most likely going to be required during implementation and post implementation of the new system. Big Picture Software will work with the board to process, plan, coordinate, implement and monitor the change order requests to ensure changes are made with minimum disruptions to the board and licensees. Monitoring risk and associated risks that may adversely affect the change order request are also part of what Big Picture Software will assist the board with to provide efficient and prompt handling of all change order requests.

A change request is considered to be any modification to a previously accepted deliverable that impacts the original scope of work and originating contract based on requirements within the RFP. If scope changes are not monitored and controlled during the implementation phases the project may experience budget overruns and delays to the original proposed schedule. It is extremely important for the both the board and Big Picture Software to adhere to the change order request process defined within the RFP. The project manager will submit a change order cost estimate to the board that will include the number of hours estimated to complete the change request and estimated cost.

All change requests are submitted to the project manager who will then evaluate the requested scope change. Project manager will provide the board with an estimate for the change order request that will include total estimated hours of project and estimated cost. All change order request outside of the original scope of work will be charged an hourly support rate of \$130.00/Hr. Upon acceptance of proper documentation and impact assessment (cost and time) the project manager will submit the scope change request to the board for approval. Upon approval of scope changes by the board's project manager will update all relevant project documents and communicate the change request with all project team members.

**Change Order and Task Process Lifecycle**

- Project manager assembles change order request documentation.
- Task is entered into “task tracking system”.
- Timeline established for completion of project.
- Development Resource (DR) is assigned.
- Development on project is started.
- Development completed
- Quality & Assurance Testing
- Client Testing
- Internal/Client testing cycle completed
- Customer acceptance of deliverable
- Task completed & closed out

**RE: Big Picture Software**

The North Dakota State Board of Pharmacy has utilized "Big Picture Software" since it was Albertson Consulting well over a decade ago.

Our data base and online renewal process is reported to be user friendly and efficient. The modifications we have requested have been quickly implemented by the Big Picture team and to our satisfaction. Their track record of being quality work for us is very strong. When an issue does arise, they have a very knowledgeable and talented team to deal with them quickly to the best resolutions.

Over the years, the Board of Pharmacy has used Albertson's to institute several innovative projects such as our "Drug Repository" program, the integration of data with the Prescription Drug Monitoring Program [PDMP], Immunization Authorizations, Naloxone prescribing, among others. Again, their track record has illustrated to us that their ability to modify products to meet the demand of their customers.

We have looked at other vendors but have found Albertson's to be a great fit and a cost effective approach to maintaining our database and website processes. They have great customer service and a platform which can be modified to the demands of the user.

I would strongly recommend Albertson's Big Picture Software to any licensing Board and would be happy to discuss our experiences with anyone that contacts me.

Sincerely,

A handwritten signature in blue ink, appearing to read "Mark J. Hardy".

Dan Albertson, CEO  
Albertson Consulting, Inc.  
21 Main St S. Suite 201  
Minot, ND 58701

The West Virginia Board of Osteopathic Medicine was the very first licensing board in West Virginia to purchase and implement Big Picture Software in 2013. Since that time several other licensing boards in West Virginia have purchased the system. That tells the story of Big Picture's success.

The system can be used by any licensing board and is flexible enough to meet the individual needs of each board. Since our implementation in the spring of 2013, we have had reductions in paper files and time tracking down information. In using the Disciplinary Functions of the system we have become much more efficient in processing complaints and meeting the regulatory timelines.

We have received numerous comments from our licensees, attorneys, hospitals, residency programs, and other constituents with the ease of obtaining information from our website and the timely reporting of any changes made directly within our database onto the website.

We are still learning ways to utilize the system and look forward to many more years of working with Albertson Consulting, Inc. in the endeavor of improving quality and timeliness of data thus increasing our effectiveness to secure the public safety.

Sincerely,

A handwritten signature in blue ink that reads "Diana Shepard, CMBE".

RE: Licensing software

Greetings:

Following an RFP issued by the North Dakota Procurement Office for licensing software, including a new database, website, online licensing and renewal, and management of investigative and disciplinary functions of the board, in 2012 we selected Albertson Consulting over numerous proposals that included most nationally recognized licensing software products.

At the time, we were impressed with the ability of Big Picture to build a product that more closely fit our needs out of the box, and the greater ability we would have to make changes internally, without needing additional support or purchased changes. We also appreciated their cost, which was lower than the other firms we chose to interview.

We began a process of completely reviewing our business practices in conjunction with our project manager from Big Picture, and the result was a product that not only met our functional requirements from the beginning, but improved our practices and made them considerably more efficient.

It has almost become expected and acceptable, in some government circles, for software projects to come in greatly over-budget and only after long delays. That was not true here.

Since we put the Big Picture product in place, we have expanded it to new licensing groups and added other features, including the integration of a cloud-based product that serves as our method of securely getting confidential meeting materials to our board, allows members to annotate the documents and obtain further information from staff. Our meeting preparation is noticeably improved.

My appreciation of the services and support we receive from BP has grown over time. It is noteworthy that although Albertson Consulting has grown in the past five years, we have the same project manager we started with. I dare say she knows our business as well as, and in some cases, better than, staff. This continuity is invaluable.

I'd be glad to answer any specific questions prospective users of Big Picture might have, and give Big Picture my strongest recommendation.

Sincerely,

A handwritten signature in blue ink that reads "Duane Houdek".

Duane Houdek  
Executive Secretary

#### Mission Statement

The Board's mission is to protect the public's health, safety and welfare by regulating the practice of medicine, thereby ensuring quality health care for the citizens of this state.

## Appendix C – Software Support Contract

Sample

## Big Picture™ Software Support Contract

## Terms

Albertson Consulting, Inc. agrees to license one copy of the Big Picture™ Licensee Management and renewal software for use by **West Virginia Board of Medicine**. Albertson Consulting retains the rights to the software as outline in the “Official Client Agreement” attached below. Client may not resell or give the software to any other entity. Client retains ownership of all data, site content, artwork, and design related to the project.

Expected project billing is as follows:

All support beyond monthly contract will be billed monthly per pre-approved estimates.

Additional development services will be provided for items beyond the scope of the project. These services will be billed hourly to the customer at \$150.00 / hour.

## Future Large Scale Projects

Projects considered out-of-scope, those projects not specifically detailed anywhere in this proposal, or projects much larger than Client feels comfortable doing on an hourly basis and outside of normal application support will require a formal proposal from ACI detailing requirements and resources. An example of this would be if Client decides to change accounting software.

Annual Software Licensing price of \$ (TBD) on this day of ( ), 2017). These fees cover the Hosting fees, maintenance fees, licensing fees for the software and up to 5 hours of enhancements, support, maintenance or customizations for the entire system. The Annual Software Annual Software Licensing price will remain the same through ( ,2022) after that base prices may change.

This contract does not expire. Terms are laid out through ( ,2017). At which time a renegotiation / reevaluation is to take place to ensure that both parties are satisfied and terms are satisfactory for both parties.

Existing web application, hosting fees, and internal email addresses are included in the aforementioned monthly fees.

Client Initials \_\_\_\_\_

Albertson Consulting Initials \_\_\_\_\_

This page intentionally left blank.

## Official Client Agreement

This Agreement sets forth the terms and conditions, which apply to the use by Client of Albertson Consulting for product or service offered by Albertson Consulting, Inc. The right to use Albertson Consulting and any other product or service offered by Albertson Consulting, Inc. is personal to Client and is not transferable to any other person or entity.

### **1. DEFINITIONS**

“Albertson Consulting Inc.” (herein referred to as “Albertson Consulting”) is a Software engineering and hosting company offering business process automation and World Wide Web page design and hosting service operated by Albertson Consulting, Inc. consisting of content provided by customers/clients of Albertson Consulting, Inc., affiliates of Albertson Consulting, Inc., and third parties.

“Client” is the individual or organization entering into contract with Albertson Consulting, Inc.

“Content” means all text, pictures, logos, graphics, sound, video and any other data supplied by Client.

“Software Applications” includes any proprietary programs, scripts, and functions created by Albertson Consulting for use on Client’s web site, which include source code in any form that is not publicly viewable.

“Code” means any programming source code written or developed by Albertson Consulting required to, when properly loaded onto a World Wide Web Server, cause “Content” to be displayed on the World Wide Web or to facilitate the display of “Content” using a World Wide Web Server.

“Hosting” means the display of “Content” on the World Wide Web using Web Servers operated by Albertson Consulting, Inc.

c “Support Contract” is a purchased product that provides phone support, bug fixes, and programming and research time. Terms and coverage depend on support contact level purchased.

## **2. CLIENT CONDUCT**

Albertson Consulting shall be used for lawful purposes only. No material shall be posted on or transmitted through the pages/services which violate or infringe in any way upon the rights of others, which is unlawful, threatening, abusive, defamatory, invasive of privacy or publicity rights, vulgar, obscene, profane, indecent or otherwise objectionable, which encourages conduct that would constitute a criminal offense, gives rise to civil liability or otherwise violates any law. No conduct shall be undertaken that, in Albertson Consulting judgment restricts or inhibits any other user from using or enjoying the pages. Albertson Consulting shall not be used to solicit other Online Service users to become users of competitive online information services. Advertising or commercial solicitation may be posted on or transmitted through the pages subject to Albertson Consulting express prior approval and solely in accordance with the terms and conditions imposed by Albertson Consulting with respect thereto.

The Albertson Consulting software and its customer’s sites (hosted by Albertson Consulting ) contain copyrighted material, trademarks and other proprietary information including, but not limited to, text, software, photos, video, graphics, music and sound, that are copyrighted under the United States copyright laws. Albertson Consulting owns a copyright in the selection, coordination, arrangement and enhancement of such content, as well as in the content original to it. Each third party content provider owns the copyright in content original to it.

No material protected by copyright, trademark or other proprietary right shall be uploaded, posted or otherwise made available on Albertson Consulting’s server without the express permission of the owner of the copyright, trademark or other proprietary right and the burden of determining that any material is not protected by copyright rests with Client.

Each Client shall provide Albertson Consulting with accurate, complete and updated information as to his or her name, address, phone number, and other contact information provided by the Client during use of Albertson Consulting as a design/hosting company. Failure to do so shall constitute a breach of this Agreement.

No Client may (i) select or use a name or e-mail address of another person with the intent to impersonate that person; (ii) use a name or e-mail address subject to the rights of any person other than Client without authorization; (iii) use a name in violation of the intellectual property rights of any person; or (iv) use a name that Albertson Consulting, in its sole discretion, deems offensive.

The foregoing provisions of this Section are for the benefit of Albertson Consulting, its affiliates, third party content providers and licensors, and each shall have the right to assert and enforce such provisions directly on its own behalf.

### **3. THIRD PARTY CONTENT**

Albertson Consulting is a distributor of content supplied by third parties and users of Albertson Consulting Sites. Any opinions, advice, statements, services, offers, or other information or content expressed or made available by third parties, including information providers, or Clients, are those of the respective author(s) or distributor(s) and not of Albertson Consulting. Neither Albertson Consulting nor any third party provider of information guarantees the accuracy, completeness, or usefulness of any content, nor its merchantability or fitness for any particular purpose. (Refer to Section 7 below for the complete provisions governing limitation of liabilities and disclaimers of warranty.) In many instances, the content available through the Online Services represents the opinions and judgments of the respective information provider, or Client of Albertson Consulting, and not the employees or agents of Albertson Consulting.

### **4. CONFIDENTIALITY**

Each party agrees not to disclose any confidential information received from the other in any form to any employees who do not have a specific need to use such information or to any outside party (including contractors) without the other party's prior written consent. All employees or contractors

who receive such confidential information must be bound by written agreement not to disclose such information to any other party. Each party acknowledges that the unauthorized disclosure or use of confidential information of the other party would cause irreparable harm and significant injury to the other party that may be difficult to compensate. Accordingly, each party agrees that the other party will have the right to seek and obtain temporary and permanent injunctive relief in addition to any other rights and remedies it may have. The obligations of confidentiality shall not apply to information which 1) is in public domain at the time of disclosure, 2) has been released by the other party without restrictions, 3) has been lawfully obtained by the disclosing party from a third party under no obligation of confidentiality, or 4) is independently developed by employees of the disclosing party without access to the confidential information.

## **5. LIMITED LICENSE**

Albertson Consulting retains ownership of Code and grants Client a non-exclusive and non-transferable right to use Code for the express use of displaying Content on the World Wide Web.

Albertson Consulting retains the following rights as it pertains to software ownership:

Albertson Consulting Inc. retains the right to resell any licensed or custom built piece of software to any other paying customer in any format without restriction.

All externally accessible interfaces are not limited in number of users, usage or any other fashion as it pertain usability.

Custom built interfaces to other data sources are not limited in number of users, usage or any other fashion as it pertain usability.

## **6. DISCLAIMER OF WARRANTEE; LIMITATION OF LIABILITY**

EACH CLIENT EXPRESSLY AGREES THAT USE OF ALBERTSON CONSULTING 'S SERVICES ARE AT HIS OR HER SOLE RISK. NEITHER ALBERTSON CONSULTING, ITS AFFILIATES NOR ANY OF THEIR RESPECTIVE EMPLOYEES, AGENTS, THIRD PARTY CONTENT PROVIDERS OR LICENSORS WARRANT THAT ALBERTSON CONSULTING WILL BE UNINTERRUPTED OR ERROR FREE; NOR DO THEY MAKE ANY WARRANTY AS TO THE RESULTS THAT MAY BE OBTAINED FROM USE OF THE ONLINE SERVICES OR AS TO THE ACCURACY, RELIABILITY OR CONTENT OF ANY INFORMATION, SERVICE, OR MERCHANDISE PROVIDED THROUGH ALBERTSON CONSULTING.

ALBERTSON CONSULTING 'S WEB PAGES ARE PROVIDED ON AN "AS IS" BASIS WITHOUT WARRANTIES OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTIES OF TITLE OR IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, OTHER THAN THOSE WARRANTIES WHICH ARE IMPLIED BY AND INCAPABLE OF EXCLUSION, RESTRICTION OR MODIFICATION UNDER THE LAWS APPLICABLE TO THIS AGREEMENT.

THE DISCLAIMERS OF LIABILITY CONTAINED IN THIS SECTION APPLY TO ANY DAMAGES OR INJURY CAUSED BY ANY FAILURE OF PERFORMANCE, ERROR, OMISSION, INTERRUPTION, DELETION, DEFECT, DELAY IN OPERATION OR TRANSMISSION, COMPUTER VIRUS, COMMUNICATION LINE FAILURE, THEFT OR DESTRUCTION OR UNAUTHORIZED ACCESS TO, ALTERATION OF, OR USE OF RECORD, WHETHER FOR BREACH OF CONTRACT, TORTIOUS BEHAVIOR, NEGLIGENCE, OR UNDER ANY OTHER CAUSE OF ACTION. EACH CLIENT SPECIFICALLY ACKNOWLEDGES THAT ALBERTSON CONSULTING IS NOT LIABLE FOR THE

DEFAMATORY, OFFENSIVE OR ILLEGAL CONDUCT OF OTHER THIRD PARTIES, OR CLIENTS AND THAT THE RISK OF INJURY FROM THE FOREGOING RESTS ENTIRELY WITH EACH CLIENT.

IN NO EVENT WILL ALBERTSON CONSULTING OR ANY PERSON OR ENTITY INVOLVED IN CREATING, PRODUCING OR DISTRIBUTING ALBERTSON CONSULTING CONTENT BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OF OR INABILITY TO USE ALBERTSON CONSULTING OR OUT OF THE BREACH OF ANY WARRANTY. EACH CLIENT HEREBY ACKNOWLEDGES THAT THE PROVISIONS OF THIS SECTION SHALL APPLY TO ALL CONTENT ON ALBERTSON CONSULTING 'S SERVER.

ALBERTSON CONSULTING DOES NOT ENDORSE, WARRANT OR GUARANTEE ANY PRODUCT OR SERVICE OFFERED BY A THIRD PARTY THROUGH ALBERTSON CONSULTING 'S WEB PAGES AND WILL NOT BE A PARTY TO OR IN ANY WAY MONITOR ANY TRANSACTION BETWEEN CLIENT, AND THIRD PARTY PROVIDERS OF PRODUCTS OR SERVICES. AS WITH THE PURCHASE OF A PRODUCT OR SERVICE THROUGH ANY MEDIUM OR IN ANY ENVIRONMENT, EACH CLIENT SHOULD USE HIS OR HER BEST JUDGMENT AND EXERCISE CAUTION WHERE APPROPRIATE.

EACH CLIENT SPECIFICALLY ACKNOWLEDGES THAT IN NO EVENT WILL ALBERTSON CONSULTING , ITS AFFILIATES NOR ANY OF THEIR RESPECTIVE EMPLOYEES OR AGENTS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF (i) THE USE BY SUCH CLIENT OF ANY BROWSER OWNED OR OPERATED BY ANY PARTY AND/OR (ii) THE DOWNLOADING OF ANY SOFTWARE OWNED OR OPERATED BY ANY THIRD PARTY, INCLUDING BUT NOT LIMITED TO ALBERTSON CONSULTING PAGE CREATIONS, INC. (OR ANY SUCCESSOR PRODUCT) IN CONNECTION WITH THE SERVICE.

## **7. MONITORING**

Albertson Consulting shall have the right, but not the obligation, to monitor the content of Albertson Consulting server to determine compliance with this Agreement and any other operating rules established by Albertson Consulting. Albertson Consulting shall have the right in its sole discretion to edit, refuse to post or remove any material submitted to or posted on Albertson Consulting server. Without limiting the foregoing, Albertson Consulting shall have the right to remove any material that Albertson Consulting , using reasonable judgment, finds to be in violation of the provisions hereof,

otherwise objectionable or stale. Notwithstanding this right of Albertson Consulting, Clients shall remain solely responsible for the content of their pages. Each Client acknowledges and agrees that neither Albertson Consulting nor any third party content provider shall assume or have any liability for any action or inaction by Albertson Consulting or any third party content provider with respect to any conduct, communication or posting on Albertson Consulting server.

## 8. TERMINATION

Either Albertson Consulting or Client may terminate this Agreement upon terms being satisfied. Client's only right with respect to any dissatisfaction with (i) any terms and conditions of this Agreement, or any policy or practice of Albertson Consulting in operating Albertson Consulting, (ii) content available through Albertson Consulting or any change therein, or (iii) amount or type of fees or billing methods, or any change thereof, is to provide written notice to Albertson Consulting, 21 South Main Street, Minot, North Dakota 58701, or e-mail sent to *admin@BigPicture.com*. Client's notice will be effective upon receipt by Albertson Consulting. Without limiting the foregoing, Albertson Consulting shall have the right to immediately terminate this Agreement with respect to any Client in the event of any conduct by Client which Albertson Consulting, using reasonable judgment, considers to be unacceptable, or in the event of any breach by Client of this Agreement. The provisions of Sections 1, 3, 4, 5, 6, 7, 8, 9, 10, 11, and shall survive termination of this Agreement.

Either party may terminate this agreement upon a breach of the other party. All content and data will be returned to client in its original form. Fees already remitted to Albertson Consulting are non-transferable and non-refundable. Fees may also be charged by Albertson to format the data to a client's satisfaction or distribution of data for use by another vendor.

At termination of this agreement data, graphics, artwork and content will be transferred to Client for use expressed in Section 5 of this agreement.

## 9. FORCE MAJEURE

Definition: "Force Majeure" shall mean any event or condition not reasonably within the control of either party, which prevents in whole or in material part the performance by one of the parties of its

obligations hereunder or which renders the performance of such obligations so difficult or costly as to make such performance commercially unreasonable.

Notice: Upon giving notice to the other party, a party affected by an event of Force Majeure shall be released without any liability on its part from the performance of its obligations under this Agreement, except for the obligation to pay any amounts due and owing hereunder. The suspension of obligation to fulfill the agreement shall be enforced only to the extent and only for the period that its performance of such obligations is prevented by the event of Force Majeure. The other party may likewise suspend the performance of all or part of its obligations hereunder to the extent that such suspension is commercially reasonable.

#### **10. TRADEMARKS**

Albertson Consulting Inc. and their logos are registered trademarks or service marks of Albertson Consulting, Inc. All rights reserved. All other trademarks appearing on Albertson Consulting Server are the property of their respective owners, including, in some instances, Albertson Consulting, Inc.

#### **11. EXTERNAL LINKS**

Albertson Consulting server contains links to other web sites, resources and advertisers. Albertson Consulting is not responsible for the availability of these external sites nor does it endorse or is it responsible for any of the contents, advertising, products or other materials on such external sites. Under no circumstances shall Albertson Consulting be held responsible or liable, directly or indirectly, for any loss or damage caused or alleged to have been caused in connection with the use of or reliance on any content, goods or services available on such external site. Any concerns regarding any external link should be directed to its respective site administrator or Webmaster.

#### **12. EQUIPMENT**

Each Client shall be responsible for obtaining and maintaining all telephone, computer hardware, and other equipment needed for Client's access to and use of Albertson Consulting server, and Client shall be responsible for all charges related thereto.

**13. PRIVACY**

Personal data provided by each Client to Albertson Consulting will be used only in connection with Albertson Consulting and will not be given to others. While Albertson Consulting will seek to require third party content providers and other parties to adhere to Albertson Consulting privacy policies, Albertson Consulting does not bear any responsibility for any actions or policies of such third parties.

**14. PAYMENT**

Albertson Consulting invoices all fees monthly for work completed on Client's web site and any other work that has been finished prior to the invoice date. Failure to remit payment within 30 days without consent or justification may result in a "shut-down" of the application until payment has been received. All pricing and other terms will be address in a separate addendum.

**15. MISCELLANEOUS**

This Agreement and any operating rules for Albertson Consulting established by Albertson Consulting constitute the entire agreement of the parties with respect to the subject matter hereof, and supersede all previous written or oral agreements between the parties with respect to such subject matter. This Agreement shall be construed in accordance with the laws of the State of North Dakota, without regard to its conflict of laws outside of North Dakota. No waiver by either party of any breach or default hereunder shall be deemed to be a waiver of any preceding or subsequent breach or default. Content contained on Client's web site that is publicly available will remain property of said Client. All other publishing material including layout materials used in the design of Client's web site will remain the intellectual property of Albertson Consulting, Inc. Software applications developed for use on Client's web site remain the intellectual property of Albertson Consulting, Inc.

Severability: If any provision of the Agreement is held to be invalid, illegal, or unenforceable, such provision shall be considered severable from this Agreement and the remaining provisions shall continue in full force and effect. The parties will replace a severed provision by a provision that is closest to the intent of the parties.

See attached document(s) for additional Terms and Conditions

**SOLICITATION NUMBER:** CRFQ BOM1900000005

**Addendum Number:** No.01

---

The purpose of this addendum is to modify the solicitation identified as (“Solicitation”) to reflect the change(s) identified and described below.

**Applicable Addendum Category:**

- Modify bid opening date and time
- Modify specifications of product or service being sought
- Attachment of vendor questions and responses
- Attachment of pre-bid sign-in sheet
- Correction of error
- Other

**Description of Modification to Solicitation:**

Addendum issued to publish and distribute the attached documentation to the vendor community.

1. The purpose of this addendum is to address all technical questions received and extend the bid opening date.

No additional changes.

**Additional Documentation:** Documentation related to this Addendum (if any) has been included herewith as Attachment A and is specifically incorporated herein by reference.

**Terms and Conditions:**

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.
2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

# ATTACHMENT A

**Technical Questions**  
**CRFQ BOM1900000005**

1. Pages 8-9 of RFQ, section 6. Bid Submission. Can the State confirm that submissions can be made either online via wvOASIS OR by printed, hand delivery?

*Yes. The West Virginia Purchasing Division will accept bids in the following manner. Postal Service, Courier, submitted within OASIS. Vendors are reminded that bids must be received and time stamped at the Purchasing Division before official bid opening date and time.*

2. The RFQ specifies the work to be completed within 180 days of contract execution. Can the State provide an estimated Contract execution date and/or desired Go-Live (completion) date for the new system?

*Upon the Vendor's receipt of the Notice to Proceed from the Agency, the contract for the implementation/installation phase becomes effective, and the Vendor then has 180 calendar days to complete the implementation/installation portion of the contract and obtain Acceptance by the Agency. The Agency desires the new system to "Go-Live" in September/October 2019.*

3. Page 15, Performance Bond. Please confirm what the 100% value is based upon (implementation and all years' maintenance and support, or?)? Can a vendor take exception to the 100% performance bond and, if so, how would the vendor indicate within their proposal? And, would the State reject the proposal if the vendor takes exception to the Performance Bond?

*The Performance Bond is being removed per the request of the Agency.*

4. Page 28 indicates the current system is provided by Big Picture software that was just installed less than 4 years ago, which seems somewhat short amount of time for the Board to be seeking a new system. Can the State elaborate upon why they are seeking a new system, including what factors are driving this effort?

*The Agency's contract with its current vendor is expiring and the Agency is seeking a more comprehensive database system with additional specifications.*

5. What has the Board spent on the implementation, annual support and enhancement changes orders for the current system from Big Picture?

*Initial Implementation/User licenses: \$55,000*

*Annual Support/Maintenance:*

*Year 1: \$15,000*

*Year 2: \$15,000*

*Year 3: \$15,000*

*Year 4: \$15,000*

***Enhancement Change Orders:***

*\$20,000*

*\$23,900*

6. Section 6. Contract Award specifies that “The Contract will be awarded to the Vendor ... for the lowest overall Total Bid Amount...” Can the State confirm this and/or if any other factors or value-adds being considered?

***The Contract will be awarded to the qualified Vendor whose bid satisfies the required specifications for the lowest overall total bid amount as referenced upon the Exhibit “A” Pricing Sheet that is a part of the solicitation.***

7. It would seem the current vendor would be given a pricing advantage when considering existing system being already implemented, user licenses already issued, etc. under their current contract. Is that correct? Please elaborate upon this, confirm if current vendor is/can re-bid project, and how these items will be fairly evaluated between vendors.

***The current vendor is permitted to submit a bid. The Agency must accept the lowest bid from any qualified vendor that meets all required specifications. The Agency cannot speculate on whether the current vendor will have a pricing advantage due to already hosting the current database, as the specifications in the current CRFQ are more comprehensive than the current database.***

8. For vendors that offer different costing options, would the State accept descriptions and Pricing Pages reflecting different implementation costing models and prices, or would completely separate bids need to be submitted by the same vendor?

***A Vendor may submit different costing options as separate bids, but the lowest overall bid that meets all the mandatory specifications as advertised will be awarded the contract.***

***Vendors must submit descriptions, explanations and/or provide examples of how their product meets the required specifications. Failure to provide sufficient information for the Agency to evaluate whether all required specifications are met may result in bid disqualification.***

9. What funding does the Board have to put towards the initial system implementation? And what, if any, amount of these funds may be subject to expiration and by what date(s)? What has the Board budgeted for ongoing system maintenance, hosting and support beyond the 180-day implementation project?

***The Agency cannot disclose this information.***

**ADDENDUM ACKNOWLEDGEMENT FORM**  
**SOLICITATION NO.:** \_\_\_\_\_

**Instructions:** Please acknowledge receipt of all addenda issued with this solicitation by completing this addendum acknowledgment form. Check the box next to each addendum received and sign below. Failure to acknowledge addenda may result in bid disqualification.

**Acknowledgment:** I hereby acknowledge receipt of the following addenda and have made the necessary revisions to my proposal, plans and/or specification, etc.

**Addendum Numbers Received:**

(Check the box next to each addendum received)
