**6. 3.1.12.1** Shall have power shift design, power shuttle provides powershifting through the gears of each range and must have a transmission that can be shifted on the go within the speed gears.

**Question: Transmission** - The RFQ specifies that the state wants a Four (4) Wheel Drive Utility Tractor John Deere 5100M or Equal. We are requesting that the listed specification 3.1.12.1 be corrected to include a John Deere PowrReverser Transmission, which more accurately describes the current model year 2020 production of the John Deere 5100M Tractor. **Question # 5:** To ensure mower compatibility we are respectfully asking that the specification be changed to allow for 280/85R24 (11.2 x 24) R1W Radial front tires or a 320/85R24 (12.4R24) R1W front tire, whichever one is compatible with the boom mower.

**Question # 6:** To ensure mower compatibility we are respectfully asking that the specification be changed to allow for 420/85R30 (16.9 x 30) R1W Radial rear tires 460/85R30 (18.4 x 30) R1W radial rear tire, whichever one is compatible with the boom mower.

**Question # 8:** 3.1.19.1 – In a boom mowing application, slight variations in front tire diameter can drastically affect the turning radius of the boom mowing package. Can 320/85R24 tires be supplied on the front tires to optimize turning radius, tread wear, and stability.

**Answer: Will change 3.1.19.1 to read front tires shall be minimum 280/85R24 (11.2x24)R1W radial or equal.**

**11. 3.1.21.8** Seat shall have a height and swivel adjustment and be heated.

**Question:** Is seat swivel required?

**Answer: Yes. Leave as written.**

**12. 3.2.2.1** Frame shall be mid-mounted to underside of tractor utilizing a center weldment adequately bolted to the tractor and 3 ½-inch x 3 ½- inch x 1/8 inch- minimum dual rear axle braces for maximum stability and weight transfer.

**Question:** The dual axle braces for the Bengal 18' boom mower mounted on the John Deere 5100M are 3" x 3" x ¼". By using ½" smaller tubular steel and increasing the wall thickness from 1/8" to ¼" we obtain the required strength to support the main frame and the boom rest properly. A 3" x 3" x ¼" tube has a section modulus of 2.107 in<sup>3</sup>, which is greater than the section modulus of a 3-1/2" x 3-1/2" x 1/8" tube at 1.766 in<sup>3</sup>. Will the state change the specification to allow 3" x 3" x ¼" dual rear axle braces?

**Answer: Yes. Will accept.**

**13. 3.2.2.2** Unit shall be counterweighted to maintain the most possible ground pressure of tires on opposite side of mower during all reach out, up, and down operations of boom with specified head. Rear tire that holds counterweight shall be filled with beet juice, water or calcium filled will not be accepted.

**Question:** Will you accept windshield washer fluid to replace beet juice?

**Answer: No. Leave as written.**

**14. 3.2.4.2** An axle boom stow system constructed of minimum ¼-inch x 4-inch x 4-inch square tubing minimum with water drain holes and shall be mounted to the mower frame with frame member extending to the axle mounts. 3-point hitch system shall function normally.

**Question:** Due to the fact that the 5100M is a smaller framed tractor and the 18 ft. boom does not require a 4" x 4" x ¼" square tubing to adequately support the boom when in the stow position, Tiger uses a 3" x 3" x ¼" tubing, which will have sufficient support and structure for this shorter boom mower. Will the state change the specification to allow a 3" x 3" x ¼" 3OS design boom stow system?

**Answer: Yes. Will accept.**

**15. 3.2.5.1** Boom shall be minimum two (2) piece design, with all hinge points of the arm and mast shall have minimum 2-inch diameter steel pins with greaseable, replaceable steel bushings. Kingpost or Turret style mounting is acceptable.

**Question # 1:** The Bengal 18' boom mower Tiger offers a 2 ½" Vertical pin for the boom swivel bracket and has 1 ½" pins for the boom pivot points. Will the state change the specification to allow for 2 ½" vertical swivel bracket pin and 1 ½" steel boom pivot pin?

**Question # 2:** Please change the pin diameter to minimum 1 1/2 inch as we build our pins out of AISI 1045 steel with a Brinell Hardness ranging between 170 and 210 which is higher than conventional ASTM A36 carbon steel.

**Answer: Question #1. Will accept.**

**Question #2. Will accept.**

**16. 3.2.5.4** Dipper boom shall be made of 6-inch x 4-inch x 1/4-inch steel tubing minimum, with a 50,000 lb. per square inch minimum yield strength.

**Question:** Please include 5-inch x 5-inch x ¼-inch steel tubing as an alternate material. We construct our dipper booms out of ASTM A500 GR.50 structural tubing that meets the 50,000 psi minimum yield strength requirement and features a minimum tensile strength of 62,000 psi. Furthermore, the equilateral shape provides greater strength in the vertical plane than a 6" x 4" tube.

**Answer: Will accept.**

**17. 3.2.5.5** All hinge points shall be T-1 steel reinforcement.

**Question:** Since T-1 is a trade name, could you consider rewriting the specification to read, All hinge points shall include High Strength Low Alloy (HSLA) steel reinforcement.

**Answer: Yes. Will change to read: All hinge points shall be high strength low alloy steel reinforced.**

**18. 3.2.6.2** Top deck shall be A606 alloy steel 10 gauges or equal.

**Question:** Will the state change the specification as follows to allow for this rotary deck?

**Note: This is the same verbiage used in CRQF 20\*53, 3.2.6.2**

Top deck shall be 110,000 PSI yield Domex® or equal 1/8-inch thick minimum, continuously welded for strength.

**Answer: Yes. Will accept.**

**19. 3.2.6.3** Side skirts shall be a minimum of 3/8-inch steel.

**Question:** Will the state change the specification as follows to allow for 1/4" side skirt?

**Note: This is the same verbiage used in CRQF 20\*53, 3.2.6.3**

Side Skirts shall be a minimum of 1/4 inch steel.

Bengal boom mower side skirts are constructed of 110,000 PSI yield Domex® steel 1/4" thick side skirts.

**Answer: Yes. Will accept.**

**20. 3.2.6.6** Spindle bearings shall be tapered roller type in a sealed housing, to support 4 1/2-inch minimum diameter spindle drive shaft.

**Question:** Will the state change the specification as follows to allow this spindle?

**Note: This is the same verbiage used in CRQF 20\*53, 3.2.6.6**

The 60" rotary mower deck has a one piece forged and heat-treated spindle. It has an integral 7 1/4" O.D. drive hub.

**Answer: Yes. Will accept.**

**21. 6.1 Delivery Time: Delivery Time:** A completed pilot model for inspection must be provided within 120 working day(s) after receipt of the pilot model order, by the successful vendor. Vendor shall deliver standard orders within 180 working days after orders are received Working day is defined as any week day, Monday thru Friday, excluding Federal and State Holidays. Vendor shall ship all orders until a minimum delivery quantity is met.

**Question # 1:** Is this 180 working days after the Pilot is accepted?

**Question # 2:** We would ask that the delivery be extended by 30 working days, so 150 working days for the pilot model and 210 working days for the balance.

**Answer: Question #1. After the pilot is accepted you have 180 days to fill orders placed.  
Question #2. Yes. Will accept**

**22. Terms & Conditions: 15. PREFERENCE:** Vendor Preference may be requested in purchases of motor vehicles or construction and maintenance equipment and machinery used in highway and other infrastructure projects. **9. BID FORMATTING:** Vendor should type or electronically enter the information onto its bid to prevent errors in the evaluation. Failure to type or electronically enter the information may result in bid disqualification.

**10. ALTERNATE MODEL OR BRAND:** Unless the box below is checked, any model, brand, or specification listed in this Solicitation establishes the acceptable level of quality only and is not intended to reflect a preference for, or in any way favor, a particular brand or vendor. Vendors may bid alternates to a listed model or brand provided that the alternate is at least equal to the model or brand and complies with the required specifications. The equality of any alternate being bid shall be determined by the State at its sole discretion. Any Vendor bidding an alternate model or brand should clearly identify the alternate items in its bid and should include manufacturer's specifications, industry literature, and/or any other relevant documentation demonstrating the

equality of the alternate items. Failure to provide information for alternate items may be grounds for rejection of a Vendor's bid.

This Solicitation is based upon a standardized commodity established under W. Va. Code § 5A-3-61. Vendors are expected to bid the standardized commodity identified. Failure to bid the standardized commodity will result in your firm's bid being rejected.

**11. EXCEPTIONS AND CLARIFICATIONS:** The Solicitation contains the specifications that shall form the basis of a contractual agreement. Vendor shall clearly mark any exceptions, clarifications, or other proposed modifications in its bid. Exceptions to, clarifications of, or modifications of a requirement or term and condition of the Solicitation may result in bid disqualification.

**12. COMMUNICATION LIMITATIONS:** In accordance with West Virginia Code of State Rules §148-1-6.6, communication with the State of West Virginia or any of its employees regarding this Solicitation during the solicitation, bid, evaluation or award periods, except through the Purchasing Division, is strictly prohibited without prior Purchasing Division approval. Purchasing Division approval for such communication is implied for all agency delegated and exempt purchases.

**13. REGISTRATION:** Prior to Contract award, the apparent successful Vendor must be properly registered with the West Virginia Purchasing Division and must have paid the \$125 fee, if applicable.

**14. UNIT PRICE:** Unit prices shall prevail in cases of a discrepancy in the Vendor's bid.

**15. PREFERENCE:** Vendor Preference may be requested in purchases of motor vehicles or construction and maintenance equipment and machinery used in highway and other infrastructure projects. Any request for preference must be submitted in writing with the bid, must specifically identify the preference requested with reference to the applicable subsection of West Virginia Code § 5A-3-37, and should include with the bid any information necessary to evaluate and confirm the applicability of the requested preference. A request form to help facilitate the request can be found at:

<http://www.state.wv.us/admin/purchase/vrc/Venpref.pdf>.

**15A. RECIPROCAL PREFERENCE:** The State of West Virginia applies a reciprocal preference to all solicitations for commodities and printing in accordance with W. Va. Code § 5A-3-37(b). In effect, non-resident vendors receiving a preference in their home states, will see that same preference granted to West Virginia resident vendors bidding against them in West Virginia. A request form to help facilitate the request can be found at:

<http://www.state.wv.us/admin/purchase/vrc/Venpref.pdf>.

**16. SMALL, WOMEN-OWNED, OR MINORITY-OWNED BUSINESSES:** For any solicitations publicly advertised for bid, in accordance with West Virginia Code §5A-3-37(a)(7) and W. Va. CSR § 148-22-9, any non-resident vendor certified as a small, women-owned, or minority-owned business under W. Va. CSR § 148-22-9 shall be provided the same preference made available to any resident vendor. Any non-resident small, women-owned, or minority-owned business must identify itself as such in writing, must submit that writing to the

Purchasing Division with its bid, and must be properly certified under W. Va. CSR § 148-22-9 prior to contract award to receive the preferences made available to resident vendors. Preference for a non-resident small, women-owned, or minority owned business shall be applied in accordance with W. Va. CSR § 148-22-9.

**17. WAIVER OF MINOR IRREGULARITIES:** The Director reserves the right to waive minor irregularities in bids or specifications in accordance with West Virginia Code of State Rules § 148-1-4.6.

**18. ELECTRONIC FILE ACCESS RESTRICTIONS:** Vendor must ensure that its submission in wvOASIS can be accessed and viewed by the Purchasing Division staff immediately upon bid opening. The Purchasing Division will consider any file that cannot be immediately accessed and viewed at the time of the bid opening (such as, encrypted files, password protected files, or incompatible files) to be blank or incomplete as context requires, and are therefore unacceptable. A vendor will not be permitted to unencrypt files, remove password protections, or resubmit documents after bid opening to make a file viewable if those documents are required with the bid. A Vendor may be required to provide document passwords or remove access restrictions to allow the Purchasing Division to print or electronically save documents provided that those documents are viewable by the Purchasing Division prior to obtaining the password or removing the access restriction.

**19. NON-RESPONSIBLE:** The Purchasing Division Director reserves the right to reject the bid of any vendor as Non-Responsible in accordance with W. Va. Code of State Rules § 148-1-5.3, when the Director determines that the vendor submitting the bid does not have the capability to fully perform, or lacks the integrity and reliability to assure good-faith performance.”

**42. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS:** Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open heath, basic oxygen, electric furnace, Bessemer or other steel making process. The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:
- c. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or
- d. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

**43. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL:** In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a

“substantial labor surplus area”, as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products. This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

## Deluxe Selective Control Valves (300, 301, and 450 Series)

CQ294041-UN-31JUL12

A - Constant Flow

B - Detent

C - No Lock

Deluxe selective control valves have three functions that are selected with the control knob at the top of the valve:

**A** - Constant flow function maintains the engaged SCV lever in the Raise or Lower position until it is manually moved. Use this function to supply equipment that requires a constant oil flow, such as hydraulic motors.

**B** - Detent function keeps the SCV lever in the Raise or Lower position until the hydraulic system pressure reaches a predetermined value, for example: when a hydraulic cylinder reaches the limit of its travel. After that, the SCV lever automatically returns to the Neutral position.

**C** - In this position, no lock is engaged. The SCV lever returns to Neutral position when released.

The pressure connection (for example, the extendible cylinder) can be connected to the lower or upper quick coupler.

These selective control valves prevent loss of pressure through leaks when the engine is stopped.
