RE: Sealed Bid – Multi-Gas Monitors, Solicitation #HST2000000004

Dear Mrs. Smith

My name is Frank Foster and I am the US Manager of Safety Sales for Jennmar Frank Calandra Inc. Please allow me to say we at Jennmar, myself included, are unfamiliar with the WV State Online Bidding Forms process and we hope these bid forms have been completed properly. Jennmar is the exclusive distributor of the Draeger Gas Detection Products in the US Mining Industry. We are officially submitting this bid for an award consideration. If a line on the General Terms and Conditions forms isn't completed properly and it is a technical issue, we will be glad to correct it by coming to your office to make any revisions needed.

I ask to please not disqualify our bid if it is something other than the bid pricing that we can correct and remain ethical to the state's bidding process. I am choosing to submit hard copy forms for our bid and if I have done so in error, please make me aware so I can correct anything necessary to qualify for the bid.

On another note, if Jennmar is awarded the bid we will commit to and deliver the Draeger equipment to the Player's Drive office for inspection then take it to each of the respective field offices and setup and train all OMHS&T personnel. Also, if maintenance is required, we have 5 Draeger technicians in the state and most within a short drive of each of the offices. We keep a vast supply of accessories in inventory at our Reedsville Plant Warehouse near Morgantown, WV and each of the technicians keep spare parts and equipment on hand to use and change out and replace when needed. We have many Draeger Gas Detection units being used in the state as well many other states and not only in coal but also in Metal/Non-Metal and Tunneling industries.

We appreciate the opportunity to bid on the Multi-Gas Monitors for the Office of Miners' Health, Safety and Training. Thank you in advance for your consideration to my above comments.

Sincerely

Frank Foster

Introduction to Draeger Gas Detection Products.

The enclosed bid is for Draeger Gas Detection products. Jeninmar FCI is the exclusive distributor of Draeger Gas Detection products in the coal, Metal/Non-Metal and Tunneling Industries. These products all have good warranties with the monitors having a 3-year warranty on the monitor and sensors and 2 years additional warranty on the O2 and CO sensors which expands those warranties to 5 years. The accessories such as the X Dock calibration/bump machine, regulator and chargers all have a one-year warranty. Draeger designs and manufactures all the sensors that go into their monitors. This is one feature that sets Draeger apart from other gas detection brands as the other brands third party most of the sensors that go into their gas detection instruments. These monitors all are provided with a battery, charger and power supply and leather case. The monitors are IP 67 rated which means the monitor can withstand being under 3 feet of water for 30 minutes and is also dust proof. All these monitors are MSHA approved. These monitors do not require a "Daily Bump" test as many other brands do. A Draeger Letter is enclosed with this packet to verify the Daily Bump test is not required. Draeger products are known world wide for having good precise measurements performance and durability. Draeger is a 130 year German Company and specializes in gas detection for all industries, hospital and medical equipment, respiratory equipment and protection and fire fighting and mine rescue equipment. A gas detection brochure is attached with this packet. Please feel free to go to the Draeger Web site @ Draeger.com to see what products Draeger manufactures. All the products in the bid can be hand delivered to the Region Offices within 21 days of the bid award. When delivery is made the equipment will be set up and training will be conducted with all the necessary state personnel.

"State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open hearth, basic oxygen, electric furnace, Bessemer or other steel making process. The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:
- c. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or
- d. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

43. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL: In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a

“substantial labor surplus area”, as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products. This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

44. INTERESTED PARTY SUPPLEMENTAL DISCLOSURE: W. Va. Code § 6D-1-2 requires that for contracts with an actual or estimated value of at least \$1 million, the vendor must submit to the Agency a supplemental disclosure of interested parties reflecting any new or differing interested parties to the contract, which were not included in the original pre-award interested party disclosure, within 30 days following the completion or termination of the contract. A copy of that form is included with this solicitation or can be obtained from the WV Ethics Commission. This requirement does not apply to publicly traded companies listed on a national or international stock exchange. A more detailed definition of interested parties can be obtained from the form referenced above.

45. PROHIBITION AGAINST USED OR REFURBISHED: Unless expressly permitted in the solicitation published by the State, Vendor must provide new, unused commodities, and is prohibited from supplying used or refurbished commodities, in fulfilling its responsibilities under this Contract.

DESIGNATED CONTACT: Vendor appoints the individual identified in this Section as the Contract Administrator and the initial point of contact for matters relating to this Contract.

MSHA Specified Bump Testing

October 8, 2019

Dear Customer,

The language in the Draeger IFU regarding daily bump tests are a reflection of requirements outlined in CSA 22.2 No 152. The Draeger portable detectors maintain CSA and other approvals. For mining operations MSHA is the sole authority in the United States. The MSHA guidelines do NOT require daily bump testing of gases to maintain MSHA approval. Users are only required to follow the MSHA guidelines for calibration, testing and proper operation (see 30 CFR 75.320). Draeger recommends that each user check for any additional guidelines concerning proper usage with their local operational facility, municipality or authority having jurisdiction (AHJ).

Kind regards,

Ron Lacewell
